But what have we here? It is an open secret that the miner, and the railroad man, and the man that works in the making of munitions, and the skilled worker in the construction of that which is necessary to carry on the war is not to be conscripted. If, after we conscript the people that are liable to conscription, there is a shortage in fuel or a shortage in people who operate the railways, who are not conscripted here at home and not in the trenches abroad, and they see fit to say, "Oh, we will strike," with all that that means; "we will walk out, we will not operate your railway, we will tie it up," with perhaps no chance to supply their places, under the war power of the Government the President ought to have, and I believe he does have and would have, even, perchance, if this amendment were to be adopted, the power to say, "You shall not conspire and call out your employees. One man can quit; yes, two can quit. But you shall not enter into a conspiracy to walk out and tie up that mine or that railroad." [Applause.]

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. CANNON. It is necessary to have the coal. It is necessary to have it transported. Therefore if the amendment means that the effect of it would be not to prevent such action upon the part of American citizens in war time, then I am against the amendment. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. LEVER. Mr. Chairman, I am in sympathy with the amendment offered by the gentleman from Colorado [Mr. KEATING] on general principles, but, as stated by the gentleman from Illinois [Mr. CANNON], we are in a state of war, and we have provided in this bill, we have made it unlawful in this bill, and later on we shall offer an amendment to attach a penalty to those who conspire or combine, agree, or arrange with any other person to do the following things: "To limit the facilities for transporting, producing, manufacturing, supplying, storing, or dealing in necessaries," and "necessaries" are defined to be food, something to eat, and fuel, something to keep the body warm. In addition, "to restrict the supply of any of the necessaries during this period of war; to restrict the distribution of any of the necessaries during this period of war; to prevent, limit, or lessen the manufacture or production of any of the necessaries, or to enhance the price of necessaries during the progress of this war."

We do not believe—and the matter was thoroughly discussed in the Committee on Agriculture—that this section in any wise serves to repeal or amend in the least particular either the Clayton Antitrust Act or any other act which deals with the right of men to strike for purposes of increasing their wages or bettering their living conditions. We do not believe that this affects that in the least. I do not believe that there is a member of the committee that would feel that we would have a right to come upon the floor of this House and ask the Congress to say that an individual, acting in his individual capacity, should not have the right to quit work whenever he got ready to quit work. But we do believe, as a war proposition, pure and simple, that there should not be permitted a combination of any class of citizens to conspire together for the purpose of limiting the food or fuel necessities of this country.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. LEVER. I will yield for a question.

Mr. KEATING. Let us get the issue cleared up. Let us get a concrete case. Suppose that men engaged in work on the railroads of the country—we will say, the telegraph operators on a particular line in this country—decided to strike. Is it the object of the gentleman, and is it the object of this bill, that the power shall be vested in some one to compel those men to go back to work? Let us face the issue squarely, and if that is not your purpose, why not adopt this amendment?

Mr. LEVER. I am glad to face the issue very squarely. If there were such a combination to strike for the purpose of bettering living conditions or increasing wages there is no purpose in this bill, and there is no authority in this bill, to prevent it. But if these men shall get together—and nobody dreams that they are ever going to do this, because they are as patriotic a class of citizens as live in this country—but if by any chance they should get together and strike for the purpose of enhancing the price of food and fuel, for the purpose of limiting the production of food and fuel, for the purpose of limiting the transportation facilities of food and fuel which may be needed for the Army and Navy at the front, or which may be needed for the feeding of the industrial millions in our cities, then this language will get them, and it ought to get them. [Applause.]

Mr. SNYDER. Mr. Chairman, just a question.

Mr. HUDDLESTON. Will the gentleman yield for a question?

Mr. LEVER. I yield to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. The gentleman states that there is no intention to repeal the Clayton antitrust law?

Mr. LEVER. There is not only no intention to do that but the Clayton antitrust law is not touched with a 40-foot pole in this amendment.

Mr. HUDDLESTON. Then why is not the gentleman willing to make it absolutely sure by adopting this amendment?

Mr. LEVER. Why not put in this bill a provision that it shall not apply to the cotton-futures act, or the cattle-tick act, or some other act? Why not put in here a provision exempting every statute of the United States?

Mr. SNYDER. Will the gentleman yield for just one statement?

Mr. LEVER. Certainly.

Mr. SNYDER. I want to say that I have received a telegram this morning from 1,000 men, claiming to be organized union men in the city of Little Falls, from which I come, asking me to vote for this bill just as it is. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. KEATING].

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. HUDDLESTON. I ask for a division.

The committee divided; and there were—ayes 9, noes 88.

Accordingly the amendment was rejected.

Mr. GREEN of Iowa. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. GREEN of Iowa: At the end of section 4, as part thereof, add the following as a new paragraph:

"If any person aggrieved by the violation of any of the provisions of this section shall file with a district attorney of the United States a complaint under oath alleging and specifying such violation, or if any district attorney of the United States is credibly informed or believes that the provisions of this section are being violated, or if he be directed by the President, then such district attorney shall forthwith, in the name of the United States, file a complaint or bill against the alleged violator in the district court of the United States having juris-

diction of the parties, setting forth such violations, and praying that a temporary injunction issue enjoining the defendant against continuing the acts therein set forth as in violation of law. Upon the filing of such a bill as hereinabove required, the court in which the same is filed, or any judge thereof, is hereby granted jurisdiction to hear and try the said application for temporary writ of injunction. Such hearing may be upon affidavits or upon oral testimony, and notice in writing thereof shall be served upon the defendant at least three days prior to the time fixed by the court or judge for said hearing; and at the conclusion thereof if the court or judge finds that there is reasonable cause to believe that the provisions of this section, or any of them, have been violated by a defendant therein a temporary writ of injunction shall issue enjoining such defendant from further violations, which injunction shall remain in force until the further order of the said court or judge. Thereafter the court shall proceed to final judgment or disposition of the case in the manner applicable to ordinary suits in equity. If a continuance of the hearing on the application for temporary injunction be granted at the instance of defendant, the temporary injunction as prayed shall issue as a matter of course."

Mr. LEVER. Mr. Chairman, will the gentleman from Iowa yield for a moment? I think probably we can get to an agreement on this. I will say to the gentleman from Iowa that it is my intention, on my own initiative, after some consultation with members of the committee individually, to offer a new section to this bill, which I wish to read for the gentleman's information.

Mr. GREEN of Iowa. Mr. Chairman, this will not be taken out of my time?

Mr. LEVER. No.

The CHAIRMAN. The Chair will see that the gentleman gets his time.

Mr. LEVER. My proposed new section is:

SEC. 8½. That any person who conspires, combines, agrees, or arranges with any other person (a) to limit the facilities for transporting, producing, manufacturing, supplying, storing, or dealing in any necessaries, (b) to restrict the supply of any necessaries, (c) to restrict the distribution of any necessaries, (d) to prevent, limit, or lessen the manufacture or production of any necessaries, or (e) to enhance the price of any necessaries shall, upon conviction thereof, be fined not exceeding $10,000 or be imprisoned for not more than two years, or both.

The gentleman is undertaking to do that which the committee did not do, namely, to penalize conspiracies to do certain things. The committee has in section 4 penalized practically everything else. For instance, we have penalized the willful destruction of necessaries for the purpose of enhancing the price or restricting the supply. In section 5 we have penalized the permitting of waste knowingly and the permitting of preventable deterioration. We have also penalized hoarding and monopolizing, or attempting to monopolize, or to charge discriminatory or unfair rates, or the practicing of deceptive methods in the conduct of business. We have done that in section 5, but we have not penalized the proposition to combine, conspire, agree, or arrange with any other person to do the thing set forth in the amendment which I shall later offer. The gentleman undertakes now to penalize by way of injunction. We are proposing in this amendment to penalize by direct penalty. I wonder if the gentleman would not prefer this to his own proposition.

Mr. GREEN of Iowa. If the gentleman will permit, I will state why it seems to me that the proposition I present would be the better one, or at least it might be well to include both. And as this is a very important matter, I would like to have unanimous consent to proceed for 10 minutes.

Mr. LEVER. Then I ask unanimous consent, before the gentleman proceeds, that the debate on this amendment shall close in 20 minutes.

Mr. SWITZER. I would like five minutes.

Mr. KEATING. I would like five minutes.

Mr. LEVER. Then I ask unanimous consent that the debate on this section and all amendments thereto shall conclude in 35 minutes, of which the gentleman from Iowa [Mr. GREEN] is to have 10.

Mr. IGOE. I would like five minutes.

Mr. GOOD. I would like five minutes.

Mr. LENROOT. I would like five minutes.

The CHAIRMAN. The Chair would like to see if he has a correct memorandum of the time desired: The gentleman from Iowa [Mr. GREEN], 10 minutes; the gentleman from Missouri [Mr. IGOE], 5 minutes; the gentleman from Iowa [Mr. GOOD], 5 minutes; the gentleman from Ohio [Mr. SWITZER], 5 minutes; the gentleman from Wisconsin [Mr. LENROOT], 5 minutes; the gentleman from Colorado [Mr. KEATING], 5 minutes; and the chairman of the committee, 5 minutes—40 minutes in all.

Mr. LEVER. That is the request I make, Mr. Chairman.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this section and all amendments thereto shall be concluded in 40 minutes. Is there objection?

There was no objection.

Mr. GREEN of Iowa. Mr. Chairman, with much that was said a short time ago by the gentleman from Mississippi [Mr. STEPHENS] in the opening of his remarks I am in sympathy.

I do not think the fact that any gentleman offers an amendment to this bill shows that he is opposed to it, or that he is disposed to criticize the members of the Committee on Agriculture. On the contrary, at least so far as I myself am concerned, I greatly appreciate the labors of the Committee on Agriculture and congratulate them on the good work that they have done. I think, however, that the members of the Committee on Agriculture must feel as all members of committees who have been compelled to offer important measures at this session have felt, that having little in the way of precedents to guide and much to accomplish in the task which they have been called upon to perform, that they are disposed to welcome suggestions that might tend to the improvement of the bill. For myself I am not proposing to limit any powers conferred by this bill, and the amendment which I offer does not limit any powers but, on the contrary, increases the power of the administration, and also gives power to the individual himself who is aggrieved by a violation of the terms of this section to interpose in his own behalf and see that some remedy is granted to him.

The gentleman from South Carolina [Mr. LEVER] has said that he proposes to offer an amendment which will provide a penalty for the violation of certain acts forbidden in this section which are not now penalized under the terms of the bill. At the time this section was being discussed in general debate it was stated by the gentleman from Minnesota [Mr. ANDERSON] that it was thought not advisable to impose any penalty for the reason that the provisions were so broad and so sweeping that it might in some way act as a deterrent on business activity. With that expression I am somewhat disposed to agree, and while the gentleman from South Carolina has stated that I proposed to impose a penalty by the amendment I have offered for violation of any of the acts forbidden in this section, as a matter of fact that is not strictly correct. What I propose is the injunctive remedy under sections of this bill whereby any person violating any of its provisions will first be warned, and then if he continues to violate the act will be visited with summary punishment by the courts.

The reason I do this is that it is notorious that notwithstanding the many acts. sweeping and powerful as they seem to be, which we have for the purpose of destroying monopolies and preventing combinations, and to stop extortion, that nevertheless it is conceded on all hands that all over this country such acts are still going on in spite of the courts and in spite of action taken to punish the offenders; for that reason I have proposed an injunctive and summary remedy whereby any trial by jury is unnecessary, and at the same time the offender has the fullest opportunity to be heard and an opportunity to desist, if he will, from his unlawful practices before he is visited with any punishment.

This remedy has been found effectual, and the only effectual remedy in a large number of instances. We found it effectual in the State of Iowa in enforcing the law against the sale of intoxicating liquors that never could have been enforced under the ordinary process of law with a trial by jury. It is also found to work well in relation to the interstate-commerce act, which could not be completely enforced by trial by jury, and where in a large number of cases the trial by jury has utterly failed. The same difficulty has been found in the enforcement of the Sherman Antitrust Act, sweeping and broad as are its provisions, drawn by some of the greatest lawyers that ever lived in the country, but as to which, nevertheless, the greatest difficulty has been found in finding evidence which would enable the jury, impressed with the idea that they must resolve every reasonable doubt in favor of the defendant, with the thought that convictions are necessary, and the further matter always arising in the minds of the jury that the defendant must be visited with a sentence, and the court brands him as a criminal offender, which often deters juries from finding a conviction in such cases.

The remedy which I have offered is free from all these objections. It is easily, quickly, and summarily enforced, and at the same time it protects the rights of every party who may perhaps innocently violate the law. It will not interfere with business nor will it deter it in any of its activities. Notwithstanding the further amendment which the gentleman from South Carolina intends to offer, I hope that this amendment will be accepted. [Applause.] I yield back the balance of my time.

Mr. IGOE. Mr. Chairman, I am opposed to the amendment offered by the gentleman from Iowa. I think this section 4 ought to remain as it is, a section in which things are declared

to be unlawful, but without any penalties. I think it was the theory of the person who drew this bill that sections 3 and 4 were necessary in connection with section 5, the licensing section.

The gentleman from Wisconsin [Mr. LENROOT], in his very able speech, called attention to section 5, the licensing section, and said that in his opinion it contained a delegation of legislative power to the President, and cited the case of the United States against Grimaud. It seems to me that the draftsman of this bill sought to avoid that very delegation of legislative power, and in section 3 provided that there should be a governmental control of all necessaries, and nothing could be broader than that; and then in section 4 certain things were prohibited and declared to be unlawful, but no penalties were attached. Now, the purpose of these sections was to lead up to section 5, which contains, to my mind, one of the greatest powers in this bill, the power to license and control, through the President, various business activities.

It seems to me that we have expressly declared through the legislative body in section 3 that there is governmental control. In section 4 we declare certain things to be unlawful. Both of these are legislative declarations; and there can be no question of its being left to the President or Executive to say that these things are unlawful, and consequently there is no delegation of legislative power.

So, when you come to section 5, which seems to be woven in and bound up with sections 3 and 4, it is essential that these prohibitions be retained in section 4, so that when the President comes to exercise the licensing power under section 5 there will be no delegation of legislative authority by the Congress of the United States to the President.

The licensing section provides that the President may under certain circumstances do certain things, and then, if certain practices are indulged in, which are declared to be unlawful in section 4, upon the commission of those offenses the penalties provided in section 4 shall attach.

Mr. GARD. Mr. Chairman, will the gentleman yield?

Mr. IGOE. Yes.

Mr. GARD. I would like to know what the gentleman's idea is about section 4, making certain named things unlawful and carrying no punishment therefor?

Mr. IGOE. The punishment is provided in section 5. For instance, it is only intended to punish these things in section 4 when they are repeated as violations of the restrictions or regulations which the President imposes under his licensing power. Section 5 expressly provides, in almost the exact language of section 4, that if in violation of an order by the President certain people do certain things which are mentioned in section 4, then, and in that case only, does the penalty attach. So I say that section 4, it seems to me, is vital, and was purposely drawn as it is, without any penalty provision, so that it might in connection with the power to license contained in section 5 render perfectly constitutional section 5 as it has been drawn. For that reason I think the section should remain as it is.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. IGOE. Yes.

Mr. LENROOT. I thoroughly agree with the gentleman's position that section 4 lays the foundation for subsequent acts; but, as the gentleman will remember, my contention of delegation of power in section 5 was not that the things have not been prohibited, but that they do not go into effect except at the will of the President.

Mr. IGOE. I say that section 3, concerning which we have had considerable debate, is essential also to section 5, because nothing can be broader than the declaration by Congress "that there is hereby established a governmental control of necessaries." What could be broader than that? In that section we say that for the purpose of this act as hereinafter provided the administration of that control shall be left to the President, and so when you come to section 5 and read it in connection with sections 3 and 4 the whole thing is perfectly clear, and I do not believe it ought to be changed at all.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. GREEN of Iowa. Mr. Chairman, may I be recognized for a moment for a suggestion? The ranking Republican on the Committee on Agriculture, Mr. HAUGEN, has suggested to me that instead of offering the amendment which I have just presented at this time I offer it as an amendment, that is, the purport of it, to the amendment which the gentleman from South Carolina [Mr. LEVER] has announced he will offer later on, and combine the two in case the House sees fit to approve of my amendment in that connection. In deference to the gentleman's suggestion, and I think he agrees with me personally so far as my amendment is concerned, I now ask unanimous consent to withdraw my amendment without prejudice and to offer it as such amendment later on.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. LENROOT. Mr. Chairman, I do not propose to discuss the merits of the amendment pending except to say a word with reference to the spirit in which it should be considered. The gentleman from Ohio [Mr. BATHRICK] a little while ago undertook to read to this House a lecture and to terrify Members by making the charge that any one who proposes amendments to this bill is an enemy to the bill. I have proposed amendments to this bill and I shall propose others, and I resent the charge made by the gentleman. I am sure the chairman of the committee, Mr. LEVER, will be the first to admit that my interest in and activity upon this bill is a friendly interest and not an antagonistic one. But, Mr. Chairman, the gentleman from Ohio made another statement, and that was that in his view this House should shut its eyes upon all bills presented at this session of Congress by any committee and vote for those bills irrespective of what they contain, and in substantiation of that statement or alleged substantiation he made the statement that this House had emasculated the great bills that had come before the House during this present session. I do not see him in the Hall, but if I did I would be glad to ask him to point out what bills the House has emasculated through amendments that the House has made. Was it the revenue bill where the House increased the income tax as proposed by the committee over $60,000,000? If that was one that he refers to, I want to remind the gentleman that he himself voted for that amendment if that was emasculation.

Was it the Army bill, creating the selective draft? The House will remember that it overturned the report of the committee, and upon leadership conducted by this side of the House amended that bill for the selective draft. Was it that measure that the gentleman refers to as having been emasculated by the House? If it was, he himself is one of the guilty parties, for he voted with the Republican side for that selective-draft amendment to the Army bill.

Oh, Mr. Chairman, the gentleman is the last man in the House who has any right to make any charge of that kind, and there are men upon both sides of the aisle who have offered amendments to these various bills, and who have discussed them, who have done more for their country in this hour than the gentleman could do by shutting his eyes and voting for everything that may be proposed. [Applause.]

Mr. OVERMYER. Mr. Chairman, the gentleman from Iowa having withdrawn his amendment, I suggest that the Clerk read. There is no amendment now pending that I know of.

Mr. SWITZER. Mr. Chairman, I was to have five minutes.

The CHAIRMAN (Mr. SAUNDERS of Virginia). The Chair understands the agreement was that debate upon the section and amendments thereto should run a certain time. It makes no difference whether the amendment has been withdrawn; that was the unanimous-consent agreement and gentlemen are entitled to talk under it. The gentleman from Ohio is recognized.

Mr. SWITZER. Mr. Chairman, I expect to vote for this measure or any similar measure that may come up at this session of Congress which I believe under a wise and proper administration may bring relief to the people of this country from the exorbitant prices of food products and fuel, but I am not like a couple of my colleagues who have spoken here from Ohio—willing to stand here and say that I will not vote for any proposed amendment to the bill. I have voted for amendments to this bill, and I expect to vote for other amendments which I believe will perfect and make it a much better bill. I do not understand that the Committee on Agriculture itself believes that this measure is the quintessence of all wisdom upon this subject, because the chairman of the Committee on Agriculture has just stated that they propose to bring in an additional and new amendment as a section to the bill; so it seems as if this is not, in the mind of the Committee on Agriculture, a perfect bill, and I rather believe that this committee can assist a good deal in improving it.

I do not propose to discuss the amendment proposed by the gentleman from Iowa [Mr. GREEN] further than to say that I believe that the conditions are such in this country that we have got to give to the Chief Executive such power that if he uses it unwisely, if he does not use it in an efficient manner, it is going to bring a great deal of trouble and a great deal of injury to the people, especially producers of food products, but in order to eliminate and to obviate the evil practices which are abroad now throughout the land it is necessary to give to the President great power, and we have finally to depend upon a wise, efficient, and proper administration of that power solely.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. SWITZER. I will.

Mr. GREEN of Iowa. The gentleman recognizes, of course, that my amendment did not in any way limit the power.

Mr. SWITZER. I understand that, and I believe that the time has come when we have got to give a one-man power; that you have got to trust to one man to some extent summarily to exercise that power without resorting to the courts and other machinery we use in peace times. I do not know just how I am going to vote on the amendment of the gentleman, but I want to say a word or two in reference to a great many assertions on the floor of this House that it is the purpose of this bill to decrease the price of necessaries to the consumer and still not decrease the price that the producer is to receive for them. I am willing, sir, to vote for this measure and similar measures, but I am not willing to undertake to deceive the producer. There is not a man within the sound of my voice who does not know that but for the hard conditions under which the consumer is now laboring you would never have heard of this bill. I, in a small way, have grown food products years ago. With my own hands I have raised, have produced crops of corn and wheat and have sold them below the cost of production. So has every other man who has farmed 25 or 30 years ago. The object of this bill is to reduce food prices to the consumer, and I want to say to you further that after you eliminate the so-called middleman's profits and speculators' graft, and all of that thing, you are not then going to be able to bring food and fuel prices down within the reach of the ordinary laboring man who is working for two or three dollars a day.

I am in receipt of a letter from my district, and I represent a coal-producing district as well as an agricultural district, and also a pig-iron district, stating that coal-mine owners in that district are making 100 per cent profit on coal at the mouth of the mines; 100 per cent upon the cost of production. Now, if you get rid of all the coal brokers—and I do not believe you can reduce to a very great extent transportation charges on coal—you will still have the 100 per cent profit to deal with, will not you? So you have got also to go after the producer, and what is true as to the coal situation is just as true relative to the wheat situation. Why, the proponents of this measure believed that it would affect the products of the farmers adversely, so they have exempted them from many of the provisions of the act. They have also put in a stimulating section proposing to guarantee a minimum price to farmers. Why? Because they knew that the result of all this legislation would work a reduction in the price the farmer would probably receive for his wheat next fall. I do not know but what the wheat price will have to be reduced somewhat. Why try to deceive the people? The success of this measure is going to depend entirely upon its wise and efficient administration, and the man who wields the power given by this bill in reducing the prices of food products to the consumer must also keep his eye closely upon the welfare, the prosperity, of the producer and preserve the incentives for increased production or he will bring chaos to the agriculture industry and disaster to the people of this country. [Applause.]

Mr. GOOD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GOOD. Is there an amendment pending before the committee?

The CHAIRMAN. There is—the Clerk corrects the Chair, there is not.

Mr. GOOD. Mr. Chairman, I desire to speak to an amendment which I desire to offer and wish to have acted upon.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GOOD: Page 4, end of line 5, add a new paragraph, as follows:

"That it is hereby made unlawful for any person to sell any article of fuel in excess of the price at which such person sold any similar article of fuel of like grade on July 1, 1916: *Provided, however*, That if the cost of production or transportation of any such article of fuel shall exceed like costs on July 1, 1916, the President is authorized to issue a permit granting any person affected by any such increase the right to increase the price at which such person may lawfully sell any such article of fuel in excess of the price of July 1, 1916, but any such increase shall not exceed the total actual increases in the cost of production or transportation over the cost of production and transportation on July 1, 1916. Any person willfully violating any of the provisions of this paragraph shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or imprisoned for not more than two years, or both."

Mr. ANDERSON. I reserve a point of order on the paragraph.

Mr. GOOD. Mr. Chairman, when the national-defense act was up for consideration in the House I offered an amendment that was agreed to and is now a part of the law giving the President the power to commandeer any factory in the United States if the prices demanded for the product of that factory necessary for the war was unreasonable. I have been in favor of delegating all necessary authority in the hands of the President in order to permit him to organize the military forces of the United States to wage this war successfully. We are now engaged in the consideration of a bill that goes further than that. That bill related to war supplies and equipment. This bill takes into consideration those necessaries of the ordinary consumer. The chairman of the committee the other day gave a long list of agricultural products where the prices had gone up from 25 to 100 per cent. Unquestionably the price of many food products is unreasonable and should be regulated. But the price of coal has advanced much more than has the price of food. I have here a page from the Coal Age of June 16, 1917, giving the comparative prices of coal in the United States.

You will be amazed to find that Clearfield coal that sold at the mine last year at $1.05 per ton now sells for $4.25 per ton. I quote the following from the Coal Age of June 16, 1917:

COMPARATIVE AVERAGE COAL PRICES.

The following table gives the range of mine prices in car lots per gross ton, except where otherwise noted, on 12 representative bituminous coals over the past several weeks and the average price of the whole group for each week:

	Year ago.	June 16.	June 9.
Boston:			
Clearfields	[1] $1.05 to $1.55	$4.75 to $5.50	$4.75 to $5.50
Cambrias and Somersets	1.30 to 1.75	5.00 to 5.75	5.00 to 5.75
Pocahontas and New River [2]	[1] 2.80 to 2.85	7.50 to 8.00	7.50 to 8.00
Philadelphia:			
Georges Creek (Big Vein)	1.90 to 2.00	6.00 to 6.25	6.25 to 6.50
West Virginia, Freeport	1.15 to 1.25	5.25 to 5.50	5.25 to 5.50
Fairmont, gas, mine-run	[1] 1.45 to 1.55	5.25 to 5.50	5.75 to 6.00
Pittsburgh (steam coal): [3]			
Mine-run	[4] 1.55 to 1.65	[4] 4.50 to 5.00	4.75 to 5.00
¾-inch	[4] 1.65 to 1.75	4.50 to 5.00	4.75 to 5.00
Slack	[4] 1.50 to 1.60	5.00 to 5.25	4.75 to 5.00
Chicago (Williamson & Franklin Co.): [2]			
Lump	[1] 1.50 to 1.60	3.50 to 3.75	3.25 to 3.75
Mine-run	[4] 1.20 to 1.30	3.00 to 3.50	2.75 to 3.50
Screenings	[1] .95 to 1.05	3.00 to 3.75	2.75 to 3.75
Gross average [5]	[4] 1.50 to 1.66	4.77 to 5.23	4.80 to 5.24

[1] Price higher than the previous week.
[2] F. o. b. Norfolk and Newport News.
[3] Per net ton.
[4] Price lower than the week before.
[5] The highest average price made last year was $4.80 to $5.33 made on Nov. 25.

Gross averages.

	1917	1913
Feb. 3	$4.66 to $4.86	$1.94 to $2.10
10	4.70 to 4.95	1.73 to 1.91
17	4.67 to 5.04	1.71 to 1.90
24	4.95 to 5.29	1.64 to 1.84
Mar. 3	5.10 to 5.48	1.56 to 1.74
10	5.36 to 5.61	1.53 to 1.63
17	4.80 to 5.19	1.46 to 1.65
24	4.64 to 4.94	1.49 to 1.66
31	4.20 to 4.44	1.46 to 1.61
Apr. 7	4.07 to 4.36	1.44 to 1.60
14	4.01 to 4.35	1.45 to 1.61
21	3.83 to 4.14	1.46 to 1.62
28	3.81 to 4.12	1.45 to 1.62
May 5	4.04 to 4.40	1.45 to 1.59
12	4.64 to 4.98	1.44 to 1.59
19	5.08 to 5.54	1.42 to 1.58
26	5.10 to 5.53	1.41 to 1.55
June 2	5.00 to 5.46	1.47 to 1.63

If the amendment I have offered is adopted it will be unlawful to sell coal in excess of the price of a year ago unless the cost of production or transportation has since increased. In either such case the President would be authorized to permit an increase in the price covering such increases either in the cost of production or transportation.

The question of the price of coal does not touch alone the consumer that burns coal. It affects every man who buys gas from a gas company, every man who buys electricity or electric power from an electric light company. All over the country electric light and power companies and gas companies are asking city councils or public-utility commissions having authority to fix rates to permit them to increase their rates because the price of fuel has increased beyond all reasonable bounds. In some instances such increases will be necessary, or the companies furnishing the utility will be forced to the wall. The burden, therefore, is on us to protect the consumer and also to protect legitimate investments in these great utility concerns.

I am in favor of this bill. I am in favor of giving the President all the power necessary not only to secure the necessary supplies for the Army and the Navy at a reasonable price but to insure the hundreds of millions of our people the privilege at all times of buying all of the necessaries of life in a market free from the control of the manipulator, the speculator, and the price fixer. I want to commend the President in selecting Mr. Hoover for the position of food administrator. He is not interested in either the production or the handling of foodstuffs, and would, therefore, be free to act so far as his personal interests were concerned. Unfortunately this is not true of the men who have been appointed to control the price of coal. The price of coal is to be regulated by the committee on coal production, which is a subordinate committee of the Council of National Defense. This committee is composed of the following persons:

F. S. Peabody, president Peabody Coal Co., Chicago (chairman).

E. J. Berwind, president Berwind-White Coal Mining Co., New York.

W. W. Keefer, president Pittsburgh Terminal Railroad & Coal Co., Pittsburgh.

Van. H. Manning, Director Bureau of Mines, Washington, D. C.

C. M. Moderwell, president United Coal Mining Co., Chicago.

E. L. Pierce, vice president Semet Solvey Co., Syracuse.

Erskine Ramsey, vice president Pratt Consolidated Coal Co., Birmingham.

G. O. Smith, Director United States Geological Survey.

J. J. Storrow (Lee, Higginson & Co.), chairman Massachusetts Committee on Public Safety.

H. N. Taylor, vice president Central Coal & Coke Co., Kansas City.

S. D. Warrimer, president Lehigh Valley Coal & Navigation Co., Philadelphia.

J. F. Wellborn, president Colorado Fuel & Iron Co., Denver.

D. B. Wentz, president Stonega Coal & Coke Co., Philadelphia.

George W. Reed, secretary.

It will be observed that there are 14 persons' names on this coal committee. Ten of these persons are among the largest coal operators in the United States, and only four are disinterested from a financial standpoint, so far as coal production is concerned. And I submit that it is only fair that Congress shall write into this law a provision that will make it impossible for any committee charged with the important duty of fixing the price on their own commodity to fix it at an abnormal and unreasonable price. We ought to make it as unpopular for a man to increase the price of the necessaries of life because of the European war more than 300 per cent as it is unpopular for a man to follow in the wake of a storm or an earthquake and rob the dead. In no other industry that I can call to mind has the price of a commodity advanced so much as has the price of coal during the past year—almost 400 per cent. And the consumer is forced to pay this price. This question touches every man, every woman, and every child; it affects every household. Let me remind you that one can freeze to death a great deal quicker than he can starve to death, and unless something is done to relieve the people from the exactions of a wicked coal monopoly, whose operators are violating the law, hundreds of thousands of our people will feel the sting of cold, and many of them may even freeze to death. I think it is only fair to put into this bill some provision that will absolutely put a stop to these constantly increasing prices of coal and forever put an end to this vicious practice. The amendment which I have offered will accomplish these results.

The CHAIRMAN. The time of the gentleman has expired. Does the gentleman from Minnesota [Mr. ANDERSON] insist on his point of order?

Mr. ANDERSON. I do not think myself it is subject to a point of order.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the amendment be again reported, with the reservation of the point of order pending.

The CHAIRMAN. The Clerk will again report the amendment.

The amendment was again reported.

Mr. LEVER. Mr. Chairman, I make the point of order that this amendment is not germane to this section.

The CHAIRMAN. The gentleman from South Carolina makes the point of order that the amendment is not germane. Does the gentleman desire to be heard?

Mr. LEVER. I do not desire to be heard, Mr. Chairman, except to say that section 4 undertakes to define certain acts and to describe them as being unlawful without attaching penalties. The amendment offered by the gentleman from Iowa [Mr. GOOD] not only undertakes to make a certain act unlawful but undertakes to fix a price in the language where it says:

That it is hereby unlawful for any person to sell any article of fuel in excess of the price at which such person sold any similar article of fuel of like grade on July 1, 1916.

Now, there is no purpose either in the bill or in section 4 to fix the price. Certainly there is no purpose in section 4 to fix the price. The only thing sought to be done in section 4 is to set up certain offenses which are later penalized in the bill. And this undertakes to set up a price-fixing proposition, and for that reason, in my judgment, is not germane to this section of the bill.

The CHAIRMAN. The Chair is ready to rule. The Chair is of the opinion that the point of order is not well taken. The whole tenor of the bill, the purpose of the bill, is to give the President authority to control certain specific things, to wit, food, fuel, and feed. The Chair is not without precedent in ruling that this point of order is not well taken. In a bill providing for the reorganization of the Army an amendment providing for a system of competitive markmanship among the soldiers was held to be germane. In other words, it was a specification of what may be done within the limits of the general power given in the bill.

The Chair thinks that the amendment is within the general authority given the President by the bill, and is therefore in the nature of a specific limitation. The Chair, therefore, overrules the point of order.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Minnesota [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I am entirely in sympathy with the purpose of the gentleman from Iowa [Mr. GOOD], who I know speaks as a friend of the bill and offers this provision with a sincere desire to provide an effective remedy against the high and increasing prices of coal. But I am fearful that the amendment which he offers, in the form in which he offers it, will defeat the purpose that he has in mind.

In the first place, the theory of this bill—and it is a sound theory—is that whenever you undertake to fix a price or, in effect, take the property of an individual at a price, you must provide some method, some judicial method, by which the adequacy of that price may be determined. No such judicial method is provided in this amendment.

Again, we have provided in this bill that it is unlawful to hoard necessaries. Here is a man who has a large quantity of coal. If he does not sell it, he may be adjudged guilty of hoarding under that provision. If he does sell it, and sells it at a price higher than the price that prevailed on the 1st of July last, he would be guilty of an offense under the amendment proposed. I am fearful that it would have this effect—that it will prevent a great many communities from having any coal at all, because there is no provision in this bill, in this amendment at least, whereby you can compel the coal operator or the coal dealer to sell coal at any price, and if they do not sell it at the price fixed in the amendment or refuse to sell it at all, the amendment will result in punishing the people whom the gentleman from Iowa desires to benefit rather than in punishing the coal operator.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. GOOD. The gentleman realizes that there are other provisions in this bill that would compel them to operate their mines. If not, the President could take them over.

Mr. ANDERSON. Yes; take over the mines; but there is no way of compelling the retailer out in the gentleman's country to sell the coal that he actually has if he does not want to sell it at the price fixed.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. WALSH. Would not that come within the definition of hoarding a product? If a coal dealer had a vast quantity of coal and refused to sell it at the price fixed in this bill, would he not be hoarding?

Mr. ANDERSON. That would be the trouble. He would be penalized if he did, and he would be penalized if he did not.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. LONGWORTH. It is difficult to catch the phraseology of the amendment. Is the increased price of labor provided for in it?

Mr. ANDERSON. The language of the amendment is that the price of coal shall be the price it was on the 1st of July last, and that no person can sell the coal at a price in excess of that amount unless he has a permit from the President for that purpose.

Mr. HOWARD. Mr. Chairman, the gentleman from Colorado [Mr. KEATING] had five minutes allotted to him which has not been used, and I ask unanimous consent that I may use that five minutes in speaking on this amendment.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that he may be given the time that was originally allotted the gentleman from Colorado [Mr. KEATING]. Is there objection?

There was no objection.

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, I am heartily in favor of the amendment offered by the gentleman from Iowa [Mr. GOOD], and I want to give some reasons why I shall not stand with the committee on the section as drawn. On page 4, lines 2 and 3, you will find these words:

To prevent, limit, or lessen the manufacture or production of any necessaries, or to enhance the price thereof.

Under this language I believe it imperative, I believe it is absolutely necessary, that the amendment offered by the gentleman from Iowa [Mr. GOOD] be accepted by the House.

You probably know that practically over night every coal operator in every section of the United States—and it must have been by prearrangement—raised the price of coal not only to the consumer, but to the retail dealer in all sections of the United States practically 400 per cent, without anything like a corresponding increase in the cost of production; in fact, there have been few increases in the wage scale of the miners that is in excess of 12 cents per ton. No increase in any commodity has so affected industries and caused such chaotic conditions to reign in the industrial and economic world than this unprecedented, and you might say high-handed, increase in the price of coal. The manufacturers of the country have had to increase all of the prices of every conceivable thing that they manufacture, and materially increased them, on account of the increased price of coal to them. If this amendment or some other amendment of like character is not enacted by this Congress and written plainly and unmistakably into this bill, my judgment is that not only will the price of coal enhance over what it is to-day, but that there will be great suffering in the great civic centers of this Nation next winter.

Mr. AYRES. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. AYRES. I understand that this amendment provides that the dealer or operator can not sell coal in excess of the price it was last July?

Mr. HOWARD. Yes, sir.

Mr. AYRES. Suppose he was selling it for $5 a ton when it was worth $10, or suppose he was selling it for $20 when it was worth only $10. What would be done in that case? Suppose he was not in the coal business at all until after the passage of this law.

Mr. HOWARD. I presume we would accept a reasonable interpretation of this amendment. If a man was not in business last July, he would have to operate under this amendment in accordance with prevailing prices as of July 1, 1916. If he was in business and was charging an exorbitant price for his product, the amendment of the gentleman from Iowa [Mr. GOOD] would reach him. But that is practically an impossible situation. It does not exist. As the gentleman from Iowa [Mr. GOOD] could have stated if he had had more time and could have gone into this proposition, I believe the average increase within 12 months in the cost of coal is about 400 per cent, is it not?

Mr. GOOD. Between 300 and 400 per cent.

Mr. SNYDER. I should like to ask the gentleman if he refers to soft coal or hard coal?

Mr. HOWARD. I think it has all increased.

Mr. SNYDER. Hard coal has not—anthracite coal has not.

Mr. HOWARD. We do not use that very much in my section of the country. But here is what I had in mind: I know that coal out of the same mines in Tennessee and northern Alabama, from which the people of my city get their supply of coal, used to sell, delivered in the consumer's cellar, for $4.50 a ton, and last winter it sold for from $7.50 to $9 a ton.

Mr. DYER. You could not get hard coal at all, at any price.

Mr. SNYDER. I bought hard coal within a month for less than I paid last year.

Mr. DYER. We could not get it at St. Louis.

Mr. BRUMBAUGH. Is it not a fact that at the same time they were selling the same kind of coal to the Government they were charging private consumers three or four times the Government price?

Mr. HOWARD. I understand that the Government bought 5,000 cars of coal, shipped from some point in the Southeastern States entirely across the continent to the Mare Island Navy Yard and to the western coast for naval purposes, and I am informed the Government got that coal at about one-third of what they were selling coal for right at the mines, free on board car, to private consumers.

Mr. GREEN of Iowa. Will the gentleman yield there?

Mr. HOWARD. With pleasure.

Mr. GREEN of Iowa. Doubtless the gentleman has observed that recently a large number of men, composing a combine of coal operators, have been indicted for conspiracy to raise the price of coal.

Mr. HOWARD. That is true.

Mr. GREEN of Iowa. And is the gentleman also aware that the miners are leaving the mines, because for some reason the operators of the mines will not employ enough of them?

Mr. HOWARD. The case is plain and conclusive, and there is not any question that it is practically a confession of guilt on the part of the mine operators that they have restricted the output of coal for the purpose of carrying out their nefarious conspiracy to rob the American people in the price of their fuel; and if this amendment does not stop them, then the President will, by taking over the mines and operating them for the people. [Applause.]

Mr. SLAYDEN. Mr. Chairman, the gentleman from Georgia put into my head the purpose of making a request for three or four minutes, the time which was granted to somebody but not used.

Mr. LEVER. I had hoped to use those three or four minutes myself.

Mr. SLAYDEN. Mr. Chairman, I have not opened my mouth in the discussion of this bill.

Mr. DYER. I ask unanimous consent that the gentleman from Texas have five minutes.

The CHAIRMAN. The gentleman from Missouri [Mr. DYER] asks unanimous consent that the time be extended five minutes.

Mr. LEVER. How much time remains under the agreement?

The CHAIRMAN. Practically no time remains, except that the gentleman from Iowa [Mr. GREEN] used only 6 minutes of his 10, and that is the time that the gentleman from Texas desired to use. The gentleman from Missouri asks unanimous consent that the time be extended five minutes.

Mr. McLAUGHLIN of Michigan. I was not present when the time was allotted. I would like a few minutes to speak on this. I ask unanimous consent that the time be extended 15 minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the time for debate on this section and all amendments thereto may be extended 15 minutes. Is there objection?

Mr. CANNON. I will ask that it be made 20 minutes.

Mr. STRONG. Mr. Chairman, I will ask that the time may be extended, so that I may have two or three minutes to bear testimony to information that I think will be valuable. Of all of the amendments ever offered in the American Congress to any bill pending before it this is the most fool amendment that was ever offered here.

The CHAIRMAN. The gentleman can not debate the amendment while time is being arranged for.

Mr. STRONG. I want to give the reason why I desire to speak. Coming from the district that I do, I have something to say. I can bear testimony on this subject.

Mr. LEVER. Mr. Chairman, I have no desire to press the consideration of this bill unreasonably, although we must pass it by to-morrow night, and I ask unanimous consent that the debate on this paragraph and all amendments thereto may be extended 20 minutes.

Mr. CANNON. I should like to have five minutes.

Mr. LEVER. I should like to reserve five minutes for myself.

The CHAIRMAN. Unanimous consent is asked that the time for debate on this section and amendments thereto be extended 20 minutes. Is there objection?

Mr. SLAYDEN. Does that contemplate giving me five minutes?

The CHAIRMAN. The Chair will say that if the time is left under control of the Chair he will recognize the gentleman from Texas.

Mr. McLAUGHLIN of Michigan. Will I be recognized?

The CHAIRMAN. The gentleman will be recognized, certainly, because he is a member of the committee.

Mr. CANNON. I desire to be recognized also for five minutes.

Mr. LEVER. The gentleman from Illinois [Mr. CANNON] can have five minutes, and I will divide my time with the gentleman from Pennsylvania [Mr. STRONG].

Mr. GRAHAM of Pennsylvania. Reserving the right to object, I would like to have a few minutes' time on this amendment. I think it is one of the most important amendments ever presented to this House.

Mr. LEVER. I think this committee has made up its mind as to what it is going to do with this amendment. I think the debate is largely perfunctory. I have no desire in the world to deny the right to Members to talk on this section, but I do desire to make time with this bill. All of us might talk.

Mr. CANNON. Well, but on a proposition of this kind, it seems to me, the gentleman owes it to himself and to this bill, from my standpoint; that the amendment should not prevail.

Mr. LEVER. I agree with the gentleman.

Mr. CANNON. And we want the opportunity to say so, if there is any doubt about it.

Mr. LEVER. If the gentleman from Pennsylvania desires 5 minutes, I will make the request for 25 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this section and amendments thereto be extended 25 minutes. Is there objection?

Mr. GOOD. Reserving the right to object, I desire to know whether or not all these speeches are to be by Members opposed to the amendment If so, I want 25 minutes for those who may be in favor of it.

Mr. LEVER. I have no idea myself on which side gentlemen will speak.

The CHAIRMAN. The Chair can not answer that.

Mr. GOOD. I will ask for five minutes.

Mr. FOSTER. I want five minutes.

Mr. LEVER. Mr. Chairman, if everybody is going to speak, I move that all debate on this section and all amendments thereto now close.

The CHAIRMAN. The gentleman from South Carolina moves that all debate on this section and amendments thereto be now closed.

The question was taken; and on a division (demanded by Mr. STAFFORD) there were 91 ayes and 26 noes.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. GOOD].

The question was taken; and on a division (demanded by Mr. HOWARD) there were 33 ayes and 81 noes.

So the amendment was rejected.

The Clerk read as follows:

SEC. 5. That, from time to time, whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries in order to carry into effect any of the purposes of this act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, exportation, manufacture, storage, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section. The President is authorized to prescribe such regulations governing the conduct of the business of licensees as may be essential to prevent uneconomical manufacture and inequitable distribution of necessaries and otherwise to carry out the purposes of this act. Such regulations may also include requirements for the issuance of licenses and requirements for systems of accounts and auditing of accounts to be kept by licensees, submission of reports by them, with or without oath or affirmation, and the entry and inspection by the President's duly authorized agents of the places of business of licensees. Whenever the President shall find that any rate, charge, or practice of any licensee is unjust, or unreasonable, or discriminatory and unfair, or wasteful, and shall order such licensee, within a reasonable time, fixed in the order, to discontinue any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice thereafter, unless such order is revoked or suspended, such licensee shall, within the time prescribed in the order, discontinue such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice. The President may, in lieu of any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice, find what is a just, reasonable, nondiscriminatory and fair, or economical rate, charge, or practice; and in any suit in any Federal or State court of competent jurisdiction such finding of the President shall be prima facie evidence Any person who, without a license issued pursuant to this section, knowingly engages in or carries on any business for which a license is required under this section, or willfully fails or refuses to discontinue any unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice, in accordance with the requirement of an order issued under this section, or willfully violates any provision of this section or any regulation prescribed under this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both: *Provided*, That this section shall not apply to any farmer, gardener, or other person with respect to the products of any farm, garden, or other land owned, leased, or cultivated by him, nor to any retailer with respect to the retail business actually conducted by him, nor to any common carrier, nor shall anything in this section be construed to authorize the fixing or imposition of a duty or tax upon any article imported into or exported from the United States or any State, Territory, or the District of Columbia.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Strike out the word "or" in line 20, page 5, and insert in lieu thereof the words "and any licensee who."

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 4, after the word "to" in line 16, strike out the remainder of the line, all of lines 17, 18, 19, 20, and 21 down to and including the word "requirements," and insert in lieu thereof the following: "issue such license and to prescribe regulations."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

Mr. ANDERSON. Mr. Chairman, the amendment I have offered strikes out the part of the section which authorizes the President to issue general regulations governing the conduct of the business of the licensee. In my judgment, that authority is broader than it is necessary to confer on the President in order to effectuate the purposes of this act. It would permit, if it were valid, and I doubt if it is valid, the President to regulate by regulatory order the conduct and method and the manner of conducting any business of importation, of exportation, manufacture, storage, or distribution. I think that language goes far beyond what is necessary to accomplish the purposes of the bill. The amendment I have offered is designed to eliminate the language which gives that general authority, and to confine the authority of the President under this section to making regulations relating to reports, keeping systems of accounts, and matters of that character, and the power to eliminate excessive rates and charges and unfair or discriminatory charges.

Mr. LENROOT. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. LENROOT. The gentleman speaks of the power to eliminate evil practices. If the language stays even as amended it would authorize him to eliminate by refusing a license or revoking a license.

Mr. ANDERSON. Absolutely not. I think the gentleman has an entirely wrong conception of the theory of the license. Nowhere in this act is the President given any authority to revoke a license. The only purpose of putting in the license provision at all is to permit the President to regulate the particular class of industry dealing with that particular kind of commodity which it is designed to regulate under this bill. Of course, if the President undertakes to license terminal elevators, for instance, he would be obliged to license under the terms of this act every terminal warehouse that came within the definition of a terminal warehouse. He is not given any discretion as between licensees at all.

Mr. LENROOT. Why is it necessary to have a license? Surely you get no greater power over the licensee than you would have over one who is not licensed.

Mr. ANDERSON. I do not accept the statement of the gentleman in the language he puts it. It seems to me that the statement might be accurate in this form, that the license itself does not grant or confer any additional power on the President, it is simply a method.

Mr. LENROOT. We can get no greater power over the individual by issuing a license to him than we had over that individual without a license.

Mr. ANDERSON. Absolutely not; but unless we use the license method, the prohibition must apply to everyone, whether the commodity is one which we attempt to control under this bill or not. For instance, the situation may be such that the President would only undertake to control for the purpose of the act during the next few months, we will say, wheat, so that he would only want to license the dealer in this particular commodity, and the license enables him to go just as far as he wants to go and does not require him to go any farther.

Mr. LENROOT. Let me ask the gentleman another question. In another section of the bill authority is given to the President to make regulations. Does the gentleman say that the President, without this section, would not have the power to make one scheme of regulations for wheat and another scheme for some other commodity? That surely can not be true.

Mr. ANDERSON. I am inclined to think that it would be true. It seems to me that when the President is authorized to make regulations in general terms, that applies to regulations to effectuate the general purpose of the bill—general regulations, not regulations to affect a single section of the bill. These regulations must be carried in the section.

Mr. LENROOT. Does the gentleman think that the President could make the same regulations in reference to coal that he does for wheat?

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. LENROOT. Mr. Chairman, I shall favor this amendment, because it clearly does improve the bill and does exactly what the gentleman from Minnesota states it will do, it eliminates powers not only beyond the power of Congress to confer in this way upon the President and which should not be conferred under the circumstances.

But I entirely fail to understand the theory of the gentlemen of the committee, the theory that they seem to have, that by issuing a license to some one we get greater authority over that person than he would have by operating directly upon the person himself.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield? The gentleman is usually fair.

Mr. LENROOT. I desire to be entirely fair.

Mr. ANDERSON. I made just the opposite statement.

Mr. LENROOT. Very well. Certainly I misunderstand the gentleman entirely if that is not his object. His contention now is that under the license system you can say to A, "We propose to regulate you," and then say, "but without the license system we can not say to A that we will regulate you unless we also regulate B in the same way." Have I now correctly stated the gentleman's position, because I want to be entirely fair?

Mr. ANDERSON. No. What I stated was that the President might select a class and license that class, and that the regulations as to that class must be uniform, but that he would have no power as within that class to discriminate. He could discriminate as to the classes to be licensed.

Mr. LENROOT. Very well. We will take elevators as a class. Is it the gentleman's theory that the President should be given power to say to the owner of one elevator, "You shall be subject to certain regulations," and to the owner of another elevator engaged in exactly the same business, "You shall not be subject to regulations." Surely that can not be the theory of the committee.

Mr. ANDERSON. That is exactly the statement that I did not make. I said as to elevators as a class that the President could not make a regulation as to one different from the other; that the class must be regulated as a whole.

Mr. LENROOT. Then I think if I now understand the gentleman he concedes that if we regulate elevators even under the license system the regulations must apply to all elevators alike?

Mr. ANDERSON. Absolutely.

Mr. LENROOT. Then certainly it is true that under the power to make general regulations contained in a later section of the bill, the President has power in those general regulations to govern the conduct of elevators as a class. There can not be any doubt about that, and the distinction is this, and this wholly, that the committee desire to say to every man in the United States, "You shall not do business at all unless you do it as we tell you to do it."

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Certainly.

Mr. MADDEN. Does the gentleman consider all elevators in the same class, working under the same conditions? Elevators in certain sections of the country can be operated under one condition and elevators in other sections of the country will be operated under other conditions.

Mr. LENROOT. I think that, so far as regulating elevators is concerned, while under this license system I think it would be possible to say to the owner of one elevator, "You shall do business in one way," and to the owner of another elevator, "You shall do it in a different way," yet no legislation should be passed by Congress that would permit that kind of discrimination. Regulations should be uniform, but, as I was saying, Mr. Chairman, the whole thing in a nutshell is that with the amendment I shall later propose I do not detract one iota from the power of the President of the United States to put his hand upon any business that is guilty of any violations under this act and make the very orders that the committee propose shall be made in this bill. All that I propose to do is to say that the man who is conducting his business in an honest, legitimate way and has no intention of oppressing the public in any way, shall not be subject to either the granting of a license or the possible revocation of a license at the will of some subordinate of a department of this Government.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. LEVER. Mr. Chairman, so far as I am concerned, I shall be glad to see this amendment adopted, and I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Minnesota.

The amendment was agreed to.

Mr. LENROOT. Mr. Chairman, I offer the following amendments, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendments by Mr. LENROOT:

Amend section 5 by striking out all of the section on page 4 and the words "places of business of licensees," on line 1, page 5.

Strike out the word "licensees," in line 2, page 5, and insert the word "persons."

Strike out the word "licensee," in line 4, page 5, and insert the word "person."

Strike out the word "licensee," in line 8, page 5, and insert the word "person."

Strike out, in lines 17, 18, 19, and 20, page 5, the following: "without a license issued pursuant to this section, knowingly engages in or carries on any business for which a license is required under this section."

Strike out of lines 23, 24, and 25, page 5, the following: "or willfully violates any provision of this section or any regulation prescribed under this section."

So that said section 5, when amended, shall read as follows:

"SEC. 5. Whenever the President shall find that any rate, charge, or practice of any person is unjust or unreasonable or discriminatory and unfair or wasteful, and shall order such person within a reasonable time fixed in the order to discontinue any such unjust, unreasonable, discriminatory, and unfair, or wasteful rate, charge, or practice, thereafter, unless such order is revoked or suspended, such person shall, within the time prescribed in the order, discontinue such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice. The President may in lieu of any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice find what is a just, reasonable, nondiscriminatory and fair, or economical rate, charge, or practice, and in any suit in any Federal or State court of competent jurisdiction such finding of the President shall be prima facie evidence. Any person who willfully fails or refuses to discontinue any unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice in accordance with the requirement of an order issued under this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both: *Provided*, That this section shall not apply to any farmer, gardener, or other person with respect to the products of any farm, garden, or other land owned, leased, or cultivated by him nor to any retailer with respect to the retail business actually conducted by him nor to any common carrier, nor shall anything in this section be construed to authorize the fixing or imposition of a duty or tax upon any article imported into or exported from the United States or any State, Territory, or the District of Columbia."

Mr. LENROOT. Mr. Chairman, I ask unanimous consent that these amendments shall be considered en bloc.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that these amendments be considered en bloc. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate upon this amendment shall close in 20 minutes, the gentleman from Wisconsin to have 10 minutes of that time.

Mr. TOWNER. Mr. Chairman, I desire five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this section close in 20 minutes.

Mr. LEVER. Mr. Chairman, just one moment and let me see if we can not get an agreement. Does the gentleman from Pennsylvania desire to discuss this particular amendment or some other amendment?

Mr. GRAHAM of Pennsylvania. I desire to discuss this amendment.

Mr. LEVER. I desire to find out what gentlemen are in favor of the proposition or against it, so as to find out something about dividing time.

Mr. GREEN of Iowa. I am not in favor of the proposition.

Mr. SCOTT of Iowa. I am opposed to it.

Mr. GRAHAM of Pennsylvania. I desire to speak in favor of the amendment.

Mr. LEVER. Then, Mr. Chairman, I ask unanimous consent that all debate on this amendment shall close in 40 minutes, the time to be equally divided between the gentleman from Wisconsin [Mr. LENROOT] and myself, for and against.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this amendment shall close in 40 minutes, the time to be controlled one-half by himself and one-half by the gentleman from Wisconsin. Is there objection? [After a pause.] The Chair hears none.

Mr. LENROOT. Mr. Chairman, I desire to occupy only 10 minutes. Mr. Chairman, in general debate I discussed somewhat the constitutionality of this section, and I am as strongly convinced to-day as I was then that this in its present form does contain an unlawful delegation of power. The gentleman from Missouri [Mr. IGOE] this morning, very correctly, I think, laid down the general rule with reference to the delegation of authority, but did not touch the point which I made the other day, and that is that although there are prohibitions in the act, although section 3 declares a governmental control over necessaries, nevertheless Congress can not delegate to the President any of its legislative authority over the subject, and when it says, as this section 5 does say, whenever the President shall deem it essential to carry out the purposes of this act he may call into operation this license section, we are delegating to him not the finding of a fact upon which the law may operate, but delegating to him the determination of a question of public policy which we have no power to delegate to him at all.

And I call the attention of the friends of this bill to this proposition, that, if I am correct in that construction, your entire scheme of regulation by order of the President falls to the ground, because as you now have it it is entirely based upon

the regulation of licensees; and if he has no right, because of an unlawful delegation of authority, to put into operation this license portion of the bill, your entire scheme is gone. Now, the amendment I have proposed leaves all the necessary powers absolutely intact. Instead of operating upon licensees the President is authorized to operate upon the person, wherever he finds the man, or the corporation that, in his judgment, has been guilty of violating any of the prohibitions of this act; and he is authorized by my amendment to make an order, exactly in the language of the committee bill, requiring these violations to cease and prescribing a just practice for the future. Now, the distinction is just this: Shall this House say that, in order to find a few guilty men, that we shall make it a crime for every man in the United States engaged in this business to do business at all unless he gets a license from the President of the United States? Why, that is not the system we follow with regard to the regulation of railroads. We do not require licenses from railroads, but we require the Interstate Commerce Commission, wherever it finds any violation of the interstate-commerce act, to make an order and serve it upon the violators of that law.

Mr. BLACK. Will the gentleman yield for just one question?

Mr. LENROOT. I will.

Mr. BLACK. I want to ask this question: Suppose the food administrator should refuse a license to some one engaged in a particular line of business, could that business man mandamus the President to force him to grant a license?

Mr. LENROOT. No. If everyone is entitled to a license, why license at all; why not have regulations applying to everybody? The very term "license" implies a privilege that is granted to somebody, a privilege that may be withheld or may be granted by the authority vested with power to issue the license.

Mr. ALEXANDER. Will the gentleman yield?

Mr. LENROOT. I will.

Mr. ALEXANDER. May not the Congress, in the exercise of its war powers, require every dealer in foods, feeds, and fuel to have a Federal license?

Mr. LENROOT. Perhaps so, but that is not what his section does.

Mr. ALEXANDER. Is not that what the committee is undertaking to do?

Mr. LENROOT. They do not. I would not raise any question about the constitutionality of this section if they did that, but they delegate to the President the power to say whether or not a license system shall be put into operation or whether it shall not. That is the function alone of the legislative end of this Government.

Mr. ALEXANDER. The gentleman may be right on that.

Mr. TOWNER. Will the gentleman yield?

Mr. LENROOT. I yield for a question.

Mr. TOWNER. Is it not true under the provisions of this section if one single warehouseman, for instance, were engaged in an unjust discrimination or hoarding or anything of that kind, the President, in order to reach that single case, would have to license every warehouseman in the United States?

Mr. LENROOT. Absolutely. He must put into operation the license system or he could not make a single order, while my amendment will permit him to make these summary orders apply to any individual whenever he finds him guilty of violations, for instance, of the storage of eggs which we had in Chicago last year.

Mr. ANDERSON. Will the gentleman yield?

Mr. LENROOT. I can not now. But under the committee scheme the President would have no power to issue an order upon Mr. Egg-man in Chicago to stop the violations of the act unless he licensed all the egg dealers in the United States. There is no question about that. Now in the interest of the bill itself the President ought to have the power to make these orders which will be very beneficial, in my judgment, in preventing these evil practices.

He ought to have the power to make the order upon the person, whoever he may be, guilty of any of these violations. And you accomplish all the beneficial results that can possibly be accomplished without requiring a great percentage of the population of the United States to be put under the license system at the will of some $1,200 clerk of this Government. These licenses are not going to be issued by the President, in fact, or by Mr. Hoover. They are going to be issued by some little subordinate official traveling throughout the country. And are you going to let that man say to a man conducting business in the United States that "You can not do business at all unless you take a license and do as we say"?

Mr. ANDERSON. Does the gentleman contend that the orders which he has in mind will be issued by the President any more than the licenses will be issued by the President?

Mr. LENROOT. I certainly do. Whenever the President finds a violation or Mr. Hoover finds a violation of law requiring the issue of an order, I do not assume that a $1,200 clerk is going to pass upon that violation—absolutely not—because one is dealing with the violations of this act and the other is dealing not with violations of this act at all but dealing with every man in the United States who is within the purview of this act, irrespective of whether he is conducting his business in a lawful way or not.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. LENROOT. I will yield.

Mr. COOPER of Wisconsin. The gentleman said a minute ago that this language if enacted into law would compel the licensing of a large portion of the population of the United States. The proviso on page 6 provides that it shall not apply to a farmer or gardener or any other person. Now, then, to what people would it apply except to coal miners and those dealing in coal and in cold storage?

Mr. LENROOT. It would apply to every creamery and cheese factory in the United States; it would apply to every little gristmill in the United States; it would apply to every canning factory in the United States. Why, there is no line of production or manufacture scarcely that it would not apply to. Confining it to coal and to cold storage is the smallest part of the business that would be affected by this licensing system.

Mr. MADDEN. Whereas if the amendment of the gentleman is adopted, the President would only have to deal with the individual who violates the law?

Mr. LENROOT. Absolutely. Just as the Interstate Commerce Commission does to-day.

Mr. BORLAND. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. BORLAND. Do I understand the gentleman to contend that the issuance of a license would restrict the power of the President to control the actions of the licensee?

Mr. LENROOT. Only in this way, in that you make it a crime for a man to do business at all unless he has a license, and the President or his subordinates could refuse to issue the license. Because if it is mandatory that every man is entitled to a license without discrimination upon the part of anyone, why do you need any license system at all? Why not permit the President to make regulations covering the individual, if there is no discretion?

Mr. BORLAND. The gentleman's only objection is that it might be oppressive and compel people to take out this license?

Mr. LENROOT. I think it does something more than that if you say to a man who has not violated this law that "You shall not do business in the United States."

Mr. BORLAND. I will ask the gentleman this: Would it not be considered important for the President to know the number and capacity of the plants, and so forth, in the United States?

Mr. LENROOT. That is all embodied in the food-survey bill, and I have no objection to putting it in this, but you do not need to do it in this way.

Mr. LEVER. Mr. Chairman, I yield to the gentleman from Iowa [Mr. SCOTT] five minutes.

Mr. SCOTT of Iowa. Mr. Chairman and gentlemen of the committee, I always regret the occasion when I can not agree with my friend from Wisconsin, Mr. LENROOT, but unfortunately this is one of those times. It seems to me the section as reported by the committee contemplates an entirely different situation than would be contemplated by the section if amended as suggested by the gentleman from Wisconsin. As reported by the committee the section is, "whenever the President shall find it essential to license importation, exportation, manufacture, storage, or distribution." It will be observed that the section deals with avocation, with great general industry, and the idea is that this authority will be invoked when some general condition of calamity confronts the country. It is entirely foreign to this bill or section as it stands that the Federal Government should employ a great, numerous constabulary to follow up every individual in the United States and regulate his conduct. It is a question of dealing with general conditions. For instance, let us suppose there is such a condition in the coal mining and coal trade of the United States that it is required to take hold of that subject and declare a general set of regulations and rules for the relief of the people; is it not proper that the Government should require those engaged in that industry to come in and register, to report? And that is really what this kind of a license means. It means a method of bringing them before the bar of the Govern-

ment and getting them on record, and from that point to deal with the business, the industry, generally.

Mr. RAKER. Will the gentleman yield?

Mr. SCOTT of Iowa. Certainly.

Mr. RAKER. Without an order no license would be required under this bill?

Mr. SCOTT of Iowa. No.

Mr. RAKER. Now, if two men in the United States were violating the law by making a corner on eggs, and there were only two in the United States, and the President would make the order requiring a license, all the other 6,000 people in the United States would have to take out a license in order for him to get at these two who were violating the law, would they not?

Mr. SCOTT of Iowa. If that condition should confront the Government, there would be no license, because there are other provisions in the bill calculated to meet isolated cases. It would only be resorted to when the general condition of the country demanded its exercise. [Applause.]

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. SCOTT of Iowa. Yes.

Mr. RAKER. I would like to ask you this one question: Where would you get at the two who were violating the law and acting wrongfully in regard to the storage of eggs and the handling of them?

Mr. SCOTT of Iowa. You have a hoarding section in the bill, have you not? You have four or five other prohibitions, with the right on the part of the President to prescribe rules against those people in a later section of the bill, making it criminal if those rules are violated.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. SCOTT of Iowa. Yes.

Mr. LENROOT. That would be just about as effective as prosecuting these trusts for the violation of the antitrust law.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. SCOTT of Iowa. Yes.

Mr. BARKLEY. This licensing section is not put in here for the purpose of getting at somebody who is violating the law, but in order to permit the President to regulate the uneconomical manufacture or distribution of products that are not in violation of the law, and in order that there may be regulations prescribed to bring about better conditions, although the conditions they seek to remedy may not be in violation of the law. Is that the idea?

Mr. SCOTT of Iowa. I take it that it is to reach the evil, whether it be a violation of the law or not, and to put an end to the condition.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the time may be extended 10 minutes, so that the gentleman from Wisconsin [Mr. LENROOT] may have 5 minutes and I may have 5 more.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the time be extended 10 minutes. Is there objection?

There was no objection.

Mr. LENROOT. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLACK].

The CHAIRMAN. The gentleman from Texas is recognized for five minutes.

Mr. BLACK. Mr. Chairman, I think that the amendment offered by the gentleman from Wisconsin [Mr. LENROOT] should be adopted. When I spoke on this bill one day this week, during the 20 minutes that I had opportunity to discuss its provisions, I discussed this section 5 to which this amendment has been proposed at some length, and urged that it ought to be amended.

Now, some Members of the House during the discussion of this bill to-day have taken some rather peculiar positions, it seems to me, and have gone far afield. I understood the two gentlemen from Ohio [Mr. EMERSON and Mr. BATHRICK] to take the broad position that because we have adopted the bill providing for the drafting of men into the Army to fight the battles of the Nation, that therefore we must conscript the business of the country and the products of the farmer and the laboring man. Well, now, gentlemen of the House, if it does become necessary for the successful conduct of this war that we conscript the business of the country, that we conscript the products of the farm, that we conscript the services of laboring men of the country, then I shall not hesitate to vote for it. We have put our hands to the plow and I am with my country for whatever is necessary to bring us out successful in the end. Yes, understand me clear, I will support all means and measures necessary to win this war. But while I am willing to do that, still I do not hesitate to say that my views are that in the successful carrying on of this war the less we disturb and interfere with the ordinary domestic affairs of the people, the better we will be able to win the victory in the end. [Applause.] I know that as the war goes on, the longer it progresses, the more it will necessarily interfere with our domestic and ordinary affairs. I realize that, and I fully appreciate it. I would not for a moment seek to minimize that proposition, but while I recognize that fact fully I nevertheless maintain we ought not to rush headlong into these things and prescribe unreasonable and arbitrary requirements when there is apparently no necessity for it.

What are we proposing to do by this section 5? It proposes to grant to the President whenever he deems it to be essential, the power to require every business man and distributor of these products to take out a license to transact his business. The ordinary way that a legislative body enacts a statute of this kind is to prescribe the limitations and conditions surrounding the procuring of these licenses, and placing the power of their issuance in some executive head of a department of the Government, and whenever the person desiring such license can show that he has complied with the conditions and limitations required to entitle him to secure it, then he has a legal right to that license and can mandamus the executive head of such governmental department and force him to grant it to him. But no such remedy could be used under this section 5. It puts it within the discretion of the President to grant the business man or distributor such license, and there is no court in this country that has the power to mandamus the President to compel him to grant a license under that section 5. It is a well-known fact that not even the Supreme Court of the United States can mandamus the President and make him exercise any executive function. Therefore if the President should decline to license the business of any dealer or distributor of these articles he would have no remedy and would have to quit business.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. BLACK. Yes.

Mr. RAKER. I just want to assume the case of an ordinary farmer who raises from 25 to 50 steers a year. To-day the beef people are arranging to get his beef at about half of what it is worth by a combination. Now, we have a law and a Federal board. Will this bill assist the fellows who are trying to rob the farmers out of the beef they have raised?

Mr. BLACK. In the first place, I have no knowledge of anybody conspiring to rob anybody else, but if it develops that there are such cases then I believe the amendment of the gentleman from Wisconsin [Mr. LENROOT] would better accomplish the purpose to give relief in such cases than the section as it is written in the bill, because whenever any of these discriminatory or unjust charges are made the Lenroot amendment will give the President complete control over the situation, and more effectively, I think, than will be the case in the event that section 5 remains as now written in the bill. Besides it will render impossible any unreasonable and arbitrary interferences with the business man or distributor who is lawfully conducting his business.

Mr. RAKER. How are you going to get it? We have two statutes and the Federal Antitrust Commission and these officers here. How will you protect the people at all?

Mr. BLACK. I think the President is given ample authority under still other sections of this bill to remedy the abuses and unfair practices that take place in the business channels of the country, and, as I have heretofore endeavored to explain, he would have much better authority under the Lenroot amendment to accomplish this purpose than he would have under this licensing system. I think the Lenroot amendment is wise.

I do not think that section 5 as it is drawn in the bill ought to remain in that form, and I shall therefore support the amendment. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Iowa [Mr. GREEN].

The CHAIRMAN. The gentleman from Iowa is recognized for five minutes.

Mr. GREEN of Iowa. Mr. Chairman, when the amendment of the gentleman from Wisconsin was first presented to me I was inclined to favor it for the reasons which he has very clearly stated in his argument presenting the amendment. I was inclined to think then that the first part of this section is unconstitutional and I still have doubt with reference to it.

But I think that that provision can be very easily remedied; in fact, I know it can be very easily remedied, by a very simple

amendment if the committee chooses to accept it. Instead of requiring the President to find "essentially"—that is, making it a question of policy, with reference to the importation, exportation, and so forth—if the requirement was that the President should find that the provisions of this act were being violated with reference to the manufacture or importation or exportation, and so forth, there would be no question about the constitutionality of the provision, so that that matter, I think, can be very easily disposed of.

Mr. GORDON. May I interrupt the gentleman?

Mr. GREEN of Iowa. Yes.

Mr. GORDON. Then it is your theory that whenever an individual in a certain class violates the law, we ought to vest the President with power to punish everybody else who is engaged in that kind of business by requiring him to take out a license before he can continue to do business?

Mr. GREEN of Iowa. No; I am not discussing the policy of this provision.

Mr. GORDON. That would be the effect of it, would it not?

Mr. GREEN of Iowa. I was discussing a purely legal and technical proposition.

Mr. GORDON. So am I.

Mr. GREEN of Iowa. The gentleman is now talking about a question of policy, which I am coming to. I am like the gentleman from Wisconsin [Mr. LENROOT] and the gentleman from Ohio [Mr. GORDON]. I am reluctant to use such vast and extensive powers as are given by the further provisions of this section, and which may under some circumstances apply to such a large class of people. But upon carefully considering this matter I have come to the conclusion that they are absolutely necessary—that you will never be able to use to any profit or benefit the provisions of this section unless these powers are given, and I propose to state here as briefly as I may the reason why.

On page 5 it provides:

Whenever the President shall find that any rate, charge, or practice of any licensee is unjust, or unreasonable, or discriminatory and unfair, or wasteful—

Then the President may make certain requirements of the licensee or the person, as it would be under the amendment of the gentleman from Wisconsin [Mr. LENROOT]. But how and in what manner can the President make that finding unless he has something on which to make it? Where will he get the necessary information? Is he going to have a hearing with reference to each one of these parties? Is he going to call in witnesses and determine as to whether a practice is unjust or discriminatory or unfair or in violation of the provisions of this act? He can not do that. He can not stop for that, and it would be utterly impracticable for a hundred other reasons. The only way in which he can get the information, in order that he may act in accordance with the provision which I have just referred to, is by and through this license provision under which he may prescribe regulations, and by and through these regulations he can ascertain the cost, the selling price, the manner of handling the business, the rates, and have set before him the whole character of the business as it is being conducted.

Mr. LENROOT. Why can not the President get that information through a person as well as a licensee?

Mr. GREEN of Iowa. He could, but under your amendment he has not the power to do it.

Mr. LENROOT. He has the power to make general regulations to carry out this act later on in the bill.

Mr. GREEN of Iowa. Such powers would not authorize a demand for the necessary information.

Mr. LENROOT. He can issue regulations with reference to the licensees.

Mr. GREEN of Iowa. That is true under the license provision which the gentleman would strike out, but does the gentleman mean to say that under general powers the President can go out and obtain any kind of information he wants from any business man, no matter what his business may be?

Mr. LENROOT. Just as much in one case as in the other, as the section now stands amended.

Mr. GREEN of Iowa. No; this section expressly provides that regulations may be made for the conduct of these licensees. Under those regulations he could obtain this information, and that is the only way he could obtain it.

The CHAIRMAN (Mr. RUCKER.) The gentleman's time has expired.

Mr. LENROOT. I yield five minutes to the gentleman from Iowa [Mr. TOWNER].

Mr. TOWNER. Mr. Chairman, I am very strongly in favor of the Lenroot amendment. I want to call the attention of the committee to this fact: We must consider section 5 in connection with section 4. Section 4 provides that it shall be unlawful for a person willfully to destroy any necessaries of life, to hoard, to monopolize, to engage in discriminatory, unfair, and deceptive practices, and so forth, but there is no penalty attached to that section. Where does the penalty attach? It attaches, if at all, under the provisions of section 5. And in what manner does it attach to section 5? If a single dealer or handler of eggs in the United States is guilty of the violation of any of these provisions in section 4, the President can not punish him. He can not call him to account. He can not say: "You are violating this section and you must stop." But what must he do? According to the terms of this section he must say, "All of the dealers in eggs in the United States must hereafter take out licenses." It having been found that one of them is guilty of evil practices, none of them can do business for a single hour unless they shall take out licenses from the Government of the United States. This penalizes the 999 dealers in eggs in the United States who are guilty of no evil practices, simply because one man is subject to punishment.

Mr. RAKER. Will the gentleman yield?

Mr. TOWNER. I can not yield, I am sorry to say, because I have not the time. You can not reach a single evildoer until you have issued this general order against all, and then find there has been a violation of the general order that has been issued. I submit, gentlemen, that is not only inequitable and unjust, but it imposes upon the administration an enormous and an expensive duty for the purpose of carrying out the purpose that they desire.

And if the amendment of the gentleman from Wisconsin [Mr. LENROOT] is adopted, what will be necessary? Only that in the individual case an order shall be issued against the individual violator of the law, and ample provision is given to do that and to meet the specific thing that is the violation of the law in that particular case.

Gentlemen seek to minimize the far-reaching effect of this system of ordering that licenses shall be issued. There is hardly a hamlet in the United States but that has its egg buyer and its butter buyer. They take care of those products by placing them in the cold-storage plant and sell them to the cities wherever it is most advantageous for them to do so.

You could not issue an order against one of the big storage warehouses of the city that would not be effective, and necessarily effective, against everyone engaged in the business in any part of the United States, and for that reason it would be an enormous expense to the Government. It would create a vast number of officers for the purpose of taking care of the licensees. It is also unnecessary. I can not see why gentlemen are so enamored with this license system, as if it was some method by which they can secure a better control than to deal with those directly that are violating the law.

Mr. RAKER. Will the gentleman yield at that point?

Mr. TOWNER. Yes.

Mr. RAKER. The gentleman makes the statement that there is no provision for punishment under section 4.

Mr. TOWNER. There is no penalty attached to section 4.

Mr. RAKER. And none in the rest of the bill that would apply to that section?

Mr. TOWNER. I think there is. I do not claim that all of the provisions are not provided for, but I do claim that there must be this interposition by reason of the words in this section and the omission in the preceding section before any penalties can be called into operation under this section. For that reason it seems to me that it is an impediment to the execution of the law, and it is an impediment to accomplishing the desire and purpose of the bill, which is to punish evildoers who are hoarding and manipulating food products in the United States. [Applause.]

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Minnesota [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I regret to find myself in disagreement with the gentleman from Wisconsin and other gentlemen in the House for whose judgment and ability I have the highest respect. The gentleman from Wisconsin in particular has rendered very valuable service in perfecting the legal provisions of the bill. I am sorry to be in disagreement with him, but that disagreement does not arise in any sense solely out of a desire to sustain the conclusions of the committee.

The gentleman from Wisconsin, it seems to me, totally misapprehends the purpose of the section under consideration and the method of control which it is sought to establish under it. The gentleman from Iowa [Mr. SCOTT] very concisely and accurately states the purpose of the section. It is a section which applies to avocations, to industries within certain classes as a whole. It is not designed, as the gentleman from Wisconsin would seem to indicate by his amendment, simply to punish

the individual or those guilty of discriminatory or unfair practices or charges. It is designed to prevent in the industry as a whole these unfair and discriminatory practices, not to simply punish them. The purpose is to permit the licensing of an industry of a class. For instance, suppose the purpose is to control wheat. You want to bring into that control all of the terminal elevators of the country, in order that you may regulate the charges and practices of the terminal elevators, and so to do that you compel them all to become licensed under this section. Then the Government will lay down general rules which will eliminate the discriminatory and unfair practices, and establish the practices that are nondiscriminatory and are fair and just. That is the purpose of this section. Gentlemen who oppose it totally misapprehend the purpose, because the purpose is not alone to punish discriminatory practices but to effect the purpose of section 3, which is to control the distribution of food products and prevent uneconomic or unjust practices.

Mr. GORDON. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. GORDON. Would not the food administrator have the right to refuse a license?

Mr. ANDERSON. When the gentleman from Ohio was absent from the Chamber I said I thought not.

Mr. GORDON. How would you compel him to issue it if the discretion to issue it is conferred on the President?

Mr. ANDERSON. I did not say at his discretion, I said that in my opinion the President was obliged by law, which applies to license, except where qualifications are prescribed in the law, to grant the license. It must be granted as a matter of right to the person entitled to it.

Now, there is another side to this proposition. The amendment of the gentleman from Wisconsin strikes out a portion of this section which is absolutely essential, in my opinion, to its enforcement, and that is the provision which authorizes the President to make regulations relative to the establishment of a system of accounting, for auditing accounts, and for the submission of reports by the industry licensed under this section.

Mr. LENROOT. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. LENROOT. I should like to state that if this amendment is adopted I propose later to offer an amendment which will completely cover that.

Mr. ANDERSON. I am necessarily obliged to deal with the amendment which the gentleman has submitted, especially in view of the fact that up to this time he has not made that announcement. But it is a fact that the amendment as now presented does eliminate from this section the right to make regulations relative to the submission of reports, and that is absolutely essential to any sound, sane, systematic system of control.

For instance, this is intended to apply to the importation of sugar. Sugar is one of the commodities which it is likely there will be a deficiency in during the current year. It is a commodity where there has been a large increase in price. Some of it may have been justified and some of it perhaps not justified. One thing is certain, that if the people of this country are to have a supply of sugar, the licensing provided for in this bill must be sustained.

Mr. LENROOT. Mr. Chairman, I yield the balance of my time to the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GRAHAM of Pennsylvania. Mr. Chairman, I come to the discussion of this bill not for the purpose of opposing the bill, but for the purpose of making it more efficient, and trying, if possible, to perfect the bill. Therefore, whatever criticism I make is not made by one who is acting as an adversary, but by one who recognizes that there is a need for control, and some legislation for control is what is demanded all over the country. The committee is simply obeying the voice of this great demand in presenting this bill for the consideration of this House.

I do not agree with the thought that has been expressed here that we as legislators are to take that popular voice as an approval of any particular measure or of this one presented by the committee and now under consideration. It is the duty of every legislator to carefully scan the language of every bill, for while we are granting these unparalleled powers to the executive department of the Government, it is our duty to safeguard individual rights. The gentleman from Texas [Mr. BLACK] struck the very keynote of this situation when he said that we ought to so legislate that, while we give power to the President and to the Government to meet this emergency condition, we shall only interrupt the ordinary and usual progress of business in our country to the very smallest extent possible consistent with the grant of power.

That ought to be the motto before the eyes of every man when legislating upon these great and grave questions. I thoroughly agree with the criticism of the gentleman from Wisconsin [Mr. LENROOT] regarding the legal status of this provision. I think that this section is in violation of the Constitution of our country, and I think also that this section, when and if ever tested, will be found to be an instance of making a grant of authority to the President equivalent to authorizing him to legislate upon a given subject—and not a case of delegating to him the power to find a given state of facts and apply to those facts the rule which Congress has established. For him to declare and put in operation a licensing system for each and every one of the branches of industry named in this bill would be for him to seek to exercise under its provisions the legislative function.

I would like to ask my friends in this House to read the first paragraph of section 5:

> That, from time to time, whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries, in order to carry into effect any of the purposes of this act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, exportation, manufacture, storage, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section.

You are men capable of judging the use and effect of language. What other meaning can be put upon this than that whenever the President exercises his power of denominating that condition wherein he thinks it necessary to license any of these things, incidentally every man in the particular line of business named must stop, no matter what his business engagements may be, no matter what duties he may owe to others—he must cease to operate his business until he shall have obtained from the President of the United States the license therein referred to, to continue in his business or employment. In other words, this section is, first, making every business man practically a criminal, for the penalty falls on the innocent equally with the man who is guilty, whose action has provoked the announcement from the President. You know the old axiom that has lived through the centuries that are gone and which I hope will live through the centuries to come, that in the administration of penalizing laws it is far better that a number of guilty men shall escape rather than that one innocent man shall suffer.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, I ask the gentleman to yield me one minute more in order that I may finish this thought.

Mr. LEVER. I yield the gentleman one minute more.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, what I mean to say is this, that instead of operating upon the individual whose conduct deserves to be operated upon, denounced, and punished, you are by this section operating upon a whole class, and you are including the 99 innocent men along with the 1 guilty man and inflicting a penalty upon him and his business. If you want this bill to stand, cut out this iniquitous provision, and insert in lieu thereof the amendment of the gentleman from Wisconsin [Mr. LENROOT]. [Applause.]

Mr. LEVER. Mr. Chairman, I yield four minutes to the gentleman from Michigan [Mr. MCLAUGHLIN].

Mr. MCLAUGHLIN of Michigan. Mr. Chairman, I have not been satisfied with section 5 as it is written in the bill, but I can not approve of the amendment submitted by the gentleman from Wisconsin [Mr. LENROOT]. It starts on line 1, on page 5, and the law as he wishes it written would apply to any and all kinds of business regardless of the fact that this bill relates only to the business of importing, manufacturing, storing, and distributing feeds, fuel, and foodstuffs. The amendment is not drawn with the skill and care usually displayed by the gentleman from Wisconsin, and ought not to be adopted, certainly in the words in which it is drawn.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. MCLAUGHLIN of Michigan. Pardon me, I have only a limited time. I think the amendment ought not to prevail, because it would take from the President authority to regulate importation and exportation of necessities. It is very essential that there be authority to control importations, to regulate importations, or to forbid them altogether, because after goods reach this country it may be difficult to control or provide for their proper use. The best way to regulate them and control them and to prevent abuses is to regulate their importation. The gentleman from Minnesota [Mr. ANDERSON] has spoken of the importance of sugar as a foodstuff. Gentlemen appearing before our committee, including Mr. Hoover, told us that the thing most necessary to conserve at this time is wheat and that the next thing most necessary to conserve is sugar. The things that the people most need or suffer from a shortage of are, first, wheat, next, sugar. We in the United States are receiving

a very large part of our raw sugar from Cuba. At the present time our allies are bidding against one another and against us for raw sugar, driving up the price from the normal price of about a cent and a half to four cents a pound.

The refiners after they obtain the raw sugar from Cuba are charging a heretofore unheard-of price for refining it. Instead of about 60 cents a hundred pounds, they are charging two dollars and a half to three dollars a hundred pounds for refining. If we could control the importation and join with our allies in controlling the purchase of raw sugar, we could fix the price of raw sugar in this country to our own people, including the refiners, and to our allies in whom we are so much interested. If we could control the importation, we could control the cost of refining sugar and the price of refined sugar to consumers, and there is doubt if we will be able to exert any considerable control if we are not able to control the importations. So, as this amendment does not include importations as it is drawn I can not support it.

As to exportation, the allied and neutral countries are bidding against one another now for our grain and foodstuffs for exportation, and it is absolutely necessary that some authority in this country control exportation of foodstuffs or there will be trouble. [Applause.]

Mr. LEVER. Mr. Chairman, I feel that the amendment offered by the gentleman from Wisconsin should be defeated, although I am very glad to say that the gentleman has been of very great help to members of the committee in framing this law.

I felt that unless we had some system of licenses by which we may know at all times what is the conduct of those engaged in the distribution of food products and necessaries we are not going to be able to control the situation efficiently and adequately. What is sought to be done here is this: The President issues a proclamation that the warehouses, elevators, packing houses, cold-storage plants, after a certain date, shall, in order to engage in business, hold a license from the Federal Government.

Mr. GORDON. Will the gentleman yield?

Mr. LEVER. I can not yield—hold a license from the Federal Government. That license permits the Government to examine into the accounts and audit the accounts of those licensees. That gives to the Government the information upon which it can base its action from time to time. It gives to the Government the information upon which it may from time to time determine whether or not the various practices prescribed later on in the section are being carried on, namely, whether they are charging unjust, unreasonable, discriminatory, and unfair rates; whether they are engaged in wasteful practices; or whether they are doing that which has a tendency to reduce the food supply of the country or affect its better distribution. Now, the gentleman from Wisconsin [Mr. LENROOT] proposes that before any licenses shall be issued at all it shall be ascertained that the class of people to be licensed are engaged in such practices as are described.

The committee proposition is entirely different. We say, "We will issue the license if we think it wise. We will ask you to make a report, and if your report shows up good we shall not interfere in the least with you, but if your report does not show up good, if there is a suspicion appearing in your report, then we will look into your case that we may attach the penalty provisions of this section to you." The gentleman's proposition would require the putting into the field in my judgment of an army of Government inspectors who go from town to town, from business house to business house, examining into the business practices of men to ascertain whether or not they were engaged in the practice of charging unjust, unreasonable, discriminatory rates, and doing those various and sundry other things that are prohibited by this section.

Mr. ALEXANDER. Will the gentleman yield?

Mr. LEVER. I submit the proposition of the committee is the most feasible, the most practical, and the most sane way of getting at this proposition.

The CHAIRMAN. Does the gentleman yield?

Mr. LEVER. Yes; for a question.

Mr. ALEXANDER. The gentleman said before the license may issue an investigation is provided for in the amendment offered by the gentleman from Wisconsin. His amendment strikes all license provisions of the bill.

Mr. LEVER. Sure.

Mr. STEVENSON. Will the gentleman yield for a question?

Mr. LEVER. Just for a question.

Mr. STEVENSON. Why not incorporate at once that the permit to license should be issued and not leave it to order in council, as we have not got any right to do so here as they have in England?

Mr. LEVER. The answer to the question is that the theory of this bill is built upon conferring discretionary power upon the President, whom we have got to trust in this business. Now, I feel, Mr. Chairman, as Mr. Hoover expressed to me this morning personally in my office, that this section of the bill as it is written is vital to the control of the situation [applause], and I ask the committee to vote down the amendment offered by the gentleman from Wisconsin. [Applause.]

The CHAIRMAN. All time has expired. The question recurs on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the Chair announcd the noes seemed to have it.

On a division (demanded by Mr. LENROOT) there were—ayes 66, noes 123.

So the amendment was rejected.

Mr. DICKINSON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. DICKINSON: Page 6, line 7, strike out the words "nor to any common carrier."

Mr. DICKINSON. Mr. Chairman, it is with some reluctance I offer any amendment to this bill, but I know of no good reason, and no sufficient reason has been assigned, in my judgment, for exempting common carriers from the provisions of this section or bill. It is familiar to the people of this country that the common carriers have permitted the use of their sidetracks and their cars for the hoarding and storing of food and fuel products, thereby lending aid to speculators who seek to hoard the necessaries of life, and thereby they have been better enabled to enhance the price of those necessaries. Extortionate prices have caused the people of this country to believe that there ought to be some legislation for food control, and all parties responsible should be subject to the provisions of this bill. It has been suggested that some committee other than this Agricultural Committee, to wit, the Committee on Interstate and Foreign Commerce, that has special jurisdiction over railroad legislation, may later report a bill to reach this evil. We know that the railroads themselves, or the common carriers themselves, have not prevented the evil that is complained of by the people.

Mr. BARKLEY. Will the gentleman yield?

Mr. DICKINSON. Yes.

Mr. BARKLEY. Suppose that this clause is stricken out, and the President should make an order requiring railroad companies to take out a license, and they should not do it, and thereby be compelled to stop business, would that help the food situation any?

Mr. DICKINSON. Well, as I said in offering this amendment, I wanted a sufficient reason for it being left in the bill.

Mr. LENROOT. Will the gentleman yield for a question?

Mr. DICKINSON. But if the railroads of this country should assume that position in reference to an order issued by the President, then it would raise a most serious question before the country, resulting probably in taking control of the railroads.

I yield to the gentleman.

Mr. LENROOT. If the Interstate Commerce Commission should find the railroads were not entitled to their 15 per cent increase, and the gentleman's amendment is adopted, it would enable the railroads to go to the President and get it from him, would it not?

Mr. DICKINSON. I do not so understand. If there is now no law upon the statute books that can prevent the railroads or the common carriers from lending aid to those who hoard food and fuel products, there ought to be; and the striking out the words "nor to any common carrier," that seeks to exempt the common carrier from the provisions of this section, would not, in my judgment, enable the railroads to override the action of the Interstate Commerce Commission by a successful appeal to the President.

Railroads have not remedied the evil by fixing penalties, if they have the right under the law. The Interstate Commerce Commission has not reached the situation. If there is no law to prevent railroads from lending aid to speculators by use of their sidetracks and cars, there ought to be; and at least it seems to me that this section exempting common carriers should be left out of the bill and ought not to be retained in the bill apparently for the purpose of giving absolute freedom of action to common carriers. With freedom of action on the part of common carriers to lend their services and aid to those who hoard the necessaries of life, this evil practice is liable to continue and common carriers become particeps criminis in these great crimes against the public.

Mr. LEVER. Mr. Chairman, I hope the amendment may be disagreed to. I ask for a vote.

Mr. SIMS. Mr. Chairman, I wish to make some remarks on this.

Mr. LEVER. I ask unanimous consent that debate on this amendment shall close in seven minutes.

Mr. LEHLBACH. Mr. Chairman, reserving the right to object, is the gentleman attempting to close debate on all amendments to the section?

Mr. LEVER. No; just on this amendment, and in seven minutes

The CHAIRMAN. The request of the gentleman from South Carolina is that all debate on this amendment close in seven minutes. Is there objection? [After a pause.] The Chair hears none. The gentleman from Tennessee [Mr. SIMS] is recognized.

Mr. SIMS. Mr. Chairman, I hope I may have the attention of the members of the committee, not because I am saying it but because I have had opportunity to investigate matters that are covered by this amendment.

Section 10 provides for licensing and provides that, if licensing fails, that the President can requisition manufacturing plants for the purpose of accomplishing what the license provision is intended to accomplish. Now, this licensing provision, commencing on page 6, provides:

That this section shall not apply to any farmer, gardener, or other person with respect to the products of any farm, garden, or other land owned, leased, or cultivated by him, nor to any retailer with respect to the retail business actually conducted by him—

And then it jumps to—

nor to any common carrier—

With absolutely no relation between the reasons for exempting one from this license provision and the other. The common carrier does business for the public, and under the interstate-commerce law the common carriers have the right to provide a scale of rates and publish them for 30 days, and then they go into effect if not suspended. Now, there are hundreds of manufacturing plants that have branch railways connecting their plants with trunk lines. They are owned by the same people who own the plants, such as sawmills, steel plants, and so forth. By reason of owning the tap-line railroad that serves it, which is practically a plant facility but incorporated separately, by publishing their rates and making an agreement for through rates with the main line that this tap line reaches, they become interstate common carriers and get a division of the through rate; and some of these manufacturing plants depend largely on the power they have to force a division of through rates on their own products in this way on a mere plant-line facility. Although it is legally an interstate railroad and covered by the act regulating commerce, it is in effect and in fact a part of the manufacturing plant. Suppose the President takes over a steel plant, or a sawmill, or a coal mine, under this bill he can not take over this tap-line railroad that serves it. The men who own the plant can put a freight on the railroad that they actually own to such an extent as to create a very profitable business for them. although the plant may be requisitioned by the Government.

Mr. BARKLEY. Will the gentleman yield?

Mr. SIMS. Briefly.

Mr. BARKLEY. The theory upon which this provision is inserted into the bill, I presume, is that the President may, by issuing a license and promulgating regulations, control the business, to some extent, of the licensee?

Mr. SIMS. Certainly.

Mr. BARKLEY. If that were to happen in reference to a railroad corporation and the President should require the licensing of railroad companies and promulgate regulations under which they should operate, and those regulations conflicted with regulations of the Interstate Commerce Commission, which would prevail?

Mr. SIMS. This power, as I understand it, is given for the purpose of carrying into effect the main purpose of the bill—that is, to control the industry for the purposes of the war—and that the President would have the right to require this plant facility that serves the manufacturer, although a separate corporation, to also take out a license. Because if we do not do that and leave it to the Interstate Commerce Commission, it can only suspend a rate, investigate it, and declare that the rate is excessive after the railroad has promulgated it and proclaimed it and announce a reasonable rate instead of the one suspended. It may suspend or it may not. It may grant a hearing or it may not. But the power of the commission does not conflict with the power of the President under this bill.

It applies with great force to coal mines and coal roads serving such mines, and we can not control the price of coal unless we can control the railway lines that immediately serve the mines. If you do not give the President this power it will not serve the purpose for which this law is being enacted. A railroad used as a mere plant facility is in fact a part of the plant and should be subject to requisition along with the plant of which it is a part.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. LEVER. Mr. Chairman, when this bill was originally introduced it contained a provision giving the President of the United States the right to direct transportation in reference to foodstuffs. That provision was carried in the second bill that was introduced, and then the President concluded in his own mind, after suggestions from his advisers, that that was a matter that should be handled in a separate bill. That bill was introduced in the Senate and has passed the Senate. I understand it is also pending before the committee of the gentleman who has just taken his seat.

Mr. SIMS. It absolutely has nothing to do with this question.

Mr. LEVER. And I assume that some of these days that committee will report it out for the consideration of the House. Now, the committee did not desire, in view of those facts, to put that provision in this bill, either by way of a license to the railroad companies or by any other method. We were dealing with certain specific things, namely, foodstuffs and fuel. We were not experts on transportation, like the gentleman from Tennessee. We were not so well informed as to the law touching that subject in all of its various phases, and we were afraid that if we attempted to do anything in this bill that touched transportation we might find ourselves treading upon the sacred corns of the Committee on Interstate and Foreign Commerce. Therefore we did not include it in this bill. I hope the amendment will not prevail.

The CHAIRMAN. The time of the gentleman from South Carolina has expired. All time has expired. The question is on agreeing to the amendment offered by the gentleman from Missouri.

The question was taken, and the amendment was rejected.

Mr. IGOE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. IGOE: Page 6, lines 5 and 6, strike out after the word "him," in line 5, the words "nor to any retailer with respect to the retail business actually conducted by him."

Mr. IGOE. Mr. Chairman, I have offered this amendment because I can not see why there should be any exception of the retailer from the provisions of this licensing section. The licensing section is permissive merely. The President may require that licenses shall be obtained.

The particular reason for offering this amendment is that in section 4, as has been explained here, there are no penalties attached. The things declared to be unlawful in section 4 are punishable only in the event that they are violated by a licensee under section 5. I know that it has been said that there are a great many retailers in the country, and that it is almost impossible to supervise them. But under section 5, as has been explained by the gentleman from Minnesota [Mr. ANDERSON], there may be certain classes licensed, and the same thing may apply to the retailers.

A great deal has been said here about the coal situation. In some cases the railroads have been blamed for the high prices, and in some cases the wholesalers and jobbers, and in other cases the retailers have been blamed, and I want to have this exception taken out of this section of this bill, so that if it develops that something may be done by a licensing system to take care of extortion on the part of the retail coal dealers or any other class of retailers, that they may be licensed, and that the practices denounced in section 4, if indulged in by these licensees, may be punished under the bill.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. IGOE. Yes.

Mr. GOOD. I would like to ask the gentleman what force he gives to the word "distribution"? The language of the bill is that "Whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries," and so forth. Who distributes except the wholesaler or the retailer?

Mr. IGOE. I do not know that I quite catch the point of the gentleman's question. Under the language of the bill they have taken the retailer of all kinds out of the bill, and I want to leave it optional with the President to license retailers, if necessary, if it should be deemed wise, so that retailers who indulge in practices under section 4 that are declared to be unlawful may be punished.

Mr. GOOD. The bill gives authority to the President to license the importation, exportation, manufacture, storage, or distribution.

Mr. IGOE. I think the retailer is a distributor.

Mr. GOOD. Was that the opinion of the committee?

Mr. IGOE. I do not know what the committee thought of it, but certainly they must have thought that, because if this exception were not put in the bill retailers would be included. I do not see why the retailer should be excepted. The fact that there are some thousands of them in the country does not to me constitute a good reason for excepting them.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. IGOE. Yes.

Mr. RAKER. Would there not be more cost involved in finding out who were retailers and who were wholesalers than there would be in enforcing this law?

Mr. IGOE. No. I do not believe in the theory that because a bill is going to cost something we ought not to pass it.

Mr. RAKER. I did not mean that. I believe if there is an iniquity or injustice done it should be enforced generally.

Mr. IGOE. It is to make them subject to the penalties for the practices denounced in section 4 of the bill. That is what I want to reach.

Mr. RAKER. If you cut out what you are asking for, you will get general relief, and there will be no question as to who is a wholesaler and who is a retailer.

Mr. IGOE. I do not think it is going to save any money to include retailers. The President may make classes, and he may not want to license retailers, but I think he ought to have the power to do it in case he deems it necessary.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Missouri.

The question was taken, and the amendment was rejected.

Mr. BLANTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Section 5, page 6, line 3, after the word "any" insert the following: "producer or developer of live stock on foot."

Mr. LEVER. Mr. Chairman, after consulting the committee, we feel that that language is covered in the broader term "farmer," and in order to satisfy some gentlemen who are in doubt about it, we will have no objection to that amendment.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. SLAYDEN. Let us have the amendment again reported.

The CHAIRMAN. Without objection, the amendment will again be reported.

The amendment was again read.

Mr. SLAYDEN. I understand it now. I would like to ask my colleague one question. That would have to go in at several other places?

Mr. BLANTON. Yes; it would have to go in at several places.

Mr. Chairman, in view of the statement of the chairman of the committee, I shall not care to argue it.

Mr. STAFFORD. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Wisconsin want to oppose the amendment?

Mr. STAFFORD. Yes. I should like to inquire of the chairman of the committee whether it is purposed by this amendment to except from the purview of this bill these large ranchmen who may corral large quantities of live stock and by that means enhance the price of the meat products of this country?

Mr. LEVER. Let me suggest to my friend from Wisconsin that the rancher can not hold his stock beyond a certain time, because if he does so they eat their heads off, and the very economics of the situation force the rancher to sell when the stock is in that condition which will bring the largest return.

Mr. STAFFORD. It does not require much knowledge about ranch conditions—and I confess to have only a limited knowledge—to know that a ranchman can hold his cattle for a number of months, if not a number of years, and await the disposition of the stock for a high price market.

Mr. LEVER. He may hold his cattle for a number of months, that is true.

Mr. STAFFORD. Yes.

Mr. LEVER. But if he holds them for a number of years the cattle will eat themselves up pretty soon.

Mr. STAFFORD. This bill seeks to prevent cornering?

Mr. LEVER. Yes.

Mr. STAFFORD. And hoarding——

Mr. LEVER. Yes.

Mr. STAFFORD. Of large quantities of eatables, and the like?

Mr. LEVER. Yes.

Mr. STAFFORD. Now, you make an exception in the case of cattle raisers, and the country is complaining generally about the high cost of meat products. You are by this amendment enabling the withholding from the consumers a large body of steers that could be withdrawn by the large ranchmen. I will agree that there are many small ranchmen who may not be guilty of the practices of which the large ranchmen would be guilty in trying to raise the price of beef cattle.

Mr. LEVER. If the gentleman from Wisconsin will read section 6 of the bill, which section immediately follows, he will find that that section absolutely prevents it.

Mr. SLAYDEN. Will the gentleman yield for a question?

Mr. LEVER. I yield to the gentleman from Texas.

Mr. SLAYDEN. The gentleman realizes that cattle that are bred on ranches are not ready for the market until they are mature.

Mr. STAFFORD. I quite realize that.

Mr. SLAYDEN. And the ranchman who holds his cattle to mature them is not hoarding them.

Mr. STAFFORD. Yet there are times when cattle are held by ranchmen after they are matured.

Mr. SLAYDEN. It takes some time to grow cattle, and the cattle growers are not hoarding them while the cattle are growing to maturity, any more than the proprietor of an apple orchard is hoarding his apples while they are growing.

Mr. BLANTON. I reserve the right to reply to the gentleman from Wisconsin.

Mr. STAFFORD. The gentleman from Texas has yielded the floor.

Mr. BLANTON. I should like to suggest to the gentleman that the high price of beef is not caused by the action of any cattle raiser on earth. The high price of beef is produced by the process which takes place after the cattle get off the hoof, in the packing houses of the country.

Mr. STAFFORD. Oh, well, that is always the claim, to throw the blame from one class to the other; but of course the cattle raisers are getting a large price at the present time for their products, and I do not see why we should except the large ranch proprietors from the effect of this law if they are guilty of any of the acts which are within the provisions of the law.

Mr. GOOD. Will the gentleman yield?

Mr. LEVER. I ask unanimous consent that the debate on this amendment close in five minutes.

Mr. THOMPSON. Will the chairman of the committee yield? I understand he is willing to accept the amendment.

Mr. LEVER. I am willing to accept it, because I think it is covered already.

Mr. THOMPSON. I do not know whether it is covered or not. The language of this amendment is very broad. I think it should be restricted to the breeder of live stock, and that it should not extend to the man who could go out and buy up the cattle of the world and be the owner. I would not object to the amendment if it were restricted to the breeder.

Mr. LEVER. The gentleman objects to the developer?

Mr. THOMPSON. Yes.

Mr. LEVER. I wonder if the gentleman who offered this amendment would not be willing to strike out that word?

Mr. RAKER. Mr. Chairman, the amendment is all right.

Mr. THOMPSON. Mr. Chairman, I have reserved the right to object to the request of the gentleman from South Carolina.

The CHAIRMAN. The Chair has not yet announced it to the House.

Mr. LEVER. I ask unanimous consent that the debate on this amendment shall close in 10 minutes.

Mr. BLANTON. I want five minutes.

Mr. WASON. Mr. Chairman, we can not hear what is taking place over on the other side of the House, and we are interested in knowing what it is.

The CHAIRMAN. The Chair will state that the request of the gentleman from South Carolina has not yet been submitted.

Mr. DIES. If the chairman of the Committee on Agriculture begins now to name certain animals in the hands of certain persons to be left out of this bill, where will he finally wind up? All these things are embraced in this bill now.

Mr. LEVER. I think so.

Mr. DIES. What is the legislative wisdom of undertaking to specify cattle? Because if you do, the next thing you will do is to specify hogs and chickens and the whole animal family.

Mr. LEVER. I fully agree with the suggestion of the gentleman. I was only trying to save time.

Mr. DIES. They are in the bill now.

Mr. LEVER. I think they are in the bill now. I ask unanimous consent that all debate on this amendment and all amendments to this section close in 15 minutes, the gentleman from Texas [Mr. SLAYDEN] and his colleague [Mr. BLANTON] and the gentleman from Michigan [Mr. MCLAUGHLIN] to have the time.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this amendment close in 15 minutes, 5 minutes to be given to the gentleman from Texas [Mr. SLAYDEN], 5 minutes to the gentleman from Texas [Mr. BLANTON], and 5 minutes to the gentleman from Wisconsin [Mr. MCLAUGHLIN]. Is there objection?

Mr. THOMPSON. Reserving the right to object, I want to ask the chairman if he proposes to accept the amendment?

Mr. LEVER. I have no objection to it, because I think it is already covered. I see no reason for its going into the bill at all, but if the committee wants to vote it in I have no objection.

Mr. KINCHELOE. Reserving the right to object, I want to ask the gentleman from South Carolina a question for information. Do I understand that the chairman proposes to claim to this House that in the absence of the provision offered by the gentleman from Texas the farmer who grows cattle would have to be licensed?

Mr. LEVER. No; the farmer who grows cattle is exempted.

Mr. KINCHELOE. Then why should the amendment go into the bill at all?

Mr. LEVER. I have stated in regard to that.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. BLANTON. Mr. Chairman, in availing myself of the short time allotted me under the five-minute rule to discuss the amendment which I offered to likewise exempt "all producers and developers of live stock on foot" wherever the farmer was exempted in the bill, I was unable then to go into the subject of this proposed legislation as fully as I desired. I therefore greatly appreciate this privilege unanimously extended of now expressing my views in greater detail.

I resented the extravagant statement of my friend from Georgia, Mr. HOWARD, "that cattlemen are making our wives pay 60 cents a pound for round steak," for in the first place, no such price prevails anywhere in the United States, and in the second place, it is not the cattlemen who are responsible for the present price of beef, as the enormous profit is put on the finished product after the live stock on hoof leaves the possession of the producer.

I said then, and I repeat it, that there is no man more loyal, more liberal, more patriotic, more fearless for right, with more humanity in his heart, and who will make more sacrifice, both financial and personal, for the welfare of his country than the big-hearted, red-faced, white-hatted, spur-booted, generous stockman of the Southwest. This statement is equally true of and applicable to the deserving farmers of my district. What the consumers demand and all that the stockmen and farmers request is that we pass wholesome laws which shall bring the consumer and producer closer together by permitting the consumer to buy the producer's products by paying only a reasonable profit charge in addition to the price received by the producer for handling and putting into food shape.

While from the beginning of time it has been recognized in a general way, yet never until now has the proposition been brought home to us forcibly face to face that it is the farmer and stockman upon whom the whole world is primarily dependent for food. A cannon is helpless and useless without ammunition. No soldier can fight without food. The successful speedy termination of this cruel war depends primarily upon the food producers of our Nation.

On April 10 President Wilson said:

> That by planting and increasing the production in every way possible, every farmer will perform a labor of patriotism for which he will be recognized as a soldier of the commissary, adding his share to the food supply of the people.

We are engaged in one of the bloodiest and most barbarous wars known to history, and upon the issue depends the democracy of the world. It is world democracy against Prussian autocracy. It is the rights of free people on the one hand and on the other it is the manacles of slaves. Unless Russia, with her 180,000,000 people, occupying practically one-sixth of the universe, shall come to the rescue with a strong offensive on the eastern front, we are probably facing a several years' conflict that will require the entire resources of our Nation to successfully conclude. England and France are now bravely standing between us and a ruthless enemy, which scoffs at international law, which breaks sacred treaties as well, which wantonly disregards all rules of civilized warfare, which premeditatively murders in cold blood thousands of helpless women and little innocent children, brutally dismembering them limb from limb, in whose heart there is no precept of sympathy, compassion, or mercy, an enemy which lustfully violates the sacred rights of the virgin daughters and virtuous wives of a conquered foe—such an enemy is now held in check by our allies. What will happen to America's present happy homes if this terrible monster should break through the European lines and bring its torch and instruments of cruel torture and slaughter to our shores?

No true American with warm red blood in his veins can calmly reflect upon the outrageous and infamous wrongs against Belgium and Serbia, the helpless, downtrodden, devastated, ruined countries and peoples which the Imperial German Government through iron will and might of arms has tried to stamp out of existence and annihilate completely with neither provocation nor excuse without resenting it as an insult to and crime against the world. When we remember that Germany has disregarded and discarded all humane safeguards and regulations demanded by civilized peoples, has kept in the rear of her armies thousands of helpless girls and women captured and dragged from their homes and loved ones, and forced to live a life far worse than death, the blood of true Americans boils with just indignation and resentment, and with all we possess we are ready to heed and answer the cry "Come over to Macedonia and help us."

For a successful army, food is the first essential. Sometimes it is an easier service to fight at the front than to perform that labor and drudgery which is a condition precedent to the production of food. In this great emergency the producer who, under the system of universal conscription, patriotically and loyally raises food for the democratic allied armies of the world, is just as brave a hero as the soldier who by his country is designated under the same system of conscription to perform a different class of service.

I am a man of great tolerance, yet I have no patience with and I must resent the sectional expressions which lately have been repeated so many times on the floor of this House by the distinguished gentleman from Pennsylvania [Mr. MOORE] against southern cotton farmers and stockmen. Why so persistently he should seek to penalize cotton by putting upon it a tax of $2.50 per bale and not propose a similar tax upon Pennsylvania coal and other commodities, I can not understand. It is equally incomprehensible to me why now he should be jealous of the few insignificant exemptions and inducements promised farmers in order to stimulate and insure food production, and should complain as he did the other day of the fact that certain farmers under conscription would be exempted from fighting in the trenches. He is awfully afraid that the farmers will get something not accorded to his city constituents. If the gentleman is jealous of the farmer's lot and is willing to forego the honor and income of his position and face the hazards of the farm—the hot sun, the droughts, the sand storms, the floods, the grasshoppers, the hail, the rust, the numerous destroying insects, the boll weevil, the outrageous cost of farm implements, the rising before day and working at least 14 hours out of every 24, combating the strongly organized vultures which annually conspire against him to get possession of his products at a nominal price, to bring forth from the ground the life-sustaining food by the sweat of his brow—if my friend from Pennsylvania is willing to undergo all this, no farmer will object to turning over to him all of his exemptions and immunities.

This eminent statesman represents a district—Philadelphia—practically all of whose several hundred thousand constituents are nonproducers of food, and have for generations been dependent upon the farmers and stockmen of the United States for food, both grain and flesh, to satisfy their stomachs, clothing to cover their nakedness, gloves to lily-white their hands, and stylish shoes to make corns on their feet. On behalf of a grateful constituency he should hail the American farmer and stockman as a Joseph and benefactor. The majority of his people work from 9 a. m. until 4.30 p. m. with holidays growing more numerous annually, and they should require their able urban Representative to be more considerate with their rural brothers of toil, who are unfamiliar with the expression "working hours," for the greater number of their hours are such. As brother laborers—though of different kind—there should be a fellow feeling between him and all farmers, for no Member of this Congress is more industrious, more continually on the job, more to be relied upon at all times to furnish copy for the RECORD than this distinguished and honored gentleman from Pennsylvania.

Regardless of exemptions, I maintain that more farmers and cowboys from my district have enlisted already in the United States Army and Navy than there has been constituents enlisted

from his Pennsylvania district. I further maintain that less slackers can be found in my district than in his, and I challenge him to prove the contrary. In the big farming and stock-raising county of Runnels not a single slacker could be found. In my present district, the largest in the United States, running 550 miles east and west from Mineral Wells to El Paso, and with 58 counties in it, the people are standing as a man behind their President. The little seditious trouble which arose a short time ago, but now ended, was caused by a small handful of ignorant Socialists, whose minds had been poisoned by propaganda eminating from Chicago and New York. In my new district, into which I have lately been placed by the new apportionment, embracing the loyal counties of Jones, Shackleford, Stephens, Palo Pinto, Nolan, Taylor, Callahan, Eastland, Runnels, Coleman, Brown, Comanche, Mills, Concho, McCulloch, San Saba, Lampasas, Burnet, and Llano, which is strictly a farming and stock-raising district, no people more loyal and patriotic exist anywhere in the world, and based upon per capita wealth my district will compare favorably both on subscriptions to liberty bonds and the Red Cross with any district in the United States. The war registration in Pennsylvania was only 95 per cent of the Government estimate, while the registration in the farming and stock-raising State of Texas was 97.3 per cent of such estimate. I greatly admire the matchless energy, the incomparable industry, the indomitable perseverance, the analytical mind, the wonderful discernment on parliamentary and constitutional questions, and the loyal patriotism of this distinguished gentleman from Pennsylvania [Mr. MOORE], and I regret exceedingly that his unexplainable prejudice against southern farmers and southern farm products detracts from the high standard of American statesmanship so uniformly maintained by other members of his State delegation.

We must view the farm and ranch problem not merely from the standpoint of the present high prices of their products, but also from other conditions existing now and in the past.

For 20 years Congress has permitted the prices on all farm machinery to advance steadily until they have doubled and even trebled, when there was no reasonable occasion for it. Congress has likewise permitted exchange speculators and manipulators to continue their pernicious practice of cornering the market on all farm products in a way that annually has forced the farmer to sell his crop at the lowest minimum and said shylocks to receive the highest maximum his combination could extort, until year after year farmers have been getting deeper and deeper in debt and more and more discouraged, and this situation has compelled the farmer boys to abandon the farms and flock to the towns in order to make a living. Less than three years ago farmers sold their cotton for considerably less than it cost them to produce it. This is the first time in the history of our Nation since the Civil War when farmers are getting good prices for all their products. They are confidently looking to the proceeds of this year's crop to enable them to get out of debt and once again to hold their heads above water. Practically all of the farmers in west Texas have just sustained an almost entire failure in grain crops. They have lost both their labor and valuable seed wheat and oats. They are dependent almost altogether on their maize, corn, and cotton. They are still facing a prolonged drought paralleling that of 1886–87. Our country urgently needs cantonments. A guaranteed percentage profit over and above all expenses is to be paid contractors for building same, even up to the tremendous amount of $250,000 profit on a cantonment. Our country more urgently needs food, both for our own people and our allies. Why should not the producers of food be guaranteed a living profit? Our President shows great wisdom in offering them some inducement to stick it out and face the said gentleman from Pennsylvania and present conditions.

Never in the history of this country, notwithstanding maximum high prices, has the live-stock business been more precarious and hazardous. The great grazing section between Abilene and El Paso is not half stocked, and should ample rains come and produce the grass neither cattle, sheep, nor goats are available to fully stock it. Cattle and other stock have died by thousands. Many stockmen have been forced to ship their herds to other States, being wholly without water. Dry pastures are forcing many to feed their stock on high-priced cottonseed cake. In the Pecos and Rio Grande Valleys stockmen are paying as high as $40 per acre merely for the privilege of grazing their herds on alfalfa fields during the summer. Yet under such conditions, which stockmen may face at any time, the gentleman from Illinois [Mr. BRITTEN] and the Senator from Oklahoma [Mr. GORE] would have us pass a law that cattlemen must hold all she cattle until they are 6 years old. If they were forced to do this, and were guaranteed even their expenses back without a profit, my learned colleague from Georgia of the "playing card and kitty" fame [Mr. HOWARD] would be tickled to death to be able to buy round steak at 60 cents per pound.

On June 15, 1917, there were 23,057,122 pounds of butter and 172,566,750 dozens of eggs on cold storage in the United States. Being held for what? Still higher prices. The above figures are based upon reports from firms willing to report voluntarily and do not embrace the butter and eggs held by firms which have refused to report. With the power which Congress will soon place into the hands of the administration, such firms will be forced to report, and such hoarding will be prohibited.

This bill is the most important of any that has ever been before Congress. It places greater power in the hands of the President than any other legislation ever proposed. Unless wisely executed and administered, it is a most dangerous bill. If I did not believe that the President of the United States was a proven friend to the producer and would properly safeguard his interests, I would never support the bill. If it is unwisely administered or executed without proper regard for the just deserts of the producer, it will be ruinous to all farmers and stock raisers. But as we have already intrusted to him the precious lives of our stalwart young men and billions of dollars in money, why should we refuse to intrust him with this power to stimulate production, to control food speculation, to bring the producer and consumer nearer together, and to stop all waste?

Engraven in lasting stone and adorning the front of the magnificent Union Depot in Washington, easily readible by all visitors to the Nation's Capital, are these words:

The farm: Best home of the family, main source of national wealth, foundation of civilized society, the natural providence.

This and more is what the farm means to our Government. Had it not been for the almost solid vote of the stockmen and farmers of my district, I would not now enjoy the privilege and bear the responsibility of serving in this Congress. Should I remain here 1 term or 20, I shall never forget what has been done for me by the rural population of my district. God bless them; they are the salt of the earth.

Oh, but the gentleman from Pennsylvania [Mr. MOORE] objects to the appropriation in the bill to be used in guaranteeing to the farmer a minimum price for his products because a like guaranty has not been made to his constituents for the value of their labor. If this appropriation were unreasonable, I, too, would be against it. I was against that feature of the other food bill which authorized the creation of a new Assistant Secretary of Agriculture at a salary of $5,000 and the employment of 7,000 additional lecturers, at a salary of from $2,500 to $3,000 each, to instruct county agents how to advise farmers how to farm. I said then and I repeat now that the farmers of our country have already forgotten more about farming than such newly ordained lecturers will ever know in a lifetime. I considered that with 17,000 employees already in the Agricultural Department, and the cooperation it could get from the many other departments, these additional employees were unnecessary.

I intend to heartily support President Wilson in all of his plans and policies and as Commander of the American Army and Navy, I intend to vote to give him everything he demands to win this war and bring it to a speedy and successful termination. But it must be demanded by the President. I do not intend to vote for everything and anything that is demanded by that chief or this head. Just now the United States is in debt. Each day it is growing deeper and deeper in debt. The people are to be taxed more heavily than ever dreamed of before in all our history. Thousands of people are now unable to make ends meet. For every five million here and five million there it will be necessary for us to add a greater burden upon the people. In such times it pays a government, just as it does an individual or business establishment, to pause and ask the practical question, "Is it absolutely necessary?" Every appropriation must appear absolutely necessary to receive my support during this war emergency.

Certain heads in the Department of the Interior had a bill prepared to appropriate $5,000,000 to enable the Secretary to clear, grub, level, ditch, plant, and cultivate public lands, and to commandeer private lands within reclamation projects and farm same on behalf of the Government, and this bill was introduced on April 13, 1917, as H. R. 2913, and demand was made that it be voted out of the committee and passed immediately. I have fought this bill from the beginning as useless and unnecessary through all of its changes, and if it ever gets out of the committee I intend to vote against it.

With Chairman Denman, of the Shipping Board, contending for a price on steel of $56 a ton, and Gen. Goethals maintaining that it shall be $95 a ton, we realize that it is possible for quite a difference of judgment to exist between two distinguished heads of departments.

When in the bond bill the Secretary of the Treasury asked for $10,000,000 to cover the expense of printing and selling the bond issue, certain Members argued that this sum would be necessary, as it would be a difficult task to sell the bonds. I supported the Fitzgerald amendment, which reduced this sum to $5,000,000, believing that sum ample, considering that the Government Bureau of Engraving and Printing would be able to do the mechanical work at a minimum cost and that the people of the United States would be patriotic enough to subscribe to the bonds without having to spend an enormous sum to induce them to do it. And when the Secretary of the Treasury made the first call for $2,000,000,000, 4,000,000 loyal men and women subscribed $3,035,226,850 instead. I voted against House resolution 44 to allow secretaries to the various committees which rarely ever meet. I voted to eliminate the appropriation of $250,000 in section 4 of House bill 3932, to provide automobiles for enforcing the explosive law. I participated in the fight which caused the committee to eliminate about $4,000,000 unnecessary appropriation in the first Lever bill, and I voted to recommit the bill to eliminate further waste, but when this motion failed I voted for the bill in order to stand by the President. I voted to force the committee to eliminate about $200,000 waste in the bill to acquire the exposition grounds at Norfolk for a training station. Since the committee and House have refused to accept the amendment to the river and harbor bill limiting expenditures of the $26,900,000 appropriations to such projects as the President may deem war emergencies, I shall vote against this bill. There are some meritorious projects in it, but I am not going to vote for the unmeritorious ones for that reason. The committee had the chance to limit the bill to only such propositions as were meritorious, the decision to be made by the President of the United States, and refused. It is true that the Trinity River has been left out of this bill. But since June 13, 1902, in 16 enactments Congress has spent $2,485,287 upon the Trinity River in my native State. The Chief of Engineers of the United States Army in his 1916 report says:

From Dallas to its mouth is 510 miles. Study of the data now available indicates that the conclusions formerly reached, to the effect that complete canalization of the river would be necessary to secure anything other than intermittent navigation, is correct. The complete cost of canalization, including necessary clearing of the river, is estimated at $13,444,300, in addition to the amounts heretofore expended, and the necessary operation and maintenance after completion $300,000 per annum.

I mention this to show that it would have been wise for Congress to have left off the last 15 appropriations it has made for this one project since 1902, and I have mentioned a few of the votes, and could mention others, whereby I have helped to eliminate waste and extravagance, to show that I am with my friend from Pennsylvania on that issue.

But the appropriation in this food bill is a worthy one and is not subject to criticism.

There is but one other subject I desire to mention, the prevention of waste by stopping the manufacture of intoxicating liquors. The time has come for Congress to act. We can not be true to our God, to ourselves, to our country, or to our constituents if we do not heed the great cry which is coming from the people of this Nation on this subject. Let us be brave and perform our duty.

Mr. SLAYDEN. Mr. Chairman, the manifest purpose of this paragraph in the bill was to except the farmer from certain provisions of the proposed law. With that idea in mind the committee said that this section should not apply to any farmer, gardener, and so on. Now, there is just enough doubt whether those words cover breeders of live stock to make it desirable to amend the language of the bill so as to leave no misunderstanding whatever as to its meaning. The live-stock interests believe that the language would not cover them, and they want this amendment in the bill. They have telegraphed and written such a request to me and to other Members from Texas, and I dare say to the Members from Nebraska, Kansas, and other States that are engaged actively and extensively in the growing of live stock. I had in mind an amendment to offer when the gentleman from Texas, my colleague, preceded me and offered his. My amendment was simply to insert the words "breeders of live stock" after the comma in line 3, page 6. That amendment would remove all doubt.

Now, Mr. Chairman, in colloquial speech there is a difference between farming and stock farming and between farming and ranching. Farming as ordinarily accepted in current speech means cultivation of crops, the cultivation of the soil.

Mr. HAUGEN. Will the gentleman yield?

Mr. SLAYDEN. Yes.

Mr. HAUGEN. In addition to that, the breeder of cattle is different from a feeder of cattle. If you include breeders you ought to include feeders.

Mr. SLAYDEN. I think the amendment offered by the gentleman from Texas, my colleague, Mr. BLANTON, does cover that. I did not offer my amendment——

Mr. THOMPSON. Will the gentleman yield?

Mr. SLAYDEN. Briefly.

Mr. THOMPSON. Does not the gentleman think that the amendment offered by the gentleman from Texas [Mr. BLANTON] is so broad that it would include the packing houses engaged in the purchase of stock? The packing houses are engaged in the stock-raising business as well.

Mr. SLAYDEN. If they are, they should come under the provision. I do not believe in class legislation.

Mr. THOMPSON. They do not breed.

Mr. SLAYDEN. I understood the gentleman to say that they did.

Mr. THOMPSON. Sometimes they do; but I do not want to let them go to the extent of purchasing all the cattle in the country——

Mr. SLAYDEN. Mr. Chairman, I want to use part of the time remaining to me in saying that there is either a great misapprehension or a blind prejudice in the minds of some gentlemen. I never knew a packer in my life, never had any dealings with one, although I am a cattle grower in a small way. The statement made to-day by my friend from California that the producers of cattle and the farmers are not getting half the value of their stuff is not true. Some constituents of mine the other day shipped 10 carloads of cattle to a great market where the packers are and sold at $8.90 a hundred pounds on the hoof for animals that weighed 1,100 pounds. That is approximately $100 a head. If they are really getting less than half the value of their product, then, sir, you and I will not have the privilege of eating steak very frequently unless we persuade Congress to increase our compensation. [Applause.]

We should not be prejudiced in legislation. Even the packers are entitled to justice. And if our laws against conspiracies in restraint of trade are rigidly enforced, as they should be, they can be made to conduct their business fairly.

The stock growers are all doing their best to meet the world-wide demand for more food. They need no act of Congress to stimulate their efforts. The prevailing prices insure the effort. But they do not want interference by officials, high or low, in Washington who have no practical knowledge of the business of breeding or maturing cattle, and they do not want to be subjected to any price-fixing bureau. They are willing to take their chances in the market and have their business regulated by the law of supply and demand. When there is an overabundant supply they will take the low prices that such conditions will compel, and when there is a scant supply they want and feel they are entitled to receive the full market value.

Although it has been interfered with now and then by the force of governments and prices of commodities fixed temporarily by autocratic control, the law of supply and demand can not be long set aside and is sure to reassert itself.

Gentlemen keep on saying that foods are cheaper in Germany and England than in the United States, but the evidence to support that statement is not convincing. They overlook the fact that in both those countries martial law controls. They overlook the fact that in war times and in countries like England and Germany the scarcity of supplies compels resort to many substitutes for those things the people demand under normal conditions. Flour that ordinarily would be rejected is eagerly consumed now by Englishmen. Germans are eating less bread, and that of an inferior quality, according to all the reports that we receive on this side. Potato flour has been mixed with that made from wheat, and, while it may be wholesome, it is not a satisfactory substitute. The facts of the situation should not be overlooked when comparing prices in Europe and in the United States. Misrepresentation only confuses us in the effort to understand the situation and see the path of duty clearly.

The able chairman of the committee has said about all that can be said in support of this measure, and his comparison of prices in England and in the United States, found in the RECORD of June 18 is not convincing. He takes his quotations from the market of the period from May 9 to May 12 this year. That was a period of great excitement in the grain markets. The allies were buying heavily and foolishly. They were bidding up the market on themselves, yet wheat flour was at that time quoted in New York at $15.40 to $16.15 per barrel and at $24 to $29.83 per barrel in Liverpool. His figures do not sustain his contention. Of course, wheat is high now and was much higher in May. As the marketing of the new crop comes nearer prices are declining, which is inevitable with increased offerings. It is the old law of supply and demand reasserting itself in the grain market, as it will in the meat market. When

the rains fall on the ranges, the grass grows and cattle breeders are given an opportunity to supply the demand. Interference with their work by official amateurs, however well meaning, can only work mischief and defeat the purposes of this bill.

The avowed purpose of the bill is to reduce the cost of living. As all the food consumed comes from the farms and ranches it follows that the purpose is to reduce the earnings of farmers and breeders of live stock. That is no way, however, to get an increased supply.

We all want to win the war. We all want to supply the needs of our own people and our allies, and if you will let the farmers and ranchmen alone and leave them the advantage of the markets, the regular natural advantage, they will provide the food the world requires.

That provision of this bill which seeks to prevent the conversion of food grains into whisky or beverages that have a heavy alcoholic content during the war is not objectionable, for certainly staple foods are of more importance than whisky. No one will seriously object, I fancy, to section 13, which undertakes to give the President power to regulate the liquor traffic during the war when the lack of regulation may delay the successful ending of the war.

But, Mr. Chairman, it is whispered about the Chamber that amendments have been prepared and will be offered which, if agreed to by the Congress, will establish complete prohibition of the manufacture of beer and wine as well as whisky. That seems to me a dangerous and foolish thing to do. To merely discontinue the making of whisky during the war will do no harm and may do much good. It will not even hurt the owners of the whisky now in bond, for as the quantity decreases the value of that remaining will increase so much that even if the making of whisky is never resumed the distillers and dealers will not be irreparably damaged. But it is quite another thing to decree the destruction of the brewing industry.

Many millions, many hundreds of millions, of dollars, I suppose, are invested in beer-making plants. A very great number of people get their living by labor in brewing plants. It would be a harsh, unjust thing for Congress to enact a law destroying a legitimate industry. Morally it would have just as much right to destroy all the cattle, swine, and sheep at the command of vegetarians and to forbid the raising of more, or to say that American citizens shall not grow tobacco for market. Indeed, there is already in existence an important organization which is working to secure laws forbidding the use of tobacco. The demand for sumptuary laws is progressive.

The proposed amendment will destroy the value of every vineyard in the country where grapes are grown for wine making. Thousands of farmers, good, honest, industrious, sober American citizens, whose sole possessions are such vineyards, will be ruined, and no man who wants to take their property from these citizens by act of Congress has yet suggested that they shall be paid for it. It is the tyranny of fanaticism.

With equal force this blow is aimed at potent liquors like whisky and mild beverages like beer and wine. Whisky, which is half alcohol, is condemned and destroyed, and wines, with only 7 to 10 per cent of alcohol, and beer, with only 3 or 4 per cent, suffer the same penalties. It is illogical and absurd and is not in the interest of temperance. Every observant traveler knows that in what are called the wine and beer drinking countries there is comparatively little drunkenness. There is a relatively small consumption of liquors with a high alcoholic content and the people keep sober. People there do not discuss temperance in the use of beverages, because there is no intemperance. The people feel themselves entitled to personal liberty, and they enjoy and jealously guard that right. The most autocratic government of Europe, even under the stress of war, would not dare to invade such rights, for the answer would be revolution.

There exists either an inexcusable degree of ignorance about the European war orders touching the manufacture and use of beverages or there is the most persistent and deliberate misstatement of the facts. No country in Europe has gone to prohibition. I doubt if any—even Germany, with her wonderful military efficiency—would dare try it. Russia did not, as everyone ought to know. What Russia did was to stop the sale of vodka, a fiery, strong drink, without interfering with the traffic in beer and wine. Reports from Russia indicate that almost overnight the Russians who had been addicted to the excessive use of vodka became a sober people as a consequence of that law.

England and France, sore beset as they have been by powerful enemies, have not adopted prohibition. Their legislation has been limited to regulation suggested by war conditions.

England did reduce the output of beer by two-thirds, but it bred so much discontent among her soldiers, sailors, and workmen that she has authorized an increase of 35 per cent over the amount that her war legislation permitted.

When a deputation of prohibitionists waited upon the Prime Minister of England, Mr. Lloyd-George, on Thursday, the 5th of April last, in the interest of a law prohibiting the manufacture of liquors during the war, Mr. Lloyd-George, after listening to the views of the deputation, stated that in a matter of that kind it was essential to carry the people with them, and to carry them through to the end. Anyone who divides the people, the only force that can accomplish a great measure of temperance reform, he said, would be a bad temperance adviser, and such a policy would lead to disorder from the point of view of national interest.

Mr. Lloyd-George urged so-called temperance reformers to take into account the opinion of labor leaders.

It would be madness for any prime minister—

He said—

in the middle of a war to put forward a proposal in direct defiance of practically the whole of organized labor in the country.

Unity of the people is as desirable at this time in America as in England and the legislation now proposed will develop disunion. It is no time, as the British premier, Mr. Lloyd-George, so wisely said, to legislate on social questions of a controversial nature. If we are to defeat our powerful enemies we must have complete harmony in the United States.

France and Italy not only have not gone to prohibition, as has been so often and so falsely said, but both countries provide a liberal quantity of wine every day to their soldiers as a part of the ration.

And, by the way, if any man has found any lessening of efficiency among the wine-drinking French soldiers I have not heard of it. It may also be said, in passing, that if their beer drinking has lessened the efficiency of the Germans we ought to be grateful for their indulgence in that drink. They would indeed be supermen if they were more efficient.

Mr. Chairman, drunkenness is a disgusting vice, but by no means as common as some people profess to believe. The increasing sobriety of the world is a gratifying spectacle. Of their own volition, without the compulsion of undemocratic sumptuary laws, the people are rapidly turning from strong to mild beverages. They are giving up whisky and taking to beer which is a temperance move.

I shall insert at this place in my speech, Mr. Chairman, part of a letter written by Thomas Jefferson on the 6th of January, 1816, to his friend, Col. Charles Yancey, in which he refers to the petition to the General Assembly of Virginia of a Capt. Miller to be allowed to establish a brewery. Mr. Jefferson said:

There is before the assembly a petition of a Capt. Miller which I have at heart, because I have great esteem for the petitioner as an honest and useful man. He is about to settle in our county, and to establish a brewery, in which art I think him as skillful a man as has ever come to America. I wish to see this beverage become common instead of the whisky which kills one-third of our citizens and ruins their families. He is staying with me until he can fix himself, and I should be thankful for information from time to time of the progress of his petition.

Mr. Chairman, notwithstanding the decline of Jeffersonian democracy, and the persistent invasion of the rights of the citizen and the forcible taking away of his personal liberty, I venture to place the views of the author of the Declaration of Independence by those of the gentleman from California who if he had been a member of the Continental Congress in 1776 would have permitted the British to overrun the colonies while he offered prohibition amendments to every paragraph of the Declaration.

AMERICAN UNITY.

Mr. Chairman, our people are wonderfully united and harmonious in their determination as to the war. Many of them were opposed to going into it, but after the Congress spoke all yielded to the decision of their Representatives. As a rule, and to an extent perfectly amazing, Americans of four or six generations and Americans of one generation have rallied to the support of the Government. Thousands of citizens of German or Austrian birth, millions of German and Austrian ancestry, are loyally supporting the country, and will, if needs be, spill their blood for democracy as exemplified in the American Republic. They will fight, and fight loyally, for the country, but they do not like many features of this bill, least of all do they like this proposition to treat them as imbeciles and weaklings unable to take care of themselves, and I sincerely hope these drastic prohibition amendments will be defeated. This is really an opportunity to establish temperance. Stop the distillation of whisky, if you please, but permit beer and wine making and the people will turn from the dangerous to the harmless drink.

But I was speaking of the loyalty of that class of our people who are sometimes described as "hyphenates." I shall insert

here a statement by Jacob F. Wolters, recently published through the San Antonio Express. Mr. Wolters is a native American citizen, and a good one, whose parents were Germans. He is a prominent citizen of Texas, and is right now engaged in a speaking tour of the State urging young men to enlist at once.

Here is his statement:

GERMAN NEWSPAPERS IN TEXAS ARE LOYAL; REPLY TO ROOSEVELT.

Jacob F Wolters has issued the following statement:

"The sweeping denunciation by Col. Roosevelt of the German language press of the United States prompts me to make the following statement:

"I receive at my office weekly every newspaper published in the German language in Texas. Since the United States entered into the war I have had occasion to read these papers. They have evidenced their loyalty to the United States. The editors and publishers of these papers in Texas are all known to me personally. Some were born in Texas, and those not born in Texas have lived in this State during their entire mature manhood. They are good loyal American citizens. These German language papers are of the same character as are first-class weekly papers published in the English language in this State. They have always worked for the development and upbuilding of Texas and the education of the masses who read the German language. If Col. Roosevelt had had occasion to read these papers, I am quite sure that he would have excepted them from his recent sweeping denunciation.

"I deem it of the utmost importance for the welfare of our great State that the spirit of harmonious cooperation shall continue in the future that has always prevailed amongst our citizens in the past. It is for that reason and without the solicitation or knowledge of any editor or publisher of a German language paper that I intrude myself upon the public with this statement."

I have been told by Mr. Rieg, who is in charge of the foreign languages division of the publicity bureau of the liberty loan in the Treasury Department, that out of 1,504 papers printed in 36 different foreign languages that come to his office over 1,300 carried matter prepared by the publicity bureau of the liberty loan. About 400 of these papers placed at the disposal of the Treasury Department, absolutely without charge, space amounting to $614\frac{7}{12}$ pages. That was a valuable contribution to the loan. Nearly all of them aided the campaign for the sale of the bonds in an editorial way. Out of the entire number Mr. Rieg found a spirit of hostility to the loan, as indicated only by sarcastic references to it.

That, Mr. Chairman, suggests a very satisfactory public opinion. Under the leave to extend my remarks, I will print a letter that I wrote a few weeks ago to one of my constituents expressing my views as to the duties and responsibilities of the legislative branch of our Government:

WASHINGTON, D. C., *May 23, 1917.*

REAGAN HOUSTON, Esq.,
San Antonio, Tex.

MY DEAR REAGAN: Now that the military legislation made necessary by the war with Germany is all settled, I can take time to reply in detail to your courteous letters received while it was still pending in Congress.

While you plainly expressed your inability to agree with all my views, your letters were refreshingly courteous, candid, and friendly. They were absolutely free from hysteria and epithets, and you evidently did not believe that emotion and abuse could be substituted for reason in the consideration of public questions. It is far too common, nowadays, to hurl the words "treason" and "traitor" at the man who has an opinion of his own and follows his judgment.

Let me, in as few sentences as possible, review recent military legislation: Congress has not failed to meet the reasonable demands of every exigency with which it has been called on to deal, and in all things essential to the defense of the country there has been no important division of sentiment. It has done the legal part of providing an adequate army, and it has been ready to respond to the necessities when the President, who is the source of information about foreign affairs, has communicated with it.

It followed the President's recommendation as to "armed neutrality," and on the 1st of March voted—403 for to 13 against—to authorize him to arm American merchant ships for defense. I voted for that resolution.

April 5 Congress voted, as recommended by the President—373 for and 50 against—that a state of war existed between the United States and the German Empire.

That vote was an expression of the opinion of Congress that war between the two countries then existed, and it was unquestionably true, even if no formal declaration of war had been made. I believe that it did exist, and so voted. Nine members were ill, absent, or paired and did not vote.

April 14, without a single vote in opposition, the House of Representatives voted to put the people in debt $7,000,000,000 to raise the money to conduct the war.

No other country on earth ever made such an appropriation. Keep in mind that it is in addition to the $1,500,000,000 required for current annual expenses. Also keep in mind that all this huge sum must be earned in the sweat of labor. Idleness produces nothing; industry does, and it is the man who labors in some way or other who must provide all this money to support war.

At this moment Congress is engaged in writing a taxing bill to meet these stupendous obligations. Thousands of people whose thinking facilities did not enable them to see 30 days ahead, and who vociferously shouted for war, are now deluging Congress with protests against this or that item in the bill. They generally say that they want the war prosecuted with vigor, and they want an equitable distribution of the burden, but they are already heavily taxed and the particular war tax that falls on them is unjust and should be taken out of the bill. At this moment I can not think of a single business except farming that has not filed such a protest.

Chairman KITCHIN told me a few days ago that if these protests were heeded we could not raise a thousand dollars when thousands of millions are needed.

Now a word about the bills to raise the Army. They have not been generally understood and the differences between them have been exaggerated. Both, of course, recognized the fact that the Army must be made up of able-bodied male citizens. The real question was the number of men required and how they should be obtained.

The majority of the Committee on Military Affairs are Democrats. After careful consideration that majority, supported by some Republicans, reported a bill to authorize the President to expand the Regular Army and the State Militia to full war strength. This alone will give us an Army of nearly a million men. The bill reported by the majority I shall hereafter refer to as the committee bill.

The committee bill also authorized the President to call into service at once 500,000 volunteers, and coupled with it a provision that if there was not a prompt and satisfactory response he might conscript that number and such other additions to the Army as would be needed.

The other, the Kahn bill, so-called, proposed exactly the same thing as the expansion of the Regular Army and the State Militia, and so far the two bills were identical, but thereafter a wide difference appeared.

Remember that the committee bill first provided for developing the Regular Army and the State Militia to full war strength and then commanded a call for volunteers, to be followed, if it should become necessary, by conscription. It followed the traditional American plan of reliance on volunteers, while Mr. Kahn and his supporters did not believe the patriotism and spirit of Americans could be relied upon and directed the President to resort to conscription from the beginning. But you should know that Mr. Kahn was born in Germany, whose militarism we are supposed to be fighting, and that fact may have had its influence on his reasoning.

There was one other point of difference between the bills which I should call to your attention. The Kahn bill (really drawn in the War Department by the General Staff) proposed to conscript all boys between the ages of 19 and 25, while that of the committee fixed the military age at from 21 to 40. Thus, you see, the question was not whether the country should have an army but how it should be raised. I may say in passing that the House of Representatives was overwhelmingly for the volunteer system, but that preference did not appear in the recorded vote for reasons perfectly well understood in Washington if not throughout the country.

I have referred to these matters in detail, because so many people read even the most important current history carelessly. They soon forget the facts and make honest mistakes in discussing it, while some do not forget and make deliberately inaccurate statements.

While these measures were pending, I received two or three dozen letters and telegrams, alike in meaning and suspiciously alike in wording, commanding me to vote for the Kahn bill, or the "President's plan," as some of my correspondents called it. Others, and by far the larger number, implored me to vote against it. Each claimed to represent the majority view

As a rule the townspeople, more easily reached by propagandists, urged the draft, while the country people appeared to be almost unanimously against it.

Who shall the Congressmen obey under such circumstances? Shall they refuse to exercise their own judgments; and if so, shall they always do so? Let us see how that policy would work out.

I think I know the sentiment of the majority of the people in San Antonio on the question of prohibition, yet the only messages I have received from there on that subject were signed by a number of my most highly respected fellow citizens—clergymen, physicians, and school-teachers, who urged me to vote for national prohibition as a war measure. Of course, the "war-measure" feature of their appeal was purely adventitious, for they are always and aggressively for prohibition, whether the country is in war or at peace.

I also received a letter from Corpus Christi, signed by the president and secretary of the Rotary Club of that city, making the same demand. I do not believe that that club, or my friends from San Antonio who urged prohibition, represented the majority of my constituents, and they do not reflect my views. Under such circumstances I must follow my own judgment.

Shall these excellent people be obeyed? Shall any individual be obeyed by an independent legislative body?

And that brings me to the consideration of a much more serious question raised by the conscription controversy. By the Constitution, which I have sworn to uphold and defend, Congress was made an independent, coordinate and certainly coequal branch of our Government. It was created to make laws, as the President was created to execute them.

Some of my correspondents seem to think that the Executive was created to direct or command Congress. If the founders of our Government had believed in that sort of thing, they would not have created so expensive and useless a body as Congress to represent the people. They would have said frankly that the people need a master to think for them, to tax them, and to rule over them. They would have set up an autocracy at once, for they were wise and practical men.

To demand that Congress, the branch of the Government first named in the Constitution, and as the representatives of the people, presumably the most important, should take orders, is to strike at the vitals of democracy. It means the adoption here in America of the system that China and Russia have recently discarded. How many Americans really want an autocratic Government or would patiently consider it when they come to think it over? If there are many the Republic is in real danger.

Have gentlemen who make such suggestions ever thoughtfully read the Constitution? Have they read the history of the making of the Constitution, the debates of the Convention? If so, they must have learned that all but a few of the members of that body of patriotic Americans and State builders were jealous of the rights of the people and of the Representatives through whom they were to speak.

The order in which the great divisions of the Government are named is significant. Article I of the Constitution, in the first section, says "all legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives."

Section 2 of Article I established the House of Representatives, and section 3 the Senate. Thereafter in the same article the functions of the Congress were defined.

Article II created the presidency and Article III the Supreme Court.

It is worth while, in considering the powers of each division of the Government, to mention that the Constitution prescribes the form of oath the President shall take and to make note of the fact that he

swears to "preserve, protect, and defend the Constitution of the United States."

The Constitution, mind you, specifically confers all legislative powers on the Congress and gives the President no control over the Members of either House. The President can not remove or punish any Member of Congress for any offense whatever, but Congress may impeach a President, remove him from office, and disqualify him from holding any office "of honor, trust, or profit under the United States."

These are elemental features of Americanism and of our scheme of government, but worth repeating when so many people get wrong notions of the nature of that government and the relations to one another of the various divisions established by the Constitution.

Observe the order of their creation, which was not accidental: First, the *legislative* to make; then the executive to enforce; and, finally, the courts to interpret the law. The phrase "legislative, executive, and judicial" has been employed in that precise order since the seventeenth century by students of law, history and politics in connection with the governments of all free peoples.

Let me quote from a few authorities to show the independence of the Legislature of the United States:

James Madison, whose pen wrote most of the Constitution, said, in the debates in the convention, "If it be a fundamental principle of free government that the legislative, executive, and judicial powers should be separately exercised, it is equally so that they should be independently exercised."

Still later, in a letter in the Federalist, he said, "It is agreed on all sides that the powers properly belonging to one of the departments ought not to be * * * exercised by either of the other departments."

From Thomas Jefferson, one time thought an authority on democratic institutions, I quote: "All the powers of government—legislative, executive, and judiciary—result to the legislative body. The concentrating these in the same hands is precisely the definition of despotic government." (See Ford's Jefferson, vol. 2, pp. 223–224.)

In a letter to John Adams, written from Paris September 28, 1787, Jefferson said: "The first principle of good government is certainly a distribution of its powers into executive, judiciary, and legislative."

Speaking of the Confederacy that preceded the Constitution, and its inherent weaknesses, Mr. Jefferson said: "The want, too, of a separation into legislative, executive, and judiciary functions worked disadvantageously in practice."

John Adams, second President, a Revolutionary patriot and great statesman, said the same things time and time again. But Jefferson, Madison, and Adams may not appeal to the modern, and so I shall bring this long and tiresome letter to a close with a quotation from a great historian and student, a man who has been twice elected to the Presidency by the party which claims Thomas Jefferson as its founder.

In Woodrow Wilson's work on Constitutional Government the student may find these words:

"The three great functions of government are not to be merged or even drawn into organic cooperation, but are to be balanced against one another in a safe counterpoise. They are interdependent but organically disassociated; must cooperate, and yet are subject to no common authority."

In a letter to the Secretary of War, Mr. Garrison, written January 17, 1916, President Wilson, who was discussing military legislation, used these words:

"It would never be proper or possible for me to say to any committee of the House of Representatives that, so far as my participation in legislation was concerned, they would have to take my plan or none."

One other sentence in the same letter of Mr. Wilson to Mr. Garrison I will venture to quote as I close. He said: "As you know, I do not at all agree with you in favoring compulsory enlistment for training."

Sincerely, yours,

JAMES L. SLAYDEN.

Mr. BLANTON. Mr. Chairman, I believe this question has been misunderstood by a great many gentleman on the floor. If they thoroughly understood the exact relation it bears to the stock industry of the country there would be no objection to this amendment. The stock business of this country is not merely dependent on the man who raises the calves from mother cattle on their ranches; it is likewise dependent on the buyers who go from farm to farm and buy up the calves which the farmers themselves can not keep in the small inclosure and who put them into the larger pastures and into the feeding pens and develop them for the markets of the country.

My friend from Georgia, Mr. HOWARD, stated yesterday that the cattlemen of the country were the ones who were causing us to pay 60 cents a pound for round steak. My friend from Georgia may know a great deal about a deck of playing cards and the little animal which he calls "the kitty," but he does not know very much about the stock business of the country if he believes that cattlemen are the cause of beef selling at 60 cents a pound. There is no man more loyal, more liberal, more patriotic, more fearless, with more humanity in his heart, and who will make more sacrifice, both financial and personal, for his country than the stockman of the Southwest.

I want to tell you that there are markets in my district where butchers buy their beef cattle direct from producers and do their own slaughtering, and they sold prime rib roast for 15 cents a pound when in Washington and other markets dependent upon packers it was selling for 35 cents a pound, and that extra profit is caused by the action of the packers of the country and not by the stock producers.

Now, this bill covers the packers of the country. It does not seek to exempt the packers of the country. The amendment to this bill which has been offered—and I might say, by the way, that I had 20 minutes' time the other night during general debate. I did not care to use it in general debate, because I had an agreement with the chairman of this committee that if I would yield my time back to the committee and not use it, he would agree to the amendment and accept it without objection. Because of that agreement with the chairman of this committee, and realizing that our time is precious to the country just now, I yielded my time back to this committee under general debate.

Now, Mr. Chairman, some gentlemen object to the word "developer"; they say it should be restricted to the men who raise the cattle. The developer is just as important to the country in the services that he renders in the production of beef as the man who actually raises the cattle.

I can site you to Shackleford County and Throckmorton County and to various other counties in my section of west Texas where it has not rained enough in two years to make the creeks run, and lately from each county the stockmen have been forced to ship their cattle to Montana and the Dakotas and to various other places in the United States. If it was not for the developers of the cattle interests, what on God's earth would become of the cattle industry of this Nation at times? I hope that in accordance with the agreement that I have had with the chairman of this committee—I hope that when the chairman of this committee has agreed that this amendment should be passed—I hope when it has been the intention of the committee to try to expedite business along the lines of agreements made with the chairman that this amendment will pass.

Mr. WILSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. WILSON of Texas. I want to call the gentleman's attention to this in his time, because I know that I can not get the time. It is contended that the words include the developer. I want to call the gentleman's attention to this—that they do not. It mentions "and other persons" with respect to the products of the farm, garden, or other land owned or leased by them.

Mr. BLANTON. It has no application whatever to either the stock raiser or the stock developer.

Mr. WILSON of Texas. Here is a case it does not cover, because they are not products of the garden, land, farm. Take the man who buys a thousand yearlings and puts them on a block of ground and feeds them the product of the ground and doubles the weight of the yearlings. This does not include him—that is the trouble with the words—while the word "developer" does include him, and if gentlemen will carefully read this they will see that he is not included.

Mr. BLANTON. No; that is the trouble. Some members of the committee claim that the exemption embraces the producer of live stock when it does not. And, while the apparent intention of the bill is to stimulate production, I am afraid that its real effect is to reduce prices to benefit the consumer, regardless of the farmer, stock raiser, and other producers of food.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, the committee gave very careful consideration to this portion of the bill; the language in the proviso on page 6 was very carefully drawn. It seems to us it excludes and exempts every class of agricultural activity that ought to be or safely can be exempted.

Mr. RAKER. Mr. Chairman, will the gentleman yield to me?

Mr. McLAUGHLIN of Michigan. Not now. It does not apply to the farmer or the gardener or other person with respect to the products of any farm, garden, or other land owned, leased, or cultivated by him. It would seem to me that that is broad enough. Another thing we wish is to authorize the President to prevent unjust, unreasonable, discriminatory, and unfair or wasteful rates, charges, or practices. If any of the people for whom the gentleman from Texas pleads are engaged in any of these improper or harmful practices, they ought to be reached by this bill.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. And there ought to be authority in the President of the United States to regulate them. I have been informed that some of the large packers of the country control immense areas of land and absolutely control from birth immense numbers of stock, and if we were to incorporate the words suggested by the gentleman from Texas they would be free of all restraint and permitted to indulge in any kind of methods or practices.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. And it would be only necessary, if we exclude men extensively engaged in feeding cattle, for two or three or a small number of them to get together and combine and seriously affect the supply of animals for food in this country. They might indulge in some unjust, unreasonable, discriminatory, unfair, uneconomical rate, charge, or practice. There ought to be power and authority in the

President of the United States to curb, check, and prevent that. I trust that the amendment of the gentleman from Texas will not prevail.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. RAKER. In my part of the country three-fourths of the farmers are thus engaged. They raise hay and grain and raise from 50 to 100 head of cattle a year—that is, beef. Their whole reliance is the beef that they feed on alfalfa which they raise. Does this include that farmer?

Mr. McLAUGHLIN of Michigan. I do not think it includes the individual working for himself; but if there should grow up an injurious practice so harmful as to affect the welfare of all of the people of the country, there ought to be some way to regulate it and prevent it.

Mr. RAKER. Let us get right down to this farmer. Here is a man who devotes his whole business to raising grain, and here is another who devotes his time to raising hay, and, incidentally, so as to dispose of his hay, feeds his own cattle—raises them and feeds them. We call him a rancher in our country.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I am sure I am right in saying that, although the chairman of the Committee on Agriculture may have inadvertently made some suggestion to the gentleman from Texas [Mr. BLANTON] that led him to believe this amendment would be acceptable to the Committee on Agriculture and to its chairman, the chairman of the Committee on Agriculture does not feel that way now and the Committee on Agriculture does not. I have talked with a number of them, and I know of none who thinks it would be safe to let the amendment of the gentleman from Texas go into the bill.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. SLAYDEN. In justice to the chairman, he said he had no objection. That was as far as his statement goes, so far as I know, but the gentleman does not agree with him that the words "farm and farming" cover the cattle grower.

Mr. McLAUGHLIN of Michigan. I think that "land owned, leased, or cultivated by him," and so on, using the words in the bill, are broad enough and carry us as far as we ought to go.

Mr. RAKER. Would that cover the case I refer to?

Mr. McLAUGHLIN of Michigan. I think it covers every case that ought to be covered.

Mr. SLAYDEN. Does the gentleman yield to me or to the gentleman from California? The gentleman does believe, then, that the language in the bill now covers the stock grower as we have been trying to have it?

Mr. McLAUGHLIN of Michigan. I think it covers the individual stock grower.

Mr. SLAYDEN. As other gentlemen doubt it, what is the objection to putting it in?

The CHAIRMAN. The time of the gentleman from Michigan has expired. The question is on the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 25, noes 71.

Mr. BLANTON. I ask for tellers.

The CHAIRMAN. The gentleman from Texas asks for tellers. Not a sufficient number have arisen.

Mr. YOUNG of Texas. Mr. Chairman, I make the point of order no quorum is present.

The CHAIRMAN. The gentleman from Texas [Mr. YOUNG] makes the point of no quorum. The Chair will count. [After counting.] One hundred and forty-eight Members are present, a quorum. [Applause.]

Mr. SCOTT of Miehigan. Mr. Chairman, I have an amendment to offer.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amendment by Mr. SCOTT of Michigan: Section 5, page 6, line 11, amend as follows: Strike out the period and insert a colon and add the following:

"*Provided*, For the purposes of this act a retailer shall be deemed to be a person, copartnership, firm, corporation, or association not engaging in the wholesale business and employing a capital of not more than $10,000."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this amendment shall close in five minutes

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this amendment shall close in five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SCOTT of Michigan. Mr. Chairman, I will say to the chairman that this is the amendment I presented for his consideration a couple of days ago. My purpose in presenting it is not at all to injure or hamper the passage of the bill, because I am in harmony with its provisions; yet I think it is the purpose of the committee to reach the man who does a business equivalent to a wholesaler and under the terms of the bill as it now stands it does not accomplish that end. I am conservative in the statement that there are hundreds of concerns in the country who are designated as retailers who are doing a thousand times more business annually than lots of very large wholesalers, and I do not believe that it is the intention of the committee to exempt those people. Now, if the committee will accept the amendment I have no desire to argue it.

Mr. ANDERSON. What is the amendment?

Mr. SCOTT of Michigan. I define a retailer.

Mr. ANDERSON. How?

Mr. SCOTT of Michigan. I gave the committee the amendment day before yesterday.

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection.

The amendment was again reported.

Mr. ANDERSON. I think that limit is rather small. I think it ought to apply rather to gross sales than to capital. If the gentleman will say gross sales not exceeding $100,000 I have no objection.

Mr. LEVER. Suppose the gentleman modifies his amendment so as to make it gross sales of, say, $150,000 or, say, $100,000.

Mr. CRAMTON. Will the gentleman yield?

Mr. SCOTT of Michigan. I do.

Mr. CRAMTON. Furthermore, inasmuch as your only penalty for unjust discrimination and extortion is in this section, and only applies to the licensee when you know and I know if you exempt your retailer you practically exempt the entire retail business where a great deal of extortion is practiced.

Mr. SCOTT of Michigan. I am not attempting by my amendment to exempt anyone, but I am attempting to make the bill plain as to who is included.

Mr. LEVER. What about the gross sales of $50,000 or $25,000?

Mr. SCOTT of Michigan. I am agreeable to such change.

Mr. LEVER. Make it $50,000.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to modify his amendment.

Mr. SCOTT of Michigan. In accordance with the suggestion of the chairman of the committee I will make it $50,000.

Mr. CANNON. Mr. Chairman, I think we had better make it $50,000.

Mr. SCOTT of Michigan. I have no objection to that. "Whose gross annual sales do not exceed the sum of $50,000."

The CHAIRMAN. The Clerk will report the modified amendment.

The Clerk read as follows:

Modification of the amendment: Strike out the period, insert a colon, and add the following:

"*Provided*, That for the purpose of this act a retailer shall be deemed to be a person, copartnership, a firm, corporation, or association not engaging in the wholesale business and doing a gross annual business of not to exceed $50,000."

Mr. STAFFORD. Mr. Chairman, I would like to have the last part of the amendment read again; it is rather awkward.

Mr. ROBBINS. Mr. Chairman, I offer the following substitute.

Mr. LEVER. Mr. Chairman, the gentleman from Pennsylvania [Mr. ROBBINS] has a substitute which I think covers the situation very much better.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. SCOTT] has expired, and the Chair will recognize the gentleman from Pennsylvania [Mr. ROBBINS].

Mr. SCOTT of Michigan. Mr. Chairman, I ask unanimous consent for two minutes more.

Mr. SCOTT of Iowa. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SCOTT of Iowa. The proposition before the committee has been entirely changed since the agreement to limit the debate on this amendment.

The CHAIRMAN. That is in the discretion of the committee entirely.

Answering the parliamentary inquiry, the fact of the subject matter having been changed by the committee does not change the limitation at all.

The gentleman from Michigan [Mr. SCOTT] asks unanimous consent to proceed for two minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. LEVER. Mr. Chairman, I ask that the substitute offered by the gentleman from Pennsylvania [Mr. ROBBINS] may be read, so that the committee will know what it is. I think it covers the situation.

The CHAIRMAN. Without objection, the substitute to be offered by the gentleman from Pennsylvania [Mr. ROBBINS] may be read at this time.

The Clerk read as follows:

Substitute offered by Mr. ROBBINS: Page 6, lines 5 and 6, after the word "retailer," strike out "with respect to" and insert the following: "whose gross sales do not exceed the sum of $50,000 per annum for."

Mr. SCOTT of Michigan. Mr. Chairman, if the gentleman from Pennsylvania will consent, I will strike out the closing section of my amendment and add that provision to it, which will accomplish the same result.

Mr. GREEN of Iowa. Mr. Chairman, I suggest to the gentleman that will confuse matters. I think we ought to adopt one amendment or the other.

Mr. SCOTT of Michigan. Mr. Chairman, there is one other matter that I want to call to the attention of the committee that I think is worthy of consideration. I do not know how many Members of the House are receiving similar communications on the subject, but at the time the coal matter was up this afternoon one gentleman commented on the fact that hard coal was not being sold at a higher price than any other coal. I have recently discovered a surprising situation to exist, which seems to be an effort to lead the people to believe that this administration and this Congress are not only responsible for high prices of commodities, but are really controlling sales. I have an extract of a letter written by a coal company, whose name I intend to procure, because I want an indelible record made of their membership in the "Ananias Club." In this letter the company says to a prospective purchaser as follows:

We are unfortunately not able to lay our hands on any hard coal at all, as the United States Government has taken over the distribution of the output of these mines, and the operators are not allowed to sell their product excepting in certain restricted channels laid down for them by the Government. Maybe if you could get your Congressman to buy you a car you might get it that way.

I think the committee is entitled to that information.

Mr. FARR. Put in his name.

Mr. SCOTT of Michigan. I am going to do so. I have telegraphed to my informant for the name of the company who wrote this letter.

Mr. FARR. What they say is not true.

Mr. SCOTT of Michigan. I know it is not true.

Mr. Chairman and gentlemen of the committee, in my anxiety to hurry the passage of the many important measures which we have had before us during the past few months I have refrained from engaging in the debates. In other words, I have attempted to express on these matters what I consider to be the advised judgment of the district I represent by my vote rather than by speeches.

If any of the bills we have had before us are more important than another, the food-control bill which we are now considering certainly occupies a preeminent position. It deals with matters which reach the very existence of a large percentage of our people. I think the purpose of the bill was splendidly expressed by the chairman of the committee, Mr. LEVER:

The bill deals with foods, feeds, fuel, and articles required for their production. It aims to facilitate and clear the channels of distribution; to prevent hoarding; to prevent willful destruction of necessaries in order to enhance the price or restrict the supply thereof; to eliminate injurious speculation; to regulate exchanges and boards of trade in order to prohibit undue fluctuation of prices, unjust market manipulation, or unfair or misleading market quotations; to reduce waste, including the power to regulate or completely to prohibit the use of cereals in the manufacture of alcoholic beverages; and to stimulate production by assuring the farmer a reasonable profit guaranteed by the Government, and a free and open market for his products, unrestricted by manipulation and uncontrolled by gambling operations. We intend in this bill to drive from the established agencies of distribution the market manipulator, the gambler, the man who buys as cheaply as he can and sells as dearly as he may, the shylock of commerce who would rob the widow and the orphan, or filch the pennies from the blind man upon the street corner with as much complacency and unconcern as he would evince in ordering a meal at a downtown restaurant.

I want the House to know that the great majority of the 240,000 people who live in the district I represent are heartily in favor of the passage of this measure. I have had letters from merchants, manufacturers, farmers, granges, civic and religious organizations, labor unions—people in the various walks of life in every county in the district; not a few, but thousands—and without a dissenting voice they urge and appeal to this Congress to promptly pass this bill and thus conserve the food supply and alleviate the inexcusable and unjustifiable high price extortions and piracy which has prevailed for over a year. No honest man objects to the sunlight of scrutiny on his actions, nor does he complain of a law which compels him to be honest and fair in his dealings with mankind. If he does not object, certainly this Congress should have no ear for the grafter, the gambler, the market manipulator, and the food pirate. This bill should literally be filled with teeth to reach such people. Every section of the country has made a noble and patriotic sacrifice in this great crisis. They have given to our country not only their savings, in order that this war may perpetuate peace and liberty, but they have made the greatest sacrifice within the power of a human; they have given their sons, their brothers, their husbands, and their loved ones. They do not ask or suggest a compensation—none that we could offer would be adequate—but they do urge and insist, in this critical period, brought about through no action of theirs, that no man or set of men shall be permitted by license or indulgence to take their very life blood in extortionate prices for the food and necessities of life which everyone must have. The "high-price" fever is rampant. It has reached a point where the workingman can scarcely support his family. Something must be done, and I believe a proper administration of this law will do it. This bill is drastic; but, gentlemen, the conditions throughout this country are acute. We are at war—real war—and in such a state we can not permit a select few to enrich themselves at the expense, discomfort, and suffering of the many. In normal times people may have the right to barter in trade with lax restraint, but in times of war the conduct of every citizen and resident should be subservient to the welfare of his fellow men and the unhampered success of the Nation.

Mr. ROBBINS. Mr. Chairman, I ask unanimous consent to proceed for three minutes on this amendment.

The CHAIRMAN. The Chair desires to ask the gentleman from Pennsylvania if he offers this amendment as a substitute?

Mr. ROBBINS. I do.

The CHAIRMAN. The Clerk will report the substitute.

The Clerk read as follows:

Substitute amendment offered by Mr. ROBBINS: Page 6, line 5, after the word "retailer," strike out the words "with respect to" and insert the following: "whose gross sales do not exceed the sum of $50,000 per annum upon."

Mr. ROBBINS. Mr. Chairman, I notice an inclination here to vote down all suggestions offered. I think this is an important bill. The way this bill stands now these large retail and wholesale merchants, like Sears, Roebuck & Co. and others in their class, who buy thousands of barrels of flour and sugar, are exempt from its provisions. We ought not to allow that. If we are proposing here to limit and restrict the power of men who can buy up great quantities of food products and therefore control the market price of such commodities, we ought to have some limitation on it. And the limitation of a gross business of $50,000 a year, I think, is fair. That would make a dividing line that would protect us from the very evil we are trying to legislate against in this bill.

Mr. BARKLEY. Will the gentleman yield?

Mr. ROBBINS. I will.

Mr. BARKLEY. Does not the gentleman realize, though, that if a $50,000 limitation is placed on the bill it will include many thousands of men outside of Sears, Roebuck & Co. and companies of that sort?

Mr. ROBBINS. I understand it will include everybody who does a business of over $50,000 a year in this line, and I think it ought to do so.

Mr. BARKLEY. Is it not true that the retail merchants sell goods on close margins, and if they sell $50,000 or $70,000 a year it does not necessarily mean they are robbing the public and ought to be controlled?

Mr. ROBBINS. I know it does not mean they are robbing the public, but it means a firm that is doing a business of $50,000 a year is doubtless in a position to control the market. You take the Atlantic & Pacific Tea Co. and the Woolworth Co., that buy vast quantities of food products, and they can thereby control the market. The purpose is to give the President control of corporations of that size.

Mr. THOMPSON. A retailer that does a business of only $50,000 gross a year can not purchase much at one time, can he?

Mr. ROBBINS. They do not purchase as much as one that purchases a million dollars' worth. That is true. But in the aggregate they control the market.

Mr. THOMPSON. They could not purchase enough to affect the market, could they?

Mr. ROBBINS. I do not know that that is true. I specified $50,000 a year because I thought that would be a proper dividing line that would be fair to all. The gentleman from Illinois [Mr. GALLAGHER] suggests $100,000.

Mr. THOMPSON. You take practically three-fourths of the merchants and keep them down to $50,000.

Mr. LENROOT. Mr. Chairman, will the gentleman yield for a question?

Mr. ROBBINS. Certainly.

Mr. LENROOT. Is there not as much reason for including a merchant who does a business of $50,000 a year as there is in including every creamery in the country, as the bill now does?

Mr. ROBBINS. Certainly. I am sincerely trying to get this bill in the best form and give the President absolute control over these firms and corporations that can manipulate the food supply of the country. That is what the people are crying out against.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield there?

Mr. ROBBINS. Yes.

Mr. GREEN of Iowa. The gentleman realizes, of course, that although this amount is fixed in his amendment, it is not necessary for the President, in his regulation, to go down to that amount. While the licenses may be required from all, it is not necessary to require reports from all?

Mr. ROBBINS. Yes. I think that the mere fact that the President has authority to do this thing will tend to regulate the evil that is aimed at.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. EMERSON. Is not the danger from the fact that the small concerns combined control the market? And how would this amendment affect that?

Mr. ROBBINS. That would be affected by the other provisions of the bill. This amendment aims at the individuals, corporations, and firms known in general terms as retailers. I think the amendment ought to be adopted, because I think it would clear the situation.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. CRAMTON. While it may be true that one store doing a business of only $50,000 a year would not have a great effect on trade; yet classing together all doing a business of that magnitude, they would have a great effect, and unless the gentleman's amendment is adopted they are not subject to any supervision whatever. This section now exempts all retailers from license, and the people know that a great deal of the difficulty that we are having now is coming from the retailers on account of the exorbitant prices they are charging. I can find you, in the city of Washington, where retail grocers are responsible for the exorbitant raising of prices.

Mr. ROBBINS. I think it would clarify the provisions of the bill and help the situation.

Mr. CRAMTON. Mr. Chairman, will the gentleman again yield?

Mr. ROBBINS. Yes.

Mr. CRAMTON. The retail business, such as is now conducted in Washington, where a grocer has the nerve to charge 8 cents for a bunch of three little carrots as big as your thumb, is a business that I think requires supervision.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. BOOHER. Mr. Chairman, I offer an amendment to the substitute offered by the gentleman from Pennsylvania.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Missouri to the substitute of the gentleman from Pennsylvania.

The Clerk read as follows:

Amendment offered by Mr. BOOHER to the substitute: Strike out the figures "$50,000" in the substitute and insert the figures "$100,000."

Mr. LEVER. Mr. Chairman, I ask for a vote.

Mr. GALLAGHER. Mr. Chairman, I want to talk to the substitute. I just want a couple of minutes.

The CHAIRMAN. If the gentleman will indulge the Chair a moment, the Chair wishes to say that we got a little lost in the consideration of the amendment. The Chair will not shut out the gentleman from Illinois.

Mr. LEVER. I ask unanimous consent, Mr. Chairman, that the debate on the pending amendment, substitute, and amendments thereto may be closed in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on the pending amendment, substitute and amendments thereto close in five minutes. Is there objection?

Mr. SCOTT of Michigan. Reserving the right to object, Mr. Chairman, I desire to interpose a unanimous-consent request to modify my amendment. I think that will clear the situation, and I think it will be found more acceptable if the House indulge me in having the Clerk read the amendment I have offered. I think it will clear the whole situation.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to modify his amendment. Without objection, the Clerk will report the modified amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Modify the amendment offered by Mr. SCOTT of Michigan: In section 5, page 6, line 11, amend as follows: Strike out the period, insert a colon and the following:

"*Provided*, That for the purpose of this act the retailer shall be assumed to be a person, copartnership, firm, corporation, or association not engaging in the wholesale business, whose gross sales do not exceed $50,000 per annum."

Mr. LEVER. Now, Mr. Chairman, I make my request.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on the pending amendment, substitute, and amendment thereto, close in five minutes.

Mr. STAFFORD. Reserving the right to object, Mr. Chairman, will the Chair kindly state that it includes the modified amendment of the gentleman from Michigan?

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan [Mr. SCOTT]?

There was no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina [Mr. LEVER]?

There was no objection.

The CHAIRMAN. Now, the gentleman from Illinois [Mr. GALLAGHER] is recognized.

Mr. GALLAGHER. Mr. Chairman, I want to call the attention of the House to the figure, $50,000 a year, which is about $4,000 a month, for a groceryman. To say that a man doing a business like that can control or corner any food products, or to couple a grocer—an ordinary corner-grocery man doing $50,000 worth of business a year—with a house like the Jewel Tea Co., or the great mail-order houses, is absurd. In Chicago and in other great centers of population an ordinary business house, a grocer of any consequence, will do a business of over $50,000 a year, and to say that a groceryman doing business of that amount is responsible for the high prices or that he can corner the market is a perfect absurdity.

Mr. SCOTT of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. Yes.

Mr. SCOTT of Michigan. I am afraid the gentleman does not understand my purpose. I am not attempting to couple the small grocer with the big tea companies, and so on. I am not attempting to do that at all.

Mr. GALLAGHER. It is as unjust as it is unfair to say that a man doing $4,000 a month business can corner food supplies, when it is a fact that the ordinary groceryman in my own city can hardly meet his bills on account of the high price that he has to pay for his supplies.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. Yes.

Mr. CRAMTON. The gentleman says that it is absurd to say that the retail grocer has anything to do with the matter of controlling prices. How happens it that the groceryman on one side of the street is selling bacon for 50 cents a pound and another groceryman across the street is selling it for 35 cents?

Mr. GALLAGHER. The groceryman has to charge according to quality of the goods, the expense of running his business, and the amount he has to pay for his supplies and stand. The cost of doing business is greater with some than with others. It is the business of the customer to say whether he pays 2 cents more on one side of the street than he does on the other; but to say that the ordinary business man, the common corner groceryman, shall be limited to $50,000 a year in the purchase of his supplies without coming under the provisions of this bill is absurd.

Mr. BARKLEY. Will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman.

Mr. BARKLEY. It has been stated that this amendment is particularly aimed at the mail-order houses. Is it not true that all of those houses engage also in wholesale business, and are thereby exempted from this amendment?

Mr. GALLAGHER. Not as a rule. The ordinary mail-order house does a retail business.

Mr. BARKLEY. But they do a wholesale business, too.

Mr. GALLAGHER. I do not think so. Very few of them do any great amount of grocery business.

Mr. CRAMTON. The purpose of this amendment is not to limit them to $50,000 a year, but only to put them under Government supervision when they reach that limit.

Mr. GALLAGHER. But it is just as unfair to put the retail groceryman under that supervision, and that is what the amendment provides, as it would be to put the hat man under it who is doing business on the same street. The same rule applies, and any such amendment as the one pending is absurd,

and I can not understand why it should be offered in a great legislative body like this.

Mr. BOOHER. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOOHER. Mr. Chairman, what is the pending motion on which the vote will first be taken?

The CHAIRMAN. The vote will be taken first on the amendment of the gentleman from Missouri [Mr. BOOHER].

Mr. STAFFORD. Mr. Chairman, I offer an amendment to the amendment of the gentleman from Michigan, to strike out $50,000 and insert $100,000.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment to the amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD to the amendment of Mr. SCOTT of Michigan: Strike out $50,000 and insert in lieu thereof $100,000.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

Mr. BOOHER. I offered the amendment of $100,000 exempting up to that.

The CHAIRMAN. The amendment offered by the gentleman was to the substitute, but the gentleman from Wisconsin [Mr. STAFFORD] offers a similar amendment now to the original amendment of the gentleman from Michigan. The question is on the amendment of the gentleman from Wisconsin [Mr. STAFFORD] to the amendment of the gentleman from Michigan.

The question being taken, on a division (demanded by Mr. STAFFORD) there were—ayes 72, noes 10.

Accordingly the amendment of Mr. STAFFORD to the amendment of Mr. SCOTT of Michigan was agreed to.

The CHAIRMAN. The question now recurs on the amendment offered by the gentleman from Missouri [Mr. BOOHER] as an amendment to the substitute.

The question being taken, the amendment was rejected.

The CHAIRMAN. The question now is on the substitute offered by the gentleman from Pennsylvania [Mr. ROBBINS].

The question being taken, the substitute was rejected.

The CHAIRMAN. The question now is on the amendment of the gentleman from Michigan [Mr. SCOTT] as amended by the gentleman from Wisconsin.

The amendment as amended was agreed to.

The CHAIRMAN. Does the gentleman from New Jersey [Mr. LEHLBACH] desire recognition now?

Mr. LEHLBACH. I do not care to offer any amendment, Mr. Chairman.

Mr. STEVENSON. Mr. Chairman, I desire to offer an amendment to this section.

The CHAIRMAN. The gentleman from South Carolina offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr STEVENSON: Page 5, line 11, after the word "practice" insert "and unless such licensee shall discontinue such rate, charge, or practice within the time prescribed his license shall be revoked."

Mr. LEVER. Mr. Chairman, before my colleague begins I ask unanimous consent that debate on this amendment and amendments thereto shall close in 10 minutes, the gentleman to have 5 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on this amendment and all amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. STEVENSON. Mr. Chairman, this section, providing for a license, makes no provision for the cancellation or revocation of that license. It has been stated here that if a man did not comply with the regulations his license would be revoked; but there must be an express authority to revoke it before that can be done. Now, what is the result? If you do not provide for his license to be revoked he continues to do business and the only penalty incurred is to be indicted and tried in the Federal court, convicted and fined $5,000 or sentenced to a term in the penitentiary. Now let us see how that will work. If you will look at the last section of this act you will see that it is to terminate at the end of the war. If there is a lawyer here who has practiced long enough ever to have tried any cases in the United States court he knows that he can defend his client in that court, appeal to the circuit court of appeals, and then carry the case to the Supreme Court of the United States, and before the courts ever get to the point of enforcing the penalty the war will be over, the case will be forgotten, the treaty of peace will be ratified, everything will be lovely, and there will be no law under which you can punish the offender at all and he goes scot-free.

Nevertheless all the time he is doing business under a license issued by the Government, but at the same time which it is powerless to revoke. We talk about giving the Executive power to enforce our rights and maintain the dignity of this country, but you put him in a defenseless position when you give him the power to license a man to do business and that man tells him to go to thunder when he calls attention to the fact that he is violating the law. He can say that to the President, and the President can not do anything except to engage in a course of litigation that will go to the bowwows before the time comes to enforce it. It leaves it futile, and unless you provide that he can revoke the license and stop him from doing business whenever he is found to be violating the law you are powerless, and all this talk about the aristocracy list in business, of whether a man shall have a license when he is in the $100,000 class or the $50,000 class is absolutely useless.

Mr. IGOE. Will the gentleman yield?

Mr. STEVENSON. Yes.

Mr. IGOE. Under the gentleman's amendment, who is to determine whether the license should be revoked?

Mr. STEVENSON. The President would determine it. When the President shall find that the man is doing business in a discriminatory way, he would issue an order to discontinue such unjust and unreasonable and unfair discriminatory practices; but under your bill, what does the man do? He will say, "Go to the devil. I will do as I please." And all you can do is to take him to the courthouse, where, before you can get ready to enforce your law, the special statute will be dead. That is all you are giving to the President of the United States.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken, and the amendment was rejected.

Mr. GARD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 5, line 1, after the word license, strike out the period and insert "to examine any books and papers bearing upon the proper issuing of said license, and to require the attendance of any person and to take his testimony with reference to the matter inquired of under this section, with power to administer oaths to such person or persons, and to invoke the aid of any court of the United States having jurisdiction to require the attendance of such person and the production of such books and papers: *Provided*, That no person shall be excused on the ground that it may tend to incriminate him or subject him to a penalty or forfeiture from attending and testifying or producing books, papers, documents, and other evidence in obedience to the order of said duly authorized agent or agents; but no natural person shall be prosecuted or subjected to any penalty or foreiture for or on account of any transaction, matter, or thing as to which in obedience to proper authority and under oath he may so testify or produce evidence except that no person shall be exempt from prosecution and punishment for perjury committed in so testifying."

Mr. LEVER. Mr. Chairman, I ask that all debate on this amendment and amendments thereto shall close in 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. GARD. Mr. Chairman, the object of the amendment is to give increased power and scope to the investigation in the matter of license. The committee having decided to retain the license provision, I apprehend that it is of the utmost importance that information to the President or his duly appointed agents should be the most complete. The scope of the language in the bill at present provides for the entry and inspection by the President's duly authorized agents of the places of business of the licensees. It provides for nothing else except the inspection of place of business of licensees, and just what knowledge the inspection will afford them I do not know, so I have incorporated the language included in the excise tax law commonly known as the income tax, and I have adopted that language in its entirety. The proviso is included so as to make sure of all questions of constitutionality. The fourth amendment to the Constitution provides that all persons shall be secure in their papers and effects against search and seizure, and the language of the revenue law passed by this House September 8, 1916, was incorporated. It provides that no person shall be excused from testifying on the ground that it may incriminate him, and so forth, and that there be no exemption from prosecution and punishment for perjury committed in so testifying. The amendment is offered, as I have said, for the purpose of affording the President of the United States and his duly authorized agents all possible information concerning the character of the business for which a license is granted.

In other words, it provides that not alone the place of business may be inspected, but the books, papers, the general plan of business which is being conducted, may be inspected by duly authorized agents of the President, this information, of course, to be extended to the proper appointing authority.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. LENROOT. This authorizes the President to examine any books, and so forth, bearing upon the proper issuing of such license. Is it, then, the gentleman's theory that the President has discretion in the issuing of these licenses?

Mr. GARD. I would say so; yes.

Mr. LENROOT. That is my theory under the bill.

Mr. GARD. Otherwise I do not see any necessity for any action. If everyone is to have a license, it is purely automatic. Otherwise why should there be inspection of the place of business?

Mr. LENROOT. That is my theory; and if that side of the House had understood that, I think there would have been a different action upon the license question.

Mr. GARD. The amendments that I have offered are to further the means of obtaining information, so that licenses may properly issue and continue.

Mr IGOE. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. IGOE. Does not the provision which the gentleman is seeking to now amend relate to infractions of the rules that the President prescribes for the government of the licensees?

Mr. GARD. Not at all.

Mr. IGOE. Why does it not?

Mr. GARD. It is supplementary to the language appearing on lines 24 and 25 on page 4—

and the entry and inspection by the President's duly authorized agents of the places of business of licensees.

It extends beyond that to the examination of books, papers, and so forth, which is the same examination as that under the present excise law, for the purpose of affording examination of books upon which an income tax is returned.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. CAMPBELL of Kansas. Under the gentleman's amendment would anyone be permitted to do business in any line covered by the scope of this bill without a license?

Mr. GARD. It does not affect that provision at all. That provision is carried in the first part of section 5. I think if this language is retained, and it has been retained, authorizing an inspection of places of business for the purpose of issuing licenses, likewise an inspection of books and papers should be afforded.

Mr. CAMPBELL of Kansas. The gentleman's amendment would require all places of business to which licenses were granted to be first inspected?

Mr. GARD. Oh, no; it would not require it; but the duly authorized agent of the President might have access to it and to all pertinent books and papers for the purpose of obtaining necessary information.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. ANDERSON. Mr. Chairman, the purpose of the gentleman from Ohio is undoubtedly good, but I think his amendment proceeds upon a misrepresentation of what at least was the theory of the committee with respect to the license section. His amendment provides for an inspection prior to the issuance of the license, with a view to determining the character and qualifications of the licensee. It is the theory of the committee in reporting this bill that no discretion is vested in the President to refuse a license; that the President must—no discretion in the matter having been granted to him—grant a license to any person who comes within the class which is licensed as a matter of right. So that no investigation preliminary to the granting of a license is necessary or required, and in that respect, at least, the amendment of the gentleman from Ohio does not fit in with the general theory of the bill.

Mr. GARD. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. GARD. What is the meaning and why the necessity of the language, then, authorizing the President's duly authorized agents to make entry and inspection of places of business of licensees?

Mr. ANDERSON. That is with a view to obtaining information with respect to the practices in the trade against which or concerning which regulation will thereafter be made.

Mr. GARD. Why should it not be extended so as to allow an inspection of books, papers, and so forth?

Mr. ANDERSON. That part of the amendment of the gentleman may be desirable, but his amendment goes far beyond that proposition. It was the theory of the committee, however, that the information of that character might be obtained through reports of various industries licensed under the section. Of course, as far as the immunity proposition is concerned, the right to be free from prosecution or from answering questions tending to incriminate is a personal right which the man must assert. It is not a right which must be preserved whether asserted or not. The immunity section, I think, is only applicable where the law requires the person to give the testimony even though it may incriminate him, and of course there is no such provision in this section.

Mr. GARD. Not originally, of course, but as amended it would be included in the section.

Mr. ANDERSON. Of course the amendment of the gentleman does require testimony even though it tended to incriminate, and in that case it is perfectly proper to use an immunity clause. There is no question about that.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The question was taken, and the amendment was rejected.

Mr. SCOTT of Iowa. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SCOTT of Iowa: Page 4, line 8, after the word "storage" insert the word "mining," and on page 4, line 13, after the word "storage" insert the word "mining."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this amendment and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SCOTT of Iowa. Mr. Chairman, at the outset I desire to call the attention of the committee to the language of the bill, which is—

That from time to time, whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries—

Those are the five subjects coming within the purview of this section. Now, we have heard a good deal said this afternoon about coal miners, and it will be observed that the miner of coal is entirely excluded from this section. He is neither an importer necessarily or an exporter, a manufacturer, engaged in storage or distribution, for he sells his products at the mouth of the mine under contract, as a rule, yearly, so that unless the business of mining is included in this category the mining of coal will be entirely excluded from the effect of this section.

Mr. ROBBINS. Will the gentleman yield for an interruption?

Mr. SCOTT of Iowa. I will.

Mr. ROBBINS. Does not the gentleman know that a great many of the mines of this country only mine a few hundred tons, and unless you put in an exception the mining of that coal would be very burdensome?

Mr. SCOTT of Iowa. That is true as to manufacture and true as to any one of these things, but if there is any industry in the United States that it is desirable to control to-day it is the mining of coal. I think the committee understood that was in the bill. I so understood the chairman——

Mr. LEVER. Will the gentleman yield for a moment?

Mr. SCOTT of Iowa. Certainly.

Mr. LEVER. In order to facilitate the consideration of the bill, I will say that I have consulted with the Members around me on both sides, and I have no objection to the gentleman's amendment, and I ask for a vote.

Mr. SCOTT of Iowa. I thank you.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 6. That any person who willfully hoards any necessaries shall, upon conviction thereof, be fined not exceeding $5,000 or be imprisoned for not more than two years, or both. Necessaries shall be deemed to be hoarded within the meaning of this act when either (a) held, contracted for, or arranged for by any person in a quantity in excess of his reasonable requirements for use or consumption by himself and dependents for a reasonable time; (b) held, contracted for, or arranged for by any manufacturer, wholesaler, retailer, or other dealer in a quantity in excess of the reasonable requirements of his business for use or sale by him for a reasonable time, or reasonably required to furnish necessaries produced in surplus quantities seasonably throughout the period of scant or no production; or (c) withheld, whether by possession or under any contract or arrangement, from the market by any person for the purpose of unreasonably increasing or diminishing the price: *Provided, however*, That any accumulating or withholding by any farmer, gardener, or any other person of the products of any farm, garden, or other land owned, leased, or cultivated by him shall not be deemed to be hoarding within the meaning of this act.

Mr. HUTCHINSON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HUTCHINSON: Page 6, line 23, after the word "time," insert "excepting where a loss would be forced upon a merchant holding a legitimate stock in trade."

Mr. HUTCHINSON. Mr. Chairman, the amendment explains itself. The purpose is not to force a sale when prices are low; in other words, not to force a man to sell his goods in his legitimate stock under a loss. I think the amendment explains itself very fully.

Mr. McLAUGHLIN of Michigan. Would not the words in lines 21, 22, and 23 cover that—"in excess of the reasonable requirements of his business for use or sale by him for a reasonable time"?

Mr. LEVER. Mr. Chairman, I ask that the amendment be again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection.

The amendment was again reported.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto be closed in 10 minutes.

The CHAIRMAN. The gentleman from New Jersey [Mr. HUTCHINSON] has the floor now.

Mr. LEVER. Will the gentleman from New Jersey permit me to make that request?

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. HUTCHINSON].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read:

The Clerk read as follows:

SEC. 8. That any person who willfully destroys any necessaries for the purpose of enhancing the price or restricting the supply thereof shall, upon conviction thereof, be fined not exceeding $5,000 or imprisoned for not more than two years, or both.

Mr. McKEOWN. Mr. Chairman and gentlemen of the committee, we are now earnestly considering the present bill, which comes within the class commonly designated as war measures. It is correctly denominated a war measure, because it arises out of the necessity and circumstances brought about by the present world-wide war. The pinch of hunger is being felt to-day in this free land of ours, because of a decrease of our supplies, increase in demand, but more particularly on account of the manipulation of food gamblers in the United States. This measure upon first blush would appear to be a bill of contrarities—in other words, a measure providing for the performance of two opposite purposes at the same time. It has first for its purpose the encouragement of production of food and fuel, and to do this it will be necessary to protect the producer in sufficient prices for the food raised and fuel mined. At the same time it has for its purpose the distribution of food and fuel to the consumers at reasonable prices, within the reach of their wages and incomes.

The question that confronts one upon the threshold of the consideration of such a measure is, How shall we encourage the ones that produce with attractive prices without defeating the other purposes of the bill relating to conservation and distribution of food to the consumers at a reasonable price? Or how shall we distribute food to the consumers at a reasonable price and at the same time encourage those who produce food by giving them attractive prices for their production?

If the law of supply and demand was permitted to regulate the price without the interference of the food speculator this legislation would be of little value. If the present prices paid by the consumer were due wholly to the law of supply and demand, then this measure would be of no avail.

A majority of persons who have given this matter serious consideration and thorough investigation have reached the conclusion that in the United States there is a large waste or loss of food between the hands of the producer and the mouth of the consumer.

Little did we ever dream that such a measure as this would ever be necessary and possible in the United States, but this occasion reminds us of the fact that for more than a decade farsighted business men and statesmen have been warning us of the day when the United States would be unable to feed her millions of people. Notably among these was the late James J. Hill, who made bold to say that the United States would reach that place where she would have to secure food supplies from other countries if as a nation we maintained the present pace of increasing the population and abandoning our farms and crowding into the large cities. Since the year 1890 there have been some very striking changes noticeable in regard to the farm industry of the United States. Prior to 1890 the number of farmers owning their farms greatly exceeded the number of tenant farmers, but since 1890 the tenant farmers have increased in number over the home-owning farmers at a marvelous rate. In fact, this increase has been so rapid in the last decade that we now have approximately two and one-half million tenant farmers.

As suggested by the Department of Agriculture, there are two important factors which have contributed most to these conditions—namely, the lack of available public land for homestend filing since 1890 and the increase in the price of farm lands since that date. The investigation made by this department shows, as a general rule, that wherever the land increases in value the number of tenant farmers increases. That the number of tenant farmers under the age of 25 years is a very large percentage, while the percentage decreases as the ages advance, and this can be accounted for from the fact that the usual course pursued by a farm hand to commence his farming career is to begin as a tenant, and follow this up later by purchasing a small farm on credit, and as he grows older he has passed through the several stages from farm hand to farm owner. However, in my own State—Oklahoma—it is to be observed that there is a large percentage of tenant farmers between the ages of 55 and 65, whereas in most of the other States the percentage of tenant farmers between these ages is very low. To one familiar with farm conditions in the Indian Territory portion of the State of Oklahoma, this condition is easily accounted for from the fact that there remain many thousands of acres of restricted Indian lands, which can not be purchased by the farmers who cultivate the same nor can they be sold by the restricted Indian owner. In the 40 eastern counties of Oklahoma there live over 30,000 restricted Indian citizens, who own allotments of Indian lands, and these allotments are divided into two classes designated as homestead and the surplus lands. The lands called homestead allotments can be rented for only one year at a time without the approval of the department, and the surplus land can be rented for a period of five years, without the approval of the department, but with a positive statute against renewal. In these 40 counties there are approximately three and one-half million acres of fertile lands that are not alienable and several more millions not taxable.

A great step forward was taken in the Sixty-fourth Congress in the passage of the farm-loan act, but until there is some additional legislation by Congress making it possible for the tenant farmers of eastern Oklahoma to have an opportunity to purchase farms, the benefits of the farm-loan banks will never reach them, and neither will the provisions of this bill add greatly to their income. The conditions are bad, owing to the short period of tenancy; the improvements are poor and insufficient and the tenant becomes dissatisfied before the end of the year and makes preparations to move and the Indian landlord becomes anxious for a new tenant, hoping to secure an increase in rents without making additional improvements, and this condition of affairs grows from bad to worse. These conditions do not militate to benefit either the Indian landowner or the white tenant, because the tenant seeks to secure the greatest production without regard to the effect upon the lands for future use, and as a consequence thereof the fertile lands are fast growing unproductive and washing away, and I predict that, without a change of these conditions, within 10 years the food production will be vastly decreased and the farm lands will be worthless.

The number of cattle and swine have decreased during the last four years in Oklahoma and the production of wheat and corn materially decreased in the year 1916. From figures furnished by Hon. F. M. Gault, president of the Oklahoma State Board of Agriculture, it appears that prior to October 1, 1916, 73 per cent of the wheat crop of that year was marketed by the farmers at an average price of $1.05 per bushel; that in October, 1916, 7 per cent of the crop was marketed at $1.71 per bushel; in December, 4 per cent of the crop was marketed, and in January, 1917, 3 per cent was marketed at $1.56; in February 2 per cent of the crop was marketed at $1.75; and in March, 1917, 2 per cent was marketed at $1.68; and in April, this year, less than 60 days ago, 2 per cent was marketed at $1.87 per bushel; that 35 per cent of the total wheat crop of the State of Oklahoma in 1916 was sold by the farmers for an average price of 87 cents per bushel and the average price the farmers obtained for the entire wheat crop for 1916, was $1.22 per bushel. Tracing a bushel of 1916 wheat from the hands of an Oklahoma farmer into the flour market, we find that the same farmer pays $2.58 per bushel more for the product obtained from the bushel of wheat than the amount he received for said bushel of wheat. After deducting 24 cents for milling a bushel of wheat we find that the farmer who produces a bushel of wheat, together with his neighbors in the cities and towns who must purchase flour, are compelled to pay a profit of $2.34, which is double the average price that he received for his bushel of wheat.

And yet it is contended that the farmers will not be in favor of this measure.

Speaking generally upon this subject, the American farmer is facing the greatest task in all of his experience. He must pro-

duce food not only for America, but for the allied armies and the neutral nations of war-scourged Europe who depend upon him for their food supply. In many instances the farmer finds himself unable to meet the full requirements demanded of him. He has suffered from flood and droughts and has been cut off from his usual supplies of potash, so necessary in many instances to fertilize his farm. The use of steel in the manufacture of arms in carrying on the war has advanced the price of farm machinery and the purchase price of a dollar has been greatly diminished. He finds that his farm labor has rapidly increased in cost, and the high wages paid in the factories making war munitions has taken his labor, and oftentimes his boys. He has found himself discriminated against, because railroads have been meeting the demands of munition makers and have subordinated all other considerations to that end, which necessarily has caused a shortage of cars for the distribution of the necessary farm supplies, and this too, at a time when the demands of the country are greatest.

We are told by the chairman of the Agriculture Committee of the House [Mr. LEVER] that it is not the purpose of this bill to fix a maximum price on the products of the farm, but that its primary purpose is to destroy the food gamblers and speculators who have been depriving the farmers of the fruits of their toil by manipulating markets, and at the same time have been extorting high prices from those who must buy. From the standpoint of the farmer, the gambler in farm products has been his constant enemy, and although many statutes have been enacted looking to the elimination of this evil from the United States, still the food pirates have been continuing their nefarious practices.

When it comes to dealing with this measure from the standpoint of the consumer we must conclude that immediate legislation is necessary. The increase in the price of food in the retail market has been so rapid and enormous as to put the wage earner in the position of not being able to earn his board and clothing, and every pay day finds the struggling workman far behind with the groceryman, and I started to say the butcher, but he has ceased to buy fresh meats and has about reached the point where he will be satisfied if he has meat of any kind. This condition must be relieved and must be dealt with at once. When a man is starving and his family is hungry, he has no time nor patience to listen to orations about constitutional limitations. When we look at the food question from the standpoint of the workingmen in the great factories and mines and industries of the country, and contemplate the prices they pay and at the same time realize that the farmer who produces the food is scarcely obtaining a fair price for his products and in many instances losing money, it follows that somewhere between the farmer and the men who buy an enormous profit is filched. Our indignation at the outrage is unbounded. The inhuman pirate who seeks to accumulate large fortunes from such conditions ought to be banished, not only during the period of this war but forever from the Republic of a free people.

It is my duty in this hour of the Nation's peril to do what I can in my humble way to promote the final triumph of my country in this war which has been thrust upon us by a crazy military despot whose only wish is to rule the world. An enemy to humanity and mankind; an enemy so devoid of principle that he violates all human rights and all laws of civilization, by taking lives of innocent noncombatants by the unlawful use of submarine boats, and bombs thrown from Zeppelins in the nighttime as well as in the daytime. An enemy who shall soon feel the talons of the American eagle clutching at his throat, and Godspeed the hour when we shall hear the American eagle scream above the battle's roar, proclaiming victory for American arms upon land, sea, and sky.

Mr. PLATT. Mr. Chairman, I offer an amendment to section 8 by striking out, in lines 4 and 5, the words "for the purpose of enhancing the price or restricting the supply thereof."

The CHAIRMAN. The gentleman from New York [Mr. PLATT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. PLATT: Page 8, line 4, strike out the following: "for the purpose of enhancing the price or restricting the supply thereof."

Mr. PLATT. It seems to me, Mr. Chairman, if somebody willfully destroys foods or necessaries, it ought not to be necessary to prove it has been done for the purpose of enhancing the price. That should be presumed. What is the difference what the purpose is? If food has been willfully destroyed, the person who destroys it ought to be punished; and to make the prosecuting attorney prove to the court that it has been done for the purpose of enhancing the price or limiting the supply will make convictions difficult, if not impossible.

Mr. THOMPSON. Suppose foods or feeds are necessarily deteriorating or spoiling—are unwholesome and unfit for use?

Mr. PLATT. Oh, well, that is a different matter. That would not be willful destruction. That is a quibble.

Mr. THOMPSON. They would have to be destroyed.

Mr. PLATT. But it would not be willful destruction.

Mr. THOMPSON. It would be willful.

Mr. PLATT. The gentleman knows that no court would so find. Personally, I think that there ought to be a penalty for allowing food in any quantity to spoil whether done willfully or through careless neglect.

Mr. HICKS. Will the gentleman yield?

Mr. PLATT. Yes; I yield to my colleague from Long Island.

Mr. HICKS. Would that cover the case of a man plowing clover under, for instance, to fertilize his fields?

Mr. PLATT. No; that does not destroy the clover.

Mr. HICKS. It destroys the clover if you plow it under.

Mr. PLATT. It puts nitrogen in the ground.

Mr. HICKS. But it destroys the clover, even though it converts it into fertilizer.

Mr. PLATT. Oh, no; it makes use of the clover, and a very good use.

Mr. HAUGEN. The gentleman would not want the imposition of a fine of $5,000, for instance, for destroying half a loaf of bread?

Mr. PLATT. That is the maximum penalty. The gentleman knows that nobody would enforce a penalty of that kind. There ought to be a penalty for the willful destruction of necessaries, no matter whether it is done for the purpose of enhancing the price or what it is done for; and until you have a penalty such as that you will not accomplish what you expect to accomplish.

In my opinion the bill is more or less deceptive, anyway. The people are led to believe it is going to do a lot of things which can not be done. Many people think it will restore prices as they were before the war. Now, the present high prices are due to several well-recognized causes, and speculation is only one of them, and not by any means the chief cause. In considerable part they are due to the great amount of gold that has been sent here from abroad and to the credit extensions based on that gold. We are unquestionably somewhat on a basis of inflation. In considerable part the high prices are due to real scarcity, and serve a useful purpose in compelling people to put a stop to waste and in encouraging increased production. In part the high prices are due to the great prosperity of the country and to the fact that everybody is employed at high wages, and that people are generally able to pay. The fact is people are, as a rule, paying the present prices with surprisingly little complaint.

Now, in part, these prices are doubtless due to speculation, and that can be checked. In part also the price of flour and wheat is due to the bidding in the open market of England, France, our own Government, and neutral Governments. That should not occur again. The peak price for wheat caused by that bidding raised the price of every barrel of flour in the country, and, in some measure, these prices will come down through better management of future purchases for our allies and through regulation; but until we can put a stop to submarine destruction or can obtain abundant new harvests prices are certain to be high, and no power short of actually rationing the people, as is done in some European countries, can do more than to keep them from extremes.

I think we should make it easier to enforce this penalty so as to stop all the waste and destruction of food possible. I believe the bill will do some good even as it is, and hence I am supporting it, and intend to cast my vote for it if it is possible for me to be here when the vote is taken. If, as is rumored, the vote is going to be delayed until some time Saturday evening, I shall probably not be able to be here. It is evident that the bill will pass by a very large majority. Most of the opposition has been disarmed during the progress of the debate.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. PLATT].

The question was taken, and the amendment was rejected.

Mr. LEVER. Mr. Chairman, I offer an amendment as a new section to the bill.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEVER: Between sections 8 and 9, on page 8, insert a new section, as follows:

"SEC. 9. That any person who conspires, combines, agrees, or arranges with any other person (a) to limit the facilities for transporting, producing, manufacturing, supplying, storing, or dealing in any necessaries; (b) to restrict the supply of any necessaries; (c) to restrict the distribution of any necessaries; (d) to prevent, limit, or lessen the manufacture or production of any necessaries; or (e) to

enhance the price of any necessaries shall, upon conviction thereof, be fined not exceeding $10,000 or be imprisoned for not more than two years, or both."

Mr. LEVER. Mr. Chairman, as I explained to the committee this morning, section 4 makes certain offenses penal offenses, among them the matters enumerated in this amendment. But we did not apply any penalty, and this is to make application of a penalty.

Mr. LARSEN. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Georgia offers an amendment to the amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LARSEN to the Lever amendment:

"*Provided*, That the provisions of this section shall not be so construed as to prevent bona fide farmers actually engaged in such pursuits as their chief occupation, or farmers' organizations, from advising or counseling among themselves against overproduction of necessaries or from agreeing among themselves by resolution or otherwise to limit or lessen the production of such necessaries as may be produced by them."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this amendment offered by myself and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on his amendment and amendments thereto shall close in 10 minutes. Is there objection?

Mr. STAFFORD. Reserving the right to object, Mr. Chairman, do I understand that the gentleman from South Carolina is going to oppose the amendment offered by the gentleman from Georgia?

Mr. LEVER. Yes, sir.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The gentleman from Georgia is recognized for five minutes.

Mr. LARSEN. Mr. Chairman, there is, I think, a general understanding among the people, especially the farmers of this country, that the provisions of the proposed bill shall not apply to those citizens engaged in agriculture. The press has so announced it to the public. But if the amendment offered by the gentleman from South Carolina [Mr. LEVER] is adopted, I can not see how the rights of the farmers will be fully protected. When we had the espionage bill under consideration we saw fit to strike from it the provisions referring to a censorship of the press, and we guaranteed and gave it perfect freedom. We are now encouraging the farmers to increase the production of foodstuff. To what extent that will be carried I can not tell. A great many farmers in the rural sections are inclined to take as true almost any statement published. The press is insisting and will doubtless continue to insist upon the farmers producing all the necessaries of life, and producing them to an extent very much greater than has ever been done before. Why, then, Mr. Chairman, should not the producers of necessaries be left equally as free and untrammeled as the press, in order that they may counsel or agree, in organization or otherwise, and correct any propaganda or impression which might prove detrimental to their best interests. I do not intend this as any reflection upon the press, as I believe it is doing a splendid service in this respect. However, the bill as it now stands, or would stand if the amendment as offered by the gentleman from South Carolina [Mr. LEVER] was agreed to, would prohibit and prevent the farmers and farm organizations from agreeing and counseling among themselves as to what might or might not be good for them. It especially provides that they shall not have the right to agree or arrange among themselves to limit or lessen the production of any necessaries of life. This is carrying the matter too far. The farmers and their organizations should have the right to get together at any time or place and discuss or agree upon any of these provisions, and to do so without being in danger of any penalty under the provisions of this or any other law.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. LARSEN. Yes.

Mr. BARKLEY. Does the gentleman construe this amendment which has been offered by the gentleman from South Carolina [Mr. LEVER] as repealing the provisions and amendments of the antitrust law, exempting farmers and associations of farmers and labor organizations from certain provisions of the law?

Mr. LARSEN. If it did so, it would only be by implication. I doubt whether a provision which would prohibit free discussion among the farmers as to their needs would be constitutional. I do not think we would or should have the right to pass such a law, but if you enact into law the proposed amendment of the gentleman from South Carolina, it would certainly have that effect.

Mr. ROBBINS. Mr. Chairman, will the gentleman yield?

Mr. LARSEN. Yes.

Mr. ROBBINS. Would it enable the officers of the Government to cause the arrest of any man or set of men who met together and agreed about their wages, as, for example, the coal miners, or farmers, who might meet together and discuss the price of milk?

Mr. LARSEN. I do not know about the wages of miners, but I think it would apply to farmers who arrange together as to the price of milk or other necessaries.

Mr. ROBBINS. Well, the output of one is the output of mines, and the other is the output of the farm.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. LARSEN. Yes.

Mr. CANNON. I recall that a number of organizations out in my part of the country, in some of the neighboring States, undertook to meet and agree upon prices, and so on. Take tobacco for instance; they attempted not only to limit the amount of tobacco that should be raised, but their actions in some instances resulted in homicides and that kind of thing. Penalties were imposed upon everybody who violated a volunteer agreement, as I recollect. Now, does the gentleman want to exempt such organizations from the operation of the proposed section?

Mr. LARSEN. I think they would be taken care of by the law against murder or other criminal statutes in States where violated. I want to guarantee to the farming people of this country a right to get together and consult among themselves as to how much and what they shall plant and when they shall plant it. If the farmers' organizations and the farmers themselves are not to be guaranteed this right, I think we should better stop them from farming altogether. If they are expected to produce the necessaries of life and then are not to be given the right to get together and decide how much they shall plant, how they shall plant, fertilize, and such matters as those, then they will certainly be curtailed in the enjoyment of their rights as citizens.

Mr. MEEKER. Will the gentleman yield?

Mr. LARSEN. Yes.

Mr. MEEKER. The gentleman is for the bill, is he not?

Mr. LARSEN. Yes; I am trying to be. If you put up a bill which I can support, I will do so. But I do not yet know what kind of a bill will be presented before we get through. You may keep tacking on things like this until no self-respecting man may be able to vote for it. I have not said whether I am for or against the bill. I am waiting to see what kind of a bill it is. I am free and independent and propose to remain so. [Applause.]

The farmers of this country are as loyal and patriotic as any other class of citizens, and perhaps more so than some. They can be depended upon not to conspire against the Government or its citizens, and they should at least be permitted to protect themselves by counsel or agreement against the pirates of speculation and those who would by willful or erroneous misrepresentation deprive them of a full enjoyment of the fruits of their labor.

With the adoption of the amendment which I propose to the amendment of the gentleman from South Carolina, the rights of the farmer will be protected and the country will be secure. [Applause.]

Mr. RAGSDALE. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. It will have to be in the nature of a substitute. There has been an amendment offered and an amendment to the amendment. How does the gentleman offer it?

Mr. RAGSDALE. I offer it as an amendment to the amendment.

The CHAIRMAN. That would be an amendment in the third degree, which is not permissible under the rule. The gentleman's colleague [Mr. LEVER] has offered an amendment, and then the gentleman from Georgia [Mr. LARSEN] has offered an amendment to the amendment.

Mr. RAGSDALE. Then, suppose I wait until the committee passes on the amendment of the gentleman from Georgia?

The CHAIRMAN. The Chair thinks that is the better course.

Mr. LEVER. Mr. Chairman, the amendment offered by the gentleman from Georgia [Mr. LARSEN] is more or less important, and to some gentlemen more or less embarrassing. It is not at all embarrassing to me. I was born and raised upon a farm myself. I plowed until I was 25 years old. My people are all farmers, have been farmers for all the years gone by, and I have a profound respect both for the good sense and the

patriotism of the American farmer. [Applause.] I do not believe that in this great emergency which confronts this Nation the farmer should expect or desire any further exemptions than are being given to him in this bill. We have exempted him practically from every provision of the bill, and I do not believe that there is an intelligent farmer in South Carolina or Georgia who is willing to say that when his country is fighting a battle for its very existence any class of men, farmers or otherwise, should be permitted to combine among themselves to refuse to produce the necessities that go to the Army and Navy and men on the firing line. [Applause.] I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. LARSEN] to the amendment of the gentleman from South Carolina [Mr. LEVER].

The question being taken, on a division (demanded by Mr. LARSEN) there were—ayes 4, noes 67.

Accordingly the amendment of Mr. LARSEN to the amendment of Mr. LEVER was rejected.

Mr. RAGSDALE. Mr. Chairman, I offer the amendment which I send to the desk.

The CHAIRMAN. The gentleman from South Carolina offers an amendment to the amendment of his colleague [Mr. LEVER], which amendment the Clerk will report.

The Clerk read as follows:

Amendment by Mr. RAGSDALE to the Lever amendment: After the word "to" and before the word "enhance" insert the word "unreasonably."

Mr. LEVER. I have no objection to that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. RAGSDALE] to the amendment of the gentleman from South Carolina [Mr. LEVER].

Mr. STAFFORD. I should like to be recognized in opposition to that.

Mr. MADDEN. I object to the acceptance of that amendment.

Mr. WALSH. Mr. Chairman, I rise to a point of order. Debate on the Lever amendment and amendments thereto is closed, as I understand it.

The CHAIRMAN. The gentleman's point of order is well taken. That is correct.

Mr. LEVER. Just one moment, if I may be permitted.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to proceed for a moment. Is there objection?

There was no objection.

Mr. LEVER. Gentlemen of the committee know that a chairman in charge of the bill has so many people talking to him that sometimes he can scarcely think straight. The amendment of my colleague, as I understand it, is to insert the word "unreasonably"—unreasonably enhance the price of any necessaries.

Mr. LENROOT. Yes; but this is for a conspiracy, if the gentleman will remember.

Mr. LEVER. Ah, the gentleman is right about that. I do not agree to the amendment.

The CHAIRMAN. The question is on the amendment of the gentleman from South Carolina [Mr. RAGSDALE] to the amendment of his colleague [Mr. LEVER].

The question being taken, the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from South Carolina [Mr. LEVER], chairman of the committee.

The question being taken, the amendment was agreed to.

The Clerk read as follows:

SEC. 9. That to carry into effect the purposes of this act the President is authorized to purchase, provide for the production or manufacture of necessaries; to store them and to provide storage facilities for them by construction, purchase, lease, or otherwise; to sell them; and to require any person having the control of any necessaries, or any storage space suitable for the storing of necessaries, to furnish the whole or any part of such necessaries or storage space to the Government in such quantities, at such times, and at such prices as shall be determined by the President to be reasonable. Upon failure of the person to comply with such requirement, the President is authorized to requisition and take possession of any such necessaries or storage space, and to pay for them at the price so determined. If the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President, and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such necessaries or storage space, and jurisdiction is hereby conferred on the United States district courts to hear and determine all such controversies: *Provided*, That nothing in this section shall be construed to require any natural person to furnish to the Government any necessaries held by him and reasonably required for consumption by himself and dependents for a reasonable time. Any moneys received by the United States from or in connection with the disposal by the United States of necessaries under this section may, in the discretion of the President, be used as a revolving fund for further carrying out the purposes of this section. Any balance of such moneys not used as part of such revolving fund shall be covered into the Treasury as miscellaneous receipts.

Mr. LENROOT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 9, line 8, after the word "consumption," insert "or use."

Mr. LENROOT. Mr. Chairman, the only purpose of this amendment relates to the proviso which exempts from the authority of the President to take necessaries an amount necessary and reasonably required for consumption by himself or dependents. That would leave this situation: A farmer has a thousand bushels of wheat and he would only require ten bushels for consumption and family, but he might require the other nine hundred and ninety for seed, and the only purpose of my amendment would be to permit him to retain it for that purpose.

Mr. LEVER. The gentleman thinks that would not open the door?

Mr. LENROOT. No; the committee has used the word "use" in another section for the same purpose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was agreed to.

Mr. LENROOT. Mr. Chairman, I have another amendment.

The Clerk read as follows:

Page 8, line 12, after the word "them" insert "to any citizen of the United States or to any Government engaged in war with any country with which the Government of the United States is or may be at war."

Mr. LENROOT. Mr. Chairman, this is a more important amendment, and I consider it very important. To my mind one of the principal benefits to be derived in this bill in securing reasonable prices will be the ability of the United States to either purchase or take over, if necessary, not only for ourselves but to supply our allies necessaries, and thus avoid the competition of our allies that has been very largely responsible for this very large increase in prices, very little of which the producer has received, but most of which has gone to the speculator.

In section 12 the committee has recognized this, and in that section, which provides for a guaranteed price, they have made this very provision, authorizing the President to sell to any person or to any Government engaged in a war with any country with which the United States is at war. I apply the same language exactly in section 9. It seems to me that it ought to be applied to section 9, or else it should be stricken out of section 12, because if it remains in section 12 and is not contained in section 9, I do not believe the President will have any power at all to act as a purchasing agent for our allies. I understand the chairman of the committee has no objection to this, and I sincerely hope the amendment will be adopted.

The CHAIRMAN. The question is on the amendment of the gentleman from Wisconsin.

The amendment was agreed to.

Mr. BARKLEY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 8, line 9, after the word "purchase" insert the word "or."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kentucky.

The amendment was agreed to.

Mr. THOMPSON. Mr. Chairman, I offer the following amendment:

On page 9, line 15, after the word "receipts," add the following:
"*Provided further*, That the provisions in this section shall not apply to any farmer, gardener, or any other person with reference to the product of any farm, garden, or other land owned, leased, or cultivated by him."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. THOMPSON offers the following amendment: On page 9, line 15, after the word "receipts," add the following:
"*And provided further*, That the provisions in this section shall not apply to any farmer, gardener, or any other person with reference to the product of any farm, garden, or other land owned, leased, or cultivated by him."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in 15 minutes.

Mr. RAGSDALE. Provided I may have five minutes, I will not object.

Mr. AUSTIN. May I ask the Chairman if I am included in that arrangement this time? I was left out in the other.

Mr. LEVER. Mr. Chairman, there seems to be some disposition to debate this section somewhat, and things have been running very smoothly. The gentleman from Tennessee is happy,

although he has never answered the question put to him by the gentleman from Wisconsin.

Mr. AUSTIN. I shall ask for an entire day to discuss that question.

Mr. LEVER. I will ask that the debate close in 20 minutes.

Mr. BARKLEY. Reserving the right to object, in the amendment adopted on my motion a little while ago the word "or" should be "and."

Mr. ROBBINS. Mr. Chairman, I want to offer an amendment, and unless I can have that privilege I shall object to the request.

Mr. LEVER. Mr. Chairman, the gentleman from Kentucky [Mr. BARKLEY] a moment ago offered an amendment to insert the word "or" between the words "purchase" and "provide" in line 9 on page 8. The word should be "and," and I ask unanimous consent to vacate the vote by which that amendment was adopted and to insert the word "and."

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the action of the committee in inserting the word "or" between the words "purchase" and "provide" in line 9, page 8, be rescinded and that the word "and" be inserted. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I now ask unanimous consent that all debate upon this amendment and all amendments thereto close in 25 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. AUSTIN. Mr. Chairman, I listened to-day to a speech made by the gentleman from Ohio [Mr. BATHRICK], in which he directed a criticism to this side of the House in reference to this bill, and he expressed the hope that the Republican side would not endeavor to amend the pending bill or to in any way embarrass the President of the United States in the discharge of his great and responsible duties. I wish to say to the gentleman from Ohio [Mr. BATHRICK], in all kindness, that there is absolutely no foundation for his fears. There has been practically a united Republican side here on every war proposition since the convening of Congress, and I match the loyalty and patriotism of the Republican side, man for man, against that of the Democratic side, charged with the responsibility of legislation. In the declaration of war, in the consideration and passage of the military bill, in the armed-neutrality bill, the revenue and bond measures, and also in the pending food-control bill, this side has practically been a unit for the interest of our beloved country. We have stood from the beginning, and will stand to the end, for our country above party interest. [Applause.] I have with my colleagues to-day voted against changing or amending this bill, and there has been no change, except such as met with the approval of the Democratic chairman of the Committee on Agriculture [Mr. LEVER]. This is our country as well as yours. We lay aside partisan politics. We forget we are Republicans and we remember only that we are Americans interested in our glorious flag and the preservation of American rights on land and sea. [Applause.]

After the war, when peace is restored, then we will meet the Democratic Party on the stump, join issues and appeal to the intelligence and patriotism of the American people to return the Republican Party to power to again wisely administer the affairs of this great Government in the splendid way in which it did during 50 years of unparalleled prosperity, of matchless achievements, of countless blessings.

Mr. Chairman, I think we can well afford to follow the report of this committee on the food-control bill, for I have served in this House for eight years with the gentleman from South Carolina [Mr. LEVER], chairman of the Committee on Agriculture, and a more faithful, devoted public servant does not sit in either House of Congress, nor is there to be found here or elsewhere a truer friend to the American farmer. [Applause.] We have the statement of the ranking Republican member of the committee [Mr. HAUGEN], who has served his constituency long, well, and faithfully, that he intends to vote for this bill, and, following his guidance and leadership, no Republican ought to hesitate to give his support to the bill, which is demanded by American sentiment from ocean to ocean. I do not know Mr. Hoover, who will administer the proposed law, but up to this good hour I have not heard a single thing against his honor or integrity or ability or patriotism. I am willing to trust him, and if he makes good, if he has a political ambition, a grateful American people will reward him in no uncertain way. Mr. Chairman, this side of the House stands for the country first, last, and all the time, to vote every dollar and every man necessary for the preservation of the Union and the defeat of the Kaiser. [Applause.]

Mr. STAFFORD. Mr. Chairman, to adopt this amendment might negative the whole purpose of this bill. The bill exempts the farmer from the license feature. It allows him also to hoard and store his grain. If you are going to allow him also to refuse to permit his products at the command of the President of the United States to be used in feeding the people of this country and of furnishing a portion to the allies, you virtually destroy the purpose of this bill. I do not think the farmers of this country are so unpatriotic when they raise large quantities of wheat and other cereals that they will refuse to sell their products for the use of the people of this country or in exporting a portion, in the discretion of the President, abroad.

The farmer who is not very prosperous will be obliged to sell his product, but there are farmers in the Northwest having thousands of acres who with this amendment will be enabled to withhold from distribution, from the command of the President, hundreds of thousands of bushels of wheat, which may be the very thing that the Army and Navy of this country, let alone the consuming public of this country, will need. If you are going to adopt this amendment, you might just as well say that the farmer shall be supreme in everything. The committee, as announced by the chairman a minute ago, throws the blanket of protection around the farmer. Even in this section you enable him to withhold that which he needs for his own consumption and use, and yet you are going to enable the prosperous farmer to withhold from the consuming public that which might amount to millions and millions of bushels of wheat. To do that, as I believe, you virtually take away the vitals of this bill. I think no one here wishes to adopt this amendment that will prevent the President or the food controller from reaching this wheat and paying under the terms of this bill a fair price for it. And, therefore, I think the amendment should be rejected. [Applause.]

Mr. THOMPSON. Mr. Chairman, of the time that I have reserved, I yield three minutes to the gentleman from Michigan [Mr. MCLAUGHLIN].

The CHAIRMAN. Without objection, the gentleman yields three minutes to the gentleman from Michigan [Mr. MCLAUGHLIN].

Mr. McLAUGHLIN of Michigan. Mr. Chairman, it is very kind of the gentleman from Oklahoma, in view of the fact that I hardly agree with him as to the advisability of adopting his amendment. It seems to me the farmer is protected by this section, as it says that he, like everyone else, shall be permitted to keep and hold feed and foodstuffs and all farm products that he needs for his own use and the use of his own family, which includes the care of his stock, until the next crop is available, the seed for his next year's crop, and so forth.

It seems to me that, inasmuch as this section of the bill provides, or is to take care of the country in extremity to provide for an emergency, the Government, if it absolutely needs this stuff, ought to have authority even to go to the farmer and take his surplus. This is a section to meet an emergency if it shall unfortunately arise, and it would seem it ought not to be limited as is proposed by this amendment. The farmer, as the gentleman from Oklahoma would suggest, is properly safeguarded.

Mr. THOMPSON. Mr. Chairman, I do not think the committee understood when it reported this bill that this section applied to the farmer. In every place in this bill where there is any penalty or provision that applied to the farmer an express exemption was written into the bill taking care of him and not subjecting him to the penalties and provisions of the act.

I do not think Mr. Hoover understands or wants this bill to apply to the farmers or to the products in the hands of farmers. Now, the gentlemen of this House who took the trouble to read the proceedings before the Senate committee a couple of days ago will recall that when Mr. Hoover's attention was directed to the fact that he could go into the corncrib of the farmer and commandeer his corn or into the wheat bin and commandeer his wheat, or could commandeer the other products of the farmer on the farm, Mr. Hoover said that he was surprised that a construction like that could be put upon the bill; that it was not the intention of the advocates of the bill that such a provision should be contained in it; and that they did not want that kind of power and did not intend to exercise it.

Now, gentlemen, if that is the position of Mr. Hoover, if that is the position of the administration and the people who are responsible for this bill, and if, as I say, the Committee on Agriculture did not understand that this bill conferred that authority, I do not understand why we should not write into the bill this exemption which was the intention all the way through. We do not intend to go to the farms of the country and take their products, and we ought to make this intention clear. The

testimony before our committee showed that efforts of this kind failed even in Germany. Let us not make it possible to repeat a like failure here in the United States. This amendment ought to be adopted, and I hope it will.

Mr. ANDERSON. Mr. Chairman, the gentleman from Oklahoma [Mr. THOMPSON] proposes to attach to this section a proviso in the nature of a limitation in the same language as that contained in section 6, providing that the section shall not apply to the products of the farm actually produced on land owned or operated by the persons producing. The section now under consideration is rather different in its purport and intent from the section to which the proviso has already been attached. There is a reason why the farmer should be exempt from the hoarding section. There is no reason why he should have an exemption from this section. I quite agree with the gentleman from Oklahoma that it is altogether improbable that the Government will ever undertake to requisition the food products in the hands of the farmer. As I said the other day, that has been a failure wherever it has been tried. But it seems to me that it is wholly out of the question, when a bill which grants the general powers that this bill grants, to in every instance make a limitation which will cut off the power of the administration at the exact point where we think now he will probably cease to exercise it. I see no reason for inserting the proviso to this section. There may be no objection to it, but there is no reason for putting it in, and it ought not to go in unless there is a sound reason for putting it in. The farmer ought not to have any more exemption under this section than is given to any other person.

Mr. BUTLER. I understand by this bill that the farmer is permitted to hoard?

Mr. ANDERSON. No.

Mr. BUTLER. Is he not permitted to hoard? I am asking the gentleman plainly, for I want to know before I vote on this provision.

Mr. ANDERSON. He is permitted to withhold from the market the products of the farm actually produced on land owned, leased, or operated by him.

Mr. BUTLER. Yes. I call that hoarding. He is allowed to hoard it away for his own purposes, either to use it himself or to sell it when he pleases. If the Government can not take it, what is the use in passing this bill?

Mr. ANDERSON. I think the Government ought to be able to take it, but I do not think he ought to be subject to the penalties provided for hoarding.

Mr. STEAGALL. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. STEAGALL. As to the gentleman's understanding of the section that fixes the penalty for hoarding, that does not apply to everybody alike?

Mr. ANDERSON. I understand that the penalty that applies to hoarding is subject to the proviso that is contained on page 7 of the bill.

Mr. STEAGALL. Will the gentleman point out the proviso to which he refers on page 7?

Mr. ANDERSON. It is at the top of the page.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. THOMPSON].

The question was taken, and the amendment was rejected.

Mr. MORGAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MORGAN: Page 8, line 10, after the word "necessaries," insert the following: "and in behalf of the United States may make contracts for the production and manufacture of such necessaries; said contracts to be in such form, upon such terms and conditions, for such consideration and at such price or prices as in the judgment of the President shall be just and reasonable and as will insure the production of sufficient necessaries to meet the needs of the United States and its allies."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this amendment and all amendments thereto close in six minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. MORGAN. Mr. Chairman, I call the attention of the committee to section 9—the first three lines—which provides "that to carry into effect the purposes of this act the President is authorized to purchase, provide for the production or manufacture of necessaries," and so forth.

Now, under that authority the President is authorized to provide for the production of necessaries. That would be food or feed or fuel. Now, there is only one way to provide for the production of an article, one definite and certain way, and that it is to make a contract for its production. The object of this amendment is not certainly to lessen the strength of this bill or to narrow its scope or diminish its force. On the other hand, it is to make definite and certain a power which you have placed here in the bill. You give the President the authority to provide for the production of necessaries.

Now, then, this amendment that I have offered goes on and says, "And in behalf of the United States may make contracts for the production and manufacture thereof; said contracts to be in such form, upon such terms and conditions, for such consideration, and at such price or prices as in the judgment of the President shall be just and reasonable and as will insure the production of sufficient necessaries to meet the needs of the United States and its allies."

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. Yes.

Mr. BARKLEY. Does not the gentleman think that the word "provide" is sufficient to cover all that he has written in his amendment?

Mr. MORGAN. Of course, in legislation it is sometimes well to use general language. On the other hand, it is better to be specific, definite, and certain when it is possible to be so. The language in the section is very general and comprehensive. The power of the President might be questioned.

In the few remarks I made in general debate on this bill I called attention to the fact that, in my judgment, the weak point in this measure was that there was not sufficient provision in the bill to guarantee the necessary increased production of foodstuffs required for ourselves and our allies. Section 12 contains the only provision which is intended to stimulate and encourage production. I hold that it is not sufficient. Here is a long bill, covering 18 pages, containing 21 sections, and with but one section that is designed to increase production.

I believe that we ought to specifically authorize the President, if he finds it necessary, to enter into contracts. That is the only definite way to insure increased production. The so-called guaranteed price is not sufficient. It is too indefinite and uncertain, as I shall try to show when we come to the consideration of that question.

This section gives the President the power to provide for the production and manufacture of necessaries. How to provide? What may he do? What authority has he under it? My amendment specifically authorizes him to make contracts for this purpose. It does not limit the power you give him, but it does specifically and definitely authorize him to make contracts for increased production. It does not limit him to that way, but it authorizes him in one definite, certain way to go into contracts, enter into agreements with individuals, with persons, with corporations, with anybody who are producers and who can produce the necessaries that are demanded.

This amendment enlarges the power of the President. Certainly the members of the Committee on Agriculture ought not to object to this. It makes certain and definite what is uncertain and indefinite in the bill. It specifically authorizes the President to enter into contracts, to make such contracts upon terms and conditions and at such price or prices as he shall deem necessary in order to assure the production of these necessaries in quantities sufficient to meet the needs of the United States and our allies.

We know that the production of certain necessaries must be increased. We know that our success in this war depends upon whether the United States shall produce a sufficient quantity of necessaries. So this amendment enlarges the President's power and makes it definite and certain, and I feel sure it would really perfect the bill. [Applause and cries of "Vote!"]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question being taken, the amendment was rejected.

Mr. ROBBINS. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. ROBBINS offers the following amendment: Page 8, line 22, after the word "determine," insert:

"*Provided*, No dwelling house in the actual occupation of the owner or a bona fide tenant shall be requisitioned or taken for such storage space."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this amendment and amendments thereto shall close in six minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on this amendment and amendments thereto close in six minutes. Is there objection?

There was no objection.

Mr. ROBBINS. Mr. Chairman and gentlemen of the committee, this amendment simply protects the dwelling house of the owner or bona fide tenant against being taken for storage space. Under the eighth section of this bill the President or his agent is allowed to requisition stores and storage space. I have always understood as a lawyer that a dwelling house in the occupation of the owner or of a bona fide tenant was sacred. I think the dwelling house of the owner or tenant should be protected. On many large farms of the country there is no sufficient storage house for grain or supplies. This law proposes to give to the President or his agent this extraordinary power. I know the President would not do it, but what agent is going to enforce this extreme power? Some agent clothed with a little brief authority will endeavor to enforce this law, and he could order grain or supplies stored in a dwelling house, to the great inconvenience or probably to the absolute exclusion of the owner.

It has always been the law of the Commonwealth of Pennsylvania, in which I live, and I believe it is the law of every other Commonwealth in this great Union, that a dwelling house in the possession of the owner is sacred. It does not matter how humble it may be. The rains may come through its roof, the snows of winter may blow through its walls, but the king and his army, against the protest of the owner, could not take it and occupy it; and I want to see the right of the American farmer to his dwelling house protected and secured against the invasion of an agent of this Government or against the invasion of even our President, to use it for the storage of crops seized under this unprecedented power.

We attempted here a few moments ago, in the sixth section of this bill, to protect the farmers of this country from the charge of hoarding when holding their crops for an advance in price or until their maturity; but under this section of the bill we come along now and take away all that protection that we have heretofore given our farmers and we give the President and his agents the right to come in here and requisition crops and take them away, and then we give the President or his agent the superadded right to take the farmer's dwelling house and occupy it as storage space. In the name of the American farmer I want to protest against that, and ask the committee to vote this amendment into the bill for the protection of the American farmer.

Mr. LEVER. Let us have a vote, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. ROBBINS].

The question being taken, the amendment was rejected.

The Clerk read as follows:

SEC. 11. That, whenever the President finds it essential in order to prevent undue enhancement or fluctuation of prices of, or in order to prevent injurious speculation in, or in order to prevent unjust market manipulation or unfair and misleading market quotations of the prices of necessaries, hereafter in this section called evil practices, he is authorized to prescribe such regulations governing, or may either wholly or partly prohibit, operations, practices, and transactions at, on, in, or under the rules of any exchange, board of trade, or similar institution or place of business as he may find essential in order to prevent, correct, or remove such evil practices. Further, for the purposes of this section, the President may require all persons coming within its provisions to keep such records and statements of account, and may require such persons to make such returns, verified under oath or otherwise, as will fully and correctly disclose all transactions at, in, or on, or under the rules of any such exchange, board of trade, or similar institution or place of business, including the making, execution, settlement, and fulfillment thereof. He may also require all persons acting in the capacity of a clearing house, clearing association, or similar institution, for the purpose of clearing, settling, or adjusting transactions at, in, or on, or under the rules of any such exchange, board of trade, or similar institution or place of business, to keep such records and to make such returns as will fully and correctly disclose all facts in their possession relating to such transactions, and he may appoint agents to conduct the investigations necessary to enforce the provisions of this section and all rules and regulations made by him in pursuance thereof, and may fix and pay the compensation of such agents. Any person who willfully violates any regulation made pursuant to this section, or who knowingly engages in any operation, practice, or transaction prohibited pursuant to this section, or who willfully aids or abets any such violation or any such prohibited operation, practice, or transaction, shall, upon conviction thereof, be punished by a fine not exceeding $10,000 or by imprisonment for not more than four years, or both.

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. ANDERSON offers the following amendment: Page 11, line 5, strike out all of the section down to and including "he," in line 10, and insert "undue enhancement of prices of necessaries is hereby made unlawful. Whenever the President finds it essential to prevent undue enhancement of prices he."

Mr. ANDERSON. Mr. Chairman——

Mr. STAFFORD. Will the gentleman yield to allow an inquiry of the chairman of the committee?

Mr. ROBBINS. I do not want to yield in my time.

Mr. YOUNG of North Dakota. I make a point of order against the amendment.

The CHAIRMAN. Does the gentleman reserve the point of order?

Mr. ANDERSON. I should like to have the point of order determined now.

Mr. WALSH. I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Massachusetts makes the point of order that there is no quorum present. The Chair will count.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise, and upon that I demand tellers.

Tellers were ordered; and the Chairman appointed Mr. LEVER and Mr. HAUGEN.

The committee proceeded to divide.

During the division,

Mr. SLOAN. Mr. Chairman, is not the next thing in order the announcement of the tellers?

The CHAIRMAN. When the tellers have completed their count.

Mr. SLOAN. It is a question of expedition, then?

The tellers reported—ayes 2, noes 49.

The CHAIRMAN. The committee refuses to rise, but the vote develops that there is no quorum present.

Mr. FESS. A lot of Members did not pass between the tellers.

Mr. BARKLEY. I make the point of order that there is a quorum present.

The CHAIRMAN. The Chair will count. [After counting.] Seventy-five Members present, not a quorum. The Clerk will call the roll.

Mr. LEVER. Mr. Chairman, if the committee will hear me just one moment——

The CHAIRMAN. Unless the point of order is withheld——

Mr. LEVER. If the gentleman from Massachusetts will withhold the point of order just a moment——

Mr. WALSH. I will withhold it for the purpose of allowing the chairman to make a statement.

Mr. BLANTON. I call for the regular order.

The CHAIRMAN. The gentleman from Texas calls for the regular order, which is the calling of the roll.

Mr. HAUGEN. I ask that the calling of the roll be deferred for a moment.

Mr. LEVER. We can get along here all right if we will just be patient with one another.

Mr. BLANTON. I insist on the regular order, Mr. Chairman.

The CHAIRMAN. In the face of a call for the regular order the committee can do nothing except to cause the roll to be called.

Mr. LEVER. If the gentleman from Texas insists on a roll call, he may have it. I intended to move that the committee rise.

The CHAIRMAN. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Adamson	Dale, Vt.	Goodall	Lehlbach
Alexander	Dallinger	Gordon	Lesher
Almon	Davidson	Gould	Linthicum
Anderson	Davis	Graham, Ill.	Little

Rodenberg	Smith, Idaho	Tinkham	

The committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the bill H. R. 4961, finding itself without a quorum, caused the roll to be called, and 184 Members answered to their names, and he returned a list of the absentees.

The committee resumed its sitting.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that the pending amendment may be again read.

The Clerk read as follows:

Page 11, line 5, strike out all the sections down to and including the word "he," in line 10, and insert: "undue enhancement of price of necessaries is hereby made unlawful. Whenever the President finds it essential to prevent undue enhancement of prices he."

Mr. LENROOT. Does not the gentleman think the words "of necessaries" should be added?

Mr. ANDERSON. Yes. Mr. Chairman, I ask unanimous consent that the words "of necessaries" be added.

The CHAIRMAN. The gentleman from Minnesota modifies his amendment, and the Clerk will report.

The Clerk read as follows:

Modify the amendment by inserting, after the word "prices" where it occurs in the last line of the amendment, the words "of necessaries."

Mr. SUMNERS. Does not the gentleman think the words "or depression" should also be included?

Mr. ANDERSON. I do not think so. Perhaps I can make clear what I have in mind if the gentleman will permit me to proceed.

Mr. Chairman, in consideration of this bill we must always keep in mind the fact that we are acting, or undertaking to act, under the war powers and that each and every section of the bill to be valid must be upon its face an exercise of the war power of Congress under the Constitution.

Now, the section under consideration provides that whenever the President finds it essential in order to prevent undue enhancement or fluctuation of prices, or in order to prevent injurious speculation in, or in order to prevent unjust market manipulation or unfair and misleading market quotations of the prices of necessaries, hereafter in this section called "evil practices," he is authorized, and so forth.

Can it be said that there is such a relation between speculation, injurious or otherwise, as to bring the regulation of speculation within the war powers? Can it be said, for instance, that manipulation of prices has such a relation to the conduct of the war with Germany as to bring that subject within the purview of the war power? Can it be said that the making of misleading or unfair market quotations is a subject of such character as to bring it within the purview of the war power? I think it can scarcely be contended that the subjects which I have enumerated have such a connection with the conduct of the war as to bring them within the purview of the war power. That is not true with respect to undue enhancement of prices, because the undue enhancement of prices may result in the equivalent of local or a general scarcity, so far as the poor people of the country are concerned, who are unable to pay the high prices, and to result in disturbance and social phenomena which are wholly inconsistent with the prosecution of the war. There is, then, this further objection to the section. In order to justify an administrative regulation on the part of the President, it is necessary that the things concerning which regulations are to be made shall be prohibited not by the President but by the legislative action of the Congress. There is nothing in this bill which prohibits undue enhancement of prices except under a conspiracy, injurious speculations, unjust market manipulation, or unfair or misleading market quotations, so that there is in the bill no legislative basis for the regulations which this section permits the President to make. The amendment which I have offered provides that the undue enhancement of prices of necessaries is unlawful, and by that declaration makes a legislative basis for the regulations which are hereafter provided in this section. Again, as I have just said, the undue enhancement of prices does bear a relation to the conduct of the war, so that that prohibition is within the purview of the war power. Then, I provide that when the President shall find that it is essential to prevent undue enhancement of prices, he may proceed as provided in the section.

The CHAIRMAN. The time of the gentleman from Minnesota his expired.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

Mr. HAUGEN. Mr. Chairman, I ask that he be given five minutes more, as I desire to ask him a question.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. ANDERSON. Mr. Chairman, the language which I have proposed does not in any sense or in any way limit the power of the President to prohibit, either partially or wholly, transactions upon any exchange, chamber of commerce, or other similar institution. It goes simply to the establishment of the constitutional basis of the bill. It does not in any way affect the power of the President, because I leave that power exactly as it now reads in the section.

Mr. HAUGEN. Mr. Chairman, as the section stands the President is authorized to make rules and regulations to prevent, correct, or remove "evil practices." What are the "evil practices"? Injurious speculation or unjust market manipulations or unfair and misleading market quotations. Does the gentleman propose to exempt them from the operation of the law?

Mr. ANDERSON. Not at all.

Mr. HAUGEN. I have understood all of the time that the purpose of this bill was to do away with this manipulation of prices and the misleading quotations of markets and all of the evil practices, and under the amendment of the gentleman it seems to me that you may just as well write in the bill that these evil practices shall be lawful.

Mr. ANDERSON. Mr. Chairman, I do not wish to limit the power of the President in this section in any particular. I simply wish to establish such constitutional basis as will enable him to regulate them. The thing that I fear is that the section in its present form will be considered by the court to be not an exercise of war power, but a legislative or municipal regulation, which would not be sustained under the war power, under which we are now undertaking to act.

Mr. HAUGEN. Mr. Chairman, we have listened to legal argument as to the war power, and it seems to be the opinion that there is practically no limit to the war power, and I take it that if we have the power under the Constitution to do the things we have provided for in the other sections that we have the power provided for in this section.

And I want to say to the gentleman, as far as I am concerned it is possible that these exchanges are not as bad as they have been painted; but after all, if we are to legislate, let us enact a law that will be operative.

Mr. ANDERSON. Let me say to the gentleman that, as I view this section, the language which I have proposed to strike out is jurisdictional. It does not in itself confer any power at all upon the President. It simply establishes the legal basis of the regulations. Now, it may be that an additional amendment is necessary authorizing the President to make such regulations as will eliminate injurious speculation, misleading market quotations, and so forth. I do not think so; but if the gentleman thinks so, I have no objection to such an amendment.

Mr. HAUGEN. The object of the amendment is to do away with injurious speculation and manipulation.

Mr. ANDERSON. Not at all.

Mr. HAUGEN. But he may make rules and regulations to prevent it.

Mr. ANDERSON. Not at all.

Mr. HAUGEN. The gentleman has stricken out that language and simply makes it unlawful; that is, the undue enhancement of prices is made unlawful, and the other language has been eliminated from the bill.

Mr. McLAUGHLIN of Michigan. Why should it not be made unlawful to reduce prices as well as to enhance them? There is a charge made here that this bill is aimed at the farmer—to destroy his business, to reduce his prices. I do not believe it; but if we have this section making it unlawful to increase prices, I can imagine the situation where prices may be too low.

Mr. ANDERSON. If the gentleman from Iowa or the gentleman from Michigan thinks that the amendment which I have offered reduces the power of the President to deal with this situation I will be perfectly willing to withdraw it, because I have no desire to support an amendment to diminish in the slightest degree the power of the President to deal with the

situation. I only desired to establish, if I could, a constitutional basis which would bring the regulations proposed in the section obviously within the war powers of the Congress. If the gentleman from Michigan or the gentleman from Iowa think that my amendment would result——

Mr. HAUGEN. If the gentleman will permit this matter to go over until to-morrow, I think we would all agree as to what we should do in this matter.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto shall close——

Mr. HAUGEN. I would like to ask the chairman of the committee this, if it is not possible for this to go over until to-morrow? If we pass it over, we will have a little time to look it over.

Mr. ANDERSON. Mr. Chairman, in order to clear the situation, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to withdraw his amendment. Is there objection? [After a pause.] The Chair hears none.

Mr. LENROOT. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The Chair really promised to recognize the gentleman from North Dakota. Does the gentleman from North Dakota desire recognition?

Mr. YOUNG of North Dakota. I requested the Chair for recognition for the purpose of replying to the gentleman from Minnesota [Mr. ANDERSON].

Mr. LENROOT. Mr. Chairman——

Mr. LEVER. If the gentleman will permit, I ask unanimous consent that debate on this section and all amendments thereto shall close in——

Mr. HAUGEN. Mr. Chairman, reserving the right to object, I suggest that, if any amendments are to be offered, that the amendments be offered now, and after the amendments have been read we can then determine or agree upon the close of debate.

Mr. LEVER. That is not a bad idea. I ask that amendments that are desired to be offered to this section be offered now for information.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that amendments to this section may be offered now and be pending. Is there objection?

Mr. MORGAN. Mr. Chairman, I object.

Mr. LEVER. Mr. Chairman, I move that all debate on this section and all amendments thereto shall close in five minutes, the gentleman from Wisconsin [Mr. LENROOT] to have that time.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] moves that all debate on this section and all amendments thereto close in five minutes.

Mr. ROBBINS. Mr. Chairman, I want to offer an amendment.

Mr. DILLON. Mr. Chairman, I make the point of no quorum. I have three amendments, and I have not talked on this bill at all. I ought to have five minutes.

The CHAIRMAN. The gentleman from South Dakota makes the point of no quorum. Does the gentleman reserve the point of no quorum?

Mr. DILLON. I will if I have time to explain my three amendments to this section.

Mr. LEVER. Mr. Chairman, the gentleman from Wisconsin [Mr. LENROOT] desires five minutes, the gentleman from South Dakota [Mr. DILLON] desires six minutes, the gentleman from North Carolina desires three minutes, the gentleman from Oklahoma [Mr. MORGAN] two minutes, the gentleman from North Dakota [Mr. YOUNG], who is a member of the committee, five minutes, the gentleman from Texas [Mr. SUMNERS] five minutes, the gentleman from New York [Mr. HULBERT] three minutes, the gentleman from Iowa [Mr. HAUGEN], the ranking minority member, desires five minutes.

Mr. HEFLIN. Who is to keep count of the time? How much does that make in all?

Mr. LEVER. Thirty-three minutes.

Mr. ROBBINS. I want to offer an amendment.

Mr. LEVER. And the gentleman from Pennsylvania [Mr. ROBBINS] desires one minute.

Mr. HEFLIN. I want one minute.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 35 minutes.

Mr. ANDERSON. Mr. Chairman, reserving the right to object, I withdrew the amendment which I offered in order to expedite the consideration of this section, not because I had any question about my position with respect to it or the validity of that position. If this debate is going to run on half an hour or three-quarters of an hour, and a dozen amendments are to be considered, we might as well consider mine.

Mr. BUTLER. Move to shut it off.

Mr. MAPES. Mr. Chairman, I demand the regular order.

The CHAIRMAN. The gentleman from Michigan demands the regular order.

Mr. LENROOT. Mr. Chairman, I have been recognized on the motion to strike out the last word.

Mr. MAPES. Mr. Chairman, is not the regular order the putting of the motion to limit debate to five minutes?

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] yielded to the gentleman from South Carolina to submit a motion for unanimous consent. The gentleman from South Carolina asks unanimous consent that debate on this section and all amendments thereto close in 35 minutes, the gentleman from Texas [Mr. SUMMERS] to have 5 minutes, the gentleman from New York [Mr. HULBERT] 3 minutes, the gentleman from Wisconsin [Mr. LENROOT] 5 minutes, the gentleman from South Dakota [Mr. DILLON] 6 minutes, the gentleman from North Dakota [Mr. NORTON] 5 minutes, the gentleman from Oklahoma [Mr. MORGAN] 5 minutes, the gentleman from North Dakota [Mr. YOUNG] 5 minutes, the gentleman from Iowa [Mr. HAUGEN] 5 minutes, and the gentleman from Pennsylvania [Mr. ROBBINS] 1 minute.

Mr. HEFLIN. Mr. Chairman——

The CHAIRMAN. That makes 40 minutes.

Mr. MAPES. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MAPES. What has become of the motion to limit debate to five minutes?

The CHAIRMAN. That was withdrawn.

Mr. GILLETT. Reserving the right to object, may I make a suggestion to the gentleman from South Carolina?

The CHAIRMAN. May the Chair have the attention of the gentleman from South Carolina. In all, the requests call for 44 minutes of time.

Mr. GILLETT. Mr. Chairman, reserving the right to object——

Mr. LEVER. Mr. Chairman, I ask unanimous consent then, Mr. Chairman, that all debate on this section and all amendments thereto close in 44 minutes.

Mr. BUTLER. Does the gentleman think he will have a quorum here in about five minutes from now?

Mr. GILLETT. Mr. Chairman, a good many gentlemen are impatient to get away. We have had certainly a long day. I would suggest to the gentleman that we have this debate with the understanding that nothing further is to be transacted to-night, and if we meet to-morrow morning at 11 o'clock or some earlier hour——

Mr. HEFLIN. Make it 10.30, and we will not oppose that.

Mr. WALSH. I object.

Mr. LEVER. Let me suggest to the gentleman from Massachusetts that the trouble with his suggestion is that to-morrow morning when this debate would be opened again——

Mr. GILLETT. It would not be opened again.

Mr. LEVER. It would be closed according to the rules, but any gentleman who desires to have two minutes or three minutes will insist that I give it to him, or that the gentleman from Iowa give it to him, or the Chair give it to him, and he can not well be refused. What I am trying to do is to get down to section 13, and when we have done that I will be ready to rise.

Mr. GILLETT. It may be midnight at the present rate.

Mr. LEVER. I have been here all day. I hope this request will be granted. We could go along here and have it finished while we are talking.

The CHAIRMAN. The Chair desires to make a correction. There have been 40 minutes of time requested. The gentleman from South Carolina asks unanimous consent that debate on this section and all amendments thereto close in 40 minutes. Is there objection?

Mr. WALSH. I object.

Mr. LEVER. Then, Mr. Chairman, I move that all debate on this section and all amendments thereto close now.

Mr. LENROOT. I yielded to the gentleman from South Carolina for the purpose—— [Cries of "Vote! Vote!"]

Mr. BUTLER. In five minutes.

Mr. LEVER. Except that the gentleman from Wisconsin is to have his five minutes.

Mr. DILLON. I make the point of order there is no quorum.

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin [Mr. LENROOT] to proceed for five minutes. He was recognized, and the Chair will now again recognize him to proceed.

Mr. LENROOT. Mr. Chairman, with reference to this section regulating the grain exchanges of this country the farmers have for many years been demanding Federal regulation. The opportunity has come for such Federal regulation during the existence of this war as a war measure.

If the amendment proposed by the gentleman from Minnesota [Mr. ANDERSON] had not been opposed by some members of this committee it would have been possible to have had a real Federal regulation of grain exchanges under this bill during the war.

Mr. HAUGEN. Mr. Chairman, I suggest that that is the gentleman's view. There are others who may differ with him.

Mr. LENROOT. I am coming to that.

Mr. HAUGEN. Very well.

Mr. LENROOT. For this reason, this amendment having been opposed, and the gentleman from Minnesota having withdrawn it—and I do not blame him for so doing under the circumstances—as this section now stands it is worthless. My opinion as a lawyer may be of little value, but so far as it has any value I will say that so far as benefiting the farmers of the United States is concerned, this section as it stands is not worth the paper upon which it is written, and the first time it gets into court it will be nullified as in violation of the Constitution.

Gentlemen who have opposed the amendment of the gentleman from Minnesota must take that responsibility, because, Mr. Chairman, we know that in the case of legislation in the interest of the masses of this country, when the time has come when an opportunity is presented for them to get real legislation, how often when they get the legislation has it been found to have been framed in such a form that it is of no value to them and been held unconstitutional?

Mr. HAUGEN. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. I do not question the good faith of gentlemen.

Mr. HAUGEN. That is not the question now. I asked if the gentleman will yield.

Mr. LENROOT. I will yield for a question.

Mr. HAUGEN. I wish to call the gentleman's attention to the fact that the section under consideration is the product of the best lawyers we have in the House, the lawyers on the Committee on Agriculture, and the lawyers of the Department of Agriculture.

Mr. LENROOT. With all due respect to the other lawyers on the committee, I will say that the best lawyer on that committee, and one of the best lawyers in the House, is the gentleman from Minnesota [Mr. ANDERSON], who offered this amendment and who has declared it to be his opinion that this amendment is vital and necessary.

Now, for the reasons stated by the gentleman from Minnesota—reasons that ought to appeal to every lawyer—it is not a doubtful question whether this legislation is valid in its present shape. There is no prohibition in the bill against the things that are dealt with in the section. The gentleman from Minnesota undertook to provide a provision which would constitute a legal basis for the other provisions. What items are now in the section as it now stands which are based on the exercise of the war power? What has that got to do with misleading market quotations? It does not take a lawyer to say that that can not be sustained under the war power granted in the Constitution, and when this bill comes to be passed upon by the Supreme Court of the United States it will not be interpreted as a whole but, as in the case of Miller against the United States, the Supreme Court will examine each section, and one section they may find to be under the war power, and another section they may find to be of the character of municipal legislation; and if this section 11 is not under the war power, no lawyer will say that it is valid and constitutional because there is no provision of the Constitution upon which it can rest.

I want to repeat what I said a few moments ago, that these gentlemen who have opposed this amendment in the interest of the farmer are unwittingly and unconsciously enemies of the farmer in opposing the amendment proposed by the gentleman from Minnesota. [Applause.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. LEVER. Mr. Chairman, I move that the debate on this section and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from South Carolina moves that the debate on this section and all amendments thereto be now closed. The question is on agreeing to that motion.

Mr. DILLON. Mr. Chairman, I renew the point of no quorum.

The CHAIRMAN. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. NORTON. A division, Mr. Chairman.

Mr. DILLON. I make the point of no quorum, Mr. Chairman.

The CHAIRMAN. The gentleman from South Dakota makes the point of no quorum. The Chair will count. [After counting.] One hundred and eighteen Members are present, a quorum.

Mr. DILLON. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The gentleman from South Dakota demands tellers.

Mr. PADGETT. Mr. Chairman, I make the point of order that tellers are not in order for a quorum. That rests alone with the Chair.

The CHAIRMAN. That is a question entirely with the Chair, and the Chair is inclined to give the gentleman a chance to order tellers if he can. Those in favor of taking this vote by tellers will rise and stand until they are counted. [After counting.] Only four gentlemen have risen. Tellers are refused.

So the motion to close debate was agreed to.

Mr. NORTON. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. NORTON. I was on my feet during the vote on the motion to close debate, and I asked for a division. The gentleman from South Dakota [Mr. DILLON] then made a point of no quorum. Are we not entitled to a division?

The CHAIRMAN. The Chair did not hear the gentleman when the demand was made.

Mr. ROBBINS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ROBBINS: Page 11, line 13, after the word "transactions," insert "including buying selling, or dealing in food, grain, or provisions by the method commonly known as 'futures' or 'short selling,' where the article bought or sold is not delivered at the maturity of the contract."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. ROBBINS].

The question was taken, and the amendment was rejected.

Mr. ROBBINS. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman already has that privilege.

Mr. DILLON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DILLON: Page 12, line 10, after the word "agents," insert the following: "Whoever shall buy or sell on any board of trade, chamber of commerce, or exchange in which any produce shipped in interstate commerce is purchased or sold any wheat, corn, oats, or other food products on a margin intending that no delivery thereof shall be made, but with the intent that the same shall be settled for as a speculative margin, shall be guilty of a misdemeanor. That upon a prosecution for such offense it shall only be necessary for the prosecution to show, in order to make a prima facie case, that such seller was not a grower or producer or owner at the time of such sale of such grain or produce, and that the purchaser or buyer purchased the same on a margin of less than 50 per cent, and upon such showing the burden of proof shall be shifted to the seller or purchaser to show a good-faith transaction."

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. DILLON. A division, Mr. Chairman.

The committee divided; and there were—ayes 10, noes 32.

Accordingly the amendment was rejected.

Mr. DILLON. I offer another amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from South Dakota offers another amendment, which the Clerk will report.

Mr. DILLON. I now make the point of order that there is no quorum present.

Mr. BUTLER. That point is too late.

Mr. DILLON. Oh, no; it is not.

Mr. LEVER. I make the point of order that that is dilatory.

The CHAIRMAN. The Chair feels constrained to sustain the point of order made by the gentleman from South Carolina. The gentleman from South Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DILLON: Page 12, line 17, at the end of section 11, add the following: "This section shall be permanent law, notwithstanding the limitations contained in this act."

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. DILLON. A division, Mr. Chairman.

The committee divided, and there were—ayes 12, noes 43.

Mr. DILLON. I make the point of order that there is no quorum present, Mr. Chairman.

Mr. LEVER. I make the point of order that that is dilatory.

The CHAIRMAN. The Chair thinks it is dilatory.

Mr. DILLON. The announcement which the Chair has just made shows that there is no quorum.

The CHAIRMAN. It has been only a very few moments since the point of no quorum was made, and the Chair counted, and more than a quorum was found to be present. The Chair sustains the point of order that the point of no quorum is dilatory.

Mr. NORTON. I appeal from the decision of the Chair.

Mr. GARRETT of Tennessee. The gentleman can not appeal from the decision of the Chair that the motion is dilatory.

The CHAIRMAN. That is correct. The gentleman can not.

Mr. NORTON. Mr. Chairman——

Mr. SUMNERS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas has an amendment which he desires to offer.

Mr. NORTON. I should like to be heard on that.

The CHAIRMAN. Heard on what?

Mr. NORTON. On the appeal from the decision of the Chair.

The CHAIRMAN. The Chair declines to recognize the appeal on the ground that the motion was dilatory, under the rule as found in section 5715 of Hinds' Precedents. The Clerk will report the amendment offered by the gentleman from Texas [Mr. SUMNERS].

The Clerk read as follows:

Amendment offered by Mr. SUMNERS: Page 11, line 6, after the word "enhancement," insert a comma and the word "depression."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question being taken, the Chairman announced that the ayes appeared to have it.

Mr. NORTON. I ask for a division.

The committee divided; and there were—ayes 43, noes 7.

Accordingly the amendment was agreed to.

Mr. YOUNG of North Dakota. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

Mr. YOUNG of North Dakota. This amendment is offered for the purpose of making this section constitutional, according to the view of the gentleman from Minnesota [Mr. ANDERSON].

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. YOUNG of North Dakota offers the following amendment: Page 11, line 5, after the word "that," insert "undue enhancement or fluctuation of prices of, or injurious speculation in, or unjust market manipulation, or unfair and misleading market quotations of the prices of necessaries are hereby prohibited, and."

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. YOUNG].

The amendment was agreed to.

Mr. MORGAN. Mr. Chairman, I offer an amendment to come in as a new section.

Mr. DILLON. Mr. Chairman, a parliamentary inquiry. I have an amendment to section 11. Is not that in order first?

Mr. MORGAN. The amendment which I offer is a new section, following section 11. Is that in order now?

The CHAIRMAN. The Chair recognizes the gentleman from South Dakota [Mr. DILLON] first. The gentleman from South Dakota offers amendments, which the Clerk will report.

The Clerk read as follows:

Amendments offered by Mr. DILLON:

Page 11, line 17, after the word "President," strike out the word "may" and insert in lieu thereof the following: "is authorized and directed to."

Line 19, after the word "and," strike out the words "may require such persons."

Line 24, after the word "he," strike out the words "may also" and insert in lieu thereof the following: "is also authorized and directed to."

The CHAIRMAN. The question is on the amendments offered by the gentleman from South Dakota.

The amendments were rejected.

Mr. MORGAN. Mr. Chairman, I offer the following amendment as a new section.

The Clerk read as follows:

Amendment offered by Mr. MORGAN: Page 12, between lines 17 and 18, after the word "both," insert the following as a new section:

"SEC. 11a. That as a further means of stimulating the production of necessaries the President, in his discretion, is hereby authorized to loan to the farmers of the United States, through such governmental agency or agencies as he shall direct, a sum of money not to exceed $50,000,000 upon such terms, conditions, and security, and at such rates of interest as he shall prescribe, and which, in his judgment, shall be necessary to assure an adequate supply thereof, and the sum of $50,000,000, or so much thereof as may be necessary, is hereby appropriated, out of any funds in the Treasury not otherwise appropriated, and to be available immediately."

Mr. LEVER. Mr. Chairman, I make the point of order that the amendment is not germane to the bill.

Mr. MORGAN. Mr. Chairman, I would like to be heard on that.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. MORGAN. Mr. Chairman, I do not think the point of order is well taken. This bill is entitled—

A bill to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Now, the primary purpose of the bill is to increase and encourage the production of food products. I propose by this amendment to authorize the President to loan to the farmers of the United States $50,000,000 for the very purpose of equipping them and enabling them to enlarge their production, to help out the very object and purpose of the bill. All through the bill is the idea of increase of production.

Now, it might be that the President has some such authority, but anything that will aid in the object and purpose of the bill will certainly be germane.

The CHAIRMAN. The Chair is ready to rule. The Chair agrees with the gentleman that one purpose of the bill is to encourage the production and conserve the supply of food products, but the Chair thinks, unfortunately for the gentleman's contention, that this provision is outlined in a definite and specific manner, and that if the President is authorized to loan money to the farmers it is getting away from the express purpose of the bill, and therefore he sustains the point of order.

Mr. MORGAN. With all due respect to the Chair, I appeal from the decision.

The CHAIRMAN. The gentleman from Oklahoma appeals from the decision of the Chair, and the question is, Shall the decision of the Chair stand as the judgment of the committee?

The question was taken; and there were—ayes 83, noes 6.

So the decision of the Chair was sustained as the judgment of the committee.

The Clerk read as follows:

SEC. 11. That, whenever the President finds it essential in order to prevent undue enhancement or fluctuation of prices of, or in order to prevent injurious speculation in, or in order to prevent unjust market manipulation or unfair and misleading market quotations of the prices of necessaries, hereafter in this section called evil practices, he is authorized to prescribe such regulations governing, or may either wholly or partly prohibit, operations, practices, and transactions at, on, in, or under the rules of any exchange, board of trade, or similar institution or place of business as he may find essential in order to prevent, correct, or remove such evil practices. Further, for the purposes of this section, the President may require all persons coming within its provisions to keep such records and statements of account, and may require such persons to make such returns, verified under oath or otherwise, as will fully and correctly disclose all transactions at, in, or on, or under the rules of any such exchange, board of trade, or similar institution or place of business, including the making, execution, settlement, and fulfillment thereof. He may also require all persons acting in the capacity of a clearing house, clearing association, or similar institution, for the purpose of clearing, settling, or adjusting transactions at, in, or on, or under the rules of any such exchange, board of trade, or similar institution or place of business, to keep such records and to make such returns as will fully and correctly disclose all facts in their possession relating to such transactions, and he may appoint agents to conduct the investigations necessary to enforce the provisions of this section and all rules and regulations made by him in pursuance thereof, and may fix and pay the compensation of such agents. Any person who willfully violates any regulation made pursuant to this section, or who knowingly engages in any operation, practice, or transaction prohibited pursuant to this section, or who willfully aids or abets any such violation or any such prohibited operation, practice, or transaction, shall, upon conviction thereof, be punished by a fine not exceeding $10,000 or by imprisonment for not more than four years, or both.

Mr. YOUNG of Texas. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 12, line 21, after the word "agricultural," insert the words "food or feed."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The amendment was agreed to.

Mr. HULBERT. Mr. Chairman, during the consideration of this bill I have not occupied any time, and I do not intend to beyond asking to have read in my time the following communication, which I send to the Clerk's desk.

The Clerk read as follows:

NEW YORK CITY, *June 19, 1917.*

Hon. MURRAY HULBERT,
House of Representatives, Washington, D. C.

HONORABLE SIR: In view of the rapidly approaching harvest it may be said that the immediate passage of the "Lever bill" is imperative.

We are receiving criticisms and inquiries about the price of bread, over which we have no control because of the present high price of flour, and we are hoping that the appointment of food administrator and the closing of grain exchanges will result in the reducing and

stabilizing of prices of flour so that we can produce cheaper bread for the people, and cheaper food we believe is necessary to maintain a social balance in our country.

In the name of our country's poor, please lend your best efforts to an early passage of this bill.

Very truly, yours,

GEORGE S. WARD,
President Ward Baking Co.

Mr. LEVER. Mr. Chairman, there is some desire to debate section 12 of this bill. The committee has been in session since 11 o'clock this forenoon. They have been attentive and kept a quorum here, which we appreciate. If we can enter into an agreement that all debate on section 12 may be closed in an hour to-morrow morning and meet at 11 o'clock, I will move that the committee rise.

Mr. CANNON. I have no objection, but I will state that this three-year proposition ought to be fully considered.

Mr. LEVER. I appreciate that fact, and I want a real debate on the section. I would like to enter into some agreement that will meet the wishes on both sides of the House on this proposition. It is a very important section, but I do not want to leave it absolutely open, for I want to pass the bill to-morrow night.

Mr. CANNON. I think there will be no trouble in doing that.

Mr. LEVER. The Russian commission will be here to-morrow.

Mr. CANNON. That will only take about an hour, and we can sit to-morrow night.

Mr. HARRISON of Mississippi. Does the gentleman from South Carolina contemplate taking a vote to-morrow night?

Mr. LEVER. Absolutely.

Mr. HARRISON of Mississippi. A great many gentlemen are away from here and they are trying to find out.

Mr. LEVER. I have been telling Members for three days that there would be a vote to-morrow afternoon.

Mr. HARRISON of Mississippi. The gentleman does not contemplate having the previous question ordered and let it go over until Monday?

Mr. LEVER. No; to be entirely fair, Mr. Chairman, I ask unanimous consent that debate upon this section and all amendments thereto shall be concluded to-morrow after one hour and a half.

The CHAIRMAN. The gentleman asks unanimous consent that all debate upon section 12 and all amendments thereto shall conclude in one hour and a half. Is there objection?

Mr. NORTON. Mr. Chairman, I think that as far as I am concerned that is agreeable, but I would like to have 10 minutes of that.

Mr. LEVER. Of course, the Chair would control the time. I do not think there will be a great deal of discussion on this, and yet there seems to be some time desired. I think that is liberal.

Mr. SCOTT of Iowa. Is that an hour and a half on both sides?

Mr. LEVER. No.

Mr. SCOTT of Iowa. That is not enough for this section.

Mr. LEVER. What would the gentleman suggest?

Mr. SCOTT of Iowa. I would suggest not less than two hours and a half.

Mr. LEVER. Mr. Chairman, I trust that gentlemen of the committee will enter into any agreement that we may make in the same spirit with which the chairman of the committee is endeavoring to do so. An hour and a half is a long time.

Mr. NORTON. Make it two hours.

Mr. LEVER. Mr. Chairman, after informal consultation I think we can reach an agreement. I ask unanimous consent that debate on this section and all amendments thereto shall close in two hours, the gentleman from Iowa [Mr. HAUGEN] to control one-half of that time and I to control the other half, with the understanding, although this is not included in the request, that when the House adjourns to-night it shall adjourn to meet at 11 o'clock to-morrow morning.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate upon section 12 and all amendments thereto shall close in two hours, one-half of that time to be controlled by himself and one-half by the gentleman from Iowa [Mr. HAUGEN]. Is there objection?

Mr. MORGAN. Mr. Chairman, reserving the right to object, I would prefer that the gentleman do this by motion. I do not like this section, and I can not conscientiously consent to any closing of debate on it.

Mr. CANNON. Mr. Chairman, reserving the right to object, I desire to make a statement. Gentlemen must be quite aware that a majority can close this debate at the end of two hours or at the end of the first amendment on to-morrow.

Mr. LEVER. That is true, but I do not want to do it.

Mr. CANNON. It seems to me that the request is quite liberal. Two hours of debate ought to be sufficient, and we can meet at 11 o'clock. We are all tired now. We can finish this bill to-morrow.

The CHAIRMAN. Is there objection?

Mr. DILLON. Mr. Chairman, reserving the right to object, I desire to ask the chairman of the committee why he closed debate on section 11, the most important section in the bill, in 10 minutes and denied Members the right to explain amendments for even 2 minutes?

Mr. LEVER. Simply because the chairman of the committee in a futile endeavor to close debate could not get Members to agree to close it.

Mr. DILLON. I want to say to the chairman that I think that that was very unfair.

Mr. LEVER. That is the gentleman's impression, which makes no impression upon me.

Mr. DILLON. Mr. Chairman, I object.

Mr. LEVER. Mr. Chairman, I move that debate on section 12 and all amendments thereto shall close at the conclusion of two hours.

The motion was agreed to.

Mr. BOOHER. Mr. Chairman, I ask unanimous consent to insert in the RECORD three telegrams which I have received——

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. WALSH. Mr. Chairman, I object.

Mr. BOOHER. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for two minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BOOHER. Mr. Chairman, I shall occupy that two minutes of time in reading some telegrams which I have in my hand, which are very short. The first one I shall read is dated St. Joseph, Mo., June 21, 1917, from one of the largest milling companies of that State west of Kansas City. I received it this morning:

ST. JOSEPH, MO., *June 21, 1917.*

HON. CHARLES F. BOOHER,
Washington, D. C.:

Wheat harvest is about to commence in the Southwest. All regular channels of buying, storing, paying for this wheat now closed account no one knows what Government is going to do in way of controlling supply and price. Instant action should be taken on H. R. 4961, which is now before the House and Senate. All grain dealers and millers are simply marking time now, not knowing what to do. This means all markets will become bare of flour before they can be replenished with new crop or cars can be secured to move same. At present time car shortage is easier than for some months, and we could use them for wheat and flour to seacoast daily. Later it will be impossible to get cars to transport flour or food in sufficient quantities to fill markets. We urge immediate passage of bill.

ROBERT R. CLARKE,
President Aunt Jemima Mills Co.

Now, I have two from labor unions in my district which are very short, and I ask consent to extend them in the RECORD.

Mr. EMERSON. Mr. Chairman, I suggest to the gentleman that he has the right to extend his remarks under the leave to print already granted in reference to this bill.

The CHAIRMAN. The suggestion made by the gentleman from Ohio is correct. The gentleman from Missouri, as every other gentleman, has the right to extend his remarks on this bill, and the Chair thinks he can extend anything touching this subject.

Mr. BOOHER. But, Mr. Chairman, I got two minutes' time, and I have the right to use it as I please. This telegram is as follows:

ST. JOSEPH, MO., *June 20, 1917.*

HON. CHARLES F. BOOHER.
House of Representatives, Washington, D. C.

MY DEAR MR. BOOHER: In the name of the organized garment workers of St. Joseph, Kansas City, and Maryville, Mo., I urgently request you to support Lever food-administration bill.

J. L. WINES, *Secretary.*

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the time fixed for debate on section 12 of this bill be equally divided between the gentleman from Iowa [Mr. HAUGEN] and myself.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the time fixed for debate on section 12 be controlled, one-half by himself and one-half by the gentleman from Iowa [Mr. HAUGEN]. Is there objection? [After a pause.] The Chair hears none.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that

committee had had under consideration the bill H. R. 4961 and had come to no resolution thereon.

HOUR OF MEETING TO-MORROW—11 O'CLOCK A. M.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 a. m. to-morrow.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 4 minutes p. m.) the House, under its previous order, adjourned to meet at 11 a. m. to-morrow, Saturday, June 23, 1917.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Barataria Bay, La., and connecting waters (H. Doc. No. 200); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the Secretary of the Navy, submitting draft of tentative legislation to amend section 1585 of the Revised Statutes of the United States, relating to Navy rations (H. Doc. No. 201); to the Committee on Naval Affairs and ordered to be printed.

3. A letter from the Acting Secretary of the Treasury, transmitting copy of communication of the Secretary of War submitting a supplemental estimate of appropriation for the establishment and equipment of a submarine base at the Panama Canal (H. Doc. No. 202); to the Committee on Appropriations and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CLAYPOOL: A bill (H. R. 5146) to repeal the restriction on appointments and promotions in the Pension Bureau; to the Committee on Appropriations.

By Mr. WINGO: A bill (H. R. 5147) granting the consent of Congress to the Sebastian Bridge district to construct a bridge across the Arkansas River, at the foot of Garrison Avenue, at Fort Smith, Ark.; to the Committee on Interstate and Foreign Commerce.

By Mr. KING: A bill (H. R. 5148) to authorize the establishment of a Bureau of Farm Risk Insurance in the Treasury Department; to the Committee on Agriculture.

By Mr. MOON: A bill (H. R. 5149) to prohibit Federal officials and all other persons from aiding directly or indirectly in the procurement of contracts with the Government for compensation; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOWERS: A bill (H. R. 5150) granting a pension to A. M. Graham; to the Committee on Invalid Pensions.

By Mr. DAVIS: A bill (H. R. 5151) granting a pension to William W. Kinne; to the Committee on Pensions.

By Mr. GANDY: A bill (H. R. 5152) granting an increase of pension to Cassius M. Rose; to the Committee on Invalid Pensions.

By Mr. LEE of Georgia: A bill (H. R. 5153) granting an increase of pension to Sarah Crawford; to the Committee on Pensions.

Also, a bill (H. R. 5154) granting an increase of pension to Elizabeth E. Roberts; to the Committee on Pensions.

Also, a bill (H. R. 5155) granting an increase of pension to Margaret E. Patton; to the Committee on Pensions.

Also, a bill (H. R. 5156) granting an increase of pension to Louisa F. Echols; to the Committee on Pensions.

By Mr. LINTHICUM: A bill (H. R. 5157) granting a pension to Ella S. Anderson; to the Committee on Pensions.

By Mr. MAGEE: A bill (H. R. 5158) providing for refund to the Haberle-Crystal Springs Brewing Co. of a sum paid in excess of a certain special excise tax; to the Committee on Claims.

By Mr. SMITH of Idaho: A bill (H. R. 5159) granting an increase of pension to Charles Richter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5160) granting an increase of pension to Ruel Rounds; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5161) granting an increase of pension to E. G. Burnet; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5162) granting a pension to Grant H. Hill; to the Committee on Pensions.

By Mr. THOMPSON: A bill (H. R. 5163) granting a pension to Helen Walker; to the Committee on Pensions.

Also, a bill (H. R. 5164) granting a pension to William D. Nugent; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Petition of 34 employees of the Blair Motor Truck Co., of Newark, Ohio, asking for legislation to protect them from price boosters and unscrupulous middlemen; to the Committee on Agriculture.

By Mr. BURROUGHS: Memorial of Methodist Episcopal Church of Newfields, N. H., favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. DALE of New York: Petition of the Amalgamated Ladies' Garment Cutters' Union, Local 10, New York City, urging the necessity of the passage of the Lever food-control bill; to the Committee on Agriculture.

By Mr. ESCH: Petition of the women's clubs of the seventh district of Wisconsin federation, urging the creation of effective zones around all military camps; to the Committee on Military Affairs.

Also, petition of Grand Council of Wisconsin of the Order of United Commercial Travelers of America, protesting against any legislation increasing first-class postage rates until the postage on second-class mail has been raised to the point where the carriage of that class of mail will be on a self-sustaining basis; to the Committee on Ways and Means.

By Mr. FITZGERALD: Memorial of Central Mercantile Association of New York City, indorsing recommendations of the Secretaries of War and the Navy that the depth of Hell Gate at certain points be increased from 26 to 40 feet; to the Committee on Rivers and Harbors.

Also, memorial of State conference of mayors and other city officials, urging enactment of laws to regulate the food of the United States; to the Committee on Agriculture.

By Mr. GALLIVAN: Petition of South Boston Retail Grocers and Provision Dealers' Association, favoring measures to prevent the unnecessary holding or storing of food products; to the Committee on Agriculture.

Also, petition of the Boston Branch of the Association of Collegiate Alumnae, urging the creation of effective zones about all military camps within which the sale of liquor and the presence of prostitution are prohibited; to the Committee on Military Affairs.

By Mr. GANDY: Memorial of Federation of Women's Clubs of South Dakota, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Rhode Island State Federation of Labor, favoring passage of Lever food-administration bill; to the Committee on Agriculture.

Also, petition of Rhode Island Mule Spinners' Association, No. 3, against any interference with application of Burnett immigration law; to the Committee on Immigration and Naturalization.

Also, petition of Rhode Island Textile Council, favoring passage of Lever food-administration bill; to the Committee on Agriculture.

By Mr. LINTHICUM: Petition of the members of the Ancient Order of Hibernians, County Board of Baltimore City, Md., relative to the freedom and independence of Ireland; to the Committee on Foreign Affairs.

Also, petition of Woman Suffrage League of Maryland, urging the creation of the proposed suffrage committee in the House of Representatives; to the Committee on Rules.

Also, petition of the Blue Ribbon Candy Co., Baltimore, Md., in re the Senate Finance Committee's elimination of the drawback on sugar; to the Committee on Ways and Means.

Also, petition of Baltimore Photo-Engravers' Union; Metal Polishers, Buffers, and Platers' International Union of North America; and the National Federation of Post Office Clerks, favoring the passage of the Lever food-control bill; to the Committee on Agriculture.

Also, petition of Frey & Sons and of the Western Maryland Railway Co., in re the food-control bill; to the Committee on Agriculture.

Also, petition of Joyner, Witz Co. and S. Halle Sons, protesting against any increase in the letter-postage rate, without a liberal advance in the second-class rate; to the Committee on Ways and Means.

By Mr. LONERGAN: Petition of sundry citizens of East Glastonbury, Conn., favoring prohibition; to the Committee on the Judiciary.

Also, memorial of the Common Council of New Britain, Conn., asking passage of House bill 4961, food-control bill; to the Committee on Agriculture.

By Mr. McFADDEN: Petitions of 71 citizens of Bethany, 44 of East Troy, and sundry citizens of Noxen, all in the State of Pennsylvania, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. MAGEE: Petition of Prof. Perley O. Place and other professors of Syracuse University, Syracuse, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of George A. Wilson and W. W. Wilson, of the city of Syracuse, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MOORES of Indiana: Petition of Amelia Waring Plotter and 91 other residents of Indianapolis, Ind., praying for a sliding-scale war tax on all net incomes; to the Committee on Ways and Means.

By Mr. NOLAN: Petition of 15 officers of the Ancient Order of Hibernians in San Francisco, Cal., asking that hearings be held on the so-called Mason resolution, House joint resolution 88, calling on Great Britain to grant Ireland her freedom; to the Committee on Foreign Affairs.

By Mr. RANDALL: Petition of California yearly meeting of Friends' Church, Whittier, Cal., expressing unqualified approval of policy of President Wilson and Secretary of War to keep training camps morally and physically clean, and unanimously indorsing prohibition of liquor traffic; to the Committee on the Judiciary.

By Mr. SMITH of Michigan: Petition of W. E. Kidder, of Kalamazoo, Mich., in re the war revenue tax measure; to the Committee on Ways and Means.

By Mr. SNYDER: Petition of Trades Assembly of Little Falls, N. Y., favoring food-control bill; to the Committee on Agriculture.

Also, petition of Pomona Grange, of Herkimer County, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. STEENERSON: Petition of the Scandinavian Grand Lodge, Independent Order of Good Templars, Malung; 158 Epworth Leaguers of Bemidji; and the Frihetslocken, No. 75, International Order of Good Templars, of the town of Thompson, Kittson County, all in the State of Minnesota, urging the immediate prohibition of the manufacture and sale of alcoholic liquor for beverage purposes; to the Committee on the Judiciary.

By Mr. TAGUE: Petition of officers and members of Branch 9, Post Office Laborers' Association, Boston, Mass., and Boston Musicians' Protective Association, Local No. 9, American Federation of Musicians, favoring food-control bill; to the Committee on Agriculture.

By Mr. VARE: Memorial of citizens of the twenty-eighth ward, Philadelphia, Pa., favoring passage of the food-control bill; to the Committee on Agriculture.

Also, memorial of Philadelphia Local, Lithographers of America, protesting against increase in post-card postage rates; to the Committee on Ways and Means.

By Mr. WINSLOW: Petition of 155 railway workers of Worcester, Mass., favoring passage of food-control bills; to the Committee on Agriculture.

Also, petition of Women suffragists of the eighth Worcester representative district, favoring suffrage for women; to the Committee on the Judiciary.

By Mr. ZIHLMAN: Memorial of Mrs. May Gaylor, president of the Middletown (Md.) Woman's Christian Temperance Union, for the prohibition of the manufacture of intoxicating liquors; to the Committee on the Judiciary.

Also, memorial of Rev. W. S. Gerhard, Jefferson, Md., secretary of the Frederick County (Md.) Ministerial Association, for the prohibition of the manufacture of intoxicating liquors; to the Committee on the Judiciary.

Also, memorial of the Brook Hill Union Sunday School, of Frederick County, Md., for the prohibition of intoxicating beverages; to the Committee on the Judiciary.

SENATE.

SATURDAY, *June 23, 1917.*

(Legislative day of Friday, June 22, 1917.)

The Senate reassembled at 12 o'clock m., on the expiration of the recess.

CONSERVATION OF FOOD AND FUEL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Mr. CHAMBERLAIN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	Martin	Smith, Ariz.
Bankhead	Husting	Nelson	Smith, Ga.
Beckham	James	New	Smith, Md.
Broussard	Johnson, Cal.	Overman	Smoot
Chamberlain	Johnson, S. Dak.	Owen	Sutherland
Colt	Jones, N. Mex.	Page	Swanson
Culberson	Jones, Wash.	Penrose	Thomas
Cummins	Kellogg	Pittman	Thompson
Curtis	Kendrick	Poindexter	Townsend
Dillingham	Kenyon	Pomerene	Trammell
Fletcher	Kirby	Ransdell	Underwood
Gallinger	Knox	Reed	Vardaman
Gerry	La Follette	Saulsbury	Williams
Gore	McKellar	Shafroth	
Gronna	McLean	Sheppard	
Hale	McNary	Sherman	

Mr. CURTIS. I announce the absence of the Senator from Maryland [Mr. FRANCE] on account of illness. I ask that this announcement may stand for the day.

Mr. KIRBY. I desire to announce the unavoidable absence of the senior Senator from Arkansas [Mr. ROBINSON], and I ask that this announcement may stand for the day.

Mr. SHAFROTH. I wish to announce the absence of the Senator from South Dakota [Mr. STERLING], the Senator from California [Mr. PHELAN], and the Senator from Montana [Mr. WALSH] on committee work of the Senate.

Mr. SAULSBURY. I desire to announce that my colleague [Mr. WOLCOTT] is necessarily absent on official business.

Mr. SUTHERLAND. I desire to announce the absence of my colleague, the senior Senator from West Virginia [Mr. GOFF], on account of illness. I will let this announcement stand for the day.

Mr. McKELLAR. I wish to announce the absence of my colleague [Mr. SHIELDS] on account of illness.

Mr. SHEPPARD. I desire to announce that the senior Senator from New Jersey [Mr. HUGHES] is detained from the Senate by illness.

The VICE PRESIDENT. Sixty-one Senators have answered to the roll call. There is a quorum present.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of the Polk County Suffrage Campaign Committee of Iowa, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was referred to the Committee on Woman Suffrage.

He also presented the petition of H. L. Thigpen, of Fort Valley, Ga., praying for the regulation of prices of foodstuffs, which was ordered to lie on the table.

He also presented a petition of the Pattern Makers' League of North America and a petition of sundry citizens of Danville, Ill., praying for the passage of the so-called food bill, which were ordered to lie on the table.

Mr. THOMPSON presented a petition of the Anti-Saloon League of Kansas, praying for national prohibition, which was ordered to lie on the table.

Mr. NELSON presented a petition of sundry citizens of Wagdahl, Minn., praying for the conscription of wealth as well as of men, which was referred to the Committee on Finance.

He also presented a petition of the City Council of Duluth, Minn., and a petition of the congregation of the Welsh Presbyterian Church of Cambria, Minn., praying for national prohibition as a war measure, which were ordered to lie on the table.

Mr. PHELAN presented a petition of sundry citizens of Fresno, Cal., praying for national prohibition, which was ordered to lie on the table.

He also presented a petition of Local Branch United Brotherhood of Carpenters and Joiners' of San Jose, Cal., praying

for the enactment of legislation to prevent gambling in foodstuffs, which was ordered to lie on the table.

Mr. HALE presented a petition of the Chamber of Commerce of Bangor, Me., praying for the passage of the so-called daylight-saving bill, which was ordered to lie on the table.

He also presented resolutions adopted at a meeting of the congregations of sundry churches of Bangor, Me., favoring national prohibition of the liquor traffic and for the safeguard of soldiers from vice, which was ordered to lie on the table.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NELSON:

A bill (S. 2501) granting an increase of pension to Olive J. Thompson (with accompanying papers); to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 2502) granting an increase of pension to James M. Shuey (with accompanying papers); to the Committee on Pensions.

AMENDMENT TO PENDING BILL.

Mr. POINDEXTER submitted an amendment intended to be proposed by him to the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, which was ordered to lie on the table and be printed.

LIBERTY LOAN.

Mr. SWANSON. Mr. President, I read in the morning paper a statement by the Secretary of the Treasury regarding the subscription to the liberty loan. The statement shows that it was largely oversubscribed, a positive proof of the patriotic sentiment of the people. I should like to have the statement published in the RECORD for the information of the Senate.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

"The widespread distribution of the bonds and the great amount of the oversubscription constitute an eloquent and conclusive reply to the enemies of the country who claimed that the heart of America was not in this war. The result, of which every citizen may well be proud, reflects the patriotism and the determination of the American people to fight for the vindication of outraged American rights, the speedy restoration of peace, and the establishment of liberty throughout the world."

The following statement on the final result was furnished by the Secretary:

"The total of the subscription to the $2,000,000,000 liberty loan amounts to $3,035,226,850—an oversubscription of $1,035,226,850, or 50 per cent more than the amount offered.

"More than 4,000,000 men and women of the United States subscribed for the bonds, placing this vast sum of money at the disposal of their Government for the prosecution of the war. Of this number it is estimated that 3,960,000 people, or 99 per cent, subscribed in amounts ranging from $50 to $10,000, while the number of individual subscriptions of $5,000,000 and over was 21, their subscriptions aggregating $188,789,900.

"The figures as to the number of subscriptions are estimates, because the returns from the 12 Federal reserve banks in this respect are incomplete, but when finally reported they will exceed the number stated.

"One of the chief purposes of the campaign was to distribute the liberty bonds widely throughout the country and place them as far as possible in the hands of the people. This was important, because the strength of Government finance, like the strength of Government policies, rests upon the support of the people. The large number of subscribers, especially the large number of small subscribers, is most gratifying and indicates that the interest of the people was aroused as never before in an issue of bonds.

SHOWS AMERICA'S TEMPER.

"The Congress pledged all the resources of America to bring the war to a successful determination. The issue just closed will serve as an indication of the temper and purpose of the American people and of the manner in which they may be expected to respond to future calls of their country for the necessary credits to carry on the war.

"As originally announced, the present issue of bonds is limited to $2,000,000,000, and no allotments will be made in excess of that amount. I have consequently decided to exercise the right reserved in the announcement offering the bonds to the public to allot in full all applications for the smaller amounts and to reduce allotments on applications for the larger amounts. In view of the great number of subscribers for $10,000 and less, allotments will be made in full to them."

Mr. McAdoo made public the method of allotment of bonds to subscribers, and this is printed in an adjoining column. In cases where large subscriptions have been reported to the Federal reserve banks as consisting of a number of smaller subscriptions, provision has been made for allotment in accordance with the amounts of the smaller subscriptions.

Two subscriptions of $25,000,000 each were received and one, the largest subscription of all, for $25,250,000.

CONSERVATION OF FOOD AND FUEL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Mr. GALLINGER. Mr. President, during the speech of the Senator from Oregon [Mr. CHAMBERLAIN], who has charge of the bill which is now the unfinished business, I took occasion to offer a criticism to one section of the bill. The Washington Post gave currency to the report that I was to lead the opposition to the bill on the Republican side, which has been repeated by newspapers all over the country. As a result, I am receiving many letters from farmers and others expressing astonishment that I have joined the class of men who are supporting the food speculators of the country in their work of robbing the people. It is safe to assume that the men who are writing me have not read the bill nor the criticism that I made on one section of the measure.

Mr. President, I want simply to say a word to the effect that while I hope the bill will be amended in some particulars, as, indeed, I believe the bill will be amended, I have no intention of leading the opposition to the bill either as an individual Republican or as a representative of this side of the Chamber. I shall support the bill if it shall be shorn of certain objectionable features, and I feel so sure that those objectionable features will be eliminated from the bill that I feel warranted in saying that I shall give my support to the bill when the final vote shall be taken, as I approve of many of its provisions. Mr. Hoover, who is to be charged with the control of food matters, admits that the bill needs amendment, as also does the President.

I am not in the habit, Mr. President, as my colleagues know, of making personal explanations or of justifying any votes that I may cast in the Senate. I always take the responsibility as an individual Senator, and in this matter, as in all other matters, I shall follow my custom in that regard.

I believe, Mr. President, that no punishment is too severe for the men who are speculating in food products or in any of the other necessaries of life, and my influence, whatever it may be, will be exerted in favor of punishing those men to the extent of the law, or, if necessary, to a greater extent than the present law provides.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from North Dakota?

Mr. GALLINGER. I yield.

Mr. GRONNA. May I ask the Senator from New Hampshire if it is his understanding that there is any provision in the pending bill for the prosecution of a violation of any provision in the bill with respect to gambling in farm products?

Mr. GALLINGER. There are unquestionably penalties in the bill now under consideration. In addition to that I have supposed that the existing statutes were sufficient to reach these men if they were prosecuted with the vigor with which I think they ought to be prosecuted. The Sherman Antitrust Act, the Clayton Act, and the Federal Trade Commission act are bristling with severe penalties against this very class of offenders. Why the provisions of the existing law are not enforced by the Department of Justice surpasses my comprehension, but if additional legislation is needed, let it be offered as an amendment to this bill, and I will support it. If, as I have said, the bill needs amendment in the particular the Senator from North Dakota calls my attention to, he will find me a very willing helper in any proposition that he may make in that regard.

Mr. GRONNA. If the Senator will permit me——

Mr. GALLINGER. Certainly

Mr. GRONNA. I wish to say to the Senator that unless the bill has been changed from the form in which it was reported from the Committee on Agriculture and Forestry, of which I am a member, there is no such provision in the bill reaching anybody but the farmer.

Mr. GALLINGER. Then, of course, the bill is absolutely wrong, and if the Senator from North Dakota will offer an amendment correcting that omission I shall very gladly vote for it when it is presented.

Now, Mr. President, I have said all I care to say. I am not supersensitive about what the newspaper press may say about me; I am not particularly supersensitive about what people in my own State or in my own section of the country may feel concerning me, especially when they are laboring under a misapprehension; but I thought it my duty to state in a few words my attitude on this bill, and I shall look with a great deal of confidence to amendments to the bill that will enable me to give it my earnest and warm-hearted support.

Mr. REED. Mr. President——

Mr. CHAMBERLAIN. If the Senator will let me interrupt him for just a moment, I wish to say in reply to the Senator from New Hampshire that I hope he does not think I gave currency to any report that he was leading the opposition to the bill on the Republican side.

Mr. GALLINGER. Oh, no, Mr. President.

Mr. CHAMBERLAIN. So far as I have been able to learn the sentiment of Members of the Senate, there are Republicans and Democrats who are supporting it, and probably some of each who are opposing it. So it has not been made a party question, and I have not seen any evidence of any attempt on the part of the Senator to lead or to formulate anything like that.

Mr. GALLINGER. I did not at all imagine that my good friend the Senator from Oregon was responsible for the newspaper article. It was some enterprising newspaper man who wanted to exploit the notion that there was to be organized opposition on this side of the Chamber to the bill, and in that respect he did both me and my Republican associates a wrong in giving currency to a report of that kind.

Mr. POINDEXTER. I should like to suggest in this connection that there has been a great deal more opposition to the bill and more evidence of organized opposition to the bill on the Democratic side than there has been on the Republican side.

Mr. GALLINGER. Most certainly.

Mr. GORE. Will the Senator from Missouri yield to me for a moment?

Mr. REED. Certainly.

Mr. GORE. I should like to say that, so far as opposition on this side of the Chamber to the pending bill is concerned, I think the paramount object is to secure certain amendments that would render it even more efficient and less liable to constitutional, practical, and other objections.

Mr. GALLINGER. And that is precisely the attitude of some of us on this side of the Chamber.

Mr. REED. Mr. President, I am very sorry, indeed, that I have taken so much of the time of the Senate, but every conversation I have with Senators leads me to the opinion that a majority of the Members of this body have had their minds so occupied with other affairs, important committee engagements, and so forth, that they have been unable to give attention to an analysis of the bill, and that they have been inclined to take the articles and statements made with reference to it as a fair statement of what the bill contains. I do not expect to do much more than to challenge attention to the provisions of this remarkable measure. I stated on yesterday that Mr. Hoover himself expressed astonishment, or in substance expressed astonishment, at some of its provisions. I astonished a very wise and able Senator this morning when I overheard a dispute, one Senator asserting that the bill gave the power to regulate farm prices and the other one asserting there was nothing in the bill of that kind. The one who asserted there was nothing of that kind in the bill said at once, "I will refer you to Senator REED," and he was surprised beyond measure when I said to him that undoubtedly that power was contained in the bill. So I say to Senators here, all I am asking is that we shall all thoroughly understand this measure, and if we do I am very sure it will be amended, and amended in the most radical way.

Mr. BORAH. Mr. President——

Mr. REED. I yield to the Senator from Idaho.

Mr. BORAH. The Senator has just stated that the bill contains provisions authorizing the fixing of the prices of farm products.

Mr. REED. I say the power contained in the bill, if employed, will fix farm prices, and I intend to discuss that as I come to it. But if I may be permitted to begin where I left off on yesterday, I was carrying through as best I could a statement as to what is contained in the bill and had reached the point of section 12. Section 12 is what is known as the minimum-price-fixing section. I presume I ought to use the term "the price-guaranteeing section." I confess I can not see any difference between guaranteeing a minimum price and fixing a minimum price, but Mr. Hoover objected to the term "fixing a minimum price," and so I employ the term "guaranteeing." This section, Senators, demands some special consideration. I confess that I can see within it some possibilities of good, and yet I fear there are in it some great possibilities of evil. I simply call attention to it.

The section authorizes the guaranteeing of prices of agricultural products for a period of not exceeding three years, and gives authority to the food dictator to prescribe rules and regulations which must be conformed to by those receiving the benefit of such guaranty.

During the time such guaranty is in effect the President is authorized—and of course that will mean whoever is food regulator, controller, dictator, or whatever term we employ—to fix an import duty upon such products as are shipped into the United States which may compete with the articles upon which a guaranty has been given. The President is authorized to fix the amount of this duty without any action by Congress hereafter. It is an attempt absolutely to turn over to the executive department the taxing power of the Republic; that power which was clung to by the Commons of England through all the dark and bloody days of tyranny, and which they so employed at last as to transform the British Empire substantially into a republic. The author of this proposition broadly gives the right to the executive department to fix a tax, to say when and upon what article it shall be levied; and yet I doubt not there are Senators in this body who believe that is within the Constitution. I merely mention this point and pass on.

The object of levying this duty is, a price having been guaranteed to the farmer, if it shall transpire that the price is higher than the market price would otherwise be, that our Government may be preserved from loss by preventing any grain coming in from any other country. That may be a very good thing for the farmer if that situation arises, but what about the consumers of the great cities in our land? Does that not mean that during this period of time the price of foodstuffs shall be maintained at a higher level than that at which it otherwise would be? Does it not mean that every man who toils shall, during the period when this tax is being levied, in order to keep prices up be compelled to pay a greater price? If so, is it not time that the representatives from the great cities should give some attention to what may possibly happen to their own people?

It is suggested to me by the Senator from Oklahoma [Mr. GORE], who has given much study to this measure, that in England and France the Government absorbs this additional price, takes it off the consumer and places it as a general burden upon the Government; but in this country it is proposed to take it out of the pockets of the poor of the cities, provided a higher price is guaranteed than comes to exist as a general price throughout the world. Senators may think that is wise, but it certainly is entitled to very serious consideration.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from North Dakota?

Mr. REED. I do.

Mr. GRONNA. I am very much interested in what the Senator from Missouri is saying. I want to ask him if he understands that section 12 of the bill provides for any specific price to be fixed or guaranteed to the producer?

Mr. REED. Oh, no.

Mr. GRONNA. It is left absolutely to the official, who, of course, would be the price fixer.

Mr. REED. I intend to discuss that; in other words, I intend to show that the farmers of the United States are to have their entire destiny placed in the control of one man absolutely, and that he can bring to them plenty or bankruptcy.

Mr. GRONNA. If the Senator will permit me further, is it the understanding of the Senator that the farmers have asked for this price fixing or guaranteeing of prices?

Mr. REED. I can not speak for the farmers. I listened the other day to a very distinguished gentleman, who told me that he had already conferred with all the millers of the United States, and that the millers were ready to do certain things. Then, when I asked him how many millers he had talked with he said 11 out of 5,000, but he said they were here in a representative capacity; that is, they were presidents of some associations. He likewise undertook to speak for all the elevator men of the United States, when he had seen about the same proportion of them. I think we shall find there is some grave disappointment when we come to undertake to speak for any class of people. Therefore I do not undertake to speak for the farmers.

Mr. GRONNA. I agree with the Senator. I do not claim to speak for the farmer, but I represent a constituency consisting mainly of farmers.

Mr. REED. The Senator from North Dakota is himself a farmer.

Mr. GRONNA. I will say to the Senator from Missouri that the farmers of my State have asked to be let alone; they have not asked for this price fixing.

Mr. REED. Mr. President, I desire to get along as rapidly as I can, for there are other matters of more importance than this.

In order to maintain this minimum price thus guaranteed the President is authorized to hold, transport, sell, store, or dispose of the agricultural products aforesaid. In a word, the Government is authorized to create and maintain high prices to the consumer in order to make up for high prices guaranteed to the producer, and to do this by an import duty and by the very process of hoarding against which this bill levels its anathema.

If one of Mr. Hoover's agents or the Government's agents undertakes to take possession of your property, your mine, or your farm, and you in any way resist him, you are liable to a fine of $1,000 and to be sent to the penitentiary for a year.

This astonishing provision is written on the very face of the measure.

To carry out these beneficent objects, $2,500,000 is appropriated for the purpose of the payment of rent, the expense of printing and publication, the purchase of material and equipment, and the employment of such persons and means in the city of Washington and elsewhere as are deemed essential. (Sec. 18.)

Section 19 provides "That for the purposes of this act the sum of $150,000,000 is hereby appropriated out of any moneys in the Treasury not otherwise appropriated, to be available immediately and until expended: *Provided*, That no part of this appropriation shall be expended for the purposes described in section 18."

Here is a modest appropriation of $150,000,000 without the slightest limitation or information or knowledge with reference to its expenditure.

There is no word in the bill suggesting for what this $150,000,000 is to be used; but Mr. Hoover in his testimony stated, in effect, that it was to be employed to purchase in the open market the products the prices of which the Government intended to control.

Mr. GALLINGER. Will the Senator permit me to interrupt him?

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from New Hampshire?

Mr. REED. I do.

Mr. GALLINGER. There is one thing certain regarding that $150,000,000, I apprehend, and that is that it will be added to the burden of taxation which the people of this country will have ultimately to pay.

Mr. REED. Oh, certainly.

Let me put this bill in a sentence, though a somewhat long one:

Under its provisions when Mr. Hoover is once appointed, he can seize and control the production, distribution, and consumption of all foods, feeds, fuel, and articles required for their production; he can likewise seize all mines of coal, iron, lead, zinc, and copper; he can seize every article of fuel and commandeer the lumber business of the country; he can seize every factory engaged in manufacturing the necessaries aforesaid, including their secret processes; he can control their financing, a power which could be readily so stretched as to interfere with the banks, great and small; he can enter the homes of the citizens, provide what they shall have upon their tables, the kind of food they shall eat, the amount they may feed their children; he can take possession of businesses, wholesale and retail, and regulate the profits; he can compel a complete industrial and financial servitude; he can set himself up as the financial and industrial overlord of the United States, and any citizen who fails to comply with his autocratic demands, or who attempts to resist his processes within the scope of his authority as above stated, may be heavily fined and incarcerated in the penitentiary.

I add one further thing. He—and, of course, all this is done in the name of the President—can levy a tax without coming to Congress, fix the amount of that tax, and specify the articles upon which it is to be laid.

Such a bill, Mr. President, would be treated with mingled astonishment and derision if it were not for the fact that for weeks the public has been told that the present high cost of living is due to wicked food speculators who have cornered the food of the country, advanced prices, impoverished the consumer, and brought famine to the homes of the poor, and that the bill proposes to put these villains out of business.

Mr. President, every great newspaper, every cartoonist, every man apparently who just now is wielding the pen is engaged in telling the public just what I have here epitomized. I have sent out letters to a large number of mayors of cities, which I intend to put in the RECORD, and almost without exception the replies show that, instead of starvation and want, there is a better condition in American cities to-day than there has been for many years; but I do not intend to go into that at this time.

This claim is, indeed, the chief stock in trade of the advocates of the bill; without it they would get nowhere.

Mr. President, everybody is for a bill that will put the speculator out of business. I mean "speculator," using the term in its wicked sense; the man who seeks to forestall, the man who seeks to gather in his own hands the control of food, the man who is engaged in extortion—all that class of men—and I will go as far as any who goes farthest in that respect. When three years ago we were discussing the Clayton bill, and I was urging that provisions of that kind should go into the bill and that that instrument should have some teeth in it, when Congress was engaged in drawing the teeth, I was being denounced as a sort of wild man from the West, who wanted to destroy business in the country, and by the same papers that are now taking up this clamor.

Mr. President there is always speculation in one sense in everything merchantable, and also there has been undoubtedly an accelerated speculation in recent months. This is not to be questioned; but if the speculators exist in such numbers, and have so conspired and acted together as to be able to control the food products of 100,000,000 people, then the fact of the conspiracy and those concerned in it must be known. A fact of that magnitude could not be concealed. I appeal for the employment of common sense.

If the fact is so well known and admitted as to warrant congressional action and to demand the appointment of a food dictator, why have not the conspirators been brought to condign punishment?

What has become of the great Federal Trade Commission, that was loudly heralded by some of the gentlemen who are now most earnest in their advocacy of this bill as the complete remedy for all forms of unfair competition; a commission that was described as a supreme court of commerce, and that we were told would prevent extortion and overreaching of every kind, and would usher in the day when business would be conducted in accordance with the principles of the golden rule?

Is it not fair to conclude that the fact of the conspiracies is in doubt or that the Trade Commission is a fizzle?

Oh, there arises before my mind the picture of the Senator from Nevada and the Senator from Texas and other Senators who denounced all those who questioned the wonderful efficacy of this commission as those who were unwilling to take progressive and forward steps. I remember how at that time, when I said that I doubted the wisdom of the creation of this body, I was then, as now, held up before the world as an example of a man who was fighting the administration; and yet I did much more to help, I think, in my humble way—and I claim no special credit—the success of my party than some of these papers that in the last campaign were denouncing President Wilson as a dangerous man and unfit for reelection, but who are now deifying him, saying that everything he does is right, and laying at his door not that which has come from his brain, but that which has been prepared in some department by some cheap lawyer who could not make a living at home, and who came to this town to get a job because he could not meet the fair competition in his own town. But I digress.

Likewise I inquire what has happened to the Department of Justice? Its powers under the law are of the most ample kind.

The Sherman Antitrust Act declares:

SECTION 1. Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States or with foreign nations is illegal.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine, or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States or with foreign nations shall be deemed guilty of a misdemeanor.

The Clayton Act extends and strengthens the Sherman Act. I do not pause to quote its provisions.

The Federal Trade Commission act, passed September 26, 1914, empowers the commission—

SEC. 5. Whenever it shall have reason to believe that any person, partnership, or corporation engaged in commerce has been or is using any unfair method of competition in commerce, and it shall appear that a proceeding in respect thereto would be to the interest of the public, then the board may proceed to summon before it the guilty parties, take testimony, and issue orders for a discontinuance of such practices.

And we were told that the phrase "any unfair method of competition in commerce" reached out its legislative arm and grasped and controlled all the wretches in the world who were guilty of any kind of extortion.

But I pass on.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from North Dakota?

Mr. REED. In a moment. I wish the Senator would let me finish this theme, and then I shall be glad to yield to him.

Whatever may be said of the Clayton Act or of the Trade Commission act, the fact remains that an attempt to corner any staple commodity, even by purchases upon the board of trade, is in violation of law and can be punished. This was expressly held by the Supreme Court of the United States in October, 1912, in the case of United States *v.* Patten (226 U. S., 525). I quote from the syllabus:

A conspiracy to run a corner in the available supply of a staple commodity which is normally a subject of interstate commerce, such as cotton, and thereby to artificially enhance its price throughout the country, is within the terms of section 1 of the antitrust act of July 2, 1890.

I read very briefly from the context, at page 540:

We come, then to the question whether a conspiracy to run a corner in the available supply of a staple commodity, such as cotton, normally a subject of trade and commerce among the States, and thereby to enhance artificially its price throughout the country and to compel all who have occasion to obtain it to pay the enhanced price or else to leave their needs unsatisfied, is within the terms of section 1 of the antitrust act, which makes it a criminal offense to "engage in" a "conspiracy in restraint of trade or commerce among the several States." The circuit court, as we have seen, answered the question in the negative; and this, although accepting as an allegation of fact rather than as a mere economic theory of the pleader, the statement in the counts that interstate trade and commerce would necessarily be obstructed by the operation of the conspiracy. The reasons assigned for the ruling and now pressed upon our attention are (1) that the conspiracy does not belong to the class in which the members are engaged in interstate trade or commerce and agree to suppress competition among themselves; (2) that running a corner, instead of restraining competition, tends, temporarily at least, to stimulate it; and (3) that the obstruction of interstate trade and commerce resulting from the operation of the conspiracy, even although a necessary result, would be so indirect as not to be a restraint in the sense of the statute.

Upon careful reflection we are constrained to hold that the reasons given do not sustain the ruling and that the answer to the question must be in the affirmative.

* * * * * * *

It was a conspiracy to run a corner in the market. The commodity to be cornered was cotton, a product of the Southern States, largely used and consumed in the Northern States. It was a subject of interstate trade and commerce, and through that channel it was obtained from time to time by the many manufacturers of cotton fabrics in the Northern States. The corner was to be conducted in the Cotton Exchange in New York City, but by means which would enable the conspirators to obtain control of the available supply and to enhance the price to all buyers in every market of the country. This control and the enhancement of the price were features of the conspiracy upon the attainment of which it is conceded its success depended. Upon the corner becoming effective, there could be no trading in the commodity save at the will of the conspirators and at such price as their interests might prompt them to exact. And so, the conspiracy was to reach and to bring within its dominating influence the entire cotton trade of the country.

Bearing in mind that such was the nature, object, and scope of the conspiracy, we regard it as altogether plain that by its necessary operation it would directly and materially impede and burden the due course of trade and commerce among the States and therefore inflict upon the public the injuries which the antitrust act is designed to prevent. (See Swift & Co. *v.* United States, 196 U. S., 375, 396–400; Loewe *v.* Lawlor, 208 U. S., 274; Standard Oil Co. *v.* United States, 221 U. S., 1; United States *v.* American Tobacco Co., 221 U. S., 106.)

* * * * * * *

As we are of opinion that the statute does embrace the conspiracy which the circuit court treated as charged in counts 7 and 8, as construed by it, its judgment upon those counts is reversed and the case is remanded for further proceedings in conformity with this opinion.

Mr. President, the power, then, undoubtedly exists now to grasp every man who has tried to corner necessities that are to be employed in interstate commerce; and I ask again, Where has the Department of Justice been, if the conspiracy is so wide and general as to have affected the prices in every city of the United States?

Mr. GRONNA. Mr. President——

Mr. REED. I yield to the Senator from North Dakota.

Mr. GRONNA. Speaking of the act creating the Federal Trade Commission, I want, with the permission of the Senator, to call his attention to a certain specific case, and a very important one.

The Senator will remember that a great deal was said about the high price of twine and cordage, and some of the Members of this body fixed the blame upon the American manufacturers. A committee of this body was appointed, consisting of the Senator from Louisiana [Mr. RANSDELL], the Senator from New York [Mr. WADSWORTH], and myself. This committee held hearings for 30 days. We heard all the testimony. We had witnesses here from all these manufacturers, and we had witnesses here from Yucatan. The fact was established that there was a monopoly, or trust, but it was not in this country. It was a foreign trust, consisting of the people of Yucatan.

The Federal Trade Commission and the Department of Justice have all these facts. This trust raised the price of raw material, the sisal hemp, from 6¼ to 19¼ cents per pound. Does the Senator believe that any of the provisions of this bill will help to solve the problem of the farmer who has to buy this twine, running up at the old price to about $20,000,000, and at the new price now to about three times that much, which of course naturally adds to the cost of the production of food?

Mr. REED. So as to get the farmer cheap twine?

Mr. GRONNA. Yes.

Mr. REED. I do not see how the bill would help along that line. I thank the Senator for his contribution, but I am discussing the legal proposition now, or rather the powers we have under the law and the machinery; and I have referred to the Trade Commission and to our Federal machinery.

Mr. GRONNA. Mr. President, I do not wish to disturb the Senator unduly, but this is a legal proposition.

Mr. REED. Then let me discuss it as a separate proposition, please, a little later. Just now I do not want to be diverted.

Mr. GRONNA. No; I do not wish to take the Senator's attention away from his speech; but it is a legal proposition, and the Department of Justice have all these facts, and we ought to know whether or not the condition can be remedied.

Mr. REED. I shall be glad to return to that later.

But, Mr. President, the Federal Trade Commission and the Department of Justice at Washington are not the only forces that this nation-wide conspiracy to raise prices and to forestall the market must confront.

Forty-eight States have laws condemning pools, trusts, combinations, conspiracies, restraints of trade, forestalling, and extortion. Forty-eight States have governors, some of whom must honestly desire to protect their people. Forty-eight States have attorneys general, some of whom must be honest. Forty-eight States have constabularies, some of whom must be efficient. Is it not singular that some of these have not apprehended the culprits?

And yet the story is not told. There must be more than 3,000 prosecuting attorneys who have power to drag before as many grand juries the wretched culprits who, in their respective districts, have by act or word aided, abetted, or assisted in the formation or carrying out of the villainous conspiracy to rob and starve the American people. Yet, instead of a perfect flood of indictments, there has only been an occasional prosecution.

To say that a crime is so universal as to rob the consumers of an entire Nation, and yet that it can not be detected and its authors indicted, is to indict the Government for inefficiency and failure.

If this country is being robbed in the manner asserted, then I demand to know why the Department of Justice does not instantly act. Has the country come to so miserable an estate that it must admit that the machinery of the law has broken down; that the arm of justice is paralyzed; and that the only way it can protect the people against the extortions of the food swindler is to appoint a dictator and take possession of the food alike, whether owned by honest men or rogues?

But, Mr. President, in addition to the laws to which I have called attention, I recur to the fact that some three weeks ago we passed in the Senate a bill that came to us from the House. We passed it with an amendment known as the Nelson amendment. That amendment gives to our Government the authority to close any grain exchange where grain is being cornered, where trade is being carried on dishonestly, or where the practices exist against which we are told that this legislation is leveled; and yet I charge that the author or the man who takes the responsibility for the authorship of the bill now before us has held up that bill containing that provision in the House of Representatives. I made the charge yesterday, and as a news item the Washington Star of last night contained a similar statement. Moreover, it is held up lest, if we pass that amendment, there will be no necessity for this bill.

On the other hand, Mr. President, if it be asserted that there has been no general conspiracy, and yet that there has been a general rise of prices in numerous articles, this is to admit that there is in operation one or more general causes which have led hundreds of thousands of people to act in the same way and at the same time. Such a condition can be met only by a removal of the cause. There are, in fact, a number of general causes which can no more be legislated out of existence than the order of King Canute could avert the rising tide.

What are some of these general causes?

First. There has been an enormous increase in the money of the world.

It is now generally conceded that the law of Profs. Fisher, of Yale, and Kemmerer, is correct. That law is—

The prices of commodities are dependent upon the money in circulation, multiplied by the velocity of circulation, plus the credits (bank deposits subject to check) multiplied by their velocity of circulation. (American Produce Exchange Markets, September, 1911, pp. 166–173.)

That is to say, the volume of money, together with the rapidity with which it moves; the amount of credit money, which is checks, drafts, and so forth, based upon deposits, together with their rapidity of movement, fixes the prices of commodities.

Mr. President, it is now generally admitted that that law is correct; and let me, if you please, apply it to present conditions. Before I do so I call attention to the fact that Prof. Seligman, of Columbia, agrees in substance with this law. This is the day of college professors. You can not get to be an aviator now without a diploma. He says:

It is obvious, then, that apart from the minor oscillations in any one commodity a general change in the level of prices can be explained only by a cause which attaches equally to all prices. Now, price in general is value expressed in terms of money; hence a general change in the price level means a change in the value of money. But the value of money, like the value of everything else, depends upon the relation of the supply of money to the demand of money. From the

point of view of supply the answer is easy. The standard of the civilized world is now, and has been for some time, gold. * * * Gold, in other words, is being turned out in such enormous quantities that it is falling in value. But a fall in the value of gold, other things being equal, is tantamount to a rise in general prices.

What, now, are the facts with reference to the increase in the volume of the world's money as credit and in the rapidity or velocity of trade? I wish I might have the attention of the Senate. This giving absent treatment to a United States Senator is an exceedingly discouraging method of practice.

Mr. KING. Would the Senator have me call for a quorum?

Mr. REED. I do not care about that. But what are the facts? Since 1912 the circulation of all kinds of money has increased, as is shown in the annexed table. It will be observed that when the war began the average per capita circulation in the United States and the countries of our allies, taking them all together, was $24.37.

Mr. MARTIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. TRAMMELL in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	James	McNary	Smith, Ga.
Beckham	Johnson, Cal.	Martin	Smith, Mich.
Borah	Johnson, S. Dak.	Nelson	Smoot
Broussard	Jones, N. Mex.	New	Sutherland
Chamberlain	Jones, Wash.	Overman	Swanson
Culberson	Kellogg	Page	Thomas
Cummins	Kendrick	Penrose	Thompson
Curtis	Kenyon	Pomerene	Townsend
Fletcher	King	Ransdell	Trammell
Gallinger	Knox	Reed	Wadsworth
Gore	La Follette	Shafroth	Warren
Gronna	McCumber	Sheppard	
Hale	McKellar	Sherman	
Husting	McLean	Smith, Ariz.	

Mr. SHAFROTH. I desire to announce that the junior Senator from Nevada [Mr. PITTMAN], the senior Senator from California [Mr. PHELAN], the junior Senator from Minnesota [Mr. KELLOGG], and the junior Senator from Montana [Mr. WALSH] are absent on official business in connection with committee work.

Mr. McKELLAR. I wish to make the same announcement as before, and let it stand for the day, in reference to the absence of my colleague [Mr. SHIELDS] on account of sickness.

Mr. RANSDELL. I wish to announce the absence of the junior Senator from Mississippi [Mr. VARDAMAN] on official business.

The PRESIDING OFFICER. Fifty-three Senators have answered to their names. There is a quorum present. The Senator from Missouri will proceed.

Mr. REED. Mr. President, I have just called attention to the fact that it is now admitted that the price of commodities depends upon the volume of money, multiplied by the velocity of circulation, plus the volume of credits, multiplied by their velocity of circulation. Bearing that in mind, I call attention to the fact that since 1912 the circulation of all kinds of money has increased, as is shown in a table to which I invite your attention. It will be observed that when the war began the average per capita circulation in the United States and the countries of our allies, all added together and averaged, was $24.37. It is to-day $48.45, and yet gentlemen are astonished at the rise in prices. There is an increase of approximately 100 per cent in the circulation of money in the countries of the allies and in our own country. The circulation of Germany has increased, according to the latest figures I could obtain, from $21.36 to $44, an increase of more than 100 per cent. I have not the figures for Austria, but it is safe to say the increase there has been greater than in Germany. Thus we find that in the greater part of the civilized world the circulation of money has substantially doubled.

The per capita circulation of the United States has actually increased in three years from $32.98 to $45.49. In the past year alone it has increased nearly $6 per capita.

I append a table showing the circulation of the United States and our allies and Germany in 1912, 1913, 1915, and 1917:

	1912	1913	1915	1917
United States	$32.98	$35.18	$39.58	[1] $45.49
United Kingdom	21.21	23.62	28.38	40.00
France	48.91	48.63	83.06	[2] 93.00
Germany	21.36	19.29	21.84	[3] 44.00
Italy	13.09	8.82	26.97	[4] 30.00
Russia	6.45	5.63	11.39	[5] 33.78

[1] June 1, 1917. [2] May 10, 1917. [3] May 7, 1917. [4] May, 1917. [5] April, 1917.

Let me call attention to the table specifically. The small figures I shall call now will be for the year 1912, the large figures for the year 1917.

United States, $32.98; present volume, $45.49.

United Kingdom, $21.21; present volume, $40 per capita.

France, $48.91; present volume, $93. That was the amount on May 10, 1917.

Germany, $21.36; and on May 7, 1917, $44.

Italy, $13.09, which dropped for some reason to $8.82 in 1913, and then $26.97 in 1915, and went to $30 in the month of May, 1917.

Russia, $6.45 in 1912, $5.63 in 1913, $11.39 in 1915, and $33.78 in April, 1917.

In the figures given for the United Kingdom in the above table I have in the absence of other data assumed the stock of gold of England to be the same in 1917 as it was in 1916. A large proportion of this increase has been in paper money. I append a table showing the per capita increase in paper money:

Per capita paper currency.

	1912	1913	1915	[1] 1917
United Kingdom	$2.54	$2.56	$9.72	$20.00
France	8.23	8.22	37.85	93.00
Germany	4.03	4.22	11.19	44.00
Italy	5.25	.60	16.65	30.00

[1] Approximate.

The United Kingdom ran up from $2.54 per capita in 1912 to approximately $20 in 1917; France, from $8.23 in 1912 to $93 in 1917; Germany, from $4.03 to $44; Italy, from $5.25 to $30.

Let us consider it from the question of volume. I call attention to the fact that in the United Kingdom on May 30 last they had in circulation of paper money $948,787,000; in Russia on April 21—listen to these figures—$5,744,089,000; Germany on May 7, $2,996,420,000; France on May 10, $3,720,108,000. I append it in tabular form:

United Kingdom on May 30 had in circulation	$948,787,000
Russia, April 21	5,744,089,000
Germany, May 7	2,996,420,000
France, May 10	3,720,108,000

This stupendous increase in paper money has been accompanied by a movement on the part of all European Governments, save England, to substantially retire and hoard into banks gold and silver so that the business of these countries is almost entirely done on paper or other depreciated forms of money. Indeed, it is said that even in England they are using a species of money resembling our old-time shin plasters, and which they designate as "luggage checks," while in Germany they are actually employing iron in making subsidiary coin.

The Swiss Bankeverein gives the following table:

	Gold increase.	Paper increase.
	Per cent.	*Per cent.*
Great Britain	106.6	544.0
France	25.1	175.6
Russia	104.0	426.0
Italy	[1] 26.03	144.6
Japan	53.0	49.7
Germany	93.0	359.3
Austria-Hungary	.....	189.0
Total	57.6	268.0

[1] Decrease.

The period covered in the table is from the end of June, 1914, to the end of 1916, and of course does not show the full increases because since the end of 1916 there have been further large increases, but the total is sufficiently astonishing.

Mr. OVERMAN. Has the Senator made any estimate of the volume of gold in the different countries as compared with the issue of paper money?

Mr. REED. Yes; I have that also. In Great Britain the gold increase in this period of time was 106.6 per cent, but its paper increase was 544 per cent. In France the gold increase was 25.1 per cent, but its paper increase 175.6 per cent. In Russia the gold increase is given at 104 per cent and its paper increase 426 per cent, but it does not embrace the recent addition. In Italy there was a gold decrease of 26.3 per cent and a paper increase of 144.6 per cent. In Japan there was a gold increase of 53 per cent and a paper increase of 49.7 per cent. In Germany there was a gold increase of 93 per cent and a paper increase of 359.3 per cent. But, I repeat, those figures are back in the year 1916, and undoubtedly there has been a much larger increase since.

In Austria-Hungary the gold increase I could not obtain, but there has been a paper increase, or was up to the time these figures were obtained, of 189 per cent. Taking the average for

these countries, there was a total gold increase of 57.6 per cent, and a paper increase of 268 per cent.

Mr. SMITH of Georgia. How much gold?

Mr. REED. I did not separate that. Our increase is largely gold. It must be so.

Mr. President, that only expresses one side or phase of this question, that is, the money, but equally important, more important indeed is the question of credit, because everybody is coming to know that if a man puts a thousand dollars in a bank and checks against it constantly the $1,000 in the bank counts as money, and yet his checks are performing the office of money within their limited sphere.

I am unable to do more than to estimate the amount for the United States. The only record kept is of the clearing-house transactions which, of course, are limited to the few cities having such organizations. Yet in those cities it will be observed that the bank clearings which were only $168,506,000,000 in 1912 amount to $304,367,539,500 in 1917.

CHECK AND DRAFT TRANSACTIONS.

No record is kept of the check and draft transactions of the country. The closest estimate of these transactions obtainable is shown by clearing-house transactions, which record only the bills of exchange passing between banks.

The clearing-house transactions as shown by the reports of the Comptroller of the Currency for several years ending September 30 are exhibited in the table which I ask leave to insert without reading.

The PRESIDING OFFICER (Mr. KING in the chair). Without objection, it is so ordered.

The table referred to is as follows:

1911	$159,508,000,000
1912	168,506,000,000
1913	173,765,000,000
1914	163,975,000,000
1915	162,777,000,000
1916	241,407,000,000

Mr. REED. Notice that the figures for the year of 1917 to compare with the above figures are not available, because the above figures are given for years ending September 30. However, in the 8-month period from October 1, 1916, to June 1, 1917, the total bank clearings were $202,911,693,000, as compared with $159,119,076,000 for the corresponding 8 months of the previous year, an increase, stated roughly as I look at the figures now, of something like 30 per cent in one year's time.

There are further figures along this line which I ask leave to insert in the RECORD.

The PRESIDING OFFICER. Without objection, permission to do so will be granted.

The matter referred to is as follows:

According to the amount above set forth for the 8 months ending June 1, 1917, bank clearings for 1 month or one-eighth that amount would be $25,363,961,625, as compared with bank clearings for 1 month during the corresponding period of the previous year, which were $19,889,884,500; and the monthly clearings, as shown above for the past 8 months, multiplied by 12 months, which would give approximately the figures for 1917, gives a total of $304,367,539,500.

Mr. REED. Take the deposits of the national banks alone for the United States, and they show an enormous increase. I shall append a table to my remarks which I ask leave to print.

The PRESIDING OFFICER. Without objection, the table referred to will be printed in the RECORD.

The table referred to is as follows:

Increase of total gross deposits in national banks.

June, 1913	$6,015,200,000
June, 1914	6,359,200,000
June, 1915	6,611,300,000
June, 1916	8,143,000,000
March 5, 1917	9,273,800,000

Mr. REED. I call attention to the fact that in June, 1913, the total gross deposits of the national banks were $6,015,200,000, and on March 5, 1917, they were $9,273,800,000. Thus in two years' time has come this mighty increase in the volume of deposits in the national banks.

The full effect of the foregoing increases can not be appreciated without considering the fact that the trade has been more active, and consequently the velocity of circulation more rapid than probably at any period of the world's history.

Taking these facts all together, every candid and thoughtful man must admit that in the single cause of increased money and credits is to be found one of the principal reasons for an advance in prices. But I am not without authority for this statement. The London Economist, commenting on the figures contained in the last table, stated that even in England, which has been the most conservative of all foreign countries, the "inflation has already done much harm by raising discontent in the country and increasing the cost of the war owing to the rise in prices that it has helped to cause." (Information Quarterly, Apr. 17, p. 35.)

The Economic Journal—the journal of the Royal Economic Society, for December, 1916—discusses the effect of inflation on prices. The author's conclusions are summed up at page 439, as follows:

There has been a general conformity between the increases of our note issues and the rise in prices in the United Kingdom. The increase in prices as shown by the index numbers has followed the increases of the notes. The issues of treasury notes and certificates have exceeded the gold displaced from actual circulation. The notes of the Scottish banks (with governmental paper reserve in place of gold) have largely increased. In spite of the 10-shilling notes, more silver coins have gone into circulation. There has been a continuous rise in wages (taking the family as the wage-earning unit) and in retail prices of all kinds. In general, the movement in prices is of the character associated with overissues of inconvertible paper, such as has taken place in the other belligerent countries. The rise in prices in the United States was for a time hardly appreciable, and is still very much less than in the United Kingdom.

This article was written in 1916 in the month of December.

I now call the attention of thoughtful Members of the Senate and the attention of the country, to the fact—and yet this will, I fear, not go to the country, for it is a fact that is not in accordance with the whim of the hour, but it must be reckoned with as one of the eternal laws of economics, namely, that we must look to this general world condition of money as being one of the chief reasons for the rise of prices.

I add this now, lest I may forget it later on, that another law of finance is, that cheap money drives out good money. Accordingly it is not difficult to understand why, in countries that have inflated their currency by the issuance of paper, the business of such countries being conducted with paper, the gold naturally flows to the United States; so we are accumulating vast hoards of gold in our own country; but when that gold is so accumulated, it likewise swells prices, for, after all, to use the argument of the old financial days, money is the yardstick by which prices are measured; and yet you can not get a modern doctor, who has a cure for every ill ready on his shelves, corked, labeled, and blown in the bottle with the name of its author, to give consideration to this world-wide state of affairs. You can not get Congress to pause and listen to these facts, which can no more be overcome by extraordinary remedies of any kind than you can overcome any law that is fundamental and based upon eternal truths.

Now, Mr. President, there is a second great cause, namely, a world shortage. Bradstreet, comparing the crop of 1916 with the crop of 1915, declared that there was a decrease in Europe, the United States, Canada, Argentina, and Australasia of a total of 986,000,000 bushels. I ask leave to print the table with its details.

The PRESIDING OFFICER. Without objection, the order will be made.

The table referred to is as follows:

[From the Literary Digest, Mar. 17, 1917, p. 785.]

Total decrease—	Bushels.
In Europe	290,000,000
In the United States	368,000,000
In Canada	176,000,000
In Argentina	92,000,000
In Australasia	60,000,000
Total	986,000,000

Mr. REED. As an offset to this it is calculated that we have on hand a much larger supply than is usually carried over. Nevertheless, the shortage is sufficient to account for the very great increase in the price of wheat.

Mr. President, I decline to go on, and I move that the Senate adjourn.

Mr. CHAMBERLAIN. I suggest the absence of a quorum.

Mr. REED. Well, I will withdraw the motion to adjourn, if the Senator desires to make that suggestion.

Mr. SMITH of Georgia. The suggestion of the absence of a quorum can not be withdrawn.

Mr. REED. I understand that; but I say that I withdraw my motion to adjourn.

The PRESIDING OFFICER. The motion to adjourn is withdrawn. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	James	Martin	Sterling
Bankhead	Johnson, Cal.	New	Stone
Borah	Jones, Wash.	Overman	Sutherland
Chamberlain	Kendrick	Page	Swanson
Culberson	Kenyon	Ransdell	Thomas
Curtis	King	Reed	Thompson
Fletcher	Knox	Sheppard	Townsend
Gore	McCumber	Sherman	Underwood
Gronna	McKellar	Smith, Ga.	Warren
Hale	McNary	Smoot	

Mr. THOMPSON. I desire to announce that the junior Senator from Mississippi [Mr. VARDAMAN] is detained on official business.

Mr. STERLING. I announce the absence of the Senator from California [Mr. PHELAN], the Senator from Montana [Mr. WALSH], the Senator from Wisconsin [Mr. HUSTING], the Senator from Nevada [Mr. PITTMAN], and the Senator from Colorado [Mr. SHAFROTH] in attendance on a meeting of the Committee on Public Lands.

The PRESIDING OFFICER. Thirty-nine Senators have answered to their names. There is not a quorum present.

Mr. CHAMBERLAIN. I ask that the names of the absentees be called.

The PRESIDING OFFICER. The Secretary will call the names of the absent Senators.

The Secretary called the names of the absent Senators, and Mr. POMERENE, Mr. SHAFROTH, Mr. SMITH of Maryland, Mr. WALSH, and Mr. WEEKS answered to their names when called.

Mr. HUSTING, Mr. CUMMINS, Mr. COLT, Mr. WADSWORTH, Mr. LA FOLLETTE, Mr. OWEN, Mr. PHELAN, and Mr. SIMMONS entered the Chamber and answered to their names.

Mr. PHELAN. I desire to announce that the Public Lands Committee is in session, and that the Senator from Nevada [Mr. PITTMAN] is detained in attendance upon that committee.

The PRESIDING OFFICER. Fifty-two Senators have answered to their names. There is a quorum present.

Mr. REED. Mr. President, a third cause for high prices, universal in its effect, is the existence of the European war. Wars invariably stimulate prices. They always lead to the hoarding of foodstuffs. They create alarms, interfere with transportation, and in a hundred ways are calculated to increase the price of everything, including wages. I do not intend to go into any elaborate discussion of that point. It is self-evident, and is borne out by all history.

Fourth. The alarmist has been abroad in the land. Even Mr. Hoover a few days ago, in giving his testimony, said:

We now have a high cost of living in this country beyond the abilities of certain sections of the population to withstand and to secure proper nourishment from the wage level of the country.

And in substance and effect his testimony would lead to the opinion that our country is liable to experience great suffering. On the floor of the Senate I have heard statements to the effect that grim want is at our door, and yet these statements are plainly exaggerations. Their effect is illustrated by certain market quotations, which, together with explanatory comment, I ask to insert in the RECORD.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

"NEW YORK, *May 10.*

"Herbert C. Hoover, who recently came from Europe to advise the Government on food conditions in Europe, says that without control we may see flour at $20 a barrel before the year is over."

In the body of the article Mr. Hoover is quoted as saying:

"If * * * the whole world * * * is to have the unrestricted run of our markets in competition with each other and in competition with the speculator in this country, we may expect to see $5 wheat before the year is over."

I have only quoted a few lines out of it. It was that long interview of Mr. Hoover.

The effect of Mr. Hoover's interview is found in the market report of the next day, as follows:

"Trade was limited in the wheat department yesterday, but traders were wild in their movements at times, and prices again reached new high records. The famine talk of Herbert C. Hoover and the Government's urgent requests for conservation of food supplies started a buying rally that put values materially above the high records made Thursday."

Mr. REED. Fifth. the purchase by the allies of enormous quantities of wheat, probably over 100,000,000 bushels, purchased in the form of futures, thus actually cornering the market, the price of spot wheat being forced far above the price of futures; the rigging of the market by the allies through the process of selling out their corners at an advance and immediately purchasing futures.

In addition to this, it is stated authoritatively that on the day wheat made its sensational advance neutral countries went into the market and purchased enormous quantities, the amount being placed as high as 500,000 bushels. Even Mr. Hoover admits the unrestricted purchasing by the European Governments to have been one of the great causes of the advance. A current market report assigns this as the cause. I ask leave to insert this in the RECORD without reading.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

"[From the Kansas City Star, May 13.]

"The scramble for wheat—Last week's advances outdid any previous experience—Future markets appear to be tied up by large contracts held by exporters—Milling demands diminishing."

In the body of the article it is stated:

"MILLERS AND EXPORTERS COMPETE.

"It has been an altogether abnormal market throughout for two reasons: One, that the representatives of foreign Governments hold large contracts which sellers have found difficulty in filling, and the other that there suddenly developed an unprecedented domestic demand for flour due to the excessive purchases above current needs for household consumption all over the country."

The domestic demand referred to was the buying that suddenly started when the housewives got frightened and began their buying a barrel of flour apiece, which, as I stated the other day, happened here in Washington. I continue reading:

"Millers say this demand is the chief reason why they have been able to pay the extraordinary prices for wheat to grind immediately."

Mr. REED. It is interesting at this point, however, to note that during the entire period of the sensational rise in the price of wheat the professional speculator was nearly all the time a bear in the market. In the market report of a Kansas City paper the following appeared, which I give simply as a sample:

Many speculators have been willing to sell wheat for future delivery at less than the current value of car lots, on the theory that wheat above $2 a bushel is so high that buyers would hesitate about paying the price, and the high price itself would operate as an obstacle to any additional rise by checking the demand and curtailing consumption. The short sellers, however, found that in endeavoring to cover these contracts it was necessary to bid the market up higher than ever.

Considering all these causes together, it is not astonishing that wheat went to an unprecedented price and that it occurred without any concerted scheme of what are commonly known as speculators, the speculators in this case being, in fact, the great Governments of Europe. Even Mr. Hoover does not pretend to claim that the speculators on the board of trade were solely responsible for having run up the price of wheat.

Mr. CHAMBERLAIN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Oregon?

Mr. REED. I do.

RECESS.

Mr. CHAMBERLAIN. It has been quite difficult to maintain a quorum this afternoon, and as the Senator from Missouri is discussing a very interesting subject in connection with this bill, I feel that more of the Senators should hear him. Some of the Senators are engaged in committee work and some are compelled to be absent from the Senate, and I therefore move that the Senate take a recess until Monday at 12 o'clock.

The motion was agreed to; and (at 1 o'clock and 50 minutes p. m., Saturday, June 23, 1917) the Senate took a recess until Monday, June 25, 1917, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

SATURDAY, *June 23, 1917.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord God, our Heavenly Father, look down from Thy throne of grace with pitying love upon Thy children who have not yet learned the art of living together in peace. It is the old, old story, the struggle for liberty in thought and purpose in consonance with the ideals revealed in Sacred Writ. Be very near to the fathers and mothers who are called upon to give their sons to the hardships, exposures, temptations, and dangers of war. Comfort them with the thought that theirs is a sacrifice for humanity. Wisely direct our President, and all who are in authority, that they may provide ways and means. Strengthen our forces on land and on sea that victory may speedily come in the interests of justice, liberty, right, and truth, in the spirit of Him who died that we might know truth. And Thine be the praise forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

CONDEMNATION OF LAND FOR MILITARY PURPOSES.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 2453, together with certain amendments proposed by the House Committee on Military Affairs.

The SPEAKER. The gentleman from Alabama asks unanimous consent for the present consideration of the bill S. 2453, together with amendments suggested by the committee. The Clerk will report the bill.

Mr. LEE of Georgia. Mr. Speaker——

The SPEAKER. The gentleman from Alabama [Mr. DENT] is asking for unanimous consent. The Chair is having the bill reported so that the Members may know what is in it.

The Clerk read as follows:

An act (S. 2453) to authorize condemnation proceedings of lands for military purposes.

Be it enacted, etc., That hereafter the Secretary of War may cause proceedings to be instituted in the name of the United States, in any court having jurisdiction of such proceedings for the acquirement by condemnation of any land, or right pertaining thereto, needed for the site, location, construction, or prosecution of works for fortifications and coast defenses, military training camps, and other military purposes, such proceedings to be prosecuted in accordance with the laws relating to suits for the condemnation of property of the States wherein the proceedings may be instituted: *Provided*, That when the owner of such land or rights pertaining thereto shall fix a price for the same, which, in the opinion of the Secretary of War, shall be reasonable, he may purchase the same at such price without further delay: *Provided further*, That the Secretary of War is hereby authorized to accept on behalf of the United States donations of land and the rights pertaining thereto required for the above-mentioned purposes.

Also the following committee amendments were read:

Page 1, line 6, after the word "land" insert the words "temporary use thereof or other interests therein."

Page 2, line 8, after the word "purposes" insert the following:

"*And provided further*, That when such property is acquired in time of war or the imminence thereof upon the filing of the petition for the condemnation of any land, temporary use thereof or other interest therein or right pertaining thereto to be acquired for any of the purposes aforesaid, immediate possession thereof may be taken to the extent of the interest to be acquired and the lands may be occupied and used for military purposes, and the provision of section 355 of the Revised Statutes, providing that no public money shall be expended upon such land until the written opinion of the Attorney General shall be had in favor of the validity of the title, nor until the consent of the legislature of the State in which the land is located has been given, shall be, and the same are hereby, suspended during the period of the existing emergency."

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. LEE of Georgia. Reserving the right to object, Mr. Speaker, I would like to know how much time the gentleman thinks will be consumed in the consideration of this bill?

Mr. DENT. It ought not to be over three minutes. The bill has been explained to the other side. And there will probably be one or two amendments which we will accept. If I thought there would be any controversy, I would withdraw it.

Mr. GILLETT. Mr. Speaker, permit me to say to the gentleman that I looked at the bill, and I do not think there is any disposition on this side to consume any time.

The SPEAKER. Is there objection?

Mr. LENROOT. Reserving the right to object, I desire to inquire of the gentleman whether, if consent is given, he and the committee will consent to an amendment striking out of the bill the words "other military purposes," limiting it to the securing of these cantonments, which, I understand, is the purpose of the bill?

Mr. DENT. I have no objection to that amendment.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. DENT. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Alabama asks unanimous consent to consider this bill in the House as in the Committee of the Whole. Is there objection? [After a pause.] The Chair hears none. The question is, first, on the committee amendments.

The committee amendments were agreed to.

Mr. STAFFORD. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Wisconsin [Mr. STAFFORD] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. STAFFORD: Page 2, line 4, after the word "purchase," insert the words "or enter into a contract for the use of."

Mr. STAFFORD. Mr. Speaker——

Mr. DENT. I have no objection to that.

Mr. STAFFORD. The purpose of this amendment, in a word, is to grant authority to the Secretary of War to lease as well as to purchase these various sites. There can be no objection to it.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STAFFORD. Mr. Speaker, I offer two other minor amendments. After the word "land," in line 2, insert the word "interest."

Also, in line 7, on the same page, after the word "the," insert the words "interest and." Those two minor amendments are offered in order to make it harmonious with the committee amendment on page 1.

Mr. DENT. I have no objection to the committee amendment.

The SPEAKER. Without objection, the amendments are agreed to.

There was no objection.

Mr. LENROOT. Mr. Speaker, I move to amend, on page 1, line 9, by striking out the comma after the word "defenses" and inserting the word "and," and, in line 10, strike out the words "and other military purposes."

Mr. DENT. I have no objection to the amendment. I will suggest to the gentleman from Wisconsin that he ought to strike out the word "and" in that line.

The SPEAKER. The Clerk will report the amendment of the gentleman from Wisconsin.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 1, line 9, after the word "defenses," strike out the comma and insert the word "and," and in line 10 strike out the words "and other military purposes."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STAFFORD. I suggest, Mr. Speaker, to the gentleman from Alabama that the word "and" following the word "fortification" should be stricken out. I offer that as an amendment.

The SPEAKER. The Clerk will report the amendment of the gentleman from Wisconsin [Mr. STAFFORD].

The Clerk read as follows:

Following the word "fortification," on page 1, line 9, strike out the word "and."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill as amended.

The Senate bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DENT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

CAPTAINS IN THE MEDICAL CORPS OF THE ARMY.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of House bill 4897, authorizing the appointment of captains in the Medical Corps of the Army without five years' previous service.

The SPEAKER. The gentleman from Alabama asks unanimous consent for the present consideration of House bill 4897. Is there objection?

Mr. STAFFORD. That can be brought up on Monday, Mr. Speaker.

The SPEAKER. The gentleman from Wisconsin objects.

EXTENSION OF REMARKS.

Mr. JACOWAY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on Senate bill 2453.

The SPEAKER. The gentleman from Arkansas asks unanimous consent to extend his remarks in the RECORD, as indicated. Is there objection?

Mr. WALSH. Reserving the right to object, Mr. Speaker, on what subject?

Mr. JACOWAY. On the bill S. 2453, the bill we have just considered.

The SPEAKER. Is there objection?

There was no objection.

CONSERVATION OF FOOD AND FUEL.

Mr. LEE of Georgia. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 4961) for the conservation of food and fuel.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4961, with Mr. HAMLIN in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4961, of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

The CHAIRMAN. When the committee rose on yesterday it had been agreed by unanimous consent that all debate on section 12 and all amendments thereto be closed after two hours of debate, one half to be controlled by the gentleman from South Carolina [Mr. LEVER] and the other by the gentleman from Iowa [Mr. HAUGEN]. The Chair would like to inquire of the gentleman from South Carolina what the policy will be in regard to offering amendments during these two hours of debate?

Mr. LEVER. I understand that all amendments that are to be offered to this section of the bill must be offered now and held to be pending.

Mr. LENROOT. They ought to be voted upon as we proceed; otherwise there can be no intelligent action on them.

Mr. LEVER. Let the amendments be offered and discussed and voted upon as offered.

Mr. SABATH. That would not foreclose any amendment to an amendment.

Mr. MEEKER. Mr. Chairman, reserving the right to object——

The CHAIRMAN. The last request of the gentleman from South Carolina does not require unanimous consent.

Mr. GARNER. That is the regular procedure.

Mr. LEVER. I have no request to make, Mr. Chairman.

Mr. HAUGEN. Mr Chairman, I yield 10 minutes to the gentleman from New Jersey [Mr. HUTCHINSON].

Mr. MEEKER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MEEKER. Are the amendments to be offered at this time to be pending, or are they to be offered and voted on as we go?

The CHAIRMAN. They are to be offered and voted on as we go. The gentleman from New Jersey [Mr. HUTCHINSON] is recognized for 10 minutes. The gentleman from New Jersey offers an amendment, which the Clerk will now report.

The Clerk read as follows:

Amendment offered by Mr. HUTCHINSON: Page 13, strike out line 11 to the comma and insert in lieu thereof the following: "Guarantee within a period not exceeding one year."

The CHAIRMAN. The gentleman from New Jersey is recognized.

Mr. HUTCHINSON. Mr. Chairman, I am not in favor of this section. I have been opposed to this section in the committee, for the reason that it is not, in my judgment, practicable. My judgment is that the price can not be fixed without a great deal of expense, and we will not gain anything by having a minimum price. Neither do I believe that the farmers need it or want it.

This amendment is to correct, in section 12, on line 13, the three-year period. This measure is a war measure, and becomes null and void a year after. Under this provision a farmer has a contract to get the minimum price; and, if the object of the bill is to prevent hoarding, the farmer can sign an agreement with the Government, and then he has three years to sell his wheat, and the bill becomes void in one year; so that the bill itself does not bear out the other sections of the bill.

Now, my object in talking on this item is this: There have been several statements made in the debate on this bill, and some of them have given a bad impression in the country around in reference to the price at which flour has been sold. In the general debate I was asked questions which I did not answer because I was not positive, and I am not apt to make statements when I do not know what I am talking about. Among other questions, I was asked at what price wheat was sold a year ago, and also about the selling price of flour in foreign countries. I immediately took that matter up.

Mr. FESS. Mr. Chairman, I make the point that the committee is not in order. The gentleman from New Jersey is discussing a very important feature of the bill, and the Members present ought to be permitted to hear him.

The CHAIRMAN. The committee will be in order; gentlemen will cease conversation.

Mr. DYER. And I suggest, Mr. Chairman, that the galleries be admonished to help us keep order.

The CHAIRMAN. The gentleman from Missouri makes a good suggestion. The occupants of the galleries will appreciate the fact that they are here to-day through the courtesy of the House. A little bit of noise here and there makes a great buzz in the Chamber and very greatly disturbs business. The Chair requests the galleries to kindly preserve order. To that the Chair will add that a very good thing to do will be for the membership of the committee to set an example to the galleries. The gentleman from New Jersey will proceed.

Mr. FESS. The gentleman was on the point of discussing the question why wheat is sold so much more cheaply in London than here.

Mr. HUTCHINSON. Those of you who were here last year remember that there was a grain-grading act passed, which was one of the most important bills passed by the last Congress. You all understand that there are a number of different grades of wheat. It runs from No. 1 down to No. 4, and to no-grade, and while a lot of money has been appropriated—$519,000 this year—I suppose that work is being done, although personally I have never yet seen a Government certificate of inspection. The average miller is one who tries, like everyone else, to make the most money that he can. If he can make more money by grinding export flour, he runs his mill on export flour. The average export flour is that flour which is made from a lower grade of wheat, that runs anywhere from a dollar to a dollar and a half a barrel less than the flour demanded by the housewife of America or the American baker. Therefore, the millers in the past, a great many of them, have been running exclusively on export flour, because they could buy wheat at anywhere from 20 to 30 cents a bushel less and get as much for their flour almost as they could here in America. As I say, I have investigated this, and I have taken it up with a personal friend of mine who is one of the largest exporters along the Atlantic coast, if not the largest, and I am going to have read to you a part of his letter, which is dated June 21, 1917. I will ask the Clerk to read it.

The Clerk read as follows:

Referring to the prices of flour in the United States and in England, it might be well for us to look backward for a period of a year. I would call your attention to the fact that in April, May, June, and July, 1916, wheat was selling between $1 and $1.20 per bushel in the Chicago market. It was possible for British merchants at that time to have bought large supplies of flour that could have been sold at about $8.20 per barrel, delivered in England. I am sure that large purchases of flour and wheat were made and the demand was very brisk in the months of July and August, as it became known that the northwestern and Canadian crops were short ones and of poor quality. When wheat was selling as stated in April, May, June, and July, 1916, American millers were selling flour in this country during the month of April at $4.85 to $5.10 per barrel; during the month of May, 1916, at $4.90 to $5.30 per barrel; during the month of June, 1916, at $4.50 to $5.30 per barrel; during the month of July, 1916, at $4.50 to $5.25 per barrel; and during the month of August, 1916, at which time wheat had advanced 20 to 30 cents a bushel, for $6 to $6.25 per barrel.

Coming down to a recent date, I have to-day seen contracts for flour sold to British buyers at $11.75 to $11.80 per barrel in sacks, delivered alongside of vessel at Atlantic seaboard ports, of a quality that sells in the United States for $1 to $1.50 per barrel less than the kind of flour that is demanded or required by the bakers and family trade of the United States. These contracts were made this month. If you will add thereto the present freights of $2.50 per barrel on flour you will have the cost of $14.25 to $14.30 per barrel, delivered in a British port, and please bear in mind that these sales were for flour of an inferior quality to that which the bakers of the United States demand.

Now, it is possible for the British Government to sell flour for $8 per barrel and pay $14 or $15 for the flour if the British buyers are able to sell to neutrals and allies at a good profit; or the British Government may be making it up from some other source of revenue in order to give the consumers of England low-priced flour. This, however, we, of course, can only surmise. But the facts can be substantiated that British merchants have continually, for nearly one year, bought flour at a higher price than the flour trade of the United States was willing to pay.

The foreign buyers of wheat, as you know, have been leading the buying and the American millers have been compelled to follow, the foreign merchants probably realizing the need thereof sooner than did the American merchants.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

Mr. HUTCHINSON. Yes.

Mr. SLAYDEN What is the date of the letter that the gentleman has just had read?

Mr. HUTCHINSON. June 21. It came to me yesterday.

Mr. MADDEN. Who made that statement?

Mr. HUTCHINSON. He is one of the largest exporters in the country.

Mr. MADDEN. It seems to me if it is of any value we ought to know whether he has any information.

Mr. HUTCHINSON. He is one of the largest exporters in the country.

Mr. MADDEN. Is he afraid to have his name mentioned?

Mr. HUTCHINSON. I do not care to give it. I can prove the facts any time you want me to.

Mr. THOMPSON. Mr. Chairman, will the gentleman yield?

Mr. HUTCHINSON. Yes.

Mr. THOMPSON. Out in my State this year's crop is selling at from $2 to $2.10 a bushel. A barrel of flour made out of that wheat ought to sell to the consumer at from $10 to $10.50.

Mr. HUTCHINSON. Yes.

Mr. THOMPSON. That is allowing a reasonable profit for the middlemen.

Mr. HUTCHINSON. For all of the middlemen—the miller, transportation, and everything.

Mr. THOMPSON. Flour is selling now for $17.50 a barrel. Who is getting the $7?

Mr. HUTCHINSON. I do not know anything about that. Mr. Chairman, it seems to me that the object of this bill is to help our allies, and it does seem to me that we ought to have——

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. PARKER of New Jersey. Mr. Chairman, can not the gentleman from South Carolina yield more time to the gentleman from New Jersey?

Mr. LEVER. I am very sorry, but all of the time has been apportioned.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the amendment be again reported.

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection, and the Clerk again reported the amendment.

Mr. LEVER. Mr. Chairman, if the gentleman from New Jersey will make that 18 months, which would give a full period, I think there will be no objection to the amendment upon this side of the House.

Mr. HUTCHINSON. Mr. Chairman, I have no objection to that.

The CHAIRMAN. The gentleman from New Jersey asks unanimous consent to modify his amendment in the manner indicated.

Mr. CANNON. One year would not do for the crop season.

Mr. LEVER. What we would do in the 18 months' period would be to take care of whatever hold over there may be of the crop. I think we better make it 18 months. I think that would be fairer.

Mr. HAUGEN. That would give a year both for the spring wheat and the fall wheat.

Mr. LEVER. Yes. Do I understand the gentleman from New Jersey will accept that suggestion?

Mr. HUTCHINSON. I have no objection to that.

The CHAIRMAN. Is there objection to modifying the request?

There was no objection.

The CHAIRMAN. The Clerk will report the modified amendment.

The Clerk read as follows:

Page 13, line 7, strike out "three years" and insert in lieu thereof "eighteen months."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. STEPHENS].

Mr. STEPHENS of Mississippi. Mr. Chairman, one of the prime purposes of this bill is to stimulate and encourage the production of food products.

In section 12 of the bill this language is found:

That, whenever the President shall find that an emergency exists requiring stimulation of production and that it is essential that the producers of any nonperishable agricultural products produced within the United States shall have the benefits of the guaranty provided for in this section in order to stimulate production of such products, he is authorized, from time to time, seasonably and as far in advance of seeding time as practicable, to determine and fix and to give public notice of what, under specified conditions, is a reasonable guaranteed price for any such products in order to assure such producers a reasonable profit. Thereupon, the Government of the United States hereby guarantees every producer of any merchantable nonperishable agricultural products produced within the United States, for which a guaranteed price shall be fixed by notice in accordance with this section, that, upon compliance by him with the regulations prescribed by the President, he will receive for any such products produced in reliance upon this guaranty within the period, not exceeding three years, prescribed in the notice, a price not less than the guaranteed price therefor as fixed pursuant to this section. In such regulations the President shall prescribe the terms and conditions upon which any such producer shall be entitled to the benefits of such guaranty.

The language is not mandatory; it is permissive only. The power to guarantee a minimum price is to be exercised only when it is necessary, in the judgment of the President, to be used in order to encourage farmers to grow certain crops.

The right to guarantee a minimum price, as provided by the bill, relates to "any nonperishable agricultural crops."

Now it is proposed that cotton shall be exempted from the provisions of the section.

I shall not enter into a discussion of the question of fixing minimum prices—the wisdom, necessity, or propriety of doing this—as a policy of the Government.

Several times recently gentlemen on this floor have made references of a sneering nature at the cotton industry, and attempts have been made to enact legislation under which a tax would be levied upon each bale of cotton produced.

They fail to realize the great part that cotton plays in the industrial and economic life of the Nation. Many of them never saw any cotton, and are not familiar with statistics relating to it.

Whenever cotton is spoken of such gentlemen think only of the lint. They recall that it is used in the manufacture of clothing, of automobiles and tires, of explosives, and other things of like character.

However, they overlook the fact that it serves other valuable purposes than those enumerated. They are not alive to the fact that as food for man and beast it is one of the most valuable of all agricultural products.

Doubtless they will be surprised to learn that the food value of the cotton crop of the South is greater per acre than the food value of the products in the grain-growing section of the country.

On the average it requires 1,500 pounds of cotton in the seed to make a 500-pound bale of cotton. The other 1,000 pounds—that is, the seed—produce meal, hulls, and oil.

It is estimated that the amount of seed just mentioned will produce about 22 gallons of oil. Much of this oil is used for human food. It is clean, healthful, and wholesome. Many people prefer it to hog lard.

Recently a process has been discovered by which a product called cottonseed flour can be made. It has a greater nutritive value than corn, oats, potatoes, or meat. It is healthful and palatable. Several years ago I ate some cake made of it. It compared favorably with any cake I ever ate.

Besides this, all who have had any experience in the matter or given the subject any thought agree that the products of cotton seed are the best feed to fatten animals that are slaughtered for food that is produced in our country.

I shall not have time to make a full explanation of the many elements of the value of cotton and its products. It would require hours to go into details. To follow cotton from the time the seed is planted until it reaches the finished product, whether as clothing for the civilian and the soldier, as a tent protecting the warrior on the battle field, as guncotton or glycerine used in the manufacture of explosives, as nourishing food for mankind as well as animals, would be interesting, indeed. But time forbids this.

I have risen simply to suggest that to fix a minimum price on seed will not help to encourage the production of this element that is of so much importance in the life of the Nation.

The relative value of the seed is small as compared with the lint. Therefore a high price for seed will not encourage the growing of cotton if the price of the cotton itself is low. Primarily cotton is grown for the lint and not for the seed.

Mr. Chairman, I have thrown out these suggestions as to the value and importance of cotton in this war simply for the consideration of the committee. My remarks have not been made for the purpose of boasting of the products of my section.

I shall insert as a part of my remarks some excerpts from the Manufacturers' Record on this subject. [Applause.]

ENORMOUS FOOD VALUE OF COTTON CROP STRANGELY MISUNDERSTOOD—SOUTH'S 7,000,000 TONS OF COTTON SEED CONTAINS POTENTIAL FOOD VALUE THE EQUIVALENT OF 481,000,000 BUSHELS OF WHEAT.

[Special dispatch to Manufacturers' Record.]

DALLAS, TEX., *May 14.*

In the face of conditions that now surround the American people, and which are almost hourly becoming of more and more importance, it is apparent to even the most casual observer that the time is already upon us when this country has become the granary of the world, and to us, almost alone for some years, in peace or war, must the nations look for their food supply. The day has been when to wheat alone the world has looked for its food supply, but that day has passed, and we of the South, at least, feel that we have at command, and should put ourselves in position to offer to the world, a source of food supply hitherto almost entirely unconsidered and of an importance not at all appreciated.

The average production for the last three years of American wheat has been 728,000,000 bushels, or 21,000,000 tons, from which there could have been produced 16,000,000 tons of wheat flour.

The average production of cotton during the same period has been 14,000,000 bales, from which there has been produced 7,000,000 tons of cotton seed.

Science has discovered and actual practical experience has confirmed that there can be produced from this cotton seed a flour not only equally healthful, palatable, and appetizing as that produced from wheat, but which is more than five times as nutritious.

Considering this, then, we find that in actual nutritive value the South can contribute to the world's food supply in her 7,000,000 tons of cotton seed an amount equivalent to adding to the wheat crop 481,000,000 bushels, or something over 66 per cent of the average wheat crop of the country.

But in addition to this it should be noted that cottonseed flour is really in its chemical constituents, nutritive value, and dietary effect more a meat than a bread substitute.

Meat contains from 15 to 20 per cent protein—averaging about 17 per cent—thus indicating a total nutritive value of less than one-fourth of that of cottonseed flour. In fact, cottonseed flour is 25 times as nutritious as potatoes, 5 times as nutritious as corn meal, and 4 times as nutritious as oatmeal.

Of even equal or more importance, in considering the value of cottonseed flour, account must be taken of its medicinal and curative effect. Persons afflicted with diabetes are prohibited from eating bread made from wheat flour, because the starch contained is poisonous to them under such conditions. Cottonseed flour contains no starch, is of exceedingly nutritive value, with a high food percentage of protein, thus making it almost an ideal food for persons afflicted with diabetes.

Keeping these facts in mind, and remembering the whole world is looking to America for its food supply, and with the actual fact staring us in the face that not only is our wheat production entirely inadequate to supply the demand of our home people, but that an actual shortage exists for the nourishment of America, and serious curtailment of this is inevitable under the terrible war conditions that are upon us now, is it not time that the people of the South should awake

from the indifference that has so strangely possessed them concerning the value of cotton as a food crop, should give additional thought not only to the food value of cotton but to that of corn meal, peanuts, and soy beans, all of which the South is capable of producing in quantities not heretofore dreamed of, and offer to her people, the Nation at large, and to the world the riches with which nature has blessed her in this regard?

The Master himself has said, "A prophet is not without honor save within his own country and in his own house."

May not the indifference of the southern people to the value of cotton, corn meal, peanuts, and soy beans as a food crop explain the indifference they have shown in this regard and the answer be "if cotton were grown in Europe as it is in Texas."

JO W. ALLISON,
Chairman Publicity Bureau,
Interstate Cottonseed Crushers' Association.

FOOD VALUE OF SOUTH'S COTTON CROP IMPRESSIVELY PRESENTED—MORE GRAIN VALUE PER ACRE THAN IS PRODUCED IN CORN-RAISING SECTION OF THE COUNTRY, SAYS AUTHORITY—CONDITIONS FOOD CONSERVATIONISTS HAVE LARGELY OVERLOOKED.

The unappreciated and generally unknown facts as to the food value of the cotton seed annually produced in the South—to the amount of some 6,000,000 tons in a 12,000,000-bale crop—are comprehensively set forth in a letter to Carl Vrooman, Assistant Secretary of Agriculture, given herewith. The letter, which follows, is by Lewis N. Geldert, assistant to the president of the Interstate Cottonseed Crushers' Association, and is therefore an authentic presentation of the case. It is necessary to know these facts in order to understand the part the South plays as a contributor to the national volume of food supply, and Mr. Geldert's letter should be given fullest consideration by those who are seeking the greatest possible conservation of the food crops the Nation produces.

INTERSTATE COTTONSEED CRUSHERS' ASSOCIATION,
OFFICE OF ASSISTANT TO THE PRESIDENT, PORTER BUILDING,
Memphis, April 19, 1917.

Hon. CARL VROOMAN,
Assistant Secretary of Agriculture, Washington, D. C.

DEAR SIR: In compliance with your personal request, it affords us pleasure to present to you, in this formal manner, the ideas and conclusions of the cottonseed crushers, as expressed at their meeting held in Memphis, Tenn., on Saturday evening, April 7, 1917, concerning the opportunity and the necessity for conserving and increasing the corn and other grain products of the South.

In view of the extreme gravity of the situation, we respectfully urge you to consider having the facts and figures herein embodied brought to the immediate attention of the farming population of the country, and particularly, perhaps, advising the owners of farm animals to adopt the suggestions presented for reasons both economic and patriotic.

It is not generally realized that the cotton plant provides large quantities of food as well as raiment. The South is not so poor in food production as alarmists would have us believe, as the ginning of 11,500,000 bales of cotton fibers leaves 5,575,000 tons of seed, which produces three distinct food or feed products in quantities and at present market prices as follows:

Oil, 223,000,000 gallons, at $1	$223,000,000
Meal, 2,787,500 tons, at $40	115,000,000
Hulls 1,115,000 tons, at $15	16,725,000
Total food and feed value	354,725,000

In addition, there is provided by the above cotton crop 1,672,500 bales of linters, which are considered essential in the making of smokeless powder and guncotton, and which at the present market price of $35 per bale amounts to $58,537,500. Adding to the above the cotton fiber at 20 cents a pound, it will be noted that the southern cotton planter has in one season added to the Nation's wealth $1,563,263,000, of which approximately 74 per cent was available for clothing, 23 per cent as food for man and beast, and 3 per cent for munitions of war. Other comparisons might be made, but to the superior advantage of the cotton seed must be credited the fact that its food value is far in excess of corn and other grains, and that the protein value of cottonseed meal is two and one-half times that of corn.

An analysis of the food values into which cotton is divisible, made by Col. Jo W. Allison, is to this effect: Taking 1,600 pounds of seed cotton (the basis for a bale of lint cotton), there is left 1,000 pounds of cottonseed after ginning. This will yield about 20 gallons of crude oil and 18.5 gallons of refined oil, which makes 139 pounds of refined oil, and which is equal in food value to 207.5 pounds of hog lard. These seed also yield about 850 pounds of cottonseed meal, equaling in food value 900 pounds of corn, or 16 bushels of corn. Or instead of the meal this can be converted into 300 pounds of cottonseed flour, equaling in food value about 1,650 pounds of wheat flour. There will also be about 250 pounds of hulls, and, of course, the lint cotton and linters, which have no food value, but go into cloth, ammunition, etc.

In other words, the seed from a bale of cotton represents in food value 207.5 pounds of hog lard and 16 bushels of corn, or 207.5 pounds of hog lard and about 1,650 pounds of wheat flour.

Of the pure food provided by cottonseed oil in lard compounds, margarine, and other refined edible-oil products no more needs to be said here. Is there not danger, however, of stampeding the southern farmer into such neglect of cotton planting this year by the plant-food-crop propaganda of the Government as will result in an alarming shortage of this valuable crop, which is in itself such a composite of diversification?

A word of caution from your department now before planting is too far advanced might prevent disaster. There are hundreds of thousands of acres of southern lands particularly adapted to cotton, which by intensive methods would produce a bale or more an acre, but which, under the spur of the preparedness campaign, are being planted this year in other food crops, concerning the growing of which the laborers have no knowledge or experience. Elsewhere in the same States, perhaps, are large areas of land better suited to corn, other grains, and vegetable crops.

The money crop of the South is cotton, and in its abundance of wealth production the whole country has shared. We would respectfully sound a word of caution lest the layer of the golden egg be killed or seriously injured

But the suggestions that we have offered and those we are now submitting for your careful consideration are directed more toward accentuating the need of putting to the very best possible use such food as we may produce, and with this idea in mind we trust that what we are about to offer will throw some light upon the subject and prove of real worth.

Of the elements essential for plant growth nitrogen is the one most often lacking. While the up-to-date farmer some time ago learned that one way to restore this element to the soil is by growing and turning under leguminous crops, he is just beginning to realize and to appreciate that there is one product and only one which can be used as a feed with the maximum results, and after having been fed retains in the manure 80 per cent of its original fertilizing value. This unique product is cottonseed meal, and there is no other article under the sun that will give such splendid results as both feed and fertilizer. While nitrate of soda and tankage, if of high quality, will produce as good results as fertilizers, they are worthless for feeding purposes.

Notwithstanding the certainty of results, and despite the efforts of State and Federal agronomists to induce farmers to get the utmost out of the cottonseed meal by using it first as a feed and then as a fertilizer, they are but slowly awakening to its dual possibilities, as might be instanced in the great State of South Carolina.

In that State there are annually produced from the cotton seed sold to the oil mills approximately 200,000 tons of cottonseed meal. This cottonseed meal, on account of its high content of protein, fat, and carbohydrates, is considered by feeding authorities to be worth two and a half times as much as the same quantity of corn as a feed for farm animals. This, therefore, is equivalent to 500,000 tons of corn, or approximately 18,000,000 bushels. Having within her borders such a vast quantity of feeding material, the natural assumption would be that it was used for feeding purposes. But no; this is not the case. Her farmers, through ignorance, indifference, and perversity, prefer to bury this rich feedstuff in the ground and import a far greater quantity of other materials to take its place.

What an unconscionable thing it would be considered if the farmers of Belgium, Germany, France, or England were annually to bury 18,000,000 bushels of corn in the ground for fertilizing purposes instead of using it as a food for man and beast! Yet in one State alone we are interring the equivalent of 18,000,000 bushels of corn every year.

The above figures represent only South Carolina's waste. All of the cotton States occupy a similar position, except possibly Texas and Oklahoma, where the meal is largely sold for export beyond the borders of those States and used as a feed. Few people realize that the cotton crop is a grain crop and that for every bale of cotton made there is made at the same time about 450 pounds of cottonseed meal, which is equivalent to about 1,125 pounds of corn in feed value. We produce more grain value per acre in a cotton crop than is produced in the corn-raising section of the United States. It is discouraging to see our farmers sell their cotton seed for cash and not buy back the meal for use on their farms. It is a common practice among the oil mills to give an exchange of meal for seed that is greatly to the advantage of the farmer if he is going to use the meal. It is not necessary to take an unofficial source for the confirmation of these figures. The United States Government, all experts on feeds, any chemist, and every State department of agriculture, as well as every experiment station, will confirm the information given herein.

Mr. HAUGEN. I yield five minutes to the gentleman from North Dakota [Mr. YOUNG].

Mr. YOUNG of North Dakota. Is the gentleman from Minnesota [Mr. ANDERSON] present? I am sorry he is not, because I wanted to make some reference to his remarks of last night. I want to ask whether there is anybody here who has any question as to the constitutionality of section 12?

Mr. MEEKER. Yes; there is one here.

Mr. YOUNG of North Dakota. Just one gentleman here, I believe, who questions the constitutionality of section 12. Nobody appearing before the committee and no member of the Committee on Agriculture has up to this time questioned the right of Congress to fix the price of nonperishable farm products. Now, if that be true, I do not think there is any question that Congress also has the power to regulate and control the great grain exchanges which do affect the very thing upon which we are legislating in this section, the matter of price. If the fixing of a minimum price tends to crop stimulation, it surely can not be denied that a steadying of the market prices would also have that tendency, or that violent fluctuations of market prices would have the contrary effect.

The gentleman from Minnesota [Mr. ANDERSON] in his remarks last night asked this question:

> Can it be said that there is such a relation between speculation, injurious or otherwise, as to bring the regulation of speculation within the war powers? Can it be said, for instance, that manipulation of prices has such a relation to the conduct of the war with Germany as to bring that subject within the purview of the war power? Can it be said that the making of misleading or unfair market quotations is a subject of such character as to bring it within the purview of the war power?

I think the answer is undoubtedly, Yes; there is. For instance, supposing that under this law the President or the food administrator should fix a price of $1.75 a bushel on wheat, and that three weeks afterwards the war should end and the great exchanges and speculators throughout the country should pound down the price of wheat to 75 cents a bushel, and we raise 800,000,000 bushels of wheat in the country this year. That would mean that the Government of the United States would be under obligation to buy 800,000,000 bushels of wheat at $1 per bushel more than the price pounded down by the exchanges. It seems to me there is absolutely no question but what that would affect the financial standing and strength of the United States in such a way as to affect the war power.

Mr. BORLAND. Will the gentleman yield?

Mr. YOUNG of North Dakota. Yes.

Mr. BORLAND. Does the gentleman think that any official would fix the price at $1.75 for a year unless he clearly foresaw that the demand would absorb the wheat for a year at that price?

Mr. YOUNG of North Dakota. I am not arguing now what price ought to be paid. I am trying to show that if injurious speculation is permitted it might involve the Government in great loss. Also that the farmers are liable to similar losses, and if so would be discouraged in producing crops.

Mr. BORLAND. Does not the gentleman realize that the wheat demand is a yearly demand, not a monthly or daily demand?

Mr. YOUNG of North Dakota. I am not questioning now as to whether the food administrator will act wisely or not. I am assuming that he will act wisely. I am discussing now the question of whether this is a war power, the matter of the control of the exchanges. That was called in question last night.

Mr. BORLAND. Assuming that the war should come to an end three weeks after the order was made——

Mr. YOUNG of North Dakota. It undoubtedly would affect prices.

Mr. BORLAND. The demand for the visible supply of wheat would remain practically the same.

Mr. YOUNG of North Dakota. It might or it might not. Now, so far as the producers are concerned throughout the Northwest, they were represented pretty well before the committee. There were nine gentlemen who came here from five of the Northwestern States, Wisconsin, Minnesota, North and South Dakota, and Montana, and they expressed their approval of this bill. They asked that this legislation be enacted, and the thing which moved them to do so, the consideration which moved those farmers from the Northwest to commend this bill, were the sections on control of the grain exchanges and the matter of liberating terminal elevator storage and authorizing the construction of additional storage if needed. These sections were believed to be vital to the interests of northwestern farmers.

Mr. CRAMTON. Will my friend, Farmer YOUNG, yield for a question?

Mr. YOUNG of North Dakota. Certainly.

Mr. CRAMTON. I should like to ask the gentleman whether any of these gentlemen who came down from his State—the producers—who are satisfied with the bill are large producers of potatoes?

Mr. YOUNG of North Dakota. The gentleman has referred to me as "Farmer YOUNG"——

Mr. CRAMTON. I endeavored to be complimentary.

Mr. YOUNG of North Dakota. The gentleman was complimentary, indeed. Like myself, he is a farmer's son, so I know he intended to pay me a compliment; but I doubt whether he ever worked as much on a farm as I have. Very few young men, indeed, did as much hard manual labor up to the time of my graduation from the university as I, and since then I have grown more grain than the average North Dakota farmer. I learned to plow when guiding a team and walking a straight furrow was a fine art. I have done everything conceivable about a grain or dairy farm, and worked three years in a cheese factory to boot. I have mowed hay and worked in a suffocating barn on a hot day. I have pitched bundles in the blazing sun and pulled turnips out of the cold snow. I have husked corn in the cold fall days until my fingers were benumbed and bleeding, and have experienced the sweet contrast of milking cows with my hard, stiff, sore hands while resting. I am modest, so I will not take in so much territory as the United States, but I can make better cheese than anyone in my district, and no one in or outside of my district can make better butter. "Farmer YOUNG," you say? My answer is, "Present." [Applause.]

Mr. DILLON. Will the gentleman yield?

Mr. YOUNG of North Dakota. I do not believe I have time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. Mr. Chairman, I yield 10 minutes to the gentleman from North Carolina [Mr. STEDMAN].

Mr. STEDMAN. Mr. Chairman, it was my good fortune on Tuesday of this week to be present at Valley Forge when the United States Washington arch was dedicated in a most appropriate, eloquent, and patriotic address delivered by the distinguished Speaker of this House. [Applause.] The occasion could not fail to recall to the memory of all the glorious achievements of our Revolutionary fathers—their endurance, their fortitude, their patriotic heroism. Nor could it fail to impress every American citizen present with the high sense of duty he owes to those who are to come after us, under God's providence, to preserve for them the blessings which we have inherited and which we now enjoy. [Applause.]

As I wandered amidst the historic scenes of Valley Forge my thoughts turned to the bill which is now under consideration and which was pending when I left here on Tuesday morning. Without reflecting upon the judgment of others, my own decided conviction is that there is no legislative duty which the Members of this House will be called upon to perform during the present session of higher importance or more urgent necessity than the passage of this bill. It will be a message of cheer and comfort to the American people, telling them that the brutal and nefarious traffic of the gambler in the necessities of life has been annihilated by this Congress, for the present at least. It is not my purpose in the few minutes to which I must restrict myself to discuss in detail the merits of this bill. They have been illustrated most clearly and accurately by the accomplished chairman of the Committee on Agriculture. [Applause.]

The vast majority of the people of North Carolina, whom I have the honor in part to represent, favor the passage of some bill similar in its provisions to the one now pending.

History ever repeats itself. During the Revolutionary War North Carolina employed a board of military officers to collect and export produce and to import necessaries and munitions for the Continental soldiers. It was through importations through Ocracoke Inlet and supplies furnished by North Carolina that the sufferings of the Continental soldiers in the early winter at Valley Forge were relieved. [Applause.]

The facts in connection therewith will be found more fully set forth in Ashe's History of North Carolina, page 586. There has never been a break in the greatness of the people of North Carolina. In 1861 she made a large appropriation to purchase abroad supplies for her soldiers, and under the administration of her great war governor (Vance) she bought a vessel and imported large quantities of staple articles—shoes and leather for shoes amounting to 250,000 pairs, 50,000 blankets, gray cloth for 250,000 uniforms, 12,000 overcoats, and $50,000 worth of medicine, and many other articles needed by them which I do not now recollect. As the shoes, blankets, and clothing were more than sufficient for our own troops, large quantities were turned over to the Confederate Government for the troops of other States.

Depots of provisions were established along the lines of the railways for the wives and children of Confederate soldiers, and committees were appointed to distribute them, and there was no time when a North Carolina soldier, whether at home or in the army of northern Virginia, ever suffered for food or clothing [applause]; and to-day, to the everlasting honor and glory of the grand old State, no Confederate soldier worthy of the name would be allowed to suffer anywhere within the confines of North Carolina if his necessities were known. [Applause.]

A supreme sense of duty caused her to cooperate with the Confederate Government, as a sense of duty and honor, as well as self-interest, should now cause us to cooperate with our allies, and it was due to the patriotic self-denial of the people at home, who realized fully the necessity of food and clothing for their soldiers, that they ever maintained throughout the entire unfortunate Civil War that esprit de corps which has forever established upon the pages of history their enduring fortitude and unfading renown. The high resolve and chivalric sentiment which characterized the people of North Carolina during the Civil War was not confined to her men alone, but was shared to a marked and eminent degree by the women of that State. [Applause.]

In connection with the efforts of the people of North Carolina to provide for her soldiers, I hope it will not be thought inappropriate if I mention an incident illustrating their spirit and zeal.

Upon one of the trips of the blockade vessel to which I have alluded as having been purchased by the State of North Caroline, to bring supplies from abroad for her soldiers, was a young girl returning to her home in North Carolina. As the vessel approached Wilmington, when a few miles from that port, it was discovered by Federal cruisers, which made every effort to overtake and destroy it. Shells and shot were rapidly falling around and about it. The captain, although a man of more than ordinary courage, realized the great danger to which the vessel was exposed—as amongst other supplies it had on board a large amount of powder. He was earnestly listening to the suggestions of two or three of the crew that the danger was so imminent that to save their own lives the vessel should be surrendered. Overhearing the conversation between the captain and those around him, this young girl lighted a torch of pine wood and walking up to the captain said: "It is very true that the vessel may be struck and all of us blown into the air, but before you shall surrender it and these supplies, so necessary

for North Carolina soldiers, shall be lost, I myself will blow it into the air with everyone of us on it," and pointing to the powder she said: "I will throw this lighted torch directly into that barrel of powder."

The crew forgot their danger in the presence of the splendid heroism of this girl. The captain said to them, "Boys, we will take our chances," though every moment there was imminent danger that the vessel would be struck.

This young girl had the blood of a hero in her veins. She was as modest as she was fair and beautiful. I have no doubt of the truth of the incident I have just related. I have heard it ofttimes spoken of. Only a few days ago a young gentleman from Wilmington called my attention to it, and asked me if I recollected it, and he told me that it was related to him by a member of the crew of the vessel.

If the Members of this House should realize as fully as they ought the importance of the control of food for the people of this country, its soldiers, and the allies, and should be governed by the same spirit which animated the breast of that North Carolina girl, this bill would finally pass by a unanimous vote.

If this young girl was willing to sacrifice her life to prevent the destruction of supplies so necessary to the soldiers of her State, surely this Congress can rise to the full measure of its duty and take such action as may be necessary to control an adequate supply of food for the people of this country, for its soldiers, wherever they may be, and for our allies, who are fighting by our side. Let the boys whom we are sending to the battle field realize and know not only that they will be properly cared for, but that their parents at home, their wives, and their sweethearts will be likewise protected through sunshine and storm, and they will sleep calmly upon the battle field, happy and content whatever fate may betide them. The world in arms will not stand before their advancing columns with the Stars and Stripes floating above them. [Applause.]

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 4961 and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, Mr. O'SHAUNESSY was granted leave of absence for one week, on account of illness.

COMMISSION TO WAIT UPON RUSSIAN COMMISSION.

The SPEAKER. The Chair appoints the following committee to wait upon our Russian visitors and conduct them into the Hall.

The Clerk read as follows:

Messrs. FLOOD, HARRISON of Mississippi, STEDMAN, SABATH, COOPER of Wisconsin, ROGERS of Massachusetts, LONDON, and SIEGEL.

The SPEAKER. The House will stand in recess under its previous order for 30 minutes.

Thereupon (at 11 o'clock and 56 minutes) the House stood in recess.

At 12 o'clock and 4 minutes p. m. the commissioners of the Russian Republic to the Government of the United States, Prof. Boris Bakhmetieff, chief of the mission; Lieut Gen. Roop, representing the Russian general staff; Prof. Lomonossoff, chief of the delegation to study railways and communications; Prof. Borodine, representing the ministry of agriculture; Col. Oranovsky, representing the ministry of war to study munitions and supplies; Mr. Novitsky, chief of the financial section; Mr. Soukine, diplomatic secretary of the mission; Capt. Dubassoff, aid-de-camp to Ambassador Bakhmetieff; and Capt. Shutt, escorted by Mr. FLOOD, Mr. STEDMAN, Mr. HARRISON of Mississippi, Mr. SABATH, Mr. COOPER of Wisconsin, Mr. ROGERS of Massachusetts, Mr. LONDON, and Mr. SEIGEL, accompanied by Mr. C. Onou, chargé d'affaires of the Russian Embassy, and Mr. Breckinridge Long, Third Assistant Secretary of State, entered the Hall of the House.

The distinguished visitors were escorted to the Speaker's rostrum amid prolonged applause and cheers.

The SPEAKER. The peculiar circumstances under which the Russian commission comes to us justify a few preliminary words.

When our fathers proclaimed this Republic at Philadelphia July 4, 1776, there was only one other Republic on earth—Switzerland—and the fathers were not certain that this one would live till Christmas. It was an even break whether it would or not. [Laughter and applause.] Now, thanks be to Almighty God, there are 27 republics in this world. [Applause.] In a large sense we made them, every one [applause]—not by conquering armies, not by the mailed hand, but by the wholesomeness of our example [applause]; by teaching all creation the glorious fact that men can govern themselves. [Applause.] Until then the theory was that political power descended from on high and lighted upon a few tall heads and a little of it trickled down upon men below. We reversed all that and made it begin at the bottom and go up like the sap in the trees in the springtime, and it will go up forever. [Applause.]

Of these 27 republics Russia is the newest and the biggest. [Applause.] It dazzles the imagination to think what she may be under free institutions, possessing as she does 180,000,000 of people and one-sixth of the land on the globe.

The Russian Revolution is the most momentous political movement since the French Revolution.

I present to you the first Russian ambassador to the United States of America from the Republic of Russia. [Applause.]

Prof. BORIS BAKHMETIEFF. Mr. Speaker and gentlemen of the House [applause], I am deeply conscious how great an honor has been conferred on me and the members of my mission by this gracious reception. I understand how unusual it is for this House to accord to foreigners the privilege of the floor. I realize that if you were moved to make such an exception it was due to the great and most extraordinary historic events which have been and are now taking place in the world.

Great indeed is the honor and the privilege to speak here, in this House, exemplifying as it does the Constitution of the United States—that wonderful document which embodies so clearly and yet so tersely the principles of free government and democracy. [Applause.]

Gentlemen of the House, when addressing you on behalf of the Government and the people of new Russia, when conveying to you the greetings of the new-born Russian democracy, you will conceive how impressed I am by the historical significance of this moment; you will understand why my emotions do overwhelm me.

During the last few months Russia has really lived through events of world-wide importance. With a single impulse the nation has thrown down the old fetters of slavery. Free, she is entering now the dawn of new life, joining the ranks of democracy, striving for the happiness and the freedom of the world. [Applause.]

Does not one feel occasionally that the very greatness and significance of events are not fully appreciated, due to the facility and spontaneity with which the great change has been completed?

Does not one always realize and conceive what it really means to humanity that a nation of 180,000,000, a country boundless in expanse, has been suddenly set free from the worst of oppression, has been given the joy and happiness of a free, self-conscious existence? [Applause.]

With what emotions are we inspired who have come to you as messengers of these great events, as bearers of the new principles proclaimed by the Russian Revolution.

May I be permitted to reiterate the expression of the feelings that stir our hearts and, impressed as I am by the might and grandeur of the wonderful events, welcome and greet you on behalf of free Russia? [Applause.]

Here at the very cradle of representative government I feel it proper to recall the very moments of birth of constitutional life in Russia which presented itself some 12 years ago at the time of the first Russian Revolution.

It was then that the Duma came into being. From the very inception of this assembly the old authority endeavored to curtail the powers that had been conferred on it. Its sole existence was an uninterrupted struggle; but in spite thereof, notwithstanding the limitations and narrowness of election laws, the Duma was bound to play a most important part in the national life of Russia.

It was the very fact of the being of a representative body which proved to be so fruitful and powerful.

It was that mysterious force of representation, force which draws everything into the whirlpool of legislative power, force the existence of which your American framers of the Constitution so deeply recognized and understood. It was that force which led the Duma, however limited, to express the feelings of Russia and frame her hopes during the world's great crisis, and made the Duma ultimately the center and the hope of national life.

It was the Duma who at the epoch when the old authority by vicious and inefficient management had disorganized the supplies of the country and brought the military operations to unprecedented reverse; it was the Duma who with energy and devotion called the people to organize national defense and appealed to the vital forces of the country to meet the German

attack and save the nation from definite subjugation. Again, when it appeared that the shortsighted Government, who never took advantage of the patriotic enthusiasm and national sacrifice, was not only incapable of leading the war to a successful end but would inevitably bring Russia to military collapse and economic and social ruin, it was the Duma again who at that terrible hour proclaimed the nation in danger [applause]; it was at the feet of the Duma that the soldiers of the revolution deposed their banners and, giving allegiance, brought the revolution to a successful issue. It was then that from the ruins of the old régime emerged a new order embodied in the provisional government, a youthful offspring of the old Duma procreated by the forces of the revolution. [Applause.]

Instead of the old forms, there are now being firmly established and deeply embedded in the minds of the nation principles that power is reposed and springs from and only from the people. [Applause.] To effectuate these principles and to enact appropriate fundamental laws—that is going to be the main function of the constitutional assembly which is to be convoked as promptly as possible.

This assembly, elected on a democratic basis, is to represent the will and constructive power of the nation. It will inaugurate the forms of future political existence as well as establish the fundamental basis of economic structure of future Russia. Eventually all main questions of national being will be brought before and will be decided by the constitutional assembly—constitution, civil and criminal law, administration, nationalities, religion, reorganization of finance, land problem, conditionment of labor, annihilation of all restrictive legislation, encouragement of intense and fruitful development of the country. These are the tasks of the assembly, the aspirations and hopes of the nation.

Gentlemen of the House, do not you really feel that the assembly is expected to bring into life once more the grand principle which your illustrious President so aptly expressed in the sublime words, "Government by consent of the governed"? [Applause.]

It is the provisional government that is governing Russia at present. It is the task of the provisional government to conduct Russia safely to the constitutional assembly.

Guided by democratic precepts, the provisional government meanwhile is reorganizing the country on the basis of freedom, equality, and self-government, is rebuilding its economic and financial structure.

The outstanding feature of the present government is its recognition as fundamental and all important of the principles of legality. It is manifestly understood in Russia that the law, having its origin in the people's will, is the substance of the very existence of State. [Applause.]

Reposing confidence in such rule, the Russian people are rendering to the new authorities their support. The people are realizing more and more that to the very sake of further freedom law must be maintained and manifestation of anarchy suppressed.

In this respect local life has exemplified wonderful exertion of spontaneous public spirit which has contributed to the most effective process of self-organization of the nation. On many occasions, following the removal of the old authorities, a newly elected administration has naturally arisen, conscious of national interest and often developing in its spontaneity amazing examples of practical statesmanship.

It is these conditions which provide that the provisional government is gaining every day importance and power; is gaining capacity to check elements of disorder arising either from attempts of reaction or extremism. At the present time the provisional government has started to make most decisive measures in that respect, employing force when necessary, although always striving for a peaceful solution.

The last resolutions which have been framed by the Council of Workingmen, the Congress of Peasants and other democratic organizations render the best proof of the general understanding of the necessity of creating strong power. The coalitionary character of the new cabinet, which includes eminent socialist leaders and represents all the vital elements of the nation, therefore enjoying its full support, is most effectively securing the unity and power of the central government, the lack of which was so keenly felt during the first two months after the revolution.

Realizing the grandeur and complexity of the present events and conscious of the danger which is threatening the very achievements of the revolution, the Russian people are gathering around the new government, united on a "national program." [Applause.]

It is this program of "national salvation" which has united the middle classes as well as the populists, the labor elements, and socialists. Deep political wisdom has been exhibited by subordinating various class interests and differences to national welfare. In this way this Government is supported by an immense majority of the nation, and, outside of reactionaries only, is being opposed by comparatively small groups of extremists and internationalists.

As to foreign policy, Russia's national program has been clearly set forth in the statement of the provisional government of March 27 and more explicitly in the declaration of the new government of May 18.

With all emphasis may I state that Russia rejects any idea of a separate peace? [Applause.] I am aware that rumors were circulated in this country that a separate peace seemed probable. I am happy to affirm that such rumors were wholly without foundation in fact. [Applause.]

What Russia is aiming for is the establishment of a firm and lasting peace between democratic nations. [Applause.] The triumph of German autocracy would render such peace impossible. [Applause.] It would be the source of the greatest misery, and, besides that, be a threatening menace to Russia's freedom.

The provisional government is laying all endeavor to reorganize and fortify the army for action in common with its allies. [Applause.]

Gentlemen of the House, I will close my address by saying Russia will not fail to be a worthy partner in the "league of honor." [Applause.]

The members of the Russian commission then took their places at the right of the Speaker's rostrum, and the Members of the House were presented to them.

The distinguished visitors were then escorted from the Hall of the House.

AFTER RECESS.

The recess having expired, the House was called to order by the Speaker.

CONSERVATION OF FOOD AND FUEL.

Mr. CANDLER of Mississippi. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4961.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4961, with Mr. HAMLIN in the chair.

The CHAIRMAN. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Mr. HAUGEN. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. MEEKER].

Mr. MEEKER. Mr. Chairman, I send an amendment to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amedment offered by Mr. MEEKER: Page 12, line 18, strike out all of section 12.

Mr. MEEKER. Mr. Chairman and gentlemen of the committee——

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] and the gentleman from Iowa [Mr. HAUGEN] will please give attention to what the Chair wishes to say. It was agreed this morning that each amendment as presented would be disposed of at the time. The amendment has just been reported from the desk, striking out all of section 12. Of course, if there are any amendments to perfect that amendment, they would have to be offered first.

Mr. LENROOT. I suggest that the gentleman proceed and wait for the other amendments after this amendment is disposed of.

Mr. MEEKER. Mr. Chairman and gentlemen, it is my candid belief that this is probably, so far as affecting the food supply is concerned, the most dangerous section of any in this bill. As has been mentioned here a number of times during the discussion of the bill, we know that a few weeks ago a bill was first drafted which carried the provision for fixing the maximum price on foodstuffs. That was stricken out in the committee, because it was admitted finally by friends of the bill that it could not be done. I am not going to take time now to discuss the constitutionality of this section. When the gentleman from North Dakota [Mr. YOUNG] this morning wanted to know if there was anyone here who did not believe this section to be constitutional, I suggested that for one I did not, and when I sat down the gentleman from New Jersey and a number of

gentlemen sitting around said it was their opinion that a large majority of the House did not believe that this is a constitutional provision.

I do not think it is constitutional, and I believe that even if it should be passed in the House it will not get through the Senate. I am getting tired of having the House draft bills and hurry them over to the Senate, as was done with the revenue bill, and then see the work done over there.

Now, let us think; and I want the attention of the chairman of the committee and of the committee as to the practical dangers of this section. A short time ago we passed a bill here that provided for the stimulating of agricultural activities in this country. The chairman of this committee knows that since I have been a Member of this House I have worked for and voted for every appropriation suggested by the Committee on Agriculture looking toward the stimulation and the conservation of food products of this Nation. I am willing to do so yet. Nevertheless, I believe that the practical effect of this section will be more disastrous on the general food supply than anything else that we can possibly do. Now, let us take a practical illustration. If this section could be made to apply to certain specific districts of the United States, it would not be so bad. But look at this for a moment. Take the great Middle West, where diversified farming is carried on. Oats, corn, and wheat are the chief staple crops there, aside from the grasses. Now, as suggested by the gentleman from Texas [Mr. YOUNG] the other day, suppose that the Government discovers in the general reports from throughout the world that there is going to be a corn shortage or a wheat shortage. In advance of seeding time the President is to announce a minimum price which the Government will guarantee for this product. It now is for only 18 months. Suppose that I am an Indiana farmer, and I have a farm out there in Indiana, and we are doing all we can to produce as much as we can of the diversified crop; but suppose that I am putting in, we will say, 50 acres of corn and 50 acres of wheat and 50 acres of oats, and the general outlook is that there is going to be a corn shortage. Now, what is necessary? In order for the Government to stimulate corn production, they have got to guarantee a minimum on corn that will make it more profitable for me to grow corn than it will for me to grow wheat. What will I do? Just what you would do. I say, "All right; next year, instead of growing 50 acres of corn and 50 acres of wheat, I will take the Government guaranty on corn and grow 100 acres of corn and no wheat."

Mr. CALDWELL. Will the gentleman yield?

Mr. MEEKER. I will.

Mr. CALDWELL. As the gentleman well knows, crops have to be changed on the land?

Mr. MEEKER. I know that. I was brought up on a farm. And I know this much about farming, that the farmer will put in the crop that he thinks will pay him the best immediate return. If you could underwrite corn in Texas, for instance, and cut out Illinois and Indiana and Iowa and all the rest of the corn-growing States, so as to stimulate Texas corn growing, that would be a different proposition; but the Government of the United States, in order to stimulate corn growing in Texas, has got to underwrite the corn crop of this Nation. Or, if it wants to stimulate the growing of wheat, it has got to underwrite the whole crop of America, or any other crop which it may wish to stimulate in some community. It not alone deals with a particular section but with the whole Nation. By proclamation the President may offer a minimum guaranty, but that minimum guaranty on the part of the Government becomes the maximum pay crop for the man to whom the guaranty is made, or else he will not grow it. If you will stop to think of that suggestion for a moment, any crop which may be underwritten by the Nation immediately, so far as the planter is concerned and the farmer is concerned, becomes his especial favorite, and that crop is to be planted and developed at the expense of the other grains.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. MEEKER. Yes.

Mr. CRAMTON. And as to a crop such as potatoes, if not covered by this bill the effect will be to discourage the production of that crop, which is already suffering from a shortage?

Mr. MEEKER. Absolutely. Every man in a diversified crop community is going to get under this guaranteed minimum price and take whatever he may get above that. Nevertheless, your minimum guaranty amounts to nothing to a practical farmer unless the minimum price is to a certain extent a maximum to him, and when he figures that he can make more on wheat and corn than on potatoes, and the Government guarantees the corn crop, he would say, "I will buy my potatoes." It means that the guaranteed crop which the Government will guarantee and for which it will give them 18 months for their seeding and harvesting will probably be increased 25 or 50 or 100 per cent more than any other crop. Why? Because it is absolutely underwritten by the Government.

I have only time to discuss a few other points in connection with this question to this extent: Since my address on the meat question the other day men have come to me and told me that what I told the House then of the disappearance of the swine and cattle from the Eastern States on westward coincided with their observation; and we know this: You take your chances on hog cholera; you take your chances on foot-and-mouth disease, and on all those other diseases that are threatening. And I want to say to the chairman of this committee that I am willing to vote, if necessary, $5,000,000 for the prevention of diseases amongst animals and amongst crops. That is the greatest conservation agency in this country, to save what we produce. But you say to a man, a corn grower, "We will guarantee your corn crop." At the present prices we will have to put that guaranty at nearly $1 a bushel. Suppose he has half a dozen brood sows. The hog cholera is in his neighborhood. He says, "All right; I will not take any chances on hog cholera and run the risk of feeding, and all that, when I have a Government guaranty on corn." It requires only a few minutes to drive that bunch of brood sows to market, and he is then rid of all his risk. The fact that you have guaranteed to him a price on corn, which makes corn growing profitable and attractive to him, takes away from him all the interest he might have as a meat grower. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. PURNELL].

The CHAIRMAN. The gentleman from Indiana is recognized for five minutes.

Mr. PURNELL. Mr. Chairman and gentlemen of the committee, in my judgment this is the most important and far-reaching bill that has been considered by this Congress. In making that statement I am not unmindful of that fateful night upon which we declared the existence of war between this country and the Imperial German Government. It has been suggested by many Members on this floor that this is the most important piece of legislation ever considered by the American Congress. It is an unusual bill. It is equally true that these are unusual times, and that unusual times demand unusual action. While it is true that in many respects this is an unheard-of measure, it is also true that the gravity of the present crisis demands some such action. The time is past for the discussion of our entrance into this struggle. We are in. The time is past for discussing the advisability or the method of raising an army. We have adopted the plan of selective conscription. We have provided for the money with which to equip the Army and conduct the war. There is one great question unsolved, and to my mind it overshadows the others. It is the question of feeding our people at home, our armies in the field, and the armies of our allies. It has frequently been said that the question of food supply will determine this conflict rather than men and money. If this be true, as I firmly believe it is, there can be no question as to the importance of this bill.

I shall vote for this bill. In fact, I shall grasp at it as a drowning man grasps at a straw. I shall vote for it in the belief and with the hope that it will bring relief to the vast army of consumers in this country who can no longer stand the excessive and unwarranted prices they are compelled to pay for the bare necessities of life. I shall vote for this bill in the hope that the workingman with a family to feed, whose wages have not kept pace with the soaring prices of food, shall find relief. I shall vote for this bill in the hope that this same man may provide fuel for his family without committing larceny or burning his furniture. I shall vote for this bill believing that it will provide a weapon whereby the Government may quickly and effectively destroy the iniquitious food pirate and food speculator, whose activities are little short of criminal. My only regret is that I do not have a hundred votes to hurl at the speculator who is able to hoard the necessities of life for profit to himself and who thus takes from the poor their very lifeblood. I want to make it impossible for any man or set of men to pile up the visible supply of any food product until it rots while children are at the same time crying for bread. I would jail the Ponce de Leon who follows no flag except the one on the windshield of his limousine and endeavors to inject perpetual youth into cheap eggs. I want to see fatter stomachs on the men who pick and shovel and thinner jowls on the speculator who grabs and hoards. To my mind the full stomach is the great need of the hour. [Laughter and applause.]

In my humble opinion here is a real opportunity to be of service to the people. From many sources we hear that much

of the action of this Congress is or will be unpopular. While I do not agree with this sentiment, yet I do want to say that if popularity is needed here is the opportunity. This bill should be passed quickly and with the least possible debate. Proportionally as we cease to lift up our voices and begin to run down food prices will our popularity increase. There is much about this bill I do not like, but, in my judgment, the good overshadows the bad. This is a war measure. It follows that we must grant almost unlimited power. I came to this Congress with a firm determination to stand by the Government and support this administration in every reasonable way during this crisis. I am proud to say that I have so far adhered to that resolution. I have swallowed a number of things that were not just to my liking in order that there might be as little delay and as little division as possible. I am supporting this bill in the same spirit. I am glad to swallow whatever there is of bad in it, if in so doing I may assist in relieving the people of these excessive and burdensome high prices.

It has been urged by a number of gentlemen who oppose this bill that it will injure the farmer. I have given this phase of the bill careful and earnest consideration and am convinced that the opposite is true. Certainly none of us want to injure the farmer. I am especially interested in him, because I have the honor to represent one of the finest agricultural districts in the country, whose farmers are second to none in ability, loyalty, and patriotism. I am interested in the farmer generally, because we must depend upon him as much as upon the boys in the trenches if we are to successfully wage this war. Bread is just as necessary as bullets. The farmers make up one-third of our population and feed the other two-thirds.

When it comes to framing war measures we should give to the farmer the same careful consideration we are giving the other classes and fields of activity. He is indispensable. He is loyal. He is patriotic always and never a slacker. He is the big cog in our machinery of war, without whose assistance and cooperation no conflict could be successfully waged. He only asks fair treatment, and I believe this bill will insure that. The farmer has always wanted to be rid of the food speculator, who profits by his toil. This bill not only makes it possible to do away with the food speculator, but in addition it gives to the farmer a guaranteed profit upon his products for a period of three years. It does more than that—it provides, in addition, that he shall not be limited in his profit to the guaranteed price. I believe the result of this bill will be to bring the producer and consumer closer together. Let us take up the slack, destroy the lost motion between them, and thereby help them both. I want to get at the middleman, the speculator, the food pirate, and the unscrupulous dealer. Because a dealer stands in the middle is no reason why he should collect from both ends. There is no valid reason why potatoes should sell in England at $2.10 per bushel and at $3.70 per bushel in the United States on the same day. There is likewise no valid reason why flour should sell in England at $8.20 per barrel and at $17.60 per barrel here on the same day. This is especially significant since the flour in both places was made from American wheat.

If by voting for this bill we can remedy this condition, we will have performed a wonderful service for the country. Unless we enact some such regulatory legislation as is proposed in this bill, this Congress must bear the responsibility of the suffering, bloodshed, and foot riots that will necessarily follow. I do not want to feel the responsibility of that neglect.

Another matter has been injected into the debate upon this question, both in this body and at the other end of the Capitol, which, it seems to me, is most untimely and unwarranted. There is much fear and trembling in certain quarters lest this man Hoover shall prove to be an autocratic food dictator. It is argued that he may abuse the tremendous power that may be given him. The House has nothing to do with that proposition. It is our duty to provide the machinery. It is the duty of others to put it in operation. We have trusted the President with the sons of this country, we have placed at his disposal the Nation's wealth, and I see no reason why we should hesitate to leave to his discretion the selection of an honest, patriotic American citizen to take charge of this great task.

Discussion of this phase of this subject resolves itself into mere speculation, and serves only to delay the passage of a bill that should now be in operation. Is the fact that Mr. Hoover has offered his services to his country and asks to serve without pay a cause for alarm? Are we to suspect every American citizen of having some ulterior motive who seeks an opportunity to serve his country in this crisis? It seems far-fetched that in this hour of the Nation's crisis, when the American consumer is being robbed and innocent children are crying for food, the passage of a bill calculated to give them relief should be delayed because of a suspicion lest the law may not be properly enforced. Like Nero, we fiddle while Rome burns. I do not know Mr. Hoover, and am not here to plead his cause; but I am willing to trust this great undertaking to this man of the people through whose efforts seven and one-half million suffering Belgians were saved from starvation. The smiling face of one Belgian baby rescued from starvation tells me more of the character of the man than the glum foreboding of suspicious persons. Personally I am for "Hoover, of Belgium."

I do not expect this bill to cure all the high cost of living evils, but if it will send workingmen home on Saturday nights with bags of flour on their shoulders instead of candy sacks of flour in their hands, as at present, I shall be content. [Applause.]

Mr. HAUGEN. Mr. Chairman, I yield five minutes to the gentleman from Iowa [Mr. SCOTT].

The CHAIRMAN (Mr. SAUNDERS of Virginia). The gentleman from Iowa is recognized for five minutes.

Mr. SCOTT of Iowa. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Iowa.

The Clerk read as follows:

Amendment offered by Mr. SCOTT of Iowa: Page 12, line 21, after the word "products," insert "being necessaries, as hereinbefore defined," and on page 13, line 5, after the word "any," insert the word "such."

Mr. SCOTT of Iowa. Mr. Chairman and gentlemen of the committee, this bill is supposed to regulate food supplies and fuel, termed in the language of the bill "necessaries." That expression, comprehensive of the subject of the bill, runs through all the sections but one. When it comes to the question of directing legislation against the man who hoards it is confined to food products and fuel. When you come to prohibit conspiracies and agreements calculated to unreasonably enhance the price, it is confined to food products and fuel. When you come to regulate the great exchanges of the country, you regulate those upon whose floors are sold food products and fuel. But when you come to that section of the bill which guarantees the price, then the language of the bill suddenly changes. We hear no more of "necessaries." Then we are dealing with "nonperishable agricultural products." Then we take in everything that is nonperishable that is produced upon the farm.

Now, I may be dull, but I am unable to comprehend why the southern farmer should be permitted to hoard cotton and conspire and agree concerning the price of cotton, and the northern farmer should be prohibited from so doing with respect to corn, wheat, oats, rye, and all of the other food products. I realize that we ought to regulate the great exchanges upon the floors of which the wheat and corn and pork and beef are sold. But I can not understand why no sacrilegious hand should be laid on the cotton exchange. Why should not the same rule apply to cotton and tobacco which applies to corn and wheat. And why should all the regulation, all of the burdens, all of the penalties, apply to one and none of them apply to the other?

It seems to me this bill ought to be corrected to reach every class that falls within the purview of its benefits, and this amendment is offered to correct that inequality of the bill. It confines the operation of this section to the same crops, to the same products, as the other sections of the bill apply to. [Applause.]

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will again report the amendment offered by the gentleman from Iowa.

The amendment was again read.

The question is on agreeing to the amendment offered by the gentleman from Iowa.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question is on the next amendment offered by the gentleman from Iowa.

Mr. HILL. What is it, Mr. Chairman? I ask that it be reported.

The CHAIRMAN. It has been reported. Without objection, the Clerk will again report it.

The Clerk read as follows:

Page 13, line 5, after the word "any," insert the word "such."

Mr. LONGWORTH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LONGWORTH. My understanding was that all these amendments were to be voted on at the conclusion of the debate and not as they were offered.

The CHAIRMAN. The permanent chairman of the Committee of the Whole [Mr. HAMLIN] advised me otherwise.

Mr. LONGWORTH. I understood him a short time ago to make that statement.

The CHAIRMAN. No. He advised me when I took the chair that the amendments offered from time to time of a perfecting nature should be voted on, but that an amendment

such as that of the gentleman from Missouri [Mr. MEEKER] to strike out an entire section would be reserved until the conclusion of the debate. The question is on agreeing to the amendment offered by the gentleman from Iowa.

The question was taken, and the amendment was rejected.

Mr. LEVER. I yield five minutes to the gentleman from Missouri [Mr. RUCKER].

Mr. RUCKER. Mr. Chairman, in the few minutes allotted to me I can not attempt to discuss the provisions of this bill, but I do want to give voice to my hearty and unqualified approval of this legislation. [Applause.] I again find myself wholly unable to agree with my colleague [Mr. MEEKER] who so eloquently addressed the House a few minutes ago on questions pertaining to agriculture. It makes no difference to him how many farm associations and farm organizations, representing and speaking for that great army of industrious citizens who till the soil, may study this bill and pronounce it good, it remains for the farmer from St. Louis to discover hidden dangers and to tell us how disappointing it will prove and how very bad it is. For one I am neither moved by his eloquence nor persuaded by his logic. [Applause.]

Mr. Chairman, I want in these few minutes to congratulate the committee in behalf of the country upon the splendid work it has done in bringing before the House this legislation, so full of hope and promise to those who produce as well as to those who consume. We have already passed provisions in the bill which will afford the farmer a guarantee of fair and reasonable profits on the products of his farm. We have agreed to other provisions which I believe will prevent the hoarding and monopoly of the great foodstuffs of the country. Those who gamble in food and who have grown rich, and who are hourly growing richer by trafficking in the food supplies of this Nation, will be warned by the passage of this bill that they must unlock their warehouses and let the people who want bread have their accumulated stores at reasonable prices. This legislation will make every laboring man rejoice. [Applause.]

I was deeply interested in the story so well related a few minutes ago by the distinguished gentleman from North Carolina [Mr. STEDMAN], the recognized Chesterfield of Congress. He told us that during the Civil War a vessel sent out by his good State with a cargo of food supplies and munitions for soldier boys in the field was being pursued and shelled by a hostile foe, and that the captain in charge, realizing the imminent danger to vessel and crew, was contemplating surrender when a beautiful North Carolina girl, her heart throbbing with love for those in dire need of the food which the boat carried, quickly determined there should be no compromise with or surrender to those who would take that food and withhold it from those who needed it. With a woman's intuition the young heroine lighted a pine torch and holding it aloft proclaimed to the officer that if surrender was attempted she would apply the lighted torch to the powder and by her own act destroy the boat. As a result of the undaunted courage and matchless heroism of that beautiful North Carolina girl the boys on the battle line had bread.

May I be permitted to draw a mental picture founded upon that interesting and thrilling story? I trust you will pardon me for suggesting that the distinguished chairman of the Committee on Agriculture [Mr. LEVER] combines the gentleness of a woman with the strength of a man; he is affable and genial, but firm and unwavering; he is politely considerate of all men, but resolutely unyielding to any man when duty appeals to him. His splendid record of official duty well performed and this consummation of his lofty purpose to bring joy and happiness into the homes and hearts of men, it seems to me, make the gentleman from South Carolina [Mr. LEVER] typical of the heroine of North Caorilna. [Applause.] And that this bill, held aloft by the distinguished chairman, who so ably presented and who has so zealously defended it, typical of the lighted torch in the story, may give ominous warning in no uncertain tone to the food pirates and gamblers in necessities that they shall no longer by the exaction of prohibitory prices withhold the staff of life from those who plead for it, but that, in obedience to the mandate of law, they shall open their warehouses, granaries, and plants and permit men to eat and live upon the payment of fair and reasonable prices, thus guaranteeing to our own soldier boys and our allied soldiers sufficient food and responding to the pathetic appeal for relief which comes to us from millions of people in our country. [Applause.]

I hope, Mr. Chairman, that when the vote is taken this body will by unanimous action carry glad tidings to the American people and that our united action may perhaps influence gentlemen in high authority elsewhere about this Capitol to do likewise, thus giving full and generous response to the appeal of the people for relief from conditions which menace us to-day, and which, if not remedied, may cast a blight over our fair land to-morrow. Let us do our duty and speedily enact this most valuable legislation. [Applause.]

Mr. HAUGEN. I yield five minutes to my colleague on the committee [Mr. WASON].

Mr. WASON. Mr. Chairman, House bill 4961, "To provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," now before us for consideration, is based upon the clauses of the Constitution of the United States commonly referred to as "war powers of Congress." The language thereof is that—

> Congress shall have power to declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water; to raise and support armies; to provide and maintain a navy; to make rules for the government and regulations of the land and naval forces; to provide for calling forth the militia to execute the laws of the Union; suppress insurrections and repel invasions; to provide for organizing the army and disciplining the militia; to make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or any department or officer thereof.

These powers of the Constitution are latent and little used or thought about in time of peace, as the activities of our people and the Government thereof are predicated, authorized, and controlled under other sections of the fundamental law of this land. When Congress declares war, by that very declaration the war powers of the Government, which are not exercised in time of peace, are relied upon to their fullest and most comprehensive force and are to be exercised and exerted by the President and Congress. Whenever war is declared every act performed by the Government in carrying on the war is done under and by virtue of that portion of the Constitution above referred to; every measure of Congress, every act of the President, every act of any department and the officers thereof is done under these so-called war powers of the Constitution.

Having declared war upon the Imperial Government of Germany, it is the duty of Congress to enact such legislation as is necessary to maintain our Army and our Navy to the fullest extent possible, in order that they may successfully cope with our enemies. To that end our armed forces must be supplied with the most scientific and effective weapons of conflict, and the personnel of those forces must possess health, strength, and ability to endure hardships and trials. To accomplish and provide these courageous, loyal, and patriotic representatives of our people with such strength it is imperative that we supply them with necessary food and raiment, and it is equally necessary that our loyal people who are daily engaged in supplying munitions, food, and raiment for the men actually engaged at the scene of conflict should be equally supplied with the necessities of life here at home.

In recognition of this extraordinary situation and the imperative necessities attending the same, I believe that the principles upon which the present bill has been drafted are wise, conservative, and will materially aid as one of the controlling features in the successful prosecution of this war.

The chief aims of the present bill before us are to stimulate and encourage production of foods, to eliminate unnecessary waste, to conserve in a scientific way the supply of foods and fuel, to prevent unreasonable hoarding, to restrain and prevent injurious speculation, to prevent deceptive practices, to prevent extortion and aid a more equitable distribution of food and fuel.

The authority for this bill rests upon the war clauses in the Constitution, which are not applicable in time of peace. While the bill is comprehensive and deals with a number of situations, it can be divided into two parts, having for its aim two important and legitimate functions, first, encouraging the production of foods and feeds to the highest extent that is possible for our producers to provide; second, to conserve those products, to prevent waste, manipulation, hoarding, and unequitable distribution of those products and economical use thereof.

I believe, as has been expressed here, that what the country wants is affirmative action on this measure rather than argument. I do not interpret that, as some Members of this House do, to mean that we should rush through this body or the other body at the other end of the Capitol important legislation affecting every man, woman, and child in this country without due and deliberate consideration of the terms of the measure; but I do interpret it, that it means consistent with good, safe, sane, and careful legislation, that we should exercise as much speed and progress as we can with this and other important legislation. Right here I want to say that the chairman of our committee has proceeded upon that principle of going carefully, calmly, with but one thing in view——

Mr. DILLON. Will the gentleman yield?

Mr. WASON. I decline to yield. I am sorry but the time will not permit yielding to my colleague. The chairman of our committee has pursued that principle with one thing in view, that whatever we do we should do for the benefit of all, and do it with reasonable dispatch; and in committee and on this floor, considerate of all interests and all wishes, he has proceeded as rapidly as possible.

During the discussion it has been said that this bill singles out the farmer for unnecessary, arbitrary, and unreasonable control, and that section 12 is a menace to the agriculturalist—a restriction upon him. Such a statement is erroneous, misleading, and inconsistent with the truth. These words come principally from the man who never has had his hand upon a plow or used the hoe continuously for five long hours in the forenoon. [Applause.]

Nowhere in this bill is the farmer or producer of foods subject to control by any department or person under any authority contained in this bill. Section 12 confers authority upon the President for the purpose to encourage and benefit the farmer to increase production of nonperishable agricultural food products during the continuance of this war. He, the President, "is authorized from time to time, seasonably and as far in advance of seeding time as practicable, to determine and fix and to give public notice of what, under specified conditions, is a reasonable guaranteed price for any such products (referring in terms to nonperishable agricultural products produced within the United States), in order to assure such producer a reasonable profit."

Can any reasonable person claim that this section restricts or limits the liberties and activities of our agricultural producers? No. That is solely put in this bill for his benefit and guaranty against loss. It authorizes the President, prior to seeding time, to fix and give public notice of a reasonable guaranteed price for the products of the farm that are nonperishable, in order to assure the farmer a reasonable profit. Take wheat for illustration. In 1915 we produced a little over 1,000,000,000 bushels. We desire to increase that production by four or five hundred thousand bushels, and while the Government is urging the growers of wheat that it is their patriotic duty to produce the largest amount possible for domestic use and the use of our allies, if the war should suddenly terminate and an active market for that quantity of wheat should suddenly cease and the agriculturist should find himself with an overabundance of crop as compared with the demand for the same, the price thereof must of necessity drop and might reach a level below the point that it cost the agriculturist to raise and produce, and he would therefore suffer a loss in proportion to the extent of his crop. Is it fair to urge him to work early and late, to encourage him to exert every sinew in his frame and do his patriotic duty to sustain our Army and Navy and our people in this, our hour of conflict, and suddenly leave him with a bumper crop upon his hands and perhaps bankruptcy facing him as a reward for his willing and arduous labor?

The Committee on Agriculture and this Congress does not believe that the American farmer should be left in that unfortunate situation; to meet that situation it has authorized the President to ascertain the cost of production, add to that cost a reasonable profit, and announce prior to seeding time what that price shall be, and in case the domestic markets of this country and the foreign markets do not need this product for consumption, instead of asking the farmer to sustain the loss he can draw upon the Treasury of this country and receive the guaranteed price upon which he relied when he sowed his seed, nursed his crop, and harvested it. It is a guaranty to the agriculturist against loss. It is an insurance and protection for him, and him alone, against loss, and no man who is a true friend of the agriculturists can sincerely say that this clause of the bill, if properly administered by the President, can be other than a benefit and help and protection to the American farmer so far as nonperishable products which he raises are concerned.

It is said by some that it establishes the price which the farmer shall receive. The need of the farmers' products in the market, the demand for them, establishes the price, and the reasonable guaranteed price provided for in this bill can have only one possible effect, namely, to protect the farmer from being obliged to sell his product for less than it cost him to produce. What that reasonable price shall be Congress does not attempt to say; that is to be determined by the President or his expert or administrative officer, and if they do their duty and act wisely in this matter, as I hope they will, the effect of this legislation can only be beneficial and of a protective character.

For years and years the American farmer has had the price of his wheat fixed by some grain exchange, and it is interesting to note how low it has been, and how uncertain and variable it has been. An examination of the following table will convince any reasonable man acquainted with the situation that the American farmer is safer in allowing the President to fix a reasonable guaranteed price on his wheat before seeding time than to wait until harvest time for the manipulators and the grain exchanges to fix the price at which they will purchase when the crop is ready to harvest. In years gone by the farmer had no idea at seed time what the price of his harvested crop would be. He chances the climatic conditions of the season for his crop; he chances the judgment of the grain exchanges and manipulators for his price at harvest; but under this bill he only chances the climatic conditions of the season and knows full well the price guaranteed to him will mean the minimum price which he must receive for his product. Again, if the reasonable guaranteed price authorized to be fixed by the President in this bill before seeding, and announced before seeding time, convinces the producer that it is too low for him to operate under it at a profit, he can change his activities from wheat to some other product; the fact that this reasonable price is for the purpose of stimulating the farmer to grow the product will force the administrative officers to fix it at such a point that it will be attractive and encourage the farmer to produce.

Entering into this reasonable guaranteed price will be the cost of labor, the cost of machinery, and all the little items that the farmer must bear in producing the crop.

A statement showing the average price received by farmers of the United States in each month for the years 1910 to 1917, inclusive, for wheat, corn, oats, barley, and rye.

Dec. 1	.....	122.1	83.4	86.5	63.4	66.3	83.2	71.5

By the above table you will notice that in the four months of harvest time in the great Northwest—August, September, October, and November—the price of wheat has fluctuated between 77 cents per bushel as the minimum in the last seven years and $1.58, and that the price to the farmer is always the lowest at the harvest season, while the average price for August wheat during that same period has been 91⅞ cents per bushel to the farmer of this country.

By this bill, if wisely administered, the price to the farmer, the reasonable guaranteed price, will remain unchanged from the day he begins to harvest his crop until the last bushel thereof is sold.

Who says that the American Congress is not protecting instead of unduly restricting with limitations the liberties and privileges due to the men who feed the world? The other and beneficial features of this bill are the tendency and purpose to reduce the constantly increasing cost of foods and fuel to that great class of our people known as consumers. Without legislation of some sort along the line of principles employed in this bill for the relief of the foodstuffs to our people no man can predict to what height they will reach during this war. Already the toiler is forced to curtail his consumption in order to make his pay envelope balance with his purchases.

The provisions of this bill authorize the President to prohibit hoarding, manipulation, deception, unlawful cornering, and limit distribution of food. In other words, it intends and its purpose is to allow the underlying principle of supply and demand to work without hindrance, friction, or manipulation. We believe that the extreme high price of coal and other fuel is due to restricted distribution and manipulation by the owners of the mines and the intervening agencies between the mines and the consumers. We believe that the extreme high prices of foods are due to the same causes. If those agencies can be controlled and regulated so that the underlying principle above referred to—supply and demand—can work in a natural way, there can be a material reduction to the consumer in a time of national peril, in a time of war, in a time of uncertainty, in a time when a large portion of the world are nonproducers by reason of being engaged in mortal conflict.

We can not describe our disgust and abhorrence of any agency between the producer and the consumer who will attempt by deception, by waste, by manipulation, and by hoarding to extort from the pockets of our people the last penny that they have, that is needed to buy bread for themselves and their families. The horror attending the sinking of the *Lusitania* by the premeditated, willful, and cruel act of the German submarine is no more shocking or revolting to the human mind than the acts of those who by unfair and deceptive practices raise the price of foods to an unnatural height without any thought or regard or sympathy for the consuming millions dependent upon their earnings for bread, meat, raiment, and shelter, and it is to guard against this class of our citizens that many of the drastic and far-reaching purposes of this bill are aimed.

This bill, if enacted in its present form, we believe will encourage production and tend to reduce the price of foods to the consumer without injuring or imposing any particular hardship upon business activities intervening between the producers and the consumer, with a drastic and far-reaching provision against the food exchanges that are manipulated for the purpose of speculation, which benefits only one, the particular person, whose purpose is extortion and excessive profit.

There is one feature in this bill relative to licensing manufacturers of food products that I think could be redrafted and improved, but perfection according to an individual's notion can seldom be obtained. Hence I will refrain from criticizing this section, which is section 5 of the bill before us, and will leave it with the suggestion that I favor the elimination of the license feature therein contained. I think it is unnecessary to subject our people to the inconvenience of obtaining a license to do business as therein provided. The elimination of the license feature would not weaken the bill and would avoid delays and inconvenience.

Realizing that we are in war, and realizing the responsibility of the direction and controlling of our fighting forces by the Constitution rests with the Chief Executive, let us as representatives of the people faithfully, willingly, and patriotically lend to him in this present crisis our best effort, thought, and sympathy, to encourage him in the discharge of his responsibilities, and assist in guiding him in the administration of our affairs, so that, whatever may be our sacrifice and our hardships, when peace shall finally be declared and the noise of the explosive and the ripple of the U-boat, with their death-dealing force, shall cease and the world shall again resume its legitimate activities, upon which our existence is predicated, we can then look back and point with pride that every citizen in this broad land, whether in private life, in official life, or whatever his station was, did his bit for the one common cause in protecting the flag of this Nation and extending the principles of democracy, liberty, and peace throughout the entire world. [Applause.]

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. Mr. Chairman, I offer four amendments, which I ask to be considered as one, as they deal with the same subject.

The Clerk read as follows:

Amend section 12, page 12, lines 24 and 25, by striking out the following: "seasonably and as far in advance of seeding time as practicable."

Amend, in section 12, page 12, line 21, after the word "products," by inserting the following: "and perishable agricultural products used in canning."

Amend, in section 12, page 13, line 6, after the word "products," by inserting "and perishable agricultural products used in canning."

Amend, in section 12, page 14, line 16, after the word "transport," by inserting the word "can" or "packed in cans."

The CHAIRMAN (Mr. SAUNDERS of Virginia). The gentleman from Maryland asks unanimous consent that these four cognate amendments be voted on as one. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Chairman, I am heartily in favor of the bill. I think it is entirely proper and necessary. The way prices are rising no one can tell to what extent they will mount. But it does seem to me that it ought to be limited purely to nonperishable articles. I realize that it is hard to fix a price on vegetables that will perish in a short time, but when you attach to it what these amendments propose, that the bill shall apply also to perishable articles used in canning, it obviates that. When you take your vegetables to market and the packer buys them and puts them in cans they are as much nonperishable as wheat, corn, or oats. It is as essential that people should have packed peas, beans, tomatoes, and things of that kind as it is that they shall have the nonperishable articles.

These amendments of mine merely carry into effect the intention that when these articles are sold for canning purposes, whereby they become nonperishable articles, the President shall have the power to fix the price. It does not direct the President to do it, it merely authorizes him to do it, and if we want the farmers to produce extra crops we should arrange that they can be guaranteed.

Mr. CRAMTON rose.

Mr. LINTHICUM. I can not yield to the gentleman, for I have but little time and probably can not get any more. The farmers of my State, acting on the request of the Government to plant extra food products, have planted many acres in addition to what they normally plant, articles which you call perishable articles. When they take those to market they find that they can not sell them for enough to pay for the planting, the gathering, and the marketing of them, and the consequence is that the farmers in many parts of my State are becoming too poor to put in crops for the next year. If we had some power vested in the President to fix the price for him, the same as for the man who grows wheat and corn, they would have an incentive to go ahead and put in the crops. It is just as the gentleman from Missouri said a while ago, if you want the vegetables packed in cans you should adopt such amendments as these, because if you do not the farmers would prefer to plant crops which are guaranteed a price. The truck farmers in raising perishable vegetables for canning purposes, and having no guaranty, will plant something else, and we will be deprived of a plentiful supply of canned goods.

These amendments are for that purpose—merely to allow the President to fix the price for these articles which go into cans and become nonperishable articles. The other amendment, which strikes out the words "seasonably and as far in advance of seed time as practicable," merely lets the bill go into effect at once, so that the President and those in authority may have charge of the crops this fall instead of waiting until next year. Seed time for this year has passed, and therefore we could not arrange it until next year, and for that reason I have also offered that amendment to give immediate relief.

I think this is a very serious and important amendment to the people of this country generally. If they want to get crops for canned goods next year and the years to come, unless the farmer has an incentive to plant the things that go into the can, as well as those farmers who plant nonperishable things, they will surely adopt some crop for which they can have a guaranteed price. [Applause.]

Speaking generally of this measure, I wish to say that there can be no halfway station. The worst thing that could happen,

both from the standpoint of the people as a whole and from the standpoint of legitimate industry everywhere, is that the control established should be so restricted as to be only partial or incomplete, for such control would not serve to reduce the uncertainty in which business now finds itself, but, on the contrary, would increase this uncertainty by placing legitimate industry at the mercy of both the gambler and the parasite. There is a paramount necessity for food control or food regulation during the present war. The necessity is neither past nor future; it is present. It is manifest by the daily increase in the price of foodstuffs, an increase which will continue to grow unless we pass this bill.

The correct solution of this problem lies in the curbing of extortion and the elimination of food hoarding. This action is highly necessary and is of vital importance to our allies as well as to ourselves. The wage earners of this country are united in their demands for the passage of this bill, and rightly so. Under present-day wages—and they are in most cases very high—a man can not properly feed his family with flour at $16 per barrel, round steak at 32 cents, potatoes $1 per peck, cabbage 15 cents a pound, and so forth. Nor should he be compelled to do so when the farmer is selling them for slightly above the usual price.

What we need and will obtain through the operation of this law is the cooperation of the various stages through which the food must pass before it reaches the consumer. There is no reason why the farmer should not obtain a good profit on what he grows and sends to market; nor why the canner or holder should not obtain a fair profit for the work he performs in preserving the food for future use, nor why the middleman should not receive a good, living profit for the distribution of food to the consuming public. This will not greatly increase the cost of food to the public, provided these people are regulated and the monopolies, hoarders of food, and those who gamble on the market are eliminated.

There is no farmers' trust or combination that sends the price of farm products sky high when there is no reason for it so ascending, and all that he asks is a fair return for his produce, and he is willing to take his chances with prices actually fixed by the law of supply and demand. The trouble, to my mind, arises after the corn, wheat, and other products leave the farm and are hoarded in warehouses and in the hands of speculators. These speculators are the men we aim at and whom we must eliminate, or else the consumers will be continually defrauded and further pauperized.

The farmers of the Nation realize that an adequate control of the food products and elimination of all speculation and cornering of the market will result in a wholesome stimulation of production and will benefit greatly the agricultural population by assuring them a just price and a free market to reach the consumer. The business men of the cities say that a control of this vital subject is necessary and can not in any way injuriously affect legitimate business.

To the consumer this bill gives the assurance that the price he has to pay will not represent a price inflated by hysterical or uneconomical purchases by foreign Governments, by speculation or conspiracy, or by the imperative and compulsory demands of war; but, on the contrary, that the price he has to pay will be a reasonable price and will bear a reasonable relation to the price which the farmer received for the crop in the first instance. Neither the producer nor the consumer has a right to ask more.

To the business man this bill gives the assurance of relief from the awful uncertainty which now surrounds every trade relation and transaction, an assurance that he will be informed as to just what his Government expects, both in the manner of conducting his business and the service which he is expected to render.

It is national in its scope and is designed to protect all classes. It guarantees to the farmer the cost of production and a reasonable, even a liberal, profit, taking into consideration the cost of everything he must buy to produce the crops, and likewise protects the middleman and consumer. It is our duty to see that the products of his labor shall reach the consumer without the waste necessarily incident to an uncontrolled and unorganized system of distribution. It is our duty to see that the food needed for our people reaches them at a fair and just cost and is not made the toy of the gambler, the manipulator, the speculator. No honest business man can be hurt by the power conveyed to the President by this bill. Some slight inconvenience may be occasioned, but it is not intended to, nor do I believe it will, injure him.

I quote an editorial which appeared in the Evening Sun, of Baltimore, Wednesday, June 20, 1917:

THE URGENT NEED FOR FOOD CONTROL.

Whenever Congress balks on so obviously necessary a measure as the food-control bill, look for the colored gentleman in the woodpile. If, as Mr. Hoover stated yesterday—and who doubts it?—the food speculators are now making $50,000,000 a month more than they should out of the American people; and if, as reported, the food speculators have one of the biggest lobbies seen in a long while in Washington, the reason for the opposition in Congress may be easily guessed.

England must buy wheat and flour in the United States and pay enormous ocean freight rates to get it across the Atlantic, and yet bread is cheaper in London than in Baltimore, and the same is true of a number of staple articles of food raised right here in America. Mr. Hoover says that flour should never have gone above $9 a barrel, and yet it went to $14. Evidently somebody is getting too much "rake off" in the passage of food from the field to the dinner table.

The argument that a food-control bill would result in smaller receipts to farmers for their products is fallacious and to a large extent hypocritical. It is true that the farmers are getting high prices for what they raise, and it is right that they should, but the high cost of living to the ordinary consumer has little to do with the prices paid to farmers. For example, last winter we were paying 50 cents and more for eggs. Did the poultrymen get any such price? Not at all. They sold the eggs at much lower prices when eggs were plentiful, and these were stored by speculators, one of whom is said to have made more than $1,000,000 by buying cheap from the producer and selling high to the consumer.

The prospects are for a big crop of potatoes and other foods of the kind. When these are harvested speculators are very apt to buy them in enormous quantities and hold them until a shortage next winter boosts prices and then unload the food to the people at the high rates.

Are the American people in favor of a law which would stop that kind of manipulation? There is not the slightest intention of making Mr. Hoover a "dictator," and the only sort of dictating he is likely to do is in preventing the big attempts to corner the food of the people. Apparently the Congressmen who are opposing the food-control bill would give the speculators a free hand.

From now on the success of this great world-wide war will depend upon the United States. It will be our duty to complete the huge task which we have undertaken, and assist our brave allies in holding in check our mutual enemy. Not only must we furnish troops, but we must furnish the food to feed ourselves and our allies—the food that will win this war.

We have always exported large quantities of food, and each year produce billions of dollars' worth of agricultural products. Have we not more acreage of tillable land than all of Europe, Russia included? We can produce food for half the population of the world. Common sense and prudence dictate what steps should be taken to keep this enormous production out of the hands of the food speculators, to see that an efficient system of marketing and distribution is worked out, and that waste and extravagance should be reduced to a minimum. This is a war of efficiency. It is to be won by the nations that are most efficient. It is a contest as to whether a democratic republic is more or less efficient than a monarchy. Food is life. All of the great nations now at war have enacted legislation regulating the production, distribution, and consumption of food, and the efficiency of this Republic is to be determined largely by the kind of food-control bill passed by the American Congress. That it will be the kind calculated to produce the best results, and that it will produce the desired results, I am confident.

The measure before us may be summarized as follows:

First. It penalizes the willful destruction of necessaries for the purpose of increasing the price thereof or in any manner reducing the supply.

Second. It very carefully defines hoarding, which it penalizes. It does not apply to any farmer, gardener, or other person who accumulates or withholds the products of farm, garden, or other land under cultivation by the individual.

Third. It enables the President, under effective penalties, to license and regulate importation, exportation, manufacture, storage, or distribution of any necessaries, if he finds such steps essential to economical manufacture and equitable distribution. The licensee is first given an opportunity to conform charges, rates, and practices to the President's direction. This section does not apply to any farmer, gardener, or other person with respect to the products of any farm, garden, or other land owned, leased, or under cultivation by him, nor to any retailer with respect to the retail business actually conducted by him, nor to any common carrier.

Fourth. It authorizes the President, when he deems it necessary to the purposes of the act, to purchase, produce, manufacture, store, or sell any necessaries. He may commandeer any necessaries, as well as storage space therefor, paying for what he takes; and if the party entitled to payment is not satisfied he may have recourse to the courts.

Fifth. The bill empowers the President, if he deems it necessary to an adequate and continuous supply of necessaries, to requisition and take over, for use or operation by the Government, any factory, mine, or other plant or part thereof. He must make what he considers just compensation to the party entitled to payment, who has an appeal to the courts if dissatisfied.

Sixth. It authorizes the President to regulate or close exchanges, boards of trade, and similar institutions, when he finds such action necessary, in order to prevent undue enhancement or fluctuation of prices of necessaries, injurious speculation, unjust market manipulation, or unfair and misleading market quotations. Violation of this provision is punished by fine not exceeding $10,000 or imprisonment for not more than four years, or both.

Seventh. It authorizes the President to fix a guaranteed minimum price for any nonperishable agricultural products produced within the United States whenever he finds stimulation of production essential and such action needed to effect such stimulation. To sustain said price he may, if he finds it advisable, impose import duties or purchase the products for which a price has been guaranteed for storage, for sale to any person or to our allies, or for use by the Government.

Eighth. It authorizes the President to regulate or prohibit the use of foodstuffs in making alcoholic or nonalcoholic beverages or to reduce the alcoholic content of any beverage if he considers such action necessary to assure an adequate and continuous supply of food.

It is the solemn duty of the American Congress to enact this legislation. We have embarked upon a noble mission. The forces of the opposing powers—the forces of autocracy and democracy—are engaged in a struggle for the domination of mankind. The side that wins will govern our destinies for centuries to come. If the millions of young men who are entering the contest in the cause of freedom and humanity should suffer because of lack of food, because of our failure to adjust production or arrange for the distribution, or if their loved ones at home should feel the pinch of want, through the failure of Congress to pass adequate legislation covering this subject, we would never cease to reproach ourselves for such wanton neglect.

No one can tell how long this war will continue. Plans have been laid down for its continuance for three years in a military sense. We should do the same in the food-producing sense. I should like to see not alone the farmer protected by a fair profit, but the canner or preserver of food should receive likewise his fair profit, and the distributor to the consuming public a fair profit. These profits, combined with the cost of production, would not advance prices to any considerable extent. It is not the farmer, the legitimate packer, nor the distributor who is making a fortune out of the food situation and who is causing our people to pay more for food than those countries of Europe who have been at war for over two years. It is the manipulator, the gambler, the hoarder of food products, and the speculator who are becoming rich at the expense of the stomachs of our people. They are enemies to the people, slackers of the worst kind. They impoverish those who are willing to risk their lives for the flag and rob their families as well.

I do not believe this bill can be too drastic nor too strong if it is to help the people in the food situation. It is an outrage that the people of this country should be paying 10 cents for a 14-ounce loaf of bread, while the people of England are receiving 35 ounces, made of our own wheat, for the same price. It is an outrage that the cost of food products generally have advanced 54 per cent from October of last year to May of this year. Things are radically wrong and must be corrected.

The farmer has little to do with these high prices. There must be some general regulation of this food situation. The food can be produced and is produced at a sum slightly in advance of previous years, and by this bill and the proper enforcement of it the people of our country will receive their food products just as cheaply as those of England.

The President is Commander in Chief of our Army and Navy. Over $7,000,000,000 have been voted to carry on this war. He has been empowered to draft as many men as may be necessary for our Army in Europe and in this country. He has proven equal to the task, and his popularity with the people increases constantly every day he is in the White House. Certainly we can leave to him the management of this food-control bill, and to his official, Mr. Hoover, who has spent a large fortune and all of his valuable time in the feeding of the Belgians. Certainly he will use good discretion and wide knowledge in the conduct of the food situation of America, his native land.

Unless this bill becomes a law, the poor of our country and those receiving moderate salaries certainly can not continue at present prices. We speak of the great financiers and of the great work they have accomplished and the wonderful corporations they have formed, and so forth. Certainly the greatest financier of the present time is the woman who can take a salary of $15 per week and manage to feed her family and to provide sufficient for her husband to carry on his work. She has been doing this, but no one knows what reserve she has been drawing upon, but certainly it can not be continued much longer, and the necessity for the passage of this bill is obvious to everyone.

Finally, I want to say that Mr. LEVER, the chairman of the committee which formulated this bill, should be blessed by every consumer in the land. He has been painstaking, hard-working, and has a heart for the producer and the great consuming public as well. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman, on behalf of the committee I want to say that this matter was thoroughly discussed in the committee, and the committee arrived at the conclusion that it ought not to be included in the bill, and I hope that the amendment will be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland.

The question was taken, and the amendment was rejected.

Mr. HAUGEN. Mr. Chairman, I yield to the gentleman from Michigan [Mr. CRAMTON].

Mr. CRAMTON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 12, line 21, after the word "products," insert the words "including potatoes."

Mr. CRAMTON. Two great economic needs of America today are, first, the greatest possible increase in the production of staple foodstuffs in order that our supply may be sufficient for our own needs and the needs of our allies, and, second, regulation of the handling, sale, and consumption of such foodstuffs in order that waste, hoarding, speculation, and extortion may be eliminated and the necessaries of life kept within reach of the buying power of our people.

Those needs it is the purpose of this legislation to meet. The bill is autocratic, radical, unprecedented, startling in its provisions, but in the main I believe it to be a remarkably successful attempt to meet the unprecedented needs of this great national crisis. I realize the needs of the time, I realize the universal demand by the people upon Congress for relief, and I cheerfully am giving my support to this legislation.

The section before us, section 12, provides for a guaranty by the Federal Government to "the producers of any nonperishable agricultural food and feed products." This guaranty is to be given "whenever the President shall find that an emergency exists requiring stimulation of production." This section is aimed primarily to meet the first of the great needs to which I have above referred, the greatest possible increase in the production of staple foodstuffs. It is ultimately for the benefit of the great consuming class here and among our allies, although immediately helpful and encouraging to the producing class.

I fear that in at least one important respect the language is not broad enough. I am not positive whether the language now in the bill is broad enough to include potatoes. They are certainly not as nonperishable as beans, wheat, or corn, and they are not as perishable as tomatoes and similar products for canning. I am advised that Mr. Hoover informed the committee that it was not wise to include potatoes, and I understand it is the opinion of different members of the Committee on Agriculture that they are not included in the term "nonperishable products." Believing that this section should cover that important vegetable crop, I am offering this amendment which will, if adopted, make the matter definite.

Potatoes constitute one of the greatest food crops of this country. The Secretary of Agriculture, in his annual report for 1916, page 12, states that Irish and sweet potatoes constitute 13 per cent of the average diet.

To-day we are suffering from a serious shortage in supply of this vegetable, and it is one of the most serious items in the complaint of the people against the high cost of living. The Government statisticians advise us that in 1909 the national production of Irish potatoes amounted to 389,194,965 bushels, or 4.2 bushels per capita. In 1915 the production was 359,103,000, or 3.5 bushels per capita. In 1916 the production fell, through unfavorable crop and other conditions, to 285,437,000 bushels, or 2.8 bushels per capita. No wonder that, with hoarding and speculation unbridled, with immense exports of foodstuffs, and with rising prices in all other items of diet, the price of these humble tubers went up to $4 per bushel, and the mainstay of the every-day diet of the poor became a dish for Sundays.

It is our desire by this law to increase production of the foodstuffs of the country. Omit from this section the potato from the guaranty herein provided for and the law will, as to that important food crop, have the opposite effect, and will tend materially to decrease its production. As emphasized by the gentleman from Missouri [Mr. MEEKER], the tendency on the part of farmers will be, under this law, to center on those crops which

have the benefit of the guaranty and to transfer to such crops acreage which otherwise would have been used for other purposes, if at all. The effect of that tendency upon the food situation is desirable wherever it results in an increase of foodstuffs. It is desirable where idle land is made use of. It is desirable where unimportant crops give way to important foodstuffs. It is not desirable when acreage heretofore utilized for producing a basic article of diet, such as the potato, is, by reason of lack of guaranty of minimum price to the producer of potatoes, turned to the use of cotton or barley or rye or even of corn because of the minimum guaranty for such crops.

At present there is not an item of food that is suffering from exorbitant price more than potatoes and not an item that is causing the poor of the country more suffering than the price of potatoes. Should we accentuate that situation? No; let us relieve it.

Further, there is no crop on which there is such a variation in price, which makes it uncertain to the farmer when he plants what sort of a price he will get for his product. In my country, quite a potato country, there have been times when they rotted in the cellars, because there was not enough paid for them to warrant the farmer in drawing them to town.

Of course, we are too late this season to help to increase the acreage, but the same situation comes upon us next year, and for that we should prepare. I am advised that it is costing farmers up there about twenty to forty dollars an acre for seed potatoes. Will he increase his potato acreage when seed and labor are so high and the selling price for the crop is an absolute uncertainty? No; this is a crop the farmer must be encouraged in if he is to plant a large acreage.

Let me quote from a statement by Mr. Grant Slocum, head of the Ancient Order of Gleaners, a great organization of farmers, before the Senate Committee on Agriculture. Mr. Slocum has given great study to farm problems, and particularly the marketing of farm products. He said here a few weeks ago:

> Michigan ranks third as a potato-growing State, under ordinary conditions. Last season, because of climatic conditions, the crop was not more than 40 per cent of the average, and one-half of the farmers were obliged to buy potatoes for their own use. Seed potatoes, like seed beans, are to be had, providing the farmer has the money. In fact, gentlemen, if you have noticed, the supply of all commodities equals the demand—providing you have the price. Good seed potatoes will cost the farmer this year $3 per bushel; thus the cost of seed for an acre will fall not far short of $40. You can imagine the chances the farmer takes in planting an acre of potatoes at a cost of $40 for seed, when you consider the price he received for his potatoes during the fall of 1914 and even 1915.

It seems to me of the very greatest importance that this section definitely and positively include potatoes. This is not so much a matter of importance to the farmers in my district or elsewhere in potato-growing sections, for they can raise beans and corn and wheat, and they will do so, encouraged by the minimum-price guaranty.

But this is a matter of vital importance to the Nation, to the great consuming class, which demands more potatoes and cheaper potatoes as one step in the campaign against the high cost of living, the campaign to keep the wolf away from America's door, the campaign to guarantee food for the armies fighting our battles in Europe. I hope that the committee will see its way clear to accept this amendment. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman, this in another proposition that was thoroughly considered by the committee, and by Mr. Hoover, and he and other experts advised against it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The question was taken; and on a division (at the suggestion of the Chair) there were—ayes 31, noes 35.

So the amendment was rejected.

Mr. HAUGEN. Mr. Chairman, I yield three minutes to the gentleman from Oklahoma [Mr. MORGAN].

Mr. MORGAN. Mr. Chairman, I offer the following two amendments, which I send to the desk and ask to have read.

The Clerk read as follows:

> Amendment offered by Mr. MORGAN: Page 13, line 3, after the word "profit," insert the following: "And the President in his discretion may loan to farmers any portion of the money appropriated in section 19 of this act to purchase seed, fertilizers, or equipment which may be necessary to enable them to increase their production of necessaries."
>
> Substitute offered by Mr. MORGAN: Page 12, strike out section 12 and insert in lieu thereof the following:
>
> "SEC. 12. That in order to assure an adequate supply of necessaries to meet the needs of the United States and her allies, the President is authorized to enter into contracts for the production of such necessaries, and such contracts shall be made in such form, upon such terms, and conditions, and at such price or prices, as in the judgment of the President shall be reasonable and just, and as will assure the production of an amount of necessaries sufficient to meet the needs of the United States and her allies during the existing war, and the President, in his discretion, is authorized to offer to farmers a premium above the market price for any necessaries when he shall deem such action required in order to insure the production of an adequate supply thereof."

Mr. CANDLER of Mississippi. Mr. Chairman, I reserve the point of order on that amendment.

Mr. MORGAN. Mr. Chairman, I suppose the committee and Mr. Hoover and the experts have considered my amendments, and therefore the committee will ask that they be voted down. I dislike to say this, but the fact is that the longer this bill is under consideration the less I think of it, and if it had another week's consideration I doubt very much whether I should bring myself to the point of voting for it. The more I study the bill, the less I think of it.

Mr. SLOAN. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I can not yield. Whatever may have been the intention of the framers, there is danger that the effect of the bill will be to depress the prices of necessaries, of farm products. My good friend, the distinguished gentleman from New Hampshire [Mr. WASON] goes back and takes an average of wheat prices for a number of years previous to the war, and he finds that it was 77 cents. Evidently he, who is a member of the committee, is designing to in some way bring the price of wheat down to 77 cents, the average price before the war, and yet during those years the farmers were producing wheat at half price, at a loss. According to the press the Government is making war contracts now with men for war supplies and allows contractors 10 per cent profit. If you would pay the farmers fair wages and allow them for the interest upon their investment and give them 10 per cent profit, the farmers would be satisfied. Many of the Members of this House have an exaggerated idea of the profits of farming. The profits of farming have been far less than the profits of commerce, manufacturing, and finance.

Congress should not ask the farmers of the country to make any greater sacrifices than those engaged in other callings are required to make.

It is true, the burdens of warfare can not be entirely equitably distributed. Some will do more than others. If this war should continue for any considerable length of time, many of our citizens will lay their lives down upon the altar of their country. Many others will endure hardships, suffer privations, and sacrifice their health. Still others will go through life maimed and crippled from wounds received in fighting for their country. So we can not distribute the sacrifices of warfare to all alike. But in war legislation we should seek to distribute the burdens incident to war fairly and justly to all our people, and should not ask any particular business to bear any unjust or undue burden.

The bill reported by the Committee on Agriculture does not, in my judgment, contain any provision which will assure sufficient increased production. It contains but one section designed to encourage increased production of foodstuffs. There are 18 pages of the bill. Slightly over 2 pages relate to the increased production of food. There are 21 sections in the bill. But 1 section is directly designed to stimulate food production. Practically all the bill relates to food control, food distribution, and food conservation. My judgment is that the bill is a failure so far as its provisions relate to the stimulation of food production.

The only provision in the bill which directly is intended to stimulate the production of foodstuffs is found in section 12 of the bill.

The section, in part, is as follows:

> SEC. 12. That whenever the President shall find that an emergency exists requiring stimulation of production, and that it is essential that the producers of any nonperishable agricultural products produced within the United States shall have the benefits of the guaranty provided for in this section in order to stimulate production of such products, he is authorized, from time to time, seasonably and as far in advance of seeding time as practicable, to determine and fix and to give public notice of what, under specified conditions, is a reasonable guaranteed price for any such products, in order to assure such producers a reasonable profit. Thereupon the Government of the United States hereby guarantees every producer of any merchantable nonperishable agricultural products produced within the United States, for which a guaranteed price shall be fixed by notice in accordance with this section, that, upon compliance by him with the regulations prescribed by the President, he will receive for any such products produced in reliance upon this guaranty within the period, not exceeding three years, prescribed in the notice, a price not less than the guaranteed price therefor as fixed pursuant to this section. In such regulations the President shall prescribe the terms and conditions upon which any such producer shall be entitled to the benefits of such guaranty.

The plan proposed in this section is too general in its nature; it is too uncertain in its results. What effect the provisions of this section would have is wholly a matter of conjecture. It would be an experiment. It is never wise or safe to experiment on vitally important matters.

As a Nation we are confronted with a plain proposition: We must produce enough food to meet our own wants and the wants of our allies. To fail in this proposition means defeat. The first thing to do is to determine how much additional food we

need, and what additional acreage is necessary—what additional men it will take on the farm to produce this food. Having determined what we want, then we should proceed to make contracts with farmers for the enlargement of their production. There are about 2,850 counties in the United States. We already have about 2,000 county agents. An agent should be provided for every county in the United States. These agents should be authorized to appoint subagents in each township in the county. In one week the entire country could be covered. Every farmer in the United States could be visited, canvassed, and contracts could be made. There would be some uncertainties as to yield. But allowances could be made for this. If we estimate that we shall need next year 300,000,000 additional bushels of wheat, the thing to do is to increase the acreage in wheat sufficient to make such production possible.

Why should we not get more wheat produced, just like we are to secure more ships? When the cry went up that more ships were necessary, we did not authorize the President to establish "a reasonable guaranteed price" for ships. We authorized him to build those ships. We voted the money—$500,000,000—necessary to cover the cost of their construction. We authorized him to employ the necessary number of men to build the ships. In other words, we went after it in the practical way, with a definite plan, which in a certain time absolutely insures the construction of the desired number of ships. But when we want 300,000,000 additional bushels of wheat and a large increase in the production of corn and other farm products, the only plan you propose is to authorize the President to establish "a reasonable guaranteed price."

It is not primarily a question of what it costs the Government. The public, of course, should be protected against excessive prices of food products. The masses of our people must be able to secure food at prices within their reach; but, as a practical war measure, the main proposition with us is to see that the food is produced. The Government should not haggle with the farmers over the price of wheat and corn and hogs. We did not haggle with the allies in voting to give them credit. We authorized the President to loan them $3,000,000,000. We said to our allies, How much money do you need? Here it is, and you can have more if you want it. In this spirit we should go to the farmers of the United States. They will not be unreasonable in their demands. They will respond to the patriotic spirit and do their full duty in the hour of peril and danger.

What effect the "reasonable guaranteed-price plan" will have upon prices of farm products is all a matter of doubt, uncertainty, and conjecture. The theory of this provision is that the "reasonable guaranteed price" will be the minimum price. There is no certainty, however, that this will be the case. The tendency may be that the "reasonable guaranteed price" will be the maximum price. When the Government establishes a price—call it what you may—the price fixed by the Government will have a controlling influence upon the prevailing prices of such products. The "guaranteed price" may tend to depress prices rather than to enhance them. If so, the establishment of a "reasonable guaranteed price" upon certain farm products may tend to discourage rather than stimulate their production.

One of the amendments which I have proposed authorizes the President to offer the farmer a bonus or premium above the regular market price to stimulate increased production. This would not affect the price the consumers pay for the farm products. It would simply be an inducement to the farmers to go to extra expense to increase his product, and in part would justify the farmer and compensate him for the extra risk and expense to which he would be subjected.

Suppose that the Government, through the President, would say to the farmers, "We will pay you a premium of 25 cents a bushel over and above the market price for all the wheat you produce next year." The farmer would then know that he would receive for his wheat the price fixed by the law of supply and demand, and in addition to that he would have a bonus or premium of so much per bushel or pound for his product. This would stimulate and encourage the farmer to produce an increased amount of that particular product upon which the Government would pay a premium. This, to my mind, would be far more satisfactory to the farmer and would be much more effective in stimulating production, and thus assuring an adequate supply of food to meet the demands of ourselves and our allies.

The other amendment which I have proposed authorizes the President, in his discretion, to loan the farmers any portion of the amount appropriated in section 19 to aid them in buying seed, fertilizers, and equipment necessary to increase their production. Section 19 of this bill appropriates $150,000,000, to be used in carrying out the purposes of this bill. My amendment allows the President to loan—not to donate, but to loan—a part of this amount to the farmers to aid them in expanding production.

It is utterly impossible for the farmers of the United States to greatly enlarge their production unless they are provided with largely increased credit at very low rates of interest. This bill should authorize the President, through the Federal Farm Loan Board and the Federal land banks, to loan to the farmers at a nominal rate of interest all the money they need to enlarge their farm activities. It should be borne in mind that one-third of the farmers of the United States are tenants. They are men with small means and little credit. These tenant farmers are as patriotic as those who own their farms. There are over 2,000,000 of these tenant farmers. If they are to increase their farming they must have additional teams, implements, machinery, tools, live stock, and additional help. They have not the cash with which to secure these things. They must secure them on credit. Under present conditions they can not secure this credit at reasonable rates of interest or upon favorable terms.

One-third of our farms are mortgaged. Ordinarily a man with a farm mortgaged does not have proper credit at the local banks. He can not secure this credit. With one-third of our farmers tenants and with another third with their farms mortgaged, we have two-thirds of our farmers, or more than 4,000,000 of them, who are not in a position to materially enlarge their business as farmers without better personal credit facilities. Credit is just as necessary to the farmer as it is to the merchant or manufacturer. We should therefore in this bill authorize the President during the emergency now existing to make loans direct to the farmers where such loans are necessary to insure the production of an adequate food supply to feed our own people and our allies until the day of peace, triumph, and victory shall come to our Nation.

The CHAIRMAN. The question is on the first amendment offered by the gentleman from Oklahoma.

The amendment was rejected.

Mr. HAUGEN. Mr. Chairman, I yield five minutes to the gentleman from North Dakota [Mr. NORTON].

Mr. NORTON. Mr. Chairman, the success, to a large degree, of our part in the present war in which we are now involved makes necessary this legislation. The purpose of the legislation is, as I interpret it, and as it has been announced by the distinguished chairman of the Committee on Agriculture, first, to encourage greater production of food products by insuring a just and reasonable price for the products of the farmer; and, second, to lessen the cost of food and fuel products to the consumer by making more efficient the necessary instrumentalities of distribution and by protecting the consumer from the grinding extortions of the food and fuel gambler and speculator. By every right and reason the farmer who produces food for the Nation at any time, and especially in these times of unusual need, is entitled to prices for his products that will fairly compensate him for his labor and capital invested in producing these products. No one who has made a study of the subject but knows that any legislation that will measurably insure the farmer a fair price for his products will greatly stimulate and increase food production throughout the Nation.

It is well recognized that in the present methods of distribution there is much waste and much inefficiency, the cost of which is a heavy burden both upon the producer and the consumer of food and fuel products. With better and closer cooperation between the instrumentalities of distribution, such as this legislation will permit and such as it provides for, it has been clearly demonstrated that the cost of getting food and fuel products from the producer to the consumer can be greatly reduced to the benefit and profit of both the producer and consumer.

On May the 16th, in testifying before the House Committee on Agriculture, Capt. J. F. Lucey, of the Belgian Relief Commission, said among other things in his statement the following:

> I think, perhaps, that one of the most important statements that I could make would be that we bought wheat in this country at a price of about $1.50 per bushel, paid a high cost of transportation all the way from the beginning, from 18 shillings to 75 and 85 shillings, and yet we sold that bread in Belgium to the people who could afford to buy it at a profit and still undersold the Paris and London markets by something like 10 to 20 per cent. That was direct distribution from the producer to the consumer. I do not know that that method could be applied to this country. We have established means of business and of trade that, of course, can not be disturbed, but the fact remains that that illustration, to a certain extent, I believe, can be applied to this country.

When we find to-day that flour is selling for $15 and $16 a barrel in the United States and for $8 and $9 a barrel in England and France, no great amount of argument is needed to convince one of the necessity of legislation that will do away with the extortions that our present system of multitiudinous middlemen lays upon the producer and the consumer.

This legislation is aimed directly at the unconscionable gambler and speculator in food and fuel supplies. If this legislation, giving broad and tremendous powers to the President, will strike down the food gambler and food speculator and, to a large extent, keep open the natural channels of trade in farm produce, as I believe it will, its enactment will be more than justified.

I am not in the least alarmed that legislation of this character contravenes in any way the powers of Congress under the strictest interpretation of our Constitution. Surely the wisdom of the fathers who penned and adopted this great covenant of our freedom placed nothing within it that can reasonably and justly be construed to prevent the Congress of this generation from enacting legislation to stimulate and encourage food production and to control and conserve the food supplies of the Nation, to the end that our just cause may be crowned with success in this tremendous contest against the concentrated powers of autocracy—to preserve and guard the rights of democracy, the rights of a free people on land and sea. This cherished charter of our liberties can not be rightly and justly construed in any way that will prevent our people from exercising the most efficient and most economic methods of commerce to best carry on this war. It can not be rightly and justly construed in any way to enable our enemies or their agents during this war to find within its sacred covenants means to aid their foul and insidious intrigues and powerful attacks upon our institutions of free government and upon this Nation of a free people which for more than 130 years has been a light of hope to which lovers of democracy in other lands throughout the world have turned with longing eyes and hearts. [Applause.]

Perish any thought that we shall fail in the righteous, holy cause in which we are now engaged. We must not fail. We shall not fail. Well may it be truly said of America to-day, as it has been said in another great crisis of this Nation's history:

> Humanity with all its fears,
> With all the hope of future years,
> Is hanging breathless on thy fate!

The great Master of mankind, who watches over all, whose gracious hand planted this Nation upon this new Western Continent as a light of hope to downtrodden and enthralled humanity throughout the world, who has safely guided this Nation through other days of storm and strife, will direct our course through this conflict so that our good ship of state, with its rich and precious stores of lasting peace and good will to men of all nations, will ride safely through this hurricane of war and deliver its stores to the hopeful hearts of liberty-loving people throughout the world. No class of people in this country are more patriotic or more loyal to the Government than the farmers of the country. This has been proven on every battle field of the Nation since the first rays of the morning sun shone upon the embattled farmers as they stood at Lexington and Concord. [Applause.] It has been proven wherever and whenever true men have been needed to defend the Nation. Farmers as a class have never sought special privileges from the Government for their own benefit. They have given of their brain and their brawn very much and very freely to bring this country to its present condition of marvelously great agricultural and commercial development. The farmers of this country are not opposed to the spirit or the purposes of this legislation. They are a great class of loyal citizens in favor of any fair and just legislation that the President, the Commander in Chief of our Army and Navy, may ask that will assist in bringing victory to the banner of the United States in this war and lasting peace to the nations of the world.

The thing that the farmers of this country do object to, and the thing that I wish to here and now again voice my objection to, is that in this war great profits should be reaped by a parasitic class of middlemen, gamblers, and speculators in food and fuel supplies. While the American farmer makes no objection to selling his wheat, corn, and other farm products at fair living prices determined by the free and unrestricted laws of supply and demand, he does object to selling his wheat or corn at 70 or 80 cents a bushel and then within a few months find that the products of this wheat or corn are being sold to himself and fellow citizens in other walks of life at prices that would warrant the payment of $2 or $3 a bushel for his wheat or corn instead of the amount he received for it. The farmer objects, and he should object, to a system of marketing and distribution which enables the food gamblers and speculators of the country to make more real profits from the products of the farm than are made by the men who actually produce these products. The farmers of my State object, and they should object, to a system of marketing and distribution which permits the grain speculators on the grain exchanges of Minneapolis, Duluth, and Chicago to make millions of dollars each year by manipulating the prices of wheat, corn, and other farm products raised by the farmers of the Northwest. I shall heartily support this legislation, believing that it will bring about a better and more desirable system of distribution of food and fuel products in this country. I shall heartily support this legislation, believing that if its provisions are properly administered, as I hope they will be, the evils now practiced by the great grain and produce exchanges of the country will be done away with. I shall heartily support this legislation, as I am confident it will enable the administration in a large measure to protect both the producer and the consumer of food and fuel products from the insatiable greed and avarice of the gambler and speculator in food and fuel prices.

While every department of the Government from the largest to the smallest is working early and late to meet the new problems of the war, and while most of our citizenship is busy with war preparations, the people of this Nation will welcome this legislation and will further welcome evidence that the administrative authorities of the Government have still some time to give to placing food gamblers and extortioners of unfair prices for food products in jails and behind prison bars, where they richly deserve to be placed. [Applause.]

Mr. LEE of Georgia. Mr. Chairman, I yield one minute to the gentleman from North Carolina [Mr. KITCHIN].

Mr. KITCHIN. Mr. Chairman, I am in favor of this bill on the whole and shall vote for it, but in doing so I want it to be known that I do not indorse or approve that part of section 12 beginning on line 16 down to and including line 9, page 14. I do not believe we ought to give the President or anybody else power to increase the price of food products to the people of this country during this war by increasing the duty or tax on such products. I recall this matter of giving power to the President of levying or increasing duties was up in 1890 in the reciprocity treaties provisions of the McKinley bill while it was pending in the Senate. Some Republicans and every Democrat took the position that no such power could be delegated to the President. I do not believe that the President ought to have the power to raise the price of flour or wheat or other food products by increasing the duties either during this war or in time of peace. Congress itself——

Mr. HILL. Will the gentleman yield?

Mr. KITCHIN. I will.

Mr. HILL. Regardless of whether the President ought to have the power or not, has this Congress the right to give the power under the Constitution of the United States?

Mr. KITCHIN. In the discussion in the Senate in 1890 many of its greatest lawyers on both sides, Republicans and Democrats, held that Congress did not have the power to delegate to the President the power to fix rates or levy duties or other taxes.

Mr. LENROOT. Will the gentleman yield?

Mr. KITCHIN. Yes.

Mr. LENROOT. I merely want to ask the gentleman if it is not a fact that the Supreme Court of the United States afterwards sustained the question of power in the decision of Field against Clark?

Mr. KITCHIN. No; the Supreme Court did not, because that question was not presented directly to the court. However, the court, in rendering the decision in that case, did express the opinion that the power given by section 3 of the McKinley Act, known as the reciprocity provision, was not violative of the Constitution. This section gave the President the power to suspend the free sugar, molasses, coffee, tea, hides, and so forth, provisions of the act, and levy a duty upon them under certain contingencies. The constitutionality of the section was not necessary for the decision of the court in the case pending, nor did the case in any way involve that question. As the gentleman will recall, the Chief Justice and Justice Lamar, while concurring in the decision of the court, filed a very able and strong dissent to the dicta or opinion of the court relative to the power of Congress to delegate such right or power to the President.

Mr. LEE of Georgia. Mr. Chairman, how much time is remaining?

The CHAIRMAN. The gentleman from Georgia [Mr. LEE] has 29 minutes remaining, and the gentleman from Iowa has 11 minutes remaining.

Mr. LEE of Georgia. I yield to the gentleman from Alabama [Mr. HEFLIN].

Mr. HEFLIN. Mr. Chairman and gentlemen of the committee, the gentleman from Nebraska [Mr. REAVIS] always speaks well. He complains of the impatience of the British Parliament about the delay in the passage of this bill. I can excuse the British people for being impatient. Their very existence depends upon their ability to get food supplies from us, and the food question is vital to the life of the British people. They were drawn into war without a moment's warning, and they

have been through some embarrassing situations with regard to food supplies since the war began. If the gentleman from Nebraska had been through the trying experiences that they have been through, he could and would excuse a little impatience on the part of our British allies with regard to legislation that means so much to them. They have my profound sympathy, and I am ready to do anything reasonable to hasten legislation that will aid our common cause. The sooner we get food to our allies the better it will be for us, our allies, and for all people who love liberty. [Applause.]

Mr. LEE of Georgia. Mr. Chairman, I yield to the gentleman from Texas [Mr. WILSON].

Mr. WILSON of Texas. Mr. Chairman, I am just as good a friend of the administration as the gentleman who has just preceded me, and just as good a friend of this bill, and I represent an agricultural district, but I am going to vote for the Meeker amendment to strike out section 12 entirely. Yesterday I talked to a man connected with the Agricultural Department, and I think his heart is right toward the farmer. I said, "How would fix this guaranteed price; how would you get at it?" He said, "I would figure the cost of production of a bushel of wheat and add about 25 per cent." I said, "That is the reason why I am against it."

When the Government fixes its reasonable guaranteed price it will tend to reduce the market to that point. Last year this thing occurred in parts of Texas: Men produced a crop of wheat and exchanged the crop standing in the field for the fee simple title to the land on which it was grown. During this war, and at all times, I am in favor of the farmer getting all the profits he can get upon a market based upon supply and demand, if it is 25, 50, or 100 per cent. Just free the market of improper influences; leave it a fair market, governed by the law of supply and demand. The prevailing conditions are all the guaranty he wants for profits, or needs, to encourage him to increased production. Leave price fixing off—guaranteed or any other kind. This is my position. To take any other position is to fall into the dollar argument in favor of the Government and our allies against the individual. And if you say to make prices better to the consumer, you would be willing to take from the producer and put into the pockets of the consumer, which is taking from one individual of our society and giving to another, a thing manifestly wrong. Give us a fair market. That is all any man in reason can demand. Choke off the illegitimate speculator.

I am for this bill, however, even if section 12 stays in it. The emergency is too great for a man here to play the rôle of obstructionist and vote against the finished bill because it does not fit his every notion; and certainly, when the point of difference is only a matter of expediency, we should not pursue such a course. If some great principle we cling to is violated, it would be different.

I sincerely hope section 12 will be stricken out.

Mr. LEE of Georgia. Mr. Chairman, I yield to the gentleman from Texas [Mr. YOUNG].

Mr. YOUNG of Texas. Mr. Chairman, there is not a man in this Congress that wants to do more to relieve the situation that confronts this country than I; but with the deep conviction that I have on the principle involved in this section, and the deep feeling that I have that instead of doing what most of the gentlemen of this House think it is going to do, I believe it is going to do the very reverse thing. I am compelled to vote to strike this section out of the bill. If you would strike the dictatorship section and this section out of the bill, many of the provisions in the bill ought to be enacted into law. I do not believe there is a man living who is wise enough to administer this section of the bill so as to do what the bill says it means to do; that is, to encourage production. I do not believe there is a man wise enough to do it. The bill does not require the fixing of the prices on all foodstuffs. It leaves it in the discretion of one man to determine what crop it shall be fixed on. You go right against certain laws of nature. And when an individual who has this power in his hands goes out to the agricultural communities of this country and exercises it as to some one crop and does not exercise it as to the other he encourages individuals to break loose from the rules of action based upon life experiences.

Let me show you how it would work out in Texas. Hot winds have hit the State within the past 10 days. Cornfields have been scorched to death, and now they are mowing their crops to get fodder. There is no corn. Let a man come and exercise the power that is in this bill, and you will not know how he is going to exercise it. He is just a human being. He says, "I am going to guarantee you will get $3 for wheat." Men are going to experiment with that wheat down there in Texas where it has been a failure; and when they experiment with that wheat they are failing to use their judgment that the situation has always demanded that they use, knowing the climatic condition they have there. And they will try that wheat, and when it proves to be a failure under these climatic conditions, their time and labor will be lost, and they will not get anything out of this guaranteed price because they do not get a crop, and meanwhile they have lost other crops that they could have made. You are going up against the laws of nature in this bill, and you are going up against the results of human experience in this bill, and then you are going up against another proposition of making a special class of a special lot of people and impeaching their patriotism.

My idea is that you should let the people operate as much as possible under normal conditions. You need not doubt their patriotism. They are going to do everything in their power to feed the world, and in my State we should let them operate under the laws they have been operating under from time immemorial, and operating according to the experiences they have been having, and planting the crops they are used to planting, and not offer them a great price on some particular crop and hold it out as an inducement to them to make an experiment.

I heard one of these theoretical food controllers make an address down in my country, and the substance of his remarks was, "If you do not quit raising cotton down here, I will draft you into the Army." In certain parts of my State a man is a fool if he undertakes to grow wheat or corn or anything else than cotton. His soil and his climatic conditions will not justify him in making the expenditure of the effort. And yet you come in with a human being who is not possessed of knowledge of those conditions—and what is true of my State will be true of other States—you bring in a man who is ignorant of these conditions. We are assuming that this man has more information than the combined information of 30,000,000 farmers in this country, and you are throwing out of joint the ordinary rules under which we operate, and I think instead of encouraging production, my friends, you are going to discourage it. I shall vote against this section. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HAUGEN. I yield one minute to the gentleman from Illinois [Mr. MADDEN].

The CHAIRMAN. The gentleman from Illinois is recognized for one minute.

Mr. MADDEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Mr. MADDEN offers the following: Page 13, line 6, after the word "agricultural," insert the words "food or feed."

Mr. MADDEN. Mr. Chairman, the purpose of this amendment is to prevent the President of the United States from extending the guaranteed price to any nonperishable agricultural products except the products the production and distribution and sale of which he has control of, as provided in section 1.

Mr. LEVER. Mr. Chairman, will the gentleman yield for a moment?

Mr. MADDEN. Yes.

Mr. LEVER. The committee has no objection to that amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois [Mr. MADDEN].

The amendment was agreed to.

Mr. CANDLER of Mississippi. Mr. Chairman, I ask to be recognized for five minutes.

The CHAIRMAN. The gentleman from Mississippi is recognized for five minutes.

Mr. CANDLER of Mississippi. Mr. Chairman and gentlemen of the committee, the object and purpose of this bill, as has been so frequently stated, is to stimulate production in this country and eliminate speculation. It seems to be necessary to emphasize that again. These are the two prominent features of this bill and the things it is intended to accomplish.

Now, the fears of the distinguished gentleman from Texas [Mr. YOUNG], as expressed a few moments ago, I do not think are justified. My distinguished and good friend—and I greatly admire him—has put up in large measure a straw man and then has proceeded to knock him down. He pictures the great difficulties that might arise and the foolishness that might be indulged in by some people in this country in response to the dictation of this one man who is to be clothed with such great power, as he describes, and from that he draws a conclusion.

Nowhere in the bill is the President of the United States or the one man that the gentleman from Texas is so much afraid of required to fix any price at all. It is not mandatory and will not be exercised by the President, the one man, unless he comes

to the conclusion that an emergency exists which requires that something shall be done in order to stimulate production, and that power will not be exercised as long as production keeps up in this country. If it does not keep up, then the President will and ought to exercise it. He will then be authorized to fix a reasonable guaranteed price to include cost of production and a reasonable profit. How can that injure the farmer or anybody else?

My friend says the farmers of his section of country are willing to do everything they can in order to meet the demands of the times. I know they are going to do that, because I know there is not a more patriotic class of people in the universe of God than those who make their living out of the ground. [Applause.] Therefore I am sure they will respond to everything that the Government demands, everything that the President of the United States requests, everything that the public interest requires. If they do, and the production keeps up and the emergency does not arise, then the price need not be fixed, and the President of the United States would not exercise the powers that will be conferred upon him when this bill passes unless it shall be necessary to exercise them.

As was well said by the distinguished gentleman from Illinois [Mr. CANNON] a few days ago, the man who is charged with the responsibility for the exercise of the powers conferred in this bill is the President of the United States, and the law is to be administered under his direction, under such rules and regulations as he shall prescribe. While we know that the President himself can not individually and personally perform all these duties that are imposed upon him from day to day, and that they must be done through other persons and agencies, nevertheless, inasmuch as he is the responsible party standing behind the person or persons selected by him and the agencies to be put into operation, he is not going to do any unwise, harmful, or foolish thing. I would rather trust the President of the United States, and from what I have read of Mr. Hoover I certainly would rather risk Mr. Hoover than the speculators and gamblers in food in this country, who are speculating in the things that the people are required to live on every day. What the President will do will eliminate speculation and gambling in food. [Applause.] All you have to do to convince you of the necessity of the legislation, as provided for in this bill, is to investigate the disparity of prices that exist between the producers and the consumers, and when you fully investigate that situation it will demonstrate beyond any question on the face of the earth that these speculators are highwaymen and robbers, holding up the people all over this country and demanding that they stand and deliver, and because they are highwaymen and robbers they ought to receive their just deserts and be sent to the penitentiary. [Applause.]

The difference between the price to the producer and the price to the consumer is outrageous; and what we propose to do and what we are trying to do in this bill is to stimulate production, to bring about the production of those things which we need, and then to eliminate the speculators who stand between the producer and the consumer, and bring the producer and consumer closer together, and give the consumer the benefit of a reasonable price and the producer the benefit of a reasonable price. [Applause.] This morning I had a letter from a man down in my district which is an evidence of the desire of the people all over this country for this legislation. A splendid citizen wrote me that it is necessary to hurry up this legislation. He says in his letter:

> I want to urge you to vote and work for the passage of the food-control bill. It is a shame that the people have been so long robbed by the speculators.

If Congressmen sitting here in the Halls of Congress believe that the people of the United States are not interested in this measure, you are very much mistaken. The sentiment all over the United States is practically unanimous behind it, not only upon the farms and in the hamlets and villages, but in the cities themselves. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANDLER of Mississippi. I ask one minute additional.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that his time be extended one minute. Is there objection?

There was no objection.

Mr. CANDLER of Mississippi. My distinguished friend from Philadelphia [Mr. MOORE], a few days ago, said that we were going to tax the people in the cities in order to help the people in the country. In that he is mistaken. The people everywhere in the cities and in the country are alike interested and will be benefited. I have before me a letter that I received from a gentleman in his city of Philadelphia, calling attention to the enormous and outrageous prices that they are compelled to pay in the city of Philadelphia, as well as all other cities throughout the country, and calling upon the representatives of the people to remedy this evil and give the people the benefit of the products to which they are entitled at a reasonable price. [Applause.]

What the people demand is not that anything be taken away from the farmers themselves or the producers themselves. Nothing is going to be taken away from them, but what we propose to do is to give them the benefit of the prices to which they are entitled, and then give the man who buys the product and uses it and eats it the opportunity to obtain it at a reasonable price, without holding him up in the road and making him deliver out of his honest earnings outrageous and ruinous prices for the products which he consumes. [Applause.]

The trouble is the farmers and producers are not getting the high prices. If they were there would be some justification for existing conditions, because the good Lord knows I am the farmer's friend and I want him to get the best prices possible. Let me call your attention to this statement, showing prices to producers of corn, oats, rye, beans, and wheat when the crops were sold by the farmers and prices when the crops were out of the hands of the farmers during the years 1916 and 1917, which shows it is the heartless speculator and not the producer who is flourishing. Now listen:

CORN.

The bulk of the corn crop is marketed during October, November, December, and January. During these months the average prices to producers were 82.3, 85, and 88.9 cents, respectively. During the months of March and April, 1917, the average prices were 100.9 and 113.4 cents, respectively. The contract price for corn in April, 1917, reached $1.60.

OATS.

When sold by farmers in 1916: July, 40.4; August, 40.1; September, 43.1.

After farmers sold out in 1917: February, 55.2; March, 56.9; April, 61.5.

The contract price of oats reached 71¼ cents in April.

RYE.

When sold in 1916: July, 83.3; August, 83.4; September, 99.7.

When sold out in 1917: February, $1.235; March, $1.26; April, $1.356.

In April, 1917, No. 2 rye went as high as $2.02 per bushel wholesale in Chicago.

BEANS, DRY.

When sold in 1916: September, $4.60; October, $4.47 per bushel.

After sold in 1917: February, $6.07; March, $6.49 per bushel.

The lowest wholesale quotation in Detroit in April was $7.80 per bushel. Highest, $10.

WHEAT.

When sold in 1916: July, 93 cents; August, $1.07; September, $1.31; October, $1.36.

After sold in 1917: February, $1.648; March, $1.644; April, $1.80.

April is a month of minimum farm marketings and during that month wheat reached $2.95 wholesale in Chicago.

It may be contended that the conditions of this past winter and fall were abnormal. An examination of price statistics during normal years has convinced me that, taking one year with another, probably it may not pay the farmer to hold; but these are not normal times through which we are passing, and I can prove by the figures for the years 1914 and 1915 that a similar rise occurred in the price of farm products—a rise which occurred at the expense of the consumer and from which the farmer did not benefit.

A similar rise occurred in the case of wheat during the season of 1914 and 1915. The bulk of the crop was moved at prices to the producer varying from 77 cents in July, 1914, to 93½ cents in October. The same wheat would have brought the producer $1.37 per bushel in April following, the month of minimum sales, if the farmer had had any left to sell. In the case of oats the farmer sold his bushel of oats in August, 1914, for 36.7 cents. The same bushel of oats sold in April, 1915, when he had none to sell, at 53.4 cents. In the case of barley it was the same story—52½ cents in the month of maximum sales and 64.7 cents in the month of minimum sales. Rye was the same—75.4 cents and 101.9 cents.

These figures are conclusive that the speculator and middleman is the kid-glove gentleman who needs our immediate and drastic attention. "The horny-handed son of toil," God bless him, is doing his duty, and we want to help him if we can, and we want to eliminate as far as possible this speculator and thereby help the consumer. That is the purpose of this bill. [Applause.]

If you have any doubt that the people in this country are being held up and robbed by the speculators and gamblers in food products, let me call your attention to some comparative prices between this country and England. Here they are—listen:

England is supposed to be on the verge of starvation, but the table of comparative prices in England and the United States shows the following:

English prices: English beef, 44 cents a pound; butter, 40 to 56 cents a pound; potatoes, $2.10 a bushel; bacon, 48 cents a pound; and flour, $8.20 a barrel.

The American prices on the same day were: Beef, 42 cents a pound; butter, 42½ cents a pound; potatoes, $3.75 a bushel; bacon, 45 cents a pound; and flour, $17.60 a barrel.

The bulk of the wheat and flour of England is imported. Every article that England uses is partly imported. The very wheat from which the flour in England is sold at $8.20 a barrel is brought over from Canada and the United States, or maybe from South America. The wheat which is used to make the flour for which we pay $17 a barrel is grown in this country.

In London the consumer is paying only 1 shilling, or 24 cents, for a 4-pound loaf—64 ounces. The Londoner is in the U-boat zone, and he imports his wheat. The British Government is now intending to reduce this war price. In Philadelphia the 12-ounce loaf now costs 6 cents; that is, we pay 1 cent for 2 ounces, or 32 cents for 4 pounds, or 33⅓ per cent more than it costs in London. * * * Coming to Brooklyn early in 1916, 5 cents paid for only 12 ounces. Two pounds of bread, which had been costing only 5 cents in London, cost 13⅓ cents in Brooklyn. Coming to Philadelphia, 1-pound loaves sell at 5 cents, or twice the price which the best of bread was still bringing in London. The first move in Philadelphia was to cut the weight of the 5-cent load of 12 ounces and then put the price up to 6 cents.

In a recent address Mr. Charles R. Van Hise, president of the University of Wisconsin and special representative of Food Director Hoover, asserted that "prices now being charged for necessities amounted practically to extortion; and that if the man living on a salary or wages is to survive the war, the Government must take control." Nothing less than enactment of the administration food-control legislation can cure such a diseased condition, and every day of "delay" is mischievous, if not "dangerous."

Does not such a condition as is here shown to exist call for prompt and extreme action on our part? Certainly it does.

This is no time for the ordinary toll taker to become a highwayman. This country is fighting for its life. This fight may be decided within the next six months, and during this period highway robbery, euphemistically called "smart speculation," should be stopped. Of course every man is entitled to a reward for his efforts. Every man is entitled to a profit on his labor, but the way we are going now, those who control prices will not only break down the people but they will finally bankrupt the Government.

If we prosecute this war on the present prices, we will spend more money in six months than England has spent during the whole three years of war. Instead of being a creditor Nation for three months we will be bankrupt in a year.

While I have shown prices in England are lower to the consumer than prices in our country, instead of our prices becoming more reasonable they still continue to soar. Let me call your attention to these statistics compiled by the Bureau of Labor Statistics, and hence authentic:

FOOD PRICES SOAR—BIGGEST JUMP IN PAST MONTH WAS IN FLOUR.

Retail food prices in the United States advanced on an average 5 per cent from April 16 to May 15, as shown in figures compiled to-day by the Bureau of Labor Statistics. During the year ending with May 15 they increased 39 per cent.

The biggest jump during the month was in flour, which advanced 29 per cent. The increase in corn meal was 15 per cent, beans 14 per cent, bread 13 per cent, and rice 11 per cent. The only drop in price was in onions, 36 per cent; and butter, 9 per cent.

Some of the month's increases are given, as follows: Beef, 2 to 4 per cent; bacon, ham, and lard, 8 to 10 per cent; hens, 1 per cent; salmon, 10 per cent; eggs, 3 per cent; cheese, 3 per cent; milk, 3 per cent; potatoes, 6 per cent; sugar, 5 per cent; coffee and tea, 1 per cent.

The greatest advance during the year was made by potatoes, which advanced in price 149 per cent, and in flour, 102 per cent.

In the last four years retail food prices generally have advanced 56 per cent.

Our people are long-suffering and forbearing, but there is a limit and a time when patience ceases to be a virtue. The following editorial in the Baldwyn Home Journal, published in my district, I think expresses accurately the sentiment in my section of the country. I commend it to your consideration:

The lust of greed which impelled a lot of speculators to gobble up the food supply last fall and winter whereby they were enabled to extort millions of dollars from the working class of this country for the actual necessities of life are behind the opponents of the food-control bill. They want an open field in which to rob both the people and the Government; they want a free hand to extort from the women and children, the weak, the lame, and the halt. What care they as to whether our boys at the front be pierced by a German bullet or perish from starvation? Their patriotism would go inside of a mustard seed and then have as much room as a wiggle tail in the middle of the ocean. Since the outbreak of the war the South has been urged often to raise foodstuff and conserve it both for our own use and for the Army. The South paid heed to the call and is doing her duty in that respect. The South is willing to divide her last loaf with the soldier boys if it should become necessary, but we would be unwilling to stand by without protest and see it gobbled up by speculators who would dole it out as they chose and at prices they saw fit to make. We are in for a bloody struggle for the sake of humanity and our liberty; it is no time for filibustering and chicanery. Every minute's delay is a golden opportunity for the food speculator, whose eagle eyes are watching the first fruits of the field now being harvested.

Now, gentleman of the House, in conclusion let me urge you to vote for this bill and thereby help the producer and the consumer, and give the President power to strike down the speculator and gambler in food products. [Great applause.]

Mr. LEVER. I yield five minutes to the gentleman from Ohio [Mr. GARD].

Mr. GARD. Mr. Chairman, I desire to offer an amendment to the bill.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. GARD: Page 13, line 17, strike out the word "products" and insert the word "product"; strike out all after the comma in line 23, through the semicolon in line 6, page 14, and insert the following: "and ascertain what rate of duty, added to the then existing rate of duty on any such product and to the value of such product at the time of importation, would be sufficient to bring the price thereof at which imported up to the price fixed therefor pursuant to the foregoing provisions of this section, he shall proclaim such fact, and thereafter there shall be levied, collected, and paid upon such products when imported, in addition to the then existing rate of duty, the rate of duty so ascertained."

Mr. GARD. Mr. Chairman——

Mr. LEVER. Unless the gentleman desires to discuss the amendment, I may say that the committee have examined this language, and we feel that it is really better language than that contained in the bill, and that it does not affect the bill a particle except to clarify the situation, and the committee are willing to accept the amendment.

Mr. GARD. It is offered merely for the purpose of clarifying the language in conformity to the decision of the Supreme Court in Field against Clark.

Mr. LEVER. We feel that the gentleman is entirely correct in his amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. GARD].

The amendment was agreed to.

Mr. LEVER. Now, if the gentleman from Ohio [Mr. GORDON] desires time, I will yield to him five minutes. [Applause.]

Mr. GORDON. Mr. Chairman, I did not catch the full purport of the amendment which has just been adopted by consent of the committee. I do hope it cures one of the difficulties in this bill which otherwise undertakes to confer upon the President the power to impose, enact, and levy tariff duties upon imports.

Mr. GARD. Will the gentleman yield?

Mr. GORDON. I will.

Mr. GARD. I desire to explain to the gentleman that that was the very reason for offering the amendment, and I myself think it cures the objection.

Mr. GORDON. I hope it does. Yet I still feel that this section 12 ought to be stricken out. The other day, when the astute and accomplished gentleman from Wisconsin [Mr. LENROOT] occupied the floor, I asked him how the President would determine how much of a tariff rate was necessary where in the different parts of the country the price of the product was different. He suggested that the President would impose a different rate in the different localities. Of course, that would violate two provisions of our Constitution, one of which is that duties upon imports must be equal and uniform throughout the United States, and that no preference shall be given one port over any other, which simply illustrates the difficulty of this Congress undertaking to divest itself of the taxing power which has been vested in it by the Constitution.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. GORDON. Yes.

Mr. MADDEN. Would the gentleman think that if the section, after the word "guarantee," in line 16, was stricken out, it would cover the case?

Mr. GORDON. If you strike out the guarantee and then strike out the power of the President to impose tariff duties upon imports, there is practically nothing left of the section. So it seems to me the wise thing to do is to strike out the whole thing, because the two vital provisions in this section are first, authorizing the President to impose a minimum price as an inducement, and to keep prices up, or rather to induce people to raise more crops, in the interest of the farmer; and the further provision to authorize him to impose a tariff to exclude imports, in order further to encourage the farmer by preventing prices from falling and further discourage the consumer. Now, just as soon as this thing gets to working and there is a chance that we may get our foodstuffs cheaper under the natural law of supply and demand, then immediately comes in this imposition of tariff rates, which, if they have any purpose at all, it is to keep prices up.

Mr. McKENZIE. Would not that be a violation of one of the fundamental principles of the Democratic Party?

Mr. GORDON. Yes; it would. I agree to that. That is one of the reasons I am opposed to it.

Now, I recognize the fact that at this particular time in this crisis we ought to legislate upon this subject. There are many provisions of this bill that I heartily favor, provisions which we would not have authority to enact at any other time except in time of war. But war does not entirely abrogate and set aside the Constitution—not entirely.

As was pointed out in the learned address the gentleman from Iowa [Mr. TOWNER] made the other day, the only powers conferred by virtue of this war are by the Constitution, which we swore to support. That foolish idea embraced by some gentlemen that as soon as a declaration of war is made the whole constitutional structure comes tumbling down about our heads and that we can legislate without any regard to our oath of office is very unsound. Gentlemen ought to stop and consider whither we are drifting and where we are tending. It seems to me that section 12 is incurable and ought to be stricken out as unsound on any basis. It will never, in my judgment, accomplish what the committee seeks to accomplish by it. It certainly could not do all the things claimed for it. If it does the thing the gentleman from Mississippi [Mr. CANDLER] insists it will do, why, it seems to me it will be a disappointment to the consumer. In other words, if it pleases the farmer it will displease the consumer. There are two conflicting provisions; one is the minimum price and the other is the attempt to delegate to the President the authority to impose tariff duties.

Mr. MEEKER. Will the gentleman yield?

Mr. GORDON. Yes.

Mr. MEEKER. Does the gentleman think that it is a constitutional provision in any sense whatever?

Mr. GORDON. I do not. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman, I yield two minutes to the gentleman from Minnesota [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, in view of the question raised by the gentleman from Ohio [Mr. GORDON] in respect to the constitutionality of that part of this provision which authorizes the imposition of an import duty on articles imported into the country, I want to ask the attention of the committee to the rule laid down by the court with respect to that proposition. I refer particularly to the case of the Michigan Central Railroad *v.* Powers (201 U. S. Rep., 245). The State of Michigan had imposed a tax upon the railroads in that State equal to the average rate of taxation upon all the property in the State, to be ascertained by an administrative body set up for that purpose. In laying down the rule with respect to the power of the legislature to delegate the power to determine mathematically the rate of duty to be imposed, the court said, page 297:

> It may be laid down as a general proposition that where a legislature enacts a specific rule for fixing a rate of taxation, by which rule the rate is mathematically deduced from facts and events occurring within the year and created without reference to the matter of that rate, there is no abdication of the legislative function, but, on the contrary, a direct legislative determination of the rate.

That is exactly what we have done in this bill. We have provided simply that the President shall calculate mathematically what the difference is between the ascertained established minimum price and the value of the property imported with the rate of duty now imposed added. That is a mere mathematical calculation. It is the exercise of an administrative function which the legislature may delegate.

Mr. HAUGEN. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Chairman, I offer the following amendment to the amendment just adopted, offered by the gentleman from Ohio [Mr. GARD].

The Clerk read as follows:

> Insert after the word "ascertain," in the first line of the amendment, the words "through the Tariff Commission."

Mr. LEVER. That is subject to a point of order, Mr. Chairman, but I will not make it.

Mr. LONGWORTH. Mr. Chairman, I have rather entertained the hope that the gentleman from South Carolina, a powerful proponent of the Tariff Commission, as I remember it, would accept this amendment. The effect of the amendment is simply to relieve the President from the duty of ascertaining tariff rates and to impose this duty upon the Tariff Commission, where it belongs. If this Tariff Commission has any duties to perform, it is such duties as this.

Mr. ANDERSON. Will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. ANDERSON. There is a section in this bill authorizing the President to use any agent or any employee of the Government in carrying out the provisions of the bill. Does not the gentleman think that that would authorize the President to use the services of the Tariff Commission in this respect?

Mr. LONGWORTH. It is possible that it might authorize him to do it, but I want it done by the commission in the original instance. What duties and powers did we give the Tariff Commission which we created last September? I will read:

> SEC. 702. That it shall be the duty of said commission to investigate the administration and fiscal and industrial effects of the customs laws of this country now in force or which may be hereafter enacted, the relations between the rates of duty on raw materials and finished or partly finished products, the effects of ad valorem and specific duties and of compound specific and ad valorem duties, all questions relative to the arrangement of schedules and classification of articles in the several schedules of the customs law, and, in general, to investigate the operation of customs laws, including their relation to the Federal revenues, their effect upon the industries and labor of the country, and to submit reports of its investigations as hereafter provided.

Now, if there is any duty which is imposed upon the Tariff Commission, if the Tariff Commission is not merely a farce, the duty of investigating and ascertaining tariff rates should lie with that commission.

I do not intend to bring any politics into the consideration of this bill, but I may remark in passing that my party for many years has been in favor of a Tariff Commission. Only recently the Democracy—it may have been overnight, so to speak—have favored and cooperated with us in enacting a tariff-commission law. I would be loath to believe that their support of a Tariff Commission was not genuine, and yet if you sincerely believe in a Tariff Commission, why do you take away from it the very powers and duties in this case which you placed upon it generally by law.

I am not here to exalt the abilities of the particular commission which has been created under this law, but if the Tariff Commission as it exists to-day is worth its salt, it ought to be able to do just this precise thing that in this law you commit to the President. I have heard a good deal during the debate—many gentlemen have risen to the defense of him whom they call the downtrodden farmer, and I am here to protest against your treatment of the downtrodden Tariff Commission. [Laughter.] I ask that my amendment may be adopted. [Applause.]

Mr. LEVER. Mr. Chairman, the argument of the gentleman from Ohio [Mr. LONGWORTH] is persuasive, but I do not think it is conclusive upon this proposition. The whole theory of the bill is based upon the idea of conferring upon the President certain discretionary powers, and in section 14 of the bill we give him authority to call upon all agencies of the Government to aid him in ascertaining the facts which he desires to have in executing the law, and I would dislike very much to have this amendment adopted. I think we should maintain the general plan of the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The question was taken; and on a division (demanded by Mr. LONGWORTH) there were—ayes 65, noes 96.

So the amendment was rejected.

Mr. LEVER. Mr. Chairman, I yield one minute to the gentleman from Missouri [Mr. DYER].

Mr. DYER. Mr. Chairman, I desire to state that I am in favor of this section and am in favor of the principles of this bill, because I think it is important and necessary that we should have as soon as possible this law put into force and effect. I have received many communications, and every one of them is to the effect that unless this law is put into force and effect without delay it will bring the greatest concern to the producers as well as to the consumers. I desire to read a sample of the many letters that I have received. It is as follows:

> I was glad to see that you took the stand that you did in favor of the food-control bill. Unless something of this kind is done to check the gamblers and thieves of the Chicago Board of Trade from putting up the prices of all foodstuffs, there is no telling where this thing will end. It was only a short while ago when September wheat on the Chicago Board of Trade sold for $2.45 per bushel. This price was manipulated and inflated by the gamblers and the representatives of the allies, who wished to get control of all of the food products of this country, as I have been reliably informed. It was at the time when September wheat reached $2.45 per bushel that some of the fellows who controlled the Chicago Board of Trade saw that unless something was done they would be put out of business, so they met at an executive session and agreed and decided to stop further gambling in the various options of wheat. Since that time the price of September wheat has dropped from $2.45 per bushel to $1.75 per bushel—a difference of 70 cents. If gambling in wheat had not been stopped, wheat would be selling at $5 per bushel to-day. In fact, there is no telling where the price would have gone. If Mr. Hoover and his food-control bill can eliminate these gamblers and thieves of the Chicago Board of Trade from controlling the products of this country, he will have served the public well.

This, Mr Chairman, is from a man who is acquainted with the conditions of the boards of trade, and it is time for us to put an end to all of these things.

Mr. HAUGEN. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 13, line 16, after the word "guarantee," strike out all of lines 16 to 25, inclusive, and on page 14 all of lines 1 to 9 down to the word "States," inclusive.

Mr. MOORE of Pennsylvania. Mr. Chairman, this amendment proposes to strike out that portion of section 12 which gives the President power to fix tariff rates. That is an invasion of the constitutional privilege of Congress, and I would not like to see it go into the bill without a protest. The chairman of the Committee on Ways and Means, the gentleman from North Carolina [Mr. KITCHIN], was on the floor a few moments ago and indicated that he could not fully agree with section 12, although he intended to vote for the bill. The chairman of the committee understands the constitutional privileges of the House, and would be loath, I assume, to permit them to go by the board. He was too modest to offer an amendment of this kind, and so I have taken the liberty of introducing it. The Constitution of the United States provides in section 8:

The Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

That is the constitutional provision that the tariff portion of this section is running up against. The language to which my amendment refers should be eliminated from the bill because if it is enacted into law the President rather than Congress becomes the tariff-making body—which is in violation of the Constitution.

Mr. Chairman, I offer a further amendment, which I send to the desk and ask to have read in my time.

The Clerk read as follows:

Amendment by Mr. MOORE of Pennsylvania: Page 14, line 22, after the word "States" where it is first used, strike out the period and insert a comma and the following words: "or to sell, dispose of, and deliver the same to consumers in the United States at prices and upon terms not exceeding those accorded to any person or Government engaged in war with any country with which the Government of the United States is at war."

Mr. MOORE of Pennsylvania. Mr. Chairman, the section now under discussion gives the President power to hold, transport, or store these various food products, or "to sell, dispose of, and deliver the same to any person or to any Government engaged in war with any country with which the Government of the United States is at war."

He may give these products of the United States away without consideration, under this paragraph. If he does that, whether the products go to our allies or not, it will aid in raising the price to the consumers in the United States. I am aware that certain representatives, or spokesmen at least, of labor organizations upon this floor yesterday indicated their preference for this bill upon the ground that this bill was necessary to reduce the cost of living, that the fixing of prices would reduce the cost of living. I predict, however, that the cost of living will continue to rise and soar after the passage of this bill. The increased cost of living will doubtless go higher as the supplies of food and fuel in the United States are drawn upon against the consumers of the United States for the benefit of our allies. Granted that we should take good care of our armies that are to fight on foreign soil, granted that we should do all we possibly can to provide our allies with food whether they are at the front or in their homes, but let us also consider the consumer in the United States, especially when we are told that flour is selling in London at $8.20 a barrel and is selling in Washington at $17.60 a barrel. My amendment proposes to put the consumers of the United States on equal terms with the nonfighting consumers in the countries of our allies. It seems to me that if we stand for the American people, if we stand for a fair cost of living in the United States, even in these war times, we ought to vote in favor of the people of the United States having equal terms, at least so far as these food supplies are concerned, with those whom we propose to help on the other side of the water. That is the purpose of the amendment. [Applause.]

Mr. LEVER. Mr. Chairman, I trust these amendments may be voted down.

The CHAIRMAN. The question is on the first amendment offered by the gentleman from Pennsylvania.

The question was taken, and the Chair announced the noes appeared to have it.

Mr. MOORE of Pennsylvania. A division, Mr. Chairman; this is a constitutional proposition.

The committee again divided; and there were—ayes 61, noes 74.

Mr. MOORE of Pennsylvania. Tellers, Mr. Chairman.

Mr. GORDON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GORDON. Can not we have this amendment reported?

The CHAIRMAN. Without objection, the amendment will be again reported.

Mr. DYER. Mr. Chairman, I object.

Tellers were ordered.

Mr. SABATH. Mr. Chairman, I ask unanimous consent that the amendment may be again reported.

Mr. DYER. Mr. Chairman, I object.

The CHAIRMAN. The gentleman from Missouri objects.

The committee again divided; and the tellers [Mr. MOORE of Pennsylvania and Mr. LEVER] reported that there were—ayes 83, noes 98.

So the amendment was rejected.

The CHAIRMAN. The question is upon the second amendment offered by the gentleman from Pennsylvania.

Mr. GRAHAM of Illinois. Mr. Chairman, I ask unanimous consent to have that amendment again reported.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The amendment was again reported.

The question was taken, and the Chair announced the noes appeared to have it.

Mr. MOORE of Pennsylvania. A division, Mr. Chairman.

The committee divided; and there were—ayes 44, noes 82.

So the amendment was rejected.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. ANDERSON offers the following amendment: Page 14, line 18, after the word "any," strike out the word "person" and insert the words "citizen of the United States."

Mr. LEVER. Mr. Chairman, I yield the gentleman one minute.

Mr. ANDERSON. Mr. Chairman, in section 9 we adopted some language which was the same as the language which follows the amendment I have just offered, but which was not identical with the language in section 12, in that the amendment adopted in section 9 we used the words "citizen of the United States" instead of the word "person," and I offer the amendment in order to make the language of the two sections correspond.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken, and the amendment was agreed to.

Mr. LEVER. How much time remains, Mr. Chairman?

The CHAIRMAN. Five minutes.

Mr. LEVER. Mr. Chairman, I do not desire to take the time of the committee unnecessarily, but the motion of the gentleman from Missouri is to strike this section from the bill, and the committee ought to have a clear understanding of what is undertaken in this section. This bill proposes in addition to other things to stimulate the production of food products. We are undertaking to do that in several ways. First of all, by assuring to the farmer that he shall have a free and open market for the sale of his products. This we have provided for in a number of sections in the bill, most of them already passed. This section provides also for the stimulation of production by guaranteeing a reasonable profit to those who produce these necessaries of life that are described in this bill. The committee felt that this in itself ought to be a very large stimulus to production in the case of the next crop, which will be needed in the conduct of our operations in the field and the proper feeding of our people at home. We felt that, while the President is urging the farmers of this country to produce, and the Secretary of Agriculture is urging the farmers to produce, and Mr. Hoover is urging the farmers to produce, and this Congress itself is now urging the farmers to produce more things for people to consume in order to preserve and conserve life—we felt that, inasmuch as we are doing these things, it would be unfair to the farmers if, for example, by reason of submarine operations, there should come a great slump in prices, and they should have to bear the burden of a great loss. We did not feel that it would be fair to them. We felt that we ought to do as other nations are doing and see to it that those who produce these things are guaranteed against these eventualities, and I therefore trust this amendment may be voted down.

The CHAIRMAN. The time of the gentleman has expired, all time for debate on section 12 has expired. Does the gentle-

man from Ohio [Mr. GORDON] desire to offer an amendment now?

Mr. GORDON. No; my amendment was offered by the gentleman from Pennsylvania [Mr. MOORE].

The CHAIRMAN. The question is on the substitute offered by the gentleman from Oklahoma [Mr. MORGAN].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now is on the motion of the gentleman from Missouri [Mr. MEEKER] to strike out section 12.

The question was taken, and the Chair announced the noes appeared to have it.

Mr. MEEKER. A division, Mr. Chairman.

The committee divided; and there were—ayes 33, noes 125.

So the motion to strike out was rejected.

The Clerk read as follows:

SEC. 13. That whenever the President shall find that limitation, regulation, or prohibition of the use of foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages, or such nonalcoholic beverages as he shall determine, or that reduction of the alcoholic content of any beverage, is essential, in order to assure an adequate and continuous supply of food, he is authorized, from time to time, to prescribe, and give public notice of, the extent of the limitation, regulation, prohibition, or reduction so necessitated. Whenever such notice shall have been given and shall remain unrevoked, no person shall, after a reasonable time, which shall be prescribed in the notice, use any foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages, except in accordance with the limitations, regulations, and prohibitions prescribed in such notice, or produce any beverage having an alcoholic content in excess of the amount prescribed therefor in such notice. Any person who willfully violates this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000, or by imprisonment for not more than two years, or both.

Mr. WEBB. Mr. Chairman, I desire to offer an amendment to this section.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WEBB: Insert at the end of section 13 the following:

"That the President is authorized if, in his opinion, it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government for use or redistillation such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies, or in so far as such use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcohol or distilled spirits for the purposes herein enumerated. Upon the failure of the person to comply with the President's requirement the President is authorized to requisition and take possession of the alcohol and distilled spirits required to be turned over, and to pay for same a just compensation, to be determined by the President. And if the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President, and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such spirits or alcohol, in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code."

Mr. LEVER. Mr. Chairman, I make the point of order against the amendment that it is not germane to this section, nor is it germane to the bill. But before beginning to argue the point of order I would like to see if we can not agree upon a time for the conclusion of the debate on this section and all amendments thereto.

Mr. THOMPSON. On the section or on the point of order?

Mr. LEVER. On the section and all amendments thereto.

Mr. HOWARD. May I ask the gentleman a question right there? What is going to be the proposition? Are all the amendments going to be introduced that are proposed to be introduced to this section and voted on and adopted during a running debate, or is each amendment going to be debated separately?

Mr. LEVER. My own judgment is that the better way is to do as we did with section 12, namely, let the amendments be offered, debated, and voted upon.

Mr. GARRETT of Tennessee. I think the point of order ought to be disposed of before you begin debate.

Mr. LENROOT. The time that the gentleman will ask does not include the time consumed on the point of order?

Mr. LEVER. Of course not. The debate on the section and all amendments thereto, not the debate on the point of order.

Mr. LENROOT. That would depend on whether it was debated or not.

Mr. LEVER. I think we can reach an agreement. I wish to facilitate the passage of the bill all I can.

Mr. LENROOT. Would the gentleman be willing to agree to 30 minutes on a side?

Mr. LEVER. I should not want to agree until the point of order is disposed of.

Mr. McLAUGHLIN of Michigan. Do you not think that the point of order ought to be disposed of before you fix the time on the merits of the proposition?

Mr. LEVER. I hope to fix the time before the point of order is disposed of.

Mr. McLAUGHLIN of Michigan. Is it the intention of the gentleman to reserve his point of order so that the merits of the amendment may be discussed?

Mr. LEVER. I think we have a pretty good idea of how much time would be necessary, if this point of order is overruled. Then you would be up against the straight proposition contained in the gentleman's amendment, and that provision in the bill, and it seems to me that we would have a pretty clear idea of how much time we ought to consume.

Mr. McLAUGHLIN of Michigan. But it strikes me it would be difficult now to fix the time for debate, because we do not know whether or not the amendment of the gentleman from North Carolina will be permitted. If it is permitted by the ruling of the Chair we would have twice as much to debate about, and we would have twice as much to settle. It would seem to me the better plan would be to have the point of order ruled on and disposed of before the time for debate is limited.

Mr. MADDEN. Would it not be better to reserve the point of order?

Mr. McLAUGHLIN of Michigan. If we will limit the discussion on the merits of the question.

Mr. LEVER. Mr. Chairman, I withdraw the request temporarily, and we will argue the point of order.

Mr. Chairman, section 13 provides in part:

That whenever the President shall find that limitation, regulation, or prohibition of the use of foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages, or such nonalcoholic beverages as he shall determine, or that reduction of the alcoholic content of any beverage, is essential, in order to assure an adequate and continuous supply of food, he is authorized, from time to time, to prescribe, and give public notice of, the extent of the limitation, regulation, prohibition, or reduction so necessitated.

That is the purpose of the section. I make the point of order against the amendment suggested by the gentleman from North Carolina [Mr. WEBB] upon two grounds. First, that his amendment provides in this section for lodging in the President of the United States the discretion to commandeer the alcoholic liquor of the country and to redistil it, a proposition that is not contemplated, or suggested, or hinted at, or squinted at in the language of the section. It might have been possible for the gentleman to have attached his proposition to the commandeering section of this bill, but the gentleman did not do it, and he is now undertaking to attach it to a section in which there is no mention of commandeering for any purpose. And so it seems to me that the amendment at this point in the bill is absolutely ungermane to this section.

I make the further point that the gentleman's amendment is predicated upon the idea that alcohol is food, an idea which some of us sometimes like to think is right, but which not many of us are ever able to prove—to the satisfaction of our wives, at least. Now, then, the Chair already has ruled in section 1 that we could not add other classes of products to this bill, that we could not extend the classification that we have fixed in the bill in section 1.

Now, either the gentleman's proposition goes upon the theory that alcohol is food, and therefore would fall within the ruling of the Chair on section 1, or his proposition is purely and simply a commandeering proposition, which would not be germane to this section of the bill, which has no word of commandeering in it. And for those reasons I make the point of order. [Applause.]

Mr. WEBB. Mr. Chairman, the object of section 13 is to preserve food which otherwise would be manufactured into alcoholic liquors, and in order to carry out that purpose the President of the United States is given discretion as to when he shall make an order that no food supplies or necessaries shall be further manufactured into alcoholic liquors.

You might as well say that the section has no place in this bill as a food conservation section as to argue that my amendment has no place in the bill as a food conservation amendment. The object of the section is to prevent the further useless destruction of food by manufacturing it into alcoholic liquors. The object of my amendment is to allow the President to requisition for Government purposes alcohol and redistilled liquors already in existence, so as to avoid manufacturing such Government supplies from food in the future. I submit, Mr. Chairman, that it takes a fine pair of metaphysical scissors to differentiate between section 13 as a food conservation proposition and the amendment which I have offered.

The gentleman from South Carolina [Mr. LEVER] argues that I ought to have offered this amendment at the end of section 9. I tell him that I used the language "requisition," the word "commandeer" not being employed in the amendment I have sent to the desk. I have used the language of section 9 so far as the requisitioning part of the amendment is concerned, and

it is copied from its almost verbatim. I call attention to section 9, where the language is:

That to carry into effect the purposes of this act.

And the purposes of this act are the purposes for which I send the amendment to the Clerk's desk—the conservation of food and the preservation of it, if the President thinks it necessary to further conserve the food supply of this country, by taking over for Government purposes alcohol and distilled spirits.

Mr. LEVER. I want to ask the gentleman if he would not think that the amendment, if germane at all to this bill, would have been germane to section 9 instead of to section 13?

Mr. WEBB. No; because if I had offered it there, the gentleman from South Carolina would probably have said that nothing about alcohol or distilled spirits was mentioned in section 9.

Now, section 9 provides:

That to carry into effect the purposes of this act the President is authorized to purchase, provide for the production and manufacture of necessaries; to store them, and to provide storage facilities for them by construction, purchase, lease, or otherwise; to sell them; and to require any person having control of any necessaries, or any storage space suitable for the storing of necessaries, to furnish the whole or any part of such necessaries or storage space to the Government in such quantities, at such times and at such prices as shall be determined by the President to be reasonable. Upon failure of the person to comply with such requirement, the President is authorized to requisition—

That is the language I use in reference to liquors and alcohol—

the President is authorized to requisition and take possession of any such necessaries or storage space, and to pay for them at the price so determined.

Mr. SABATH. Mr. Chairman, will the gentleman yield?

Mr. WEBB. Yes; for a question.

Mr. SABATH. Does not the gentleman admit that alcohol is a necessary article needed on the part of the Government, by his own amendment?

Mr. WEBB. I do.

Mr. SABATH. Then, it would have been proper to have offered it at the end of section 9.

Mr. WEBB. Not at all.

Mr. SABATH. If he finds it a necessary article. The language of the amendment, however, says that it is a necessity, because the Government needs it.

Mr. WEBB. Oh, Mr. Chairman, it is tweedledee and tweedledum when you attempt to tell a House composed of sensible men that you can not use the word "requisition," as in this amendment, with reference to alcohol when you have used it in section 9. If it is all right to requisition a man's warehouse and a man's food supply for the purpose of conserving the food supply of this country and other countries, then why is it not germane to require the President to requisition alcohol and distilled spirits for the use of the Government?

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. WEBB. Yes.

Mr. HOWARD. To further demonstrate the germaneness of the gentleman's amendment, it is specifically stated that the purpose of the requisitioning of these alcoholic beverages for redistillation is to prevent the use of grain on behalf of the Government in the displacing of such alcohol as it will need. Therefore it is a pure conservation amendment and not a prohibition amendment.

Mr. WEBB. Absolutely. And I want to say, Mr. Chairman, that it has possibly been noised around that this is a prohibition measure, and therefore that it has no place on this bill.

I appeal to the strongest antiprohibitionist in this House and ask him to say whether or not this is not a food-conservation measure that I have introduced. It may have the effect of preventing some men who drink whisky from drinking too much, because of the Government's using a large amount in its own hospitals and in the manufacture of munitions, but only in that way would my friend from Missouri [Mr. MEEKER] regard it as a prohibitionist amendment.

Let me read the first 10 lines of my amendment. That is all that it is necessary to read to get the meat of the amendment. It reads:

That the President is authorized, if in his opinion it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government for use or redistillation such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies or in so far as the use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcoholic or distilled spirits for the purposes herein enumerated.

Now, Mr. Chairman, it is hard for me to argue that the sun shines when I am looking at it, and I confess to you that it is hard for me to argue the germaneness of this amendment when it is added to section 13, dealing with alcoholic spirits and having application to the food supply and the manufacture of the food supply out of distilled spirits. Suppose it were known that the Government of the United States must use next year 100,000,000 gallons of alcohol and distilled spirits, and suppose it were known as a fact that there are only 100,000,000 gallons of alcohol and distilled spirits in the United States available. Now, must it come to pass that when we are passing upon a great food-conservation bill we can not say in this bill that in order to prevent food and feed being manufactured into alcohol for Government use the President, in order to save the food that would otherwise go into the 100,000,000 gallons of alcohol or distilled spirits, can commandeer and pay for at a just price the alcohol and distilled spirits held in store?

Is not that a food-conservation proposition? A moment ago, Mr. Chairman, I mentioned the fact that there is opposition on the part of some to this amendment, because they think it is a prohibition amendment. Whatever effect it may have upon the prohibition question has nothing to do with the germaneness of this amendment. I admit that it may have a prohibition bearing, and I wish it could have a greater one. If it were germane and possible, I should offer an amendment here prohibiting absolutely the further manufacture of grain into alcohol during the war. I would prohibit the manufacture and sale of alcoholic liquors during this war, and I would provide for the commandeering of all the alcohol there is in existence to-day while the war lasts. But I realize that, of course, that sort of an amendment would be subject to a point of order. But, as I said a moment ago, if this amendment does have the effect of lessening the supply of ardent spirits to the thirsty, that has nothing to do with the germaneness of the amendment; and on that point I want to read to the Chair a ruling which has been sustained ever since it was made, and has never been overruled by any Chairman that I know of.

Mr. LEVER. What page?

The CHAIRMAN. Will the gentleman give the Chair the reference to the ruling?

Mr. WEBB. I am reading from volume 5, section 5803, of Hinds' Precedents:

Whether or not an amendment be germane should be judged from the provisions of its text rather than from the purposes which circumstances may suggest.—On January 15, 1901, the river and harbor bill (H. R. 13189) was under consideration in Committee of the Whole House on the state of the Union.

Mr. FRANK W. MONDELL, of Wyoming, proposed an amendment appropriating a sum of money for the construction of three reservoirs at the headwaters of the Missouri River—

for the purpose of holding back the flood waters of said stream, with a view of minimizing the formation of bars and shoals and other flood-formed obstructions to navigation, and to aid in the maintenance of an increased depth and uniform flow of water for navigation during the dry season.

Mr. Theodore E. Burton, of Ohio, made the point of order that the amendment was not germane to the bill, since the means proposed could not affect navigation, but, rather, related to the improvement of arid lands.

After debate the Chairman (Alfred J. Hopkins, of Illinois) said:

The Chair holds that as the amendment is framed it is germane to the subject matter of the bill and the subject matter over which the River and Harbor Committee has jurisdiction. Now, whether that correctly presents the facts of the case is to be determined on the merits. But as the amendment is presented and read by the Clerk it appears to the Chair that it is entirely proper and germane to the bill, and therefore the Chair will overrule the point of order.

I submit, even though this may have a prohibition bearing, it does not affect the germaneness of this amendment, because the Chair knows and the House knows and sees that if the Government is permitted to requisition alcohol and distilled spirits already in existence, then it is not necessary to manufacture alcohol out of food existing for Government purposes, and, as has been so well said, a bushel saved is a bushel raised. This amendment saves the food supply, and I can not understand why this amendment is not germane, not only to section 13 but to the bill as well, because the object of the bill all the way through it is to conserve the food supply. In every section of the bill you will find that idea running all through it, and my amendment does no more than carry out both the spirit and practically the letter of a number of sections in the bill.

Mr. SAUNDERS of Virginia. Mr. Chairman, the present occupant of the chair, during the progress of the discussion of this bill, has very luminously and accurately, I think, laid down the general principles with respect to germaneness. Nothing that I shall undertake to say in maintaining the proposition that this

amendment is entirely in order will be in contravention of any ruling that the Chair has made in the above respect. On the contrary I rely upon the principles announced by the Chair in support of his rulings.

As I understand the objections raised by the gentleman from South Carolina [Mr. LEVER] to this amendment, they are first, that alcohol is not a food. Granted. But I ask the gentleman from South Carolina if alcohol is not a fuel, and a very necessary fuel for the conduct of modern war.

The next objection that the gentleman raises is the amendment is not germane to this particular section, on the ground that this particular section relates to powers given to the President, which are not the power of requisition.

Mr. Chairman, the second ground of opposition is a very narrow one upon which to rest the contention that this amendment is not germane. If section 13 was the only section in the bill which afforded power to the President to deal with the subject matter of spirits and alcohol, it is possible that by directing our contemplation exclusively to this section, it might be held that an amendment giving powers to the President other and different from those contained in the section would be held out of order. But having in mind the general purpose of this bill, and further the specific sections that afford the most comprehensive power to the President over feeds, foods, and fuel, and the other materials called necessaries, it is impossible to consider the parliamentary character of the amendment offered by the gentleman from North Carolina [Mr. WEBB] as determined solely by the authority afforded to the President by the particular section to which it is offered. It is related to and rests upon other sections of the bill. This particular section is merely one illustration of powers that may be given to the President in connection with alcoholic spirits under and pursuant to the general grant of power in other sections.

As I said before, this amendment could be ruled out of order as an amendment to this particular section if other sections of the bill are entirely disregarded. But even the amendment would be in order as a new section, by virtue of certain provisions of the bill to which I shall call the attention of the Chair.

This bill deals with three great subject matters, namely, foods, feeds and fuel, and in addition with the things related to the production of feeds, foods, and fuel. There is not a thing that is proposed to be done under this amendment that is not related to the head of necessaries, or either as a food, feed, or fuel, or a material necessary for the production of a feed, food, or fuel. Alcohol is a fuel and a fuel that is of essential necessity for the operations of modern war. It is known to be a fact that the Germans, although largely cut off from access to the sources of gasoline supply, have been able to operate their explosive engines of all sorts by the use of alcohol in combination with other materials.

The CHAIRMAN. The Chair is very much interested in the gentleman's argument and would like to ask him a question. The gentleman has referred to alcohol being a fuel. Fuel does not seem to be provided for, or even referred to in section 13, the section to which the amendment is offered. What does the gentleman say about that? The authority given to the President in section 13 seems to the Chair to be limited exclusively to foods and not to fuel.

Mr. SAUNDERS of Virginia. The statement of the Chair is correct. Section 13 does not use the word "fuel." Therefore, as I said a moment ago, if you relate the power of the President in connection with alcohol and distilled spirits exclusively to the powers given in section 13, the gentleman from South Carolina might be able to sustain his objection to the amendment. But I am relating this amendment to other sections of the bill which furnish ample foundation and authority for holding that the amendment is germane and in order.

The CHAIRMAN. The Chair would like to ask another question. If that be true, is it also not true that the amendment offered to a particular section must be germane to that section, in order to be held in order, regardless of whether it might be germane to other sections of the bill?

Mr. SAUNDERS of Virginia. I have stated that to be true. But conceding this amendment to be out of order to this section, it is further true that an amendment that can be related to substantial powers given by substantive sections of a bill will be in order as a separate section.

The CHAIRMAN. That question is not before the Chair.

Mr. SAUNDERS of Virginia. I will argue it now because if this amendment is in order as a separate section by virtue of the fact that it is included within the grant of powers conferred by other sections of the bill, and rests upon those sections, I maintain that it is in order as an amendment to section 13, which confers no new powers upon the President. As I have stated, when we look to section 1 we find foods, feeds and fuel and the articles necessary to their production, comprehended in that section. Alcohol in itself is a fuel, and distilled spirits is a substance out of which alcohol may be distilled. Both, according to the definitions of the bill, are necessaries.

The gentleman from North Carolina has argued from the viewpoint that this amendment is in order as a part of a scheme of food conservation. I will not elaborate that contention as it has been very fully and ably presented.

When the Chair looks to section 3 of the bill, he will find that this section establishes Government control over the production of necessaries. This of course establishes Government control over the production of alcohol as a fuel, and therefore a necessary, by the redistillation of spirits, a material out of which alcohol may be produced, and therefore itself a necessary. Section 3, in part, is as follows:

> There is hereby established a governmental control of necessaries which shall extend to and include all the processes, methods, activities of, and for the production, manufacture, procurement, storage, distribution, sale, marketing, pledging, financing, and consumption of necessaries.

This section therefore provides in the largest possible manner for applying Government control to the procurement and production of that essential necessary, namely alcohol.

But we do not have to rely on this section alone to support the Webb amendment. Proceeding to section 9, we find the most ample foundation upon which to rest the contention that this amendment is in order both as an amendment to section 13 and as a separate independent section. Section 9 provides that "to carry into effect the purposes of this act, the President is authorized to purchase, and provide for the production, or manufacture of necessaries."

The sweeping power therein given is not confined to any of the prime necessaries defined as feeds, foods and fuel, but extends to the processes of producing these necessaries. The President is given the power to provide for the purchase, procurement and manufacture of necessaries. Is not alcohol a necessary? I would like to have some one who holds that this amendment is out of order undertake to demonstrate that alcohol itself, or distilled spirits from which alcohol can be produced, is not a "necessary" under the terms of this bill, or that the authority is not given to the President to provide for the production and procurement of these necessaries.

But that is not all, Mr. Chairman; reading section 9 further you will find that when the Government needs these necessaries the President is given the authority to go to a man who has control of the same and in substance say to him: "Turn these necessaries over to the Government." That is what this amendment proposes to do, namely to empower the President to call upon the parties controlling spirits or alcohol to turn over the same to the Government, and in the event this is not done, to commandeer these articles, and pay for them in the manner prescribed.

Mr. ALEXANDER. Will the gentleman yield?

Mr. SAUNDERS of Virginia. Yes.

Mr. ALEXANDER. I call the gentleman's attention to section 3, where it says—

> There is hereby established a governmental control of necessaries——

Mr. SAUNDERS of Virginia. I have already read that as a part of the fundamental basis for the contention that this amendment is in order. I call the Chair's attention to the potent effect and meaning of the words cited by the gentleman from Missouri.

Looking further to section 9, we find that in express terms the President—and mark you, we are dealing with the President's power in this amendment—is authorized to secure these necessaries. This section affords the steps to that end. He is empowered to call on any man controlling these necessaries and require him to turn them over to the Government. Suppose the party in control declines to act on this request, what follows? The President is authorized to acquire the needed necessaries by the process of requisition and payment.

Any necessary may be secured in this manner, whether a feed, food, or fuel, or an article necessary for their production.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS of Virginia. Yes.

Mr. LENROOT. I just want to know if I understood the gentleman correctly. Is it the gentleman's contention that this bill is not limited to foods, feeds, and fuel?

Mr. SAUNDERS of Virginia. It is limited to foods, feeds, and fuel, and those things that are related to the necessary production of foods, feeds, and fuel.

Mr. LENROOT. Articles required for that purpose.

Mr. SAUNDERS of Virginia. Absolutely; and I have tried to point out in that connection that alcohol is a fuel and therefore in itself a necessary.

Mr. LEVER. The gentleman will observe that the only reference to alcohol in section 13 is in its use as a food, and that no reference is made to its use for fuel purposes.

Mr. SAUNDERS of Virginia. I understand that perfectly well, and the same suggestion was made a moment ago by the Chair; but I submit that this suggestion is in no sense an answer to the contention that this amendment will be in order as a separate section. If this amendment is ruled out of order as an amendment to this section, it will be offered as a separate section. I am seeking to maintain two contentions in my argument, though strictly speaking at this time, there is only one proposition before the committee. In further reply to the suggestion of the gentleman from South Carolina [Mr. LEVER] I will say that section 13 does not give the President all of the authority that may be conferred upon him in connection with alcohol. It merely affords him a portion of the authority that can be exercised, and is afforded by preceding sections of the bill. My contention is that the committee can not restrain the Committee of the Whole House from enlarging the powers of the President under this section conformably to other sections of the bill, by conferring upon the President a limited allotment of the authority derived from and conferred by the antecedent sections. You can not restrain the House from going to the same source of authority, namely section 9, and deriving therefrom other appropriate powers to be exercised by, and conferred upon the President.

Mr. PADGETT. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS of Virginia. Certainly.

Mr. PADGETT. Section 13 relates to alcohol as a food, as suggested by the gentleman. This amendment relates to alcohol as a food by preserving the elements out of which alcohol is made?

Mr. SAUNDERS of Virginia. Absolutely.

Mr. PADGETT. Section 13 relates to alcohol as a food, and the amendment relates to alcohol as a food.

Mr. SAUNDERS of Virginia. As a food, and a fuel both.

Mr. PADGETT. And not as fuel only.

Mr. SAUNDERS of Virginia. The only reason that I have not developed that point at greater length is, as I have pointed out, that it has been fully discussed by the gentleman from North Carolina [Mr. WEBB], and I have been presenting as best I could another phase of the pending situation. I believe, Mr. Chairman, that I have concluded what I set out to say. I contend that without any reference whatever to this particular section, if this amendment is offered as a separate section to the bill, it will be in order, by virtue of sections 1, 3 and 9. I contend that if it is offered as an amendment to section 13, in spite of the suggestion of my friend from South Carolina, it will be in order, on the ground that it is derived from the sections which afford a most comprehensive grant of power. Section 13 rests upon the authority afforded by those sections. It is competent for this committee to tap the same source of authority and confer upon the President through the Webb amendment the further power which this amendment will lodge in the Executive. I maintain that this amendment being in order as an independent section by virtue of other sections of the bill, and dealing with alcohol and distilled spirits, it will be carrying the rule of germaneness to a hair-splitting extent, to hold that this amendment can not be attached to a section dealing with, and relating to the same subject matter of alcohol and distilled spirits.

Mr. LENROOT. Mr. Chairman, if this point of order should be overruled I expect to support the amendment, but no Member of the House, of course, ought to be guided upon a parliamentary question by his views with respect to the merits of the amendment, because it is more important that we have a uniform system of parliamentary law than to have it violated or abridged in a particular case, because in that particular case it is in accordance with our own particular views. With reference to this amendment it seems to me very clear that notwithstanding all that has been said, in its present form at least, the Chair would be compelled to sustain the point of order. I call the Chair's attention to the language of the amendment:

That the President is authorized, if in his opinion it is necessary to conserve necessaries, to commandeer any or all distilled spirits in bond at the date of the approval of this act for use——

Mr. SAUNDERS of Virginia. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. SAUNDERS of Virginia. That is not the amendment that is before the House.

Mr. BUTLER. Mr. Chairman, this is the amendment that the gentleman from North Carolina handed to me, but he had another one read, and in handing it to the gentleman from Wisconsin I did not mean to mislead the gentleman.

Mr. LENROOT. I have the copy here now. The point that I make is exactly the same in either case. I read:

may seem necessary to meet the requirements of the Government in the manufacture of munitions.

He is authorized to commandeer to that extent. Will any gentleman say that in the manufacture of munitions alcohol is either a food, a feed, or a fuel, or that so far as its being used in the manufacture of munitions is concerned it could conserve one pound of the food supply of the United States?

Mr. WEBB. That simply defines the limit to which the commandeering or requisitioning can go. That provides the amount of alcohol and distilled spirits that may be requisitioned.

Mr. LENROOT. That is true; but when the gentleman names it for the manufacture of munitions he makes it plain in his own amendment that to that extent it could not be for the conservation of necessaries.

Mr. WEBB. If you take the reverse of that, the conservation of food supplies is to be carried on to that extent, and that alone. If you had not put some limit, the amendment would permit the President to commandeer or requisition all alcoholic spirits in the United States.

Mr. LENROOT. No.

Mr. WEBB. The amendment only authorized the President to requisition an amount equal to that which is needed for the manufacture of munitions and for hospital use.

Mr. LENROOT. No; the amendment would be complete if it authorized the President to commandeer in so far as such use or redistillation would dispense with the necessity of utilizing products and materials suitable for food, and so forth. Then the amendment would have been complete, but when he says for the manufacture of munitions, it makes it plain upon its face that the purpose is not in part for the conservation of food, but is for a purpose entirely foreign to this bill.

Mr. SAUNDERS of Virginia. Will the gentleman yield?

Mr. LENROOT. I will.

Mr. SAUNDERS of Virginia. It is not limited to munitions, if the gentleman will read further.

Mr. LENROOT. I understand it is not limited to munitions, and no one knows better than the gentleman from Virginia——

Mr. SAUNDERS of Virginia. And other military purposes, and motor fuel is a military purpose.

Mr. LENROOT. And no one knows better than the gentleman from Virginia that if the proposed amendment shows that one provision is out of order and not germane the entire amendment falls to the ground.

Mr. DECKER. Will the gentleman yield?

Mr. LENROOT. I yield.

Mr. DECKER. Does the gentleman contend that by inserting the word "munitions" there that it does away with it being for the purpose of the conservation of food?

Mr. LENROOT. Yes; to that extent.

Mr. DECKER. Then let me ask a question in that connection. Suppose there are 100,000,000 gallons of alcohol in existence now and suppose for the sake of munitions next month we had to have 100,000,000 gallons of alcohol and we have just so much supply of material with which alcohol is made and if this Congress then provides you shall not use the food that people will need in the future but requisition the alcohol already in existence, does the gentleman contend that is not a conservation of food? [Applause.]

Mr. LENROOT. No. The proposition the gentleman now makes is later cared for completely in the amendment, that in so far as it is necessary to conserve food products, and so forth, utilized for making alcohol. This is found later in this amendment, but in addition to that he is authorized to commandeer for the purpose of making munitions which is neither food——

Mr. DECKER. But for the purpose of making munitions; the paramount purpose being to take away and prevent the use of food for the making of munitions.

Mr. LENROOT. The gentleman does not read the amendment.

Mr. DECKER. I listened to the gentleman when he read it.

Mr. LENROOT. I assume if we struck out munitions in this amendment that then you will confine it, if it can be in order at all, to what the gentleman now speaks of, if there are 100,000,000 gallons of alcohol that could be saved in that way that would to that extent conserve the food supply of the country; but Mr. Chairman——

Mr. BATHRICK. Will the gentleman yield?

Mr. LENROOT. I do not desire to take up too much time.

Mr. BATHRICK. Just for a question.

Mr. LENROOT. All right.

Mr. BATHRICK. This amendment calls for the use of these distilled spirits and alcohol for military purposes. Can not the gentleman conceive of a situation where the supply of

gasoline would fall down and require alcohol for a motor fuel? That would be fuel.

Mr. LENROOT. Certainly. I predicated my entire argument on the question of the manufacture of munitions which is not a fuel, as it would be in the case of which the gentleman from Ohio speaks.

Mr. GRAHAM of Pennsylvania. Will the gentleman yield?

Mr. LENROOT. For a question.

Mr. GRAHAM of Pennsylvania. Does not the very case that the gentleman from North Carolina cites cover the exact question that has been just addressed to the gentleman, that the amendment must be judged by its text and the text has declared its purpose to be for the manufacture of munitions?

Mr. LENROOT. Yes; and, Mr. Chairman, let me submit this proposition: If the Chair were to hold this amendment is in order, the Chair was in error when he ruled clothing out of this bill and ruled cotton out of this bill; and I think the Chair was correct when he did that, because it could have been argued just as directly that a cheap supply of warm clothing to the people of the United States would conserve the fuel supply of the United States, because it would require less fuel to keep them warm, and in the case of cotton that cheap cotton blankets would require less fuel; but certainly no one would have argued such an absurd proposition as that.

And furthermore, Mr. Chairman, upon this amendment, this amendment can not conserve the food supply unless out of this commandeering we will secure alcohol that can take the place of alcohol that would be directly secured from food products. Now, will this amendment do that? What does it do? It authorizes the President to commandeer for use by distillation of these distilled spirits. Suppose he does. Suppose he commandeers every gallon of whisky in the United States under this amendment? What can he do? Can he get alcohol out of it? Can he get alcohol used so as to save it? Not under this amendment, not under any law now upon the statute books. All he can do is to commandeer this 220,000,000 gallons of distilled spirits and keep it in store because there is no specific authority in this amendment for the President to go into the operation of redistillation. I do think it possible for the gentleman to frame his amendment in such a way; it might be in order, but I do submit in its present form it is not.

Mr. TOWNER. Mr. Chairman, I desire to say a word or two before the Chair passes upon this question, because I think it is an important one.

I have no doubt whatever that the Chair would be amply justified in holding that this amendment is germane to this particular section of the bill. It is not required in the rule that it should follow the specific objects and purposes that are stated in the section. That is not the purpose of the rule, and it is not the language of the rule. The language of the rule is that no motion, or proposition, or a subject different from that under consideration, shall be submitted under color of amendment. Now, I want to call the Chair's attention to the fact that this particular section as well as practically the whole of this bill is directed to the purpose of food conservation. I have no doubt but what that is the object and purpose of this particular section of the bill as originally drawn, and it provides that in order to save food products the President may order that no food products or grains shall be manufactured into alcohol.

Now, we have already in existence a large amount of alcohol in the United States, a large amount of distilled spirits in the United States, out of which the alcohol necessary for the Government can be procured, and the statement is made by the Government experts that they will probably use more alcohol than has ever before been manufactured in the United States, for munition purposes alone.

Mr. Chairman, is it possible that the Chair would hold that if in this particular section for the purpose of saving the grain, which is the object and purpose of this section, that you can not require and the Government can not use the alcohol and distilled spirits now in existence rather than requiring that the food supply should be made, as it can only be made, out of the grain that shall be grown in the United States? Why, Mr. Chairman, there could not be any more direct connection than there is between the object and purpose of the amendment and the object and purpose of this particular paragraph of the bill.

What will be the actual result of it? We will say a hundred million bushels of grain will be required to furnish the Government of the United States alcohol that it uses and must have. Now, there is in existence alcohol and distilled spirits sufficient to furnish the Government with 100,000,000 bushels equivalent in alcohol. It can take that alcohol and distilled spirits without touching a single bushel of grain in the United States. Does the Chair hold that that will not be a conservation of the food products of the United States? Will the Chair hold that that is not in consonance with the object and purpose of that particular section of this bill? It seems to me it is not necessary for the Chair to go very far afield to find this almost necessary connection.

I want to call the Chair's attention to the fact that until recently it has not been held that it was requisite that an amendment should pertain to the particular section of the bill. That is now the rule. But it has not been the rule always. It is only recently, for practical purposes, that it has been established. And I call the Chair's attention to the fact that whenever there can be even a slight connection between the object of the particular section and the amendment that is offered the Chair will hold that it is a pertinent amendment to the bill and germane.

I would like to call the Chair's attention to one very distinctive case, No. 5839 of Hinds' Precedents. This was a joint resolution introduced in the House of Representatives giving an expression of sympathy with the persecuted Christians in Turkey, and to that which was stated clearly in the language of the resolution, Mr. William T. Hepburn, of Iowa, offered the following amendment:

> That for the purpose of emphasizing our protest against the murders and outrages above recited the President is directed to furnish the Turkish minister his dismissal as a representative of the Sultan at this Capital and to at once terminate all diplomatic relations with the Government of Turkey.

And Mr. Speaker Reed held that that was a germane amendment, because it related to the substance of the resolution.

Now, Mr. Chairman, in this case, I judge that the Chair is not going to seek for reasons to defeat an amendment of this kind. I do not think he would call up in his imaginations reasons why it should be stricken out of this bill. If it can serve, as it must serve, the great and useful purpose of placing in the hands of the Government the right to obtain for its own purposes millions of dollars' worth of alcohol that it must use in the manufacture of munitions, without taking a single bushel of the grain products necessary to feed the Nation, certainly the Chair will not go far to see that such a laudable object as that shall be accomplished. [Cries of "Rule!" "Rule!"]

Mr. SAUNDERS of Virginia. Mr. Chairman, I just want to call the Chair's attention to one particular proposition. The gentleman from Wisconsin [Mr. LENROOT] said that this amendment would not be operative to furnish the Government with any alcohol, because it did not afford any power of redistillation in the hands of the President. We covered that by section 9, which gives the power to the President to redistill if he chooses to do so. This simply affords raw material, spirits, and under section 9 you have the right to redistill.

The CHAIRMAN. The Chair is ready to rule.

The Chair does not fail to appreciate the importance of this matter and desires publicly to thank the gentleman from North Carolina [Mr. WEBB] for calling his attention, on yesterday, to the fact that he was going to introduce an amendment somewhat similar to the amendment which he has now introduced; and the Chair took advantage of that notice, and looked up the question, and desires to ask the committee to bear with him a moment, because he has reduced to writing some of the views which he desired to submit on this proposition.

Experience as old as civilization itself has taught the lesson that in order for an aggregation of individuals to reach a common conclusion on any proposition that some system of orderly procedure must be followed. And that that system must have the elements of permanency—not one to be varied from—and administered in a way to suit the whims of those charged with its administration.

Parliamentary law, somewhat like the common law, is largely the result of the experiences and wisdom of men who have lived and wrought so nobly in the past that we might, by reason of their experiences, accomplish even more than they, for the welfare of ourselves and the generations that will follow us.

From time to time there have been added, as experience showed the meaning, certain written rules which are to govern us in the transaction of our business; and, weak indeed, ah! even contemptible, is the man whose duty it is to administer these rules who will permit his individual opinion of the merits of a particular proposition to influence his decision upon a proposition of parliamentary law. Now, having said that much, let us see what we have before us at this time; what is the proposition upon which the Chair is now called upon to rule?

The gentleman from North Carolina [Mr. WEBB] offers the following amendment to section 13 of the pending bill:

> At the end of the section add the following: "that in order"—

And so forth.

To this amendment the gentleman from South Carolina [Mr. LEVER] interposes a point of order on the grounds that the amendment is not germane, in that it proposed to introduce into the bill a subject different from those now in the bill, and that it proposes to impose upon the President authority and duties to do certain things of a character different from those things provided for in the bill. If the contention of the gentleman from South Carolina is correct, then, of course, the point of order must be sustained on authority of section 7, of Rule 16, of the Manual of Parliamentary Law and the Rules and Practice of the Houses of Representatives, which, of course, are binding upon the Chair.

The Chair does not hesitate to say that he is entirely in sympathy with the purpose of the amendment, and if his only guide to a decision of this point of order could be his feelings as to the desirability of the things to be accomplished by the amendment, he would find it easy to overrule the point of order. But the Chair realizes that in passing upon this point of order he must be governed entirely by his conception of his duty under the rules of the House and a due and respectful deference to the precedents set by men much abler than himself who have passed upon similar propositions. For the Chair to do otherwise he would stultify, and therefore despise, himself. Therefore the Chair shall decide this matter as he believes he should, under the rules of the House, and shall invite the judgment of the committee on the correctness of his ruling.

At the very beginning let this well-settled rule of procedure be fully understood. A committee reporting a bill may embrace in it as many different subjects as it may choose, but after the bill has been reported to the House no different subject can be introduced into it by amendment, whether as a substitute or otherwise. This general proposition conforms not only to a long line of precedents made by eminent Speakers, but chairmen as well, but conforms strictly to the provisions of section 7, of Rule XVI, which is binding in this committee until repealed.

Section 7 of Rule XVI reads, as follows:

No motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

Now, this amendment is offered to section 13 of the bill. If the amendment seeks to introduce into the bill a subject different to that or those provided for in section 13, then it must go out on a point of order. If not, the point of order must be overruled.

Let us see what the amendment provides for:

That the President is authorized, if in his opinion it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government for use or redistillation such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies, or in so far as the use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcoholic or distilled spirits for the purposes herein enumerated.

It then provides that upon the failure of any person to comply with this provision the President may take charge and requisition all alcohol and distilled spirits and require them to be turned over to him and to pay for them for the purpose of redistillation, but no authority is given to carry out that purpose.

Now, let us see what section 13 is, to which this amendment is offered. The Chair asked the gentleman from North Carolina [Mr. WEBB] when he offered the amendment whether he offered it to section 13 or as a new section to the bill. He said he offered it to section 13. Now, section 13 provides—

That whenever the President shall find that limitation, regulation, or prohibition of the use of foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages, or such nonalcoholic beverages as he shall determine, or that reduction of the alcoholic content of any beverage, is essential, in order to assure an adequate and continuous supply of food, he is authorized, from time to time, to prescribe and give public notice of the extent of the limitation, regulation, prohibition, or reduction so necessitated.

He may prescribe what? The extent of limitation in the use of food for that purpose, the regulation in the use of food material for that purpose, the absolute prohibition of the use of food material for that purpose, or a reduction of the food or food material used for that purpose.

Now, that is all the authority the President has in regard to food or feed material set out in section 13. Gentlemen will not overlook that very well-established principle laid down in the precedents. I quote now, just briefly, from section 5825 of Hinds' Precedents, when the Chair, Mr. Carlisle, of Kentucky, rendered the opinion. He said:

The rules do not prohibit a committee reporting a bill from embracing in it as many different subjects as it may choose; but after the bill has been reported to the House no different subject can be introduced into it by amendment, whether as a substitute or otherwise. * * * This is the test of admissibility prescribed by the express language of the rule; and if the Chair, upon examination of the rule under consideration and the proposed amendment, shall be of opinion that they do not relate to the same subject, he is bound to sustain the objection and exclude the amendment, subject, of course, to the revisory power of the Committee of the Whole on appeal.

Now, the Chair does not hesitate to say that personally he is entirely in sympathy with the purpose of this amendment, and if in order the Chair would not hesitate for a moment to vote for it. But the Chair can not let that fact influence him in passing on the point of order. The rules of the House have been adopted for the orderly procedure of this House, and they are not only binding upon the Chair but also upon the membership of the House.

Now, the Chair does not believe in passing upon the question whether it would be germane to the bill if offered as a separate section; the Chair is not passing upon that question now. But he can not believe that it is germane to section 13. There is a long line of decisions, beginning with the Forty-fifth Congress, holding that an amendment should be germane to the particular paragraph or section to which it is offered, and then following that is a long line of decisions that, so far as the present occupant of the Chair knows, have never been questioned.

The Chair can not reach the conclusion that the things provided for in the Webb amendment come within the designated authority given to the President in section 13. The Chair again repeats that he is not saying that if offered as a new section to the bill it might not be in order; but when offered to section 13, the Chair does not believe it germane, and therefore sustains the point of order.

Mr. HOWARD. Mr. Chairman, I offer a substitute for section 13, to strike out and insert.

The CHAIRMAN. The gentleman from Georgia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. HOWARD: Page 15, line 4, strike out all of section 13 and insert the following:

"SEC. 13. That the President is hereby authorized to limit, regulate, or prohibit the use of food, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages whenever in his judgment such prohibition, limitation, or regulation of such food, food materials, or feeds is essential in order to assure an adequate and continuous supply of food, which said prohibition, limitation, or regulation shall be made manifest by the proclamation of the President, and after the issuance of such proclamation it shall be unlawful for any person, firm, or corporation to use any such food, food materials, or feeds in the manufacture of alcohol, alcoholic or nonalcoholic beverages. That in order to further assure an adequate and continuous supply of food no grain or other food products shall be used for the manufacture of alcohol for governmental purposes until all distilled spirits now in the possession of the United States Government in bonded warehouses shall have been redistilled for the purpose of extracting such alcohol as the necessities of the Government may require for the conduct of the war: *Provided*, That all such distilled spirits so taken over by the Government shall be paid for at a reasonable price to be fixed by the President. Any person who willfully violates the provisions of this section shall, upon conviction thereof, be punished by a fine of not less than $500 nor more than $5,000 or by imprisonment for not less than one nor more than two years, or both."

Mr. LEVER. Mr. Chairman, I make the point of order against that amendment that it is not germane. I would like to have the gentleman from Georgia argue the other end of it for a moment, because he has handed me another amendment, which I have not had an opportunity to examine.

Mr. HOWARD. That was the left-hand barrel of the gun that I handed to him.

Mr. LEVER. If the gentleman will shoot the right-hand barrel, I will look at this other one. [Laughter.]

Mr. HOWARD. I presume that the Chair very clearly sees——

SEVERAL MEMBERS. Rule! Rule!

Mr. HOWARD. I think the House is usually fair enough to let a man present what he believes to be an intelligent distinction.

The CHAIRMAN. The Chair will hear the gentleman briefly on the point of order.

Mr. HOWARD. My colleagues are generally very courteous to me, and I do not want to be snapshotted in the brush without giving me a fair fly for my rights.

The CHAIRMAN. The Chair will give the gentleman a fair hearing.

Mr. HOWARD. There is a very clear, clean-cut distinction in the amendment I have offered, which is to strike out and insert, carrying out all of the purposes of the gentleman from South Carolina, and then in addition to carrying out the purposes of the gentleman from South Carolina as a conservation measure I go further and render him material assistance in conserving to the people of the United States some 60,000,000 bushels of grain.

The CHAIRMAN. Will the gentleman let the Chair ask him a question about this?

Mr. HOWARD. Yes.

The CHAIRMAN. The gentleman understands that his amendment is to strike out and insert a new section 13, which is tantamount to offering an amendment to section 13, is it not?

Mr. HOWARD. Yes.

The CHAIRMAN. And it must therefore be germane.

Mr. HOWARD. Surely.

The CHAIRMAN. Now, does the gentleman also understand that one portion of his amendment authorizes the President to do certain things and the next section instructs him to do certain things?

Mr. HOWARD. Well, why can we not instruct the President to do anything where we are vesting him with administrative powers? It is all through this bill. Will the Chair please point out to me where the instruction is given to the President?

The CHAIRMAN. The Chair has only read it very hurriedly.

Mr. HOWARD. There is not one instruction which is given to the President of the United States. It might be directed to the Surgeon General of the Navy or the Secretary of the Navy or the Secretary of War. Here is what it says. It says that before the Government can manufacture alcohol for governmental purposes it must first take over that which it now has in its possession; not in the possession of somebody else, but in the possession of the Government itself. It has physical, corporeal possession of it, and it directs that he, the President, must use up and redistill the alcohol which it has in its possession before it can engage in the manufacture of alcohol out of new grain. That is conservation, not prohibition.

The CHAIRMAN. The first part of the gentleman's amendment authorizes the President to limit, regulate, and prohibit the use, and so forth.

Mr. HOWARD. That is in conformity with the section as it is now written.

The CHAIRMAN. Absolutely.

Mr. HOWARD. Verbatim et literatim.

The CHAIRMAN. The gentleman's amendment reads—

That, in order to further assure an adequate and continuous supply of food, no grain or other food products shall be used for the manufacture of alcohol for governmental purposes until all distilled spirits now in the possession of the United States Government in bonded warehouses shall have been redistilled.

There you take from the President his discretion.

Mr. HOWARD. Yes; that it shall be used, not until a certain thing is done, to wit, the use of that supply of alcohol which is now in existence, and already in possession of the Government, for which grain has already been used; that the Government shall not engage in the manufacture of alcohol until that which it has in its possession has been redistilled. If that is not conservation, I do not know what it is. It is not in conflict with the ruling of the Chair a moment ago. The Chair ruled on it because all sorts of things were enumerated in it—munitions and things of that character. If the Chair will read the section as it is written in the bill, and will read the substitute that I have offered for it, the Chair will see that I have employed practically the identical language; and, then, I say that to further conserve the grain supply and to make sure an adequate supply of grain——

The CHAIRMAN. The Chair thinks that perhaps he got hold of the gentleman's left bower. The Chair had handed to him the wrong amendment awhile ago.

Mr. HOWARD. I thought the Chair had, from what the Chair said.

The CHAIRMAN. The Chair was reading from an amendment which the gentleman from Georgia handed to him, but it seems not to be the one that was read from the desk.

Mr. MEEKER. I ask unanimous consent that the Chair, for the benefit of the gentleman from Georgia, read the amendment which is under consideration.

The CHAIRMAN. The gentleman from Georgia is arguing the amendment that is under consideration. The Chair had another amendment, but he has the right one now.

Mr. HOWARD. If the gentleman from Missouri [Mr. MEEKER] will just maintain his equilibrium for a few minutes, then he can reply to the parliamentary situation. I will wait until the Chair reads my amendment, because I am sure he will then hold it in order.

The CHAIRMAN. The gentleman may proceed.

Mr. HOWARD. If the Chair will notice, about the middle of the amendment, at the end of the line, the change from the language of the bill made by my amendment starts out—

That, in order to further assure an adequate and continuous supply of food, no grain or other food products shall be used for the manufacture of alcohol for governmental purposes until all distilled spirits now in the possession of the United States Government in bonded warehouses shall have been redistilled for the purpose of extracting such alcohol as the necessities of the Government may require for the conduct of the war.

Now, what does that do? What is the object of that language? The object of that language is to conserve grain and food—blackstrap molasses and things from which alcohol is extracted. That is the sole purpose of it. There is not a word in this whole amendment about prohibition, the sale of liquor, or the amount that anybody can drink if he can get hold of it. It is purely and simply the conservation of a supply of alcohol that the Government now has in its possession. In other words, as I stated to the gentleman from North Carolina [Mr. WEBB], when he was good enough to permit an interruption, the real object of it is to save the grain that would have been necessary to manufacture the alcohol that the Government may need, which it would have been necessary to manufacture out of new grain, while we have a supply from which it can be made, in the making of which the grain has already been used.

It is undoubtedly in order, and I submit that it is germane to this bill, it is germane to the section, and it is in order on that section because it is purely and simply a conservation measure. I would like for the Chair to hear from the gentleman from South Carolina on that proposition, because I feel that he is too good a parliamentarian to take issue with me on that proposition. I hope he will accept the amendment.

Mr. LEVER. Mr. Chairman, just one minute on the point of order. The Chair will observe that section 13 provides that the President may make certain limitations, regulations, or prohibitions in reference to the use of foods and feeds in the production of alcoholic or nonalcoholic beverages. The amendment of the gentleman from Georgia in some parts follows the language of section 13, but there is this provision in the gentleman's amendment which makes it subject to a point of order, in my judgment, and I will read it:

That in order to further assure an adequate and continuous supply of food, no grain or other food products shall be used for the manufacture of alcohol for governmental purposes until all distilled spirits now in the possession of the United States Government in bonded warehouses shall have been redistilled for the purpose of extracting such alcohol as the necessities of the Government may require for the conduct of the war.

And then further:

Provided, That all such distilled spirits so taken over by the Government shall be paid for at a reasonable price, to be fixed by the President.

Now, let us see what the situation is. The bill provides that the President, in his discretion, may fix such limitations, regulations, or prohibitions upon the use of feeds and foods in the manufacture of alcoholic and nonalcoholic beverages as he may see fit. There is no limitation on his discretion at all; it is a discretion as wide as the President may desire to use. The gentleman's amendment proposes not that he shall exercise any discretion, but that he must do certain things, namely, he must distill into fuel or alcohol, I take it, practically all the alcohol in the bonded warehouses in the United States. That in itself in my judgment brings the amendment of the gentleman under the inhibition of the rule of germaneness.

But, in addition to that, the gentleman's amendment has in it the same vice that was in the amendment offered by the gentleman from North Carolina, namely, that it proposes, without saying so, to requisition all the whisky of this country and to pay for it at prices fixed by the President. If the Chair was right in his ruling on the other amendment, the Chair must hold that this amendment is also out of order.

Now, I desire to say this: That I am trying to preserve the integrity of this bill. I am as much of a prohibitionist as the gentleman from Georgia or my good friend from North Carolina, and I am inclined to think that if these amendments had come from the proper committee they might have received my support, but it is my duty as chairman of the Committee on Agriculture, regardless of what the country may think, to stand by that which my committee has told me to stand by. I therefore insist on the point of order.

Mr. DECKER. Mr. Chairman, I am glad the distinguished gentleman from South Carolina made the statement that he did in his closing sentence, for I have been at a loss to understand upon what theory or logic or reason he has been standing as he has. He tells us now that it is mainly because it was not brought out by his committee.

Mr. LEVER. Oh, no; not at all; I did not make any such statement. I make the statement that these amendments have not been considered by any committee of Congress; they have been brought before the House for consideration in the Committee of the Whole, without coming from a committee, and are absolutely not germane to this proposition. [Applause.]

Mr. DECKER. The fact that they have never been heard of before has nothing to do with the germaneness. Now, Mr. Chairman, let me say to you, sir, that the question of germane-

ness does not require a Philadelphia lawyer, or some man who has been in Congress for 40 years, to determine. There are some things as plain to one man as to another. The word "germane" is a common word in the English language, and there is nothing prolix or profound in this rule of the House. You may not believe in prohibition, you may not believe in the doing away with alcohol to conserve the food of this country, but how any intelligent man understanding the English language can hold that this amendment is not germane to the subject I can not understand. Let us see what the purpose of the bill is as advocated by the committee in section 13. You talk about munitions, as the gentleman from Wisconsin talks, you can talk about hospital supplies, or you can talk about any other proposition in it, but any man who can read knows that the primary object, the paramount object, in section 13 is the conservation of food. It matters not whether you conserve the food by the exercise of the war power or whether you use the right of purchase, the primary purpose is the conservation of food, and no man can deny it.

Now, Mr. Chairman, let me say to the chairman of the committee, what is the purpose and how far does your section go? Your section provides for the limiting of the use of liquor in the future and nothing else. In other words, you authorize the President to say to the country, "You shall not take the wheat and the corn and the barley of this country and make alcohol of it.

Mr. LEVER. What does this amendment do?

Mr. DECKER. That is just what I am coming to.

The CHAIRMAN. The Chair is ready to rule. The Chair thinks that this amendment comes under the ban of the same rule that the other amendment does, because, being offered to section 13 as it is, in the way of a substitute, of course it must be germane to that section. The Chair will not elaborate upon that further, but he desires to call the attention of the committee to the fact that this particular amendment, the Chair thinks, falls within another provision of the rules which renders it out of order. The first portion of the amendment authorizes the President to do certain things. The last portion of it directs him to do certain things. Different chairmen of Committees of the Whole, as well as Speakers, have held amendments drawn in that shape to be out of order as not germane. Section 5804 of Hinds' Precedents states that an amendment which would have changed a resolution of inquiry to one of instruction was held not to be germane. In that case a resolution of inquiry requested the President to furnish the House with such information as in his judgment was not incompatible with the public service in regard to the arrest and confinement of certain American citizens in British prisons. An amendment was offered directing him to request and insist upon the release of these men under habeas corpus. In other words, an original proposition that vested in the President discretion the amendment changed to one of a mandatory nature, taking from him all discretion.

Mr. HOWARD. Mr. Chairman, will the Chair permit an interruption there?

The CHAIRMAN. Yes.

Mr. HOWARD. That has been the rule in this House since this has been a Congress, but that is because to answer those resolutions of inquiry of the Executive may be against public policy. The President is left that wide discretion on that account. I have read every one of those decisions. I call the attention of the Chair to the fact that every one of the precedents in Hinds' Precedents that I have run across, and I looked over all of them, go to the point that I have just made, that the reason you can not compel him to reply is because it may be incompatible with public policy.

The CHAIRMAN. The Chair will call the attention of the gentleman to section 5850 of Hinds' Precedents, where a bill authorized the Court of Claims to adjudicate a claim, and an amendment provided for the payment of the claim outright, and that was held to be not germane, because in one case they were authorized to do a certain thing and in the other case to absolutely do a certain other thing. The Chair thinks that is very clear. The Chair will say to the gentleman from Georgia that he would be delighted to hold his amendment in order if he could do it under the rules, and it seems to the Chair that it ought to be possible to have an amendment so drawn that will come within the rule covering this proposition. The Chair, however, does not think the gentleman's amendment comes within the rule.

Mr. HOWARD. Will the Chair be good enough to point out wherein the amendment is not germane?

The CHAIRMAN. The Chair has been very unfortunate if he has not already done that. The point of order is sustained.

Mr. THOMPSON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Strike out section 13 and insert in lieu thereof the following:

"That it shall be unlawful for any person, firm, corporation, partnership, or association to use any necessaries in the manufacture of intoxicating liquors for beverage purposes. The Secretary of the Treasury is hereby authorized to issue a permit to any reputable and properly qualified person, firm, corporation, partnership, or association to manufacture alcohol from any such necessaries for munitions or any other purpose necessary to carry on the war, or intoxicating liquors for industrial, scientific, medicinal, or sacramental purposes under such rules and regulations as the Secretary of the Treasury may prescribe.

"Any person, firm, corporation, partnership, or association who shall violate the provisions of this section shall be punished by a fine not exceeding $5,000 or by imprisonment at hard labor not exceeding one year, or both."

Mr. LEVER. Mr. Chairman, I make the point of order that that amendment is not germane. I do not care to argue it.

The CHAIRMAN. Does the gentleman from Oklahoma desire to be heard upon the point of order?

Mr. THOMPSON. Mr. Chairman, if the Chair has an idea that that is not in order, I would like to know upon what theory it is not in order?

The CHAIRMAN. It is the duty of the gentleman offering the amendment to advise the Chair upon what theory it is in order.

Mr. THOMPSON. The theory upon which I think it is in order is that it is a food-conservation proposition. This is a food-conservation bill, and if we are preparing a food-conservation bill, then any proposition involved in the bill that conserves the food of the country would be in order in the consideration of the bill.

Mr. MONDELL. Mr. Chairman, the amendment in my opinion is clearly in order and for this very simple reason: The section authorizes the President of the United States when he shall deem wise to limit, regulate, or prohibit the use of necessaries in the manufacture of alcohol or alcoholic beverages. Whatever power Congress can confer upon the President, it can certainly exercise on its own motion, and the amendment proposes that Congress shall prohibit what the paragraph provides the President may prohibit. If that is not in order, then nothing could be drawn that would be in order if it was not in the exact language of the paragraph as it stands. If we have authority, as we undoubtedly have, to authorize the President to prohibit the use of these articles in the manufacture of alcohol or alcoholic beverages, certainly we have the power to declare that prohibition directly, as is proposed in this amendment.

The CHAIRMAN. The Chair thinks this amendment can not possibly be held in order. The fact that the bill provides for conservation of foodstuffs does not mean that everything which relates to food can be offered as an amendment and especially to this section. In the first place the section, the Chair repeats, gives the President permission, if he wants to do it, to do certain things only, to wit, to limit, reduce, prohibit the use of food materials in the manufacture of intoxicating liquors. Now, this amendment makes it unlawful for any person, regardless of the President's opinion about it, any person, firm, corporation, or association to use any necessaries in the manufacture of intoxicating liquors, and then gives to the Secretary of the Treasury authority to issue a license to certain people under certain circumstances. That comes within the inhibition of section 5891, to which the Chair's attention has been called.

To a proposition from the appointment of a select committee to investigate a certain subject, an amendment proposing an inquiry by the Executive on that subject was held not to be germane.

So the Chair thinks the amendment is not in order.

Mr. THOMPSON. Does the Chair rule it is out of order because it says the Secretary of the Treasury——

The CHAIRMAN. That is one reason, and then there are other reasons to which the Chair has referred.

Mr. THOMPSON. I would be very glad to strike it out if the Chair puts it on that ground, but if he does not put it on that ground——

The CHAIRMAN. The Chair has passed upon the question. If the gentleman wants to frame another amendment that will eliminate that portion of his present amendment, he can do so.

Mr. THOMPSON. I desire to appeal from the decision of the Chair.

The CHAIRMAN. The gentleman from Oklahoma appeals from the decision of the Chair. Those who believe that the decision of the Chair shall stand as the decision of the committee will rise and stand until counted.

The question was taken, and there were—ayes 152, noes 51.

[Applause.]

So the decision of the Chair stood as the decision of the committee.

Mr. WEBB. Mr. Chairman, I desire to offer, if it is in order, a section to be known as section 13a.

Mr. HOWARD. Mr. Chairman, I make the point of order that until section 13 is disposed of it is not in order to introduce a new section.

Mr. WEBB. Then I will give notice that I will offer that as an amendment.

Mr. HOWARD. I make the point of order that it can not be done under the parliamentary proceedings of this body.

The CHAIRMAN. The point of the gentleman from Georgia is well taken.

Mr. HOWARD. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. HOWARD: Page 15, line 4, strike out all of section 13 and insert the following:

"That the President is hereby authorized to limit, regulate, or prohibit the use of grain or food materials in the production of alcohol or of alcoholic or nonalcoholic beverages in order to assure an adequate and continuous supply of food, which authority shall be made manifest by proclamation and shall remain in full force and effect until revoked by the President; that after the issuance of such proclamation aforesaid it shall be unlawful for any person, firm, or corporation to use in any manner any grain or other food product in the manufacture of any alcoholic beverage in which any grain or food product has been used, which contains in excess of 3 per cent alcoholic content.

"Any person who willfully violates the provisions of this section shall, upon conviction thereof, be punished by a fine of not less than $500 nor more than $5,000 or by imprisonment for not less than one nor more than two years, or both."

Mr. LEVER. Mr. Chairman, I reserve a point of order until I can read the amendment.

Mr. HOWARD. Mr. Chairman, the effect of this amendment is simply this: I would like to call the particular attention of the Chair to it. Under section 13, as originally drawn, this House or committee, I know unintentionally, has given to the Whisky Trust of the United States an absolute monopoly during the pendency of this war in the sale of its own alcoholic beverages to the exclusion of every other that has been made. If section 13 without that provision goes into effect, within five months after the date that that bill is signed by the President of the United States every man in this Nation who wants to appease the appetite he has for alcoholic beverages will be forced to take a drink of whisky, and what will be the result?

The 3,000,000 gallons of liquor that are now in the bonded warehouses of this country and the 1,500,000 gallons in the hands of the wholesalers and retailers of the country will immediately enhance in value to twice or three times its present value and they will have a monopoly on the alcoholic-liquor traffic in this Nation during the pendency of this war. It is an outrage——

Mr. SLAYDEN. Will the gentleman permit a question?

Mr. HOWARD. Not right now.

It is an outrage to force the workingmen of this country to drink liquor and make them less efficient. They want a less harmful product. They want a glass of beer; and if, when they want the beer, you hand them a glass of liquor, you will create more drunkards in the United States, if this section 13 is passed, in three years than we have made in a decade in this Nation. What we need is not a stronger stimulant, to be bought generally by the people of this country, but no stimulant during this war. We want sober men to fight this war and to transact the business of this Nation during the war. But if you can not do that, for God's sake and for the sake of the American Nation, do not create seven or eight or ten million drunkards during the war by forcing them to acquire the drink habit by drinking ardent spirits instead of malt liquors.

I would cut out the whole demoralizing business, if I could, during this war and after the war. But every man who votes for section 13 without this amendment on it votes to give the Liquor Trust of this country an absolute monopoly. If you pass section 13 in its present form, you will take probably three or four hundred thousand dollars' worth of liquor and make it worth three or four million dollars. You not only legislate men into great wealth but you legislate your Nation into pollution by creating a crowd of drunkards. And I maintain that, in view of all the rulings the Chair has made on this prohibition question the amendment is germane, in order, and is simply a limitation on section 13.

The CHAIRMAN. The Chair is ready to rule. The Chair thinks the amendment is not germane to this section 13, and therefore sustains the point of order.

Mr. COOPER of Ohio. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. COOPER of Ohio: Page 15, strike out all of section 13, down to and including the word "notice," in line 21, and insert in lieu thereof the following:

"For the purpose of further conserving food and foodstuffs during the continuation of the war with Germany, the use of foods, food materials, or feeds in the manufacture of alcohol or alcoholic beverages is hereby prohibited: *Provided, however,* That nothing in this section shall be construed to prevent the manufacture of alcohol, alcoholic liquors, or alcoholic beverages for scientific, commercial, or medicinal purposes."

Mr. LEVER. Mr. Chairman, I make the point of order against the amendment on the ground that it is not germane.

The CHAIRMAN. The point of order is sustained.

Mr. BARKLEY. Mr. Chairman, I move to strike out all of section 13, down to and including the word "unrevoked," in line 14, and strike out the word "after," in line 14, and all of line 15, down to and including the word "notice"; strike out the words "except in," in line 17, and all of lines 18, 19, 20, and 21, down to and including the word "notice," so that it will read as follows:

No person shall use any foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages. Any person who willfully violates this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both.

Mr. LEVER. Mr. Chairman, I make the point of order against that amendment.

The CHAIRMAN. The Chair thinks that it is in order, inasmuch as it simply strikes out certain words in the section, and therefore overrules the point of order.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto shall close in 10 minutes, the gentleman from Kentucky [Mr. BARKLEY] to have 5 minutes and I to have 5 minutes.

The CHAIRMAN. The gentleman asks unanimous consent that all debate on this amendment and amendments thereto shall close in 10 minutes. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Kentucky [Mr. BARKLEY] is recognized.

Mr. BARKLEY. Mr. Chairman, the effect of the amendment which I have offered is to leave in section 13 of the bill as reported only that language which will accomplish the purpose which we desire, to wit, prohibit the use of foods, food materials, or feeds in the manufacture of alcohol or alcoholic liquors for beverage purposes. After striking out the language which I have indicated, the section would read as follows:

No person shall use any foods, food materials, or feeds in the production of alcohol or alcoholic beverages. Any person who willfully violates this section shall, upon conviction thereof, be punished by fine not exceeding $5,000 or by imprisonment for not more than two years, or both.

Various efforts have been made here to-day to strike out the section and insert in lieu of it language designed to accomplish the purpose of stopping the use of foodstuffs in making intoxicating liquors. They have all been stricken out on points of order. The amendment which I have offered seeks to accomplish this end by striking out certain language and leaving in the section the language which I have read, which accomplishes the purpose which we desire. The effect of this amendment will be to make it unlawful for any person, during the continuation of the war or during the operation of this act, to use any foods, food materials, or feeds in the production of alcoholic beverages.

Mr. COX. Will the gentleman yield?

Mr. BARKLEY. I yield to my friend from Indiana.

Mr. COX. Would the gentleman's amendment preclude the manufacture of alcohol for medicinal purposes or to be used in the arts or sciences?

Mr. BARKLEY. As it remains now I think it would. There is sufficient alcohol already in existence, which may be redistilled from liquors already made under the amendment offered by the gentleman from North Carolina [Mr. WEBB] to meet the needs of medicine and other legitimate purposes for a long time. The Chair has indicated that he would hold the Webb amendment in order if offered as a separate section. This would make possible the redistillation of all alcoholic liquor now in existence for industrial, scientific, or medicinal purposes.

Mr. COX. I am very glad to hear the gentleman make that statement. I am for his amendment.

Mr. BARKLEY. I will say to the gentleman from Indiana that I have no desire to stop the manufacture of alcohol for legitimate purposes, such as making munitions or for industrial, scientific, medicinal, or sacramental purposes, and if this amendment is adopted I shall then offer another amendment covering its manufacture for those purposes. By the adoption of my present amendment and by the adoption of the later amendment to be offered by Mr. WEBB, we will prevent the future manufacture of alcoholic liquors for beverage purposes and pro-

vide for redistilling the liquor now on hand into pure alcohol for use in legitimate industry or in the arts and sciences.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. BARKLEY. I will.

Mr. MEEKER. After the supply that the Government now has on hand is exhausted, if this amendment were adopted, this would absolutely stop the manufacture of alcohol for munitions or other governmental purposes? After the present supply is exhausted the Government could not make any more?

Mr. BARKLEY. I will say to the gentleman that Congress will be in session and be able to take care of any such situation, if it should arise by reason of the exhaustion of the supply of alcohol on hand. However, as I have already stated, I expect to offer another amendment permitting the manufacture of alcohol for governmental, industrial, scientific, medicinal, or sacramental purposes, which will cure the situation he has in mind. I can not offer that amendment until the present amendment is adopted, because I am simply moving now to strike out certain words without inserting any new words; but if the present amendment is adopted, I can then move to insert any new words that will be germane to the section as it remains.

Mr. KAHN. Under the gentleman's amendment would it be possible to manufacture cider out of apples or wine out of grapes?

Mr. BARKLEY. Well, if it were an alcoholic liquor within the meaning of the bill, of course it could not be manufactured. If it were not allowed to become fermented, I do not think it would be prohibited. I should think sweet cider or unfermented wines could still be made. The gentleman is a lawyer and knows how to construe language perhaps as well as I do.

Now, Mr. Chairman, there never was a better time in the history of Congress, and there will not be in the future any better opportunity than now, to enact a law expressing the desire of Congress with respect to the manufacture of alcoholic liquors. This is a food-conservation bill. We are attempting to provide against a food shortage in this country and in the countries with which we are associated in this war. It is certainly our duty to stop the useless waste of foods and food materials in the manufacture of intoxicating liquors, which do not strengthen but seriously weaken the Nation morally, physically, and financially.

Mr. CALDWELL. Mr. Chairman, will the gentleman yield?

Mr. BARKLEY. I will.

Mr. CALDWELL. If the amendment that the gentleman proposes is enacted into law, is there anything to prevent our shipping food products to Canada and having them there made into liquor and then be as wet as we want to be?

Mr. BARKLEY. Oh, I do not know how wet that would be. Answering the gentleman, there is no provision in this bill that would prevent that, if somebody was unpatriotic enough to want to do it. But the gentleman knows that we can not legislate upon what shall be permitted in Canada, and, knowing the loyalty and devotion of Canada to the interests of those who are now fighting together to destroy autocracy in the world, I have no fear that she would permit such a perversion of the common desires of both countries. [Applause.]

If Congress desires to stop the waste of millions of dollars worth of foods in the manufacture of liquor, it ought to adopt the amendment which I have offered. Why is it necessary or wise for Congress to try to unload this responsibility on the President? He is already overburdened with cares such as no man in our generation has had to bear. I am willing to accept my share of the responsibility for passing this law as now proposed, and I am confident that if this House shall register its real sentiments upon the subject it will be adopted. [Applause.]

What will it mean in the matter of food conservation to prevent its use in making intoxicating liquors? I desire to call attention to the following report of a noted committee of economists upon the amount of foodstuffs used in liquor:

According to the report of the Commissioner of Internal Revenue for the year ended June 30, 1916 (p. 138), there were used during that year for the production of distilled spirits in the United States the following materials:

Corn	bushels	32,069,542
Rye	do	3,116,612
Malt	do	4,480,588
Wheat	do	3,373
Barley	do	148
Oats	do	9,807
Other materials	do	68,822
Molasses	gallons	152,142,232

Omitting wheat, oats, barley, and "other materials," and reducing corn, rye, malt, and molasses to pounds, we get a total of 3,603,911,916 pounds of grain and molasses.

Until very recently there were no official figures available as to the quantities of material used in the manufacture of fermented liquors, so that statements as to these quantities were necessarily estimates.

The United States Department of Agriculture, from records of the office of the internal revenue, now gives the following figures as to materials used in the manufacture of fermented liquors for the year ending June 30, 1916:

Malt	bushels	57,683,970
Hops	pounds	37,451,610
Rice	do	141,249,292
Corn or cerealine	do	650,745,703
Grape sugar or maltose	do	54,934,621
Glucose or sirup	gallons	2,742,854
Grits	pounds	109,371,482
Other materials	bushels	72,355
Other materials	gallons	19,112
Other materials	pounds	24,756,974

Total, all items, estimated, 3,004,754,590 pounds.

Combining the figures for the manufacture of fermented liquors and distilled spirits we get a total of 6,608,666,506 pounds.

In a time of food shortage, when conservation of foodstuffs is an important public question, the more than six and one-half billion pounds (6,608,666,506) of food materials which are used in these industries form an item which is worth considering.

T. N. CARVER,
EDMUND E. DAY,
WILLIAM Z. RIPLEY,
EDWIN F. GAY,
Professors in Department of Economics, Harvard University.
IRVING FISHER,
Professor of Political Economy, Yale University.

We have reviewed the statistics submitted in regard to the 6,608,666,506 pounds of foodstuffs used in the manufacture of malt and distilled liquors in the United States. It is probable that as much as one-sixth of the total may be necessary for the production of denatured alcohol. At a fair estimate of its calorific or fuel value the remaining five-sixths would supply the energy requirement of 7,000,000 men for a year.

IRVING FISHER,
Professor of Political Economy, Yale University.

May 15, 1917.

Mr. Chairman, with women and children in our own country and in other countries hungering for bread; with the cost of living mounting higher and higher every month; with laboring men finding themselves hard pressed to make their wages purchase the bare necessities of life for themselves and their families, it would be ridiculous to pass a food conservation bill and not include in it a provision prohibiting the use of foods or foodstuffs in making liquor. According to the estimate of the figures quoted heretofore, there is enough food now that goes into the making of intoxicating liquors each year to feed 7,000,000 people. Who will attempt to excuse us, if we continue to allow this waste of food material when it is so greatly needed to feed the world? When brave men are giving their lives, as dear to them as ours to us, that the principles of free government may survive in the world, it is mockery to say that we must not touch or interfere with the sacred privileges of destructive liquors, lest some brewer or distiller should be damaged. Who shall compare the profits of brewers and distillers to the lives of brave men or hungry women and children? Such a comparison is hideous, and would be entertained only by one mentally if not morally debased; and I trust this House will register the unmistakable desire of a great majority of the people of this Nation by adopting this provision which will divert 7,000,000,000 pounds of food materials from the quenching of an artificial and injurious thirst to the satisfying of a natural hunger. [Applause.]

Mr. LEVER. Mr. Chairman, let us analyze, if we may, just what this amendment means. This amendment simply prohibits the use of grain of any description in the manufacture of alcoholic liquor. The gentleman from Kentucky [Mr. BARKLEY] freely confesses that to be the purpose of the amendment. The gentleman, I think, is undertaking to give this Nation a nation-wide prohibition provision.

The gentleman is not doing it. The gentleman's amendment is bound to put this Nation upon an absolute liquor basis and to cut out the drinking of light wine and beer entirely in this country. Now, it has come to my attention that there is enough whisky in the bonded warehouses of this country at this time to supply the people of the United States for three long years.

Mr. DECKER. Mr Chairman, will the gentleman yield?

Mr. LEVER. I can not yield.

Mr. DECKER. I wanted to know what objection you had to using that up before wasting some more food on making alcohol.

Mr. LEVER. I do not yield to the gentleman. The proposal of the gentleman from Kentucky [Mr. BARKLEY] is that we shall cease to use any of the grains whatever in the manufacture of beer, and that may be a good thing. There is not any doubt in my mind that this amendment is an exceedingly good thing for the liquor people of the State of Kentucky,

although I am sure it was not offered for that purpose. [Applause.]

I do not propose, if by plain speaking I can prevent it, to have this committee allow the American people to put their heads into the mouth of the liquor lion while denying them the privilege of taking a light glass of beer or wine with a small per cent of alcohol in it. To vote for that proposal means that, and it means nothing more nor less than that. [Applause.]

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. LEVER. Mr. Chairman, I ask for a vote.

Mr. BARKLEY. I do not think the gentleman ought to make the insinuation that I have offered this amendment in behalf of the liquor that is in existence, because I am in favor of using it all up in the manufacture of munitions.

Mr. LEVER. Then I withdraw that statement.

The CHAIRMAN. The time of the gentleman from South Carolina has expired. All time has expired. The question is on agreeing to the amendment offered by the gentleman from Kentucky [Mr. BARKLEY].

The question was taken, and the Chairman announced that he was in doubt.

Mr. BARKLEY. Mr. Chairman, I demand a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 108, noes 120.

Mr. BARKLEY. Mr. Chairman, I ask for tellers.

Tellers were ordered, and the Chairman appointed Mr. LEVER and Mr. BARKLEY to act as tellers.

The committee again divided; and the tellers reported—ayes 132, noes 114.

So the amendment was agreed to.

Mr. LENROOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

Mr. BARKLEY. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. BARKLEY. I desire to offer a further amendment.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] has already been recognized to offer an amendment.

Mr. BARKLEY. I was going to offer an amendment to strike out the word "nonalcoholic," so as not to apply this to nonalcoholic liquors.

Mr. LENROOT. I have no objection to that.

Mr. BARKLEY. I offer an amendment to strike out the words "or nonalcoholic."

The CHAIRMAN. The gentleman from Kentucky offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. BARKLEY: In line 17, page 15, strike out the words "or nonalcoholic."

The amendment was agreed to.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 15, line 16, after the word "any," strike out the words "foods, food materials, or feeds," and insert "wheat, rye, rice, or corn, or any product thereof."

Mr. LENROOT. Mr. Chairman, under the section as it is now amended, it will prohibit the use of grapes in the manufacture of wine. It will prohibit the use of barley in the manufacture of beer.

I want to say that I am perfectly willing to support, as a war measure, national prohibition. [Applause.] But I am unwilling by my vote to say—and this section, if unamended, will say—that not only shall the manufacture of beer be prohibited, but that the sale of beer shall be prohibited, and that 220,000,000 gallons of whisky now in bond may continue to be sold during the period of the war. If that is permitted it will not promote the cause of temperance, but will absolutely promote the cause of intemperance.

Mr. SLAYDEN. Will the gentleman permit a question?

Mr. LENROOT. Yes.

Mr. SLAYDEN. Will not the effect of this be to destroy all the vineyards in California and other States that have been producing comparatively harmless light wines?

Mr. LENROOT. If the amendment is not adopted, the section will have that effect.

Mr. DECKER. Some of us could not hear the gentleman's amendment. Will he state briefly what it means?

Mr. LENROOT. My amendment will leave the section absolutely prohibiting the use of any rye, wheat, corn, or rice, or any product of those things in the manufacture of any alcoholic beverage.

Mr. DECKER. Does it take care of the 250,000,000 gallons of whisky in the country?

Mr. LENROOT. The bill does not provide for that, and that is why I say my amendment should be adopted; because, unless you do take care of the 220,000,000 gallons of whisky now in bond, if you permit the sale of that and prohibit the sale of light wines and beer, you are promoting the cause of intemperance and not the cause of temperance.

Mr. RANDALL. Will the gentleman yield?

Mr. LENROOT. I yield for a question.

Mr. RANDALL. With respect to the statement made by the gentleman from Texas [Mr. SLAYDEN], as to the production of wine in California, let me remind the House that the State of California last year——

Mr. LENROOT. I yielded for a question. Let the gentleman ask his question.

Mr. RANDALL. Is the gentleman aware that the State of California in 1916——

Mr. LENROOT. I decline to yield further.

The CHAIRMAN. The gentleman declines to yield.

Mr. LENROOT. Now, as I have said, I have offered this amendment as a friend of prohibition, as a friend of the cause of temperance, as one who, if he can get the opportunity, will vote for absolute and complete national prohibition during the period of this war. [Applause.] But, having that in mind, I do say that in my judgment, if we would promote the cause of temperance in the United States during this war, the amendment that I have proposed should be adopted; and, if adopted, it would prevent absolutely the use of any products used in the manufacture of distilled spirits——

Mr. STEVENSON. Will the gentleman yield?

Mr. LENROOT. I can not yield.

And when the 220,000,000 gallons of distilled spirits now in bond shall have been consumed, if the war lasts that long, there will be no more whisky sold in the United States; and then we can well take up the proposition of prohibiting light wines and beer as well.

Mr. LONGWORTH. The gentleman realizes, does he not, that under his amendment distilled spirits can still be made of molasses?

Mr. LENROOT. Yes; but this a food-conservation proposition, and it will conserve all of these four great grain products that are necessary for human food.

Mr. STEVENSON. I am in favor of the gentleman's amendment if he will embrace molasses also; but there are 150,000,000 gallons of molasses used annually in the production of alcoholic liquors in this country.

Mr. LENROOT. There is no objection to including molasses. I will accept that, if the gentleman offers the amendment.

Mr. SLAYDEN. Mr. Chairman, I am as much in favor of temperance as any man in this House, and, if I may venture to indulge in a remark so purely personal, I will say that I believe I am as temperate as any man in the House.

I am not in favor of a vote by this House declaring that the American people are such degenerates, such feeble representatives of the human family that they can not be trusted to live, behave, and conduct themselves as decent men do in other parts of the world. Now, I believe it would be a wise thing to encourage the production of light wines and beers as a substitute for potent liquors. I have always favored that. I believe it would be in the interest of temperance. That opinion is not based on reading and reflection only, but is based upon observation. It has been my good fortune to visit the countries where light wines are produced in great abundance and where it is a common food and drink of the people. Beer, let me say, is also a common beverage in the northern part of Europe and in Great Britain. There is no temperance question in the wine-drinking sections of Europe, because there is no intemperance. I have heard statements made to-day in relation to the warring countries in Europe that are not true. It is stated that they have gone to prohibition. That statement is absolutely false. The Governments of Italy and France provide their soldiers with large quantities of wine each day. It is a part of the ration. They are not drunkards. They are as good fighters and as virile men as ever lived at any period in the world's history.

What has happened on the western front in this great war for the last three years will show that these soldiers on both sides are efficient, good, and reliable men in every respect, and that they respond to every military duty required of them. They are not enfeebled by their ration with its portion of wine, nor would Americans be.

Here is some news in to-day's paper which I would like to call to the attention of the gentlemen from California:

ENGLAND DECREES MORE BEER.

LONDON, *June 23, 1917.*

According to this morning's newspapers the Government's reduction in the annual output of beer to 10,000,000 barrels decreed last February proved too drastic. There has been a deficient supply in the munitions areas during the recent hot weather, which condition, added to the prospective difficulty in the rural districts at harvest time, has influenced the Government to allow an immediate increase of 35 per cent in the barrelage of beer.

Now, gentlemen, of course this eminent strategist from California, Mr. RANDALL, will not agree with Field Marshal Haig and Gens. Petain and Cadorno, but I think if I were a British subject I would rather trust the military affairs of my country in the hands of Marshal Haig than to the gentleman from California, who thinks that the sole duty of the American Congress is to enact laws to govern men in their personal habits, sumptuary laws, laws which as a class have been condemned by the Democratic Party in platform after platform. They want to tell us what we shall drink and what we shall wear, and they propose to take away all the liberties of the people under the guise of moral legislation. It is moral humbuggery, and it is not borne out by the facts of the war in Europe at this time. [Applause.]

Some gentlemen here care more for a fad than for real temperance. With them no legislation is of importance but that which seeks to impose their narrow views on others who are as sober, as respectable, and as useful citizens as they are.

I stand for real temperance and some personal rights for the citizen.

Mr. STEVENSON. Mr. Chairman, I offer an amendment to the Lenroot amendment, which I understand the gentleman from Wisconsin is willing to accept.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Insert after the word "corn" the words "sugar, molasses, and sirup."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this amendment and amendments thereto close in 10 minutes.

Mr. IGOE. May we have the amendment reported?

Mr. LEVER. Mr. Chairman, after consultation there seems to be quite a demand for debate upon this section, and I ask unanimous consent that all debate on the section and amendments thereto close in one hour and a quarter.

Mr. PARKER of New Jersey. Mr. Chairman, reserving the right to object, I desire to make a separate motion to strike out, and I want some time on that, and if 15 minutes can be reserved for that motion, I will agree.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on the section and amendments thereto close in one hour and a quarter.

Mr. PARKER of New Jersey. Reserving the right to object, I want to say that my motion is based on the question whether it is worth while to throw such an apple of discord into the bill, and I want to place that matter before the House.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in an hour and a half.

Mr. PARKER of New Jersey. Will 15 minutes be reserved for the motion to strike out and the answer thereto?

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on the section and amendments thereto close in an hour and a half. Is there objection?

Mr. PARKER of New Jersey. I object unless time is given for my motion to strike out.

Mr. LEVER. I will be willing to give the gentleman from New Jersey 10 minutes.

Mr. PARKER of New Jersey. That will be satisfactory.

Mr. THOMPSON. I would like to ask who will control the time.

Mr. LEVER. I will include in my request that I control one half of the time and the gentleman from Iowa the other half.

The CHAIRMAN. Is there objection?

Mr. IGOE. Reserving the right to object, this time is to be divided between the gentleman from Iowa and the gentleman from South Carolina. The question that is up for discussion on this section is one of great importance to all of us. There are men here who are in favor of absolute prohibition and there are men who are willing at this time to give the President of the United States the right to prevent the use of this food in the manufacture of liquors in order to conserve the supply. This question, it seems to me, in the debate ought to be divided between men on both sides of this question. I do not think it is exactly fair to ask that all the time be turned over to be used we do not know how. There ought to be a free and fair debate on this question, and there ought to be a fair division of the time to those who are opposed and those who are for it.

Mr. LEVER. I am perfectly willing to yield the gentleman five minutes.

Mr. IGOE. I am not speaking for myself.

Mr. GILLETT. Who would the gentleman have control it; can not the gentleman trust the gentleman from South Carolina?

Mr. IGOE. I do not want to control the time, but it ought to be divided between those who are in favor and those who are against the proposition, and the gentleman from Kentucky ought to have half of the time.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina that all debate upon this section and all amendments thereto shall close in one hour and a half, one half of that time to be controlled by himself and the other half by the gentleman from Iowa [Mr. HAUGEN].

Mr. CANNON. Mr. Chairman, reserving the right to object, I take it for granted that if there are applications for time it will be divided by the two gentlemen——

Mr. LEVER. Regardless of their position upon this question.

Mr. CANNON. Oh, no; divided as it is usually divided—five minutes to one side and five minutes to the other.

Mr. LEVER. Oh, certainly.

Mr. TAGUE. Mr. Chairman, reserving the right to object, a great many Members have already given in their names for time.

I notice that most of those who have given in their names are upon one side of the question, and I would like to know whether or not those who are on the opposite side are to be given the same opportunity to be heard as those who are in favor of it?

Mr. LEVER. I would say to my friend that as near as I can do it I shall try to do that. Does the gentleman desire some time?

Mr. TAGUE. Yes.

Mr. SLAYDEN. Mr. Chairman, will the chairman of the committee consent to the principle of dividing the time upon that basis?

Mr. LEVER. I would be glad, as near as I can, to do so. I do not know who is for or who is against this proposition.

Mr. SLAYDEN. Neither do I, beyond the statement made by the gentleman from Massachusetts that he has noticed that the names are all on one side.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. STEVENSON. Mr. Chairman, I offered an amendment to the Lenroot amendment inserting the words "molasses, sugar, and sirups." I ask unanimous consent to strike out the word "sugar" in that amendment to the amendment, because that is necessary in the making of light wines, and it is not my purpose at least to shut that off.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to modify his amendment in the manner indicated. The Clerk will report the modification.

The Clerk read as follows:

Amend the amendment of the gentleman from South Carolina [Mr. STEVENSON] by striking out the word "sugar."

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STEVENSON. Mr. Chairman, there seemed a little while ago in discussing the parliamentary phases of this question a tendency to run away from the proposition of prohibition of the manufacture and sale of liquor. Why, I can not understand, because at this session of Congress we have declared that it is dangerous and deleterious to the national defense to have liquor imbibed by the soldiers of the Nation. We have put into law the following:

SEC. 12. That the President of the United States, as the Commander in Chief of the Army, is authorized to make such regulations governing the prohibition of alcoholic liquors in or near military camps and to the officers and enlisted men of the Army as he may from time to time deem necessary or advisable: *Provided*, That no person, corporation, partnership, or association shall sell, supply, or have in his or its possession any intoxicating or spirituous liquors at any military station, cantonment, camp, fort, post, officers' or enlisted men's club, which is being used at the time for military purposes under this act, but the Secretary of War may make regulations permitting the sale and use of intoxicating liquors for medicinal purposes. It shall be unlawful to sell any intoxicating liquor, including beer, ale, or wine, to any officer or member of the military forces while in uniform, except as herein provided. Any person, corporation, partnership, or association violating the provisions of this section or the regulations made thereunder shall, unless otherwise punishable under the Articles of War, be deemed guilty of a misdemeanor and be punished by a fine of not more than $1,000 or imprisonment for not more than 12 months, or both.

There is a declaration which we have made that it is destructive of the best interest of the defensive forces of America, the forces upon which we must rely upon the battle fields, for a drop of liquor to reach them at any of their places or when they are in uniform, and that was immediately followed by an order requiring all of the forces to be in uniform at all times. Now, why should we run away from the proposition? Not only that, but we have declared here in this bill that we must conserve the resources of this country. It has been declared by many of the distinguished orators, who have spent weeks declaring so since this Congress met, that not only the young men must be marshaled in battle array, but that every citizen of this country shall be marshaled into the army of conservation and production, in order that this great country may fight this war and fight it victoriously, and that every man shall do his best. I say that it is as injurious to the private citizen as it is to the soldier, and when we have written that law we shall have written a decree that liquor during this war in under the ban and has been condemned as an outlaw and a disturber and a destroyer, in so far as our defensive preparations are concerned. Then I want to know why we should run away from the question. In this bill we have said that it will be a criminal offense for any man to commit waste or to permit preventable waste of any foodstuffs in the United States. Now, we are asking you to say, and by your vote you have said, that this destruction of 6,608,666,506 pounds of foodstuffs every year shall be stopped. And that is not merely preventable waste. It is a waste with malice aforethought, with malice prepense, put into distilled damnation to destroy the forces of this country, both military and civil. [Applause.] You may say, Where did you get your figures? We have a representative here from Harvard. These figures are compiled by the best statistician in this country, approved by that great physiologist, the assistant professor of physiology of Harvard, and he says in his conclusion:

At a fair estimate the caloric or fuel value of the remaining five-sixths would supply an energy requirement of 7,000,000 of men for a year.

And we are only asked to send 2,000,000 to Europe and here you have got enough to supply 5,000,000 more in addition to those sent that is being destroyed every year by this traffic which we say by our statutes is a menace to the people of this country.

NOTED ECONOMISTS AND FOOD EXPERTS CALL ATTENTION TO THE FOODSTUFFS USED IN LIQUOR.

According to the report of the Commissioner of Internal Revenue for the year ended June 30, 1916 (p. 138), there were used during that year for the production of distilled spirits in the United States, the following materials:

Corn	bushels	32,069,542
Rye	do	3,116,612
Malt	do	4,480,588
Wheat	do	3,373
Barley	do	148
Oats	do	9,807
Other materials	do	68,822
Molasses	gallons	152,142,232

Omitting wheat, oats, barley, and "other materials," and reducing corn, rye, malt, and molasses to pounds, we get a total of 3,603,911,916 pounds of grain and molasses.

Until very recently there were no official figures available as to the quantities of material used in the manufacture of fermented liquors, so that statements as to these quantities were necessarily estimates.

The United States Department of Agriculture, from records of the office of the internal revenue, now gives the following figures as to materials used in the manufacture of fermented liquors for the year ended June 30, 1916:

Malt	bushels	57,683,970
Hops	pounds	37,451,610
Rice	do	141,249,292
Corn or cerealine	do	650,745,703
Grape sugar or maltose	do	54,934,621
Glucose or sirup	gallons	2,742,854
Grits	pounds	109,371,482
Other materials	bushels	72,355
Do	gallons	19,112
Do	pounds	24,756,974

Total, all items, estimated, 3,004,754,590 pounds.

Combining the figures for the manufacture of fermented liquors and distilled spirits, we get a total of 6,608,666,506 pounds.

In a time of food shortage, when conservation of foodstuffs is an important public question, the more than six and one-half billion pounds (6,608,666,506) of food materials which are used in these industries form an item which is worth considering.

EDMUND E. DAY,
WILLIAM Z. RIPLEY,
EDWIN F. GAY,
Professors in Department of Economics, Harvard University.
IRVING FISHER,
Professor of Political Economy, Yale University.

We have reviewed the statistics submitted in regard to the 6,608,666,506 pounds of foodstuffs used in the manufacture of malt and distilled liquors in the United States. It is probable that as much as one-sixth of the total may be necessary for the production of denatured alcohol. At a fair estimate of its calorific or fuel value the remaining five-sixths would supply the energy requirement of 7,000,000 men for a year.

WALTER B. CANNON,
George Higginson Professor of Physiology in Harvard University.
PERCY G. STILES,
Assistant Professor of Physiology in Harvard University.
IRVING FISHER,

War Prohibition Conservation Committee,
823 Tremont Building, Boston, Mass.

May 15, 1917.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEVENSON. I would ask unanimous consent to extend my remarks.

The CHAIRMAN. The gentleman already has that privilege.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from California [Mr. LEA].

Mr. LEA of California. Mr. Chairman, in the brief time granted me I ask candid consideration of this question, which is of great importance to the people of California. I am in favor of the Lenroot amendment, which would forbid the manufacture of wheat, rye, rice, corn, and all products thereof, into alcoholic beverages. I intended to vote for the Webb amendment, which authorized the President to requisition all alcoholic liquors necessary for munitions and war purposes. I am in favor of this bill, which gives the President power to limit or prohibit the manufacture of alcoholic beverages from food and feeds when in his judgment necessary to secure a sufficient and continuous supply of the same.

I am opposed to the Barkley amendment, which arbitrarily prohibits the manufacture of all alcoholic liquors, including light wines and beer, during the period of the war. Its operation is by its terms and by the Constitution limited to that time, and we have no power to extend it. At best it is only a makeshift remedy.

Let us compare the benefits and the injuries that would result from this law. All benefits claimed for it can be summarized in two words—prohibition and conservation.

The Barkley amendment does not establish prohibition.

First. It permits the sale of whisky on hand in possession of retailers, wholesalers, and in bond, the amount of which is sufficient to supply the normal demands of the country for two years. Authorizing the President to requisition distilled liquors at his discretion would not change the situation. Authorizing the Presdent to do a thing without voting him the money with which to do it is one thing, and actually taking and paying for the distilled spirits of the country is another. Those in favor of the Barkley amendment, if acting in good faith, should be in favor of the latter proposition. As the situation now stands you encourage the drinking of ardent spirits and discourage the use of light liquors. You have written a "whisky-wet" instead of a "bone-dry" law.

Second. It permits the sale of all stocks of liquors on hand, and which, except in the case of beer, are sufficient probably to supply the country for a year and possibly during the rest of the war.

Third. It permits the importation of all of these liquors. In other words, it denies our people the benefits of production and manufacture, but retains the evils of consumption. It is a blow at an American industry and an encouragement of a foreign. It destroys the foreign market of our wines and beers.

Fourth. It permits the sending of our food products to foreign countries, including Canada and Mexico, to be made into such liquors, and to be returned here for sale and consumption.

Fifth. The chief claim that can be made for prohibition is that it establishes better permanent conditions. This law does not establish a permanent condition, but only temporary conditions for the uncertain period of the war—three months, one year, or two years—no one knows. Whether you believe in prohibition or not you will agree upon this. One of the greatest practical reasons against prohibition is the destruction of established industries, the loss of employment, and the injuries to investments involved in the transition from a wet to a dry law. You may consider prohibition worth what it costs, but you must recognize the injuries thus inflicted as part of the cost. Such injuries can never be justified, except on the theory of giving the Nation benefits of importance and lasting character. This law in its disruption of employment of labor, investments, and industries is sweeping in its consequences. It imposes the destructive injuries involved in the transition to prohibition without the prospect of its benefits. In other words, it gives us the evils of prohibition without its benefits.

This amendment does not prohibit the sale of wines on hand, which are comparatively small in quantity. Those are the wines that will be sold in the retail market during the coming year. The wines manufactured this year will not to any con-

siderable extent be sold in the retail market before the 1st day of July, 1918, as that length of time is required in which to age and prepare them for the retail trade. So, under the pretense of war prohibition, this amendment permits the sale of liquors, wines, and whisky on hand, which will be sufficient, probably, to cover the period of the war; yet you deny to the producer the privilege of manufacturing the product of the crop he has already grown for the purpose of selling it at a time when the war will be over. You give us a war "wet" as to drinks, "dry" only as to manufacture.

This amendment prohibits the manufacture of beer. The stock of beer on hand probably does not exceed the ordinary demand for three months. Beer contains only 3 to 5 per cent of alcohol, while whisky contains 35 to 50 per cent. This amendment denies the use of the 3 or 4 per cent alcoholic liquor and gives a monopoly of the liquor business to whisky, containing 35 to 50 per cent of alcohol. Yet this is called war prohibition!

This amendment is unfair. Without compensation, without sufficient warning and time for adjustment, it destroys the value of grape and hop crops now growing. It throws thousands out of employment; it suddenly injures, if not ruins, investments of unlimited amounts; it offers only temporary benefits of a halfway measure. The evil of liquor is in its sale and consumption, not in its manufacture. Immediate prohibition would be established by prohibiting the sale of all liquors. Prohibiting the temporary manufacture and not the use, without power to prohibit the permanent manufacture or sale thereof, means neither prohibition nor temperance.

The growing of wine grapes is one of the principal industries of California. Over 160,000 acres of land are devoted to that purpose. That is the primary source of the living of thousands of small farmers in that State. During the last 30 years phylloxera, a vine disease, has swept over the State and destroyed a large portion of the vineyards. They have been restored by planting resistant vines, to plant and raise which to a bearing age requires an expense between $200 and $300 per acre. The destroyed vineyards of California have been almost completely replenished with resistant vines. The State of California has expended $250,000 in encouraging the viticultural industry and developing it and fighting its diseases.

The United States has also lent its assistance and has established 12 experimental vineyards on the Pacific coast. Encouraged by State and Nation, the farmers of California have built up an industry which is of importance to that State.

Those farmers have planted and raised these 160,000 acres of vines in addition to over 150,000 acres of table and raisin grapes, with great patience and with great industry. After planting the vines they worked, pruned, and cultivated their vineyards for four years before they secured a crop that paid the expenses of cultivation. Encouraged by the State and Nation they raised these vineyards, expecting by them to have a means of supporting themselves and families and educating their children. They raised their grapes for the same reason that the farmer of the Central West raises his corn, wheat, oats, or cattle; for the same reason that the farmers of the South raise their cotton, their rice, and their sugar cane.

No man claims, no man can claim, that anything of practical importance as a food product is consumed in the manufacture of our wines. Yet to-night in one brief hour it is proposed to destroy the value of this work of years of our farmers. That 160,000 acres of wine grapes have already this year been pruned, cultivated, and prepared for the harvest. The expense of raising this year's crop has been already expended. No other possible income can be realized from the ground this year. The grapes are approaching maturity on those vines, valuable only for the manufacture of wine. Now, you propose to say to the farmers of California that for their toil and for their investment they shall receive nothing. You even deny them the privilege of making wine that they might sell it after the war is over. You say to them that they shall not reap where they have sown. Yet at the same time you give the wholesale dealers in whisky a monopoly of the liquor business of this country.

Mr. STEVENSON. Will the gentleman yield?

Mr. LEA of California. I have only five minutes.

Mr. STEVENSON. I want to call the gentleman's attention to the fact that my amendment does not include barley or hops.

Mr. LEA of California. That is true. To a degree the effect of the proposed amendment is the same in reference to the hop industry. The United States produces 40,000,000 or 50,000,000 pounds of hops per year, the chief market for which is by the breweries in the manufacture of beer. Ordinarily we export about 50 per cent of our product and the remaining portion is consumed at home. The foreign market is already largely ruined by the ship shortage. It costs about 10 cents per pound to produce hops in the bale in California. The cost of high poles, trellises, and drying kilns varies, but ordinarily amounts to about $100 per acre. I am informed that the price of hops to-day in California is less than the cost of their production. There are about 14,000 acres of hops in California, a large portion of which are in my district, and there are something over 40,000 acres in the United States.

Nearly half of the 10 cents per pound required to grow hops has already been expended on this year's crop by the growers of California. The vines are developing and in less than two months from now the gathering of the crop will begin. If this amendment should be adopted into law it is probable that a large part of the hop crop of the country will never be picked.

In 1906 the little city in which I live had eight business blocks mostly shaken down by an earthquake. Nearly five blocks of it burned. Though only a little city, we suffered a loss of over $3,000,000; but that was a loss inflicted by nature, for which no human being was responsible. There are 16,000 acres of wine grapes in my county and over 4,500 acres of hops, and a much larger acreage in my district. If this amendment becomes a law, you inflict upon us a greater financial injury than the earthquake of 1906.

However wise or just prohibition may be, however much you may believe in it, you can not make me believe that it is either just or fair to inflict this injury upon the farmers of my State. The best advocates of prohibition declare that it is a great moral reform. A true moral reform must be based upon truth and justice. If this reform is to be initiated it should be initiated by methods that are fair and moral. In my judgment, it is neither fair nor moral, without forewarning, without compensation, while the expense has been largely incurred and the crops are growing on the grape and hop vines, to pass an act that in one hour renders those crops useless, deprives the owner of any income for this year, and which law, if permitted to remain, would deprive these farmers of their incomes for all time to come, so far as that source is concerned.

But it is claimed, as to the manufacture of beer, that this measure is intended for the conservation of the food supply of the country. The amount of barley consumed in the manufacture of beer last year was 52,000,000 bushels of 48 pounds to the bushel. The average grain production of the country during the last five years, of the staple cereals, was over 5,130,000,000 bushels per year. The amount of barley used in the manufacture of beer last year was about 1 per cent of the staple grain production of the country.

Barley is a fine stock food, but wheat and corn, the average production of which is over 3,500,000,000 bushels, so greatly exceeds barley as a bread product that there is no probability of the use of barley to any great extent for the purposes of human food.

Barley is now selling for 2 cents a pound to the farmer in California. During the last five years it has sold over the country at an average price to the farmer on the 1st of December of about 60 cents a bushel.

For many years and during this war we have been exporting barley for the purpose of being used in the manufacture of beer for our allies. This act does not prevent the continuance of that practice; it denies to the people of the United States the privilege to manufacture beer and permits our grains to be shipped to our allies to be made into such liquors.

The conservation of grains provided by the Barkley amendment is not of material consequence, as compared with the Lenroot amendment, of which I am in favor. The Lenroot amendment prohibits the use of all staple food products in the manufacture of all alcoholic beverages, including beer. Barley used in beer is primarily an animal food. Most of the people in this country never saw or tasted barley bread, and probably never will. The theory that we are going to supply barley to make bread is a theory that we are going to do something we never have done, are not doing now, and probably never will. This law does not require us to use barley. The enactment of this law does not give us any reason for using barley that does not exist to-day.

Barley represents one twenty-fifth part of our grain crop. The crop is that large only because the brewing demand has encouraged its production.

Grains generally used for animal food furnish the natural substitutes for human food.

The natural common-sense substitute for wheat bread is corn, which constitutes fourteen twenty-fifths of the cereal crop of the country. Or, if we prefer, let the hogs eat less wheat and more corn. We can substitute grains for the animals more easily and readily than for persons.

War has greatly increased the demands for our foods. War has not lessened our feed supplies. We have no less feed and little greater demand for animal feed on account of the war.

It is estimated that next year 50,000,000 bushels, or 1,250,000 tons, of barley would be manufactured into beer. Upon this amount the Government would receive a revenue of over $150,000,000, or more than three times the value of all the barley consumed.

In view of much conflicting information being given the public as to the digestible-food value of the remaining product of barley after brewing, I have endeavored to seek information from a disinterested, authoritative source. Under date of May 17, 1917, I got this information from the Agricultural Department:

One hundred pounds of barley converted into malt and used for brewing ordinarily yield about 30 pounds of dried brewers' grains. The digestible nutrients in these amounts are as follows:

	100 pounds barley.	30 pounds dried brewers' grains.
	Pounds.	*Pounds*
Protein	9.0	6
Carbohydrates	66.8	9
Fat	1.6	1

In a letter under date of May 28, 1917, Prof. A. E. Taylor, Assistant to the Secretary of Agriculture, wrote the chairman of the Agricultural Committee, Hon. A. F. LEVER, among other things, as follows:

Brewers' grains constitute a favorite feeding concentrate for dairy cattle. For practical purposes the conversion of barley into beer is tantamount to feeding barley to live stock, since in the brewers' grains remains the largest fraction of the protein of the barley.

I am unable to state the exact feed value of the products of barley after brewing, but unquestionably the value of the residuary product is a material and substantial amount, which to that extent lessens the loss of feed involved in the manufacture of beer.

Every great country now engaged in war has prohibited or limited the use of alcoholic liquors containing a high percentage of alcohol and permitted the use of light liquors. I believe our country should do that. But I fail to understand how it is promoting the cause of true temperance to give a monopoly of the liquor business to the alcoholic liquors containing the high degree of alcohol and prohibiting the use of the liquors containing the low percentage of alcohol in a law which is to prevail only during the continuance of the war.

Whenever there is a real necessity for the conservation of the barley of the country for the purpose of making bread instead of using it for manufacturing beer no one can hesitate for one moment as to what use should be made of the barley. Liquor must give way to bread. That is a proposition too plain to require argument.

This bill is an administration measure, and by its terms we were asked to give the President power to restrict or prohibit the use of any or all grains in the manufacture of alcoholic liquors. No one doubts the willingness or the disposition of the President or of his superior opportunity to exercise that power to the best advantage of the country. As we have given him this discretion as to all other food and feed necessities, in my judgment we can best meet this situation by giving him that discretionary power in reference to limiting or prohibiting the use of grains in the manufacture of liquors. I believe in temperance. I believe in a sober Nation. I am willing to vote to prevent the manufacture and sale for beverage purposes of liquors containing high percentages of alcohol, but I do not believe we are going to aid the cause of true temperance by denying to everybody in this country the right to use light wines and beers and compelling them, if they drink at all, to drink whisky or liquors of high alcoholic content.

But, above and beyond that, my reason for opposing this amendment is that it is unfair, it is unjust, and it is immoral, without compensation and without any sufficient notice giving grape and hop growers and all persons interested a chance to adjust themselves to the new law, to deprive them of the value of this year's crop, in the production of which they have been encouraged by the State and Nation, and upon which they rely for the support of themselves and their families.

I appeal to your sense of fairness. Apply to yourself something of the golden rule, consider the situation of the grape growers and the hop raisers of the country to-day, with their crops approaching harvest, and ask yourself whether or not you would be willing to be treated as you now propose to treat them.

Do that and you will not vote for this proposed law. Whatever provisions are made in reference to the limitation of the manufacture of liquors, let them be made by means that are fair and just and moral. This Government is too good, it is too great, it is too powerful to be guilty of injustice to any man or any class of our people. You may have the votes to do this injustice to the grape and hop growers of the country, but you have not the moral right to do it. In this country of ours there is something better than prohibition, better than victory, better than a rule of the majority, and that is the fairness, consideration, and fair treatment of a minority, which, after all, is the true and greatest test of a Government of liberty and freedom and justice.

The glory of the Republic is not in the power of the majority but the justice and fairness with which it treats the rights of a minority.

Mr. LEVER. Mr. Chairman, if the committee will indulge me just one moment, I desire to ask unanimous consent that amendments may be offered in the time of those who have time yielded or by others who may not get time, and that they may be regarded as pending, and that we shall vote upon them at the end of the debate. And I do that because a number of gentlemen have left the Hall thinking that that would be the situation.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

Mr. SHERLEY. Mr. Chairman, I suggest to the gentleman that amendments be offered now. Let us know in advance what they are to be.

Mr. LEVER. I will be very glad to have that done if they are prepared. I ask unanimous consent that amendments that are to be offered to this section be offered now, and let them be pending.

Mr. STAFFORD. Mr. Chairman, that is impossible at the present time.

Mr. LEVER. I think so, too, as I will say to my friend from Kentucky [Mr. SHERLEY]. There may be amendments which the gentlemen are preparing.

Mr. SHERLEY. The trouble is that otherwise we will have debate without knowing what we are debating.

Mr. LEVER. I think the gentlemen should offer amendments and debate them in their own time.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the amendments may be offered during the course of the debate and be pending, all to be voted on when the debate has been consumed. Of course the Chair will state, if there is some gentleman who has not the privilege of debating, he will be permitted to offer any amendment at the close.

Mr. LEVER. Certainly; that is understood.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HAUGEN. Mr. Chairman, I yield four minutes to the gentleman from New Jersey [Mr. LEHLBACH].

Mr. LEHLBACH. Mr. Chairman and gentlemen of the committee, this section as it now stands as amended prohibits absolutely the manufacture of alcohol and alcoholic beverages. Now, it seems to me that there is neither rhyme nor reason in the prohibition of the manufacture of alcohol, which is a necessary commodity in the arts. It has varied uses industrially, and the prevention of its manufacture on the ground that we want to preserve the grains that are used in its manufacture is not a wise provision, because the use of alcohol in industries is of much greater value than the value of the grains consumed in the making of it.

I do not want to rely on my knowledge of this subject, and therefore refer to a letter written to me by a chemist of note, who is recognized as an authority in his profession, Mr. Yocum, of my district, and I will ask that the Clerk read his letter in my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

NEWARK, N. J., *May 14, 1917.*

HON. FREDERICK R. LEHLBACH,
Washington, D. C.

DEAR SIR: My attention has been called, through reading the newspapers, to the effort on the part of Congress to prevent the use of grains in the manufacture of alcohol during the war. I present the following reasons why this should apply only to potable alcohols and not to industrial alcohols:

The action of Congress in preventing the use of grains for the manufacture of alcohol would, to my mind, be a great mistake unless provision were made in the bill to permit of the manufacture of industrial alcohol and the use of corn at least in its manufacture.

In the production of smokeless powder and other powders of cotton the use of alcohol and the acetates are absolutely necessary. If the production of grain alcohol and its associate, amyl alcohol, were stopped, the necessary solvents for guncotton and powder, and for other industrial purposes, would be prevented to a very large extent, ethyl and amyl alcohols and acetates being the commercial solvents that permit the formation of smokeless powders into slow-burning tubes. The inability to manufacture the acetates of these alcohols would prevent having a cheap and unlimited supply of powder solvents, in that the wood alcohol and their acetates, and various com-

pounds like acetone, are not being produced in sufficient quantities to replace ethyl acetate, amyl acetate, ethyl alcohol, or fusel oil (amyl alcohol), and this would cause a shortage in solvents for smokeless powder that would interfere to the extent of 75 per cent of its production. If the bill preventing the use of grains for the manufacture of alcohol passes, it must be understood that thereby two-thirds to three-fourths of the source of solvents used in the manufacture of munitions will be interfered with to a very large extent.

I might note in this connection that in Germany potato alcohol, giving, as it does, a larger percentage of amyl alcohol than does the fermentation of corn, is used, and this might be adopted here, the amyl acetate at present being worth approximately $4 per gallon and other acetates in proportion.

Aside from the consumption of grain alcohol for exhilarating purposes, it must be borne in mind that the absolute destruction of the industry by refusal of the Government to furnish the necessary grains would not only entail a hardship on the individual consumer of alcohol as such but would entail a hardship also upon every manufacturer in a multitude of industries, and particularly in the powder industry, as powders are now made.

Without going into the matter in any further detail, I would call to your attention strongly the necessity of protecting the manufacturing industries of the country, and particularly the munition industries, as against a prohibition that would absolutely place them in the hands of the destructive distillers of wood, who make only wood alcohol, acetate of lime, charcoal, etc., and their production would not be large enough for our requirements.

The Congress of the United States has never given the industrial alcohol people an opportunity to prove their case, because of the fact that 95 per cent alcohol carries with it, when distilled pure, the possibility of use for a potable liquor. This, to my mind, is of less importance at the present time than the production of 95 per cent alcohol suitable for industrial manufacturing purposes without which a general dislocation of the intricate chemical treatment of many materials will occur.

Yours, very truly, JNO. H. YOCUM.

Mr. GALLAGHER. Mr. Chairman, I am quite as anxious as any Member of this House to secure legislation—and I trust we can secure it—that will encourage production, conserve the supply, and control the distribution of food products and fuel. I doubt whether this bill is broad and ample enough in its provisions to do all that is intended and should be done to protect the people of the country from being robbed by the speculators, the gamblers, and the manipulators of the market in food products.

Much has been said here against these very skillful artists and a great deal of denunciation has been leveled against their operations. They have been branded as worse than criminals. But very little has been said against those who conspire with them in their operations to plunder the people.

The manipulators of the market and the stock gamblers could do very little toward cornering the market if it were not for the aid they receive from the bankers of the country. We praise the patriotism of the farmer; just now he is a great man. We tell of the splendid opportunity he has for patriotic endeavor in the present crisis. We say that on him depends the success of the war. But what of the banker, who is never over anxious to accommodate the farmer with the money he requires for improvements, when the speculators and the stock gamblers on the board of trade, in the market, on the exchange are endeavoring to corner the food supply and all other supplies want the money? The banker is always looking out for a high rate of interest and will loan his money wherever he can obtain higher rates. This law should in some way prevent the loaning of money for such a purpose.

Is it any wonder that we have unrest and discontent everywhere throughout the country? One thing is certain: Food prices must be brought within the reach of the working people of the country or general readjustment in wages must take place.

Arguments have been made in Congress during the consideration of this bill that the packers of Chicago, the grain speculators, and others have made hundreds of millions of dollars by the advance in prices since the war began of the necessaries of life. Facts and figures have been quoted in proof of it.

I have the honor to represent here in part the city of Chicago. In our city are assembled, it is safe to say, most of the food products of the Middle West, the South, and the Northwest. Even the Pacific coast helps to fill our vast storehouses. Its great stockyards and packing plants furnish in a great measure the meat supply of the world. We have the largest grain elevators and cold-storage plants that can be found anywhere in this country, and by manipulation and hoarding vast fortunes have been made by those interested in the control of food. It is but fair to say (I do not wish to be misunderstood or to be unkind or faultfinding with those engaged in great enterprises) that they are entitled to fair returns from their investments. But they are not entitled to hundreds of millions of dollars in extortionate profits which they are reported to have made in food speculation.

I can not forget that the great majority of my constituents are hard-working tradespeople, mechanics, small storekeepers, and persons otherwise engaged in everyday life. I can not say that they have benefited by the increase of business reported from different sections of the country. Owing to the high cost of living they have had to struggle constantly to keep the wolf from the door. While wages at present may be a little higher, the continuing increase of the cost of food to over 200 per cent since the war started has, instead of gaining a better livelihood, made many of them find it a difficult task to keep their families from starving. It is the plain duty of the United States Congress to furnish immediate relief from this terrible condition.

I am making no uncalled for or harsh or unwarranted statements, gentlemen, but we can not shirk the responsibility this hour puts upon us. We must find some way to lift this burden. The wage earner sees the cost of supplies for his family and himself rising higher and higher every day in the week. Is it any wonder that he is discontented when he finds it almost impossible to buy bread for those dependent on him. When we know that bread and other food supplies are sold cheaper in England and France than they are here and that the bread is made from the flour milled from wheat grown in this country and shipped to England and France, is it any wonder there is unrest. When people are face to face with poverty and children cry for bread it is time for us to strive to stop the speculators that are now at work to purchase and corner the harvest so that food riots in large cities may be prevented.

Great coal fields are numerous in Illinois and bituminous coal is mined in abundance, yet it is difficult on account of the high prices for the wage earner to secure coal in time of need to keep his family from freezing.

The fuel condition last winter in Chicago was shocking. Some of our schools were closed for want of coal. I believe like conditions were experienced here and elsewhere. Factories in our city were compelled to stand still at times, the most serious conditions prevailed. The conditions were not confined to Chicago alone but existed through the country.

The Federal Trade Commission report, under date of June 19, 1917, contains, among other things, the following (p. 24):

The present production of bituminous (soft coal) the country over is about 40 per cent short of the possible maximum, and this limitation is solely to be charged, as to primary cause, to faulty rail transportation. The present demand for coal is unprecedented, but the mines now open are capable of filling this demand if adequate car supply is furnished.

The president of the Louisville & Nashville Railway Co. appeared recently—so the papers report—before the Jefferson County (Ky.) grand jury in connection with the coal investigation, and afterwards he issued a statement, in which he said:

The shortage of coal was due to a shortage of coal-car equipment, and this shortage in turn was due to the fact that mine operators on the Louisville & Nashville billed Louisville & Nashville coal cars to points off of its line, because they were able to sell their product at such points to better advantage than could be done at Louisville & Nashville points.

The Federal Trade Commission also states the coal cost was much less to the large consumer than to the constituents of my district, the report says (p. 26):

The prices of coal to railroads and other large consumers have generally increased from 100 to 150 per cent, while prices to small consumers have often increased as much as 200 to 400 per cent and in some cases even more.

Also on the same page they say:

The serious conditions with respect to bituminous coal are unnecessarily curtailed production and a wildly fluctuating market in which speculation feeds upon panic.

This report concludes (p. 25):

This evil condition has already begun this year and if persisted in the coal famine which threatened that part of the country in the winter 1916–17 will be an actual coal famine in the winter of 1917–18.

In the anthracite coal industry the commission believes there is a desire to cooperate with the Government, and there is a better system of tracing coal from the point of its production to the point of consumption.

If this bill will furnish any relief in the coal situation, it will be a step in the right direction.

In addition to the relief this bill provides, I am in favor of giving the Government full control, if need be, of mines and such other powers as may become necessary for the distribution of food as the war progresses to save us from starvation and other dire calamities which threaten us as a result of the prohibitive cost of the necessaries of life.

Since we began the consideration of this bill for the conservation of food and fuel, as reported to the House from the Committee on Agriculture, it is proposed to fasten upon this bill new and important amendments that have for their object Nation-wide prohibition, and also to require any person having control of alcohol and distilled spirits to turn the same over to the Government for use or redistillation whenever they may

be necessary to meet the requirements of the Government in the manufacture of munitions, thereby dispensing with the necessity of utilizing products and material suitable for food and feeds. It is further proposed to prohibit the use of any food material or feeds in the production of any beverage containing alcohol. I am opposed to any such legislation.

This House—and it was quite evident—became very much excited a little while ago over a proposed amendment to fasten prohibition on the entire country regardless of its results, without any consideration of existing conditions, or of conditions which will be brought about as the result of the action of this House. It is proposed that we prohibit the use of grain in the manufacture of all kinds of intoxicating liquors during the period of the war. The excuse for the kind of legislation that is proposed here to-day is to conserve the food supply. The prohibitionists have been lying awake nights ever since the declaration of war to see how they could find a way to force prohibition on the country. Why, the conservation of grain does not concern them in any particular, but the war furnishes the excuse for which they were waiting to bring about Nation-wide prohibition.

Not one word has been said in this entire debate about the great quantity of grain that is going abroad and being used in the manufacture of intoxicating liquors. All of the belligerent countries in Europe are using grain, and those that we are trying to help in this contest are using the grains that we are sending them from this country to manufacture intoxicating liquors. Canada after nearly three years of the war has not prohibited the manufacture of whisky, beer, or wine, and still the prohibitionists here do not say one word about the grain that goes abroad for such purposes, much less the rations of liquor that those Governments give their soldiers in the trenches.

There are acres and acres of ground—thousands of them—in this country that are used in the cultivation of tobacco which could be planted with useful and much-needed grain. But there is no effort on the part of the prohibitionists to say one word about tobacco or to conserve the land for food or feeds. Cigarettes and tobacco are all right, nothing harmful about that, in the eyes of my prohibition friend. Why, this is the most peculiar, unnecessary, and uncalled-for legislation that could be brought before the House at this time. I am not a prohibitionist; I believe in personal liberty and home rule. It is the freedom and liberty we have enjoyed here in the United States that has brought millions to our shores and made this, our country, the greatest Nation on the earth. I am more or less a temperance man; I am in favor of temperance, and follow out the principles of temperance a great deal more closely than many of the men that are most boisterous in the House in behalf of prohibition. [Applause.]

Let me ask you this question: What are you going to do for revenue if you pass such a law as is proposed by the amendments? There is nothing said here about the $300,000,000 raised from the sale of liquors in this country to help defray the expense of the Government—not a single word. Where are you going to get the money that is needed by the Government in time of war? Nobody cares, as long as we can force prohibition on the country. That is the intention of the prohibitionist. That is what he wants.

This legislation will bring ruin to thousands engaged in legitimate business. Property values will be destroyed, vineyards will be made useless, labor of all kinds will be without employment, and local governments will suffer a great loss in taxes. What are you going to do with the liquor on hand—300,000,000 gallons of it? Turn it back into alcohol for the purpose of making smokeless powder, says my good temperance friend from Kentucky, where they make more or less good whisky—he offered the amendment. Who ever thought such a reform would come from Kentucky? The disturbance that we are witnessing here to-day is the result of the efforts of the prohibition element to get possession of the House and to force upon us their peculiar notions concerning prohibition.

I am opposed to it. They are loading this bill down to a degree that was far from the intention of the committee when the committee brought the bill into the House. They were not satisfied to leave this matter with the President, as the committee intended, and I know why. I want to conserve the food supply; I want to take care of the people who are suffering, and especially those of my district, on account of the high cost of living in this country. I know what the conditions are in the big centers of population. People there are in want and many of them are going to bed hungry at night, and in the winter they are freezing because they can not afford to pay the exorbitant prices demanded for coal.

I said a moment ago that I knew why you do not want to leave this matter to the President, as the committee intended. It is because he does not believe in this kind of legislation and the prohibition forces know it.

He made his personal views public while governor of New Jersey in 1911 in a letter to the Rev. Thomas B. Shannon, of Newark, N. J. Let me read it, he says:

> I am in favor of local option. I am a thorough believer in local self-government, and believe that every self-governing community which constitutes a social unit should have the right to control the matter of the regulation or the withholding of licenses.
>
> But the questions involved are social and moral, and are not susceptible of being made parts of a party program. Whenever they have been made the subject matter of party contests they have cut the lines of party organization and party action athwart to the utter confusion of political action in every other field. They have thrown every other question, however important, into the background, and have made constructive party action impossible for long years together.

The prohibitionists, regardless of the sentiment of the country, want to force their notions on this House and upon the country, and to make this country, as they propose, bone dry. Let them do it. I am convinced that no people will be happy and prosperous where one section forces upon another section laws they do not favor. The best governed State is the least governed State—that State whose people are in harmony with its laws. [Applause.]

The CHAIRMAN. The gentleman yields back the balance of his time.

Mr. HAUGEN. Mr. Chairman, I yield four minutes to the gentleman from Missouri [Mr. DYER].

The CHAIRMAN. The gentleman from Missouri [Mr. DYER] is recognized for four minutes.

Mr. BARKLEY. Mr. Chairman, will the gentleman from Missouri yield to me long enough to offer an amendment?

Mr. DYER. If it does not come out of my time, I will.

Mr. BARKLEY. It will not.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Kentucky.

The Clerk read as follows:

> Amendment offered by Mr. BARKLEY: Page 15, line 17, after the word "alcohol," insert the words "except for industrial, scientific, medicinal, or sacramental purposes."

Mr. DYER. Mr. Chairman and gentlemen of the House, it seems to me that some Members of this House have lost sight of the object of the legislation that the President has called to our attention in this food-control bill. I feel that some Members of the House are thinking more to-day of what their constituents think or feel on the question of prohibition and about their own personal welfare and their opportunity to return to Congress than about the great war that is now raging in the world and the necessity of bringing it to an end.

It is important, of course, that the food supply should be conserved to the people of the country, but to-day and during the past years of this war—and it will go on during the length of this war—we have been and will be exporting and sending abroad, from year to year and from month to month, the grain that is raised in the fields of this country, the barley that is produced on the farms of this country, to be manufactured into the very things that you will prohibit here in this country.

In doing it you are not doing anything for the cause of temperance. I believe in temperance as firmly as any man in this House. I believe in its importance. But the amendment of this bill in this manner does not do anything for the cause of temperance. You are going to close down the manufacture of things that are of little consequence; you are going to try to prohibit the manufacture of beer and things of that kind that contain but little alcohol, and at the same time you are going to turn loose upon the country—and many of you no doubt will help to drink it—the whisky that is now stored away in the warehouses of this country. The people who are now drinking beer will turn to whisky and become whisky drinkers, and instead of doing something for prohibition you will have been doing only the opposite thing. But what do some people in this country care if they can only bolster up their campaign for country-wide prohibition?

The gentleman from North Carolina [Mr. WEBB] is the chairman of the Committee on the Judiciary. His committee can bring into this House whenever he says the word a bill or resolution proposing a nation-wide prohibition amendment. Under the Constitution of the United States that is the legal way to get prohibition; that is the regular way. Why not go about it in that manner, instead of trying to take advantage of the unusual conditions in this country now and bringing it in here and putting it upon this food-control bill, which I and others who are opposed to prohibition are anxious to support? We are anxious to help and give to the President every power possible in order that he may handle this country in this time of great

stress. I have supported this bill all the way through. I have stood at the back of the President faithfully and earnestly, and in my humble way have done everything I could. I supported his recommendation for war; I supported his recommendation for a drafted army; I supported the loan bill and the war appropriation bills; and I have done everything I could; and here to-day and this week we have been standing together as men who believe in prohibition and those who do not believe in it, trying to act as worthy Representatives and give to the President the needed power and authority to handle this condition and to bring about peace at the earliest possible date.

But you gentlemen, in an improper way, outside of the regular way, want to destroy the industries of this country that have been built up at the cost of hundreds of millions of dollars. Thousands and thousands of men are working now in the brewing industries and in the allied industries, and it is proposed that they be thrown out of employment and deprived of opportunity to support their wives and families, without this question being submitted to the people of the United States, as provided by the Constitution. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. CANDLER of Mississippi. Mr. Chairman, I yield to the gentleman from Massachusetts [Mr. TAGUE] five minutes.

The CHAIRMAN. The gentleman from Massachusetts is recognized for five minutes.

Mr. TAGUE. Mr. Chairman, it is obvious that when this bill came before the House every Member understood that we were voting on a bill which concerned the conservation of the food of our Nation and which also aimed to protect the people of the country from the vicious methods of food speculators.

Even with all this in plain view, Mr. Chairman, we have been humiliatingly compelled to witness on the floor of the House of Representatives an exhibition of hypocrisy such as I have never witnessed since I have been a Member of this House.

Mr. Chairman, I am a temperance man. I believe in temperance and have the courage of my convictions, and I also believe, as many of my colleagues do, in practicing what I preach.

But to-day, Mr. Chairman, we have seen Members of the House stand on the floor and heard them say that the main reason for the pending amendments was the conservation of food products.

And then we have heard others say that their reason for being in favor of the amendments to this bill was because they wanted to protect the young soldier who was going out to fight the battles of this country.

What a patriotic stand these Members are taking. How considerate of them to entertain the welfare of the soldier. And what a terrible alibi they are making to further their own personal ends. What a position they place the soldier in. Mr. Chairman, if these men would only stop and think for a minute the accusation they are making against the fighting blood of this Nation, what an indictment of these splendid types of courageous young men, who, hearing the call to arms, have given up their all that they may take their places among their fellow men on the field of battle, from whence they may never return to the loved ones who will be left to mourn them.

Oh, Mr. Chairman, what a direct insult such a "reason" is, not only to these brave young men, but to their fathers and mothers, who have prided themselves in the fact that they were able to supply the Nation with their own flesh and blood in this crisis. What a gigantic cloud of suspicion must hover above their heads. How they must weep in the thought that their boy—and in many, many cases boys—have been suspected of drunkenness the minute they have left the side of the home fire.

And in after life how the thought of such a suspicion must make the man who volunteered to save his country from the hands of an enemy feel when he realizes that through it all he was looked upon as a drunkard or a derelict, who could not be trusted out of sight, because he might partake of alcoholics.

And these men who have been sent here to protect and fight for the reputations of these very young men deliberately select these young men as subjects for their "reasons" for favoring these amendments, one of which means nothing more nor less than national prohibition. I am sorry to think that any Member of Congress should, in this age of history making, attempt to assail the reputations of the young soldiers of the Nation and use their accusations in an effort to mislead other Members of Congress.

Mr. Chairman, we have been forced to witness these spectacles on this floor in the past. We have been forced to believe that Members of Congress lacked backbone. Why, I ask you gentlemen, should not these Members stand up on the floor like real men and say, "We want national prohibition, and we are ready to go to Congress fairly and ask for it"?

But no; they try in a conniving manner to foist upon the Members of the House the intimation that their actions are for the benefit of the soldier. Let me tell you gentlemen that the average soldier would refuse from you even consideration of his personal welfare, much less action in behalf of it.

Now, what is the real meaning of these amendments? Let us look the matter squarely in the face and not be deceived by any outburst of supposed patriotism which engages the moral soldier's activities. Is it not plain to every Member of this House that the meaning of this amendment concerns the locking up of the distilled liquors of this country in the warehouses of Kentucky and other States, where this business is at present thriving? Does it not carry the significance of hoarding distilled liquors for the profit of the present owners?

This must be obvious to all. I want to go on record as opposing such deceptive measures.

Mr. KAHN. Will the gentleman yield?

Mr. TAGUE. Yes.

Mr. KAHN. Is the gentleman aware that the soldiers who are fighting this war on the battle fields of Europe, those from Italy and France are daily given a ration of wine, those from Germany are daily given a ration of beer, and those from England are daily given a ration of rum?

Mr. TAGUE. Mr. Chairman, of course I know about those conditions. And every Members of this House who has read any of the accounts of the habits of European soldiers during this war knows what my colleague means to construe by his remarks. But even this habit which is supposed to prevail in Europe offers no fundamental excuse for argument here. It is true that we are about to emulate our allies in carrying on this war so far as concerns certain phases of modern warfare, but the question of national prohibition has no place in this bill.

In the Army of the United States to-day there are more temperate men in proportion to their numbers than there are temperate men in the membership of this House, who are voting for this amendment. [Applause.]

Mr. FESS. Will the gentleman yield for a question?

Mr. TAGUE. I will.

Mr. FESS. Does that mean that when our soldiers go to the front they will be given rations of wine and beer?

Mr. MAYS. And rum?

Mr. FESS. And rum.

Mr. TAGUE. Mr. Chairman, if our young men want wine or beer or rum, they can get it at home, and when they do not drink it at home, they are not going to drink it on the battle field. [Applause.]

Mr. FESS. Why, then, do we surround every Army cantonment with a safety zone, forbidding liquor to be sold within a certain radius?

Mr. TAGUE. Every protection is being used against anything that is thought to be an injury, and I will do as much as the gentleman will to protect any of the young men of this country.

Mr. FESS. This is the way to protect them.

Mr. TAGUE. But I do not want it said of my people who are going to the front to fight for their country that the reason for this bill is "that you who have always been good, sober young men and who have never touched a drop of liquor must now be protected from it because some people see an opportunity to use you in order to gain their ends."

I do not say that all of those who believe in the question of prohibition do this, for many of them are sincere and honest in their efforts to pass this kind of legislation. They have devoted their lives to this cause and they are pleading what they believe is in the interest of a great cause. I will not for one moment say a word except in praise for them and their work, for they are just as sincere and patriotic as any of our citizens; but it is to those who preach on prohibition, and then, by their practice, teach an entirely different lesson in their every-day life.

Mr. BLACKMON. Will the gentleman yield?

Mr. TAGUE. Yes.

Mr. BLACKMON. The surrounding of these cantonments with a safety zone is approved by the President of the United States, is it not?

Mr. TAGUE. Yes.

Mr. BLACKMON. How does my colleague explain the fact that gentlemen were willing to trust the President with the lives of the young boys between the ages of 19 and 25 to carry on this great war and were willing to follow him in abolishing all State units, but are not willing to trust him in this matter? Can my colleague explain that?

Mr. TAGUE. No; I can not. That is another evidence of the hypocrisy that has been practiced on this House. My col-

league and I sat on the Committee on the Post Office and Post Roads this year, and we saw other examples of this same kind of hypocrisy. One man came in and held up his hands for prohibition, and I had occasion to visit a hotel in this city that evening, and he was the first man I saw enjoying himself drinking an intoxicating beverage. [Applause.]

Mr. Chairman, the speedy passage of this food-control measure is not only demanded by the President of the United States but also by the people of the country in their helplessness to obtain food supplies at other than extortionate prices.

The bill therefore should not be amended by attaching to it freakish legislation that has no proper place in a bill of this character.

There is no necessity of proceeding any further in respect to the use of food, food materials, and feed in the manufacture of alcoholic beverages than was contemplated in section 13 of the bill as originally presented.

Many false statements have been made by the advocates of national prohibition concerning restrictions in the use of alcoholic beverages in Great Britain and France during the progress of this war. The fact is that the soldiers of these countries are given rations of wine, beer, and liquor, and thus far, at least, we are not aware that any disastrous consequences have resulted from the practice. While the Government of Great Britain has placed some prohibition on the quantity of beer brewed previous to the war—and this was done because of the shortage of shipping tonnage—it has also prohibited the export of beers in order to conserve the supply for home consumption. It will thus be readily seen that the policy in vogue in these countries is not the cutting off of grain from use in the manufacture of intoxicating beverages, but rather the adoption of a plan for regulating the quantity of grain to be used in such manufacture.

The food problem is without question the most pressing measure that has been presented to this House since our entry into the war. Upon it, in the final issue, will depend the success of our armies. Napoleon was right when he said that soldiers fight on their stomachs. At no time in the annals of war has the truth embodied in this laconic statement been brought home to the consideration of a people with greater force than at present.

Hence our purpose in the present bill is to turn over to the Government the control of our food supplies, by placing extraordinary power in the hands of the President, acting as Commander in Chief of the Army, in order that our people during the crisis through which we are passing may not be exploited by bands of speculators intent only on public plunder.

In food distribution, as in the movement of our armies, there must be organization. It is to promote such organization that this bill was planned in order that the food resources of the country may be utilized to the best possible advantage, thus insuring one of the elements of superior importance in the prosecution of the war.

Whatever success our enemy in this war has attained has been due entirely to the fact that she established a system of food survey in the very incipiency of her struggle. Food control in this war has been proven to be the stoutest element of defense. Germany has proved it and the allied Governments have been so thoroughly imbued with this conviction that they lost no time in sending to this country accredited commissions to point out to us at the threshold of our entry in the war the necessity of food conservation not only as a helpmate of arms but as an indispensable factor in checkmating the ravages of war.

Mr. Chairman, we have been endeavoring in every way possible to take our cue for war-like preparation from the observation of the painful and distressing consequences experienced by our allies through the failure of organization in many of the avenues that mark the pathway of war. This we must do if we are to be successful in the conflict. This bill is a vital necessity and I regret that a misguided industry is displayed here to-day to divert it from its original plan and principle.

Mr. STEVENSON. I should like to interrupt the gentleman if he can be allowed half a minute.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEVENSON. He made reference to something I said here a while ago, about which I want to correct him.

Mr. LEA of California. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. LEA of California offers to amend the amendment of Mr. BARKLEY by adding thereto the words:

"*Provided*, That nothing herein contained shall prohibit the manufacture of wine containing not more than 12 per cent of alcohol per gallon."

The CHAIRMAN. The gentleman from Mississippi [Mr. CANDLER] is recognized.

Mr. FESS. Mr. Chairman, the gentleman from Iowa [Mr. HAUGEN] yielded to me.

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] is recognized for four minutes.

Mr. FESS. Mr. Chairman, I want the attention of the committee. The men who spoke against the amendment that was passed awhile ago which forbade the use of grains in the production of alcoholic beverages constantly used the term "hypocrites" applied to the men who favored that amendment. I have no word of condemnation for any individual Member who votes his principles here on this question, but on behalf of the men who believe in temperance and who think it wise in the face of a world-wide food crisis which seems to confront us I do take exception—I do not want to use the indelicate word "resent"—but I do take exception to any man who ascribes the word "hypocrite" to me or to any other person here who believes in protecting the boys who are going from our homes to the battle field against being given a ration of rum and of wine and of beer. Many of the sons who will give their all to the life of our Nation will go from homes where the use of rum is unknown and where potential influence is against the use of liquor as a beverage. The parents and friends of the sons who will go to the front will not appreciate the charge made here that those of us who propose to protect them and to conserve the Nation's food resources are hypocrites. I do not believe that my good friend from Massachusetts wants to leave that impression that those who vote to protect these young men are hypocrites.

Mr. TAGUE. Will the gentleman yield?

Mr. FESS. Yes; I yield.

Mr. TAGUE. I think the gentleman understood me properly. I said some of those who are advocating this proposition have given an exhibition of hypocrisy not ordinarily seen in this House. I did not refer to the gentleman from Ohio, but he knows to whom I did refer.

Mr. FESS. I do not know to whom the gentleman refers, but I do know that the conscience of America is indicting in the most powerful manner the whisky and the beer business. Every year sees new recruits in the battle against the liquor business. The organized conscience of the Nation is displayed by the conduct of the people of many States. The liquor business is, in my judgment, doomed as a matter of beverage. The men who stand for this business at this hour have no assurance of the future. The truth of the matter is we are going to provide legislation here, as far as in our power lies, such as will make it impossible for a youth who goes from a Christian home to be led into drunkenness. I am sorry that my friend from Wisconsin [Mr. LENROOT] has introduced this amendment, because he says that the amendment is to prevent making drunkards out of whisky. He declares that his amendment permits the use of beer as a substitute. In other words, he is arguing for temperance by permitting the manufacture of beer. I want the membership of this House to know that this amendment means that we are to include fermentation but exclude distillation.

His amendment does not go as far as the amendment that we have adopted. Our amendment forbids both distillation and fermentation; that is, we forbid the use of grains for the manufacture of either whisky or beer. The Lenroot amendment modifies the amendment just adopted by permitting fermentation, while it does not change it in regard to distillation. I do not believe it is wise to go from one kind of drunkenness to another kind of drunkenness. I am against it in whatever form. I shall not favor the one as against the other. When you say the locked-up gallons of whisky in the Kentucky distilleries will be used to make whisky drunkards, I can assure you that you need not disturb yourselves about that. The amendment that is coming immediately after this, one that will be introduced by the gentleman from North Carolina [Mr. WEBB], will take care of the whisky that is in the bonded warehouses.

The issue that is before us to-day is, Are we going to be a nation of sobriety, are we going to use the power of the Government during the war to forbid the sale and use of wheat, corn, rye, sugar, grapes, molasses, sirup, and all foodstuffs, including barley, if you please, not only to forbid the manufacture of distilled liquors, but of fermented liquors as well?

I am going to vote against the Lenroot amendment because I do not want to make America a beer-drinking country. I prefer that she be free from the drink habit of both whisky and of beer, and when I take a position of that kind I am not finding fault with individuals who differ from me in their judgment as to the wisdom or unwisdom of such legislation. I am not calling men who believe otherwise hypocrites when they attack a position which I take on this question. I assume they are sincere in their arguments. I am not impugning their motives. I stand here on behalf of the boys that go from

our homes, and I demand that they be surrounded by every precaution possible. I do not like to think of what was said awhile ago—that rations of beer and wine and whisky are served on the battle line. [Applause.] And it is that sort of thing against which I wish to protect our sons.

Mr. CANDLER of Mississippi. Mr. Chairman, I yield to the gentleman from Missouri [Mr. IGOE] five minutes.

Mr. IGOE. Mr. Chairman, the gentleman from Ohio [Mr. FESS] is very frank about his purpose in voting for the amendment offered by the gentleman from Kentucky. I came to the consideration of this bill as a conservation measure. I am not in favor of prohibition. I have voted against it, but I have never made a speech or said a word upon the floor of this House upon either side of that question, and I regret that I have to do it now.

The purpose of this bill is to conserve food as set out in the title of the bill. The section was drawn to give the President the right, if necessity requires, to forbid the use of food and grain in the manufacture of alcohol and alcoholic liquors. I was willing to vote for and willing to support that proposition although I am opposed to prohibition. I believe if the people of this country require the grain for food purposes, it would be better to have it for that purpose and the manufacture of it into liquor of any kind should be prohibited and enforced. As far as I am concerned, if this country needed all of the grain for food I would see every brewery in my State dismantled to-morrow, but I do not believe that we ought to use this bill for the purpose of putting over a prohibition matter simply for prohibition's sake.

The gentleman knows that the grain forbidden under the amendment of the gentleman from Kentucky may be exported to another country and used there for making liquor. Where is the justice of the proposition that you can not use the grains of this country but can export them to be used for that purpose abroad?

This amendment of the gentleman from Kentucky includes all sorts of alcoholic beverages. Some of the grains used in beer, as everybody knows who has investigated it, are not needed for food purposes. This section as it was drawn by the committee was a proposition that every man could vote for unless he wanted to use this bill to put through a prohibition proposition regardless of the necessities of the people due to war conditions. I do not understand why people want in this section to throw the Constitution to the winds, nullify the purpose for which the bill is framed, and now use it to bring destruction to business and throw out of employment hundreds of thousands of men at this particular time. I have heard gentlemen say, and I have read, that these men now working in the breweries could go into other occupations.

That is not true. Men can not leave these particular activities and go into munition making or into these other activities. It is impossible for them to secure employment. I do not stand here to make any plea upon the ground of revenue. I do not want to do that, but I do make a plea for an orderly process in handling this question, and I submit to the members of this committee that the sane, saft, and statesmanlike thing to do is to place this power in the hands of the President as you have done with these other great propositions, and I say to the gentleman from Ohio [Mr. FESS] it seems to me that in the draft bill we gave the President the power to make regulations in regard to the sale of intoxicating liquors. Is not that so?

Mr. FESS. Yes. I was willing to put it into the hands of the President, but every time that we offered an amendment of that sort it was declared to be out of order.

Mr. IGOE. The gentleman from Ohio knows that the bill itself provides that the President, whenever he deems it necessary, may prohibit absolutely the use of these grains in the manufacture of any kind of alcoholic or nonalcoholic beverages, does he not?

Mr. FESS. With certain limitations.

Mr. IGOE. There were no limitations whatever upon it.

Mr. DYER. Absolutely free.

Mr. DECKER. But the gentleman is overlooking the fact that every amendment we tried to offer taking care of the whisky already on hand was ruled out of order.

Mr. IGOE. Yes.

Mr. DECKER. And supported by the House.

Mr. IGOE. Yes; and the gentleman knows this: That the gentleman from Kentucky said that he would offer that as a separate section, and the gentleman knows that he made the statement that it would be in order, and the gentleman would have a chance to vote upon it.

Mr. DECKER. I beg the gentleman's pardon, but the Chair did not say that.

Mr. IGOE. I said the gentleman from Kentucky. That proposition will come up later.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. HUTCHINSON. Mr. Chairman, I yield three minutes to the gentleman from Maine [Mr. HERSEY].

Mr. HERSEY. Mr. Chairman, the Barkley amendment just adopted is a great victory for the people of this country. I am utterly opposed to the Lenroot amendment, because it would weaken and destroy what the people have asked for and what they have now secured by the Barkley amendment to this bill. The law-abiding, liberty-loving people of this country, since this Congress has been in session, have been of one voice, and that united voice has demanded of us war prohibition. They have insisted upon the passage of war prohibition that we might thereby win this war.

In February, 1911, Emperor William of Germany reviewed his mighty army. He called before him one of the greatest military bodies then in the world—men educated and trained to arms from the cradle, men who knew all about the arts of war. He had a grand review of a great army, and on this notable occasion addressed his soldiers in the following words:

The next war and the next battle will demand sound nerves on your part. They will be decided by nerves. But those are undermined and endangered from youth upward by indulgence in alcohol.

It is one of the questions of the future for our navy and for our nation. If you educate the people to do without alcohol, I shall have sensible subjects. The nation which takes the smallest quantity of alcohol will win the battles of the future.

Have we learned anything from our enemy? Listen now to what Lloyd-George, of England, recently said:

We are fighting Germany, Austria, and drink, and, so far as I can see, the greatest of these three deadly foes is drink. I have the greatest conviction, based on accumulating evidence, that nothing but root-and-branch methods would be of the slightest avail in dealing with the evil. I believe it is the general feeling that if we are to settle with German militarism we must first of all settle with liquor.

The Baltimore Sun of May 11, 1917, said:

America can not fight this war with the drink traffic hanging to its arm.

Anything less than the Nation's greatest effort for victory will degrade the Nation's place and spirit. There is no place in the war program for preventable disease, preventable weakness, preventable waste, or preventable death.

And there will be mounting food prices while grain untold is rotted into poison.

Why not do it now? Assert at once the Government's authority; enact the regulations that are obviously needed and add to them as the need of extension becomes apparent.

Better still, enact prohibition for the war. Use the distilleries to make munition alcohol and as a source of power fuel. Use the breweries to pack meat, pack fruit, make vinegar, make ice, and serve other useful ends. They can be adapted to such purposes at small expense.

Take this as a fact already settled: The American people will not be content to tolerate waste and destruction during such a time of sacrifice as there is ahead of us.

Let us stand behind the President and stand behind him armed with our full strength!

Let the experience for the last two years of our allies point out our duty.

Margaret Wintringer, field secretary of the Young People's Civic League and correspondent for Sunday School Times, Christian Herald, and American Issue, in a letter to the Members of this Congress May 5 last, said:

Having spent six months in Europe in 1916 studying temperance conditions in the warring nations as correspondent for the Sunday School Times, Christian Herald, and other prominent church and reform papers, I venture to set before you some of the results of my investigations.

Those countries which imposed prohibition as a military measure at the outset of the war have achieved the greatest military advance, and the measure of military success of each belligerent nation has been in exact proportion to the measure of prohibition of output rather than the measure of restriction and regulation.

The London Daily Chronicle and the London Daily Times both state that Russia's temporary wine, beer, and vodka prohibition gave her startling advantage at the very outset of the war, enabling her to mobilize her army in less than two weeks, and because of Russia's speedy entrance into the war, accomplished under prohibition, Germany was forced to divide her forces between the east and west, thus saving Paris and possibly London.

When I visited Paris a year after the prohibition by the Government of the manufacture and sale of vodka, Gen. Gallieni affirmed that this drastic action thus early in the war had saved France. The favorable results from the prohibition of absinth led to the recent ban on spirits by the Government on its own initiative.

The failure of Great Britain to follow the example of her allies, Russia and France, when the nation was ready to accept prohibition, disheartened the more patriotic element of the British people, so that that class of her subjects who would naturally have given the Government the most loyal and unselfish service could lend only half-hearted support.

As Mr. Alfred Booth, chairman of the Cunard Line, has declared, "The brewery cart has blocked the ammunition wagon and the wheat truck, and thereby greatly weakened Great Britain's helpfulness to her allies."

It has impoverished her people and hastened the present food stringency by diverting grain which would have provided every man, woman, and child in Great Britain with four quartern loaves of bread every week.

It has forced the British Government to seek loans to finance the war while her people were drinking the cost of three dreadnaughts every five days and every three losing as many lives through drink as went down in the *Lusitania*.

It is an undeniable fact that Great Britain's failure to follow Russia and France has prolonged the war, as shown by the famous "White Paper" issued by the Government containing "Report and statistics of the bad times kept in the shipbuilding, munitions, and transport areas," which lies before me:

First. By handicapping the cutput of munitions and building transports through loss of time caused by drink—669,000 labor hours lost in one district in March, 1915.

Second. By retarding mobilization, one-third of entire regiments in some instances being incapacitated by drink.

Third. By delaying the transportation of troops to form a juncture with the army of France for the relief of Belgium, the drunkenness of the firemen delaying the sailing of one transport carrying 1,200 troops 24 hours.

The sale of drink in Great Britain during the war has caused an alarming increase of drunkenness among women, resulting in an increased infant mortality so great that since the beginning of the war two babies under 5 years of age have died in Great Britain for every soldier lost at the front.

The drunkenness of the new British Army during mobilization made it impossible to form the juncture with the French Army which might have held the German hordes back from crossing the French frontier, thus changing possible and speedy victory into crawling disaster. So American mothers are to pay Great Britain's drink bill with the life-blood of their sons!

In the face of such sacrifice, when the mothers of this Nation must furnish the millions of soldiers for the country's defense, to refuse the moral protection which national prohibition as a war measure would afford her sons, would be a sin against the mothers of the United States, and would chill the enthusiasm of the millions of women upon whose services in all lines of industry the Nation must depend for the success of its arms.

He brands himself a traitor to the human race who calls a truce in the fight against alcohol now, when health, efficiency, and happiness must be safeguarded as never before. He serves his country best who conserves its young men.

In the face of the experience of the warring nations of Europe, and the price we must pay for their defeat before King Alcohol, the United States can not afford to repeat Great Britain's disastrous experiment with regulation. Nor can we risk dishonor by following Germany's deadly example of restriction, which defeated 40 years of preparedness, blackened her national escutcheon, and wrested victory from her army almost before it had crossed the border.

Without prohibition there will be no victory, and the United States will enter the struggle and sacrifice its young manhood in vain.

In behalf of the motherhood of the Nation, called to a greater sacrifice for country than any Nation in all the world's history has ever asked of its mothers, may we not look to your honorable legislative body for immediate action in defense of our soldiers, with national prohibition as a war measure?

Yours, for protection, which means victory,

MARGARET WINTRINGER.

T. N. Carver, professor of political economy, Harvard University, writing in the Harvard Alumni Bulletin of May 31, 1917, said:

The argument for war prohibition rests partly on economic and partly on moral grounds. The argument on economic grounds is an argument against the waste of foodstuffs and of man power. This is much more convincing than the argument based upon sentimental morality. The waste of foodstuffs is, in itself, a large item, though a small percentage of our total food production. According to the report of the Commissioner of Internal Revenue for the year ended June 30, 1916 (p. 138), there were used during that year in the manufacture of distilled spirits over 32,000,000 bushels of corn, over 3,000,000 bushels of rye, over 4,000,000 bushels of malt, and over 152,000,000 gallons of molasses, besides small quantities of wheat, oats, and other materials.

The waste of man power may be regarded as a moral problem, but it is in the strictest sense an economic problem. There are few vices which more speedily and certainly destroy a man's dependableness than alcoholic indulgence. In our interlocking civilization, where we are all so completely dependent upon one another, the most valuable of all virtues are those which make us dependable, and the most destructive of all vices are those which make us undependable.

As to the men who may be thrown out of employment, they will be needed ten times over before this war is ended to man the necessary industries. We must count on putting as many as 5,000,000 men in the field—it would be silly to count on fewer than that—and it may be necessary to put 10,000,000 in the Army and Navy. It will take another 5,000,000 or 10,000,000 to produce supplies and ships for them. It will take other millions to increase our farm production, our coal and iron production. Many unnecessary industries must absolutely cease to be in order that those necessary for our salvation may be kept going. The industries which produce alcoholic drinks are about the most unnecessary of all our industries.

The New York Times of May 13, 1917, contained an interesting article by Irving Fisher, professor of political economy in Yale University, in which he said:

In regard to the release of labor, there were employed in 1910 in distilleries and breweries about 81,000 men. There are 101,000 bartenders, 68,000 saloonkeepers, and enough others—salesmen and the like—to bring up the total number of persons owing their employment, directly or indirectly, to the liquor business to about 289,000.

Ordinarily the large numbers employed are cited as a reason why prohibition, by dislocating labor, would be injurious, but to-day it is this very release of labor which is needed for the production of food and munitions and for filling the ranks in our Army and Navy. Food scarcity in particular can not be remedied without more farm labor, and the larger the number employed in the liquor business the more man power is lost for prosecuting the war No one can to-day raise any objection on the ground of unemployment. There is no unemployment problem now in Canada. The curve of unemployment in England is almost down to zero. All labor released would therefore be readily absorbed, to the great benefit of the country, and in most cases probably to the benefit of the labor itself so transferred. Much of it would scarcely change location, for many of the plants of distilleries and breweries could be put to manufacturing industrial alcohol and to other war uses, as has been the case in Canada.

As to food, we are facing a real food crisis, due to shortage of crops all over the world, the destruction of crops by war, the withdrawal of food producers to perform military functions, the destruction of food ships by the submarine, and the exhaustion of our food stocks. The sooner we wake up to a realization of what is before us the better.

Nearly 2½ per cent of the total crop of those cereals used in manufacturing alcoholic beverages are diverted to that use, while 5 per cent of the total crop of rice and 34 per cent of the total crop of barley are so diverted.

More than 110,000,000 bushels of grain are used in the production of alcoholic beverages, 415,000,000 pounds of grapes, and 152,000,000 pounds of molasses. In all about 7,500,000,000 pounds of food—grain, grapes, grape sugar, glucose, and molasses—are so used each year. After making allowance for the production of denatured alcohol, the total fuel value so diverted each year is sufficient to supply the yearly energy requirement of over 7,000,000 men.

Even after making allowance for all recovered food substances, such as swill for feeding farm animals, there is still wasted enough grain alone to give a 1-pound loaf every day to every soldier in an army of 11,000,000 men! This is the calculation of Dr. Alonzo Taylor, who has been making a study of the world's food situation by personal investigation in Germany and England and the United States.

As to the commercial uses of alcohol, prohibition would enable us to utilize distilleries and breweries in the production of ether, so necessary now for surgical operations in the military hospitals, and of acetone for the making of explosives, as well as of pure alcohol for fuel and other purposes. Pure alcohol now costs $2.40 a gallon, of which $2 is tax. The tax has been removed in Europe. It is estimated, so a chemist tells me, that about 1 pound of alcohol is necessary in the manufacture of every pound of powder.

In regard to cold storage, the plants of breweries could be used for cold storage of foods, and it is believed that we are somewhat short on cold-storage facilities.

The Daily Kennebec Journal, a great newspaper published in my State, said editorially April 25, 1917:

We are entering a war for right and justice over might and greed, equality of human rights over autocratic domination. We smite our breasts and boast our high purpose to save humanity from mammon, while in our hearts is the hypocrisy of unconquered appetites and passions.

Staggering and bewildered by narcotic poison, 25 per cent deficient in human fighting ability, to say nothing of lack of training or inadequate mechanical equipment, we offer combat to a fighting enemy, depending on our size, doggedness, and luck, a "country that has never been defeated," except by its own lusts and longings.

Bluntly, are we to swagger into the arena, one-fourth paralyzed by drink, with a rum bottle in our pocket and a determination to fight on "Dutch courage"?

Here are a few facts to consider in their tremendous possibilities:

Exclusive of our loans to the allies we can hardly expect to expend in our first year of the war the sum of $2,000,000,000. Yet in that same 12 months we shall expend for drink, every ounce of it worse than useless to any human being, the amount in dollars of two billions five hundred millions.

National prohibition as an emergency measure would save this to the Nation, and all the incompetence and misery which its use would entail.

In other words, we could save by restraining our own folly, in the first 12 months of war, food enough to fully feed for one year any army that we shall be able to raise in the next three years.

National prohibition as an emergency war measure would release for productive uses an army of many thousands of men now engaged in a nationally destructive labor. We need these men on the farms to raise food, where they are now engaged in destroying what others raise.

National prohibition as an emergency war measure would instantly be felt—as it was in Russia—in a new efficiency and morale in the army, and in the people as an awakening from "booze" stupor that holds millions every hour in its grasp the while disheartening other millions close to them.

Look at the facts in the case of these three—food, labor, financial strength:

The greatest destroyer of food in this country now, and in England, France, and Russia before the war, is drink.

The greatest destroyer of labor in this country, as it was in Europe before the war, is drink.

And when we come to financial strength we find that the drink waste every year is sufficient to build:

One hundred battleships, costing $7,500,000 each, and 200 armored cruisers, costing $6,000,000 each, and 500 destroyers, costing $1,000,000 each, and 1,000 submarines, costing $10,000 each.

Can the American people drag this stupendous burden and win the war?

Here is a final illustration: The sum expended for drink in this country every 12 months would board at $1 a day each every man, woman, and child in the Nation for almost one month.

We must win this war. To do it we must first put away our Nation's shame—the legalized liquor traffic. To-day this House has sounded forth the trumpet that will never call retreat. War prohibition will give us a sober Nation and we will at once proceed to give to the people a constitutional amendment that will give us in times of peace protection from our greatest enemy and complete national prohibition. To-morrow the saloon will be only a hateful memory.

God is calling to the masses, to the peasant, and the peer;
He is calling to all classes, that the crucial hour is near;
For each rotting throne must tremble and fall broken in the dust,
With the leaders who dissemble and betray a people's trust.

Still the voice of God is calling, and above the wreck I see,
And beyond the gloom appalling, the great government-to-be.
From the ruins it has risen, and my soul is overjoyed,
For the school supplants the prison, and there are no "unemployed."

And there are no children's faces at the spindle or the loom;
They are out in sunny places, where the other sweet things bloom;
God has purified the alleys, He has set the white slaves free.
And they own the hills and valleys in this government-to-be.

I am pleased that gentlemen in this Congress who oppose prohibition to-day in this debate admit and acknowledge that the passage of this bill with the Barkley amendment will destroy the manufacture and the sale of intoxicating liquors in this Nation during the war.

Mr. CANDLER of Mississippi. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. SABATH].

Mr. SABATH. Mr. Chairman and gentlemen, it seems to me that the gentleman from Ohio [Mr. FESS], as well as the gentleman from Missouri [Mr. DECKER] and the gentleman from Georgia [Mr. HOWARD], is endeavoring to make the people of this Nation and of the world believe that we are a Nation of drunkards, and that our young men need their particular protection. I am of the opinion, Mr. Chairman, that notwithstanding the fact that we have continued for over 140 years, since the birth of our great Republic, to permit the use of alcoholic and fermented liquors, we are to-day a stronger and better Nation and a stronger and better race than any other race under the canopy of heaven. [Applause.] It has been shown by some of the gentlemen here that our young men have demonstrated time and again that they are competent to take care of themselves and that without the protection of these greatly worried gentlemen from Georgia, Ohio, South Carolina, Missouri, and Maine.

Neither the American people nor the young men of this country need guardians. They do not need the protection and guidance of the professional prohibitionists to make them better men. Mr. Chairman, because a small percentage, or perhaps one-twentieth of 1 per cent, of our men take at times a little more than they should, that does not signify that 99 per cent of the American citizens who do not so indulge, but who are used to mild drinks and beverages, such as wines and beers, should be denied that right and privilege. Why should a majority, or even a minority, capable of self-control, suffer for the acts and indiscretions of others and be denied their constitutional right and privilege to indulge in these beverages to which they are accustomed and which they use moderately.

Mr. Chairman, we are to-day fighting for democracy. We maintain that our cause is the cause of democracy, and yet at the same time you are endeavoring and trying to destroy the personal liberty for which democracy stands. Now, Mr. Chairman, I am not going to call attention to the millions of dollars that will be lost in revenue not only to our Government, but to our municipalities and States as well, as this has been placed before you by others, but I do desire to call your attention to the fact that out of the 100,000 men who have enlisted in the last three months the greater percentage of them have come from sections of the country where there is no prohibition.

Great Britain, France, Italy, Belgium, yes, Germany as well, provide wines and beer for their men at the front, and the new Russian Republic is doing likewise. Why should we then set ourselves above the experience of our allies? In addition to that, I say to you it is manifestly unfair and it is wrong to deprive the laboring man, working the entire day in a mill, factory, or shop, of a glass of beer, which to him is a stimulant.

I am not going to say that you are not honest. I concede that you are honest in advocating prohibition, that you believe in what you preach, but somehow or other you have not had the experience and you have not desired to secure the proper light. You take the statements and figures of professional prohibitionists who will not stop at anything to secure prohibition. [Applause.]

If those professional advocates, who have the facts, be honest, they would admit that prohibition does not prohibit. That you can get all of the liquor that you want in every prohibition county and State is well known. Several gentlemen have stated that by adopting this measure the price of whisky will increase 500 per cent, in spite of the fact that people residing in prohibition districts already pay as much as $1 for a flask and $5 for a quart. This clearly demonstrates that the people are able to procure it, and Mr. Chairman, they will continue to secure it regardless of any law you may pass. Why, then, pass a law that you know will be violated?

To prohibit the manufacture of beer in this country would merely mean that 70,000,000 bushels of barley, corn products, and rice will be shipped to Europe, manufactured into alcoholic liquors, and reshipped to this country for sale. This will mean that the United States Government will be deprived of the large revenues without satisfying the demands of our professional prohibitionists. Is there wisdom in such legislation?

I ask all of you gentlemen to consider carefully before you cast your vote on this important question. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUTCHINSON. Mr. Chairman, I yield three minutes to the gentleman from Massachusetts [Mr. DALLINGER].

Mr. DALLINGER. Mr. Chairman, my colleague from Illinois [Mr. SABATH], who has just finished, is apparently somewhat excited. I wish to call his attention to the fact that all government, including government by consent of the governed, is a surrender of personal liberty. I also wish to call his attention to the fact that this Congress has already prohibited the sale of any kind of alcoholic beverage to its soldiers and sailors, the men who are fighting the battles of their country. And why?

Mr. SABATH. Will the gentleman yield?

Mr. DALLINGER. No; I decline to yield—because in order to fight any battle it is necessary to have men free from alcoholic poison. Why, we all know that when we have athletic contests between Harvard and Yale, or between Brown and Dartmouth, or between the University of Virginia and some other college, these men go into training, as we call it, and they are not allowed any alcoholic stimulants. Why? In order that they may be the most efficient; and here, Mr. Chairman, we are fighting for our existence as a nation—we are fighting for the safety and continuance of democracy in the world—and if there ever was a time when the men of this country everywhere, those who fight at the front and those who remain at home, should be most efficient it is now.

Now, something has been said about Great Britain. One of the reasons why Great Britain has not accomplished more in this war is because her government has refused, at the request of the very best people of the nation in every walk of life, to prohibit the liquor traffic as a war measure. That refusal has resulted in the expenditure of over $2,000,000,000 of wealth and treasure that was needed for food, for clothing, for munitions—in short, for everything needed to make the nation efficient—for something that has tended to break down the vital powers of the people of Great Britain and make that great nation less efficient in this great struggle for its existence. We certainly do not wish to follow her example——

Mr. SABATH. Will the gentleman yield?

Mr. DALLINGER. On the contrary, we wish to take advantage of her mistakes and not make the same mistakes but to conduct this war with the utmost efficiency.

Now, a very large majority of the people of this country, no matter how they feel upon the question of prohibition in time of peace, are in favor of prohibition during the continuance of this war. Until to-day the opponents of war prohibition have been able by parliamentary rulings to prevent the issue from coming before this House. Finally in the Barkley amendment we were given the opportunity to vote squarely on the question of prohibiting the further use of foodstuffs which will be necessary within the next year to keep our people from starving, in the manufacture of alcoholic beverages. Certainly no Member of this House who really believes in conserving the food supply of our country in this great crisis can oppose such a provision of law, and I am glad that the House has so voted. I rejoice that I have had the privilege to-day to vote for the Barkley amendment and shall have the privilege of voting against the Lenroot amendment which greatly weakens the prohibitory feature of the section as amended. I shall then vote for the Webb amendment authorizing the President to requisition all existing stocks of distilled spirits for munition purposes, to the end that the resources of this great Nation in the great struggle in which we are engaged may be conserved in the most efficient manner. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANDLER of Mississippi. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. KELLY].

Mr. KELLY of Pennsylvania. Mr. Chairman, I feel that there is an object lesson for every Member of this House in the situation in which we find ourselves. It appears, for instance, that parliamentary hocus-pocus which is used so often on proposals to deal with the liquor question sometimes gets those who are responsible into a labyrinth from which they can find no clue to escape.

I am glad to see this battle royal between the whisky and beer interests and I do not care which side wins. I believe that both the distillers and brewers of America should be prohibited from destroying foodstuffs in the manufacture of intoxicants during the conduct of this war.

[A colloquy here occurred between Mr. KELLY of Pennsylvania and Mr. MEEKER which was subsequently ordered stricken from the RECORD.]

Mr. MOORE of Pennsylvania. Mr. Chairman, I demand that the words be taken down.

The CHAIRMAN [Mr. MONTAGUE]. The gentleman demands that the words just spoken be taken down.

Mr. COADY. I also demand that the words that the gentleman from Pennsylvania used concerning the chairman of the committee be taken down, wherein he reflected on the Chairman of the Committee of the Whole.

Mr. KING. Mr. Chairman, I raise a point of order on the last motion, that it is too late.

The CHAIRMAN. The Chair thinks not. The words of the gentleman from Missouri [Mr. MEEKER] will be taken down and the words of the gentleman from Pennsylvania [Mr. KELLY] will be taken down. In the opinion of the Chair they constitute one transaction, with no intervening business.

Mr. SABATH. Mr. Chairman, there is no request on the part of anybody to take down the words of the gentleman from Missouri.

The CHAIRMAN. Then the Chair was in error in that particular.

Mr. SABATH. He did not refer to any one Member or designate any one Member.

The CHAIRMAN. The words of the gentleman from Pennsylvania will be taken down.

Mr. KING. I desire to raise a point of order, if I can get the ear of the Chairman.

The CHAIRMAN. What is the point of order?

Mr. KING. The point of order is that the demand for the reading of that part of the words uttered by the gentleman from Pennsylvania referring to the Chairman this afternoon came too late.

The CHAIRMAN. The Chair has heretofore ruled that he did not think so.

Mr. RANDALL. Mr. Chairman, I ask that the words of the gentleman from Missouri [Mr. MEEKER] be taken down.

Mr. SABATH. That would come too late. Business has intervened since the time the gentleman made his speech.

The CHAIRMAN. The Chair is of opinion that they are all interlocking colloquies, that they constitute one transaction, that no business has intervened, and they should be taken down.

Mr. SABATH. The gentleman from Missouri still believes what he said.

Mr. CALDWELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CALDWELL. What are we waiting for?

The CHAIRMAN. We are waiting for the words to be transcribed by the Official Reporter.

Mr. CALDWELL. Have they not been taken down by the Official Reporter?

Mr. MOORE of Pennsylvania. Those words have to be reported to the House, as I understand it.

Mr. GILLETT. Mr. Chairman, I recollect that the procedure is that they are first read at the desk in committee. Now, Mr. Chairman, for the sake of the good order and reputation of the House, I suggest that both the gentlemen withdraw their language.

Mr. MEEKER. I want to say to the gentleman from Massachusetts that what I said will never be withdrawn, and no man can refer to me in that way.

Mr. MOORE of Pennsylvania. I make the point of order that this conversation is not in order.

The CHAIRMAN. The Chair rules that it is not in order. The words will be read at the desk as soon as they are transcribed. The Clerk will read the words of the gentleman from Missouri [Mr. MEEKER].

The Clerk proceeded to read the language excepted to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I think the proper procedure now is for the committee to rise, so that this language used may be reported to the House.

Mr. LANGLEY. Mr. Chairman, I think that there ought to be some more words read. The words read do not explain the whole thing to the House.

Mr. MOORE of Pennsylvania. The words read are substantially the words spoken, so far as reported.

Mr. LANGLEY. I know; but the remarks leading up to it ought to be included.

Mr. COADY. Mr. Chairman, I insisted a few moments ago on certain other utterances of the gentleman from Pennsylvania being taken down.

The CHAIRMAN. The Chair ruled that they should be taken down.

Mr. COADY. They have not all been read.

The CHAIRMAN. They have not yet been transcribed.

Mr. KELLY of Pennsylvania. Mr. Chairman, I am perfectly willing to withdraw my remarks concerning the Chairman. In the zeal of debate I admit they may not have been seemly.

Mr. COADY. Does the gentleman admit the statement is an untrue statement?

Mr. KELLY of Pennsylvania. No; I do not.

Mr. COADY. Then, I insist that the words shall be taken down.

Mr. BARKLEY. Mr. Chairman, if a man withdraws his own remarks it is not necessary to take them down.

The CHAIRMAN. The gentleman can not withdraw them without the unanimous consent of the committee.

Mr. MOORE of Pennsylvania. Mr. Chairman, I shall object to any unanimous-consent request until these words are reported in the regular way to the House.

The CHAIRMAN. If the gentleman from Pennsylvania will indulge the Chair, he did not hear him in the confusion.

Mr. MOORE of Pennsylvania. I say, I object to unanimous consent until the regular procedure is followed, which is to report the proceedings to the House.

The CHAIRMAN. The committee will be in order until the words requested have been reported.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, pending the reading of the words, it seems to me that not enough has been reported to show the whole meaning of them. It seems to me that we should have more of the controversy. More of the statements, perhaps, of both gentlemen are necessary in order to know the full bearing of the words reported.

Mr. MOORE of Pennsylvania. The Chair has ruled that certain other words not yet reported shall be taken down. We are waiting now until those words shall be written out. I object to intervening proceedings until we have those statements read.

The CHAIRMAN. The Clerk will report the remarks of the gentleman from Pennsylvania [Mr. KELLY] that were taken down. The Clerk will read the entire remarks, so that the committee may understand them.

The Clerk resumed the reading of the language excepted to.

Mr. VENABLE. Mr. Chairman——

Mr. MOORE of Pennsylvania. Regular order!

The CHAIRMAN. The gentleman from Mississippi is recognized.

Mr. VENABLE. According to my recollection, Mr. Chairman, there is a portion of the remarks of the gentleman from Pennsylvania which has not yet been read, which was to this effect, as I recall——

The CHAIRMAN. The Chair will state to the gentleman from Mississippi that the words are not debatable now.

Mr. VENABLE. They have not been read, however, and I merely call attention to that fact in order that they may be read.

Mr. LANGLEY. That is part of the res gestae and ought to be included.

Mr. HOWARD. I think that is what brought about this controversy.

The CHAIRMAN. The Chair recognizes the gentleman from Mississippi [Mr. VENABLE], who has the floor.

Mr. VENABLE. My attention is called to the fact that the Reporters have not yet had time to write out all the words.

The CHAIRMAN. The Chair will say to the gentleman that it is not his duty to report or verify the words objected to. The Chair must direct to be read as written.

Mr. QUIN. Mr. Chairman, the gentleman from Pennsylvania [Mr. KELLY] withdrew his remarks, and also——

The CHAIRMAN. The gentleman from Pennsylvania can not withdraw his remarks without unanimous consent, which has not been given.

Mr. LEVER. Mr. Chairman, I move that the committee rise.

Mr. HAMILTON of Michigan. I suggest that all the words which are objected to ought to be read.

Mr. VENABLE. The Reporters have not yet completed the writing out of the words.

The CHAIRMAN. The Chair will say to the gentleman from Michigan that the exact words have been read as far as they have been transcribed.

Mr. LANGLEY. But they have not all been read.

Mr. MOORE of Pennsylvania. Mr. Chairman, I understand we are waiting for the remainder of the words to be written out.

The CHAIRMAN. The committee will come to order. The words have now been written out by the reporter.

Mr. LEVER. Mr. Chairman, I ask that the words be reported.

The CHAIRMAN. The Clerk will report the words that were objected to and requested to be taken down.

The Clerk read the words.

Mr. MOORE of Pennsylvania. Mr. Chairman, now that the language has been read, I understand that the committee automatically rises and reports the words to the House.

The CHAIRMAN. That is correct.

The committee accordingly rose; and Mr. HOUSTON having taken the chair as Speaker pro tempore, Mr. MONTAGUE, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 4961 certain words used in debate were objected to, and the demand made that they be taken down, that they were so taken down and read at the desk to the committee, and he now reported the words to the House.

The SPEAKER pro tempore. The Chairman of the Committee of the Whole House on the state of the Union reports that during the debate certain words were uttered which were objected to, and demanded to be taken down, which words have been taken down and are now reported to the House.

Mr. KITCHIN. I move to strike from the RECORD all the words read by the Clerk, wherever they occur. That ought to end this thing, and everybody ought to be satisfied.

Mr. GREENE of Vermont. A parliamentary inquiry. Have those words been reported to the House? They have been reported to the committee, but not to the House.

The SPEAKER pro tempore. They were reported to the committee, but they have not been reported to the House.

Mr. MOORE of Pennsylvania. I ask that the words be reported to the House.

The SPEAKER pro tempore. The Clerk will report the words.

Mr. MOORE of Pennsylvania. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. MOORE of Pennsylvania. I rise for the purpose of asking that the rule be read which covers this situation.

The SPEAKER pro tempore. The first question before the House is the reporting of the words taken down. That has been asked for, and the words have not been reported to the House.

Mr. MOORE of Pennsylvania. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. MOORE of Pennsylvania. The Chair is familiar with the rule on this subject. Is it proper for those concerned in this controversy to remain on their feet while the discussion is going on?

The SPEAKER pro tempore. It is not. The rule provides that when the words are ordered to be taken down the Member called to order shall take his seat.

Mr. MOORE of Pennsylvania. Then I ask for order.

The SPEAKER pro tempore. Let the parties whose words are in question take their seats.

Mr. OVERMYER. Mr. Speaker, I ask unanimous consent that the reporting of the words be dispensed with.

Mr. COADY. I object.

The SPEAKER pro tempore. The Clerk will report the words taken down.

The Clerk read the words complained of.

Mr. KITCHIN. Mr. Speaker, I move to strike from the RECORD what the Clerk has just read, and on that motion I ask the previous question.

The SPEAKER took the Chair.

The SPEAKER. The gentleman from North Carolina moves to strike from the RECORD the language read, and on that he demands the previous question.

Mr. HAMLIN. Mr. Speaker, I would like unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. KITCHIN. And after that I give notice that I shall demand the previous question.

Mr. KELLY of Pennsylvania. Mr. Speaker, I ask to address the House for one minute.

A MEMBER. I object.

The SPEAKER. Does the gentleman from Missouri desire to address the House for two minutes?

Mr. GARNER. Reserving the right to object, may I suggest to the gentleman from Pennsylvania and also the gentleman from Missouri that they refrain from making any remarks until we vote on this proposition. Then they can discuss the matter. I think that it is better to accept the motion of the gentleman from North Carolina to strike out the remarks.

The SPEAKER. The gentleman from North Carolina moves the previous question on his motion.

Mr. MOORE of Pennsylvania. I make the point of no quorum.

The SPEAKER. The gentleman from Pennsylvania makes the point of no quorum, and the Chair will count. [After counting.] Two hundred and thirty-two Members present, a quorum. The question is on the motion of the gentleman from North Carolina on the previous question.

The previous question was ordered.

The SPEAKER. The question now is on the motion of the gentleman from North Carolina to strike out the words reported.

The question was taken; and on a division (demanded by Mr. MOORE of Pennsylvania) there were 183 ayes and no noes.

Mr. MOORE of Pennsylvania. Mr. Speaker, I make the point that no quorum is present.

Mr. FOSTER. The Chair has just counted a quorum.

The SPEAKER pro tempore. The Chair will count. [After counting.] Two hundred and twenty-six Members present, a quorum, and the motion of the gentleman from North Carolina is agreed to.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4961.

The motion was agreed to.

Accordingly, the House resolved itself into Committee of the Whole House on the state of the Union.

Mr. HAMLIN resumed the chair. [Applause.]

Mr. KELLY of Pennsylvania. Mr. Chairman, I believe there are four minutes remaining to me.

Mr. GILLETT. Mr. Chairman, I make the point of order that the gentleman is not entitled to the floor.

Mr. BARKLEY. I move that the gentleman from Pennsylvania be allowed to proceed in order.

The CHAIRMAN. The gentleman from Kentucky moves that the gentleman from Pennsylvania may be allowed to proceed in order.

Mr. SHERLEY. Mr. Chairman, I make the point of order that that motion can not be made in Committee of the Whole.

The CHAIRMAN. The point of order is sustained.

Mr. BUTLER. Does the Chair mean to hold that in Committee of the Whole that motion can not be made? I know that when I was presiding in Committee of the Whole the motion was made by the gentleman from Pennsylvania, Mr. Dalzell.

The CHAIRMAN. The Chair thinks that when words objected to have been taken down and the committee has risen and reported the same to the House, the matter has passed out of the control of the committee, and he does not think a motion of that kind can be entertained when the committee resumes its sitting. It might be different if the whole matter had not been referred to the House.

Mr. HEFLIN. Mr. Chairman, I suggest that there will be no objection to the gentleman proceeding. [Cries of "Regular order!"]

Mr. LEVER. Mr. Chairman, I understand that the gentleman has four minutes remaining of his time.

The CHAIRMAN. The gentleman from South Carolina and the gentleman from Iowa control the time. Either one can yield to whomsoever he pleases.

Mr. LEVER. Mr. Chairman, I yield four minutes to the gentleman from Pennsylvania [Mr. KELLY].

Mr. KELLY of Pennsylvania. Mr. Chairman and gentlemen of the committee, before proceeding further on the line of the argument that I started to make, I desire to say that I have been trying to accelerate the passage of this bill in every way possible, and I regret exceedingly this waste of time has occurred. I also desire to say to the Chairman of this committee, for whom I have the highest regard and respect, that I intended in no way to make any disrespectful allusion to him. [Cries of "Oh!"] Mr. Chairman, I demand order. The Chairman of the committee stated that he prepared his opinion yesterday—an historical fact and a perfectly proper proceeding. He made the statement, and I repeated it——

Mr. STAFFORD. Oh, the gentleman does not wish to make a misstatement. Will the gentleman yield?

Mr. KELLY of Pennsylvania. I do not yield.

Mr. STAFFORD. The gentleman is making a misstatement.

Mr. KELLY of Pennsylvania. I do not yield.

Mr. TILSON. Mr. Chairman, I rise to a point of order. The gentleman is not addressing himself to the matter before the House.

Mr. KELLY of Pennsylvania. I was taking my own time to make a statement.

The CHAIRMAN. The gentleman will proceed in order.

Mr. KELLY of Pennsylvania. I was using my own time to make a statement, but I am perfectly willing——

Mr. HAMILTON of Michigan. Mr. Chairman, I rise to a point of order—a parliamentary inquiry.

The CHAIRMAN. The gentleman can not take the gentleman from Pennsylvania off his feet by a parliamentary inquiry.

Mr. HAMILTON of Michigan. I make a point of order. Inasmuch as the language to which the gentleman is referring has been stricken out by order of the House, is the gentleman in order now in proceeding to discuss that language?

Mr. KELLY of Pennsylvania. The gentleman can not take me off my feet for an inquiry of that kind.

The CHAIRMAN. The gentleman was yielded time by the gentleman from South Carolina, and the Chair thinks——

Mr. HAMILTON of Michigan. Mr. Chairman, I make the point of order. Whether the gentleman had time yielded to

him or not, the question is, Shall he be permitted to discuss language which forms no part of the RECORD, which was stricken from the RECORD? The question is whether he should not discuss the matters before the House.

The CHAIRMAN. The Chair admonishes the gentleman from Pennsylvania to confine his remarks to the amendment.

Mr. KELLY of Pennsylvania. I shall do so. I desire to read——

Mr. ELLSWORTH. Mr. Chairman, will the gentleman from Pennsylvania yield for a question?

Mr. KELLY of Pennsylvania. I do not yield. I desire to read a telegram which I received this morning from one of the leading labor-union men in my city of Pittsburgh. There have been many complaints made in the consideration of this section 13——

Mr. LAGUARDIA. Mr. Chairman, will the gentleman from Pennsylvania yield?

Mr. KELLY of Pennsylvania. No; I do not yield to anyone. The statement has been made regarding——

Mr. ELLSWORTH. Mr. Chairman, will the gentleman from Pennsylvania yield for a question?

Mr. KELLY of Pennsylvania. I do not yield to anyone.

Mr. HEFLIN. Mr. Chairman, I do not think the gentleman ought to be interrupted in this fashion. [Cries of "Regular order!"]

The CHAIRMAN. The committee will be in order. The gentleman from Pennsylvania has the floor.

Mr. KELLY of Pennsylvania. Mr. Chairman, I desire to state that I do not yield until I have finished. A question has been brought up in the consideration of this measure a number of times regarding the position of workingmen on war-time prohibition, and I desire to quote a telegram which was sent to me this morning from one of the leading union officials of Pittsburgh, and he states his position clearly.

Mr. Chairman, this telegram is from Andrew T. McNamara, business agent for the Pittsburgh district of the International Association of Machinists. I append it herewith:

Hon. M. CLYDE KELLY,
House of Representatives, Washington, D. C.:

I have been an officer in the machinist union for the greater part of the past 15 years. In this period I have been unalterably opposed to the liquor interest in all campaigns and elections. My position has been well known to the members of the machinists' organization, and they have unfailingly elected me to every position for which I have been a candidate. Thus, I maintain that the true sentiment of the workers in our organization is identically with my own position, and in a measure reflects the general sentiment of all trade unionists. When nominated for the office of business agent of the Pittsburgh machinists I made this statement, that if elected the office of the business agent must be removed from over the saloon where it was then located. This made a clear and well-defined issue between the drys and wets in the machinists' union. On this issue I was overwhelmingly elected. The office has been removed from over the saloon and never since returned to a building where intoxicating liquors are sold. My election and the moving of the office from the proximity of a saloon shows the trend of thought in the labor movement on the liquor question.

ANDREW T. MCNAMARA.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. LEVER. Mr. Chairman, I ask the gentleman from Iowa to use some of his time.

Mr. HAUGEN. Mr. Chairman, I yield one minute to the gentleman from Kentucky [Mr. LANGLEY].

Mr. LANGLEY. Mr. Chairman, I had a little speech canned up here a while ago [laughter] that I was scheduled to deliver immediately, but owing to all of this belligerency and excitement that have intervened I am very much afraid that I have so far forgotten what I was going to say that the House will have to lose the best part of it. [Laughter.] I will say this, however, that in my judgment there are two things just as certain as death and taxes, and they are national prohibition and universal woman suffrage in this country [applause and laughter], and you fellows who have been losing your temper and scrapping here this afternoon might just as well keep in a good humor, as I do, and prepare yourselves for the inevitable. [Applause.] But I can not refrain from saying that this proposition is a many-sided and very far-reaching one to be brought up and acted upon in this hasty fashion, and I trust that these vast powers may be exercised with conservatism and due regard for the rights and vital interests of all of the people which they involve. [Applause.]

Mr. HAUGEN. Mr. Chairman, I desire to yield five minutes of time to the gentleman from New Jersey [Mr. PARKER].

Mr. PARKER of New Jersey. Mr. Chairman, my motion is to strike out, and I desire very much that the paragraph should be perfected before I make my motion.

The CHAIRMAN. By agreement, the Chair will state, all amendments can be pending and be voted upon at the close of debate.

Mr. PARKER of New Jersey. But, Mr. Chairman, I can not discuss my amendment until the paragraph has been perfected and I know what to strike out.

Mr. HAUGEN. Mr. Chairman, I yield five minutes to the gentleman from Michigan [Mr. MCLAUGHLIN].

Mr. MCLAUGHLIN of Michigan. Mr. Chairman, I think I shall not use the five minutes. I voted for the amendment offered by the gentleman from Kentucky, which may be called a prohibition amendment. I am not in favor of the amendment offered by the gentleman from Wisconsin [applause], because it is a halfway prohibition proposition. His amendment would prohibit the making of alcohol or alcoholic liquors by the use of wheat, corn, rye, or rice in the making of whisky and permit the use of barley in the making of beer. I would go the whole hog or none on this prohibition proposition. There is and for years has been a controversy between the brewers and the distillers, each trying to get the advantage of the other. I sympathize with neither. If by this bill we are to lay the heavy hand of the law upon the business of one we should lay hold upon the business of the other also. I would not play favorites. It is urged by the gentleman from Wisconsin [Mr. LENROOT] that his amendment ought to be adopted because there are 300,000,000 gallons of whisky now in bond, and if this bill, when it becomes a law, prohibits the use of grains and other foodstuffs for making an additional supply of whisky, the whisky now in bond would be sold at very high prices, and this country would go to a whisky-drinking basis, a condition in which there will be no beer and everyone wishing to drink liquor must drink whisky. I want the committee to know that Mr. WEBB has an amendment which I believe will meet the approval of the House. There has been such indication of sentiment toward his proposal that I am safe in saying that, as a separate section, it will be held to be in order, and if put up to the House will be adopted. Mr. WEBB's amendment would provide for the commandeering and the redistilling of whisky in bond, and if adopted would meet the entire situation, I believe. Now, I have an amendment to offer. I have not before me the amendment offered by the gentleman from Wisconsin [Mr. LENROOT], but I would move to add "barley" to his amendment, so that it will read "wheat, corn, rye, barley, and rice." That will make it real prohibition. If we are going to enter upon prohibition at all let us have the whole thing. Let us not stand here as the particular enemy of whisky and as the particular friend of beer.

Mr. HAUGEN. I yield five minutes to the gentleman from Wisconsin [Mr. LENROOT].

The CHAIRMAN. The Chair would like to call the attention of the gentleman from Michigan to the fact that the Chair thinks his amendment would be an amendment in the third degree. There is an amendment pending to the amendment of the gentleman from Wisconsin.

Mr. LENROOT. Might I suggest, Mr. Chairman, it would not be in the third degree, because they are separate amendments, and permission has been given to have all amendments pending.

The CHAIRMAN. The Chair thought it was offered as an amendment to the gentleman's amendment——

Mr. LENROOT. It is; but that would only make it an amendment in the second degree.

Mr. LEVER. I yield five minutes to the gentleman from Missouri [Mr. DECKER].

Mr. DECKER. Mr. Chairman and gentlemen of the committee, I voted for the Barkley amendment, and I am opposed to the Lenroot amendment. The Lenroot amendment simply raises a question in this House between whisky on the one hand and beer and wine on the other. I do not expect to change the opinion of any man in this House as to the effect of alcohol upon the human race, but I do desire in the brief space allotted to me to put before the committee, if I can, what the effect of this amendment is. As the amendment of Mr. BARKLEY passed the House, foodstuffs in the United States can not be used to manufacture alcohol for beverage purposes, whether it be wine or whisky or beer. If the Lenroot amendment prevails, you can not manufacture alcohol for whisky, but you can use it for beer and wine. Now, gentlemen of the committee, the proposition is simply this: If you and the people you represent do not favor using foodstuffs during this war to make beer and wine and whisky, then vote against the Lenroot amendment. If you want foodstuffs to be used to make wine and beer but not whisky, vote for the Lenroot amendment.

If you are against alcoholic beverages, vote against the Lenroot amendment and let the bill stand as it now is. There are men in this House who believe that the passage of this section will conserve the manhood of this country. Carlyle has said that "We refine sugar and shape steel and mold pottery, but

to refine, to strengthen, to mold a human life too seldom enters into our estimate of advantages." If you believe this means the conservation of the manhood of our country, and your people believe it, then vote against the Lenroot amendment, and let the Barkley amendment stand as it now is with an amendment which he will offer. He will offer an amendment which is now pending, which provides that alcohol can be manufactured for governmental, industrial, sacramental, medicinal, and scientific purposes. The question is up to the House this afternoon, booze or no booze. I impugn the motives of no man, but I appeal to every man to vote the convictions of himself and the people whom he represents. [Applause.]

I believe this means conservation of manhood. It will also conserve the food of this country. They say that it will not save much food; but if it saves any, it is that much saved for the winning of this war.

Some men have said that these soldiers in Europe who are fighting the war are being fed rum and wine and beer. I do not know how you feel about it, but I hope if that is true it will not apply to the soldiers whom we send across the sea. Death from bullets is bad, death from disease is bad, but I do not know but that the fate of those who stay on the other side will be better than that of the boys who come home enslaved by alcoholism, as I am told is the case in Canada to-day among thousands who have returned from Europe.

I do not believe that beer and rum and wine are necessary to make American soldiers fight. If you believe it should be used for medicinal purposes on the battlefield, I remind you that the amendment of Mr. BARKLEY will provide for that. [Applause.]

By solemn enactment of this Congress we have already prohibited the use of alcoholic beverages by the soldiers of our country. If for the sake of efficiency we require those who defend our flag with their lives to refrain from the use of alcoholic beverages, is it asking too much for the sake of efficiency, food conservation, and victory to require that the people who stay at home shall also refrain from the use of alcoholic beverages?

Some say there is enough whisky in existence now to last two years, and that to prevent the future manufacture of alcoholic beverages would increase the use of whisky; but they forget that the Webb amendment, which follows, will allow the Government to commandeer all this for governmental purposes, such as munitions of war, hospital use, and so forth.

I am for this whole food-control bill. It will cause inconvenience and perhaps sacrifice, but I believe it is essential to the winning of the war.

I am for this section which prevents the use of foodstuffs for the manufacture of alcoholic beverages. It will conserve food and manhood. To many it may cause inconvenience and sacrifice, but I believe it will help to win the war. I also believe that if it does cause sacrifice the great majority are ready, for the sake of victory, to make the sacrifice.

Mr. HAUGEN. Mr. Chairman, I yield two minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Chairman, I voted for the Barkley amendment when it was offered, and my only purpose in offering this amendment now is to promote the cause of temperance throughout the country. The gentleman from Michigan [Mr. MCLAUGHLIN] says that a subsequent section will be offered that will mean prohibition of distilled liquor. The gentleman knows if that is held in order it will not be, under the ruling of the Chair, possible for the House to make a prohibition of distilled liquors, but will merely give the President discretion to commandeer the distilled liquors of this country. And the gentleman knows, as every Member of the House knows, that in all human probability if the President is given that power it will not be exercised.

The gentleman from Missouri [Mr. DECKER] talks about the soldier. It is the soldier I am interested in by offering this amendment. If you are going to permit the sale of any intoxicating liquor in this country during this war, I do not want it limited to whisky. And it will promote the cause of sobriety, if we are going to have the sale of any intoxicating liquor, to permit the soldier to buy beer and light wines rather than to buy whisky only.

Mr. HAUGEN. Mr. Chairman, I yield four minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, the prohibition amendment adopted this afternoon places a premium upon whisky and whisky drinking in this country, and no one who votes for that and supports it can go before the country unless he approves whisky as the beverage of this country. There are in the bonded warehouses of this country 250,000,000 gallons available for use, and no amendment that will be adopted here to-day will take away that great quantity for consumption in this country. With something over 100,000,000 gallons being consumed yearly, the quantity in storage furnishes a supply for more than two years, the probable duration of the war. But beer and light wines would be prohibited entirely, as they could not be manufactured, and there is no appreciable supply, at least of beer, for any long period of time.

The advocates of this strict confiscatory measure would have you believe that this amendment is for protection of the soldier. We have already passed legislation throwing a protecting cloak around the soldiers and sailors, so far as they are concerned. You can not fool the people in that way. Every Army officer who has ever investigated this subject has advocated the establishment and the continuance of the canteen, because it tended to sobriety and temperance. They believed that light wines and beer furnished to the soldiers were to their best interest, rather than the strong and oftentimes vile liquors sold without restriction outside the Army post.

Again, the barley that is used in the manufacture of beer is not used to any large extent for foodstuffs. With this prohibition of the use of all cereals in the manufacture of any kind of alcoholic beverages the crop of barley now growing will largely be wasted. With its use for brewing beer prohibited, the farmer in many instances will have to sacrifice his crop.

When you consider further the small percentage of grain used in the manufacture of beer, about 1 per cent of the total yield, and much of this returned in the form of feed after using, the claim that it is to conserve the food supply is far-fetching and without much merit.

You can not in an instant transform those portions of the country which believe in liberal laws and liberal ways into communities conforming to a strict Puritanical order. Even though we are at war, even though we are willing to conserve the foodstuffs for the benefit of the people of this country and of the allies, we should still remember that the welfare and the good feeling and the good temper of the people of this country should be considered. Take the case of the laboring men, the men working in grime, in the foundries. Water does not appease the thirst those men have. You can not deprive them of their appetite for beer and light wines, to which they are habitually accustomed. If you are going to say to them that they will be deprived of light wines and beer and compelled to take instead whisky, you increase intemperance. You force them into habits that they have not heretofore acquired, and you establish an order of drunkenness rather than an order of temperate living.

The amendment offered by my colleague should be adopted, because it tends to sobriety. It permits the continuation of the manufacture of beer. In Denmark and Sweden and other countries whose people are addicted to strong drink, the governments have established public places for the vending of light wines and light beer.

It is easy for the people in the privacy of their homes to erect private stills. It does not take much machinery to manufacture their quota of whisky and hard liquor. But it does take quite an establishment to manufacture beer, and all statistics confirm the statement that beer tends to sobriety.

You are going to confiscate $250,000,000 worth of property at one fell swoop when there is no urgent demand for it, when there is no showing that it will conserve the food supply of the United States. Are you going to create in the minds of the people the idea that you are indulging in hysteria? Are you going to say to the people that you will allow the shipment of grain to foreign countries without limitation as to its use, where it can be used in the manufacture of all kinds of alcoholic drinks, and deprive our own communities of it, where they control it in a sane and sensible way? The country will not approve of such a method, whereby you allow strong liquor to be continued and place a bar upon the use of light wines and beer.

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. KEARNS. I want to ask the gentleman this question: If grain should be shipped from this country to another country and manufactured there into alcohol, is there anything in this law or any other law to prevent its being shipped back to this country in the shape of alcohol or alcoholic drinks?

Mr. STAFFORD. That is possible. Who will favor such a policy of allowing our people, accustomed to the use of wine and beer, to be deprived of those beverages for the benefit of people in foreign countries, where they will be privileged, without any limit upon them, to consume those beverages made from our cereals at our expense? It is almost unthinkable. No proposal could be more unfair than to unleash for the next two years the two-year supply of whisky stored in bonded warehouses and at the same time to stop the sale of beer and

light wines which this amendment proposes. The American public will not stand for the substitution of whisky for beer, for a policy that will increase intemperance by banning beer and foisting in its place whisky.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. LEVER. Mr. Chairman, I yield 15 minutes to the gentleman from Kentucky [Mr. BARKLEY].

The CHAIRMAN. The gentleman from Kentucky is recognized for 15 minutes.

Mr. BARKLEY. Mr. Chairman and gentlemen of the committee, I trust this amendment will not be adopted, notwithstanding my great admiration for the gentleman who offered it [Mr. LENROOT]. But if this amendment is adopted, it will absolutely nullify the amendment that was adopted by the House this afternoon.

If the gentleman from Wisconsin had offered an amendment at the end of the section, providing that this prohibition should not apply to the manufacture of beer and wine, it would have accomplished the thing he seeks to accomplish by inserting the words "wheat, corn, rye, and rice."

Mr. SIMS. Would you favor such an amendment?

Mr. BARKLEY. I would not favor such an amendment. The gentleman has stated that if that amendment is left just as it is now it will allow the consumption of the whisky now in existence; but if the amendment of the gentleman from Wisconsin is adopted, it will allow the use of all the beer and light wines that can be made, and therefore there will be all the beer and all the whisky both that men want to consume, and the situation will not be remedied in any particular.

Now, as I stated in the debate this afternoon, an amendment will be offered that will take care of the situation with respect to the whisky in bonded warehouses, and the reason why we will not have an opportunity to vote upon the amendment to absolutely prohibit the sale of liquor already made is on account of the parliamentary situation that prevents us from getting such an amendment as that before the House.

I agree that if this is wise as a food-conservation measure the amendment of the gentleman from Wisconsin ought not to be adopted, because there is no reason for conserving the food products that go into the manufacture of whisky and not conserving those that go into the manufacture of beer. It is claimed that barley is not used as human food. It is not used as human food to any great extent in the United States, but it takes less barley than it does corn to create 100 pounds of hog meat, and we can utilize the barley instead of corn in feeding swine and utilize the corn in feeding our own people and those of our allies. [Applause.]

I not only favor stopping the manufacture of intoxicating liquor of all kinds, but I favor stopping its sale. We have very properly provided that it shall be unlawful to sell liquor to our soldiers and sailors. I know of no reason why the same rule should not apply to all the people. [Applause.]

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. HAUGEN. I yield two minutes to the gentleman from Oklahoma [Mr. MORGAN].

Mr. MORGAN. Mr. Chairman, I am opposed to the Lenroot amendment. I would have voted for section 13 as it was in the bill. I voted for the Barkley amendment, because I thought that improved it. I shall vote against the Lenroot amendment, because I think that does not improve it. I am a prohibitionist. I am in favor of national prohibition, State prohibition, county prohibition, and township prohibition. And yet, Mr. Chairman, I would not be for prohibition in this emergency unless I thought it would contribute to the safety of this Nation and aid us in winning a victory. If I remember aright, Abraham Lincoln during the Civil War placed the preservation of the Union above everything else, and he said something like this, that he would preserve the Union either with or without slavery. So I would win a victory for the United States and her allies, either with prohibition or without prohibition, and I believe that the provisions of this section with the Barkley amendment will aid us in achieving a victory. [Applause.]

Mr. HAUGEN. I yield five minutes to the gentleman from New Jersey [Mr. PARKER].

Mr. LEVER. I also yield five minutes to the gentleman from New Jersey.

The CHAIRMAN. The gentleman from New Jersey [Mr. PARKER] is recognized for 10 minutes.

Mr. PARKER of New Jersey. Mr. Chairman and my friends, I move to strike out this section. We can not tell what the section is going to be yet, because the vote has not been taken on these amendments. I wanted to speak after the votes had been taken, but I am told that I must speak now.

Mr. GORDON. It is section 13.

Mr. PARKER of New Jersey. I know it is section 13, but what it will provide when the committee gets through with it we do not know. We do know one thing: It is an absolute need of this country that we should be united in this war. [Applause.] If this section, in whatever form it finally takes, creates as much dissension and as much of a row as it has made in this House, it will do harm in this Nation. We want to be united, and we do not want any such questions to trouble the people in a war measure. We are for union among ourselves and no one should throw an apple of discord among our people. [Applause.] Now a word or two about the bill. Section 13 as it originally stood was absolutely unnecessary. It gave the power to the President, if he thought brewing was a waste, to stop it. He had that power already under the bill. In section 3 we have provided for Government control of all necessaries, their production and consumption, whether in brewing or not. By section 4 we have made it unlawful to engage in any wasteful practice. If brewing be wasteful, the President already has the power to stop it. By section 5 we allow the President to license all food manufactures and operations, and allow only his licensees to work. He could refuse to license breweries, and under that section he could stop all wasteful practices. Everything that was in section 13 was in the previous parts of the bill, and that section was constitutional. Under the Constitution, when we declare war the management of that war does not belong to Congress. It belongs to the President, and we can only recognize his powers and provide money and means. I do not think we can limit his powers. I doubt whether we have a right to define them by this bill. I would have liked to have a resolution unanimously passed by this Congress that this Congress of the United States, in the present exigency, recognizes the power of the President of the United States to determine what should be done as to all articles and all industries all over this country for the winning of the war; to determine the military necessity, to determine what should be controlled, to determine what should be done. We have the right to pass such a provision, but Congress has no right to limit the power of the President in that regard, and it has no more right to act on its own behalf than it had before the war began.

The declaring of war does not extend the power of Congress. If Congress had no right to prohibit the distilling of liquor before the war, it has no right to prohibit it now. It has the right to recognize the military authority of the President to control all our operations if we are in a state of siege, but it has no right to declare a state of siege. That is the right of the Commander in Chief in command of the city or country that he may find in a state of siege. Congress has no power to prohibit brewing and distilling, nor has it the right to do as some of these amendments propose to do—and I voted for that amendment—to allow the brewing of beer and light wines and not allow the distilling of whisky. We have not this power in time of war because we are not judges of the military necessities; but it is the Commander in Chief, the general in command, who is the judge of those necessities as they change from time to time. The original bill recognized that. The section as now amended—it may be changed hereafter—not only prohibits the production of alcohol generally, which must be made in ten times greater quantity than before for war purposes, but it goes further. It puts great factories out of operation and thousands of workmen out of business. It may put discontent in the hearts of the men who are going to war. It may put discontent most of all in the hearts of the loyal Germans whom I know in my district, and in many other districts in the United States, who are enlisting and who are taking their share of the draft like all other true Americans, but who believe, from heredity and from practice, that they have the right to be temperate in the use of their mild beer and wine and that no man shall prohibit them in their lawful living. I know those men and what they think. I am not discussing temperance, however. It may be best for one man or another not to indulge. My dear friend, Chancellor Runyon, afterwards ambassador to Berlin, stopped drinking, but when we went to dinner at his house the glasses would be on the table, and they would be lifted to his lips and put down untouched. One day he told me that a Prohibitionist had come to him and wanted him to join the Prohibition Party. He said he did not think he could. The Prohibitionist asked him, "Don't you believe in absolute abstinence?" He said, "Yes; for myself." "Don't you believe in it for others?" "Yes; I have no doubt it may be good for others, but I do not try to control them. It is for their own consciences to decide."

"Well, if you believe in total abstinence why don't you join my party?" He said. "My friend, what have you got to say on the tariff?" and was told the party had nothing to say on

that. "What have you got to say on the question of greenbacks?" "We have nothing to say on that." Then he asked as to one or two more public questions, and then said, "My friend, I can not join your party. The interests and social complications in this country are so great, so many, and so varied that they can not be solved by the single issue of rum or no rum." [Applause.]

In this day, when we want our willing hosts to go forth to victory in the defense of our country, for God's sake let us not throw into the community a section of this bill that is so provocative of discord and also absolutely unnecessary, because the President has the power now. [Applause.]

Mr. HAUGEN. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. MEEKER].

Mr. MEEKER. Mr. Chairman, this measure as it now stands will probably go over from the House to the Senate, will mean to several millions of men and women of this country who are just as loyal, just as moral, just as well-to-do, just as patriotic, as any other group in this Nation—will mean to those millions of our people a straight insult from the American Congress. I want to say to the gentleman—he is not on the floor now—in reply to two or three suggestions made here, that with all the being that is within me I resent the insult to the American Nation that we are a Nation of drunkards or that our soldiers are drunkards. There is not a nation in Europe to-day in this war that is not providing in its rations alcohol of some sort. Europe last year took our malt and manufactured her brews, and the gentleman from Maine a little while ago was very unfortunate when he quoted from the Kaiser in regard to the use of alcohol. If going on the water wagon is all that Germany needs to win this war she would have been on the water wagon a long time ago.

But, even though we do not use these wines and liquors—and I do not and never have—I take a stein of beer occasionally, but I do not feel that my morals have gone down any when I do it, and I do not get behind the door to do it, and then come out and make a dry speech. [Laughter and applause.] But when we undertake to draw the line, either of morality or health or patriotism, as to whether a man or woman in this country, in their homes, by the million, some of whom are going to give their lives on the field of battle in Europe to save the cowardly hides of some men who are afraid to go, when we say those men shall not be permitted to use their drink as they choose, as we use the drink which we choose, I say it is hign time that the American soldier shall ask himself the question, For whose liberty do I now fight?

We are boasting of democracy, we are talking of a world-wide liberation of men; but in this motion this afternoon we are doing what was the last thing the Czar did before he was dethroned. We are now moving to the place that, in harmony with the spirit of despotism, finally destroyed the power of the Czar and threw him over; we, in the name of reform and with crocodile tears about the boys, are forcing upon the American Commonwealth a despotism worse in its nature than that exercised by the man driven from his throne. [Applause.]

Mr. LEVER. Mr. Chairman, I intend to move at the proper time to strike out all of section 13 as amended and to insert in lieu thereof the amendment which I send to the desk and ask the Clerk to read in my time.

The Clerk read as follows:

Strike out all of section 13 and insert a new section, as follows:

"SEC. 13. The President is authorized, whenever he shall find it essential to conserve food, food materials, or feeds, and to assure an adequate supply thereof, to find and determine and give public notice of the amount of such foods, food materials, or feeds that can be safely and economically used in the manufacture of alcohol, alcoholic or nonalcoholic beverages. Thereafter no person shall use any food, food materials, or feeds in the manufacture of alcohol, alcoholic or nonalcoholic beverages except under license issued by the President, and the President is authorized to make such rules and regulations governing the manufacture of alcohol, alcoholic or nonalcoholic beverages as will prevent the use of food, food materials, or feeds in such manufacture in excess of the amount determined by him to be safe and economical.

"Any person who shall use any food, food materials, or feeds in the manufacture of alcohol, alcoholic or nonalcoholic beverages without first obtaining a license so to do when a license is required, under this section, or who shall violate any regulations made under this section, shall be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both."

"That the President is authorized, if in his opinion it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government for use or redistillation such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies in so far as such use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcohol or distilled spirits for the purposes herein enumerated. Upon the failure of the person to comply with the President's requirement, the President is authorized to requisition and take possession of the alcohol and distilled spirits required to be turned over and to pay for same a just compensation to be determined by the President, and if the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such spirits or alcohol in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code."

Mr. BARKLEY. Mr. Chairman, I make the point of order on that.

Mr. LEVER. Mr. Chairman, I wish to say that I shall not offer this as an amendment to section 13 at all, but I shall offer it in my own time with the statement that if section 13 is voted out I shall offer this as a new section to the bill, and this is a solution of a very mixed proposition.

The CHAIRMAN. The Chair will not have to pass on that at the present time. All debate is exhausted under the agreement. The question now is on the amendment offered by the gentleman from South Carolina [Mr. STEVENSON] to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The question was taken, and the Stevenson amendment to the Lenroot amendment was rejected.

The CHAIRMAN. The question now is upon the amendment offered by the gentleman from Michigan [Mr. MCLAUGHLIN] to the amendment of the gentleman from Wisconsin [Mr. LENROOT].

Mr. BURNETT. Mr. Chairman, may we have that amendment again reported?

The CHAIRMAN. Without objection, it will be again reported.

There was no objection, and the Clerk again reported the McLaughlin amendment.

The CHAIRMAN. The question is on the McLaughlin amendment.

The McLaughlin amendment to the Lenroot amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The question was taken; and on a division (demanded by Mr. STAFFORD) there were—ayes 107, noes 122.

Mr. STAFFORD. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. LENROOT and Mr. RUBEY to act as tellers.

The committee again divided; and the tellers reported—ayes 124, noes 134.

So the Lenroot amendment was rejected.

The CHAIRMAN. The question now is on the amendment of the gentleman from California [Mr. LEA] to the amendment of the gentleman from Kentucky [Mr. BARKLEY].

Mr. LEVER. Mr. Chairman, I suggest that that amendment be again reported.

The CHAIRMAN. Without objection, the Lea amendment will be again reported.

There was no objection, and the Clerk again reported the Lea amendment.

The CHAIRMAN. The question is on the amendment.

The Lea amendment to the Barkley amendment was rejected.

Mr. BARKLEY. Mr. Chairman, I ask unanimous consent to modify my amendment by adding the word "governmental" before the word "industrial."

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to modify his amendment in the manner indicated. The Clerk will report the proposed modification.

The Clerk read as follows:

Modify the amendment of Mr. BARKLEY by adding the word "governmental" before the word "industrial," so that as amended the amendment will read:

Page 15, line 17, after the word "alcohol" insert "except for governmental, industrial, scientific, medicinal, or sacramental purposes."

The CHAIRMAN. Is there objection to the modification?

There was no objection.

The CHAIRMAN. The question now is on the amendment of the gentleman from Kentucky [Mr. BARKLEY].

Mr. WILSON of Texas. Mr. Chairman, I have admired the Republicans since I have been a Member of this House because of their patriotic attitude toward the present administration, they having in nearly every instance left all partisan politics and partisan feelings behind. We have appealed to the Members of this House not to bring here partisan feelings, and I hope the Prohibitionists of this Congress will not be partisan on this question. I am this sort of a Prohibitionist: I forbid myself from going about intoxicating liquors, and I forbid intoxicating liquors coming about me, but I have never voted a Prohibition ticket, and I do not think that any man should take advantage of this crisis to inject the prohibition issue or to vote for prohibition here. We are entirely willing that the power be given to our President whenever he should think it necessary to forbid the use of foodstuffs in the further manufacture of all kinds of intoxicating liquors during the period of the war. The Agricultural Committee have decided this is the best course to

pursue after a most thorough and searching consideration of this food legislation. I have been standing by the administration on these war measures without exception and I am willing to stand by it here to-day and to give it all the power in the matter of the control of the manufacture of intoxicating liquors that it is asking us to give, but no more than that. You should not come here to make a raid upon or to mob any kind of business. I think you should be just as fair acting under your oaths here to-day as you would be or ought to be if you were selected as one of a jury to try a man for crime, even though it be murder, though he be ever so guilty. The jurors acting under their oaths should not convert themselves into a mob to do a rank injustice to the defendant. You may hate the liquor business and the liquor dealer, but you should rise above your prejudices and above your partisan feelings and vote here for only what is just and fair. I say let us trust our President in this matter as we are trusting him in all matters during this war. I certainly hope this Barkley amendment, this purely prohibition legislation, and in no sense a war measure, will fail.

Mr. LEHLBACH. Mr. Chairman, in my time I offered an amendment which I am informed was not reported. I offer it now as a substitute for the Barkley amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. LEHLBACH: Page 15, lines 16 and 17, after the word "production," strike out the words "of alcohol or."

The CHAIRMAN. The question is on the substitute offered by the gentleman.

Mr. BARKLEY. Mr. Chairman, I do not think that is an amendment to my amendment.

Mr. LEHLBACH. It is a substitute.

The CHAIRMAN. The Chair understands it is offered as a substitute to the gentleman's amendment.

Mr. BARKLEY. It is an entirely different proposition.

The CHAIRMAN. The question is on the substitute amendment offered by the gentleman from New Jersey.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Kentucky [Mr. BARKLEY].

The question was taken, and the amendment was agreed to.

Mr. CHURCH. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend section 13 by adding at the end thereof the following:
"*Provided*, Nothing herein contained shall prohibit the manufacture of wine containing no grain products."

The CHAIRMAN. The question is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now is——

Mr. SABATH. Mr. Chairman, my amendment is pending.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. SABATH: Page 15, after the word "both," in line 24, insert:
"*Provided*, That nothing contained in this section shall prohibit the manufacture or use of wines or beer."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. SABATH].

The question was taken; and the Chair announced the noes appeared to have it.

On a division (demanded by Mr. SABATH) there were—ayes 88, noes 130.

So the amendment was rejected.

The CHAIRMAN. The gentleman from New Jersey [Mr. PARKER] offers an amendment to strike out the section. The Clerk will report it.

The Clerk read as follows:

Amendment by Mr. PARKER of New Jersey: Strike out all of section 13.

The question was taken, and the Chair announced the noes appeared to have it.

On a division (demanded by Mr. PARKER of New Jersey and Mr. LEVER) there were—ayes 119, noes 127.

Mr. PARKER of New Jersey and Mr. LEVER. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The committee again divided; and the tellers (Mr. BARKLEY and Mr. PARKER of New Jersey) reported that there were—ayes 136, noes 152.

So the amendment was rejected.

Mr. WEBB. Mr. Chairman, I offer a new section to the bill, to be entitled 13a.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. WEBB: Insert as a new section, to be known as section 13a, the following:
"That the President is authorized, if in his opinion it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government, for use or redistillation, such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies in so far as such use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcohol or distilled spirits for the purposes herein enumerated. Upon the failure of the person to comply with the President's requirement, the President is authorized to requisition and take possession of the alcohol and distilled spirits required to be turned over, and to pay for same a just compensation to be determined by the President, and if the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such spirits or alcohol, in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code."

Mr. LEVER. Mr. Chairman, when this amendment to section 13 was offered I made the point of order that it was not germane and the Chair sustained the point of order. The Chair was absolutely right, and I was right in making the point of order that it was not germane. This section, to my mind, is clearly germane under this bill as a separate section. I am perfectly willing for the House, without debate, to vote upon the proposition.

Mr. CALDWELL. Mr. Chairman, I reserve a point of order against it.

Mr. WEBB. Mr. Chairman, I shall occupy but two minutes.

The CHAIRMAN. The gentleman from North Carolina is recognized in support of his amendment.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate close on this new amendment in five minutes.

Mr. CANNON. I would like five minutes.

The CHAIRMAN. Is there objection?

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate——

Mr. WEBB. Mr. Chairman, so far as I am concerned I am willing to not debate it at all. [Applause.] [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. WEBB].

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 14. That in carrying out the purposes of this act the President is authorized to create an agency or agencies, to accept the services of any person without compensation, to cooperate with any agency or person, to utilize any department or agency of the Government, and to coordinate their activities so as to avoid any preventable loss of funds or duplication of work.

Mr. THOMPSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Add at the end of section 14 the following:
"*Provided*, That it shall be unlawful to employ or accept the services under this section of any person who shall at the same time be an employee of any person, association, copartnership, or corporation directly or indirectly interested in any contract with the Government or an officer or director of any such corporation or association, or a member of any such copartnership."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this section and all amendments thereto shall close in 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on this section and all amendments thereto shall close in 10 minutes. Is there objection?

Mr. McLAUGHLIN of Michigan. Reserving the right to object, Mr. Chairman, is the gentleman going to oppose this?

Mr. LEVER. Yes.

Mr. McLAUGHLIN of Michigan. You will use the five minutes yourself?

Mr. LEVER. Very likely.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Oklahoma [Mr. THOMPSON] is recognized.

Mr. THOMPSON. Mr. Chairman and gentlemen of the committee, this section as prepared by the committee authorizes the President to accept the services of any person, officer of any corporation, or copartnership in the enforcement of this act. Now, the amendment which I offer provides that the services of no party, whether an officer or a member of a copartnership or the agent of a corporation or copartnership, shall be accepted to enforce the provisions of this act if that copartnership, corporation, or person shall be interested in

any contract made with the Government of the United States whereby supplies shall be furnished by the corporation, copartnership, or person.

Now, Mr. Chairman, this is not intended as a reflection on anyone who is a member of a copartnership, who owns stock in a corporation, or who is the agent of a copartnership. But it is simply intended to protect the public, so that the public shall not be led to believe that a man who acts in the capacity for himself or as agent of a copartnership in which he is a member, or the agents of himself and others, shall be interested in a contract made with the Government of the United States. Now, a party acting in that capacity may be entirely guiltless of anything that is wrong, but the large majority of the people of the country might be likely to believe that a man acting in that capacity was not entirely innocent; and in order to protect the party himself and in order to relieve him of any suspicion of that kind I have offered this amendment, and I think it ought to be adopted.

Mr. CANNON. Will the gentleman yield for a single question?

Mr. THOMPSON. I will be glad to do so.

Mr. CANNON. Does the amendment that the gentleman offers include stockholders of corporations also?

Mr. THOMPSON. I think not. I would like to have the amendment read again in my time.

Mr. CANNON. I did not catch it.

The CHAIRMAN. Without objection, the amendment will again be reported.

The Clerk read as follows:

Amendment offered by Mr. THOMPSON: Add at the end of section 14 the following:

"*Provided*, That it shall be unlawful to employ or accept the services under this section of any person who shall at the time be an employee of any person, association, copartnership, or corporation directly or indirectly interested in any contract with the Government, or an officer or director of any such corporation or association, or a member of any such copartnership."

Mr. LEVER. Mr. Chairman, I trust that the amendment of the gentleman from Oklahoma will be voted down. The matter was considered in the committee and voted down there.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. THOMPSON].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. THOMPSON. Mr. Chairman, I demand a division.

The committee divided; and there were—ayes 53, noes 98.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 15. That under regulations to be prescribed by the President the use of the mails of the United States free of charge for postage for exclusively official business in carrying out the purposes of this act shall be extended to any agency or person designated by the President.

Mr. MOON. Mr. Chairman, I move to strike out that section.

The CHAIRMAN. The gentleman from Tennessee moves to strike out the section.

Mr. NOLAN rose.

The CHAIRMAN. For what purpose does the gentleman from California rise?

Mr. NOLAN. I want to move to strike out the last word.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this section and all amendments thereto close in 10 minutes.

Mr. NOLAN. I shall only use about three minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on this section and all amendments thereto close in 10 minutes. Is there objection?

Mr. STEENERSON. I reserve the right to object, Mr. Chairman.

Mr. MOON. Reserving for a moment the right to object, Mr. Chairman, I do not desire to discuss this matter even for five minutes if there can not be a decent hearing of the question. Unless we can have some order here there may be objection.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this section and amendments thereto close in 10 minutes, and the gentleman from Tennessee [Mr. MOON] and the gentleman from Minnesota [Mr. STEENERSON] reserve the right to object.

Mr. LEVER. I will make it 15 minutes.

The CHAIRMAN. The gentleman from South Carolina modifies his request by making it 15 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Tennessee is recognized.

Mr. MOON. Mr. Chairman, I do not want to take five minutes, but I do not want to say anything about this question until gentlemen in the House shall come to order. I know they are impatient, but here is a proposition that will involve many million dollars to the people unless some arrangement can be arrived at here.

This section, if it remains in the bill, will not only open the door to an extension of the franking privilege, but it will involve the loss of many millions of money to the Government in the shape the section is in. This House is aware of the fact that all official business is now sent under penalty envelopes by the officials of the Government, so that there is no necessity for giving the frank where the penalty-envelope system comes into force in that connection in behalf of the employees of the Government.

Now, the question arises whether for the purposes of the execution of this act we ought to undertake the dangerous precedent of carrying the mail of the Government of the United States at the order of the President without compensation—mail sent by private citizens and agencies connected with the service. The franking privilege is costing us millions of dollars annually. State institutions of every character are seeking to enter that field and enjoy the benefits of the Government service for nothing. It costs an immense amount of money to pay the railroad companies to carry this mail, and it occurs to me that it would be the part of wisdom to strike out this section and amend the eighteenth section by including in the appropriation therein involved the question of postage, so that the act may be executed wisely and economically and not subject the Government to immense loss that will occur by the adoption of the policy in this particular proposed.

Now, of course, the President, if he could exercise the power himself, personally, might do it wisely, but he must act through agents. It is possible under this section that every farmer and manufacturer in the United States may have the franking privilege extended to him. I think it is better that we appropriate the money to pay the postage, where it is necessary to do it in the interest of the execution of this section, and it is the opinion of the administration that it would be better to appropriate the money directly out of the Treasury. I placed in the RECORD a day or two ago two letters from the Post Office Department protesting against this section and giving the reason why it should not be passed, why that privilege should not be extended in this way. I presume gentlemen who are interested in the subject have read the reasons assigned by the department in those letters. The President does not want to exercise this power. His administration does not believe this is a wise and sensible section. The administration believes, as the Post Office Department informs you in these letters, that the wise and sensible thing to do is not to pass this section, but to amend the eighteenth section so as to include in the appropriation there made postage that is necessary for the purposes of the execution of this act.

That is all I desire to say about it. Being called upon by the department, as the chairman of the Committee on the Post Office and Post Roads of the House, to present their views on the question, as well as my own, against the passage of this section, and to insist on the amendment that I have suggested, and having done so, I leave the consideration of the question to you. [Applause.]

Mr STEENERSON. Mr. Chairman, under the existing law every official of the United States has the right to mail official matter under the so-called penalty privilege. The franking privilege is conferred by law upon certain officers named and upon certain individuals named in the act. There is no penalty in the law for a violation or abuse of the franking privilege by the mailing of things not included in that privilege. The franking privilege of Congressmen applies only to certain things, certain printed matter, official publications, and certain correspondence, and it is limited in weight to 4 ounces of first-class mail. If this section should pass it would give the President the power to confer the franking privilege on anybody he chose, and there would be no penalty against that person using it for any purpose he might see fit. It would be disastrous to postal revenues. It is the most dangerous clause that ever was proposed, and I am very glad to know that the chairman of the Committee on the Post Office and Post Roads has spoken. I agree with him that the section ought to go out. I did not know that he was going to move to strike out the section. I am glad to hear that the department is also opposed to it, and I presume the vote will be unanimous to strike out the section.

Mr. NOLAN. Mr. Chairman, during the consideration of the food-survey bill and the discussion on this measure, considerable reference has been made to the caliber of men and women who will assist Mr. Hoover as volunteers in carrying on the work authorized in this bill. I have felt that it would be wise and

probably prove beneficial to the House to secure the names of those at present in the city of Washington who have been here for something like 60 days assisting Mr. Hoover. I have obtained from the office of Mr. Hoover a list of the names of the ladies and gentlemen who are assisting him, 50 in number, from 15 States and the District of Columbia, and I desire it incorporated in the RECORD for the benefit of the Members of this House. These patriotic citizens have volunteered their services without pay and have paid and are paying their own railroad fare, hotel bills, and expenses, and, as I understand it, will continue to do so.

The list referred to is as follows:

FOOD ADMINISTRATION VOLUNTEERS WITH MR. HOOVER.

Ben S. Allen, California; Julius H. Barnes, New York; E. B. Burling, Illinois; E. G. Broeniman, New York; T. Crompton, New York; J. S. Cullinan, Texas; Stuart Chase, Massachusetts; L. Dawson, Virginia; J. M. Danziger, California; T. Frothingham, jr., Massachusetts; A. A. Farrington, Minnesota; V. N. Hillyer, Maryland; David Harvey, New York; John W. Hallowell, Massachusetts; Dr. Vernon L. Kellogg, Pennsylvania; Capt. J. F. Lucey, New York; C. Lewis, New York; L. Larsen, Michigan; J. B. Lord, New York; V. Manning, Washington, D. C.; W. C. Mullendore, Kansas; C. M. McCarthy, Wisconsin; Mr. McDuffy, California; Gifford Pinchot, Washington D. C.; A. V. Peden, Texas; D. H. Pyle, New York; Mr. Prentice, New York; Dr. R. Pearl, Maine; Edgar Rickard, California; John Richardson, Massachusetts; Mr. Requa, California; L. L. Strauss, Virginia; Howard M. Smith, New York; Dr. A. C. Taylor, Pennsylvania; Dr. C. R. Van Hise, Wisconsin; F. D. Van Sicklen, California; J. B. White, Pennsylvania; Dr. R. L. Wilbur, California; Judge F. D. Wells, New York; Fred C. Wolcott, New York; Dr. F. C. Woodward, Illinois; Miss E. M. Bagg, Washington, D. C.; Miss F. V. Ball, Ohio; Mrs. H. S. Blatch, New York; Dr. Alice Boughton, New York; Miss G. Lane, New York; Miss McKinney, Ohio; Miss A. Marlott, Wisconsin; Miss Sarah F. Splint, New York; Mrs. A. Van Winkle, New Jersey.

Mr. LEVER. Mr. Chairman, will the gentleman from California let me have the remainder of his time?

Mr. NOLAN. I yield back the remainder of my time.

Mr. LEVER. By unanimous consent.

The CHAIRMAN. Without objection the gentleman from South Carolina will be permitted to use four minutes.

There was no objection.

Mr. LEVER. Mr. Chairman, this section was suggested by the Department of Agriculture, and I think it was suggested to save the necessity of having a lot of clerks licking stamps and putting them on envelopes. Personally I do not care very much one way or the other about this proposition, yet I am inclined to think it would be an economy to extend the franking privilege, rather than to give the money to buy the stamps.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. MOON] to strike out the section.

The amendment was agreed to.

The Clerk read as follows:

SEC. 16. That the President is authorized to make such regulations and to issue such orders as are essential effectively to carry out the provisions of this act.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. Gentlemen may recall that some days ago the House accorded me three-quarters of an hour to speak. I have refrained from talking, because I knew the anxiety to pass this bill and pass it this week. I am not going to inflict a talk upon you now, but I do desire to say a few words, and I hope I can get through inside of five minutes. This bill is not perfect. I shall vote for it. [Applause.] Undoubtedly the bill will pass out at the close of the war and become noneffective. God speed the day when the war may close, and one of the blessings will be that this bill goes with it. [Applause.]

I want to call attention to one thing. At times in my length of service in the House I have seen just such a condition in many Congresses as we have got to-night. I have seen the House time and again get into the same frenzy we have to-night, and having something in mind it wanted to do, with a whoop-a-la they went to work and did it, not paying, as it seemed to me, any attention to many important provisions aliunde the principal matter it had in mind.

Now, I am not criticizing Members who have been so anxious about this matter of legislation in the thirteenth section of the bill. I do not believe that many of the amendments are wise, and yet they will have to run the gantlet in the House when the bill is reported in the event the House desires to agree or disagree to the amendments.

Now, think of it. Section 13 as amended now prohibits the use of foodstuffs for beverages, alcoholic, and, I believe, nonalcoholic. I am not sure about the last, because there have been so many amendments and so much confusion. Why? So that we may conserve foods and ship them across to our allies. Do not you see? We are not going to have an oversupply for ourselves, but we are going to have a food dictator who will say how much we can keep and how much we will ship to the allies and try to find it out with great industry and great expense.

Now, when it comes to our allies, what happens? I am reliably informed that the armies of the allies, especially France and Great Britain, ration rum, beer, and wine to their soldiers. I am reliably informed, further, that, so far as we have any soldiers on the other side, they get these same rations, and we are going to conserve food here and probably go short for ourselves in order to ship food to the allies. Do not you think it would be God's chancery to have provided that the allies should not receive any of this food until the Government of France and the Government of Great Britain passed similar legislation, that they will not use any of this food for alcoholic beverages or nonalcoholic beverages. Think of it! Of course you are not going to do that. But it is strange and wonderful, with the round robins that come and the whoop-a-la from all over the country—labor unions, says somebody; ministers, says somebody else; prohibitionists, says somebody else—all shouting for God's sake stand by the Lord and cut this wickedness out. [Laughter and applause.] That is all I desire to say.

The Clerk read as follows:

SEC. 17. That every person who willfully assaults, resists, impedes, or interferes with any officer, employee, or agent of the United States in the execution of any duty authorized to be performed by or pursuant to this act shall upon conviction thereof be fined not exceeding $1,000 or be imprisoned for not more than one year, or both.

Mr. KEATING. Mr. Chairman, I offer the following amendment as a new section.

The Clerk read as follows:

SEC. 18. *Provided*, That nothing in this act shall be construed to repeal, modify, or affect either section 6 or section 20 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914.

Mr. CANNON. Mr. Chairman, I think it is subject to a point of order, and I make it. We have already had that question up once, and I think without a point of order. This is in no sense germane to any section of this bill, which is a war measure.

The CHAIRMAN. The Chair calls the attention of the gentleman from Illinois to the fact that it would seem at first blush to be only a limitation, and therefore in order, but the Chair will hear the gentleman from Illinois.

Mr. CANNON. Can we have the amendment again reported?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The amendment was again read.

Mr. CANNON. Mr. Chairman, I think the easiest and quickest way will be to let the House pass upon it, and I withdraw the point of order.

Mr. KEATING. If it is just the same I wish the Chair would rule on the question, for I do not want it to go before the House that we are considering a question that is not in order.

The CHAIRMAN. The Chair is not required to rule upon a point of order that is not before the House.

Mr. LEVER. Mr. Chairman, can not we agree upon some limitation of debate on this amendment?

Mr. KEATING. Several gentlemen want to discuss the matter.

Mr. LEVER. How much time does the gentleman suggest?

Mr. KEATING. I think 30 minutes is enough.

Mr. LEVER. Mr. Chairman, I intend to be entirely fair. I wonder if the gentleman will not be willing to take 10 minutes and let the other side have 5?

Mr. KEATING. Very well.

Mr. LEVER. Then, Mr. Chairman, I make that request.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate upon this section and all amendments thereto be concluded in 15 minutes, the gentleman from Colorado to have 10 minutes of that time. Is there objection?

There was no objection.

Mr. KEATING. Mr. Chairman, this amendment is the one I offered the other day to section 4 of the bill. At that time I made it apply exclusively to section 4. In its present form it applies to the entire bill. When my amendment was before the House the other day the contention was made that I was seeking to have farmers' organizations and labor organizations exempted from the operation of this bill. I want to impress on the Members of the House that I am not seeking any exemption for any class. Neither the farmers nor the members of labor organizations, so far as this amendment is concerned, are granted exemption from the provisions of the bill. The sole object of this amendment is to clarify the bill. The chairman of the Committee on Agriculture has assured us that it was not the purpose of the framers of the bill to interfere in any way with sec-

tion 6 and section 20 of the Clayton antitrust law. Mr. Hoover, who will be called upon to administer this act, in a conference held a week or two ago with representatives of all the great labor organizations of the country confirmed this view, and suggested the amendment which I have offered. On that point the chairman of the Committee on Agriculture [Mr. LEVER] has requested me to read the following memorandum which he has received from Mr. Hoover:

WASHINGTON, D. C., *June 22, 1917.*

[Memorandum for Mr. LEVER.]

The labor representatives are very much exercised over the possible reading of the food-control bill to stretch to control of wages, and they suggest that an amendment may be made providing that the labor provisions of the Clayton Act should not be affected by the proposed bill. I understand that Mr. KEATING proposed this amendment and it was defeated.

It appears to me that there is no intention in the bill to interfere and I believe it might silence a great deal of criticism and opposition which may be raised in the Senate if this amendment could be undertaken.

I do not wish to impose my views upon you, but simply to suggest that as it is not the intention of the bill to regulate wages, it might do no harm to satisfy this element in the community that they are immune from attack.

Yours, faithfully, HERBERT HOOVER.

Mr. Chairman, if you adopt this amendment, what will you do? The bill provides heavy penalties for anyone conspiring to limit production of food or the transportation thereof. That provision will remain in force, but the provisions of the Clayton antitrust law which permits members of labor unions to quit work in order to improve their working conditions, in order to shorten their hours, in order to secure increased pay, will also remain in force.

I submit to the Members of this House that every sponsor for the bill having declared that it is not the purpose of the bill to nullify the provisions of the Clayton antitrust law, and the representatives of organized labor having expressed the desire that this act should be clarified, it is only fair that the amendment that I have suggested should be adopted.

Mr. ANDERSON. Mr. Chairman, the gentleman's amendment as it now reads is in the form of a proviso. I suggest that he should strike out the word "*Provided.*"

Mr. KEATING. I agree to that.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. KEATING. Yes.

Mr. WALSH. Will the gentleman state briefly what are the provisions of the Clayton law to which he refers in his amendment?

Mr. KEATING. Yes. Section 6 of the Clayton antitrust law provides that the labor of a human being is not a commodity or article of commerce; that nothing contained in the antitrust law shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations. Section 20 provides that no restraining order shall be issued by any court of the United States for the purpose of interfering with the usual lawful operations of organizations of farmers and workingmen, and concludes:

Nor shall any of the acts specified in this paragraph be considered or held to be violations of any law of the United States.

Mr. WALSH. Will the gentleman yield further?

Mr. KEATING. Yes.

Mr. WALSH. If it should become necessary for the success of our Army or our Navy that this section should be abrogated in the administration of this bill, would not the gentleman think that some power ought to be imposed somewhere in order that that might be done?

Mr. KEATING. Oh, I will say to the gentleman that there is no such intention, according to the sponsors of the bill; and, answering for myself, I will say, no. I am opposed to any law which would compel the American workman to work against his will. But that is not the issue. Every man interested in this bill declares unequivocally that the law is not intended to set aside the Clayton antitrust law, and the sole purpose of my amendment is to make clear what the chairman of the committee and the others declare to be their intention.

Mr. WALSH. Will the gentleman yield further?

Mr. KEATING. Certainly.

Mr. WALSH. Does not the gentleman think there ought to be some power somewhere to compel workmen to turn out munitions, for instance, if there was a shortage in our Army for the use of our Army——

Mr. KEATING. I can not yield for a speech.

Mr. WALSH (continuing). If it was held up through a strike, for instance?

Mr. KEATING. Let me say to the gentleman, perhaps the man in this country who is best qualified to answer that question is the man who is back of this bill. Woodrow Wilson does not ask for such a law as is suggested by the gentleman from Massachusetts, because the President knows that labor, organized and unorganized, whether it is at work on the farm or in the mines or the mills of this country, may be depended upon to do nothing which will interfere with the prosecution of this war. [Applause.] But labor insists that if it renders this service to the country that it shall be permitted to act as freemen and not as serfs.

Mr. LARSEN. Will the gentleman yield?

Mr. KEATING. Yes.

Mr. LARSEN. Does the gentleman think the provisions of the gentleman's amendment are sufficiently broad to preserve full and free discussion among agricultural and horticultural organizations?

Mr. KEATING. I do. I reserve the balance of my time.

The CHAIRMAN. The gentleman has two minutes remaining.

Mr. LEVER. The gentleman can not do that.

The CHAIRMAN. If there is objection, the gentleman can not reserve his time.

Mr. KEATING. Some of the other Members may desire to speak, and I wanted to have a chance to yield.

Mr. LEVER. There will be only one speech on this side, and the gentleman can not yield time except by unanimous consent, but nobody will object to that.

Mr. KEATING. As far as I am concerned, I am perfectly willing to vote.

Mr. McLAUGHLIN of Michigan. What is the action of the gentleman from Colorado? Did he reserve his time?

Mr. KEATING. If there is anybody willing to speak in favor of this amendment, I am willing to yield.

Mr. McLAUGHLIN of Michigan. Does the gentleman refuse to yield?

Mr. KEATING. I will yield to the gentleman.

Mr. McLAUGHLIN of Michigan. If the gentleman refuses to yield, I object to his reserving——

Mr. KEATING. Oh, I will yield to the gentleman if he wishes. Permit me to have my two minutes. It is quite evident the gentleman misunderstood me; I will yield to the gentleman.

Mr. McLAUGHLIN of Michigan. This bill provides a punishment for conspiring to limit or reduce the supply of foodstuffs or its distribution, but evidently the gentleman from Colorado would permit that if those offending are members of a labor union.

Mr. KEATING. No; and I am glad the gentleman brought out that suggestion. I want the Members of this House to know that "the gentleman from Colorado" does not ask any such exemption. "The gentleman from Colorado," however, wants it distinctly understood, so that every judge may know it, that when a man strikes for the purpose of shortening hours, bettering working conditions, or securing an increase of pay, he must not be dragged before a court and charged with conspiracy to limit transportation and production. These are two separate and distinct offenses, and "the gentleman from Colorado" is perfectly willing the workman or the farmer or the lawyer who conspires to limit production shall be brought under this act; but he objects to having the workman's rights, rights for which labor has struggled for a hundred years, set aside under the plea that you are conserving the food supply of this country. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. Mr. Chairman, it seems to me that this House sometimes goes very far in imposing upon the intelligence and patriotism of certain classes of our citizenship. The section in which the gentleman is interested proposes to do this, to punish those who conspire, combine, agree, or arrange with any other person to limit the facilities for transporting, producing, manufacturing, supplying, storing, or dealing with any necessaries. What are necessaries? Food, feed, and fuel—the things that the human family must, above all other things, have at all times, and especially in time of war. What else? It proposes to punish those who conspire, combine, agree, or arrange with any other person to restrict the supply of any necessaries. What are necessaries? Food, feed, fuel—for the preservation of human life, for the benefit of the men in the trenches, for the benefit of the men who are in our Navy and sailing under the Stars and Stripes. [Applause.] What else? It proposes to punish those who conspire, combine, agree, or arrange with any other person to prevent, limit, or lessen the manufacture or production of any necessaries. Think of that! Here is a combination of men who may undertake in the days of their country's stress, when the very life of the Nation is trembling in the balance—listen—the manufacture or the production of the necessaries of life. What are they? Food for the human being, food for the man in the Army, food for the man in the Navy, fuel to keep

our great battleships going, fuel to keep our wives and children in the great cities from freezing in the winter's blast. Yes; we can not punish that type of combination. What else? We punish those who conspire or agree to enhance the price of these necessaries. Does anybody doubt that we ought to have the power to put the heavy hand of the law upon those who conspire, who agree and arrange with each other by secret agreement or open agreement, to enhance the price of the necessaries of life, the milk for the babies, the bread for the men in the trenches and beyond the ocean, fighting to conserve the liberties of this country of ours? [Applause.]

Ah, gentlemen, I have stood in South Carolina for 16 long years as the champion, in a measure, of unionized labor. I have been invited to deliver the principal address in the capital city of my State for more than 15 consecutive years. I believe that I am a friend of the laboring man, and I would not insult either his judgment or patriotism by any such proposal as this. [Loud applause.] [Cries of "Vote!" "Vote!"]

Mr. KING. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. Debate is closed on this section and all amendments thereto.

Mr. KING. Mr. Chairman, I ask unanimous consent to proceed for one minute.

Mr. LEVER. I have no objection.

The CHAIRMAN. The gentleman from Illinois [Mr. KING] asks unanimous consent that the time may be extended one minute.

Mr. LEVER. I have no objection.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. KING. Mr. Chairman, I am a friend of this bill and shall vote for it. It does not make any difference what happens to this amendment, but this amendment, gentlemen, is an important one to the laboring men of this country. It will protect them after this war is over and conserve to them the rights that they have won in the legislatures of this country.

Mr. LEVER. It dies with this bill.

Mr. KING. Yes; it simply means that you have suspended the Constitution of the United States and put every laboring man during this war into a state of involuntary servitude, because you have admitted that you can force him to work beyond the hours that he desires to work.

Mr. Chairman, speaking generally, as I said before, I am heartily in favor of this bill. The first duty of a republic is to make certain the feeding of its citizens. Every dead republic of the past has gone down in riot and revolution amid the cry of "Give us bread!"

> Ill fares the land, to hastening ills a prey,
> Where wealth accumulates and men decay.

The rise of autocratic power is here deprecated. Men fear lest the principles of democracy as typified in our Republic be forever swept away in the passage of measures of the kind we now have under consideration. It has been said that a republic is unable to defend itself in time of danger. I take sharp issue with this claim, and it may be said to the everlasting credit of the forefathers who founded this Republic that they so fashioned its body that in time of stress it can, without harm to itself, for the purposes of contact with its enemies, change its form in the twinkling of an eye from a great slow-moving peaceful democracy into a swift-footed, vigilant, militant, centralized power pressing onward to overcome her foes with her invincible irresistibility.

The reptile basking in the sunshine puts forth its fangs when attacked. At the approach of its enemy the quills upon these "fretful procupines" no longer rest in useless repose. Even the bone-headed octopus blinds its foe by emitting an inky substance which clouds its form and befuddles its enemy. Shall it be said that a great peaceful Republic, to meet the onslaughts of its would-be destroyers, because she has heretofore pursued the habits of the husbandmen and the merchant, can not don the armor of the knight nor take up the sword of the nobleman?

Nay, Mr. Chairman, in the face of danger it is her duty to cast aside her swaddling clothes and arise in her majesty militant. And it is our duty and our salvation to clothe our Commander in Chief with a power the effectiveness of which can not be equaled nor overcome by the combined imperialism of the earth. He leads, and in confidence we follow. Your captain, my captain. A certain of certainties. And if you will but turn your faces down the vista of time you can even now see him with one foot on the everlasting step ready to ascend the pedestal of immortality.

But, Mr. Chairman, in this bill we are not granting an autocratic power heretofore resting in and exercised exclusively by the Government to some individual. From a time when the memory of man runneth not to the contrary the market price of the products of the producer has not been fixed by the producer. The power to fix such a price has never been lodged in the farmer. His prices have not been regulated by the unhampered law of supply and demand, but by the man-created agencies in the marts of trade. For years the price of the farmers' wheat has been largely and advantageously controlled and fixed by the boards of trade, and the price of the farmers' meat has been juggled and fixed by the Union Stock Yards and the packing interests in the city of Chicago.

Upon the passage of this bill such autocratic powers so exercised over the farmer by such private institutions will be taken away from them and placed in the hands of the executive branch of this Government. The farmers lose nothing by having these institutions shorn of their autocratic powers and in transferring the same to the President or his duly appointed agent. For these reasons I am anxious to see this bill become a law. The gentleman from Tennessee [Mr. MOON], in his able argument upon this bill, was in doubt as to the beneficial effects of the same if passed. In other words, even though he will support the bill he said that he was "uncertain" as to whether he should do so. I say to you, Mr. Chairman, let him become certain. This is a bread bill. Let him see that its passage is necessary in the light of history. Let him remember the past. When the Bastile fell at the beginning of the French Revolution had there been a supply of bread on hand, had the government sequestered and distributed food to the populace, the horrors of the succeeding times might have been avoided. The people cried for bread, but the powers in control said, "Let the people eat grass." And the beautiful queen in derision said "Let them eat cake!"

And the gentleman who is "uncertain" must remember that the floodgates were opened and human blood rushed on in torrents. Dr. Guillotine set up his patent in the market place. It worked perfectly day and night, and the knitting women counted 21, 22, 23. The human tanneries opened up for business, and many an aristocratic skin was deftly turned into soft gloves to grace plebian hands. Terrorism was triumphant. And now let him close the sickening book and raise the black curtain that divides us from the future and he will then see the great common people of this country for the most part engaged in their peaceful pursuits, but he will notice that a few cries are already reaching us. They can not live within their earnings. It is but a matter of time when in the very nature of things hunger must overtake them.

They will cry for bread; and many a strong, muscular, bare right arm will be held aloft in piteous demand for the food which that arm, were its possessor not an obeyer of the law, as he is, in its strength could easily reach forward and seize that which nature demands—food.

The national assembly refused relief. They denied bread to the people, but the American Congress will give them bread at the very outset.

The American Congress will feed its people in this great war of starvation against humanity. God grant that darker days will not come; but if they should, if the day shall come in this country when "the keepers of the house shall tremble and strong men shall bow themselves, and the grinders cease because they are few, and those that look out of the windows be darkened, and the doors shall be shut in the streets, when the sound of the grinding is low, and he shall rise up at the voice of the bird, and all the daughters of music shall be brought low. Also, when they shall be afraid of that which is high, and fears shall be in the way, and the almond tree shall flourish, and the grasshopper shall be a burden, and desire shall fail, because man goeth to his long home and the mourners go about the streets"; then, in such dark time, we can look back to the passage of this bill and say that we did not deny the common people. We saw the hour of danger as it was approaching, and the grain is garnered against the seven lean years. The people shall live and the name of Hoover shall live. To-day, in supporting this bill, I vote for Herbert C. Hoover. I have seen him. I have talked with him. I feel that I know him. He is a giant in the mastery of details. Fearless integrity is within him. The world is fortunate for him. The hour and the man appear together. He will not be a dictator, but a slave to the American people. Ostracism stares him in the face if he fails; and if he wins, no honor will be too great to be bestowed upon him by that real and only dictator of dictators, that despot of despots, that tyrant of tyrants, the American people. [Applause.] [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. KEATING].

The question was taken, and the Chair announced that the noes appeared to have it.

Mr. KEATING. Division, Mr. Chairman.

The committee divided; and there were—ayes 45, noes 152.

Mr. HUDDLESTON. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The gentleman from Alabama asks for tellers. Those in favor of demanding tellers will rise and stand until counted. [After counting.] Seven gentlemen have risen; not a sufficient number, and tellers are refused.

So the amendment was rejected.

The Clerk read as follows:

SEC. 18. That the sum of $2,500,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, to be available immediately and until expended, for the payment of such rent, the expenses of such printing and publications, the purchase of such material and equipment, and the employment of such persons and means, in the city of Washington and elsewhere, as the President may deem essential.

Mr. MOON. Mr. Chairman, I move to amend, on page 16, line 25, by inserting after the word "expense" the words "including postage."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Mr. MOON offers the following amendment: On page 16, line 25, insert after the word "expense" the words "including postage."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SHERLEY. Mr. Chairman, I offer the following amendment on page 16, lines 24 and 25: Strike out the words "immediately and until expended" and insert in lieu thereof the words "until June 30, 1918." The effect of that amendment is simply to make this fund available until June 30, 1918, instead of making it available until expended.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Kentucky.

The Clerk read as follows:

Amendment offered by Mr. SHERLEY: Page 16, line 24, strike out the words "immediately and until expended" and insert in lieu thereof the words "until June 30, 1918."

Mr. LEVER. Do I understand the words "immediately available" are included in the amendment of the gentleman from Kentucky? They ought to be if they are not.

Mr. SHERLEY. My amendment strikes out "immediately and until expended" and inserts in lieu thereof "until June 30, 1918." It makes it immediately available, and available only to that date.

Mr. LEVER. The committee has no objection to that.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kentucky.

The amendment was agreed to.

Mr. NOLAN. Mr. Chairman, I move to strike out the last word.

Mr. LAGUARDIA. Mr. Chairman, I have an amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 17, line 4, strike out the period, insert a colon, and add "*Provided*, That all persons except persons serving without compensation shall be appointed in accordance with the provisions of the civil-service of January 16, 1883."

Mr. LEVER. Mr. Chairman, I make the point of order that that is not germane.

The CHAIRMAN. The Chair thinks it would be germane. The Chair overrules the point of order.

Mr. LEVER. Then, Mr. Chairman, I ask unanimous consent that the debate on this section and all amendments thereto shall close in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this section and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. LAGUARDIA. I will not take more than three minutes.

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. LAGUARDIA. Mr. Chairman, when I introduced a similar amendment to the food-survey bill, the chairman of the committee raised the objection that time would not permit the selection of employees under the civil-service act. I took the matter up with the Civil Service Commission, and I have here the reply. I will ask the Clerk to read it in my time.

The Clerk read as follows:

UNITED STATES CIVIL SERVICE COMMISSION,
Washington, D. C., June 20, 1917.

Hon. F. H. LAGUARDIA,
House of Representatives.

DEAR SIR: This commission has the honor to acknowledge receipt of your letter of even date concerning the filling of positions under the food-control bill. You ask how long it will take to advertise these positions, hold examinations, and have the candidates ready for appointment.

For the various kinds of clerical positions mentioned by you, like general clerks, bookkeepers, stenographers, typewriters, etc., the commission is holding constant examinations now and has already existing registers of eligibles, and to these registers new names are being added daily. For the positions of inspector, examiner, expert, etc., it is likely that new examinations would be required, as to such positions, with the present demand of public and private employers for all kinds of employees, it is presumable that the Government would need practically all qualified and available persons, and in such event the commission is prepared to use the same methods that it has been using since the war began for other such positions in other lines of endeavor which the Government has undertaken; under these methods the commission is prepared to determine the qualifications of applicants daily as rapidly as applications are filed, and to furnish constantly to the appointing officer those who qualify.

It is manifest that although several thousand employees may be required in connection with the administration of the food-control bill, no department or office would be able to absorb all these employees at one time and provide them with work.

The commission is satisfied that if these positions are to be filled with qualified persons they can be so filled more economically and promptly through this commission under the civil-service law than in any other way, because the commission with its well-established and comprehensive machinery is much better prepared than any other known agency to supply qualified persons for these positions.

For your interest and information the commission begs to inclose herewith a copy of a recent memorandum showing the preparedness of the commission to supply the Government with qualified persons for its work.

The commission begs further to call your attention to the fact that under opinion of the Attorney General of February 12, 1908 (28 Op., 507), it is necessary, in order to exempt positions from the requirements of the civil-service act and rules, that there be affirmative language to that effect. If there is no such language, the positions are subject to the usual civil-service requirements.

If there is any further information you desire, the commission will be glad to furnish it upon your telephone request.

By direction of the commission.

Very respectfully, J. A. MCILHENNY,
President.

The CHAIRMAN. The time of the gentleman from New York has expired. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. LAGUARDIA. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 123, noes 122.

Mr. LEVER. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed Mr. LEVER and Mr. LAGUARDIA to act as tellers.

The committee again divided; and there were—ayes 175, noes 135.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 19. That for the purposes of this act the sum of $150,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, to be available immediately and until expended: *Provided*, That no part of this appropriation shall be expended for the purposes described in section 18.

Mr. SINNOTT. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Oregon offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SINNOTT: Amend section 19 by adding a new paragraph, as follows:

"*Provided further*, That the President, in his discretion, may expend from the amount hereby appropriated not to exceed the sum of $20,000,000 on reclamation projects in accordance with the provisions of the reclamation act approved June 17, 1902, and acts amendatory thereto."

Mr. LEVER. Mr. Chairman, I make the point of order that that is not germane.

Mr. SINNOTT. Will not the gentleman reserve the point?

SEVERAL MEMBERS. No! No!

Mr. LEVER. I feel constrained to make the point of order.

Mr. SINNOTT. I desire to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman on the point of order for a moment.

Mr. SINNOTT. Mr. Chairman, one of the avowed objects and purposes of this act is to increase the production of food. I believe that the solution of the food problem is in the irrigation of the arid lands of the West, for the farmer is now tilling and sowing every available acre of land which under present conditions is susceptible of favorable cultivation. In the West are many million acres of arid lands which could successfully raise grain if irrigated. The irrigation of these arid lands will solve the food problem. In my district the Reclamation Service reports 1,000,000 acres susceptible of irrigation. These lands, if properly irrigated—and they can be, for we have abundant water—would raise at least 40 bushels of wheat to the acre, a total of 40,000,000 bushels, one-fifteenth of the total

amount of wheat raised in the United States last year. If my amendment passes, at least 50,000 acres in my district could be put in wheat next year. Some of this land is now being irrigated, some has been included in irrigation districts under the State laws. A little assistance from the Government would enable these irrigation districts in a few years, and some next year to crop many thousand acres of grain.

I hold in my hand complete reports and surveys prepared by the State and Government in cooperation concerning some of these proposed projects in my district. The State of Oregon expended $50,000 and the United States $50,000 in preparing these reports. They contain engineering data and information sufficient to enable work to be commenced at once on many hundred thousands of acres susceptible of irrigation. They relate to the Des Chutes project, Malheur and Owyhee projects, Silver Lake project, John Day and Ochoco projects, any one of which could be undertaken at once.

The ruling of the Chair that an amendment to regulate the price of shoes, clothing, farming implements, and so forth, has caused great disappointment to those of us who think that the price of these articles should be regulated as well as the price of food. I hope we will not again be disappointed by the Chair holding my amendment out of order. I believe it in order, for the following reasons:

Section 1, in line 6, recites that one of the objects of this bill is to assure an adequate supply of the necessaries of life. The same provision is repeated in section 3. Then, in section 9, it is provided that the President is authorized to purchase and also to provide for the production of the necessaries of life, of food, and so forth. Then, again, supplementing section 9, in section 19 we have an appropriation of $150,000,000, which the President is authorized to use according to the terms of section 9 as he sees fit, either to purchase or to provide for the production of the necessaries of life. Now, the President, under the authority granted in section 9, may, if he sees fit, spend every dollar of this $150,000,000 in the production of the necessaries of life, in raising food, in raising wheat and other cereals. There is absolutely no restriction, no limitation placed upon the power and authority of the President in expending this $150,000,000, and for the purposes of this argument and for parliamentary purposes the amendment which I have offered is really a limitation upon the power of the President. The President can use the instrumentalities of the reclamation act and can use reclamation projects for the purpose of raising food, and my amendment limits the amount that he can expend in that direction to $20,000,000. It is a limitation on the power of the President, and is therefore in order.

The CHAIRMAN. The Chair thinks the gentleman's amendment is not in order, for two or three reasons. He thinks it is not germane to the section to which it is offered, and under the rule it must be germane to the section to which it is offered, or else it is not in order.

Mr. SINNOTT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. Let the Chair finish his ruling.

The Chair thinks also that if he had tried to hold it in order, even if not out of order on account of not being germane, it was not in order under the provisions of the bill to give the President the right to encourage production; the Chair thinks that even then it would be drawing on the imagination pretty strongly to go out and reclaim lands. You might just as well say that he was authorized to buy the Pennsylvania Railroad in order to facilitate transportation, under this section. I think no gentleman would conclude that that authority is given in this section, and the Chair sustains the point of order.

Mr. SINNOTT. Will the Chair hold that it would be in order as a separate section?

The CHAIRMAN. The Chair will cross that bridge when he comes to it.

Mr. LEVER. Mr. Chairman, I move to strike out, in line 10, the words "section 18" and insert in lieu thereof "the preceding section."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 17, line 10, strike out the word and figures "section 18" and insert in lieu thereof "the preceding section."

The question was taken, and the amendment was agreed to.

Mr. SHERLEY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 17, in line 8, strike out the words "immediately and until expended," and insert in lieu thereof the words "during the time this act is in effect."

Mr. LEVER. I have no objection to that.

The question was taken, and the amendment was agreed to.

Mr. LENROOT. Mr. Chairman, I move to strike out in line 6 the figures "$150,000,000," and insert in lieu thereof "$250,000,000."

Mr. Chairman, I voted for the Barkley amendment. I did what I could to secure an amendment to that section for reasons I then stated. That amendment failed. I voted against striking out the section and voted for the Webb amendment authorizing the President to commandeer the distilled liquors in this country and pay for them. The purpose of this amendment is to appropriate $100,000,000 for the purpose of providing money to the President of the United States to do that which the House has authorized in the commandeering of these liquors.

I wish to say that merely to authorize the President of the United States to commandeer these liquors, and authorize the payment for them, without providing the money with which to do it, is handing a gold brick to the American people. That is attempting to make a record that this House stands for prohibition without providing any means whatever to the President of the United States to carry it out. This $150,000,000 that is reported by the committee did not for one moment contemplate any such expenditure as this. The whole of the $150,000,000 will certainly be required for other purposes, or else the Committee on Agriculture should not have reported so large an amount. Presumably every dollar is needed for that purpose. Therefore, if the Webb amendment is to have any effect whatever, if it is to be anything but—to use a common expression—bunk to the American people, the friends of this amendment owe it to this House and to their faith and sincerity to vote for this amendment to increase the appropriation $100,000,000.

I want to see this really effective. I am in good faith about this. Are you, who have been so strenuously advocating this to the fullest degree possible?

Mr. BLACK. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. BLACK. If these liquors are commandeered, they will be for the use of the Army. And would not the money already appropriated in that bill be used for this purpose?

Mr. LENROOT. Not one single dollar of it, because that money is appropriated for a specific purpose. Not a penny has been appropriated for this purpose. Unless this amendment is adopted the President will not be able to commandeer one single dollar's worth of liquor.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. GARRETT of Tennessee. The principal value of distilled liquor is the revenue duty. Would it not be possible to add a provision whereby the revenue duty can be remitted?

Mr. LENROOT. I was coming to that, but whether it is or not this should be done. Let me say that the value of distilled liquors now in bond is at least $250,000,000, less the tax, and this amendment I have proposed will not purchase more than one-half of the distilled liquors now in bond in the country. I want to know some reason why the friends of the Webb amendment will oppose this proposed amendment.

Mr. LEVER. Mr. Chairman, Mr. Hoover in his statement desires this appropriation for the purpose of a working capital. He figures that if he can have this sum of money in the Treasury it will enable him to negotiate such credits as will permit him to do the things that are proposed to be done in this bill, and in a letter addressed to me as chairman of the committee on June 2, 1917, he makes that statement. He says:

> While it is difficult to say at the present time what amount of working capital would be required, it appears to me it should be a sum between $100,000,000 and $150,000,000. If we had a positive appropriation of this amount it is probable that the fact that it lay in the Treasury available would enable us to effect credits for a large portion of such obligations and we might not call for any money at all, but it would be quite infeasible to arrange these credits unless we have a visible demonstration of our ability to carry margins. I would, therefore, very much like to see an appropriation of, say, $150,000,000 purely for a working capital.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. LEVER. Yes.

Mr. LENROOT. Under that statement it is not contemplated that any part of the $150,000,000, and certainly not $100,000,000, could be used for the purpose of purchasing letters.

Mr. LEVER. I take it the gentleman's statement is true.

Mr. CANNON. Mr. Chairman, I move to strike out the last word.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SHERLEY. Mr. Chairman and gentlemen of the Committee, we have grown accustomed to dealing in tremendous figures, but because we have grown accustomed to dealing in such figures we ought not lightly and without any real consideration to add $100,000,000 to this bill. The amendment proposed by the gentleman from Wisconsin [Mr. LENROOT] is not $100,000,000 for the purpose of buying for the Government alcoholic liquors—at least, it is not legally so limited. It increases the amount available to $250,000,000 for any of the purposes stated in the bill. If you use the $100,000,000 for the purchase of alcoholic liquors you will be not only buying liquors of that quantity, but you will be very seriously interfering with the revenues which the Government will obtain from alcoholic liquors If the Government is really going to go into the matter of buying distilled liquor, and compensating the owners for it, it ought to be gone into with some understanding of the size of the undertaking and some knowledge of the facts, and not done loosely on a motion of this kind.

I appeal to the common sense of this House that they do not, under the excitement incident to the amendment that has been adopted, appropriate this amount of money. We are having difficulty now—the Senate is having difficulty and the House had difficulty—in raising sufficient revenues in connection with the bond issues that have been authorized to meet the expenditures that are easily foreseen for the next 12 months, and to burden the Treasury with another $100,000,000 that would be segregated for this purpose is to do an act of folly that could not be justified by sensible men. We are dealing with serious questions. We ought to deal with them seriously, soberly, and not be swept off our feet by proposals of this kind simply because they are connected with a subject about which men feel and rarely think. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the Chairman announced the noes appeared to have it.

On a division (demanded by Mr. LENROOT) there were—ayes 26, noes 153.

So the amendment was rejected.

Mr. VOLSTEAD. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLSTEAD: At the end of section 19, page 17, insert a new section as follows:

"SEC. 20. The President shall cause a detailed report to be made to Congress on the 1st day of January each year of all proceedings had under this act during the year preceding. Such report shall, in addition to other matters, contain an account of all persons appointed or employed, the salary or compensation paid or allowed each, the aggregate amount of the different kinds of property purchased or requisitioned, the use and disposition made of such property, and a statement of all receipts, payments, and expenditures, together with a statement showing the general character and estimated value of all property then on hand and the aggregate amount and character of all claims against the United States growing out of this act."

Mr. LEVER. Mr. Chairman, the committee has no objection to this amendment, but on the contrary favor it. I ask for a vote.

The question was taken, and the amendment was agreed to.

Mr. KING. Mr. Chairman, I offer the following amendment as a new section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. KING: Page 17, line 10, after the word "eighteen," insert a new paragraph and section, as follows, to wit:

"SEC. 21. That for the purpose of further stimulating the production of nonperishable agricultural products within the United States and for more effectually carrying out the objects of this act as expressed in the title and substance hereof that there be established in the Treasury Department a bureau, to be known as the bureau of farm risk insurance, the director of which shall be entitled to a salary at the rate of $5,000 per annum; that said bureau of farm risk insurance, subject to the general direction of the Secretary of the Treasury, shall as soon as practicable, make provisions for the insurance by the United States of growing crops of nonperishable products against loss or damage by the action of the elements, whenever it shall appear to the Secretary that the producers of such crops are unable to secure adequate farm risk insurance on reasonable terms; that the bureau of farm risk insurance, with the approval of the Secretary of the Treasury, is hereby authorized to adopt and publish a form of farm risk policy and to fix reasonable rates of premium for the insurance of growing crops of nonperishable products against loss or damage by the action of the elements, the proceeds of the aforesaid premiums when received to be covered into the Treasury of the United States; that the bureau of farm risk insurance, with the approval of the Secretary of the Treasury, shall have power to make any and all rules and regulations necessary for carrying out the purposes of this section of this act; that the Secretary of the Treasury is authorized to establish an advisory board to consist of three members skilled in the practices of farm risk insurance, for the purpose of assisting the bureau of farm risk insurance in fixing rates of premium——

Mr. STAFFORD. Mr. Chairman, the reading of the amendment has progressed far enough to show that the amendment is clearly out of order.

The CHAIRMAN. The Chair thinks the amendment is out of order.

Mr. KING. Mr. Chairman, I do not want to discuss the matter. I do not object to having it voted down, but I do not want the Chairman to do an injustice to his intelligence by holding it out of order.

The CHAIRMAN. If the point of order is made the Chair must rule.

Mr. KING. Mr. Chairman, I make the point of order that the gentleman from Wisconsin is not in order when he makes the point of order in the middle of my amendment.

The CHAIRMAN. The gentleman has a right to interpose a point of order at any time he desires. The Chair sustains the point of order.

Mr. DYER. I offer an amendment as a new section, following section 19.

The CHAIRMAN. Does the gentleman offer it as a new section or an amendment to section 19?

Mr. DYER. As a new section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

That in order to prevent confiscation, without payment therefor, of property now and heretofore legally owned and used in the manufacture and sale and distribution and transportation of spirituous, vinous, and malt liquors and the destruction of business conducted now and in the past under the sanction of the law, that full compensation to be fixed by capable experts on the valuation of the class of property to be valued, shall be paid to persons and corporations whose business has been destroyed or damaged by legislation of Federal Government as hereinafter provided, to all of the following-named persons, corporations, or associations, to wit: Adequate and just compensation to all engaged in the manufacture and production for sale through interstate commerce as beverages of malt, distilled, and vinous liquors, for all property, real, personal, and mixed, actually used or employed at the place where manufactured in connection with and about the manufacture of said liquors above mentioned and the conduct of said business at the said place of manufacturing said product; adequate and just compensation to all those engaged in the sale at wholesale or retail as a beverage of malt, distilled, or vinous liquors, for all property, real, personal, or mixed, used in and about the wholesale and retail of said liquors; adequate and full compensation to all owners of vineyards, the products of which are now used for the production of vinous liquors for sale through interstate commerce and use as a beverage and of which product the principal part thereof is marketed and sold outside of the State wherein said vineyard is located: *Provided*, That all malt, distilled, or vinous liquors now on hand in the possession of manufacturers or wholesale or retail dealers or producers of same or in storage in private, public, or United States bonded warehouses may be sold and marketed, and the provisions of this act shall not interfere with or affect the sale and marketing of the same; payment to all persons drawing wages or salary on account of service rendered in the manufacture, distribution, and sale of malt, spirituous, and vinous liquors as a beverage, the principal part of which product is marketed and sold outside of the State of its manufacture, of a sum equivalent to one year's wages or salary; and to provide a fund to pay for said property and business there shall be annually collected from the malt, vinous, and distilled liquor industries, in the same manner as the internal-revenue taxes are now collected from the malt, vinous, and distilled liquor industries, the sum of at least $100,000,000 annually, and which said above-named sum shall be in addition to all other taxes, whether internal revenue or otherwise imposed by the Federal Government on the malt, distilled, and vinous liquor industries, and which said sum so collected as above provided shall be set aside and expended to pay all losses caused and for property above mentioned destroyed or damaged and now used in the manufacture, sale, or distribution at wholesale or retail in interstate commerce in any State or Territory under the jurisdiction of the United States, and which loss has been incurred and property damaged by legislation of the Federal Government; and payment out of said fund shall be made for property above named and as compensation to those employed in the business in the respective States in the order of time in which said claims are presented: *Provided*, That the capacity of existing breweries or distilleries engaged in interstate commerce shall not be enlarged or new ones built and new vineyards shall not be used to produce intoxicating liquors for sale through interstate commerce as a beverage.

In fixing compensation for property hereunder, good will shall be considered and valued along with other classes of property. The property so paid for hereunder shall belong to the United States Government, and Congress shall enact such legislation from time to time as may be necessary to carry out the intent and purpose of this act.

Provided, That if the Government desires, the Secretary of the Treasury may, at any time, place any part or all of said fund above mentioned in the general revenue fund of the Federal Government and issue in lieu thereof to those to whom said fund would otherwise be payable bonds of the United States of America, payable in not less than 30 years, bearing interest at prevailing rate then paid by the Government.

SEC. 2. That a commission of five members shall be appointed by the President, who shall have full power to cause the valuation of all property of above-described class by capable experts, and such commission shall at once proceed with its labors and value said property; and the commission shall, with the consent of the owner or owners thereof, proceed to sell said property or procure the same to be sold by said owner or owners, first making payment in the amount of the value of said property to the owner or owners in Government bonds or in cash. Whenever property is thus sold under the terms of this act the money shall be placed in the Treasury of the United States.

Provided, That all stocks of goods now on hand and all material now actually bought and owned by persons or corporations coming under this act may be legally utilized and disposed of in the ordinary and usual course of such business, any enactments to the contrary notwithstanding.

SEC. 3. That the commissioners appointed hereunder shall hold office for a term of five years and at the pleasure of the President, each or all may be removed, and each shall receive a salary of $10,000 per annum. The commission shall have power and authority to locate its office at some central point in the United States and may employ such help, clerical and expert, and legal and otherwise as it needs, and incur

such expenses for office and supplies as is necessary. The secretary of the commission shall be appointed by the President and he shall receive a salary of $6,000 per annum. The members of the commission and the secretary and the employees shall, when traveling on official business, receive their actual traveling expenses. There shall be a counsel for the commission, who must be an attorney at law in actual practice thereof, and he shall be appointed by the President, and he shall receive a salary of $10,000 per annum and his actual expenses incurred in the performance of his duties.

SEC. 4. That the commission, or any one or more of its members, may hold such hearings from time to time in such places as may be necessary to perform their duties.

SEC. 5. That the commission shall at least once every six months, and oftener if directed by the President, file a written report of their proceedings with the Secretary of the Treasury, which shall be a public record and shall be printed at the expense of the Government for free distribution. The commission shall investigate and report on every phase of the manufacture and sale of spirituous, vinous, and malt liquors and on the State and Federal legislation thereon, and make such suggestions relative thereto as it deems proper.

SEC. 6. That there is hereby appropriated out of the Treasury of the United States the sum of $250,000 to carry out this enactment.

Mr. LEVER (interrupting the reading). Mr. Chairman, I make the point of order against the amendment.

Mr. DYER. It is clearly in order, as the further reading will demonstrate. I would like to be heard.

The CHAIRMAN. The Chair will hear the gentleman a moment.

Mr. DYER. This is an amendment, Mr. Chairman, providing for a commission to fix the value of the millions of dollars of property that the amendment adopted by the House this afternoon will destroy if it goes into effect. There is no sure way to provide for the payment for that property.

Mr. LEVER. Which statement convinces the Chair that the gentleman's amendment is clearly out of order.

Mr. DYER. The gentleman may make that statement, but does the gentleman from South Carolina think there should not be some provision made for the payment of property we are to destroy?

The CHAIRMAN. The Chair is willing to hear the reading of the amendment through, so far as that is concerned, but he desires to call the attention of all members of this committee to this fact, that we must stay within reasonable bounds, anyway, and the Chair thinks this is going very far afield. So the Chair is inclined to think he has heard enough of the amendment to determine that it is out of order, and therefore sustains the point of order.

Mr. DYER. Mr. Chairman, I ask unanimous consent that the balance of the amendment may be printed in the RECORD.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer an amendment to perfect the section.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

The amendment offered by Mr. MOORE of Pennsylvania: Page 17, line 10, after the word "eighteen" insert a new section, as follows:

"SEC. 20. That the employment of any person under the provisions of this act shall not exempt any such person from military service under the provisions of the selective-draft law approved May 18, 1917."

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

Mr. LEVER. The committee accepts that amendment with pleasure.

The amendment was agreed to.

The Clerk concluded the reading of the bill.

Mr. MILLER of Washington and Mr. GARD rose.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. GARD].

Mr. GARD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GARD: Mr. GARD moves to strike out all of the language in the section beginning with the word "that" on line 18, and substitute the following:

"SEC. 21. That the provisions of this Act shall cease to be in effect when the existing state of war between the United States and Germany shall have terminated, and the fact and date of such termination shall be ascertained and proclaimed by the President; but the termination of this act shall not affect any act done, or any right or obligation accruing or accrued, or any suit or proceeding had or commenced in any civil case before the said termination pursuant to this Act; but all rights and liabilities under this act arising before its termination shall continue and may be enforced in the same manner as if the act had not terminated. Any offense committed and all penalties, forfeitures, or liabilities incurred prior to such termination may be prosecuted or punished in the same manner and with the same effect as if this act had not been terminated."

Mr. LEVER. Mr. Chairman, the committee accepts that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. GARD).

The question was taken and the amendment was agreed to.

Mr. MILLER of Washington. Mr. Chairman, I offer an amendment. It might have been covered by the preceding one. I would like to have it reported and see if it is.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read the following:

Amendment offered by Mr. MILLER of Washington to section 21: That section 21 be amended by adding thereto the following:

"All pending actions in law or in equity; all legal and equitable property rights in favor of any person or the Government; all personal rights or rights of property affected by or growing out of this act, existing at the time this act ceases to be in effect, shall continue and are reserved to such person, property, or the Government for full and final judicial or official determination in all courts and before all persons, officials, official boards, and tribunals; and full jurisdiction is hereby conferred and continued in all of said instances and cases to render full and final judgment therein and issue execution and levy thereon; and for such purposes this act shall be deemed to be in full force and effect.

All prosecutions in any court against any person for violation of the provisions of this act pending at the time this act ceases to be in effect shall proceed to final judgment, and full jurisdiction is hereby conferred and continued in all courts to judicially determine such prosecutions and render full and final judgment therein and execution thereon, for which purpose this act is deemed to be in full force and effect.

Mr. LEVER. Mr. Chairman, I ask for a vote on that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington [Mr. MILLER].

The question was taken, and the amendment was rejected.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the Clerk may be authorized to renumber the sections of the bill.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] asks unanimous consent that the Clerk may be authorized to renumber the sections of the bill. Is there objection? [After a pause.] The Chair hears none.

Mr. LEVER. Mr. Chairman, I move that the committee rise and report the bill and amendments adopted to the House, with the recommendation the amendments be agreed to and that the bill as amended do pass.

The CHAIRMAN. The gentleman from South Carolina moves that the committee do now rise and report the bill and amendments to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. LEVER. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The SPEAKER. The gentleman moves the previous question on the bill and all amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

Mr. LAGUARDIA. Mr. Speaker, I ask for a separate vote on the Barkley amendment.

The SPEAKER. The gentleman from New York asks for a separate vote on the Barkley amendment.

Mr. LAGUARDIA. Mr. Speaker, on reconsideration I withdraw my request.

The SPEAKER. The gentleman withdraws his request for a separate vote on the Barkley amendment. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, and was read the third time.

Mr. YOUNG of Texas and Mr. THOMPSON rose.

The SPEAKER. The Chair will recognize the gentleman from Texas [Mr. YOUNG], long a member of the Committee on Agriculture.

Mr. YOUNG of Texas. Mr. Speaker, I make the motion to recommit the bill to the Committee on Agriculture, with instructions to strike out section 3 and section 12, and forthwith report the bill back with those two sections stricken out.

The SPEAKER. The gentleman from Texas [Mr. YOUNG] moves to recommit the bill to the Committee on Agriculture, with instructions to report back the same forthwith, with amendments striking out section 3 and section 12.

Mr. LEVER. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The question was taken, and the motion was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. LEVER. Upon that, Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The gentleman from South Carolina demands the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Those in favor of passing this bill will vote "yea"; those opposed will vote "nay."

The question was taken; and there were—yeas 365, nays 5, answered "present" 5, not voting 55, as follows:

YEAS—365.

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. FISHER (for) with Mr. WOOD of Indiana (against).

For one week:

Mr. KITCHIN with Mr. MANN.

Until further notice:

Mr. CLARK of Florida with Mr. FULLER.

Mr. STEPHENS of Nebraska with Mr. SLOAN.

Mr. O'SHAUNESSY with Mr. HAYES.

Mr. CRISP with Mr. HOLLINGSWORTH.

Mr. LUNN with Mr. CLARK of Pennsylvania.

Mr. GALLAGHER with Mr. POWERS.

Mr. GLASS with Mr. ROWLAND.

Mr. ALMON with Mr. CLASSON.

Mr. CARTER of Oklahoma with Mr. CAPSTICK.

Mr. DUPRÉ with Mr. PLATT.

Mr. FITZGERALD with Mr. FORDNEY.

Mr. CANTRILL with Mr. SISSON.

Mr. GALLIVAN with Mr. GEORGE W. FAIRCHILD.

Mr. RIORDAN with Mr. SNELL.

Mr. MCANDREWS with Mr. VOIGT.

Mr. KITCHIN. The gentleman from Illinois, Mr. MANN, is absent. I have a pair with him, and I want to withdraw my affirmative vote and answer "present."

Mr. STERLING. My colleague, Mr. MASON, is absent on account of sickness. He says that if he had been able to be present he would have voted for the bill, and he wished me to so announce.

Mr. FOSTER. My colleague, Mr. RAINEY, is unavoidably absent, and he requests me to say that if he were present he would vote for the bill.

Mr. AUSTIN. My colleague, Mr. BYRNS of Tennessee, is unavoidably absent on account of sickness. Were he present he would vote in the affirmative.

Mr. SMALL. My colleague, Mr. GODWIN of North Carolina, is confined to his home by illness. If present, he would vote for the bill.

Mr. MOORE of Pennsylvania. My colleague, Mr. VARE, is unavoidably absent, but if he were here he would vote for the bill.

Mr. HERSEY. My colleague, Mr. PETERS, is absent. He is in favor of the bill, and would so vote if present.

Mr. DIXON. My colleague, Mr. DENTON, is unavoidably absent. If present, he would vote for the bill.

Mr. SINNOTT. My colleague, Mr. MCARTHUR, is unavoidably absent. He requests me to announce that if he were here he would vote for the bill.

Mr. HAMILTON of New York. My colleague, Mr. DUNN, is unable to be here. If he were present, he would vote for the bill.

Mr. GREENE of Vermont. My colleague, Mr. DALE, is absent on a business errand. If he were present, I am satisfied he would vote for the bill.

The result of the vote was announced as above recorded.

The announcement of the vote was received with applause.

On motion of Mr. LEVER, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted to Mr. MCANDREWS for three days, on account of illness in his family.

The SPEAKER. The gentleman from Rhode Island [Mr. O'SHAUNESSY] telegraphs me asking indefinite leave of absence on account of illness in his family. Without objection, it will be so ordered.

There was no objection.

THE BELGIAN COMMISSION.

Mr. SIEGEL. Mr. Speaker, I ask unanimous consent that the Speaker be authorized to invite the Belgian mission to visit the House on Wednesday next, at such time as is convenient to them, and that at that time the House take a recess for one-half hour.

The SPEAKER. The gentleman from New York [Mr. SIEGEL] asks unanimous consent that the Speaker be authorized to invite the Belgian commission to be with us next Wednesday, at such hour as they may select, and that at that time the House take a recess for 30 minutes. Is there objection?

There was no objection.

ADDRESS OF AMBASSADOR BAKHMETIEFF.

Mr. SIEGEL. Mr. Speaker, I ask unanimous consent that the address delivered to-day by the ambassador representing the new Republic of Russia may be printed in the RECORD, together with the remarks of the Speaker introducing him.

The SPEAKER. Is there objection?

Mr. ROGERS. Will that permission mean that these remarks will be inserted in the proper place in the proceedings of the day?

The SPEAKER. The Chair will make that order. Is there objection?

There was no objection.

REQUEST TO EXTEND REMARKS.

Mr. HULBERT. I ask unanimous consent to extend my remarks on the subject of aeronautics.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD on the subject of aeronautics. Is there objection?

Mr. WALSH. I object.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 44 minutes p. m.) the House adjourned until Monday, June 25, 1917, at 12 o'clock noon.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DENT: A bill (H. R. 5165) to provide for the planning, improvement, relocation, construction, and maintenance of a system of improved national highways and State highways designed to facilitate the movement of troops, equipment, munitions, and supplies in time of peace and in time of war and to promote the general welfare of the people of the United States; to the Committee on Military Affairs.

Also, a bill (H. R. 5166) to amend certain sections of the act entitled "An act for making further and more effectual provisions for the national defense, and for other purposes," approved June 3, 1916, and for other purposes; to the Committee on Military Affairs.

By Mr. CURRY of California: A bill (H. R. 5167) to amend an act entitled "An act to provide aid to State or Territorial homes for the support of disabled soldiers and sailors of the United States," approved August 27, 1888, as amended March 2, 1889; to the Committee on Military Affairs.

By Mr. TAYLOR of Colorado: A bill (H. R. 5168) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. GANDY: A bill (H. R. 5169 granting a pension to Jacob Kuhn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5170) for the relief of Elizabeth Marsh Watkins; to the Committee on Claims.

By Mr. JUUL: A bill (H. R. 5171) for the relief of Soren Jensen, of Chicago, Ill.; to the Committee on Claims.

By Mr. OSBORNE: A bill (H. R. 5172) granting a pension to Henry H. Snow; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5173) granting a pension to Delos M. Porter; to the Committee on Pensions.

By Mr. PARK: A bill (H. R. 5174) granting a pension to Harry Hirschensohn; to the Committee on Pensions.

By Mr. SELLS: A bill (H. R. 5175) granting an increase of pension to James Ralph; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5176) granting an increase of pension to Samuel Large; to the Committee on Invalid Pensions.

By Mr. SLAYDEN: A bill (H. R. 5177) for the relief of Lula McCarty; to the Committee on Claims.

By Mr. WALTON: A bill (H. R. 5178) granting a pension to Harry Owen; to the Committee on Pensions.

By Mr. CONNELLY of Kansas: A bill (H. R. 5179) granting an increase of pension to James M. Shuey; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of Pattern Makers' League of North America, favoring the Lever food-control bill and urging its immediate passage; to the Committee on Agriculture.

Also (by request), petition of Columbia Lodge, No. 174, International Association of Machinists, Washington, D. C., favoring the Lever food-control bill; to the Committee on Agriculture.

Also (by request), petition of Zion Society, Newark, N. J., urging the passage of the Susan B. Anthony amendment as a war measure; to the Committee on the Judiciary.

By Mr. CARY: Petition of Grand Council of Wisconsin United Commercial Travelers of America, protesting against any legislation increasing the first-class postage rate until the postage on second-class mail has been raised to the point where the carriage of that class of mail will be on a self-sustaining basis; to the Committee on Ways and Means.

Also, petition of Roundy, Peckham & Dexter, Milwaukee, Wis., favoring the Lever food-control bill; to the Committee on Agriculture.

Also, petition of Wisconsin State Council of Defense, favoring the control of coal mines by the Government; to the Committee on Agriculture.

By Mr. DALLINGER: Petition of the Boston Society of Civil Engineers, favoring war prohibition; to the Committee on the Judiciary.

By Mr. ESCH: Petition of the Social Service Commission of the Diocese of Milwaukee, Wis., urging the creation of effective zones about all military camps; to the Committee on Military Affairs.

By Mr. FULLER of Massachusetts: Petition of citizens of the Commonwealth of Massachusetts, praying for the enactment of legislation which will prohibit the manufacture and sale of intoxicating liquors during the war; to the Committee on the Judiciary.

By Mr. GALLIVAN: Petition of the mothers and women of Dorchester, Mass., favoring the prohibition of the manufacture and sale of intoxicating liquors; to the Committee on the Judiciary.

Also, petition of Boston Musicians' Protective Association, Boston, Mass., urging the ownership and operation by the Government of the railroads, telegraph and telephone lines, food supply, etc.; to the Committee on Interstate and Foreign Commerce.

By Mr. GANDY: Petition of certain residents of Fort Pierre, S. Dak., favoring the prohibition of the liquor business as a war measure; to the Committee on the Judiciary.

By Mr. GOOD: Petition of certain citizens of Benton County, Iowa, favoring prohibition; to the Committee on the Judiciary.

By Mr. GRIEST: Petitions of Fulton Young People's Branch, Pennsylvania Woman's Christian Temperance Union; Warren B. Kirk, president of Little Britain Loyal Temperance Legion, Nottingham, Pa.; and Mary Edith Hershey, of Lancaster, Pa., urging the prohibition of the manufacture and sale of alcoholic liquors during the war; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Musicians' Protective Union, Local 198, of Providence, in the State of Rhode Island, favoring passage of Lever food bill before July 1; to the Committee on Agriculture.

By Mr. McCLINTIC: Petition of the Oklahoma State Osteopathic Association, tendering their professional services to the United States; to the Committee on Military Affairs.

Also, petition of the Oklahoma State Osteopathic Association, urging immediate prohibition of the liquor traffic; to the Committee on the Judiciary.

By Mr. MAGEE: Petition of Charles W. Hergitt, of Syracuse, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of members of Christ Church, Manlius, Onondaga County, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of Ira C. Estes and other citizens of the city of Syracuse, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MOTT: Petitions of residents of West Eaton, of Harrisville, and of Denmark, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. NOLAN: Petition of County Clare Association of California, San Francisco, Cal., urging that hearings be held on the so-called Mason resolution, House joint resolution No. 88, calling on Great Britain to grant Ireland her freedom; to the Committee on Foreign Affairs.

By Mr. TREADWAY: Petition of the manufacturers and business men of Holyoke, Mass.; the manufacturers of Holyoke, Mass.; and sundry citizens of Granville, Mass., urging the prohibition of the manufacture and sale of intoxicating liquors as war measure; to the Committee on the Judiciary.

SENATE.

MONDAY, *June 25, 1917.*

(Legislative day of Friday, June 22, 1917.)

The Senate reassembled at 12 o'clock m., on the expiration of the recess.

CONSERVATION OF FOOD AND FUEL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Mr. CHAMBERLAIN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Martin	Smoot
Bankhead	Husting	Nelson	Sterling
Beckham	James	New	Sutherland
Borah	Johnson, Cal.	Norris	Swanson
Brady	Johnson, S. D.	Page	Thomas
Brandegee	Jones, N. Mex.	Penrose	Thompson
Broussard	Jones, Wash.	Poindexter	Tillman
Chamberlain	Kellogg	Ransdell	Townsend
Colt	Kendrick	Reed	Trammell
Culberson	Kenyon	Robinson	Underwood
Cummins	King	Saulsbury	Vardaman
Curtis	Kirby	Shafroth	Wadsworth
Dillingham	La Follette	Sheppard	Walsh
Fernald	Lewis	Sherman	Warren
Fletcher	Lodge	Shields	Williams.
Gallinger	McCumber	Smith, Ga.	
Gerry	McKellar	Smith, Md.	
Hale	McNary	Smith, Mich.	

Mr. SUTHERLAND. I desire to announce the unavoidable absence of my colleague, the senior Senator from West Virginia [Mr. GOFF], on account of illness. I will let this announcement stand for the day.

The VICE PRESIDENT. Sixty-nine Senators have answered to the roll call. There is a quorum present.

Mr. BRANDEGEE. Mr. President, I ask unanimous consent to have an editorial from the New York Times on food control read by the Secretary.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

"UNTIMELY ZEAL FOR PROHIBITION.

"The food-administration bill has passed the House of Representatives with an amendment that if finally accepted would cost the country $350,000,000 yearly. Apart from any other objection to the attachment of an out-and-out prohibition measure to a bill designed to conserve the Nation's food supply in a time of great peril, the prospective loss to the revenues of the entire sum derived annually from liquor taxes is open to serious objection. The Senate should keep the provisions of the bill restricting the use of foodstuffs in the manufacture of alcoholic liquors within reasonable bounds.

"In the House of Representatives 365 Members, after a bitter contest, have chosen to go on record as favoring absolute prohibition of the manufacture of intoxicating liquors during the war. It is probable that many of those who voted for the drastic liquor amendment Saturday night did so in order to get the bill through on time, confident that the Senate would reasonably modify it. Restriction of the use of foodstuffs in distilleries may be necessary. It is well for the law to recognize the essential fact that our food supplies must be protected at whatever cost. But to turn the food-administration bill, at the last moment of the House debate upon it, into a strict prohibition measure, without counting the cost at all, is going too far. It is utterly unreasonable. The pending revenue bill is already large enough without the addition of another huge sum to make up for the elimination of $350,000,000 of present taxes. The effect of the liquor amendment is to change the character of the food bill to make its main provisions practically subordinate to the prohibition of the manufacture of liquors.

"All this distraction of legislative energy from the main business of the hour, this continuous attempt to make a subsidiary question principal, seriously interferes with war measures. Senator WADSWORTH has proposed an amendment to the food-control bill which gives the President power to prohibit the use of food materials in the manufacture of distilled liquors, beers, and ales. That is the proper method. It was employed by the House in the provision authorizing the President to commandeer existing stocks of alcoholic liquors if alcohol is needed in the manufacture of explosives. He may be trusted to use that authority with discretion. Instead of making an iron rule, founded on a disputed theory, give the President the power to act as necessity requires. That is sound economics. The other course is premature, and therefore without justification. Whenever, in the interests of economy, efficiency, and grain preservation, national prohibition is necessary, the President should have the power to prescribe it as a war measure, and for no other reason. The plain duty of the Senate is to eliminate the prohibitive amendment and substitute for it one based on an intelligent consideration of the situation."

Mr. LEWIS. Mr. President, may I tender a substitute for the present pending bill, to have it printed and laid on the table for further consideration?

The VICE PRESIDENT. The proposed substitute will lie on the table and be printed.

Mr. THOMPSON. Mr. President, I have here a short statement by Hon. William Jennings Bryan, formerly Secretary of State, regarding the food-control bill. I send it to the desk and I should like to have it read. It is short, but I regard it as quite a valuable contribution to the discussion of the subject.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

W. J. Bryan, passing through Washington the other day, gave out the following emphatic statement in support of the administration's food-control bill:

"War is not a normal condition; it is abnormal and requires extraordinary remedies. The farmers are urged to increase the food products, and should be guaranteed against an inadequate price; without such guaranty they might be penalized for their patriotism. The consumers, too, deserve protection from food speculators. A government that can commandeer the lives of its young men and call for the money of its older men should have power to protect the whole people from the greed of an unpatriotic few. I am not afraid to trust the President with the powers which the food administration bill proposes to confer. He acts in the daylight and without a selfish interest. No President would abuse such a power."

Mr. CUMMINS. I present certain amendments to the pending bill, which I ask may be printed and referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. It will be so ordered.

Mr. GORE. Mr. President, I ask to have read into the RECORD two or three letters which I send to the desk and to have printed in the RECORD certain others without reading. The first letter which I send to the desk is from Mr. James G. McSparron, who is an officer of the State Grange of Pennsylvania, and is also an officer of the National Grange; but, more than that, he is one of the most intelligent and thoughtful men I have ever had the pleasure of knowing. I ask to have his letter read.

The VICE PRESIDENT. Is there objection to reading the letter sent to the desk by the Senator from Oklahoma?

Mr. CHAMBERLAIN. I shall not object to these letters, but I shall after the reading of the letters call for the regular order. I understand the Senator from Missouri [Mr. REED] is ready to proceed with his address.

Mr. REED. He is.

The VICE PRESIDENT. Without objection, the Secretary will read.

The Secretary read as follows:

LANCASTER, PA., *June 21, 1917.*

Hon. THOMAS P. GORE,
Washington, D. C.

MY DEAR SENATOR: I can not refrain from expression of appreciation of your gallant stand in defense of the farmers' rights in this emergency. Your speech in the Senate was timely and strong, and your prophecy as to the decreased production, as a result of unwise legislation, will be fulfilled as sure as fate. I trust under such strong leaders as yourself and colleagues the pending food bill will be amended so as to conform to right lines and affect the purpose intended without injustice to the producer.

Sincerely, yours,

JAMES G. MCSPARRON.

Mr. GORE. I send to the desk a letter from Mr. R. D. Bowen, of Paris, Tex., an officer in the National Farmers' Union. I

ask to have this letter read because section 3 of the pending bill subjects the pledging and financing of all farm products to governmental control and this letter has direct reference to the unwisdom of such a policy.

Mr. GALLINGER. Does the Senator desire to have the letter read?

Mr. GORE. I should like to have this letter and one or two others read, and I have asked to have printed other letters in the RECORD, for I think the Senate should be in possession of the information given by the letters.

Mr. GALLINGER. I agree with the Senator that the letter ought to be read.

There being no objection, the Secretary read as follows:

PARIS, TEX., *June 19, 1917.*

Hon. C. A. CULBERSON, United States Senator,
Hon. THOMAS P. GORE, United States Senator,
Hon. MORRIS SHEPPARD, United States Senator,
Hon. HOKE SMITH, United States Senator,
Hon. JOSEPH E. RANSDELL, United States Senator,
Washington, D. C.

GENTLEMEN: While I fully appreciate the enormous burden which you are now working under, at the same time I suggest that you communicate with Mr. W. P. G. Harding, president Federal Reserve Bank Board, and Mr. J. S. Williams, Comptroller of Currency, and ascertain from them any information you can as to attempts which have been made, and which possibly will be repeated, to try and have the Government issue orders to all banks which are carrying loans on cotton to call in such loans.

Mr. Theodore Price and other well-known cotton price manipulators of New York have been making repeated efforts for weeks and weeks past to try and bring about a decline in the price of cotton.

After their attempts had proved futile a statement went the rounds to the effect that southern banks would call in all loans on cotton.

This statement was shown to be unfounded, and it is now whispered that attempts have been made to have the Government instruct that such action be taken on the part of the banks carrying cotton loans.

The farmers of this country will meet as best they can the emergencies which confront us all, and no class of our citizens can be relied upon for any more loyalty than can the farmers.

It seems that up to date most every interest in this country has been heard in full on the question of war taxation and price control except the farmers.

Awaiting your advice.

Yours, truly, R. D. BOWEN.

Mr. GORE. I should like to say that I have no information on the matter mentioned except what is contained in the letter, but Mr. Bowen is a man of considerable business experience, and no man in the country is better advised as to the needs or wishes of the cotton farmers of the South.

I have also a letter written by a farmer who farms, which I wish to have read.

The VICE PRESIDENT. The Secretary will read the letter as requested.

The Secretary read as follows:

MULHALL, OKLA., *June 19, 1917.*

Hon. T. P. GORE,
Washington, D. C.

DEAR SIR AND FRIEND: I see by the papers you are against the food bill. Good for you. Do all you can against it. Us farmers must have a big price for our stuff if we don't we can not go any longer. We have to pay $4 a sack for flour to live on to raise this crop, 20 cents a pound for twine to bind it, $3 to $4 a day for help, $200 for binders to cut it, and everything else in proportion. We have got to have a big price. So do all you can against the food bill. Farmers are awfully dissatisfied the way things are going down here. We don't want any more trouble than it is, so do all you can against it.

Yours, truly, J. E. WESLEY.

Mr. GORE. Of course, the language used in this letter is rather extreme, and I do not entirely indorse it; but I wish for the purpose of calling the farmer's viewpoint to the attention of the Senate to have one other letter read, and then I shall not detain the Senate longer.

The VICE PRESIDENT. Without objection, the Secretary will read.

The Secretary read as follows:

BISON, OKLA., *June 21, 1917.*

Hon. T. P. GORE,
Washington, D. C.

MY DEAR SIR: I am a small wheat grower. I certainly appreciate the stand you have taken on that regulation of food bill, governmental prices, etc. We have begun to thrash here. Buyers of grain say they do not know what it is worth, etc. All such expressions. Such a state of chaos to exist at a time when we need to settle our bills is outrageous. We are now paying 20 cents here for thrashing. We paid $3 for single hemp during harvest and 20 cents for twine.

A Representative of any agricultural State should look to the interest of its honest toilers in the field.

Congress should not enact laws that will hurt the American farmer, regardless of what Mr. Hoover says, or anyone else.

We are willing to do our bit every time, but it seems a poor time to beat down the prices of wheat just now. I note that the Daily Oklahoman never fails to stab you, but when all the smoke clears away they will find T. P. GORE leading in every political fight in Oklahoma for many years to come. Do not fool yourself, the farmers know about these things.

Sir, no answer is needed to this. Doubtless the food bill will be a law before this reaches Washington. But I wanted to send you my personal good wishes.

Yours, respectfully. V. B. BEARD.

Mr. GORE. I now desire to present a number of letters and telegrams, which I ask to have inserted in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered. The matter referred to is as follows:

[Telegram.]

FORT WORTH, TEX., *June 21, 1917.*

Senator THOMAS P. GORE,
Washington, D. C.:

All the farmers, nearly to a man, throughout this country look upon the food-control proposals as inimical to their interest and directed to their injury, in evidence of which they witness the retirement of elevator and mill men from purchases of wheat just as the thrashers are getting well under way, and note that actual thrashed wheat, of which we have the new crop supply in Texas and Oklahoma that is to be found in the world, has declined in two weeks from over three to less than two dollars per bushel. At the same time there was published in the papers a statement purporting to originate with expectant purchasers at Fort Worth, whose 11 elevators are empty, that Mr. Hoover had advised them against stocking up for the present. Consequently it was stated that wheat would open at about $2 for the new wheat, and we now can't sell it at that, because we can't get cars, and each morning's market report records a loss. West of the one hundredth meridian prevails a drought, the character of which has never been equaled within the memory of man. Instead of cattle shipments it is hides. The people, of course, are agreeable to that control which may be found necessary, but not to their own destruction.

S. H. COWAN.

—

PETERSBURG, IND., *June 20, 1917.*

Senator GORE.

DEAR SIR: In my last night's paper I read of the food bill concocted by one Herbert C. Hoover—to us an unknown man. I am an admirer of President Wilson, but fear that he is making a very serious mistake in selecting a man unknown to business men to manage a thousand millions of food products.

I am a retired farmer; was formerly the largest wheat raiser in Indiana, raising 51 good wheat crops in as many years. We talked the matter over last night, some 10 or 11 large farmers, and I was selected to write you and ask you to please see that Hoover does not put up some job on us farmers. President Wilson some two weeks ago said that he wished to "stimulate production," and we are afraid that if Hoover has his way that production of foodstuff, especially wheat, will be injured—practically ruined. The men said last night that if an inexperienced man like Hoover had the management of crops that they would stop raising wheat altogether and use their land for other things.

Hoping that you will continue to look after that man Hoover and not allow him to ruin the country and starve the soldiers who are fighting the battles for democracy.

Very truly, W. A. OLIPHANT.

P. S.—Senator J. E. WATSON and Representative COX know me.

—

AMERICAN NATIONAL BANK,
Bowling Green, Ky., June 21, 1917.

Senator GORE,
United States Senate, Washington, D. C.

MY DEAR SIR: The community around Bowling Green is strictly an agricultural one. We have no factories, but a great farming country. We as farmers are very much interested in the food-control bill now before Congress. We have kept up with the bill somewhat and have read your speech opposing this bill in some ways.

In my opinion, it would be a great mistake for Congress to do anything or pass any bill that would discourage the farmer in producing the largest possible food products.

All types of business are now making enormous profits, and the opportunity seems now better for the farmer than it has been for 25 years, and to undertake to limit the prices of farm products and allow all other classes of producers to get immense prices hardly seems fair to us. The thing we need in this country is an enormous increase in our food products. The farmers are doing their level best to meet this demand on them; but when you say that wheat shall sell at such a price that flour can be bought at eight or nine dollars per barrel, then you are discriminating against the farmer. The same would be true of all other food products. What we want to do is to encourage and help the farmer to raise immense crops and regulate the price in that way—by supply and demand—rather than by legislation.

You may pass laws and enforce them to prevent the trusts and speculators from cornering the market on farm products, but certainly you should do nothing to hinder the farmer in his enthusiastic and patriotic work in producing the largest possible yield of every character of foodstuff.

I have not had the pleasure of your acquaintance, but I am interested in these questions.

Yours, very truly, J. WHIT POTTER.

—

JUNE 21, 1917.

To Senator GORE:

DEAR SIR: Please, Mr. GORE, do all in your power against the food-control bill in Congress. I am a Pennsylvania farmer, and if the bill passes I believe we will have one of the biggest famines in 1918 that we ever had. Farmers are planning to quit the work if it passes and just raise enough food for themselves. Farm help is scarce as it is, and how in the world is the poor farmer going to raise food to feed the world without help? And wages are so high he can't afford to hire if he is to work for nothing for the Government. The farmer's children will go to the shop as soon as they are of the age of 16. The shop prefers them to city people, as they can rely on them better. Those who are for the bill are only that kind, like a York man said to one of my neighbors last winter. He said, "We will soon get rid of the farmer now." Then my neighbor said, "Where will you get your food from?" He said, "They will ship it to us from the city." People are getting so smart, why can't they pass a law that they won't eat? Then they will have more money for amusement, which they like better than raising food, which don't pay. How is the farmer, with his children in the shop, going to do his farm work and pay a laborer from $2 to $3 a day for working eight hours, like the farmer who hired potato pickers at $1.50 a day and board and picked up a bushel that pays when potatoes sold for 60 cents? That is the way the bill will work on the farmer, if passed. The farmer will just quit; that's all. Where will the world gets its food supply from if the experienced farmer gets another job at $5 a day? Those that are in favor of the bill know nothing at all of experimental farming. If the bill passes, this country will experi-

ence one of the worst times it has ever seen so far. So please try and work against it in all your power to save our country.

Yours, sincerely,

PENNSYLVANIA FARMER.

—

STANTON, MICH., *June 21, 1917.*

Senator GORE,
Washington, D. C.

MY DEAR SIR: I appreciate your stand for the farmer on the food question. I can not understand why the farmer has got to be the goat. If Mr. Hoover is going to put wheat down to $1.25 we might just as well quit raising it. The farmers of Montcalm County, at $1.50 a bushel this year, won't break even on their crop, and we might as well let our lands lie as to hire high-price labor, machinery, horses, etc., to put in with. Let Mr. Hoover look at it from the farmer's side and not make a grand-stand play from the Chicago wheat pit. If it was wrong to buy option on wheat, why did he not prosecute them? And it must have been wrong or else they would not have been put to a stop. They gave the gambler a chance to get from under, but how about the small elevators all over the country that pay the farmer $3.25 for wheat and have to take $2.30 for it to-day? Did they get a chance? I have in mind one elevator that lost $5,000 on wheat. He bought at those figures, and there are 1,000 similar circumstances. I am a farmer and have always been a farmer, but four years I was sheriff, and I put in from 12 to 15 hours a day myself and am paying $60 a month to my farm hands in order to raise a big crop. And I be picked if it does not make a man feel like quitting when such a man as Hoover goes to pulling down an honest living profit. I believe Mr. Hoover should look at it from the farmer's side for once. I am going to get out a petition signed by our farmers protesting against reducing the price on our product as long as we are up against the high wages, etc.

I am as good loyal citizen as the United States has got, and we Danes have as little love for Germany as anybody. We had two wars with her ourselves.

Thanking you for your time, I remain,

Yours, truly,

W. E. RASMUSSEN.

—

OKLAHOMA CITY, OKLA., *June 22, 1917.*

Hon. THOMAS P. GORE,
Washington, D. C.

DEAR SIR: I note the stand you are taking on the food-control bill and wish to say that in my opinion you are absolutely right. The past season I handled 3,000,000 bushels of Oklahoma's wheat crop and I believe I know something about the condition.

If Mr. Hoover's program goes through the Armour Grain Co. and several other large concerns will have the same grip on the grain trade that they have on the packing industry, and that Standard Oil has on the oil trade. Small exporters like myself were fighting for our lives when the war came on, as these people were trying then to eliminate us from the grain business, and were paying a price for grain in the country that compelled us to do business for nothing. I have closed my office; my office force are now employed otherwise, as I could not afford to try to carry on a business in the face of present conditions. I have three farms and I am writing this letter from the farmer's standpoint. I feel that we would all be willing to do our fair share towards winning the war, but I do not see why we should accept an unfair portion of the burden.

For instance, we have to buy a new thrashing machine and engine, and have to pay the increased cost of steel and labor in that purchase. Why, then, should our product have to be sold at a fixed price that suits the ideas of a dictator who is not familiar with the farming condition? The remedy for the situation is in increased wages for labor where it is necessary and in that way spread the burden equally on all shoulders. A number of people that I have argued with stated that it is alright, I can get along, but what about the poor laboring man working for $2 a day. I am paying $2.50 per day for cotton choppers on the farm, and have paid $6 for a man and his team.

In addition to this, consideration should be given to the 12,000,000 acres that the farmers cultivated and seeded with high-priced seeds that was a failure. When the farmer did not get the cost of production out of his product nothing was heard of any legislation to give him a minimum price that would render him a fair return for his investment and labor. I felt that when Mr. Hoover was suggested as food controller that if anyone knew anything about the condition, he did, but if he has been quoted correctly in the public press he has been very unfair in his statements. No one is better qualified than Mr. Hoover to say what the average price the allies and Belgium relief paid for their supplies, but I have never heard any statement from Mr. Hoover as what this price was. However, he says that the farmers received $1.22 for their wheat, and the same wheat was selling in New York that day for $3.18. Any well-posted person knows that the situation came about as follows: First, our winter wheat crop was cut short, and when it was harvested prices advanced, but wheat was being bought and sold and delivered for export all during that time. Then the serious situation developed in the Northwest when the crop was a failure and prices made a further advance, but wheat was being delivered for export and was passing from the farmers through the mills and into consumption at the prices that prevailed. Then the Argentine crop failed and prices sustained a further advance. Then there was a lot of advertising on the front pages of the newspapers and articles by Mr. Vrooman and others in the Agricultural Department, and the public went to buying in a hysterical way, which advanced the price still further.

The Government had 100 agents trying to locate the food speculator and hoarder, and the only thing that they were able to find was 16 egg dealers in Chicago against whom they brought indictment.

This cry about food speculation is a screen behind which they are attempting to repress the price of the product. If there had been one-hundredth part of the food manipulation charged, the United States Government agents would have certainly been able to tell who was doing it.

I think that it takes a great deal of courage to take the position you are taking at the present time, but I believe that you are absolutely right.

Yours, very truly,

C. Y. SEMPLE.
PRENTISS, OKLA.

—

Hon. T. P. GORE,
United States Senate, Washington, D. C.

As debate on the Lever food-control bill soon commences I wish as a farmer to protest against the passage of this bill. I am 58 years old, and know the hardships the farmer has had to endure. When fat hogs sold for less than $3 per hundredweight, wheat 60 cents per bushel, corn 12½ cents, oats 10 cents hundreds, yes, thousands of farmer boys left the farms for a soft job in towns and cities, got smart and called the honest farmer "Old hayseed," "Clodhopper," etc., and now these same people are clamoring for Congress to control the price of the product of the farm. The farmer has always had to stand droughts, hailstorms, and the elements over which he had no control, and stand or fall on the inevitable law of supply and demand. When crops were short or prices low the farmer has not rushed to Congress for help. No; he mortgaged real and personal property at a high rate of interest; and now, when the wheat crop is almost a failure and outlook for corn crop looks very uncertain, why should Congress be so unjust to the farmer as to pass a law that he is cut off from the world's open market? Does the President want Congress to pass this bill and bring another Coxy's army to Washington? You know, my dear Senator, that such an army can be raised without a conscript act of Congress.

There may be food gamblers, middleman's profts, and all that, but the plain fact is that the Liverpool market has always governed the world's markets, and now when that market is in distress England sends Lord Northcliffe to help dictate with Hoover and others how Congress shall control the resources of the United States. Public sentiment is fast forming that there is executive and legislative branches in our form of government, and the people do not want any dictator over their Representatives in Congress. Sentiment is not in favor of Prussianism nor Germany's methods of control of national resources.

Respectfully,

W. H. LESHER.

—

VERDEN, OKLA., *June 21, 1917.*

Hon. T. P. GORE.

DEAR SIR: Will write you a few lines as I see some of the papers are criticizing you, but it is just the papers, we farmers are with you almost to a man. Fight this food-control bill to a finish. You are right, and don't give in to President Wilson or anyone else. It looks to me as if President Wilson could have his way Congress had better appoint him dictator and adjourn. It is something awful for one man to have and want the power that Congress is bestowing on our President. There are men that were against you that are for you now.

Respectfully,

T. F. GRAHAM.

—

DURANT, OKLA., *June 21, 1917.*

Senator T. P. GORE,
Washington, D. C.

MY DEAR SENATOR: The grain dealers of both Oklahoma and Texas are taking considerable interest in the bill now proposed regarding food control.

I have not seen the text of the bill, but, judging from the information I can gather from the speeches made regarding the measure, I am of the opinion that it will have a tendency to do away with the grain buyers like myself, or middlemen, as they call them.

We note with pleasure that you are opposed to this bill and are writing you directly to give you our own ideas regarding it, and also for information as to this bill. As no one knows what the maximum price would be, as we understand it, it will be in the power of one man—either the President or Mr. Hoover—to name that price. I can not understand how one man, not posted in dealing in grain, could name a price that would be satisfactory to the farmers and grain dealers and the public generally, for if he should name a maximum price that farmers would not be willing to accept we do not think he could force farmers to take this price, and the producers could therefore hold their grain, trusting to get a better deal probably later on. If, therefore, the receipts were curtailed by reason of the producers holding for better prices, the object of the bill could not be accomplished; and, on the other hand, if after giving the law a trial it was found the prices were too low and he decided to change them to a higher maximum, that would probably destroy the merit of the bill, for if he makes a flexible price he would be doing no more than what the future gamblers are doing in Chicago.

In the meantime there are millions of dollars invested in the grain belt in elevators and buildings erected for the purpose of handling grain by the grain dealers of the country, and if the prices were made so as to apply directly to the producer we do not see wherein the grain dealers would be of any use or benefit, but has the effect in its operation to place the elevator men and grain dealers out of business.

If the maximum price is to be made applicable to grain dealers and not the producer, of course that price would be a matter of public information and the producer would want a full maximum or allow the dealers or elevators a small commission for handling it. Thus it would not be profitable, and I think the ultimate result would be the closing of all these elevators and retirement of the so-called middlemen; and they might go a step further and say that the Government might decide later to place their own agents at buying stations, and thus take charge of the grain interests as well as cotton. If this is not rank socialism, we do not know what the term means. We believe in fair and equitable laws being passed that should affect all people alike.

We fully realize, however, that parties in favor of the bill consider that the end justifies the means; but we believe in these war times a bill like this should be given a great deal of thought in regard to the future consequences it may have. Of course, I am writing from an interested standpoint, being in the grain business, but believe that I have a right to make an honorable living out of the grain business so long as I do not injure the interest of my fellow man.

We can only hope that the bill will not pass and that when our lawmakers give it their fair consideration they will not vote for the bill.

Yours, truly,

D. HEAD & SON.

P. S.—We would thank you very much if you could send us a copy of the proposed bill that is now before Congress.

D. H.

—

OKLAHOMA CITY, OKLA., *June 21, 1917.*

Senator T. P. GORE,
Washington, D. C.

DEAR SENATOR: With the experience of 28 years traveling in different States, and especially this State, among the farmers, and having witnessed some of the conditions resulting from poor returns for their

products which usually advanced after leaving the producer, I am convinced that many farms have been abandoned, even by owners, to seek employment in towns or industries offering wages in excess of anything he had been able to realize from the farm.

Now that the day seems near that the prices of farm products can and should be such that the thousands of productive acres in Oklahoma that have been idle in the past will be put to use as soon as the farmer feels that he will be the beneficiary of the value of his products based on local and foreign conditions and demands. Many farmers' suspicion of the great exchanges' motives in quoting only July and September prices on wheat, and yet lowering the price practically each day, is based on past experience.

They are aware that during these months a large per cent of the wheat will be thrashed, and many farmers, especially the tenant class, will be compelled to sell part, if not all, their crop at prices current during July, August, and September next, after which prices will advance. They also feel that the mills as local buyers are no more charitable than the Chicago gamblers.

I do not know your line of argument in support of your position in opposing the administration's food-control bill, but as far as I do understand it I think you are correct, and I am only one of many who feel likewise.

Something must be done to encourage farmers who have remained, and those who left the farms to return, and the most stimulating "something" will be reasonable compensation for their labor and investments.

One farmer states that in the early part of April last he could have contracted his 1917 crop of wheat for $2.70 per bushel for July 17 delivery at his railroad station.

I hand you a clipping from this morning's Oklahoman—not for information but amusement.

Yours, respectfully, B. F. LAKE.

Mr. SHERMAN. Mr President, last week in some remarks made by me on the food-control bill I quoted a maxim which was supposed to be on a cardboard over Mr. Hoover's desk and which appears in the CONGRESSIONAL RECORD. My authority is the statement made to me by those who claimed to know, as well as having read it in a sheet that is current about Washington, called the Bulletin, in which appeared the following maxim, said to be over Mr. Hoover's desk or at his door:

To hell with yesterday. This is to-day.

In justice to Mr. Hoover I desire to say that I have received from him a letter under date of June 23, 1917, saying that no such sign was ever there, and that he should like to have given as much publicity to this denial as was given to the original statement. I very cheerfully ask that the letter be printed at length in the CONGRESSIONAL RECORD and that the correction be made. It is due Mr. Hoover that the truth be known.

JUNE 23, 1917.

DEAR SENATOR SHERMAN: My attention has been called to your statement, which appears on page 4438 of Friday's CONGRESSIONAL RECORD, that a sign faces visitors in my office bearing the legend "To hell with yesterday," etc.

There is not nor has ever been such a sign or sentiment either inside or on the outside of my office.

A canvass of the entire office reveals that the only possible color to such a statement that exists was in an anonymous post card received by one of the clerks to some such import and was immediately destroyed.

It seems to me but fair that I should ask you to correct the statement, for I can not conceive that you wish to find ground for opposing the food bill by such methods as this.

Yours, HERBERT C. HOOVER.

Mr. RANSDELL. I submit an amendment to the pending bill, which I ask may be printed and lie on the table.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. WALSH. I submit an amendment to the bill now under consideration and ask that it be printed and lie on the table.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. BORAH. On the 19th instant I offered an amendment to the pending bill, which I asked to have printed and lie on the table. I have redrafted that amendment and desire to offer it at this time and ask that it be printed and referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. In the absence of objection, it is so ordered.

Mr. CURTIS. At the request of the National Forward-to-the-Land League, I offer an amendment to the bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel. I ask that it be referred to the Committee on Agriculture and Forestry and printed.

The VICE PRESIDENT. The amendment will be referred to the Committee on Agriculture and Forestry and printed.

Mr. STERLING. I offer an amendment to the pending bill, which I ask to have printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the amendment was referred to the Committee on Agriculture and Forestry and ordered to be printed, as follows:

Amendment intended to be proposed by Mr. STERLING to the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, viz: Strike out sections 4 and 5 and insert in lieu thereof the following:

"SEC. 4. That it is hereby made unlawful for any person willfully to destroy any necessaries for the purpose of enhancing the price or restricting the supply thereof; knowingly to commit waste or willfully to permit preventable deterioration of any necessaries in or in connection with their production, manufacture, or distribution; to hoard, as defined in section 6 of this act, any necessaries; to monopolize or attempt to monopolize, either locally or generally, any necessaries; to engage in any discriminatory and unfair or any deceptive or wasteful practice or device or to make any unjust or unreasonable rate or charge in handling or dealing in or with any necessaries; to conspire, combine, agree, or arrange with any other person (a) to limit the facilities for transporting producing, manufacturing, supplying, storing, or dealing in any necessaries, or (b) to restrict the supply of any necessaries, or (c) to restrict the distribution of any necessaries, or (d) to prevent, limit, or lessen the manufacture or production of any necessaries for the purpose of enhancing the price thereof, or (e) to exact excessive prices for any necessaries, or to aid or abet the doing of any act made unlawful by this section.

"Whenever the President shall find that any rate, charge, or practice of any person engaged in the producing, manufacturing, transporting, supplying, storing, or dealing in any necessaries is unjust or unreasonable or discriminatory and unfair or wasteful he shall order such person, within a reasonable time fixed in the order, to discontinue any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice, and unless such order is revoked or suspended such person shall, within the time prescribed in the order, discontinue such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice, and may in lieu of any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice find and prescribe a just, reasonable, nondiscriminatory and fair rate, charge, or practice, and in any suit in any Federal or State court of competent jurisdiction such finding of the President shall be prima facie evidence.

"Any person who willfully violates any provision of this section or any order or regulation made or prescribed under this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both: *Provided*, That nothing in this section contained shall be construed as conferring authority to fix or establish a general price for any given necessary or necessaries as defined in this act: *And provided further*, That this section shall not apply to any common carrier nor be construed to authorize the fixing or imposition of a duty or tax upon any article imported into or exported from the United States or any State, Territory, or the District of Columbia."

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 2453) to authorize condemnation proceedings of lands for military purposes with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of the president general, United Daughters of the Confederacy; of the president of the National American Woman Suffrage Association; of the president of the National Florence Crittenden Mission; of the president of the International People's Aid Association; of the president of the National Congress of Mothers and Parent Teachers' Association; of the president of the National Women's Christian Temperance Union; of the president of the Ladies of the Grand Army of the Republic; of the president of the Woman's Home Missionary Society of the Methodist Episcopal Church; of the Medical Woman's National Association; of the National Committee of Girls' Work Woodcraft League; of the president general of the National Society of the Daughters of the American Revolution; of the Presbytery of Allegheny of the United Presbyterian Church of Pennsylvania; and of the Cumberland North Association of Congregational Churches and Ministers of Maine, praying for national prohibition as a war measure, which were ordered to lie on the table.

Mr. PHELAN presented a petition of sundry citizens of Los Angeles, Cal., praying for a national prohibition law, which was ordered to lie on the table.

Mr. FLETCHER presented a petition of the Federal Laborers' Union of Lakeland, Fla., praying for the passage of the so-called food bill, which was ordered to lie on the table.

He also presented a petition of the congregation of the First Christian Church of Jacksonville, Fla., and a petition of sundry citizens of Dunedin, Fla., praying for national prohibition as a war measure, which were ordered to lie on the table.

Mr. HOLLIS. I present a telegram in the nature of a petition, which I ask to have printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

CONCORD, N. H., *June 2½, 1917.*

The United States Senate,
Care of Hon. HENRY F. HOLLIS,
Washington, D. C.:

Union Methodist and Baptist congregations of Contoocook petition the Senate in favor of national prohibition of manufacture and sale of both whisky and beer as war measure. All thoughtful consideration

demand this action. We rejoice in the action of the House Saturday and hope the Senate will do even better.

Nelson Canfield, Homer Morgan, Henry Dustin, Francis Glanville, Jacob Tuttle, Frank Mudgett, Arthur Kimball, Reuben Brown, William Phillips, Henry Eaton, Benjamin Wilson, George War, Harold Smith, A. S. Eaton, W. R. Blanchard, John Perry, Arthur Jonds, George Foster, Raymond Barnard, Arthur Dustin, Herbert Cooper, H. P. Skelly, C. L. King, Byron Raymond, Irving Hicks, Charles Perry, Harold Pierson, Perley Raymond.

Please put above in the RECORD. We hope and expect you to vote for prohibition.

J. H. ROBBINS.

Mr. COLT presented a petition of the congregation of the Roger Williams Free Baptist Church, of Providence, R. I., praying for national prohibition as a war measure, which was ordered to lie on the table.

He also presented a resolution adopted by the Rhode Island State Federation of Woman's Clubs, favoring the safeguarding of the morals and the health of enlisted men in the Army and Navy camps, which was ordered to lie on the table.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FLETCHER:

A bill (S. 2503) providing a method for citizens of the United States who have lost their citizenship by reason of taking the oath of allegiance to some other country allied with the United States to regain said citizenship in order to enter the services of the United States; to the Committee on Miliary Affairs.

By Mr. DILLINGHAM:

A bill (S. 2504) for the relief of George W. Richardson; to the Committee on Military Affairs.

A bill (S. 2505) granting an increase of pension to Harry M. Sherman (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 2506) to reimburse the Commonwealth of Massachusetts for expenses incurred in protecting bridges on main railroad lines and under direction of the commanding general, Eastern Department, United States Army, and the commandant, navy yard, Charlestown, Mass.; to the Committee on Claims.

By Mr. SUTHERLAND:

A bill (S. 2507) to reinstate Alonzo E. Wheat to his former rank and grade in the Philippine Scouts, United States Army; to the Committee on Military Affairs.

A bill (S. 2508) granting an increase of pension to Henry Thomas; and

A bill (S. 2509) granting an increase of pension to Sarah A. Bracey; to the Committee on Pensions.

By Mr. COLT:

A bill (S. 2510) granting an increase of pension to Addie St. Clair Hubbell (with accompanying papers); to the Committee on Pensions.

TRADING WITH THE ENEMY.

Mr. WADSWORTH submitted an amendment intended to be proposed by him to the bill (S. 2445) to define, regulate, and punish trading with the enemy, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

WAR REVENUE.

Mr. GALLINGER submitted an amendment intended to be proposed by him to the amendment intended to be proposed by Mr. MYERS to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

HOW THE WAR CAME TO AMERICA.

Mr. SMITH of Arizona submitted the following concurrent resolution (S. Con. Res. 6), which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That the pamphlet entitled "How the War Came to America," issued by the Committee on Public Information, be printed as a Senate document, and that 100,000 copies be printed for the use of the House of Representatives and 50,000 copies be printed for the use of the Senate, the same to be distributed through the folding rooms of the House and Senate, respectively.

HOUSE BILL REFERRED.

H. R. 4961. An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel was read twice by its title.

Mr. CHAMBERLAIN. I move that the bill be referred to the Committee on Agriculture and Forestry.

The motion was agreed to.

CONSERVATION OF FOOD AND FUEL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Mr. REED. Mr. President, only the importance of this great question now pressing for attention warrants me in further asking the time of the Senate. I intend to draw my remarks to as speedy a close as possible, but I wish very earnestly that I may have the attention of the Senate to the first point which I intend to make, because it relates to a matter that is so generally misunderstood and misrepresented that a clear understanding of the truth will change the viewpoint of many Senators.

Just for a moment let me review, so that the context may be plain. On Saturday last, in discussing the causes for high prices of foodstuffs, I called attention to the fact that this increase must be partially ascribed to the following causes: First. The fact that the circulating medium of the world has increased nearly 100 per cent since the war began; that all forms of credit money based on bank deposits, to wit, checks, drafts, and so forth, have been enormously increased. I presented tables showing these facts, all of which appear in the CONGRESSIONAL RECORD of Saturday. Second. A world shortage in wheat. Third. A stimulation of prices invariably incident to war. Fourth. Alarming reports, some of them going to the extent of declaring that the world, including America, is at the verge of starvation. I showed by quotations from market reports the direct effect of these violent assertions upon wheat prices. I commented upon the fact that many of the alleged speculators were in fact bears upon the market. I emphasized the fact that if prices were raised all over the United States it must be in response to some sort of conspiracy or to some great general cause; and I challenged attention to the fact that if there was a nation-wide conspiracy the Department of Justice, the Federal Trade Commission, and the departments of justice of the various States certainly could have dragged some of the culprits to the bar of justice. When I concluded my remarks on Saturday I was asking attention to the fact that Mr. Hoover does not pretend or claim that the speculators on the board of trade are solely responsible for having run up the prices of wheat. Let me quote Mr. Hoover's statement. On cross-examination of Mr. Hoover the search for the speculators was pursued, with the result that Mr. Hoover could not point out their location or describe their habitat, but he was certain the "varmints" were somewhere or thereabouts, and if he were given the absolute and unlimited power he could catch them somewhere or somehow. Every time Mr. Hoover was pressed to answer whether the speculator was in a certain locality or to be found among a certain class of business men he located him elsewhere, until the search came to resemble the experience of the hunter who always finds the game is in the next county.

I call attention to what Mr. Hoover said:

> I do not assume that there was any one criminal, or any criminal in this, but there were 200,000 or perhaps half a million agencies in this country interested in the distribution of wheat and flour, and all of them have received some benefit out of this rise and this margin between the producer and the consumer.

The quotation I have read is sufficient, although there is other evidence along the same line; but notice Mr. Hoover's statement that from 200,000 to 500,000 people were involved. There was no attempt to locate the trouble at any one place or with any one class; and further on in his testimony—and if you will read it you will discover it is true—you will ascertain that Mr. Hoover really means that when the whole country and the whole world became alarmed over a shortage or when they became alarmed because of the rapid rise of prices everybody began to boost prices and to take advantage of the rise.

Now, Mr. Hoover made another statement which I want to lay alongside of this, and which I think constitutes the kernel of the misunderstanding in the Senate and in this country. He asserted, in substance, in discussing speculation and speculative movements, that the farmer sold his wheat last year for $1.60 a bushel; that this ought to produce flour at $9 a barrel, but that it is being sold at $15 a barrel; that somebody is making $5 a barrel on 10,000,000 barrels of flour per month; that this $50,000,000 per month had been taken out of the pockets of the American people; and that in five months' time it has amounted to $250,000,000.

Mr. President, that statement was headlined in every great newspaper in the United States, and the people were given to understand from this statement made by Mr. Hoover that flour was made of wheat that cost $1.60; that it had been sold to the people regularly at an advance of $5 a barrel above the natural

price; and that in five months' time a quarter of a billion dollars had been taken from the American consumer. I repeat that there was not a newspaper in this country that came to my attention that did not contain this statement, and they were warranted in making the statement because Mr. Hoover said that this was the case, and also asserted that the same kind of robbery had not gone on in Europe, but, on the contrary, in Europe the prices have been less than in America.

I propose utterly to destroy and demolish both of these assertions. I propose to show, if I may have your attention, that they are both unfounded in fact. I do not accuse Mr. Hoover, of course, of any intentional misrepresentation; I do not accuse any newspaper of any intentional misrepresentation; but I do say that the fact ought to be determined, and this great case that concerns the American people ought not to be decided upon a misapprehension.

Mr. Hoover's statement on this I ask to have inserted in the RECORD without reading. If any Senator desires me to read it, I shall read it now; but his statement is clear and unequivocal.

Mr. VARDAMAN. I suggest that the Senator read it.

Mr. REED. Very well; I will read a part of it, as follows:

How important it is that we should arrive at some method of excluding the "legitimate" and illegitimate speculation from trades may be perhaps emphasized if we consider what has happened during the past year in the matter of flour. If we assume that the farmer last year received an average of, at the highest, $1.60 per bushel for his wheat, then with the addition of the normal manufacturing cost, righteous profits of distribution, the price of flour should not throughout the country in the larger consuming centers have exceeded $9 per barrel, and yet the price of flour at a great many centers is $15 per barrel throughout the country and probably averages over $14. Some one is taking $5 per barrel on 10,000,000 barrels per month which is marketed in this country. This is $50 000,000 per month taken out of the American public, and since the raise of price of flour above $9 per barrel, we may assume rightly that over $250,000,000 will have been extracted from the consumer in excess of normal profits of the trade and distribution.

That is from his testimony, and in addition to it I ask the Senate to read pages 37, 38, and 39 of his testimony, and I ask to include excerpts from those pages as part of my remarks without reading.

The VICE PRESIDENT. Without objection, permission is granted.

The excerpts referred to are as follows:

Senator REED. Mr. Hoover, you stated in your manuscript, from which you spoke in the early part of your testimony: "If we assume that the farmer last year received an average, at the highest, $1.60 per bushel for his wheat, then with addition of the normal manufacturing cost, righteous profits of distribution, the price of flour should not, throughout the country in the larger consuming centers, have exceeded $9 per barrel, and yet the price of flour in a great many centers is $15 per barrel throughout the country, and probably averages over $14. Some one is taking $5 per barrel on 10,000,000 barrels per month which is marketed in this country."

Mr. Hoover, do you mean to say by this statement that throughout the year the price of flour has been $5 higher than the price it should have been, based upon the price of wheat that the farmer receives?

Mr. HOOVER. No; it is $5 higher now than it should have been. The price of flour has been gradually ascending from its normal, which was in a proper relation. For the first three months of the year it bore a close relation to the price the farmer received. Since the farmer marketed his crop it has been gradually ascending until it has reached the present price.

Senator REED. You assume the farmer has marketed his crop, but let us eliminate that. As a matter of fact, the price of flour in the market has followed the market price of the wheat throughout the entire year, with some slight fluctuations such as are to be expected. Is not that the case?

Mr. HOOVER. It has followed the quotation in wheat, but it has not followed the price which the farmer received for his wheat.

Senator REED. I am not speaking about the farmer; I am talking about the price of wheat in the market. You can use the term "quotations"?

Mr. HOOVER. Yes.

Senator REED. Now, as a matter of fact, the farmer, beginning in the month of July, sold large quantities of wheat during the whole of that month, and it went to the market at probably less than a dollar a bushel to the farmer, and flour was sold to the consumer at corresponding prices. That is true, is it not?

Mr. HOOVER. Well, I have not looked into the exact relation for that month.

Senator REED. I have the figures before me, and I will not mislead you in quoting them. So that throughout the year, and up even to the present time, the price of flour has followed the price of wheat in the market. That is correct, is it not?

Mr. HOOVER. That is correct, always with that reservation, that the farmer did not get that difference in value.

Senator REED. Mr. Hoover, I ask you if it is not a fact that the wheat supply in the elevators of the large cities was practically exhausted when the great boom came in the price of wheat along in the month of May?

Mr. HOOVER. No, sir.

Senator REED. Is it not a fact that when wheat touched its high price there was probably less than 200,000 bushels in the city of Chicago in the elevators?

Mr. HOOVER. Well, you have the visible supply of wheat in the country as a statistical matter at all times, and there has been ample supply of wheat to carry the milling through until the next season.

Senator REED. No; but I was asking you about the market. I do not want to get into any dispute about things that there ought to be no dispute about. Is it not a fact that in the elevators of the large cities, when wheat rose so rapidly on the market, the wheat in the elevators in the large cities was at a very low point? Do you know anything about that?

Mr. HOOVER. It seems to me that is a very broad statement. There is no doubt the visible supply of wheat was less than it was the previous year, but it was not at a very low point.

Senator REED. Was it not about 150,000 at Chicago at the very low point?

Mr. HOOVER. I don't know what the low point was.

The CHAIRMAN. I think it was about 156,000 in Chicago the day they closed.

Senator REED. And was it not in the public elevators of Kansas City, which is another one of the great grain markets, very much lower than it is normally?

Mr. HOOVER. I can not tell you about the particular situation in given elevators.

Senator REED. I think you stated the visible supply in the country was about 100,000,000 bushels. Where was that supply, do you know? You do not know what was held in the big cities; do you know where the rest of it was?

Mr. HOOVER. I did not state it was 100,000,000; I said it was a little below the normal.

Senator REED. Oh, I thought you did say it. How are you able to say where it was held if you do not know what was held in the large cities?

Mr. HOOVER. I take the statement of the total visible supplies in the country. I did not myself go into each particular elevator throughout the country. It seems to me here is a case where the proof of the cake is in its eating—that we will have enough wheat in the country to carry us through to the next season.

Senator REED. What I am trying to get at is, how do you know none of this wheat was held by the farmers? As a matter of fact, it was coming into the primary markets, so called, at the rate of several million bushels a month, and that wheat is generally farmers' wheat. Is not that true?

Mr. HOOVER. Well, I rely on two or three different sources of information. The first is a calculation in the department as to the prices at the periods of relative flow in the movement of the wheat, showing that the bulk of wheat was marketed in this country before the end of January.

The other is the opinions expressed by the various farmers' associations, of which I think we have consulted six, and other sources of information, and some of them placed it at as low as $1.30. I took the highest figure which was mentioned—$1.60.

Senator REED. That is just the question I am trying to get at. You say the bulk of the wheat was marketed in January. As a matter of fact, there was marketed on the average nearly 5,000,000 of wheat for each week of January, February, March, April, and May at the 11 primary markets, which is generally understood to be farmers' wheat?

Mr. HOOVER. Not always; it may be line-elevator wheat.

Senator REED. Oh, some of it might be; yes. The largest amount received in any of these markets was a little over 13,000,000 bushels, which was back in July, right in the harvest. But now I am coming to another question.

Mr. REED. Now, Mr. President, what are the facts? Understand the point is that we have been charged $15 a barrel when we ought to have had flour for $9 a barrel, and that this has been robbing us of $50,000,000 a month.

The facts are:

(1) That when wheat was cheap flour was cheap, and that flour never went above $9 until the month of March and did not go much above $9 until the month of May. In a word, the consumer had the full benefit of cheap wheat as long as wheat was cheap instead of being swindled out of $250,000,000, as Mr. Hoover states. He had flour at reasonable prices until the allies cornered the wheat in the American market.

[1] May wheat. [2] July.

In July, 1916, when Chicago wheat was $1.08, the low price, flour was $5.40, not $9, and the consumer got his flour at $5.40. I give the fluctuations above that in this table.

On August 12, with wheat at $1.40, flour was $7.30, not $9.

Mr. HUSTING. Mr. President, may I ask the Senator a question?

Mr. REED. Will the Senator wait until I get through with this table, please?

Mr. HUSTING. I just wanted to ask the Senator what prices he is quoting. Are those the prices to the consumer?

Mr. REED. They are the wholesale prices, of course.

Mr. HUSTING. That is, the market price?

Mr. REED. Yes; the wholesale market price.

Mr. HUSTING. The Senator does not give the price charged the consumer by the retailer?

Mr. REED. Why, it would be as impossible to do that as it would be to tell what time the American citizen goes to bed, because he goes to bed at different times. The price charged by the retailer, as the Senator must know, varies with the cities, varies with the parts of the cities, varies with retailers in the cities, and of course I can not tell him—nobody can tell—what the retail prices are.

Mr. HUSTING. The Senator said that he was quoting the prices charged the consumer. The Senator now answers the question by saying that that is not the price charged the consumer.

Mr. REED. That is the wholesale price, and when you fix the wholesale price of flour of course you fix the price that wheat costs the consumer as near as you can trace it to the consumer. Of course, if you carry it on into bread and carry it on into cakes and things of that kind, you can not get the price.

Mr. LEWIS. Mr. President——

Mr. REED. I hope the Senator does not mean to say that I was not stating this matter accurately.

Mr. HUSTING. Mr. President, I do not know. The Senator stated that this was the price charged the consumer. It is evident now that that is not the price charged the consumer, but the market price which is charged the retailer.

Mr. LEWIS. Mr. President——

Mr. REED. Why, certainly; and that means that the wheat has gone to the consumer from the speculator, as he is called, through the miller. It has passed through the wholesaler. It has passed to the point where the people come to buy from him. Beyond that I can not trace it.

Mr. LEWIS. Mr. President, I fear that the Senator from Missouri has not apprehended what is in the mind of the Senator from Wisconsin, and what the Senator from Wisconsin has inadvertently failed to convey, but which becomes very important. It is clear that the Senator from Wisconsin wishes to communicate to the Senator from Missouri that probably Mr. Hoover meant that the price of $9, which the Senator seeks to refute, was the price charged by the retailer to the consumer.

Mr. REED. Oh, no; Mr. Hoover meant nothing of the kind. His testimony shows it.

Mr. LEWIS. I desired to ascertain if that was not really what was meant.

Mr. REED. Mr. Hoover meant nothing of the kind, and his testimony will show that he was talking about the prices of flour by the barrel.

Mr. HUSTING. Mr. President, I want to say to the Senator now that I know that flour has been sold in this city, not by the barrel, but in smaller quantities, at the rate of more than $16 a barrel.

Mr. REED. I have not the slightest doubt of it; and I have not the slightest doubt, either, that there has been the same degree of difference in all sorts of things. I want to continue with this argument, however.

I do not intend to be interrupted to the extent of arguing any such miserable, petty, senseless thing as that there is a difference between the prices that different retail men charge, because nobody can trace that, and even Mr. Hoover states that he does not intend to try to regulate the retailer at all. When you get to the retailer, he turns the public over to the tender mercies of the retailer, and that is in his testimony.

Mr. JOHNSON of South Dakota. Mr. President——

Mr. REED. The Senator from Idaho [Mr. BORAH] desires to ask me a question. I yield first to him.

Mr. BORAH. The interruptions made it impossible for me to catch the figures which the Senator gave as the figures which represented the prices of flour to wholesalers.

Mr. REED. I am printing a table. I have simply taken the price of flour by months, and I have given the price of wheat on the Chicago market, and I have also given the price to the

farmer, as it is estimated by the Department of Agriculture; but the figures I am using are the Chicago prices of wheat. I will try to make it so that the Senator can hear. We will take the prices of wheat running from the first week of July. They average from $1.02 to $1.21. The price of flour ran from $5.40 to $5.60 a barrel, not $9 a barrel.

We take the next week, which is the first week of August. The low prices of wheat ran from $1.34 to $1.44½. That is, there is a high and a low price. I am taking the low prices, both on wheat and on flour. The price of flour was $7.30, not $9.

Take the first week of September; by this time wheat ran up to approximately $1.50 and the price of flour to $7.75.

The first week of October the price of wheat went up so that it touched $1.72. The price of flour had gone up to $7.90, but had not reached $9.

Coming to the month of November, the price of wheat went up in the neighborhood of $1.80 and flour to $8.40, but it still had not touched $9.

The month of December wheat had dropped off, going to approximately $1.70, and flour had dropped off, going down to $7.60.

Coming to the year 1917, for the first week in January the average price of wheat in Chicago had gone to approximately $1.85 and flour had gone to $8.75. It still was below $9.

The first week of February wheat was in the neighborhood of $1.70, having dropped a little, and flour had fallen off, going to $7.60.

Coming to March, wheat had gone up so that it crowded $2, and flour had gone to $9.20; and that is the first time it had gone above $9.

Coming to April, flour fell, although wheat rose a little. Flour fell to $9, but the No. 1 flour went to $12.50.

Coming now to May, when the allies cornered the market, wheat touched $3; flour went to $13 to $15—the highest point reached in any of these months.

The same condition is shown in June.

Mr. President, that is a very different story than that speculators got hold of wheat at $1.60 and proceeded to hoard it, and proceeded to run the price of flour up to above $9, and to rob the American people of $50,000,000 a month. The fact is that the American consumer was receiving this flour—that is, as near as I can trace it to the consumer, the regular quoted prices of flour by the barrel—during 10 out of the 12 months for less than $9 a barrel.

Mr. GALLINGER. Mr. President, will the Senator permit me?

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from New Hampshire?

Mr. REED. Certainly.

Mr. GALLINGER. I think I am correct in the assertion that, according to the quality of wheat, it takes from four and a half to five bushels of wheat to make a barrel of flour.

Mr. REED. Yes, sir.

Mr. GALLINGER. So that, according to the figures the Senator has given, the rise in the price of flour corresponded exactly with the rise in the price of wheat, which was an inevitable result.

Mr. REED. Exactly; and there must be allowance made for slight fluctuations up and down, but that is the general rule. It can not be talked away, it can not be laughed away, it can not be sneered away; that is the fact.

Now, Mr. President, I come to the next assertion which is made by Mr. Hoover, and which is to the effect that——

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Idaho?

Mr. REED. I do.

Mr. BORAH. Before the Senator passes to this other subject, did I understand him to say that Mr. Hoover conceded that $1.60 wheat justified $9 a barrel for flour?

Mr. REED. He did.

Now, Mr. President, I come to the next statement of Mr. Hoover, and I read it, so that there can be no error about it.

Mr. Hoover said:

> There can be no more vivid evidence of the desirability of food control in this situation than a comparison between our prices and the prices of foodstuffs in countries where there is some measure of food administration. I will not traverse the prices of all commodities. More to say, as a general fact, the average prices to the consumer are lower in food-controlled countries than in the United States. Practically the entire wheat supply to Belgium is to-day imported from the United States, and, despite the extraordinary costs of transportation, the price of bread is 60 per cent of the price in New York City. A large portion of the wheat of France comes from this country, and yet the price of bread is, again, 40 per cent below our own. In England, where food control was started too late, the price is 30 per cent below our price, and in Canada, again, we see a lower range of prices to the consumer than in our own country, although the producer realizes the same price.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Montana?

Mr. REED. I do.

Mr. WALSH. I beg the pardon of the Senator for interrupting him; but an inquiry addressed to him a moment ago by the Senator from Idaho [Mr. BORAH] will, I fear, leave an unjust impression, and I am sure the Senator does not want to have Mr. Hoover misunderstood about the matter.

Mr. Hoover did not say that a price of $1.60 per bushel for wheat would justify a price of $9 per barrel for flour. He said that if no more than $1.60 was received for wheat the price per barrel of flour should not be to exceed $9.

Mr. REED. Very well. I accept that correction, if it be one.

Mr. BORAH. I do not think that changes the situation.

Mr. HUSTING. Mr. President——

Mr. REED. Now, do not let us have an argument started here by associates, please, until I get through with this particular theme. Then I will go back and take up this other matter; but I want now to get in, somewhere in connection with each other, these two points.

Mr. HUSTING. I just want to clear up the point that is now under discussion, and then I will not interrupt the Senator again.

Mr. Hoover's statement is this:

> If we assume that the farmer last year received an average of, at the highest, $1.60 per bushel for his wheat, then, with the addition of the normal manufacturing cost, righteous profits of distribution, the price of flour should not throughout the country in the larger consuming centers have exceeded $9 per barrel.

So that his figures are the price charged the consumer, and the Senator's statement is as to the market price in the cities minus the cost of bringing it into the houses of the consumer. So that the Senator's figures do not necessarily disprove the statement of Mr. Hoover.

Mr. REED. Oh, well, Mr. President, if anybody wants to resort to that species of logic in order to becloud the plain statement of a witness that is here in the record and can be read by everybody, let him do it. I will waste no time with it. I have no interest in misstating Mr. Hoover's evidence. He took $1.60 as the basis. He figured that $9 a barrel for flour would be justifiable. He then practically asserted that we were paying from $14 to $15, and that we were being robbed $5 a barrel, and had been for months. I have shown that during all of those months but two our prices were away below $9. I come now to his assertion that because of food control prices are so much lower in European countries than they are here.

Mr. President, I have not the time to follow everything out to its ultimate destination, so far as all the things that we eat are concerned; but let us take this one question of flour. I put into the RECORD now a table which I challenge all Senators who want to arrive at a fair conclusion—and I hope we all do—to examine. Let me tell you who prepared this table. It is prepared and is certified or stamped by the United States Department of Agriculture, Bureau of Crop Estimates, June 21, 1917, Crop Records Division. I challenge your attention to it. Here are the New York prices and here are the London prices for flour, beginning with the month of May, 1916, and ending with the month of June, 1917, both inclusive, which embraces a period of 14 months.

Prices of flour in May: New York, $6.25 to $6.50; London, $8.17 to $8.35.

June: New York, $5.75 to $6.10; London, $7.83 to $8.

July: New York, $5.95 to $6.20; London, $7.32 to $7.49.

August: New York, $7.90 to $8.25; London, $8.69 to $8.86.

September: New York, $8.25 to $8.60; London, $9.20 to $9.37.

October: New York, $8.50 to $8.75; London, $9.54 to $9.71.

Observe this does not mean the consumer in either case, according to my friend from Wisconsin; it just means the price of flour by the barrel.

Mr. HUSTING. To whom?

Mr. REED. The market price of flour. If the Senator does not know what that is, I can not tell him.

November: New York, $9.70 to $9.95; London, $10.56 to $10.73.

December: New York, $9.20 to $9.45; London, $10.56 to $10.73.

That concludes 1916. Let us take 1917.

January: New York, $9.75 to $10; London, $10.56 to $10.81.

February: New York, $9 to $9.25; London, $10.73 to $10.90.

March: New York, $9.75 to $10; London, $10.73 to $10.90.

April: New York, $11.25 to $11.50; London, $11.75 to $11.92.

May—now we come to the wheat corner worked by the allies themselves by buying 100,000,000 bushels and cornering the market, and here for the first time you find that in May flour went to $16.50 and $16.75, according to the figures of the Bureau of Crop Estimates, while it was $12.43 to $12.60 in London.

In June flour fell off in our market to $14.50 and $14.75. I have not the London market, but I assume for the sake of averages that it remained at the figures last given.

Wholesale price of wheat flour on or about the 15th of the month at New York and London.

[Per barrel of 196 pounds.]

Years and months.	New York—Spring patents.		London—American spring, good.	
	Low.	High.	Low.	High.
1916.				
May	$6.25	$6.50	$8.17	$8.35
June	5.75	6.10	7.83	8.00
July	5.95	6.20	7.32	7.49
August	7.90	8.25	8.69	8.86
September	8.25	8.60	9.20	9.37
October	8.50	8.75	9.54	9.71
November	9.70	9.95	10.56	10.73
December	9.20	9.45	10.56	10.73
1917.				
January	9.75	10.00	10.56	10.81
February	9.00	9.25	10.73	10.90
March	9.75	10.00	10.73	10.90
April	11.25	11.50	11.75	11.92
May	16.50	16.75	12.43	12.60
June	14.50	14.75	12.43	12.60

NOTE.—The prices at New York are from the New York Journal of Commerce and prices at London are from Mark Lane Express.

Now, observe that for 12 months out of the 14 months flour was cheaper in New York than in London. Instead of our being robbed $5 a barrel during this time and London being saved $5 a barrel by food control, for 12 months out of the 14 months the uncontrolled market of the United States was better than the controlled market of London, and for many months they paid an enormous percentage above, where they had all the blessings of food control.

The table shows that throughout the 12 months flour was materially lower in New York than in London. The average price in the United States for the whole 14 months was $9.59 a barrel, and the average price in England was $10.20 a barrel; and if you assume 10,000,000 barrels consumed each month in the United States, as Mr. Hoover assumes, then the 140,000,000 barrels cost the American people $85,400,000 less than the same amount of flour cost the English people, and instead of our getting our flour at $5 more a barrel than they pay, we receive it actually for less than they pay.

Yet this stupendous mistake has been sent to the people of the United States as the solemn fact in the case, and it will be as hopeless to expect the facts to be sent out and to reach these people as it is to gather up any slander so that it will be completely eradicated. I do not mean that these were slanders. I am using that term by way of illustration of the difficulty of picking these things up. Senators, you can not change a fact by juggling with the fact.

I do not say that these figures I have given you are conclusive of anything except that we have been going upon a mistaken basis, and that the people in this country have been told by Mr. Hoover and other advocates of this measure that prices are excessively high for flour, that they have been robbed all the year through, whereas the prices I have quoted show that flour was at its normal value the greater part of the last year. What was charged by the retailers I do not know, and for the purposes of this argument it is immaterial, because, mark you, Mr. Hoover himself expressly says he does not expect to control the prices of the retailers.

Now I approach the question raised by my friend from Wisconsin [Mr. HUSTING]. Let me show the impossibility of getting at retail prices. Here is a man who is selling groceries, let us say, at the crossroads in the country. He has a building that perhaps cost him $500 or $600 to build. The ground that he occupies is not worth perhaps more than $50 or $75. He has no ground rent to pay. He has no heavy cost to pay. He does his work himself. He sells to the people of the community on a profit that will enable him to live and save something over. Another man in the city of Washington or in the city of New York rents a store in the business part of the town and may be obliged to pay $12,000 or $15,000 a year for rent. He delivers his groceries to all parts of the city. A lady orders 5 or 10 cents' worth of something and a man must be sent to deliver it. The man who rents the building charges that rent because it is in a favorable location, and the man who rents the building probably has to pay interest on an enormous loan made upon that building. It is, of course, manifest that there can be no real comparison between the retail prices of the man at the crossroads and the man who occupies the building in town.

Mr. HUSTING. Mr. President——

Mr. REED. I do not say that for any other purpose now than merely as I go along to point out the impossibility of regulating retail prices.

Mr. HUSTING. Will the Senator permit me one word? The Senator does not seem to understand or make clear the point in this matter. The question is not as to the retail price to the consumer. The point the Senator tries to make is that Mr. Hoover is guilty of a statement that does not conform to the fact. The point I tried to raise is this: Mr. Hoover says, in effect, the cost of flour to the consumer after the payment of the charge of distribution, which means not only the manufacturing cost but the jobbers' charge and the retailers' charge and the transportation charge, and it eventually gets to the consumer, ought not to exceed $9 a barrel. The Senator's figures go no further than the market price at certain places, and leave out of the question the cost of distribution. Consequently Mr. Hoover's statement is to the effect that all the consumer ought to pay when he gets it into his house is $9 a barrel.

Mr. REED. In what shape?

Mr. HUSTING. Ready for use in the house.

Mr. REED. In the shape of flour?

Mr. HUSTING. Yes; in the shape of flour. So the Senator, it seems to me, misinterprets the statement made by Mr. Hoover, because Mr. Hoover says that $9 ought to pay for putting it in the consumer's house. Anything in excess of that, he says, is more than a fair price. Anybody who has bought flour——

Mr. REED. I am not going to yield to the Senator to make one of his speeches. If he has a question to ask, he may ask it; but I can not yield in the middle of a speech.

Mr. HUSTING. I merely wish to state that everybody knows flour has cost the consumer who has paid for it in the last four or five months $14 a barrel and over.

Mr. REED. I know that the consumer for the last four, five, or six months has not paid any such price, if he bought with any sense. Of course, if a man went down and bought 4 or 5 pounds of flour at a time, and paid the retailer whatever he asked, that is a different question. I do not intend to fool away my time or the time of the Senate heckling with my friend from Wisconsin in regard to what Mr. Hoover said. His testimony is here. Partial quotations from it will get no one anywhere. I have no desire to misrepresent Mr. Hoover. I do not think Mr. Hoover made a statement he did not believe, but I do say Mr. Hoover was in error in regard to his statement, and all Senators have to do is to take 30 minutes of time and read his testimony, and they can take either my construction or the construction of my distinguished and able friend from Wisconsin in order to arrive at a conclusion that Mr. Hoover was talking about the price of flour, and the only way you can fix that is to have the price of flour as it is sold by the barrel, and he was talking about it by the barrel, not by a handful or a spoonful or a pound, but by the barrel.

Mr. President, I challenge attention now to another thing, when we come to the question of prices, price regulation, and so forth, that the rise in prices has been the same all over this round earth, speaking broadly and generally.

Mr. NORRIS. Mr. President——

Mr. REED. I yield to the Senator.

Mr. NORRIS. In regard to the Senator's very interesting statement and comparison of prices, I wish to ask him if he has succeeded in getting any figures besides those he has given? I understand he has not given the figures as to either Belgium or Paris.

Mr. REED. I am coming to those. I am satisfied we might as well throw out of consideration the case of Belgium. Belgium is a conquered country, under the control of military despotism. The people are being practically supported on charity. Prices, therefore, in Belgium would not afford us very much real information for the purposes of comparison; but I am coming to some other countries.

I have in my hand the Monthly Review of the United States Bureau of Labor Statistics for the month of June, 1917. I call attention to the fact that two things are pretty clearly shown by the figures I am about to give: First, that the prices in food-controlled countries have been a little higher than they have in those where they have not had food control; and, second, that there has been a general rise of prices throughout the world, which I again insist is due chiefly to the general causes to which I have already called attention. But let us take these other countries. As to France, I read from pages 963 and 964 of the

Monthly Review of the United States Bureau of Labor Statistics:

The general statistical office of France has required the mayor of each city of over 10,000 population (excepting Paris) to report the prices of 13 articles of household consumption for the first quarters of 1911 and 1913—

That gives us the period before the war.

FRANCE.

[Bulletin de la Statistique Generale de la France, October, 1916, pp. 37 and 42.]

The general statistical office of France has required the mayor of each city of over 10,000 population (excepting Paris) to report the prices of 13 articles of household consumption for the first quarters of 1911 and 1913, the third quarter of 1914, the first and third quarters of 1915, and the first, second, and third quarters of 1916.

These prices, applied to the quantities used during a year by a household of four persons living in Paris, form the basis upon which a series of index figures has been calculated for each of the quarters named.

In the table thus prepared only such cities as furnished data for each of the eight investigations are included.

The following index numbers show the variation in prices of the 13 commodities, as calculated for the whole of France, for the third quarter of 1914 and the subsequent period of investigation. These indexes are the arithmetical averages obtained by multiplying the assumed consumption of each article by its average price and dividing the sum of the products thus obtained by 13.

1914, third quarter	1,004
1915, first quarter	1,105
1915, third quarter	1,235
1916, first quarter	1,336
1916, second quarter	1,379
1916, third quarter	1,420

The increase in the cost of living for all France since the third quarter of 1914, as demonstrated by the foregoing table, is approximately 41 per cent.

A special table calculated for the city of Paris for various months from July, 1914, to October, 1916, shows an increase of 38 per cent in the cost of living, based upon a hypothetical consumption.

This does not bring us, I am sorry to say, down to date, and you must make allowance for the fact that there has been a rise in prices since the latest date given here, which is October, 1916.

The special table calculated for the city of Paris for various months from July, 1914, to October, 1916, shows an increase of 38 per cent. That is a much larger increase than could be shown in this country for the corresponding period. If the increase there has been as rapid since as it has been in other countries, then their cost of living must have gone very much higher than is indicated here. But 41 per cent is high enough to demonstrate that they are suffering in France just as we are suffering in this country, and naturally they would.

But the Senator asked for figures from other countries. I give you now Great Britain from this same book, and I give it from page 965:

GREAT BRITAIN.

[Board of Trade Labor Gazette, Feb., 1917, p. 51, and April, 1917, pp. 129–130.]

The increase in prices of food during the month of March was noticeable in oleomargarine, bread, cheese, and fish; prices of bacon, flour, tea, and meat advanced from 2 to 4 per cent, while sugar, milk, butter, and potato prices remained practically unchanged. Eggs showed a considerable drop in prices. As compared with April, 1916, food prices as a whole increased about 32 per cent.

Prices of July, 1914, are taken as the base for calculating the rate of increase in the prices of 16 articles of food shown in the following table. The data for February 1 are given as being more nearly comparable with those reported from other countries.

Per cent of increase in prices of various articles of food in Great Britain, Feb. 1 and Mar. 31, 1917, as compared with July, 1914.

Potatoes	145	118	131	132	103	117
Total (weighted)	93	85	89	99	90	94

In arriving at the general increase the various articles are weighted according to the proportionate expenditures on them in prewar family budgets, no allowance being made for the dietary changes due to economies. If these changes were taken into consideration, the general per cent of increase since July, 1914, would be much less. Household necessities other than food are estimated to have increased approximately 65 per cent in the same period.

It will not do for any man now to claim that the high prices in this country are chargeable to speculators, and those not located, and that they have low prices in England and no speculation but food control, and yet be confronted with these facts, which show this increase in prices.

What I am arguing for is this: It is my text here to-day, and I want, if possible, to impress it upon my fellows, that there are back of these food-increase prices great general causes that affect the world. I called attention to some of those causes. I repeat, lest somebody should misunderstand me or misrepresent me, that if we can locate a food speculator in this country, wherever and whenever we locate him I am willing to deal with him as rigidly as any man in this body.

Now, I go to other countries. Take Italy: I confess I do not know whether Italy has food control or not, with the lamentable want of information, at least in regard to many of those countries. But here are prices arranged on what is called the index system:

ITALY.

The semimonthly bulletin of the Italian Labor Office (Bolletino dell'Ufficio del Lavoro, Mar. 16, 1917, p. 46, and Apr. 1, 1917, p. 56) publishes each month the retail prices of seven articles of food collated from reports furnished by municipal authorities, cooperative associations, or labor unions in 43 principal cities. In the issues of March 16 and April 1, 1917, the average retail prices and corresponding index prices are shown for each month from July, 1914, to January, 1917. The prices for November and December, 1916, and January, 1917, are reproduced in the following table:

Actual and relative prices of foodstuffs, based on average prices in 43 cities of Italy, November and December, 1916, and January, 1917.

Milk	107.2	116.0	116.9
General index	125.0	130.6	136.0

The table shows that there has been in Italy substantially the same rate of increase as in England. It is difficult to explain these tables so that they are as clear as when you look at them. I ask leave to insert in the RECORD this table, together with the statement accompanying it, and I ask Senators to examine it for themselves.

I come now to the Netherlands. Can any Senator here answer me whether they have food control in the Netherlands? I am not informed myself.

I quote from the monthly review above referred to, pages 966 to 967, which is as follows:

NETHERLANDS.

[Maandschrift van het Centraal Bureau voor de Statistiek, February, 1917, pp. 193, 194.]

The bulletin of the bureau of statistics contains statistical tables showing the trend of wholesale prices of grain, oils, coffee, sugar, kerosene, tin, etc., and a table of relative prices of 20 articles, in some of which more than one grade is given, so that the series is composed of 29 items, and also a table showing the relative price of coke in eight cities.

Retail prices are based on reports furnished by various cooperative societies. The average prices for the year 1893 are used as the base in calculating the relative prices.

The following table shows the relative prices thus obtained for the years 1913 to 1916 and for December, 1916, and January, 1917.

Relative prices in the Netherlands, 1913 to 1916, and December, 1916, and January, 1917.

[Average prices for 1893=100.]

Average	114	116	142	167	186	186

The price of fuel varied in the different localities. The yearly arithmetical averages of the relative prices for the eight cities are reported as follows (1913=100): 1914, 95.58; 1915, 123.73; 1916, 152.10; and for the months of December, 1916, 168.43, and January, 1917, 177.37.

Thus it appears that over in those countries, in the Netherlands, the same general rise has occurred.

I call attention now to the Scandinavian countries. This table relates to the actual and relative prices of 22 commodities of household consumption in the capital cities of the Scandinavian countries, July, 1914, and July, 1916, and February, 1917. It appears that there is some regulation of prices by law, and that is indicated in the table here as there is a maximum price, but if Senators will examine this table they will find that it, as well as those I have given, shows the general world rise in prices.

SCANDINAVIAN COUNTRIES.

[Capital cities.]

Retail prices averaged from monthly quotations reported by dealers in the capital cities of the Scandinavian countries are fairly comparable, as the habits of consumption and manner of life are very similar in the three countries. The commodities reported for Norway and Sweden are quite similar in quality, while those for Denmark are less comparable, particularly as regards meat. Quotations of milk, butter, oleomargarine, eggs, potatoes, flour, coffee, sugar, and kerosene are quite comparable. Sugar prices in Christiania are noted as abnormally high. In Copenhagen sugar purchased by card is considerably lower than when purchased without card. The highest prices for coal prevail in Copenhagen.

Actual and relative prices of 22 commodities of household consumption in the capital cities of the Scandinavian countries, July, 1914, July, 1916, January and February, 1917.

The same condition now is true of Norway. I ask leave to insert that table as it is here given.

The PRESIDING OFFICER (Mr. POINDEXTER in the chair.) In the absence of objection, permission to do so is granted.

The statement referred to is as follows:

NORWAY.

The official bulletin of the Norwegian labor office (Sociale Meddelelser, utgit av Departementet for Sociale Saker, 1916, No. 6, pp. 178 and 180) shows that the general level of prices of 24 articles, comprising 43 grades and 9 classes of household commodities, has advanced since July, 1914 (100) to 182 in October, 1916, 187 in November, and 194 in December. In all but 7 of the 43 quotations the relative prices advanced during the period October to December, 1916.

The bases of the computation consist of reports received from 17 cities. The following table shows the average prices during the month of July, 1914, and the relative prices based thereon for the last quarter of 1916:

Average prices of 24 articles of household consumption in Norway, July, 1914, and their relative prices in October, November, and December, 1916.

[1] 75 per cent of wheat utilized. [2] 2,000 pounds.

Mr. REED. Mr. President, the Senator who studies these tables, and does it with the dust out of his eyes and the cobwebs out of his brain and the prejudice out of his soul, will be compelled to say that a general world rise in prices has occurred. I think that candid and fair consideration of the whole question will lead us all to the conclusion that we must find this general rise accounted for by general world-wide conditions, and that therefore when we approach the question of any kind of legislation we must do it with reference to these great facts that concern the world and that we can not brush aside.

Beef in the United Kingdom rose 105 per cent; in the United States of America, 24 per cent. Bacon in the United Kingdom rose 78 per cent; in the United States, 36 per cent. Bread in the United Kingdom rose 93 per cent; in the United States, 36 per cent. Granulated sugar in the United Kingdom rose 172 per cent; in the United States, 92 per cent. Milk in the United Kingdom rose 60 per cent; in the United States, 14 per cent. Butter in the United Kingdom rose 78 per cent; in the United States, 56 per cent. Eggs in the United Kingdom rose 72 per cent; in the United States, 50 per cent. Potatoes in the United Kingdom rose 117 per cent; in the United States they rose 225 per cent; and everybody knows why that was in the United States. We raised only about one-half as many potatoes here last year as we do in ordinary years; and that will be regulated—mark what I tell you—in less than 30 days' time. Just wait until we begin to get our potatoes in from this isothermal line; wait until they commence to come into our markets, as they will by the millions of bushels, and you will see a rapid drop, just as there has already been an enormous falling off in the price of wheat. If you will wait a little bit and give time and the good Lord a chance, a good many of these difficulties will disappear.

Mr. President, before I leave this topic I want to present a table showing the comparison of the increase of prices in Great Britain—and I mean by that the British Isles—and in the United States, the prices in Great Britain at the present time being compared with the prices in July, 1914, with a similar comparison in the United States, the two tables presented now showing the increase which has occurred in percentages.

The table is as follows:

Per cent of increase in prices of food in Great Britain, Mar. 31, 1917, as compared with July, 1914. Also in the United States Apr. 15, 1917, as compared with July, 1914.

[Taken from the Monthly Review of the United States Bureau of Labor Statistics, pp. 954, 955.]

	United Kingdom.	United States.
	Per cent.	*Per cent.*
Beef	105	24
Bacon	78	36
Bread	93	36
Granulated sugar	172	92
Milk	60	14
Butter	78	56
Eggs	72	50
Potatoes	117	225

Mr. President, I want now to show, if I can, that this bill, while it is broad enough to reach almost every kind of industry, yet it is in fact aimed at the American farmer. When the American farmer wakes up to this proposition, I think all of us will find the question of sufficient importance to give it some careful thought and study.

The examination of Mr. Hoover developed nothing more interesting that the fact that he did not understand that there was contained in this bill several great controls to which his attention had not even been called. He doubted that there was anything in the bill that would give the right to control whatever went on the tables of the people; and yet when his attention was called to the word "consumers" he readily agreed that, in his judgment, that ought not to be permitted. Attention being called to the fact that the bill would control mines, I think I fairly state his testimony when I say that he indicated at least a slight degree of information or interest on that question.

The bill is aimed at the farmer. The thing which we are asked to regulate is the price of foodstuffs, and the American farmer is the producer of foodstuffs. Mr. President, I now make the assertion that the bill proposes to fix one price for all the American farmer produces, and that if it is not the intention to do that then the bill is broader than the intention of its authors; but I believe it is fair to say that such is the intent and purpose of the bill.

It is true it is proposed to authorize the President to guarantee the farmer a certain particular price, and that is thrown out as a sort of sop to the farmer to convince him that he is going to be taken care of; but let us assume that there is to be arbitrarily fixed by somebody a price at which the farmer, if he complies, can market to the Federal Government that which he produces. I assert that under this bill, if its powers are to be exercised—and if they are not to be exercised they ought not to be here—the price of the farmer's product is to be absolutely fixed. Let us see.

It is generally conceded, is it not, that the price of the surplus of our farm products which is shipped abroad fixes the prices of the product at home; that the price of wheat in Liverpool fixes the price of wheat in New York City, and is the same, plus the carrying charge? Why, Democrats, we have always argued that, and, Republicans, you will not upon this question deny it. What are the facts now? We ship millions and hundreds of millions of bushels of wheat and corn and hundreds of millions of pounds of meat to Europe. Whoever can control the European price will control the farmer's price and will control our market price. We have already given to the President the power to place an entire embargo upon anything that is shipped from this country. The power to place an embargo carries with it the power to name the conditions upon which men shall be permitted to ship, and one of those conditions might be a price at which they are to purchase. That that is intended I shall, I think, show you.

Second, it is proposed—and the plan is already made—that the allies shall purchase all their grains and supplies of every kind through one agency. This agency, therefore, will control the prices which will be paid by England, France, Russia, Italy, and all of the countries constituting our allies in this war. That in itself absorbs nearly the entire European market; but on top of that is the absolute right to stop shipments to any neutral country, which, of course, can and will be exercised so as to compel these neutral countries to buy through the same agency, or at least in accordance with plans laid down. Therefore you have restricted the market of the farmer for everything that he produces and have absolutely placed within the control of some agency to be established by our Government the price of every bit of the surplus of our land, which will fix the price of all that is to be sold here. Give me control of the foreign market for wheat and I will fix the price of wheat to every American consumer. Give me control of all our beef and mutton and pork that goes abroad and I will, allowing for reasonable fluctuations, control the price in this country. Therefore it is proposed to set up and put into the hands of one man a power that will control the price of everything the farmer has—of his entire surplus—and whoever controls that surplus will control the profits and the destiny of the farmer.

While that is going on, while the farmer has a restricted market in which he must sell, what is to become of the farmer in regard to the market in which he must buy? It is true the power, as I have said, is in this bill, it seems, without Mr. Hoover's knowledge, to control the price of everything else; but what is to become of the farmer who must sell, and in a market that is restricted by the mandate of some one man, and yet must buy in a market where speculation has been rife, because the speculator in the market I am about to speak of is the man who controls the market, and he speculates by putting up or putting down the prices of articles. Is the farmer not also a consumer as well as a producer? What is there that other people eat or other people use that the farmer does not have to eat or use? Does he not have to buy shoes? Must he not purchase them in a market that has no protection, where the blue sky is the limit of price? When he buys rope must he not buy it in a market where there is no limit and no protection? When he goes to get his binding twine, must he not buy it in a market that has been controlled by a trust, and that trust said by the Federal Trade Commission to be so strong that it is impotent to render any relief? When he buys fertilizer, who protects him? Does he not pay as high in some instances as an increase of 600 per cent upon the price of fertilizer? I say now to my friends coming here from great agricultural States that I have proven that it is proposed to compel the farmer to sell his products in a restricted and a controlled market; and I demand, if that be done, that there shall be no question that he shall buy in a market equally as well controlled.

What are the facts? You say the farmer has been getting too great prices or that some speculator and middleman has been getting too great prices on farm products. What are the facts about the thing that the farmer has to control? Let us look at our old friend the steel manufacturer. What is it proposed to do to him? My friends there are a number of concerns that deal especially with farmers or with him along with other people. There is our old friend the Harvester Trust. A prosecution was brought against it. Our old friend the Steel Trust. A prosecution was brought against it.

In the case of numerous other trusts, prosecutions were brought against them; and what happened to them in the matter of control? I do not know what happened to them. I do not say that this article from the Washington Post is accurate, but I submit it. I read from the Washington Post of May 22, 1917:

Antitrust suits against the United States Steel Corporation, the International Harvester Co., and three other big corporations were ordered reargued yesterday by the Supreme Court. As the court will adjourn for the term of June 11, court officials said it would probably be a year before decisions were rendered.

The announcement, made by Chief Justice White, apparently bears out reports current recently that opinions in the big antitrust suits would not be handed down at least until the country could readjust itself to war-time conditions. The cases to be reargued are those against the United Shoe Machinery Co., and the Lehigh Valley and the Reading Railroads and affiliated coal companies, the so-called Anthracite Coal Trust.

CHARGES IN THE STEEL SUIT.

The steel corporation suit was instituted in 1911 in New Jersey, and was dismissed by the district court four years later. In it the Government charges the corporation with controlling approximately one-half of the general iron and steel industry of the country. Dissolution of the corporation as well of the inner combination is asked.

The corporation in its brief admitted controlling about 40 per cent of the domestic and about 90 per cent of the American export trade, but defended itself as a "good" combination.

The suit against the Harvester Co. was filed in the United States district court in Minnesota in 1912. Its dissolution was asked mainly on the ground of its size and inherent power.

ONCE ORDERED DISSOLVED.

This corporation also contended that it is a "good" combination, but the lower court sustained the Government and ordered dissolution—

And the proprietor of that corporation has written a lot of his ideas into the food-control bill. If you do not believe it, go and read the testimony of George W. Perkins given upon this bill—

The case was argued in the Supreme Court first in April, 1915, and reargued in March, 1917, because of the resignation of Justice Hughes.

The suit against the United Shoe Machinery Co. was filed in 1911 and the lower court dismissed the Government's petition.

The suit had no connection with one brought in St. Louis by the Government under the Clayton Antitrust Act.

RULES ON MARITIME LAW.

The two cases against the Lehigh Valley Railroad and the Reading Railroad charge them with monopolies in anthracite coal along their lines. Both roads are accused not only of violating the Sherman Act but of violating the commodities clause.

In both cases the Government lost practically all contentions in the lower courts—

I ask to insert a portion of the rest of the article without reading.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

The right of States to enact laws affecting the general and Federal maritime laws as passed by Congress was denied by the court, in an opinion holding that the New York workmen's compensation law, recently declared constitutional, does not apply to workmen injured while employed on New York navigable waters.

WORKMEN'S LAW UNCONSTITUTIONAL.

The court also declared unconstitutional the New Jersey workmen's compensation law of 1911, which was a noncompulsory statute.

The court adjourned until June 4, when decisions will again be rendered and final adjournment for the term taken one week later.

Mr. REED. So, Mr. President, when we got ready for the stress of this war, it would appear, according to this account—the truth of which I do not assert, but I do say that it seems to have been founded upon a rumor that was current at the time—that one of the first things done to steady the situation was to discontinue, for the time being, these great trust suits. This action of the Supreme Court, if for the causes assigned, may have been deemed justifiable to some Members of the Senate. But I say now that I shall wait to see whether my associates in the Senate of the United States will undertake to control the farmer and all that he produces and allow him to remain the victim of these concerns that have been charged by the Government with having engaged in wholesale plundering of the American people.

You talk about the prices the farmers are getting! Let us look at the prices and the profits these concerns are getting.

Steel and iron: Why are they a necessity? Must we consider them as a necessity? I tell you, sirs, that back of all production lies this great proposition of steel and iron. Take away our knowledge of steel and iron, and you will turn back the wheels of civilization a thousand years and reduce the world to the barbarism of the stone age. Take away our knowledge of steel and iron, and the population of great cities would dwindle and die, for you could not carry provisions to them. Take away our knowledge of steel and iron, and the great railroads would disappear, the steamships would leave the ocean, the tools of crafts and trades would be gone, and there would remain no possibility for the modern civilization of this earth to continue. They are, therefore, the great primal necessity. They lie back of the production of clothing, of books, of shoes, of all we wear. They lie back of the production of the grains of the fields; and if you allow them to go uncontrolled you must allow the farmer to go uncontrolled with that which he produces. On the other hand, if you control the farmer you must control the tools with which he puts his grain into the fields, the tools with which he harvests it, and the tools with which he carries it to the market. That involves the great railroads and everything else.

What speculator in the wheat market, what speculator in the flour business raised the enormous profits of the steel combination? Why, Mr. President, I hold in my hand the Boston News Bureau of June 16, 1917. Let me call your attention to some of its astounding figures.

STEEL EARNINGS—STIMULATED BY SOARING PRICES OF PRODUCTS.

New York: At present steel prices earning power of steel companies is so great that any estimate, based on prices, would seem an exaggeration. However, it is conservative to say that, if steel quotations remain for 12 months around current levels, every important concern can show profits of 100 per cent on its common stock, after paying excess profits tax of one-sixth of net earnings.

How enormously steel prices have advanced the last two years is not generally realized. The following, showing quotations for eight leading products for first week of June, from 1915 to 1917, gives the change in that period—

But the comparison should no have been with the first week of June, 1915, for the war was already on, and the price had already enormously advanced. I give the figures, however, as they are given here—

With exception of steel rails, which gained 15 per cent from 1916 to 1917 and 35 per cent in two years, the changes vary from 40 per cent to 132 per cent for the past year and from 125 per cent to 509 per cent in two years. Average gain for the last year is 71 per cent and for the last two years 244 per cent.

I suppose, now, that ought to be allowed, and the farmer held down. I put in a table. I ask to print all of this article, but I read now parts of it.

The PRESIDING OFFICER. Without objection, that will be done.

The table referred to is as follows:

	1917	1916	1915	Per cent gain over—	
				1916	1915
Per ton:					
Bessemer iron, Pittsburgh	$50.95	$21.95	$14.70	132	247
Bessemer rails	38.00	33.00	28.00	15	35
Bessemer billets	95.00	45.00	20.00	89	375
Per 100 pounds:					
Steel bars, Pittsburgh	4.25	2.75	1.20	54	254
Plates	7.00	3.75	1.15	87	509
Beams	4.00	2.00	1.20	100	233
Wire nails	3.50	2.50	1.55	40	125
Tinplate	8.50	5.75	3.10	48	174

Mr. REED (reading)—

These gains have not been made without advances in costs. Connellsville coke has advanced nearly 250 per cent in the last year and manganese over 1,100 per cent. Labor costs, the most important item, have advanced only about 45 per cent, and on the whole the increase in production costs has not been commensurate with that in finished products. Increasing costs have been incidental to advancing prices, due to overwhelming demand.

It is impossible—

Says the writer of this article—

to figure manufacturing costs with any accuracy in a market where cost factors vary so widely from known standards.

And I would stick a pin here. When Mr. Hoover or any other man on earth undertakes to regulate the prices of foodstuffs, he will find the subject equally complicated, and he will find that this vast network of production in our country is as closely knitted and bound together as is the warp and woof that is woven into a garment, and you can not pull out one thread without affecting the entire cloth.

Notice how that is borne out by the article I am about to read, although it is on a different topic:

It is impossible to figure manufacturing costs with any accuracy in a market where cost factors vary so widely from all known standards. But it may be remembered that steel companies have agreed to supply the Government certain products at fixed prices, which have been made public. Unquestionably they are allowing a small percentage of profit on these transactions, but if prices charged the Government be taken as actual cost of manufacture to-day—that is, $2.50 per 100 pounds for steel bars and $2.90 for plates, against current market of $4.25 for bars and $7 for plates, this would mean that deliveries at present quotations to customers other than the Government would net an average of 50 per cent of amount received, or 100 per cent of cost.

If the same average be taken to hold good on other products, profits accruing would be so large as to stagger the imagination. But if a profit of 40 per cent of gross be allowed, or approximately $40 a ton on basis of weekly average price of eight products, now $99.29 a ton, results therefrom would be sufficiently large to cause self-gratulation among shareholders of steel companies.

The Steel Corporation produced in 1916 finished products for sale amounting to 15,460,792 tons. A profit of $40 a ton on only 15,000,000 tons would mean net profits of $600,000,000.

Republic Iron & Steel produced 1,216,716 tons in 1916. At $40 net profit per ton a similar production would mean over $48,000,000, or over $40,000,000 net for common stock, which amounts to $27,191,000.

You propose to regulate the farmer, do you? Well, then, bring in the steel combination, and let us work these steel plants.

But I read on——

Mr. KENYON. Mr. President, may I interrupt the Senator for just a moment?

Mr. REED. Yes.

Mr. KENYON. I have tried to follow the Senator's whole argument, but I have been away some of the time. I ask the Senator if he contends that steel is not covered?

Mr. REED. No; I have already spoken of that; but I say that there is nothing to indicate that they intend to do anything with it.

Mr. KENYON. Will not the words "and articles required for their production" cover steel?

Mr. REED. Exactly; and the Senator will remember—he and I are always frank with each other——

Mr. KENYON. We try to be.

Mr. REED (continuing). That Mr. Hoover did not appear to know that those words were in the law, and I do not think I misstate his testimony when I say that he rather contended, until we argued with him upon the hearing, that these great manufacturers would not be taken over.

Mr. KENYON. I think it is true that his mind was running solely on the line of food.

Mr. REED. Exactly.

Mr. KENYON. I think steel is covered, however; and if it is not, it ought to be.

Mr. REED. The Senator was out, I think, getting his lunch when I referred to that phase of the matter. He has been very patient to stay and listen as much as he has to this almost endless talk of mine, but the subject is endless. It is as big as the world. That is how big this subject is. I had already argued that the bill would, if really enforced, reach these things, but that there was nothing to indicate an intention to reach them. My proposition was that when you undertake to regulate the prices of the things the farmer produces you must make it obligatory upon somebody to regulate the prices of the things he buys.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Ihado?

Mr. REED. I do.

Mr. BORAH. I presume that another bill will be coming out of the committee in a day or two, either the House bill or a bill framed upon the basis of the House bill. I sincerely hope that those who will have the framing of that bill will not leave it so ambiguous and uncertain with reference to everyone else than those dealing in foods. There is no reason why they should not include, in plain and unmistakable language, these different articles, if they intend to control them; and it seems to me that by a line or two they could be included with just as much accuracy and clearness as foods, feeds, and fuels.

Mr. GRONNA. Mr. President——

Mr. REED. Mr. President, if the Senator will allow me just one moment, I want at this point to reply to what the Senator from Idaho has just said. Very pertinent to that is the following question appearing in Mr. Hoover's testimony. I read from page 57, and I ask the Senate to give it attention. I will read back of this a little, to give the context:

Mr. HOOVER. You may take this as a practical fact: That 75 to 85 per cent of the necessary food consumption of the poorer classes of this country is comprised in seven or eight commodities, and that it is possible, with a sufficient amount of subsistence and help, to greatly ameliorate the conditions with regard to those commodities—

I think that should be "assistance and help"—

If people wish to eat lobsters and there is an unequal distribution of lobsters, it does not interest me

Senator REED. Of course that does not interest me, and it does not much interest anybody except the fellow who wants the lobster, and I do not want you to think I am trying to be antagonistic about this matter. I am trying to get at a solution of this matter if I can. My mind may travel along a different line than yours.

Senator WALSH. Your questions would lead to that conclusion.

Senator REED. Possibly my questions are not asked in the form that is pleasing to you.

Do you think that the prices of other things besides farm products ought to be controlled?

Mr. HOOVER. Outside of food?

Senator REED. Yes.

Mr. HOOVER. That is a question entirely outside of this bill.

Senator REED. No; it is in the bill.

Mr. HOOVER. Only with respect to fuel.

Senator REED. Food and fuel and manufacturing and all of the things that enter into food and fuel.

Mr. HOOVER. I think we agreed this morning there were no constructive provisions in the bill for that.

Senator REED. That is a mistake. It is all through the bill, Mr. Hoover, and we may as well understand that. What I am trying to get at is this: If there are no restrictions or limitations upon the prices of other things, then I want to know where is the justice of allowing, for instance, the Steel Trust, that makes a great prime necessity that every human being in the world is to a great degree dependent upon—ought there not to be regulations there of those prices?

Mr. HOOVER. It seems to me that is a responsibility up to you gentlemen to see that no one makes an undue profit out of this war.

Senator REED. Out of anything?

Mr. HOOVER. Out of anything.

Senator REED. Then you would advocate the control of the prices of iron and steel, copper, lead, and zinc, and all things?

Mr. HOOVER. I do not necessarily advocate the control of prices. I do advocate the taking over of profits, which is probably a more soluble question.

Senator REED. We have been doing that a good deal by taxation, and some of us have been wanting to go further than some of the rest. But do you mean in another way?

Mr. HOOVER. That is all apart from this bill.

Senator REED. I disagree with you, and if you will give me a moment I will try to make that plain.

That makes it perfectly plain what the purpose is here. But I go on now to read from this article from the Boston News Bureau. This is not an anarchist paper.

Mr. GRONNA. Mr. President——

Mr. REED. I yield now to the Senator from North Dakota.

Mr. GRONNA. I simply wish to call the attention of the Senator from Missouri to the fact that Mr. Hoover stated before the Committee on Agriculture that there was no need of controlling manufactures because there was competition in manufactures. I am quite confident his testimony will be found to that effect by reading it.

Mr. REED. I have not noticed that part of it. I thank the Senator for his contribution. I wish he would get it and mark it and put it in the RECORD.

Mr. GRONNA. I will get it.

Mr. REED. I want to be understood that while I am compelled to call Mr. Hoover's name, because Mr. Hoover is so identified with this matter, there is no spirit of antagonism to Mr. Hoover as a man nor to anything which I think can properly be accomplished by the Government. When I get to the conclusion of my remarks I intend to state to the Senate what I do think is practical and submit my views for whatever they are worth. They may not be worth much, and I only ask for them candid consideration.

But, coming back again to this question of the profits of steel concerns.

On 12 months' output equal to last year's Lackawanna Steel would net over $50,000,000, leaving some $45,000,000 for dividends on its $35,096,000 stock.

There is no suggestion that such earnings will be achieved this year, as other factors are to be considered, not the least of which is that much tonnage now on books was taken at prices considerably lower than now prevailing, and that a substantial percentage of output will be sold to the Government at prices substantially lower than received from outside customers. Whether steel prices will be maintained at current levels any length of time, and, if they are, what will be their effect on labor and other costs, is a question on which even the most sanguine trade experts would hesitate to venture opinion at present. (Boston News Bureau.)

Mr. VARDAMAN. May I ask the Senator what he is reading from?

Mr. REED. From the Boston News Bureau of June 16, 1916.

Mr. VARDAMAN. Can the Senator tell me what is the purport of it, except to show that they made an enormous profit?

Mr. REED. The entire article I have not read; but it shows that Bessemer pits have advanced 247 per cent, Bessemer billets 375 per cent, steel bars 274 per cent, plates 509 per cent, and so forth.

Mr. VARDAMAN. Over what length of time?

Mr. REED. This is a comparison from 1915 to the present. It also gives it by years. I wish to call attention to the fact that the comparison ought to have been with antiwar prices instead of taking prices when they had already been enormously raised by virtue of the war.

In connection with that I call attention to an article in the Iron Age of March 22, 1917.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Montana?

Mr. REED. I do.

Mr. WALSH. I should like to inquire of the Senator whether he would like to have the Senate draw the conclusion from his line of argument that the bill ought not to pass or that it ought to include the regulation of steel prices?

Mr. REED. My proposition is this: I think the Senator perhaps was out when I laid the premise of what I am now saying.

Mr. WALSH. I think I followed the Senator.

Mr. REED. I said that if we do regulate the farmer in the manner laid down in this bill it amounts practically to fixing the price upon the farm products, and if we do that we must make certain that we at the same time and in the same bill regulate the other great necessities, a part of which the farmer, as well as everybody else, has to use.

Mr. WALSH. The Senator has not answered the question. I asked him whether he desires us to understand that he is arguing that the bill ought not to pass at all, or whether he is arguing that the bill ought to pass, but it ought to include likewise the regulation of steel products?

Mr. REED. No, Mr. President, I stated very thoroughly what I am arguing, and the Senator now states an entirely different question which I am not arguing. But I will say to the Senator and to the Senate, as I have already stated, that I think there are some things in the bill that we can do and do with benefit to the country. There are some things in the bill that I think if we do will be of great injury to the country. What those different things are I intend to come to later. So I can not answer the Senator's question by saying I am advocating the bill or I am trying to kill the bill, because there are parts of the bill I am heartily in accord with. There are other parts of the bill that I think are utterly wrong. That is as fair an answer as I can make.

Mr. WALSH. Let me inquire of the Senator, then, whether he thinks the bill ought to be amended so as to include the regulation of steel products?

Mr. REED. Undoubtedly, or else it ought to be amended so that there will not be an attempt to dictate the price to the farmer, which is plainly involved in the bill.

Mr. WALSH. The Senator does not answer my question.

Mr. REED. Yes; I do. The Senator is trying a trick he and I have worked on witnesses a thousand times by putting a thing in a certain way and demanding a specific answer. I am just refusing to bite that particular kind of bait; I have put it on a hook too often.

Mr. WALSH. I do not want to enter into a controversy with the Senator in regard to the matter. I desire to say that if the Senator is supporting the idea that steel prices ought to be regulated by provisions incorporated in the bill, I have no doubt he will find much support in the Chamber; but I do not——

Mr. REED. I will say to my very good friend who differs from me occasionally, and sometimes agrees with me, which is only another way of saying one of us is wrong a part of the time, I think the proposition of regulation always involves this idea, that if you regulate one particular article, you are very likely to thereby make it necessary to regulate another article; but if you take your hands off of all you may not make it so necessary to regulate the other articles. I believe there is going to come out of the Senate a bill that will undertake to control to some extent and in some way food prices; and if that is to be done, then I insist that at the same time and in the same bill there shall come the control of these other prime necessities.

Returning now to the question of steel prices, I was about to quote from the Iron Age of March 22, 1916. I will just read the headlines:

United States Steel Corporation 1916 report—Gross receipts increased $504,790,190 over 1915, or 67 per cent—Net earnings increased $203,178,166, or about 156 per cent.

Mr. President, I ask leave to insert a table showing the comparative prices of a number of articles of steel, in which the prices of 1916 and 1917 are compared; but as you read that remember that the price of steel in 1916 has already enjoyed the benefit of enormous advances over the price of 1914, the last year prior to the war. I ask leave to insert this table.

The PRESIDING OFFICER. Without objection, leave is granted.

The table referred to is as follows:

A comparison of prices.

[Advances over the previous week in heavy type, declines in italics; at date, one week, one month, and one year previous; for early delivery.]

PIG IRON.

Mr. REED. Mr. President, as we are solving this question of steel, or discussing it, I may as well say that it will be equally necessary to include the copper, and while you are after the steel man you must stop with the manufacturer of steel, for the prices are affected, as I have already shown you, by the prices of iron ore, by the prices of carriage, by the prices of those articles that are necessary in the smelting and manufacture of steel. The prices are affected by coal and so on.

Likewise, Mr. President, you must not forget in dealing with the copper manufacturer that his prices are similarly affected, and you must not forget that one of the great basic things in all these prices is the question of wages. So when you come to regulation you must go very far. You must regulate wages, you must regulate carriage, you must regulate the price of a thousand different things that enter into the production of any one of these things, and unless you do that your regulation will be fruitless.

But while we are speaking now about the question of regulation I can not refrain before I leave steel and iron and copper to challenge your attention to the fact that it is not only a great primal necessity of life, because with its assistance we carry on modern civilization, modern manufacturing, modern production, but it is the great primal necessity of this war. Not a single one of our boys can go upon the field of battle but he is dependent for his life upon the steel instrument he holds in his hand, upon the steel cannon that thunder upon the vantage points of the field, upon the efficiency of the shells that are hurled at the enemy, upon the barrier that he has made of death-dealing instruments. It is a thing not only necessary to the preservation of our domestic life at home, but it is the one great thing in connection with powder that we must have upon the battle front.

Moreover, if we speak of necessities and of the great desirability of sustaining our allies and keeping them from starvation, then steel must be our chief means to that beneficent and much-to-be-desired end. It must be by the employment of steel that we will hew down the forest and fashion the wooden ship. It must be with steel that we will make the steel bottoms that shall carry food to supply the soldiers of the allies and their great civilian population, and that finally we must employ to send the food to our own boys who will be devoting their lives and offering up their blood upon the battle fields of Europe.

Therefore, I say, if there be an occasion to take possession of the farmer's product and fix it to compel him to yield a dominion over the market and the privilege of selling and buying in the market, we must at the same time and for the same consideration take in the steel organization, the copper organization, the Harvester Trust, and the twine organization. We must go further and get at the old boot and shoe machinery combination. We must make it so that the people in this country will not be paying two or three prices for boots and shoes. We must, in short, take hold of this whole problem; and I say this as I pass along, while we are at it, I do not see why we should not reach over and take care of the newspapers, too, because, after months of investigation, the Federal Trade Commission has determined that there is a combination on white paper, and that the newspapers of the country and the reading public are being defrauded and robbed by that combination. So they say, Give us control of the white paper. I do not know about that proposition. I think if the Trade Commission had been doing business and the Department of Justice had been doing its duty the scoundrels that organized the white-paper trust would be behind the bars of the penitentiary at this moment; and I intend to have something to say and do about that thing in the very near future.

But if we are going out to take charge of the farm products, understand, then, we have got to take charge of these other things. Let us see what this task will involve. When you undertake to control the crop products of the people like this, when you undertake to control the price of that which is to be consumed by the American people you are lost in a maze of figures; the magnitude of the undertaking goes beyond the imagination. If you are going to control the price of farm products, you will at once lay your hands upon a production that aggregates $8,628,000,000. It involves the regulation of the price of 1,619,000,000 pounds of butter, 320,000,000 pounds of cheese, 5,813,000,000 gallons of milk, 488,000,000 chickens, 1,519,000,000 dozens of eggs, 67,000,000 barrels of apples, 36,000,000 bushels of peaches, 100,000,000 bushels of pears, 15,000,000 bushels of plums and prunes—why, the prune job would keep one man busy—4,000,000 bushels of cherries, 4,000,000 bushels of apricots. It involves, in addition to that, potatoes, 285,000,000 bushels, last year, and that was about a half crop; hay, 89,000,000 tons; corn, 2,503,241,000 bushels; wheat, last year, 639,000,000 bushels; oats, 1,251,000,000 bushels—I need not read the rest of these figures—cattle, 63,682,000 head. The value runs into the thousands and millions of all these things.

I here insert some tables showing these figures:

NUMBER OF PERSONS AND VALUES AFFECTED BY POSSIBLE FOOD DICTATORSHIP.

The bill provides that the food dictator shall have complete control over the production, storage, distribution, and prices of food products and fuel.

Production and value of food in 1916.

Varieties.	Production, 1916.	Value, 1916.
Potatoes.....bushels..	285,437,000	$417,063,000
Hay.....tons..	89,991,000	1,800,894,000
Corn.....bushels..	2,583,241,000	2,295,783,000
Wheat.....do....	639,886,000	1,025,765,000
Oats.....do....	1,251,992,000	656,179,000
Rye.....do....	47,383,000	57,857,000

Buckwheat.....do....	11,840,000	13,364,000
Cattle.....head..	63,682,000	1,560,000,000
Swine.....do....	59,473,000	408,000,000
Sheep.....do....	52,838,000	234,000,000
Total.....	.....	8,628,439,000

Production in 1916.

Butter	pounds	1,619,000,000
Cheese	do	320,000,000
Milk	gallons	5,813,000,000
Fowls		488,000,000
Eggs	dozen	1,519,000,000
Apples	barrels	67,000,000
Peaches	bushels	36,000,000
Pears	do	10,000,000
Plums and prunes	do	15,000,000
Cherries	do	4,000,000
Apricots	do	4,000,000

NOTE.—Above are the latest figures available; however, not all are for 1916. Value of above production not available.

Coal production in 1916.

	Tons.	Value.
Anthracite	79,459,000	$184,653,000
Bituminous	395,200,000	502,037,000

Mr. President, how many people will that directly affect? The rural population of the United States is 49,348,000. There are more people in our country districts than live in France. There are nearly as many live in our country districts as abide in Germany. More live in our country districts than live in Great Britain. How many thousand farmers will you affect? There were 6,361,000 farms in the United States in 1910, the latest figures available. The value of farm property in 1916 was $40,991,000,000. The wage earners engaged in the manufacture of food products is nearly 500,000, and if you will multiply that by five, which is the usual number in a dependent family, you will find that there were 2,480,000, all of whom will be affected by this bill.

Mr. President, are we going to protect the farmer on his coal? If so, we must regulate the price of coal, and that regulation of the price of coal must begin with the regulation of the wages of the men in the coal mines. I do not mean that it must begin there first. I mean that no man can regulate the price of coal and do it upon any scientific basis who does not consider the question of wages. If we enter upon that, we will find that there are 613,000 men engaged in digging coal in this country, and that if you average their families, five for each wage earner, there will be affected by these regulations 3,065,000 human beings.

But we must go further than this. There is the question of production. There is also the question of distribution and that involves the carriage of the goods. If we are to regulate the price to the farmer and the price to the consumer, we must regulate the price of carriage. That of course is to-day largely taken care of, but it will have to be taken care of in the form of a reduction. If you reduce on other lines, you must reduce on this line. If you boost the prices on other things, then you must boost it here. You can not begin a general regulation of prices without considering the question of wages.

Mr. President, this involves in addition to railroads the question of ships. But I do not intend to take time to follow that out. What will happen? Let me call your attention to this fact, and I wish I could burn it into the minds of all Senators: The finest piece of machinery ever created by the genius of man, a machine that allowed to run may be almost illimitable in its power, a machine that took the thought of centuries finally ripened into the genius of some great inventor to produce—that machine can be put out of commission and ruined by a child. A monkey wrench, to use the old phrase, thrown into the machinery will destroy its capacity. Are you not already doing that? Has it not been already in part accomplished?

I am in receipt of telegrams from a number of men saying that to-day the wheat market of the United States is utterly disorganized; that nobody dares buy because he does not know whether or how he will be permitted to sell. What will be the primary effect of that? Perhaps it may be very pleasing to those who think only of the consumer and the price he pays, but mark it and remember it, when you have destroyed these markets or introduced uncertainty into them, just as certain as fate the first man to suffer will be the farmer who has wheat to sell. It will reach him first, and so you have already an element of uncertainty started; and when or how will you affect this regulation? I grant you the Government may go in and buy and that may not be disastrous, although it is a tremendous power.

The Government may control the foreign market, and that may not be disastrous, although it is a tremendous power; but I say we ought to be careful or we may do something here in obedience to this crusade that is being carried on wholly regardless of facts, wholly regardless of figures, wholly regardless of world conditions, wholly regardless of information that lies before our eyes, and that men will not look upon and read; we may do something that will cripple our country to such an extent that it will be worse than the loss of a great battle, for it may deprive us of resources to win many battles. Here is a telegram which reads:

HON. JAMES A. REED,
Washington, D. C.:

Wheat harvest is about to commence in the Southwest. All regular channels of buying, storing, paying for this wheat is now closed on account that no one knows what the Government is going to do in way of controlling the supply and price. Instant action should be taken on H. R. 4961, one which is now before the House and Senate. All grain dealers and millers are simply marking time now, not knowing what to do. This means all markets will become bare of flour before they can be replenished with new crop or cars can be secured to move same. At present time car shortage is easier than for some months and we could use them for wheat and flour to sea coast daily; later it will be impossible to get cars to transport flour or food in sufficient quantities to fill markets. We urge immediate passage of bill.

That gentleman probably has never read the bill. He is a splendid citizen of my State, but he simply knows his market is closed; he simply knows his business is gone; and what he states about the market as a fact can be taken as a fact. The truth is to-day you will have serious trouble, I fear, in the matter of supplying the cities of the East if you speedily do not do something to stop this panicy crusade and to let trade and commerce take their course. Bad as the bill is, it is better than this fearful uncertainty, and if the bill is passed, I say to you now that it will take months and months of time to create a machinery to carry it into execution. Is it not better to say to these people, "Go on with your trade; go on with your commerce; we will not interfere; but if you try to lay your hands upon food products and to corner them, we shall send you to the penitentiary"?

I am willing to vote for a law now that will authorize the President or any commission named by Congress and the President, or either, to take possession of any foods that are being really cornered; I am willing to give these additional powers, as I said awhile ago, if necessary; but in the name of the American people, I do protest against undertaking to interfere with the business of a hundred million men and women when it is impossible to do so without throwing the great machine of production and distribution entirely out of gear.

My friends, men might have been very successful in managing business over in Belgium—and I would not throw a criticism upon them—even if the condition had been the same there as here; if there had been no war conditions; if it had not been a question of starvation and mere distribution of something almost in the form of alms, if not quite alms; but I ask you to compare Belgium with the United States of America, and think of the difference in the task that presented itself there and presents itself here. I appeal on behalf of the American people against this foolish thing, tearing out by the roots our whole commercial system. Oh, yes; it is easy for men to state extreme things and lead people off their feet; it is easy for men to say "Oh, we will get the wicked speculator, and we will stop all these prices." As I have pointed out, we can get the wicked speculator now where he exists. Congress is being driven on and on, thoughtlessly, but, just as sure as fate itself, when you undertake this task you will be doomed to disappointment if you undertake it on the lines you have inaugurated.

As to regulation, Mr. President, I do not know; but I question whether food regulation has not been a lamentable failure everywhere. I have before me an article which appeared in the April number of Current History, a work that is printed by the New York Times which has condensed the history of this war in an amazingly intelligent manner, so that the casual reader can keep track of all of these events. Moreover, it has the advantage of giving us the news a few days after it is printed, so that to a large extent fiction or imagination has been squeezed out of it. Writing in this magazine under the headline "Hunger stalks through Europe," at page 21, you will find an article treating of the maladministration of the food regulations. I call attention to this as one of the results of food regulation, and it ought to have a great lesson in it for every man who thinks. It is this: Food regulation, in Germany at least, has resulted in feeding the army and in feeding labor and in starving everybody else. I read just a short paragraph:

A trusted observer of food conditions in Germany reported to the State Department at Washington on March 14 that 20,000,000 people directly connected with the German Army or Government, 20,000,000 in the rural population, and about 8,000,000 wealthy people were well fed, but that the rest—about 20,000,000—were in a serious plight.

We are told that this is the class who can not fight and who can not raise food for those who fight—the women and the educators and the men who formerly belonged to that class which we generally call the middle class here for the want of a better name. So in the same magazine for March you will find an interesting article under the heading "Famine: The foe dreaded

by all." It speaks of Germany's food shortage and of the shortage in other places:

The prices of practically all food commodities were now regulated. But the system was fundamentally unsound, because if prices were low supplies were held back, despite the threats of heavy penalties; while if prices were high supplies went anywhere but where they were most needed. In short, the Government did not, or could not, see that under existing economic conditions, even in time of war, the law of supply and demand must prevail.

Finally, in December, 1916, Adolph von Batocki, the "food dictator," publicly admitted that the fixing of maximum prices was a failure.

And let me call your attention to the fact that that is what Mr. Hoover stated in his testimony. So that those who promise low prices must remember that Mr. Hoover makes no such promise. Continuing the reading:

The attempts to make foodstuffs accessible to the poorer classes by means of maximum prices have collapsed—

He declared—

Maximum prices without the simultaneous public administration of supplies only keeps the produce away from the towns and industrial centers, leaving it entirely in the hands of the producers or the consumers in the vicinity—

And so forth.

Mr. President, two courses now are open—and with this very brief statement I shall conclude my long and I know very wearisome address—two courses are open: One is to leave the vast business of the United States in the hands of the people who created it and to undertake to prevent all cornering of the market and to prevent the draining of our foodstuffs by Europe. As I have undertaken to show, we can prevent the hoarding under laws that already exist, under the decisions of the Supreme Court of the United States, to which I have called attention, but in addition to that, if the House of Representatives would finally pass the bill which it once passed and sent here and to which we added the Walsh and Nelson amendments, we would have it so arranged that no man in this country would dare to undertake to hoard food to an amount which would injure the people; but I am willing, in addition to that and as a supplement to it, to lodge the power somewhere immediately to take over foodstuffs or other prime necessities that are being hoarded. There should be some kind of judicial investigation of this question, and the law should be so framed that it would be based upon our constitutional power of control. I do not intend to undertake to go into the intricacies of that question at this time, but I say that I believe that food that has gotten into public elevators and food that has taken such a course in commerce as to have gone into interstate commerce and to be a part of that commerce can probably be reached.

The control of the foreign market—that is, to prevent the draining of this country by Europe of these prime necessities—I have already shown exists, because we have given the President the full power to declare an absolute embargo upon the shipment of any of these necessities which can be so exercised as to specify the conditions upon which their shipment will be permitted; but, in addition to that, the power exists and is now being exercised of purchasing all the food for the allied governments, and our own Government if need be, through one common agency. This in itself will regulate the export price of every particle of grain there is in this country or anything else we ship abroad, for the price of the surplus sent abroad fixes the price at home; at least it will protect us against being drained of our food supplies. But if it is necessary to extend that power to give an express sanction of law and authority where it does not now exist in express terms, I am willing to grant it. I am willing to sit down with any Senator to help solve that problem. That would leave our business to run on; it would leave the farmer the incentive of good prices, if he could figure they would come to him in the course of business; it would, in my opinion, speedily resolve itself, for prices are already falling and, I think, will continue to fall.

At the same time, Mr. President, I would enforce the anti-trust acts of this country. I would tell the gentlemen who are engaged in controlling and manipulating prices that they must suffer the pains and penalties of prosecution or they must treat the American Government and the American people fairly. But, mark you, this plan leaves the management and control of affairs and the business of the country in the hands of the men who created the business. It simply reaches the excrescences; it reaches the illegal things; it reaches the things that have always been condemned by the law, either because they were manipulations or because they were conspiracies against trade or because they were a forestalling of the market. Thus we can act within the limits of the Constitution.

The other plan, Mr. President, is one which, if entered upon, I warn you, will never stop. You can not regulate the prices of the foodstuffs produced by the farmer unless you regulate the price of everything that the farmer consumes; and he consumes everything that other people consume. If you do regulate his food prices and do not protect him on the other side, then you will find the farmer will not plant; agriculture will not expand; and, instead of being able to feed the world, we may not be able to feed ourselves. If you undertake to regulate food because it is a necessity, I repeat, you must regulate steel and iron, for they are more primal necessities even than the finished product of food, although not its raw product, for, as I have said, you can not have modern civilization without steel and iron; you could not maintain a single city without steel or iron. Washington would starve to death in two weeks' time if it were not for the steel and iron that bear the products of the farmer to this city. New York would be the habitat of rats and bats in a few months' time if it were not for steel and iron, and, as I said a moment ago and now repeat, we would go back to the stone age. So, you must regulate steel and iron and then you must regulate that which is produced from steel and iron. You must either seize or regulate the copper mines; you must do the same thing with the coal mines, until at last within your all-embracing grasp you have brought the mighty activities of the mightiest land there is on earth.

I say, whoever interferes with this vast machine of production, this machine that is composed of the hands of 104,000,000 people, this machine that is guided by the brains of 104,000,000 people, this machine that is 3,000 miles long and 1,500 miles wide, this machine that thinks and acts and talks and works—whoever undertakes to interfere with its mighty and majestic movements and put it under one man's control will bring chaos and ruin to our country. Let us proceed with care and with deliberation. Let us give thought and attention to these problems, and let us always remember that a worse condition than that which now confronts us may lie upon the threshold of to-morrow, and lie there, unless statesmanship shall be the order of the present hour.

Mr. RANSDELL. Mr. President, we have just listened to a very interesting and instructive address by the junior Senator from Missouri [Mr. REED], and if we were not in a state of war, the greatest war the world has ever seen, I am quite sure that most of the argument by the distinguished and eloquent Senator would be applicable and logical in the extreme. The existence of war is the only reason or excuse for the proposed food-control legislation. In normal times it would be unnecessary and unwise. Unfortunately we are engaged in the most titanic war recorded in history, and no man can foresee its close nor just what will be required of the United States. My own impression is that the war, which has now endured for three years, will last at least that much longer, perhaps a great deal longer. The Civil War between the States of this country lasted over four years in spite of the great odds against the Southern Confederacy. Our Revolutionary War lasted over eight years, and surely in that struggle the forces were far more unequal than the rival armies in the present war. The Napoleonic wars, with slight intermissions, continued for more than 20 years, and France was battling against all the other European States. The war between England and the Boers lasted for three years, and all the forces of the mighty British Empire were brought to bear against the small Boer Republic before it terminated. The wars of Frederick the Great, of Prussia, with several intermissions, lasted 38 years. The war of the Roses in England continued for 30 years. And so on through history. Wherever there was any kind of equality between warring nations the struggle lasted for many, many years.

In the present struggle there is no such great disparity as many seem to think. The combined area of Germany, Austria-Hungary, Bulgaria, and Turkey is 1,022,000 square miles, and their united population is 142,000,000. Moreover, the central powers, as their name indicates, are on the center of a ring or circle from the interior of which they can strike rapidly and effectively first on one side, then on the other. Germany's preparation for the war is beyond question the most effective ever devised; her transportation system is perfect; her munitions of war of every kind were created in colossal volume of the very best character; her people had the spirit of patriotism so thoroughly drilled into them that every man, woman, and child in the empire knew how to do his or her part, and do it well, and was more than willing to do it. The agricultural wealth of the central powers, upward of a million square miles in area, much of which is as fertile as there is on the globe, is very great, and under normal conditions these lands will produce enough food and clothing to supply their own people without any outside assistance. Practically every mineral needed for war purposes is also plentiful in this vast area. The central powers are fully equipped by nature, and the marvelous resourcefulness of their people enable them to live at home independent of the rest of the world. That being true, I see no reason why the war

should not continue for a very long time. I hope this view is incorrect and pessimistic, but it is the one which I honestly hold, and, in my judgment, it is imperative for our people to understand the true situation.

We are confronted with a most serious problem that requires us to marshal every resource and energy of the Nation; we must not act half-heartedly; we must not gag at trifles; we must fight the devil with fire; and, as Germany has used every resource of her people for the past 40 years in preparation for this war, and is now handling them not with divided councils and disunited effort but as one man under the leadership of Kaiser Wilhelm, so, if we expect victory, we must concentrate our forces and put forth a thoroughly united effort under our great President, Woodrow Wilson.

The powers which the pending bill propose to give the President are very great, and impose duties upon him which, I am sure, he would gladly avoid if he could; but it is necessary, in the present emergency, for some one to exercise these powers, and who is there to whom we can look except our President. The Constitution makes him our leader in peace and the General in Chief of our Armies and Navies; he is the de facto and de jure head of this Republic with its 100,000,000 souls. No President who has occupied the White House, from the days of Washington to this moment, has ever willfully misused the powers of his great office. Thank God, we have always been able to trust our Presidents. Immense powers were given Lincoln during the Civil War and he did not abuse them. We can safely intrust whatever is necessary to President Wilson at this moment with the absolute assurance that he will do what is expected of him faithfully and wisely, and I for one will gladly place on his broad shoulders and in his capable hands the very important authority proposed in this bill.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). Does the Senator from Louisiana yield to the Senator from Minnesota?

Mr. RANSDELL. I will be glad to yield.

Mr. KELLOGG. Will the Senator please point out the statute by which President Lincoln was given power to buy all the crops of the country and store and sell them?

Mr. RANSDELL. I do not know that that power was ever given to President Lincoln.

Mr. KELLOGG. Or the power to fix the price of farm products?

Mr. RANSDELL. I do not recall that such powers as that were given to President Lincoln. The situation was very, very different, I will say to the Senator. There was no necessity for such power as that to be given to him at that time; but I believe there is such a necessity now. We are in a great war, as I have just said, and we find it absolutely necessary to help our allies, many of whom are starving. The Senator knows the situation is not at all comparable to what it was in the war between the Northern and Southern States.

Mr. KELLOGG. But I should like to ask the Senator if he thinks the President should have the power to fix the prices of and to buy farm products?

Mr. RANSDELL. I do not think that the bill gives any such power, I will say to the Senator.

Mr. KELLOGG. Will the Senator refer to section 9, which authorizes the President to purchase any such necessaries and to sell them?

Mr. RANSDELL. Yes; he may purchase some necessaries and sell them under that section.

Mr. KELLOGG. All necessaries?

Mr. RANSDELL. But it does not mean that he shall buy all of them and sell all of them.

Mr. KELLOGG. Under section 9, where is the limitation, I should like to ask the Senator?

Mr. RANSDELL. My understanding of the bill is not at all that suggested by the Senator from Minnesota. I should like for the Senator to point out to me the clause which provides that the President may exercise such power, for I do not so understand the bill.

Mr. KELLOGG. It is section 9 of the Senate bill which we have been considering and section 10 of the House bill. As I read it, there is no limitation upon the power to purchase farm products and all products called necessaries. Under that, of course, and under the licensing provision, the price may be absolutely fixed. I desire to know if the Senator believes that that power should be granted?

Mr. RANSDELL. I do not think, sir, that the President should be given the power to purchase all necessaries in this country, but I believe it wise that there should be a limited power to purchase necessaries and thereby to lower their price.

Mr. KELLOGG. I should like to ask the Senator if there is any reason why cotton should not also be included?

Mr. RANSDELL. I do not know that cotton is one of the absolute necessaries of life in the same sense that food and fuel are necessaries. We can get along for a good while by wearing our old clothes, but we would starve in a very few days if we got out of food. It is true——

Mr. GALLINGER. Mr. President——

Mr. RANSDELL. Please let me answer the Senator from Minnesota, and then I will be delighted to yield to the Senator. It is true that cotton is to a very great extent a food product. We use the oil from the cotton seed, and I am very glad we do. I remember the time when we did not use cotton seed at all, but now it constitutes a very important food product; and I will say that to the extent that it is food it is included under the terms of this bill, just as other things are. If the President finds it necessary and wishes to treat it as food, he can place a minimum guaranty on cotton.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from New Hampshire?

Mr. RANSDELL. I do.

Mr. GALLINGER. This being a war measure, the Senator recognizes the fact that cotton is absolutely essential to the manufacture of munitions of war?

Mr. RANSDELL. Yes, sir; I do.

Mr. GALLINGER. And for that reason it is as necessary as any other article mentioned in the bill.

Mr. RANSDELL. Perhaps it should be added, and if the Senator wishes to introduce an amendment to that effect I do not know but that I will consider it favorably. I will say to the Senator that I am a grower of cotton myself and am very much interested in it; my State is very much interested in it; but I had the idea, and still have it, that under the general terms of the bill, so far as it is treated as food, the President could purchase it if he deemed it necessary so to do.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Iowa?

Mr. RANSDELL. I shall be delighted to yield.

Mr. CUMMINS. Cotton is not brought within the terms of the bill, as I read it, prior to section 12; but when the President is given the power to fix a minimum price for commodities he is given the authority to fix a minimum price for cotton. Why should the President be given the authority to fix a minimum price for cotton if cotton is not to bear some of the burdens of the bill as well?

Mr. RANSDELL. I do not know that I understand the point which the Senator makes.

Mr. CUMMINS. The Senator is familiar with section 12?

Mr. RANSDELL. I certainly am.

Mr. CUMMINS. And he agrees with me, I am sure, that cotton is within the provisions of that section.

Mr. RANSDELL. It certainly is a nonperishable agricultural product, and that is what is included under the terms of section 12.

Mr. CUMMINS. And the Senator recognizes that section 12 is intended, anyhow, by those who favor the bill, to help the producers of agricultural products by guaranteeing to them a minimum price for a period of three years?

Mr. RANSDELL. That is intended to apply to food products, as I have read the bill and as I have understood it. If the President wishes to treat cotton as a food product—and, to a great extent, as I have said, it is—he could extend it to cotton also.

Mr. CUMMINS. Section 12 is not confined to food products. Any agricultural product—cotton, hemp, anything of that sort—would fall within the provisions of section 12.

Mr. RANSDELL. I will say to the Senator, in regard to that, that we must take the bill as a whole. Section 1 defines necessaries, and the whole spirit and purpose of this bill is the treatment of necessaries. There are sections here which taken by themselves might be misunderstood, but when you treat the bill as a whole I think it is fair to say that it relates to the necessaries mentioned in section 1.

Mr. CUMMINS. But, Mr. President, that is the very question that has bothered me somewhat. Section 1 names foods, feeds, and fuels, and the articles required for their production as necessaries, and thereafter the word "necessaries" is used when referring to those articles; but when we come to section 12, which contemplates the fixing of a minimum price and the consequent purchase by the Government of the commodities named in it, instead of using the word "necessaries," the phrase "any nonperishable agricultural product" is used. Clearly that will

embrace cotton, or any other agricultural product that does not furnish food, as well as food. Now, I have not been able to understand why the restrictive portions of the bill exclude cotton and the portion of the bill which is intended to encourage production should include cotton.

Mr. RANSDELL. I will say to the Senator that I had nothing to do with framing the bill, but that it never entered my mind as a cotton grower that cotton was going to be included in these items which would be added if the President sees fit to resort to the minimum price. So far as I am concerned, as one Representative of the cotton-growing section of the country, I should be entirely willing for the words in section 1 to be reproduced and inserted in section 12, to relieve any fear the Senator may have, for I assure the Senator it never has been in my mind that cotton should be included, and I do not care to have it included. I am perfectly sincere in saying that I understood the purposes of this bill to be to increase the food and fuel supplies of the American people, and normally we do not consider cotton as food, although to a very great extent it is an important food commodity. There are a great many million tons of food coming every year out of the southern cotton crop. The crop of two years ago was 16,000,000 bales. That meant 8,000,000 tons of seed, out of which came an enormous amount of oil and cottonseed meal. If the Senator ate some of the delicious bread made a few days ago by mixing cottonseed meal with flour and presented by Senator SHEPPARD of Texas he is bound to admit that it is a very good article of human food, as well as a most excellent article for feeding cattle. There is no better food known for cattle than cottonseed meal; and so the seed from the cotton constitutes a very important article of human food, though it never entered my mind, as I say, that it was meant to be included here; and if it will help the Senator to support this very important bill I, for one, would be perfectly willing to have a clause of that kind inserted.

Mr. CUMMINS. Mr. President, I hope the Senator from Louisiana will not think that I have selected cotton in an invidious way.

Mr. RANSDELL. Oh, no; I am sure the Senator did not mean anything of that kind.

Mr. CUMMINS. I hope to be able to support the bill when it is amended as I think it will be. I am in favor of including in the bill a great many things that are not now in it. But it has been mysterious to me from the beginning why every provision in the bill that is intended, apparently, to secure for the consumer a low price for the commodity—that is, every provision that is intended to eliminate all speculation between the producer and the consumer—excludes cotton as well as iron and steel and ore and a great many other things that are just as necessary as food for the conduct of our affairs; but when we come to a provision that is intended at least to insure to the producer a fair price for the things he produces, cotton and any other agricultural product not fit for food comes in and receives the benefit of the guarantee. I have been utterly unable to understand the discrimination between the earlier parts of the bill and section 12.

Mr. RANSDELL. I assure the Senator that I do not know that any discrimination was intended. Again, I repeat, that as far as cotton is concerned I am perfectly willing that the clause contained in section 1, referring to necessaries, should be inserted in section 12.

As the Senator says, there are many other agricultural commodities that might be included in addition to cotton. I take it that wool is an agricultural product, and a very necessary one. It could be included in section 12. We could stimulate the price of wool by fixing a minimum on it, if it were thought best to do so, although under no circumstances could wool be treated as an article of food except in so far as relates to the sheep which produce the wool, which are a most important article of human food.

Mr. KENYON. Mr. President——

Mr. RANSDELL. I yield to the Senator from Iowa.

Mr. KENYON. I was going to say, with reference to this very point, that it could be cured by a very simple amendment, namely, the use of the words "necessaries, as defined in this act," or similar words. That amendment, however, was offered in the House, and was voted down, to my surprise. So that difficulty could be cured here, as the Senator says, by an amendment of that character, which I am certain will be offered.

Mr. RANSDELL. I am entirely willing that that amendment should be introduced, because I do not think it entered the mind of any cotton man or representative of cotton to have it included with food. We look generally upon the great, broad purposes for which cotton is used, which are clothing and things of that kind—not the food value of it. I wish to repeat, however, that the food value of cotton seed is very great, for it yields large amounts of cottonseed oil, a vast percentage of which is used in lard products, oleomargarine, edible oils, and so forth, while the cottonseed meal is one of the best of all known feeds for cattle. When it is recalled that there are 1,000 pounds of seed for every 500-pound bale of cotton, it will be seen that a 14,000,000-bale crop—about the average—yields 7,000,000 tons of cotton seed.

Mr. CUMMINS. Mr. President, may I suggest to the Senator from Louisiana that, while it is true, as my colleague says, that the amendment he named was voted down in the House, the House bill is quite different in that respect from the bill we are now considering. The House bill provides—

> That whenever the President shall find that an emergency exists requiring stimulation of production, and that it is essential that the producers of any nonperishable agricultural food or feed products produced within the United States shall have the benefits of the guarantee—

And so forth. The House text would limit the agricultural products to receive the benefit of the section to food and feed products, whereas the Senate bill, which we now have before us, has no such qualification.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Minnesota?

Mr. RANSDELL. I do.

Mr. KELLOGG. What I desire to ask the Senator is whether he would be willing to include cotton in all the provisions in the bill, not whether he would be willing to exclude it from section 12. I, for one, do not see why clothing is not as important as fuel, and I should like to know if the Senator is willing to include cotton within all the provisions of the bill and not to exclude it from section 12.

It seems to me that if we are going to include wheat and other farm products and fuel we should include clothing, or cotton, which goes to make a good deal of the clothing. I understand that the cotton crop is short and the prices are very high and are liable to go higher.

Now, another thing. I do not see any reason why iron, steel, and farm machinery and petroleum and its products should not be included with cotton. I should like to know from the Senator if he is willing to include all of those and include cotton in this bill?

Mr. RANSDELL. Those are matters which I understand are going to be discussed very fully by the Agricultural Committee when the House bill is referred to it. It has already been referred; and doubtless after this bill has been discussed and all amendments introduced we will have that one, among others, referred to us and will give it very, very careful consideration. I can not say offhand that I am willing to include all of those things. I do not wish to see this bill loaded down too much. I am afraid that if we include too many things in it we will destroy it. It is a very good bill, in the main, in my judgment, but if you are going to attempt to include everything it will perhaps become cumbersome, top-heavy, and fall of its own weight.

I rather think if we can confine our efforts to food and fuel—the two purposes for which the bill was framed—we will have gone a long way toward relieving the present very critical situation. There is no doubt but that a great many things can be said in favor of including cotton and wool and iron and steel and the various products thereof, and petroleum—and, by the way, petroleum seems to be included in the word "fuel," and I should say that gasoline is included in the word "fuel," but if not included I rather think there should be an amendment to include the various kinds of fuel in addition to coal. As I understand it, all kinds of fuel, including petroleum and gasoline, are intended to be included in the terms of the bill.

Mr. President, as I was saying, the purpose of this bill is to secure an adequate supply of foods, feeds, and fuels, and to facilitate their prompt and equitable distribution at reasonable prices throughout the Union during the period of the war and the national emergency resulting therefrom.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. RANSDELL. I do.

Mr. TOWNSEND. Before the Senator proceeds to a further discussion, I should like to ask him a question. Do I understand that the Committee on Agriculture and Forestry is now going to consider the bill which has passed the House?

Mr. RANSDELL. It has been referred to the Committee on Agriculture and Forestry. I do not think I am disclosing any committee secrets when I say that several members of the committee have thought that it was best for us to get together and see whether or not we would agree to the changes that had been made in the bill by the House, and to see whether or not

we would advise the substitution of that bill for this—not that anything in the world has been agreed to, but that that bill probably will be discussed in committee.

Mr. TOWNSEND. And the probabilities are that no action will be taken upon the pending bill in the Senate prior to the action of the committee on the other bill, which may be reported as a substitute?

Mr. RANSDELL. I am not authorized to speak for the Agricultural Committee, but I will state that is my judgment. I think, however, that we ought to go on with this debate and straighten out the tangled hanks in this bill just as thoroughly as possible. That is my personal opinion about it. I do not know, of course, what the committee will do.

Mr. TOWNSEND. I do not wish to discourage any legitimate discussion of matters that come up in both bills; but it has been an open secret here, I think, for some time that no action would be likely to be taken upon the bill that has been before us so long until the House bill, with its amendments, had been presented to us. It had occurred to me that it might be well to discuss at this time, at least, the provisions of the House bill, or the changes that have been made in it, if we wish to make any headway at all with the legislation.

Mr. RANSDELL. That might be a good idea.

Mr. REED. Mr. President, may I interject a remark?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Missouri?

Mr. RANSDELL. I shall be delighted to yield.

Mr. REED. It seems to me to be a very remarkable method of procedure to be debating this bill in the Senate and for the Agricultural Committee at the same time to be considering the same bill, as sent from the House, with certain amendments to it. The debate ought to be confined to some bill.

When we began the discussion of the present bill it was assumed that the Senate was going to undertake to pass it. Now it appears that the House has passed a similar bill and sent it over to the Senate, where it has been referred to the committee. I think that before this discussion proceeds much further we ought to determine which measure we are really going to consider; and if the Agricultural Committee is really going to consider the House bill, and really going to take it up with an idea of going through it and changing it where necessary, and possibly having hearings upon it, and so forth, I should like to know that fact.

Mr. CHAMBERLAIN. Mr. President——

Mr. RANSDELL. I yield to the Senator from Oregon.

Mr. CHAMBERLAIN. I will say to the Senator that there is practically no difference between the bill as it passed the House and the bill as it is pending in the Senate. I am sure that the discussions which have been going on here have suggested some changes that ought to be made in both bills. The bills are so nearly alike that the discussions apply to both.

Mr. REED. Then will the Senator pardon me to make this further suggestion? If it is true that the discussions thus far have made it apparent that there ought to be changes, then should not the Agricultural Committee take the bill or bills and put in them whatever of those changes ought to be made, and then let us discuss the concrete proposition?

Mr. CHAMBERLAIN. I can not say that the committee will change the bill. I am only stating my observations from the discussion.

Mr. SMITH of Michigan. Mr. President——

Mr. RANSDELL. Mr. President, I shall have to decline to yield further. I yielded for questions in regard to the matter I was discussing, and if anyone wishes to ask me a question I shall be delighted to yield for that purpose, but I can not yield further for a general discussion as to whether or not we will refer this bill to the Agricultural Committee. That can be done after I get through.

The purpose of the bill is to secure an adequate supply of foods, feeds, and fuel, and to facilitate their prompt and equitable distribution at reasonable prices throughout the Union during the period of the war, and the national emergency resulting therefrom. These articles which are called necessaries are placed under governmental control to be exercised and administered by the President through agents appointed by him, and such other means as to him seems best.

All destruction, waste, hoarding, and monopolizing of necessities is made unlawful; also conspiracies to limit transportation facilities, restrict supply or distribution, lessen the manufacture or production, and enhance the price of necessaries. The spirit and intention of the bill is to increase the supply and cheapen the price of foods and fuels of every kind and sort so that the high cost of living may be materially reduced. Now, we can talk about the bill as much as we please and discuss the various features of it as much as we please, but that is the gist of it; that is the purpose of it. Certainly no man in the Senate and no man in the United States can object to increasing the supply of the food and fuel of this country and reducing their price to the consumers of this country. It is not intended to interfere any more than is absolutely necessary with the ordinary laws of supply and demand, and with the usual and customary agencies for carrying on business, but proper encouragement and assistance will be given to increase the supply wherever the emergency seems to warrant it, and preventive measures will be taken to stop unlawful practices tending to increase the cost of necessaries. I am heartily in favor of the general idea of the bill and shall do my utmost to secure its passage, though I think it should be amended in some particulars.

The imperative necessity immediately confronting us is the abnormally high price of all kinds of food and fuel. What can be done to relieve the situation? How can we cheapen the price of these necessaries so essential to human existence? The problem is difficult, but I believe it can be very materially assisted, if not completely solved, by the passage of this bill. I shall not attempt to discuss every feature of it, but to call attention to two or three very important particulars.

Mr. SMITH of Michigan. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. RANSDELL. I do.

Mr. SMITH of Michigan. I should like to ask the Senator whether he believes in a minimum price to be fixed by law?

Mr. RANSDELL. I do, most decidedly.

Mr. SMITH of Michigan. For food products, in the present emergency?

Mr. RANSDELL. I am not certain that it should be applied just now, but I will call this to the Senator's attention: We have had a maximum production of wheat in this country of something over 1,000,000,000 bushels. Last year we had a wheat production of 650,000,000 bushels. This year we have an estimated wheat production of 656,000,000 bushels. Now, we have enormous demands made upon us by our allies. All reports indicate that our allies in Europe are suffering for food. Food products of every kind in this country are abnormally high; and bread being the staff of life, if we have a very small production of wheat we can expect high prices for all food products. There is a big crop of corn growing. Suppose the corn crop should fall as far short as the wheat crop promises to fall. Suppose, when we shall have gathered the corn and the wheat in our bins this fall it is apparent that there is going to be a greater shortage of food next year than there is now. Then it would seem to me decidedly wise that a minimum price should be fixed on wheat, corn, beans, Irish potatoes, rye, barley, oats, rice, and other food products, so that the people of this country would be stimulated to produce a very large quantity, so that the supply would become fully capable and more than capable of meeting all the demands.

Mr. SMITH of Michigan. Mr. President, does not the Senator from Louisiana think there is some danger in not fixing a remunerative price for products of the farm and the field?

Mr. RANSDELL. There is danger.

Mr. SMITH of Michigan. Suppose, for instance, that under the terms of this bill a price were fixed for wheat which made it to the disadvantage of the farmer to produce wheat and he used his fields for some other crop. Does the Senator think that would increase the wheat crop, or would it have a tendency to diminish it?

Mr. RANSDELL. On the contrary, that would diminish it; but I can not conceive of so wise a man as President Wilson doing such a foolish thing as that. If we ever have a minimum fixed, I will say to the Senator that, in my judgment, it is going to be fixed after very careful study, after bringing to bear on that question all the agricultural knowledge in the various States and in the Department of Agriculture. The opinion will undoubtedly be taken of the various people who handle wheat—the men who produce it, the millers who mill it, the wholesalers who deal in it, the retailers who deal in it, and the agencies engaged in agriculture in the various States—so that with the advice of all those people and with the advice of the food-control committee whom the President is authorized to appoint, I take it that he will, beyond question, fix a minimum price that would be remunerative to the farmer and would induce the farmer to plant an increased acreage in wheat rather than a decreased acreage.

Speaking about wheat makes me think of corn, because it is a better product than wheat for human food. It gives more nutriment to the human being than wheat, according to the report of the Department of Agriculture. Now, I am a raiser of corn myself. That is my business—raising corn and cotton.

If the Department of Agriculture finds a small quantity of corn in this country this fall—small in proportion to the smallness of the wheat crop, and we all know that is going to be small—and if, after a thorough study of the subject, it is determined to fix a minimum of $1 per bushel on corn, I will say to the Senator that as one corn grower I would plant a good deal more than I have planted before; and I can not conceive, if they are going to fix a minimum at all, that they would fix less than $1 per bushel on corn. I can not conceive, if they are going to fix a minimum on wheat, with the present light before us, that that minimum would be less than $2 per bushel.

Mr. SMITH of Michigan. The minimum, of course, need not necessarily be remunerative or profitable. The minimum fixes the place at which the price starts and does not in any manner control the point to which the price may go.

Mr. RANSDELL. That is very true; but I will say to the Senator the purpose of this minimum is to so increase the supply, to so encourage the farmer to grow larger quantities, that the supply will become very much larger. If we get a larger supply, I take it, without any interference whatsoever with Congress for food control or anybody else under the ordinary law of supply and demand, the price to the consumer will go down.

I wish to ask the Senator if he ever in his life—and I take it he has been somewhat of a farmer—knew a big crop to sell for a high price, and if he has known it to fail that a small crop does produce a very big price?

Mr. SMITH of Michigan. I have known big crops to sell for high prices. Of course supply and demand are basic principles. Big crops always sell for a high price when the industrial conditions of the country are favorable, when people are employed in diversified vocations. If everyone raised wheat there would be no market. The question of diversified employment enters very largely into the demand and the price.

Now, I want to get the Senator's viewpoint. I think, of course, he does me great honor when he says I have had agricultural experience. I had experience when about 12 years old husking corn at 50 cents a day, and that was my last agricultural employment. But I have represented an agricultural community for a great many years, and I sympathize with them, with their aims and aspirations and purposes. Does the Senator believe that under this bill the actual price to be paid could be fixed by the controller of food?

Mr. RANSDELL. Not at all. I think the sole purpose of the bill is to increase the supply, and when a minimum is fixed which is going to prove remunerative to the farmer he will increase his acreage and the natural result will be an increased supply.

Now, I wish to ask the Senator a question. What kind of condition did you have in your State in 1912 and 1913? Was it not fairly good?

Mr. SMITH of Michigan. Yes; the conditions were excellent.

Mr. RANSDELL. I have figures before me, and I quote from page 137 of the hearings before the Committee on Agriculture and Forestry of the United States Senate, parts 1 to 5, Sixty-fifth Congress, first session, being the testimony of Hon. I. S. Cullinan, of Texas. The corn crop of 1913 was 2,447,000,000 bushels. Its farm value was $1,692,000,000. For the previous year the corn crop was 3,124,746,000 bushels. It exceeded the crop of 1913 by 677,746,000 bushels, and yet the big crop sold for only $171,546,000 in excess of that small crop.

I will now give the figures of the cotton crop of the South for two years. In 1910 the crop was 11,609,000 bales. It sold for $809,710,000. In 1911 the crop was 15,693,000 bales, an excess of 4,084,000 bales, and yet the big crop sold for only $749,890,000, $59,820,000 less than the small crop.

In other words, the small crop—smaller by over 4,000,000 bales—brought a little upward of $59,000,000 more than the big crop. I will say that after having planted cotton for 25 years it is my universal experience whenever we have had a big crop of cotton in the South we got a small price for it, and whenever we had a small crop of cotton we got a big price for it, and many times the aggregate of the small crop far exceeded the aggregate selling value of the big crop.

Mr. REED rose.

Mr. RANSDELL. I yield to the Senator from Missouri.

Mr. REED. I desire to get the Senator's idea.

Mr. RANSDELL. Provided I can give the Senator some idea.

Mr. REED. The Senator is largely correct in his statement that many times a big crop does not net the farmer as much as a small crop, because there is an overproduction; but considering that question with reference to the present situation, with something like 20,000,000 men in the military camps of the world, with a large area either cut off from the market or in some other way interfered with as a source of production, does the Senator think there is any likelihood of a big crop selling at a greatly reduced price in the coming year?

Mr. RANSDELL. I can not say I think that it is going to sell at any greatly reduced price, but I will also say that a great many people have an idea that the war is going to end in two or three months, just as the people down in my portion of the country thought the War between the States was going to end in a few months and went to work very rapidly to get a chance to shoot at the Yankees, as they called the boys up North, and the same feeling existed up there, and they were in a big hurry to get South to shoot at the rebs. Applying that argument to the farmer all over the country, he will say I do not dare to plant an abnormal quantity of wheat or corn. If I do, I will glut the market and get nothing for these products, and he will go very slowly about it.

I know how it is myself. I am a farmer and I know the feeling of farmers. But if a minimum price be guaranteed to him for three years, let us see how it will apply: You can not stop your agriculture and change it in a moment. If you are accustomed to plant one thing you can not change it to another just for one year very handily. But if you have the minimum guaranteed to you on wheat, let us say for illustration, for the next three years regardless of whether the war ends or not, and if that guaranteed minimum price be one which will remunerate you nine years out of ten, which will give you a handsome profit, then you will be willing to increase very greatly your acreage in wheat.

Mr. REED. Very well; I understand the Senator's thought. Now, if he will permit me a further question, I understood the Senator to say that he thinks the minimum price of corn ought to be a dollar a bushel.

Mr. RANSDELL. I did not say it ought to be. I said if I were offered a dollar it would be very attractive to me. I do not know that it ought to be put at that.

Mr. REED. And $2 for wheat.

Mr. RANSDELL. I said if those figures were placed on it they would be attractive to me as a farmer.

Mr. REED. Now, I do not want to insist on my understanding of the Senator's remark, but I understood the Senator to say that he thought the price would not be less than that. The Senator will agree with me in this that there will be no use in offering the farmer a guaranteed price unless you make it large enough to induce him to stimulate his industry.

Mr. RANSDELL. I do absolutely agree with the Senator in that statement, and if we fix a minimum it should be sufficiently large to attract the farmer.

Mr. REED. In other words, we are going to say to the farmer, in substance and effect, go ahead and plant a large crop of wheat or corn, or whatever he may think necessary; we are going to guarantee you a price which will be above the ordinary price which you would receive. In that way you get the farmer busy and you get a big crop produced. That is the idea?

Mr. RANSDELL. That is the idea; and it is only justifiable, I will say, under an emergency such as seems to be confronting us and our allies to-day. In ordinary times it would not be justifiable at all.

Mr. REED. Now, if that shall be done for three years, because the farmer can not change from one kind of crop to another in less than three years—that is, speaking by and large——

Mr. RANSDELL. Of course, in a general way; I do not mean absolutely.

Mr. REED. That would mean this, that for three years the prices to the farmers would increase beyond what they naturally and ordinarily would be, and thus we keep him producing. Is the Senator familiar with that clause of the bill which provides that the President when he finds prices at home are being reduced can levy a tax upon imports so as to keep the prices up, so that the Government will not suffer any loss by reason of its guaranty?

Mr. RANSDELL. I am.

Mr. REED. Now, I want to ask the Senator if this price is increased to the farmer for three years under this guaranteed plan, and that in order to maintain that high price, so that the Government can not lose anything, all importation is to be cut off through an import tariff, is it not perfectly manifest, then, that during that three years the consumer is going to be compelled to pay a higher price or the Government to sell at a loss?

Mr. RANSDELL. Not at all. Let us take the price of wheat. Suppose you make $2 per bushel the minimum price on wheat, and there is a very large production of it. It goes without saying that with this big production, filling up all the warehouses, all the storage elevators of the country, if wheat is guaranteed to bring $2, the farmer will get $2 for it, and he will dispose of it at $2. It is barely possible that there might be such an enor-

mous production that the wheat would sell in open market for less than $2. In that event the Government would be compelled to make up the difference between the market price and the price it had guaranteed to the farmer.

Mr. SMITH of Michigan. Mr. President——

Mr. RANSDELL. Pardon me until I answer the question. But the consumer in that event would be absolutely sure that he would not pay any more than $2 a bushel for his wheat. It seems to me that the consumers who have been paying as much as $15 and $16 a barrel for flour, as they have in the last few months, would be glad indeed to have a guaranty that they would never have to pay more than $9.50 to $10 per barrel for their flour, which is the price that would be charged them if their wheat was guaranteed them at $2 a bushel.

Mr. REED. While the consumer might be glad to have a guaranty that he would not have to pay the price of the last two months, would he be glad to have a guaranty that he would be compelled to pay higher prices for 12 months out of 14? Would he be especially delighted if instead of getting flour at $5.50, as he did a year ago with $2 wheat, would he be especially delighted that he would have to pay $10 all the year through, whereas in the last 14 months, as I showed, he got his wheat for much less than that during nearly the whole of the time? Does not the Senator think there is another side to that question?

Mr. SMITH of Michigan rose.

Mr. RANSDELL. Does the Senator from Michigan wish to ask me a question before I answer?

Mr. SMITH of Michigan. I should like to have the Senator answer both questions at the same time.

Mr. RANSDELL. All right, I will yield.

Mr. SMITH of Michigan. Suppose a dilemma such as that described by the Senator should actually arise and the Government was buying wheat at one price and selling it at another; with whom is the Government concerned, the consumer or the producer? We are dealing with a very large question, and if the Government is to buy this wheat at $2 as the minimum, I suppose in order to furnish food cheaply it must buy all that is offered at $2. In other words, the Government must take the entire crop. If it goes above $2 in the open market, the Government will not subject its citizens to competition and the necessity of paying a still higher price for its food products than before. I see some difficulties about applying the practical test. I would like to find some basis that is equitable to the people and just to the Government.

Mr. RANSDELL. In response to the questions of the Senator I will try to answer as well as I can. The Government, I take it, represents all the people and it should try to do its best by all of them. We all agree on that. The farmers of the country constitute a very large percentage of the people, something over 50 per cent. They consume a very large percentage themselves of the crops that they raise, be it wheat, corn, meats, or any other crop.

The purpose of the Government in this legislation is to try to do the very best possible not only for our own people in this great emergency but for our suffering, starving allies abroad. The question, it seems to me, or the questions of the two Senators overlook the situation of the war in Europe. Their questions completely overlook the fact that we will have perhaps 2,000,000 of our men withdrawn from profitable endeavor in this country and engaged in an awful war.

There may be a great many more than that before we are through with it, for, as I say, it seems to me that there is every reason to believe that the war is going to last for years, perhaps for an indefinite number of years, and there is no use for us to try to make provision for a few months or for one year. The wise thing for us to do, Senators, is to make provision for a long time in the future, and if the Great Father above permits this war to come to a close sooner, if the ordinary laws of supply and demand can be reestablished in this country before the lapse of three years, if we can go to making crops cheaper, even with all this labor taken from every productive industry, sooner than three years, of course, it would be a good thing. But, on the other hand, if the war continues there is not the slightest danger, in my judgment, and not the slightest danger in the judgment of a great many other people, that we are going to have such an abnormal production of any kind of food as to warrant us in expecting the low prices which the Senator from Missouri alludes to. Of course, people would be glad to think that they could buy their flour for $5.50 or $6 per barrel, and if you could persuade them that they could buy it for $5.50 or $6 per barrel they would not like the idea of paying as much as $10 for it under this guaranty.

Now, mind, I did not say that the guaranty of $2 a bushel was going to be made. I simply used $2 as an illustration. I used it as my individual idea that if a minimum of $2 were fixed it would be most attractive. If a minimum of $1 on corn were fixed it would certainly appeal strongly to me. Before anything can be done in the way of fixing a minimum, as I said before, the very best possible evidence is going to be obtained from every agricultural department in this country and from our United States Department of Agriculture and from the people engaged in any way in the handling, milling, wholesaling, or retailing of wheat, and they may not fix such a minimum as I have suggested.

Mr. REED. Now, Mr. President, will the Senator pardon me further?

Mr. RANSDELL. Yes; I am glad to have the Senator interrupt me.

Mr. REED. We do not get anywhere, it seems to me, when we just go off and generally discuss the war. I am trying to get the Senator, who is a perfectly candid man——

Mr. RANSDELL. I thank you.

Mr. REED. To make a plain admission that I think ought to be made in the interest of common honesty to the American people, and that is that any law which raises the price of cereals to the farmer will necessarily raise the price of food products to the consumer, and that if a guaranteed price to the farmer is high enough to encourage him to raise unusually large crops, that guaranteed price must be something higher than the farmer at least believes he would get without the guaranty. Otherwise there would be no stimulus whatever, and if it be higher than he would otherwise get, then that additional price must be carried along to the consumer. If we guarantee these prices to the farmer for three years at a point higher than he would otherwise get, then for three years the consumer must pay a bigger price than he would otherwise pay.

Mr. RANSDELL. That does not follow at all. You might have a very small crop, and the result might be the same outrageous condition which you have now for a small crop, whereas if the farmer had been given a guaranty and had raised a big crop he would never charge nor would the consumer pay any more than on the basis of the guaranteed minimum.

Mr. REED. Mr. President, if the guaranteed minimum put the price up to the farmer, and that is what I am trying to get at, does it not necessarily put the price up on the flour, the product of the farmer? If it actually does advance the price to the farmer, does it not necessarily advance all that which is produced from the farmer's product?

Mr. RANSDELL. From the farmers' profits?

Mr. REED. If it advances the price of wheat to the farmer, does it not necessarily advance the price of flour?

Mr. RANSDELL. Of course the price of flour has got to go up if the price of wheat goes up.

Mr. REED. Now——

Mr. RANSDELL. But it does not follow, and there is the fallacy in the Senator's argument—it does not follow that the price of wheat is going up. We did not have any guaranty last year; we had a very small crop last year, and the American people are paying an enormous price for their flour.

Mr. REED. Mr. President——

Mr. RANSDELL. Just wait, please, until I answer the question. Suppose that we give this guaranty and get a very big crop—all the bins are full of wheat. I presume the Senator admits that the consumer in that event would not pay any more than on the basis of that guaranty. You could not pay any more than that, surely, because there will be such a big supply; there will be no inducement to pay any more than that price.

Mr. REED. Mr. President, if the Senator will pardon me, the bill provides that the price is to be fixed before seeding. Indeed, it provides for a three-year guaranty.

Mr. RANSDELL. That is right.

Mr. REED. I do not think the Senator quite catches my question. I am assuming that the guaranteed price is to be of some benefit to the farmer.

Mr. RANSDELL. Certainly it will not produce any increased wheat if it is not of some benefit to the farmer.

Mr. REED. If it is of benefit to the farmer it must be because it increases the farmer's price.

Mr. RANSDELL. That is right.

Mr. REED. If it has increased the farmer's price, will it not increase the miller's price?

Mr. RANSDELL. In the same proportion.

Mr. REED. If it has increased the farmer's price and the miller's price, will it not increase the price the consumer has to pay, or is there some remarkable hiatus which occurs there?

Mr. RANSDELL. Undoubtedly. I have answered your question on that point several times. There is no difference between us on it. The difference is this: If we do not have the guaranty, I repeat we may have another very small crop and be in the

unfortunate position we are in now, of being practically unable to help our distressed allies in Europe. We are not going to fight this war properly unless we send enormous quantities of food to Europe as well as men and the ordinary munitions and guns to fight with. We have got to send food, and we can not send food unless we encourage its production. Does the Senator suppose, for instance, that people down in Louisiana are going to give up raising cotton at anything like present prices and go to raising more corn? Will they do that anywhere in the South? Are they going, in the State of Utah, to give up raising sugar at present prices and put their acreage into corn and wheat unless they are guaranteed a good price for it? It is an abnormal situation, and you have to meet it in an abnormal manner.

Mr. VARDAMAN. Mr. President——

Mr. RANSDELL. I yield to the Senator from Mississippi.

Mr. VARDAMAN. I was going to suggest to my friend, the able Senator from Louisiana, that what I understood he is trying to accomplish is not so much a question of prices as it is of production. He realizes, and everyone realizes, that in order to stimulate production an extraordinary price is to be offered. You can not stimulate the raising of wheat, of corn, or sugar, as is contemplated in this bill, without running the risk of having to pay more for it than you would in normal times. Abnormal conditions are met and solved only by extraordinary means and, I take it, from the drift of the Senator's argument, the paramount thing he is now seeking to accomplish is an increased quantity of foodstuffs, rather than holding the price down. Of course, the Senator, like all the balance of us, realizes the necessity of keeping down prices, but the question of first and paramount importance is an ample supply of food.

Mr. RANSDELL. That is exactly the idea, and I thank the Senator for his suggestion.

Mr. REED. Will the Senator pardon me?

Mr. RANSDELL. Certainly.

Mr. REED. The Senator says now he is interested in increased production rather than in the price. That is substantially the point I desired to make in my argument on this question, but I want it understood by the consumers of the country that the proposition now is, instead of giving them food for less than they have been paying, to make them pay more.

Mr. RANSDELL. Will the Senator please tell me how he is going to give food for less under his plan.

Mr. REED. I have not proposed it.

Mr. RANSDELL. But you are stating that is what you want to do.

Mr. REED. No.

Mr. RANSDELL. You just said so.

Mr. REED. The Senator did not hear me.

Mr. RANSDELL. Perhaps I have not good ears, but that is what I understood.

Mr. REED. I am talking about a foolish proposition that has been argued here to the people of this country, and I am glad that the Senator has turned on me, thinking that I said so, and admits it as an argument because it came from my mouth.

Mr. RANSDELL. The Senator just that moment said it.

Mr. REED. The RECORD will show it in condemnation to the logicians back of this bill. They say we are going to give the farmers a higher price, and thus stimulate production. They say at the same time to the consumer we are going to give you cheaper prices and we are going to relieve you. I say if you increase the price to the farmer the price will be carried on to the consumer, and I want the consumer to know that fact. There may be questions of middlemen, and so forth—that is another thing—but starting with the proposition that you are going to increase prices to the farmer, you must admit that means a higher price to the consumer. Let the newspapers of the country tell that to the citizens of the great cities of the country, and see how they will treat it.

Mr. RANSDELL. It does not necessarily mean a higher price to the consumer at all. The present high prices in this country were brought about by shortage in the supply. A small production is what is responsible more than anything else for the present very abnormally high prices. Under the plan suggested in this bill we are going to have moderately high prices; I admit that; I do not want to dodge at all. I know if the price to the farmer is increased, proportionately the price to the consumer is going to be increased; but if, as the result of that increased price to the farmer, we get a very large additional production in the country, we will have the land flowing with plenty and we will have millions of bushels to send to our suffering allies abroad. The result is going to be enormously beneficial to the people of America and to our allies in Europe. Those are the things for which we should struggle, Mr. President, in a big, broad way, even if it does cost us some money.

Mr. VARDAMAN. Mr. President, I take it that the Senator from Louisiana has given mature thought to this question and also exhaustive investigation. Can he tell me the average price for which the farmer has sold his wheat and his corn and his other crops of cereals, say, for 10 years past?

Mr. RANSDELL. I could not tell the Senator that to save my life.

Mr. VARDAMAN. It seems to me that when it comes to fixing the prices of commodities that question should be thoroughly investigated. I do not think it is necessary in order to induce the American people to exert themselves to the extent of their productive capacity to fix the price abnormally high. I think the average price for which the farmer has sold his crop in the West and in the South and made a fair return upon his investment and his labor is the price which ought to be fixed in the present circumstances. Whenever it is known that the farmer is going to be able to sell his corn or his wheat or his cotton or what not at a fair, remunerative price, he can be depended upon to go to the extent of his capacity in the matter of production.

I think there is another factor of value in this calculation, the one thing we have all overlooked throughout the discussion of this proposed legislation, and that is the fact that the American people are patriotic, and that they can be relied upon to do things from patriotic motives as well as pecuniary reward. I think when the American people become thoroughly inoculated with the spirit of war—they have not become so as yet, because they did not approve of war; I doubt if they approve it now, but they realize we are at war and must carry it on to success—when they become thoroughly inoculated with the war spirit and see and feel the necessity for furnishing the armies of America and of the allies with foodstuffs they will labor to their utmost capacity to produce it. I would rather trust the patriotism of the American masses to serve the Nation in time of war—I would stake more on their love of country as the impelling motive to heroic sacrifice of blood and treasures than I would upon their love of gold.

Mr. RANSDELL. Mr. President, I thank the Senator from Mississippi for his very valuable suggestions. They are a real contribution to my remarks. In fixing the guaranteed price, I assume that the agencies called upon to do so—which is a guess on the future—would naturally study the past. If I were one of those to fix a price upon foodstuffs of any kind, I should certainly make a thorough investigation into the agricultural conditions, not only of the past 10 years but of the past 20 or 30 years. I would examine everything connected with them. If I found wages were higher now than they have been in normal times I would take that into consideration; if I found that fertilizers were higher now than they have been in the past I would take that into consideration. I would try to take into consideration every single, solitary factor that could be brought out, every fact that could be advanced, and, with the conditions and circumstances ascertained for a period of years, I would make the very best guess I could for the future. Then I would add a little, to be on the safe side, so as to encourage the farmer to raise an extra quantity. That is the spirit of the bill, and that is the way I think it is going to be enforced.

I shall now proceed with the regular line of argument which I had prepared.

Mr. President, section 12 authorizes the President to guarantee minimum prices of agricultural products whenever he finds that an emergency exists requiring stimulation of production. I believe such a guaranty would work well in many instances. Bread is the staff of life, and we need enormous quantities of grain in order to supply all the bread needed by the people of the United States and a reasonable amount for our allies. There seems to be a shortage of wheat and corn; indeed, it is impossible to explain the very high price of flour and meal in any other way. Reports of the Department of Agriculture indicate that the growing crops will give us a large yield of corn, but a short crop of wheat is certain, the estimate being about 656,000,000 bushels, while our maximum yield is over 1,000,000,000. If the outcome on corn should prove disappointing and instead of a large surplus there should be another apparent shortage, or at least an insufficient quantity to answer all demands of our own people and a liberal supply for our allies, it would seem to be very wise for the President to guarantee a minimum price for the wheat and corn to be produced next year, so that a large additional acreage would be planted in both these cereals, with a resultant great increase in production. I can not venture to suggest what this guaranteed minimum price should be, but if the situation warrants it I can readily understand that an assurance to the farmers of the Union that they will receive not less than $1 per bushel for corn and $2 per bushel for wheat would

give very large crops of both next year. My own business is raising cotton and corn, and if I knew in advance that not less than $1 per bushel would be paid for corn I would certainly increase my acreage in that grain materially. The same would be true, I am sure, as to all growers of wheat, and many persons who are not now raising wheat in any quantities would plant a greater acreage.

If there be a guaranty of, say $2 per bushel for wheat and the yield is quite large, the chances are that the farmer would not receive more than that price for his product, in which event the guaranteed minimum would prove to be the actual maximum. But, even so, the farmer should be well satisfied, for he would know in advance that the least price he could obtain would be $2, and if that sum was not satisfactory he could plant something else. Should the impetus thus given to the wheat producer result in a large crop, the consumer would certainly not pay more for his grain than $2 per bushel, or about $10 per barrel for flour in New York, as against $15, a very great reduction on present prices, and we could then make heavy shipments to our European allies. It would also enable us to accumulate stocks adequate to safeguard our 100,000,000 people against a shortage of cereals. We should always carry at least six months' supply, about 250,000,000 bushels, and 75,000,000 to 100,000,000 bushels for seed—say a total of 325,000,000 to 350,000,000 bushels. Such a result would be beneficial to the farmer who raised grain, to the dweller in the cities who consumed it, and to the struggling forces in Europe.

This result presupposes that after the wheat is produced it is fairly and equitably handled until it reaches the ultimate consumer, without illegitimate profits to any of the middlemen who handle it. And one of the principal purposes of this bill is to prevent and guard against any unjust profits by anyone, such as conspiracies to raise prices on the boards of trade, hoarding and storage of undue quantities to affect the market, abnormal profits by elevator men, millmen, and wholesale dealers. The bill creates agencies to grapple with and control the wheat from the time it passes out of the farmers' hands until it reaches the retail merchant, and the consumer himself will surely be able to see that the retailer, who is his neighbor and friend, does not exact undue profits.

The arguments applicable to wheat apply to all staple food products, and wheat is used merely as an illustration because of its universal consumption.

If it be found necessary to guarantee a minimum on wheat, it would seem to me advisable to make a similar guaranty on all cereals and articles which take the place of wheat, such as corn, oats, rice, rye, beans, and potatoes. My reason for this is that if a minimum be fixed on wheat but not on the other articles a very great acreage would probably be planted in wheat to the exclusion of other things, with a probable serious diminution in the production thereof. I think the wiser plan would be, if it ever becomes necessary to fix a guaranteed minimum on any article, such as wheat, to establish at the same time a relative price on other commodities which answer as a substitute for it, in order that a fair and just equilibrium may be maintained.

Some may contend that the fixed minimum is more in the interest of the producer than the consumer, but I do not think so. The sole purpose of the minimum is to guarantee increased production, and wherever there is a large increase in the production of any commodity reduction in price to the ultimate consumer is certain to follow.

I have been a grower of cotton for many years and have observed as an unfailing fact that whenever there is a big crop of cotton the prices go down, whereas when the crop is small the prices go up. I have seen very large crops of cotton actually sell for much smaller sums in the aggregate because of the low price than was realized for smaller crops on account of the high price. In those instances the ultimate consumer should have gotten the products of the cotton much cheaper, for it certainly gave very much less to the farmer who produced it.

Entirely aside from this bill, it may be stated as a well-established axiom of political economy that whenever there is a large quantity of any commodity desired by mankind the price falls, and when the commodity is scarce the price goes up; it will follow just as surely that if a minimum giving the farmer a reasonable price for his commodity, not an exorbitant one, but a fair reward for his labor, be established and big crops result, the ultimate consumer will reap the benefit.

Mr. President, I am opposed to the provisions in section 14 and elsewhere in the bill which authorize the President to accept services without compensation. In my opinion this is a dangerous principle, even in war times. I think everyone should be paid at least enough salary to cover his actual traveling expenses and per diem. I do not mean to say that in doing emergency work for the Government in a crucial time like this big salaries should be paid anyone, but I believe that the poor man is just as much entitled to serve his Government as the one of wealth; and if a man is engaged and allowed to work without any compensation it would be found in practice that only men of means could perform such service at the Nation's Capital. The result would be class feeling, and the idea would speedily gain ground that none but rich men could serve their Government in the honorary capacity of a voluntary employee without compensation. I can not believe that this would be wise or fair; all classes of citizens should be placed on terms of absolute equality. One class is just as patriotic as the other; and, while I am sure that the rich men of our land are true patriots, many of them willing to give their time and labor to the Government without any compensation whatsoever, I am just as thoroughly convinced that there are an equal number of men of very small means who are just as patriotic, who are anxious to do everything in their power to help their country in this crisis, but whose financial conditions do not permit them to leave home and pay their traveling and other expenses, which are considerable in this city. This clause should be stricken out and the President allowed to fix the compensation, with the understanding that he shall make it very reasonable, and, when people are willing to work for nothing, that their compensation will suffice merely for actual and necessary expenses.

Mr. President and Senators, I now come to a phase of this bill to which I wish to direct especial attention. I refer to that part of section 1 which provides for equitable distribution and facilitating the movement of food and fuel. In my opinion, it is just as necessary to distribute food and fuel quickly and cheaply as it is to produce them, and this necessitates the thorough utilization, under wise regulation, of all our transportation facilities by highway, railroad, and water. I hope Senators will pay strict attention to this phase of my discussion. I have not heard the question treated by anyone heretofore in all the long debate on this bill. I am speaking now of the problem of transporting the product from producer to consumer.

At the present time there is a great congestion on the railroads of this country, which has existed for many months, and unless material improvement is made I fear the situation will become very serious when the great crops now growing are ready for harvest. A late official report shows that on the 1st of May last the railroads were suffering from a shortage of 145,449 cars; and from many quarters have come reports of suffering caused by inability to move freight. Some weeks ago representatives of the greatest sawmills in America, located at Bogalusa, La., were in Washington making desperate efforts to secure cars to move 95,000,000 feet of sawed lumber then lying in the company's yards.

They were unable at that time to get them; I hope they have gotten some since.

At a hearing before the Senate Committee on Agriculture and Forestry on the 1st of last May, Mr. Rothwell, of Boston, president of two big flour-milling companies, and Mr. Moses, of Kansas City, president of the Southwestern Millers League, testified that flour mills were having very great trouble to secure supplies of wheat owing to car shortage. They both expressed the opinion that transportation was one of the most serious items in the enormous price of wheat at that time, because it had not been possible to move it; and that the price of wheat—listen to this, Senators—had been influenced more largely by transportation than any other factor.

The testimony referred to is so exceedingly interesting that I wish to read just a few words from the statements of these two gentlemen. Mr. Rothwell, let me say, is the president of two big milling companies, one located at Lawrenceburg, Ind., and the other the Roller Mills, Boston, Mass. He was asked by the chairman:

> Have you anything further, Mr. Rothwell?
>
> Mr. ROTHWELL. A question was asked by Mr. Mennel just now which he, I think, overlooked, in regard to this wide variation in the cost of production. That, of course, is governed very largely by the extent of your capacity employed. Take our own case through the months of January, February, and March. Owing to a shortage of cars, while we were crowded with shipping directions we were unable to get cars, and so our plant only operated half time practically. So you can understand that immediately you reduce your output the cost of production—the unit cost—increases.
>
> The CHAIRMAN. The fixed charges remain the same.
>
> Mr. ROTHWELL. The transportation, therefore, has been one of the most serious items in this enormous price of wheat, because it has not been possible to move it.
>
> The CHAIRMAN. That is due in some measure, you think, to an actual shortage of cars, and to some extent is justified?
>
> Mr. ROTHWELL. Apparently due mainly to the lack of tonnage to carry stuff away from the seaboard.
>
> Senator RANSDELL. Lack of ocean tonnage?

Mr. ROTHWELL. Lack of ocean tonnage, which has resulted in tremendous congestion at the ports.

Senator RANSDELL. And the cars are being used there as storage warehouses really for this grain? They can not be unloaded and returned to the farms?

Mr. ROTHWELL. To a considerable extent that is so. We have had cars on the way from Minnesota to Boston four months, when ordinarily the time would be 15 days.

Senator RANSDELL. And you say one of the most serious problems now connected with this question is the inability to get the grain moved from the elevator to the mill?

Mr. ROTHWELL. Yes, Senator.

Senator RANSDELL. That has been a very serious problem, and it is to-day a very serious problem?

Mr. ROTHWELL. Yes.

Senator RANSDELL. Do you regard the question of transportation as one of the most serious which the Nation has to grapple with in this whole food situation?

Mr. ROTHWELL. I do, Senator.

Senator RANSDELL. One that we ought to give our very best thought and attention to, certainly. It is a tremendous problem.

Testimony to the same effect was given by Mr. Moses, who, I repeat, is president of the Southwestern Millers' League and the Kansas Flour Mills Co., Kansas City, Mo. The chairman asked him:

Have you discounted in that the prospective crop shortage for the current year? Is not that a factor that has reacted on prices of the present supply?

Mr. MOSES. It may have had an influence on prices, but I doubt if to any great extent. The price has been influenced more largely by transportation than any other one factor.

The CHAIRMAN. More than by the psychology of the situation and the fright that has been occasioned by talk about starving to death?

Mr. MOSES. That is the second one. But the first item that has caused these high prices is transportation, pure and simple.

The CHAIRMAN. Do you think that has doubled the price of wheat?

Mr. MOSES. It may not have been entirely due to transportation, but it was the original cause of the commencement of upward movement. It has prohibited the free interchange of wheat stocks from one market to another.

The CHAIRMAN. It looks like in that case that the market would be spotty, and where they had the transportation facilities the price would be low and where they did not it would be high. This is uniform and apparently due to a uniform cause.

Mr. MOSES. I should hardly think that would be carried out fully on this account. If you owned wheat in southern Idaho, while it might be impossible to get cars to ship it to Chicago or to Kansas City or to the Gulf, yet you naturally base your ideas of the worth of that wheat on the prices that might prevail at other points, less the rate of freight and expense of hauling, regardless of whether the actual wheat or the flour could be transported quickly or not.

That testimony was confirmed and elaborated on the same day by Mr. Robert G. Phillips, secretary of the International Apple Shippers' Association, of Rochester, N. Y., who stated in substance that enormous quantities of fruit and vegetables of every kind and sort had been lost in the Northwest last year because of the car shortage. He cited an instance where the Louisville & Nashville Railway Co. was actually using refrigerator cars to carry cotton, lumber, brick, and commodities of that kind. The situation was very bad according to the testimony of that gentleman. I will ask to include in my remarks some of his statements.

The VICE PRESIDENT. Without objection, permission is granted.

The matter referred to is as follows:

Mr. PHILLIPS. Mr. Chairman and members of the committee, without any question whatever the element of transportation is one of the most vital problems of distribution, and one of the elements that needs to be safeguarded at this time in every possible way. I speak advisedly, because, commencing last fall, the refrigerator equipment and insulated equipment necessary for the movement of perishables became acute, and culminated about the last of October, particularly in the Northwestern States, with the movement of box apples, and also in portions of the East, particularly in New England and that territory. As a result of those conditions, hearings were instituted by the Interstate Commerce Commission and continued for some 12 days or 2 weeks at Louisville. I attended those hearings and represented our interests, and particularly the apple and perishable interests.

I might say at that time there were thousands of boxes of apples—yes, hundreds of thousands—and I do not know how many potatoes and other perishable commodities awaiting shipment out of the Northwest, and the same was true generally over the country.

At that particular time we had this situation: The perishable crops of the country were less than they had been for some years. The potato crop showed at least 100,000,000 bushels under the preceding year. The onion crop was probably not over 45 per cent; cabbage was very light, and apples in the barrel territory showed probably 25 per cent under the preceding year. In the box States there were 17,000 to 19,000 crates less than the preceding year. And so on down the line, and yet with this shortage of perishable crops to move in refrigerator and insulated equipment, we had, in spite of that fact, a worse car situation, a worse transportation situation, than we had at any time within several years back, and at times when we had far larger crops, indicating that something was very decidedly wrong.

As the result of that hearing at Louisville, the facts were developed that the railroads of the country had totally disregarded their car-service interchange rules; that they were deliberately stealing each other's equipment and refusing to return it; that they were misusing refrigerator equipment intended for perishable crops and using it in the shipment of dead freight, cotton, paving brick, household goods, cement, lumber, explosives, and all of those things.

Senator RANSDELL. In refrigerator cars?

Mr. PHILLIPS. In refrigerator cars. Just as an example, a representative of the Louisville & Nashville testified on the stand at Louisville that they had some 350 Illinois Central refrigerator cars—I think those were the figures; about that—which they positively refused to return to the Illinois Central, and which they were using for the loading of cotton at that time for shipment to Memphis, there taking out the cotton and loading the refrigerators with dead freight and shooting it back to New Orleans for the same movement over again, or they were taking those Illinois Central refrigerator cars and billing them with cotton freight through to Fall River.

Senator RANSDELL. Do you know just what effect the refrigeration had on brick? [Laughter.]

Mr. PHILLIPS. I do not know, but it had an awful effect on our perishables. Without going into any details, those were some of the conditions that were going on all over the country.

Senator RANSDELL. That was last fall?

Mr. PHILLIPS. That was last fall. Then the movement of the cars had been very badly slowed up. I will not attempt to give you any of the specific instances, although I have them here and could do so.

Senator RANSDELL. Could you put some into the record?

Mr. PHILLIPS. Yes; for example, two cars of pears—Pacific Fruit Express cars from Oregon—that reached Boston on October 18 over the Boston & Maine. They were ordered on that very day to the Quincy Cold Storage Market Co., which was distant 1 mile from the end of the Boston & Maine tracks, over the Union Freight Railroad, and one of those cars reached cold storage on the 24th, which was six days from the time it was ordered to be placed there, and the other reached there on the 25th, which was seven days. Another car of boxed apples, which I remember was ordered for Springfield, Mass., and left Washington on October 18, and November 11 had not been heard of at all. Cars of apples were detained in the Portland yards, en route to Boston, for six days; and other cars which were billed from a point 15 miles out of Boston to Boston could not be found after five days.

Take the case up at Trinidad, Colo.: Two cars of cranberries went in there. The railroad took either three or four days to place the cars for unloading after arrival. The man unloaded them the very day they were placed, and the carrier took three or four days after that to haul them out from the warehouse.

The representative at Louisville of the Pacific Fruit Express stated that the Pacific Fruit Express cars were making only two-fifths of a trip a month, whereas they should make at least a trip a month. Those are some examples of the delays in movement which are going on over the country.

Senator RANSDELL. Were these all abnormal?

Mr. PHILLIPS. Very abnormal.

Senator RANSDELL. Why? How do you account for that situation?

Mr. PHILLIPS. Well, it was a lack of motive power, failure to observe their car-service rules, holding each other's equipment, inefficiency——

Senator RANSDELL. Why did they do that? I can not conceive a thing like that, the Louisville & Nashville using those refrigerator cars to haul cotton in. There must be a motive back of a railroad doing anything like that.

Mr. PHILLIPS. They had other commodities to move, and they took any cars that were available and put that commodity into them, regardless of whether it should have gone into those cars or not.

Mr. RANSDELL. On the 10th of May last Mr. S. A. Thompson, secretary-treasurer of the National Rivers and Harbors Congress, sent out a large number of circular letters to State and national trade associations and prominent manufacturers asking for information as to the extent of damage and loss which had been caused by the car shortage. The replies received indicated that conditions in many lines of business throughout the country due to this cause were very serious, and in some cases desperate. I will read just one or two of these replies and ask to insert some of the others in my remarks without reading. Here is one from Mr. C. J. Shaar, traffic manager of the Packard Motor Car Co., of Detroit, Mich., in which he says:

At times during the past winter this company had as high as $1,500,000 worth of product on the shipping floors awaiting transportation—

I hope the Senator from Michigan will listen to this—

Carriages and trucks were driven under their own power to Chicago, Indianapolis, South Bend, Cincinnati, Columbus, Cleveland, Pittsburgh, and Buffalo, and deliveries in many instances were taken by our dealers in those and other towns at points on the Great Lakes which we could reach by boat after navigation opened. For instance, our Cincinnati dealer would take deliveries at Sandusky, our Columbus dealer at Toledo, our Pittsburgh dealer at Cleveland.

Mr. Charles Quinn, of Toledo, Ohio, secretary-treasurer of the Grain Dealers' National Association, said:

The only information available at this time is that which is generally known to the business men of the country, namely, that all our members, in common with all other shippers, suffered severely because of lack of equipment and motive power of the carriers.

Here is a reply from Charlotte, N. C.:

GEO. H. MCFADDEN & BRO.'S AGENCY,
Charlotte, N. C., May 12, 1917.

Replying to your circular letter of May 10, it is impossible for us to give you any actual facts and figures regarding car shortage in the Southern States, but in the writer's own business, for instance—cotton business—we are having the greatest difficulty in getting cars in which to make shipments, and we hear on all sides that the mills are having similar difficulties in moving their goods.

JENNINGS & BRYANT, *Agents.*

Here is one from Pittsburgh, Pa.:

MURRAY MOTOR CAR CO.,
Pittsburgh, Pa., May 12, 1917.

Received your letter of May 10, and we have practically given up all shipments by freight.

Think of that, Senators—

The cars that are delivered within driving distance of Pittsburgh we have driven over. In fact, we have driven over all our cars that were delivered to Baltimore. The cars that go to New York are nearly all sent by express, except the ones they are in no hurry for. These are taken with some other freight shipments, and it takes at least a month for them to get to New York. * * *

One month from Pittsburgh to New York! And then he adds:

I understand that the Goodrich Co. are delivering tires by truck from Akron to Boston. Their representative told me this the other day.

W. N. MURRAY, *President.*

Think of that—from Akron to Boston by motor trucks, a distance of over 700 miles! I will give you a few additional figures on that in a moment.

Without reading, I ask permission to insert the remainder of these replies in my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

NATIONAL PAVING BRICK MANUFACTURERS' ASSOCIATION,
Cleveland, Ohio, May 14, 1917.

We have yours of May 10 and we are in hearty sympathy with the purpose of your inquiry, and beg to say that approximately the efficiency of the manufacturing plants represented by this association has been decreased fully 25 per cent by reason of a shortage of car service.

WILL P. BLAIR, *Secretary.*

—

NATIONAL ASSOCIATION OF THE
GRANITE INDUSTRIES OF THE UNITED STATES,
Boston, Mass., May 15, 1917.

A number of our people load on their own siding and have to wait for as long as a week or 10 days to get the cars which they order; many other truck their shipments to a loading depot, and there have been occurrences where truck loads are refused and have to be taken back to the plants.

It is also a common occurrence for goods delivered at the loading depot to remain there anywhere from 3 to 10 days before cars are available to load upon. It has been a serious inconvenience, and particularly serious at this time when many cemetery memorials are being shipped for erection previous to Memorial Day. We fear that a number of people will be disappointed.

ROBERT D. SMITH, *Secretary.*

—

THE RETAIL LUMBER DEALERS' ASSOCIATION OF THE
STATE OF NEW YORK,
Rochester, N. Y., May 12, 1917.

We can not give you any definite information in reply to your letter of May 10, requesting statistics as to the railway shortage in the lumber business in New York State. We do know that conditions at the present time are severe. It is almost impossible for the lumber dealers to secure shipments of lumber which were ordered weeks and months ago. I have before me at this moment a complaint relative to a car of shingles which was ordered in the early part of September, and it has not been shipped yet. This is indicative of conditions which demand remedy.

We believe that every possible use should be made of the waterways of the United States in order to release freight cars for service. We wish to commend you for the work which you are doing.

PAUL S. COLLIER, *Secretary.*

—

THE LUMBER DEALERS' ASSOCIATION OF CONNECTICUT,
New Haven, Conn., June 8, 1917.

Information which has come to us through statements of members located in various parts of the State, which is the territory this association covers, would indicate that conditions are of a serious nature. Car shortage and embargoes have delayed shipments of material required for necessary building construction. In many instances orders given for cars of lumber for immediate use have never been received. In instances shipments haven't left the mills for lack of cars, and shipments have been delayed due to embargoes. Members have stated that if the situation does not clear for the better their business interests might as well be discontinued, for they are in no position to meet the demands of their customers.

B. A. LAMMLIN, *Assistant Secretary.*

—

FORT WORTH FREIGHT BUREAU,
Fort Worth, Tex., June 4, 1917.

One shipper who uses a large quantity of sugar in an article he manufactures advises that he was forced to pay exorbitant prices for sugar as a result of not being able to have orders filled at New Orleans on account of inability of the American Sugar Co. to secure cars. A grain firm advises that they had to turn down an order of some 200,000 bushels of wheat from Minneapolis to Galveston because the lines in Minneapolis would not let their cars go south.

ED. P. BYARS,
Secretary and Traffic Manager.

—

SOUTHERN APPALACHIAN COAL OPERATORS' ASSOCIATION,
Knoxville, Tenn., May 24, 1917.

The only unsatisfactory feature of the situation is an abnormal car shortage. The mines in east Tennessee and southeastern Kentucky at best are not able to operate more than half time; many of them are not doing this well.

JAMES E. MCCOY, *Secretary.*

—

INDEPENDENT OIL MEN'S ASSOCIATION,
Chicago, Ill., May 23, 1917.

As you are already aware, this association is not vitally interested in the shortage of railway equipment, as about 80 per cent of our products are shipped in tank cars, 95 per cent of which are privately owned.

The great difficulty we have had lately has been the slow movement of cars on all lines, and it has taken about three times the number to do the same work as it did a year or more ago.

E. E. GRANT, *Secretary.*

—

THE FIRST NATIONAL BANK,
Tuscaloosa, Ala., November 21, 1916.

At the present time there are perhaps in this country alone 1,500 or 2,000 carloads of lumber awaiting shipment. The owners have been required to hold this lumber a long time on account of the shortage of cars. It seems that there is a shortage of cars nearly all over the South. Now, if the railroads have not sufficient cars to do the transportation of the country, does not the country need to be able to use the magnificent waterway system provided by nature?

FRANK S. MOODY, *President.*

Mr. RANSDELL. A report was made to Congress on the 20th of this month by the Federal Trade Commission—see House Document 193, Sixty-fifth Congress, first session—which shows a desperate situation with regard to fuel, owing to defective water and rail transportation. I wish to read just a few remarks from that document and suggest that all the Members of this body get it and study it. It is House Document 193 of this session. It was introduced in the House on the 20th of this month. The Federal Trade Commission says:

The pooling of coal in the hands of a Government agency would still be ineffective either as to distribution or as to the promotion of a maximum of production unless similar control extended over all means of transportation, both rail and water, and to meet this the pooling of railroads and boat lines is clearly indicated. The railroads of the country, if operated as a unit and on Government account, could be used to transport coal and other products by the most direct route to their point of destination, and the efficiency of the roads themselves and of existing rolling stock and of motive power would be vastly increased.

Our allies and Germany all require the railroads not already Government owned to be operated as a unit and on Government account, and the allies have officially stated that one reason for being certain of victory was that transportation had been reorganized and perfected.

For the purpose of operation the several railroad lines and systems and inland and coastwise water transportation of the United States would, under the plan here suggested, lose their identity and could be coordinated into a unit for efficiency and economy.

All receipts from all rail and water transportation agencies being pooled in the hands of the Government, and all expense of operation paid from the common fund, each individual company should be paid a just compensation, which might be measured by the average annual net profit and expenditure for maintenance and betterments for the five-year period prior to the war.

The operation both of the mines and of the transportation agencies could be carried on by the present employees and officials, and after the war they could be returned unimpaired to private operation.

The rolling stock of railroads, operated as a unit, could be mobilized so as to care for the shifting seasonal demands.

In view of the foregoing, the commission recommends:

First. That the production and distribution of coal and coke be conducted through a pool in the hands of a Government agency; that the producers of various grades of fuel be paid their full cost of production plus a uniform profit per ton (with due allowance for quality of product and efficiency of service).

Second. That the transportation agencies of the United States, both rail and water, be similarly pooled and operated on Government account, under the direction of the President, and that all such means of transportation be operated as a unit, the owning corporations being paid a just and fair compensation which would cover normal net profit, upkeep, and betterments.

Mr. President, that is a straight recommendation of Government operation and control of all the transportation agencies of this country. I do not know, sir, that I am prepared to go that far, but I am decidedly in favor of such regulation and control of these agencies as are necessary to assure effective service while this war lasts, and I do not believe that we can have effective service unless we empower the President to make preference shipments, as we did in a bill passed here last week. Unfortunately, however, that bill seems to have been limited to war munitions and to the emergencies caused solely by the war. I think it should go further; and I introduced an amendment to-day which will give the President very considerably increased power over our transportation agencies. My amendment does one thing which is not included in the bill passed last week, and that is, it takes in motor-truck companies.

I doubt if many Senators have given very much attention to the question of carrying freight by motor trucks. It is a most interesting thing, one well worthy of your consideration. A very short while ago I got a letter from the vice president of a railroad in Louisiana assuring me that his company was patriotic and desired to pay taxes; but, said he:

I wish to remind you that motor-truck companies are now carrying freight for a distance of 30 miles out of one of the largest cities in Louisiana, and delivering that freight alongside my tracks at exactly the same rates charged by my railroad, with the added advantage to the truck company that it receives its load directly from the warehouse or factory, and at the terminus delivers the goods into the hands of the store or factory to which they are consigned, and delivers them at exactly the same price. Now, if my company is to be taxed as a transportation agency I think there should be a proportionate tax on these motor trucks.

There was a gentleman here several days ago from the city of Knoxville, Tenn., who made the statement that two short branch lines of railroad have been put out of business by the competition of motor trucks. He also says that there are several lines of motor trucks running regularly to points from 50 to 60 miles out of Knoxville. The retailer in a small town can telephone to a wholesale house in the morning and the truck will pick up the order about noon and deliver it at the door of the retailer the same evening, resulting in a great saving both in time and trouble.

I understand there are firms which make a regular business of transferring goods, especially household goods, between New York and Philadelphia, and it is said that John Wanamaker, who has stores in both cities, has used motor trucks extensively for the transfer of merchandise from one store to the other.

An English firm dealing in fine furniture made a practice of sending its goods from the main store in London to a branch in Paris by auto trucks, which crossed loaded on the channel steamers.

What its practice is to-day is not known, but before the war broke out the British Government, as fast as its contracts with railroads expired, was sending mails to the channel and foreign steamers by auto trucks exclusively.

Mr. President, I ask permission to insert in the RECORD at this point a memorandum bearing on the subject of transportation by motor truck.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Shipments of beer to points within 100 miles, formerly made by freight, required packing at point of shipment and delivery, besides taxes, insurance, etc., and the necessary handling at both points. Motor trucks make all this expense and trouble unnecessary, and the beer is in better condition on arrival.

Owing to the increased shipment of merchandise to New York for Europe, the business men of New England find it very hard to make ordinary shipments to that city. Recently a printing press was delayed a week without hope of delivery soon. Being urgently in need of it, the consignee in New York had it sent by truck from Shelton, Conn. (a distance of 75 miles). Less time was consumed than if it had been handled by freight.

Freight service between St. Paul and Minneapolis requires 48 hours, while the truck service requires 2 hours.

Trucks are especially serviceable in bringing vegetables and perishable goods from farms in the vicinity of large cities. This has been done in England. Deliveries in London are made for distances of 100 miles.

Florists, because of the perishable nature of their goods and their fragility, use trucks in preference to express, sending far into the suburbs. Most of their business is "rush."

A fruit and produce dealer in Riverton, N. J. (100 miles out of New York), states that the motor truck carries products into the New York market much more cheaply than by express and costs only a trifle more than freight. However, when the many handlings incident to carting at both ends are considered, the saving effected by freight shipments fades into nothing.

It takes the Adams Express Co. from 12 to 14 hours to make delivery from Philadelphia to New York, Jersey City, or Brooklyn docks. Trucks guaranteed to make it in eight hours. Charge of express company, per 100 pounds, 90 cents; trucks, 75 cents. Saving in time and cost, with delivery right where you want it, and proper care in unloading.

During the embargo on railroad cars the Bent White motor wagons made a great many trips between Boston and New York carrying shoes for export for a prominent New England firm. Only in this way was the firm able to make its shipments on time. Many companies have taken advantage of this service in getting goods speedily to New York for shipment to Europe, an important consideration at this time, when there is much business of this kind.

The improved roads throughout the Union are making motor transportation increasingly popular. The radius of motor-truck daily delivery is now well over 30 miles, and every mile of improved road the railroads help lay adds to its length and efficiency. In England, where goods roads have encouraged motor truckage, the railroads have met the competition by going into the motor-truck business themselves.

Mr. RANSDELL. These statements are taken from the Power Wagon and other publications for 1916.

Mr. President, in the Saturday afternoon Times of this city there is a very interesting description of how the Goodyear Co., of Akron, Ohio, sends its products from the city of Akron to Boston, making a round trip of 1,540 miles. I am sure that is a great surprise to all the Senators here present. It was a very interesting surprise to me to know that freight is now actually being carried over 700 miles by motor truck from the city of Akron to the city of Boston.

I ask permission to have inserted in the RECORD this article from the Washington Times of June 23, 1917.

The VICE PRESIDENT. Without objection it is so ordered.

The matter referred to is as follows:

HAULS AUTO TIRES VIA TRUCK ROUTE—GOODYEAR CO. STARTS TRADE INNOVATION—TRIP COVERS 1,540 MILES—SUPPLIES CARRIED BETWEEN AKRON AND BOSTON.

The Goodyear Co. has inaugurated a new era in the transportation world through the establishment of a line operating between its factory at Akron, Ohio, and Boston, Mass., hauling tires to its eastern branches and returning laden with cotton fabric from the Goodyear mills at Goodyear, Conn., a trip of 1,540 miles.

Three round trips have already been made, the last of which was accomplished in seven and one-half days.

FIVE-TON PACKARD USED.

The truck used on these pioneer trips is a 5-ton Packard of standard motor and chassis, fitted with a special body. Behind the driver's seat is a special sleeping compartment, the width of the truck cab, containing a bunk used by the two truck drivers in relays. It might be supposed that sleeping on a motor truck would be somewhat difficult, but the cushioning qualities of the 38 by 7 front and 44 by 10 rear pneumatic cord tires with which the wheels are fitted renders the sleeping quarters quite comfortable.

The load-carrying portion of the truck is of stake body, covered with a large tarpaulin bearing a large sign reading "Akron-Foston Express." A 44 by 10 tire carried on the end gate serves both as a spare and an exhibition tire.

CARRY ADDITIONAL RUBBER.

The tires used are of the same construction as other Goodyear cord tires, except that they carry a larger number of plies of cords and much additional rubber. They carry a 5-ton load with no more damage to the road than that caused by an ordinary touring car. The tire is sufficiently large to cushion the load, absorbing all shocks and distributing the weight over a greatly increased section of it.

With the use of these big tires, allowing transportation of heavy loads without damage to the road surface, the opposition to the operation of truck transportation lines, which has been aroused by the pounding and pulverizing action of many solid-tired heavy-duty trucks on the foundations of the roads, will be withdrawn, for it is not the heaviness of the load that breaks up the road surface, but the jolting and pounding and intense vibration caused by lack of proper cushioning.

Mr. RANSDELL. I suspect that some of my hearers are saying: "Well, what has that got to do with the food situation?" Senators, it has a great deal to do with it. In the vicinity of every big city of this country there is an immense amount of freight now being carried by auto trucks. All milk, fruit, and vegetable dealers, people engaged in many kinds of business, are delivering their goods to the cities by auto trucks a distance of 75 to 100 miles, in the aggregate relieving the railroads of an enormous quantity of the freight they would otherwise be compelled to carry. Bear in mind that this bill provides for the movement of food and fuel as well as their production.

I hope this phase of the matter is going to receive more consideration than has been given to it yet. I hope that next fall we are not going to be confronted with the awful car shortage which confronted us in the fall of 1906 and the early spring of 1907. I remember well that at that time wheat rotted in large quantities on the plains of the Dakotas, that cotton was badly damaged at many places in the South, that people in the West were suffering so from lack of coal that they were compelled to burn their fences and barns.

Senators, we are going to be confronted with the same situation this fall if we do not take time by the forelock and provide against it. I call your special attention to my amendment in this respect. It is imperative that we should use all our transportation agencies by road, rail, and river. If all three of them are developed to the fullest possible degree within the next four months, and used to their utmost capacity, we can expect at least reasonable distribution of food, feed, and fuel throughout the Union, but if not, I fear great suffering will result.

In conclusion, Mr. President, let me impress upon Senators the supreme importance of this measure. I honestly believe that its passage is fraught with great weal to America, and our brave companions in arms in Europe. Should it fail of passage, I am equally sure that much woe to us and our warring friends abroad will follow. It is an extreme measure, but the times demand it, and, thank Heaven, there is a man in the White House who can safely be intrusted with its extreme powers.

Mr. THOMAS. Mr. President, I desire to address the Senate on the pending measure, but I do not wish to begin the discussion at this late hour. Therefore, unless some Senator desires to occupy the floor at this time, I suggest that we take either a recess or an adjournment.

EXECUTIVE SESSION.

Mr. SWANSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 50 minutes p. m., Monday, June 25, 1917) the Senate adjourned until to-morrow, Tuesday, June 26, 1917, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 25 (legislative day of June 22), 1917.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

The following named to be assistant paymasters in the Navy from the 20th day of June, 1917:

Carlton R. Eagle (a pay clerk in the Navy),
Charles J. Harter (a pay clerk in the Navy),
Wilson S. Hullfish (a pay clerk in the Navy),
Sidney P. Vaughn (a chief pay clerk in the Navy),
Hugh F. Gallagher (a pay clerk in the Navy),
Robert O'Hagan (a pay clerk in the Navy),
George C. Tasker (a pay clerk in the Navy),
Charles C. Timmons (a pay clerk in the Navy),
Albert B. Dayton (a pay clerk in the Navy),
Michael J. Stubbs (a pay clerk in the Navy),
Alfred B. Clark (a chief yeoman in the Navy),
Henry Guilmette (a chief pay clerk in the Navy),
Robert L. Mabon (a yeoman, second class, in the Navy),
Walter H. Bicknell (a pay clerk in the Navy),
Bert R. Peoples (a pay clerk in the Navy),
Percey C. Corning (a pay clerk in the Navy),

Taylor P. Calhoun (a yeoman, first class, in the Navy),
Ernest M. Cronin (a pay clerk in the Navy),
Leslie R. Corbin (a pay clerk in the Navy),
Willard C. Brown (a citizen of New York),
Donald C. Johns (a citizen of Illinois),
James C. Bequette (a citizen of California),
James Anderson (a citizen of South Carolina),
Kenneth C. Root (a citizen of Wisconsin),
Benjamin H. Micou (a citizen of Michigan),
George M. Wise (a citizen of Wisconsin),
William T. Hopkins (a citizen of Wisconsin),
Roark Montgomery (a citizen of Texas),
Henry Kuhrmeyer (a citizen of Minnesota),
Albert W. Rutter (a citizen of Vermont),
Elliott Ranney (a citizen of Kansas),
Louis H. Huebner (a citizen of Texas),
William C. Wallace (a citizen of South Carolina),
Gilbert L. Cleland (a citizen of Kansas),
William C. Preston (a citizen of Missouri),
Casper T. Frederickson (a citizen of Minnesota),
Hermann C. Miller (a citizen of Ohio),
Rusell L. Richard (a citizen of Missouri),
Paul McC. Browder (a citizen of Washington),
Edward B. Erickson (a citizen of Illinois),
William E. Davis (a citizen of Ohio),
Thomas A. Durham (a citizen of Washington),
William A. Best (a citizen of Vermont),
Frank C. Dunham (a citizen of Vermont),
Iva B. Talton (a citizen of Maryland),
John E. O'Brien (a citizen of New York),
George E. Dryden (a citizen of Maryland),
John W. Sprague (a citizen of Vermont),
George M. Snead (a citizen of Virginia),
George W. Clement (a citizen of South Carolina),
Franklin T. Skinner (a citizen of Minnesota),
Laurence H. McKay (a citizen of Virginia),
Gaillard Rembert (a citizen of South Carolina),
James R. Frawley (a citizen of Wisconsin),
George S. Baldwin (a citizen of Ohio),
Albert T. Sands (a citizen of Wisconsin),
Carlton J. Saunders (a citizen of Virginia),
Arthur B. Poole (a citizen of Minnesota),
Wallace Prior (a citizen of South Carolina),
Arthur Bjornstad (a citizen of Minnesota),
Roy M. Anderson (a citizen of Vermont),
Edwin F. Barker (a citizen of Illinois),
Harry M. Mason (a citizen of Virginia),
James D. Boyle (a citizen of Minnesota),
Raymond V. Adams (a citizen of Kansas),
Walter A. Buck (a citizen of Kansas),
Clifford C. Edwards (a citizen of New York),
Maury W. Boykin (a citizen of Virginia),
Walter Mandry (a citizen of Missouri),
Thomas E. Hipp (a citizen of South Carolina),
Ray C. Sanders (a citizen of Vermont), and
Arthur Rembert (a citizen of Virginia).

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 25 (legislative day of June 22), 1917.

RECEIVER OF PUBLIC MONEYS.

George W. Bruce to be receiver of public moneys at Montrose, Colo.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

The following named to be assistant paymasters in the Navy:
Carlton R. Eagle.
Charles J. Harter.
Wilson S. Hullfish.
Sidney P. Vaughn.
Hugh F. Gallagher.
Robert O'Hagan.
George C. Tasker.
Charles C. Timmons.
Albert B. Dayton.
Michael J. Stubbs.
Alfred B. Clark.
Henry Guilmette.
Robert L. Mabon.
Walter H. Bicknell.
Bert R. Peoples.
Percy C. Corning.
Taylor P. Calhoun.
Ernest M. Cronin.
Leslie R. Corbin.
Willard C. Brown.
Donald C. Johns.
James C. Bequette.
James Anderson.
Kenneth C. Root.
Benjamin H. Micou.
George M. Wiles.
William T. Hopkins.
Roark Montgomery.
Henry Kuhrmeyer.
Albert W. Rutter.
Elliott Ranney.
Louis H. Huebner.
William C. Wallace.
Gilbert L. Cleland.
William C. Preston.
Casper T. Frederickson.
Hermann C. Miller.
Rusell L. Richard.
Paul McC. Browder.
Edward B. Erickson.
William E. Davis.
Thomas A. Durham.
William A. Best.
Frank C. Dunham.
Iva B. Talton.
John E. O'Brien.
George E. Dryden.
John W. Sprague.
George M. Snead.
George W. Clement.
Franklin T. Skinner.
Laurence H. McKay.
Gaillard Rembert.
James R. Frawley.
George S. Baldwin.
Albert T. Sands.
Carlton J. Saunders.
Arthur B. Poole.
Wallace Prior.
Arthur Bjornstad.
Roy M. Anderson.
Edwin F. Barker.
Harry M. Mason.
James D. Boyle.
Raymond V. Adams.
Walter A. Buck.
Clifford C. Edwards.
Maury W. Boykin.
Walter Mandry.
Thomas E. Hipp.
Ray C. Sanders.
Arthur Rembert.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 25, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in Heaven, imbue us plenteously with heavenly grace that we may be prepared to meet all the great and complicated problems incident to the unprecedented conditions of life wisely, calmly, conscientiously, striving day by day to live to the high-water mark of our religious convictions, leaving the results to a wise and beneficent Providence which has never yet failed us; for Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of Saturday was read and approved.

CORRECTION.

Mr. HAMLIN. Mr. Speaker, I desire to correct the RECORD.

On page 4519 the Chair, in a ruling on the point of order, on Saturday last, against an amendment offered by the gentleman from Oregon [Mr. SINNOTT], the Chair is made to say—

> The Chair thinks also that if he had tried to hold it in order, even if not out of order on account of not being germane, it was in order under the provisions of the bill to give the President the right to encourage production.

It should read, "it was not in order under the provisions of the bill to give the President the right to encourage production," and so forth.

I beg the indulgence of the House for two minutes. In the ruling made by the Chair Saturday on the first Webb amendment, as it appears in the RECORD it does not express what the Chair really said. In making that statement I do not want even to seem to offer any criticism of the Official Reporters of this House, because a more efficient, able, or competent set of men I never knew. I take all the blame myself. Members will recollect that it was a strenuous session with much confusion, and the Chair was busy and did not have time to go through the notes. But, in order that it may appear properly in the permanent RECORD, I ask unanimous consent for a reprint in the RECORD of the ruling made by the Chair on that occasion.

The SPEAKER. Without objection, the corrections will be made.

There was no objection.

The ruling of Mr. HAMLIN, as Chairman of the Committee of the Whole, on the Webb amendment is as follows:

"The CHAIRMAN. The Chair is ready to rule.

"The Chair does not fail to appreciate the importance of this matter, and desires publicly to thank the gentleman from North Carolina [Mr. WEBB] for calling his attention, on yesterday, to the fact that he was going to introduce an amendment somewhat similar to the amendment which he has now introduced; and the Chair took advantage of that notice, and looked up the question, and desires to ask the committee to bear with him a moment, because he has reduced to writing some of the views which he desired to submit on this proposition.

"Experience as old as civilization itself has taught the lessen that in order for an aggregation of individuals to reach a common conclusion on any proposition some system of orderly procedure must be followed, and that that system must have the elements of permanency—not one to be varied from—and administered in a way to suit the whims of those charged with its administration.

"Parliamentary law, somewhat like the common law, is largely the result of the experiences and wisdom of men who have lived and wrought so nobly in the past that we might, by reason of their experiences, accomplish even more than they, for the welfare of ourselves and the generations that will follow us.

"From time to time there have been added, as experience showed the necessity, certain written rules which are to govern us in the transaction of our business; and, weak indeed, ah! even contemptible, is the man whose duty it is to administer these rules who will permit his personal opinion of the merits of a particular proposition to influence his decision upon a proposition of parliamentary law. Now, having said that much, let us see what we have before us at this time; what is the proposition upon which the Chair is now called upon to rule?

"The gentleman from North Carolina [Mr. WEBB] offers the following amendment to section 13 of the bill:

"Amendment offered by Mr. WEBB: Insert at the end of section 13 the following:

"'That the President is authorized if, in his opinion, it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government for use or redistillation such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies, or in so far as such use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcohol or distilled spirits for the purposes herein enumerated. Upon the failure of the person to comply with the President's requirement the President is authorized to requisition and take possession of the alcohol and distilled spirits required to be turned over, and to pay for same a just compensation, to be determined by the President. And if the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President, and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such spirits or alcohol, in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code.'

"To this amendment the gentleman from South Carolina [Mr. LEVER] interposes a point of order on the grounds that the amendment is not germane, in that it proposes to introduce into the bill a subject different from those now in the section to which the amendment is offered, and that it proposes to impose upon the President authority and duties to do certain things of a character different from those things provided for in the section. If the contention of the gentleman from South Carolina is correct, then, of course, the point of order must be sustained on authority of section 7 of Rule XVI of the Manual of Parliamentary Law and the Rules and Practice of the House of Representatives, which, of course, are binding upon the Chair.

"The Chair does not hesitate to say that he is entirely in sympathy with the purpose of the amendment, and if his only guide to a decision of this point of order could be his feelings as to the desirability of the things to be accomplished by the amendment, he would find it easy to overrule the point of order. But the Chair realizes that in passing upon this point of order he must be governed by his conception of his duty under the rules of the House and a due and respectful deference to the precedents set by men much abler than himself who have passed upon similar propositions. For the Chair to do otherwise he would stultify and despise himself. Therefore the Chair shall decide this matter as he believes he should, under the rules of the House, and shall invite the judgment of the committee on the correctness of his ruling.

"At the very beginning let this well-settled rule of procedure be fully understood: A committee reporting a bill may embrace in it as many different subjects as it may choose, but after the bill has been reported to the House no different subject can be introduced into it by amendment, whether as a substitute or otherwise. This general proposition conforms not only to a long line of precedents made by eminent Speakers, but Chairmen as well, and conforms strictly to the provisions of section 7 of Rule XVI, which is binding in this committee until repealed.

"Section 7 of Rule XVI reads as follows:

"No motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

"Now, this amendment is offered to section 13 of the bill. If the amendment seeks to introduce into the bill a subject different to that or those provided for in section 13, then it must go out on a point of order. If not, the point of order must be overruled.

"Let us see what the amendment provides for:

"That the President is authorized, if in his opinion it is necessary to conserve necessaries, to require any person having control of alcohol and distilled spirits to turn over to the Government for use or redistillation such proportion of said alcohol or spirits as the President may deem necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies, or in so far as the use or redistillation would dispense with the necessity of utilizing products and materials suitable for food and feeds in the future manufacture of alcoholic or distilled spirits for the purposes herein enumerated.

"And so forth.

"It then provides that upon the failure of any person to comply with this provision the President may take charge of and requisition all alcohol and distilled spirits and require them to be turned over to him and to pay for them, but no authority is given to carry out that provision.

"Now, let us see what section 13 is, to which this amendment is offered. The Chair asked the gentleman from North Carolina [Mr. WEBB] when he offered the amendment whether he offered it to section 13 or as a new section to the bill. He said he offered it to section 13. Now, section 13 provides—

"That whenever the President shall find that limitation, regulation, or prohibition of the use of foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages, or such nonalcoholic beverages as he shall determine, or that reduction of the alcoholic content of any beverage is essential in order to assure an adequate and continuous supply of food, he is authorized, from time to time, to prescribe and give public notice of the extent of the limitation, regulation, prohibition, or reduction so necessitated.

"Now, the question is, What authority does section 13 give the President? It is very clear to the Chair that he is only authorized to 'limit,' 'reduce,' 'regulate,' or 'prohibit' the use of food or food materials to be used in the manufacture of alcohol or alcoholic or nonalcoholic beverages. This is unquestionably the extent of his authority under that section.

"Whether the Committee on Agriculture were wise in so limiting his authority is not a question for the Chair to pass upon or even take into consideration. It is a well-settled proposition of parliamentary procedure that a committee may incorporate such subjects in a bill which they report as they may choose and no new subject may be introduced by way of an amendment in the face of a point of order.

"The Chair will quote briefly from an opinion rendered by Speaker Carlisle, covering this subject:

"The rules do not prohibit a committee reporting a bill from embracing in it as many different subjects as it may choose; but after the bill has been reported to the House no different subject can be introduced into it by amendment, whether as a substitute or otherwise. * * *

"This is the test of admissibility prescribed by the express language of the rule; and if the Chair, upon examination of the rule under consideration and the proposed amendment, shall be of opinion that they do not relate to the same subject, he is bound to sustain the objection and exclude the amendment, subject, of course, to the revisory power of the Committee of the Whole on appeal.

"Bearing in mind the limitation of the President's authority under section 13, let us compare the authority which he would have under that section, provided it was added to by the adoption of the amendment of the gentleman from North Carolina. If the amendment shall be held in order and adopted by the committee, section 13 would then not only authorize the President to 'limit,' 'regulate,' 'reduce,' or 'prohibit' the use of food

and food materials in the manufacture of alcohol or alcoholic beverages in the future, but would also authorize him to take possession, by purchase or otherwise, of all the alcoholic or distilled liquors already manufactured and now in bond, and also to provide for the redistillation of such manufactured liquors, and so forth, clearly introducing into that section subjects not covered in any way or even hinted at by the original proposition in section 13. Of course, we must bear in mind the well-settled parliamentary rule that has been adhered to, at least since the Forty-fifth Congress, to wit, that an amendment must be germane to the particular paragraph or section to which it is offered.

"The Chair is not now passing upon the question of whether the amendment offered by the gentleman from North Carolina would not be germane to the bill if offered as a separate section. But having been offered as an amendment to section 13, it must stand or fall on the proposition as to whether it is germane to that particular section.

"The Chair is very clearly of the opinion that it introduces an entirely new subject or subjects into that section and is therefore not germane. Consequently the Chair sustains the point of order."

THE SUSAN B. ANTHONY AMENDMENT.

Mr. DUPRÉ. Mr. Speaker, I ask unanimous consent to print in the RECORD some resolutions of the Louisiana League for Woman Suffrage, passed on the 18th day of June, 1917.

Mr. WALSH. I object.

Mr. DUPRÉ. Will the gentleman withhold his objection?

Mr. WALSH. I will.

Mr. DUPRÉ. I would not make such a request ordinarily, for I have refrained from asking to print such resolutions in the RECORD, but these resolutions mention me by name and request that I have these resolutions read into the RECORD of the House. As a matter of courtesy to these ladies and to myself, I ask that it be done.

Mr. WALSH. Mr. Speaker, I withdraw the objection.

MODIFICATIONS OF DESIGNS OF THE CURRENT QUARTER DOLLAR.

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 3548) to modify the designs of the current quarter dollar.

The SPEAKER. The gentleman from Ohio asks unanimous consent for the present consideration of the bill H. R. 3548.

Mr. SMALL. How long will the bill take?

The SPEAKER. If it takes more than 15 minutes, the gentleman says he will withdraw it.

Mr. GILLETT. Mr. Speaker, I can not see that this is war legislation, and I object.

Mr. ASHBROOK. Will the gentleman withhold his objection?

Mr. GILLETT. I know what the bill is.

EXPLANATION OF A VOTE.

Mr. ESCH. Mr. Speaker, on page 4522 of the RECORD, in the vote on the food-control bill, the gentleman from Georgia [Mr. ADAMSON] is recorded as not voting. When he got leave of absence he arranged a general pair with me. Just before the vote I went to the pair clerk and asked to arrange for a special pair but could not do so. I then asked for a general pair and arranged such a pair. I therefore voted, but the RECORD does not show that the gentleman from Georgia was paired. If he had been present the gentleman from Georgia would have voted "aye."

Mr. ADAMSON. Mr. Speaker, it is true, as stated by the gentleman from Wisconsin, that I requested him to vote on every question and get a pair for me, but he could not get a pair as they all voted in the affirmative.

The SPEAKER. The trouble was that there were so few against the bill that it was difficult to get a pair.

Mr. GILLETT. Mr. Speaker, I withdraw the objection that I made to the request of the gentleman from Ohio [Mr. ASHBROOK].

CHANGE OF REFERENCE.

Mr. MILLER of Minnesota. Mr. Speaker, on the bill H. R. 5035, referred to the Committee on Appropriations, I ask that it be referred to the Committee on Military Affairs, where it properly belongs. The bill amends that portion of the law which was brought out by the Committee on Military Affairs, authorizing a person who is a cadet at West Point to resign and thereafter make application to get into the Army. That is the only change it makes. It has nothing to do with appropriations.

The SPEAKER. The gentleman from Minnesota asks unanimous consent that the bill H. R. 5035 be taken from the Committee on Appropriations and referred to the Committee on Military Affairs.

Mr. MILLER of Minnesota. I supposed that it had been referred to the Committee on Military Affairs until my attention was called to it.

The SPEAKER. Is there objection?

There was no objection.

MODIFICATIONS OF THE DESIGN OF THE CURRENT QUARTER DOLLAR.

Mr. ASHBROOK. Now, Mr. Speaker, I renew my request that the bill H. R. 3548, providing for modification of the design of the current quarter dollar be considered.

The SPEAKER. Is there objection?

Mr. LARSEN. Mr. Speaker, I object.

Mr. ASHBROOK. Will the gentleman withhold his objection for a moment?

Mr. LARSEN. I will, but I understood there was an agreement.

Mr. ASHBROOK. I will withhold the request until the gentleman from Georgia has a chance to ask to extend his remarks in the RECORD.

EXTENSION OF REMARKS.

Mr. LARSEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an editorial on the cotton situation.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. WALSH. I object.

MODIFICATIONS OF DESIGN OF THE CURRENT QUARTER DOLLAR.

Mr. ASHBROOK. Mr. Speaker, I again renew my request for the present consideration of the bill H. R. 3548, the gentleman from Massachusetts having withdrawn his objections.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That for the purpose of increasing the artistic merit of the current quarter dollar, the Secretary of the Treasury be, and he is hereby, authorized to make slight modifications in the details of the designs in accordance with sketches submitted by the sculptor whose models were accepted under date of May 23, 1916, and now being used in the execution of the coins.

No changes shall be made in the emblems or devices used. The modifications shall consist of the changing of the position of the eagle, the rearrangement of the stars and lettering, and a slight concavity given to the surface. Such changes shall be made and completed on or before July 1, 1918.

The SPEAKER. Is there objection?

Mr. FITZGERALD. Mr. Speaker, reserving the right to object, will the gentleman give us an explanation of the bill?

Mr. ASHBROOK. Mr. Speaker, this bill provides for a slight modification in the design of the current silver quarter. After a small quantity of the quarters had been coined, it was found that the coin did not stack well, and it was not, in the opinion of the Secretary of the Treasury, an artistic design, and for that reason the coinage has been suspended. The Secretary of the Treasury and the Treasury Department have been very urgent for some time to get this bill passed for the reason that the coinage of the silver quarters has been suspended. The bill has already passed the Senate and is now on the Speaker's table.

Mr. FITZGERALD. Who passes finally upon the artistic merit of these designs?

Mr. ASHBROOK. I suppose the Secretary of the Treasury does. I have a letter here from the Secretary of the Treasury, and if the gentleman will permit me I will be very glad to read just one paragraph from the letter.

Mr. FITZGERALD. I would be very glad to have the gentleman read it all.

Mr. ASHBROOK. Very well; I will read it all:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, April 16, 1917.

Hon. WILLIAM A. ASHBROOK,
Chairman Committee on Coinage, Weights, and Measures,
House of Representatives.

MY DEAR CONGRESSMAN: I have the honor to submit for your consideration a draft of an act to authorize the modification of the designs of the current quarter dollar in accordance with a specimen submitted by Mr. Hermon A. MacNeil, the sculptor whose designs were accepted May 23, 1916, for the quarter dollar now being issued.

The modifications proposed are slight, the principal one being that the eagle has been raised and three of the stars placed beneath the eagle. On the reverse the lettering has been rearranged and the collision with the pinions of the wings obviated. These changes, together with a slight concavity, will produce a coin materially improved in artistic merit, and not interfere in any way with its practical use.

I am sorry to have to ask for this change, but since the original dies were made the artist has found that they were not true to the original design and that a great improvement can be made in the artistic value and appearance of the coin by making the slight changes the act contemplates. I take the liberty of proposing a form of bill which will accomplish the object if enacted by the Congress, and heartily recommend its passage.

Sincerely, yours, W. G. MCADOO, *Secretary.*

Mr. LENROOT. Mr. Speaker, will the gentleman yield?
Mr. ASHBROOK. Yes.
Mr. LENROOT. The gentleman states that the coinage of quarters under the old dies has been suspended?
Mr. ASHBROOK. I do.
Mr. LENROOT. By law?
Mr. ASHBROOK. By law. After the new design was accepted the coinage of the old design was suspended, of course.
Mr. LENROOT. By act of Congress?
Mr. ASHBROOK. Yes.
Mr. LENROOT. I want to ask what the last sentence in the bill means—

Such changes shall be made and completed on or before July 1, 1918.

That is a year from now?
Mr. ASHBROOK. That is the way the bill reads, and I introduced the bill as it was prepared by the Secretary of the Treasury.
Mr. LENROOT. If they are to have a year in which to make these changes, how can there be any emergency in connection with it?
Mr. ASHBROOK. I can say to the gentleman that there certainly is an emergency, that for the past four or five weeks I have had frequent calls from the Director of the Mint and many telephone calls urging me to get this bill through, if possible, saying that the coinage had been suspended, that there are now less than 3,000 in the mint and they do not want to coin any more under the new design which has been accepted and is the law. The new dies have been made, I believe, and are awaiting the passage of this bill by the House. The bill has already been passed by the Senate.
Mr. LENROOT. Does not the gentleman think that the bill should be amended so as to require these changes to be made immediately?
Mr. ASHBROOK. I have no doubt that the changes will be made at once, because they are very anxious to resume the coinage.
Mr. LENROOT. What was the purpose of the committee of giving them a year in which to make the changes, if it was an emergency proposition?
Mr. ASHBROOK. As I have stated to the gentleman, the only reason the bill is reported in this form is because it is the form in which it was received from the Secretary of the Treasury and the same bill as passed the Senate.
Mr. LENROOT. How can the gentleman claim that the Secretary of the Treasury considers it an emergency proposition if he asks for a year in which to make the changes?
Mr. ASHBROOK. I regret that I am unable to give the gentleman the reason why the date was fixed for 1918. I do assure the gentleman, however, that I have had frequent assurances from the Treasury Department that this is a very urgent matter.
Mr. LENROOT. If consent is given, would the gentleman object to an amendment making it September 1, 1917, so that it would be an emergency proposition?
Mr. ASHBROOK. I would not.
Mr. LENROOT. With that understanding I shall not object.
The SPEAKER. Is there objection?
Mr. HILLIARD. Mr. Speaker, reserving the right to object, I simply wish to observe that since we have passed the food law, and there is a prospect that it will pass in the Senate, the emergency becomes apparent, because it is evident that now something may be bought for a quarter. [Laughter.]
Mr. ASHBROOK. Mr. Speaker, I desire to suggest to the gentleman from Wisconsin that the bill reads, "on or before July 1, 1918," but I have no objection to fixing the date 1917.
Mr. LENROOT. If it is to be an emergency proposition the House ought to make it so.
Mr. ASHBROOK. I have no objection.
Mr. BORLAND. Has the bill already passed the Senate?
Mr. ASHBROOK. It has.
Mr. BORLAND. In its present form?
Mr. ASHBROOK. Yes.
Mr. BORLAND. And it provides that these changes may be made on or before 1918?
Mr. ASHBROOK. Yes.
Mr. BORLAND. So that they can be made immediately?
Mr. ASHBROOK. Yes.
Mr. BORLAND. If it is amended in the House, it will have to go back to the Senate.
Mr. ASHBROOK. It will mean that much delay.
Mr. BORLAND. There is no necessity of amending it under the circumstances, I think.
Mr. ASHBROOK. I do not think there is.
The SPEAKER. Is there objection?
There was not objection.
The SPEAKER. This bill is on the Union Calendar.
Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.
The SPEAKER. Is there objection?
There was no objection.
Mr. LENROOT. Mr. Speaker, I move to amend, on page 2, in lines 2 and 3, by striking out "July 1, 1918," and insert in lieu thereof the words "September 1, 1917."
The SPEAKER. The Clerk will report the amendment.
The Clerk read as follows:

Page 2, lines 2 and 3, strike out the words "July 1, 1918," and insert in lieu thereof the words "September 1, 1917."

Mr. ASHBROOK. Mr. Speaker, I accept the amendment.
Mr. STAFFORD. Mr. Speaker, will the gentleman yield?
Mr. LENROOT. Yes.
Mr. STAFFORD. Has the gentleman any assurance that the present dies used in the coinage of quarters will be needed between now and September 1, 1917? That may not be sufficient time in which to prepare these new dies. Has not the gentleman taken upon himself considerable responsibility in insisting on this amendment which might destroy the very purpose of the bill?
Mr. LENROOT. The gentleman states the present dies can not be used.
Mr. STAFFORD. The present dies can not be used for the manufacture of the old——
Mr. LENROOT. No; the gentleman says——
Mr. ASHBROOK. I will say the present dies, and by that I mean the dies that were made for the new design, are unsatisfactory, and for that reason the coinage of the silver quarters has been suspended.
Mr. STAFFORD. The gentleman does not mean the old——
Mr. LENROOT. Then I certainly gave unanimous consent under a misapprehension. If they can go on and coin quarters under the old dies, it is certainly not an emergency measure at all.
Mr. STAFFORD. There is no question about that.
Mr. ASHBROOK. Of course the coins can be made, but they are unsatisfactory to the Treasury Department, and they do not want to coin any more of them. They could coin them, however unsatisfactory they may be, but they have held up the coinage some two months in order to get this bill through Congress.
Mr. LENROOT. I wish to say there are probably 50 bills which have just as much privilege as this bill, with the statement the gentleman now makes. There is nothing in the way of an emergency about this bill.
Mr. ROSE. As already suggested by the chairman of the committee, the bill provides that such changes shall be made and completed on or before July 1, 1918. That would meet the objection raised by the gentleman in any event, because the coinage can be made any time between now and July 1, 1918; but when the department first notified the chairman that there is an emergency the committee took it for granted that what the department said was the actual case, and therefore it has brought in this report.
Mr. LENROOT. Mr. Speaker, I gave consent under a misapprehension. I should have objected had I known the real situation, and if there is any emergency and consent having been given, I will withdraw my amendment if they can go on and coin the present quarters.
The SPEAKER. The gentleman withdraws his amendment.
The bill was ordered to be engrossed and read the third time, was read the third time, and passed.
On motion of Mr. ASHBROOK, a motion to reconsider the vote by which the bill was passed was laid on the table.
Mr. ASHBROOK. Mr. Speaker, one moment. I ask unanimous consent to substitute Senate bill 2099, which is an identical bill which passed the Senate and is on the Speaker's table for H. R. 3548.
The SPEAKER. The gentleman will have to ask unanimous consent to vacate the proceedings, if he wants to do that, on this bill.
Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent to vacate proceedings under which H. R. 3548 was passed.
The SPEAKER. The gentleman asks unanimous consent to vacate proceedings on H. R. 3548.
Mr. NORTON. Mr. Speaker, reserving the right to object, will the gentleman answer an inquiry? The gentleman objected to the amendment offered by the gentleman from Wisconsin to this bill. Now, as we are about to put aside the proceedings in reference to the passage of the House bill, I would like to know what is the emergency occasion for this legislation?
Mr. ASHBROOK. The gentleman understands that the old design for the old silver quarter has been abolished——

Mr. GILLETT. Mr. Speaker, I object to any further proceedings on this bill.

The SPEAKER. The gentleman from Massachusetts [Mr. GILLETT] objects to any further proceedings about this bill.

CORRECTION.

Mr. SLOAN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. SLOAN. On page 4522 of the RECORD I am recorded as voting for the bill and also as being paired with my colleague, Mr. STEPHENS of Nebraska. We had a general pair, and I received word from Mr. STEPHENS he was in favor of the bill and asked me to pair him with somebody else if I desired to vote for the bill. I did vote for the bill and thought that an arrangement for the pair had been accomplished, but it does not seem to have been completed. If Mr. STEPHENS had been present, he would have voted for the bill.

AMENDING NATIONAL-DEFENSE ACT.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 4897, a bill authorizing promotion of officers of the Medical Corps to the rank of captain.

The SPEAKER. Is there objection?

Mr. SMALL. Mr. Speaker, reserving the right to object, may I inquire of the gentleman how long this will take?

Mr. DENT. I will say to the gentleman from North Carolina it ought not to take three minutes to pass this bill, and if there is any controversy arising over the bill I will withdraw the request.

Mr. GILLETT. Mr. Speaker, reserving the right to object, Is this a unanimous report of the committee?

Mr. DENT. It is a unanimous report of the committee.

Mr. MILLER of Minnesota. Can not we have the bill read? Is it short?

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 4897) to amend section 10 of the national-defense act approved June 3, 1916, and for other purposes.

Be it enacted, etc., That section 10 of the act for making further and more effectual provision for the national defense, and for other purposes, approved June 3, 1916, is hereby amended by adding the following proviso:

"*Provided*, That during the existing emergency lieutenants in the Medical Corps of the Regular Army and of the National Guard shall be eligible to promotion as captain upon such examination as may be prescribed by the Secretary of War."

The SPEAKER. Is there objection?

Mr. MILLER of Minnesota. Mr. Speaker, reserving the right to object, may I ask the gentleman from Alabama, I understand this does not affect any of the medical officers of the Reserve Corps?

Mr. DENT. No; the object of the bill is simply to dispense with the provision requiring a man to serve five years before he can be promoted to captain. It does not affect the Reserve Corps.

Mr. MILLER of Minnesota. And absolutely an emergency measure?

Mr. DENT. I think so.

Mr. MILLER of Minnesota. A further inquiry. Is it not a fact that the Medical Department of the Army is very greatly in need of additional medical officers?

Mr. DENT. That is very true; and when the bill was originally introduced it only provided for the promotion of officers of the National Guard called into the Federal service, and the Surgeon General has asked me to amend the bill so as to apply to the Regular Army as well as on account of the necessity for officers.

The SPEAKER. Is there objection?

Mr. FOSTER. Reserving the right to object, do I understand from the gentleman from Alabama [Mr. DENT] that the medical men who are taken into the Reserve Corps and who now go in as lieutenants can not under this present law be promoted unless they serve five years?

Mr. DENT. That is true.

Mr. FOSTER. And will this take care of that situation?

Mr. DENT. It will take care of any of them that are put on the active list.

Mr. FOSTER. That are on the active list?

Mr. DENT. Yes.

Mr. HOWARD. Will the gentleman yield? As I understand the situation now, in the Officers' Medical Reserve Corps the highest commission one can get is a captaincy?

Mr. DENT. First lieutenancy.

Mr. HOWARD. There are thousands of good men that want to go into the service, but they can not make the sacrifice on account of the small grade in their service.

Mr. DENT. That is true.

Mr. RAGSDALE. Has any action yet been taken on relieving the present unfairness that I think the members of the National Guard are being forced to stand in the difference in salaries that are being paid them and other members of the training camps at this time?

Mr. DENT. Does the gentleman mean to say that where an enlisted man is given an opportunity to become an officer he does not get his $100 a month like the civilian?

Mr. RAGSDALE. Yes, sir.

Mr. DENT. I will say to the gentleman that no action has been taken by the committee, but that matter will be considered by the committee this week.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. DENT, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. HELVERING, for one week, on account of important business.

To Mr. BUCHANAN, for one week, on account of important business.

LEAVE TO ADDRESS THE HOUSE.

Mr. GILLETT. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Massachusetts rise?

Mr. GILLETT. I ask unanimous consent that after the completion of the river and harbor bill the gentleman from Connecticut [Mr. TILSON] be authorized to address the House for one hour on the question of aeronautics.

The SPEAKER. The gentleman from Massachusetts [Mr. GILLETT] asks unanimous consent that at the conclusion of the river and harbor bill the gentleman from Connecticut [Mr. TILSON] be permitted to address the House for not to exceed one hour, on the subject of aeronautics.

HOUR OF MEETING TO-MORROW—11 O'CLOCK A. M.

Mr. KITCHIN. Mr. Speaker, reserving the right to object, will the gentleman just withhold that for a minute until I get unanimous consent? I ask unanimous consent, Mr. Speaker, that when the House adjourn to-day it adjourn to meet at 11 o'clock a. m. to-morrow?

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection? [After a pause.] The Chair hears none.

LEAVE TO ADDRESS THE HOUSE.

Mr. STAFFORD. Reserving the right to object to the request of the gentleman from Massachusetts [Mr. GILLETT], I would like to inquire whether any arrangement is contemplated whereby on the completion of the river and harbor bill and passage of the other important bills on the calendar there will be any recess taken so as to accommodate Members while the Senate is considering the food-control bill and the revenue bill?

Mr. KITCHIN. I would like to say to the gentleman that after we pass the river and harbor bill, and the trading with the enemy bill, and the Interstate Commerce Commission bills, and one or two little bills relative to preferential shipment, and the public-health pension bill that are on the calendar—I think the last one was reported out this morning—all of which ought to get through by Wednesday night if we do not unnecessarily delay legislation, and if we do get those bills through, after we finish them, my intention is to ask the House under a gentleman's agreement to adjourn over three days at a time until the Senate returns the food-control bill or the revenue bill. [Applause.]

Mr. STAFFORD. And that no legislation will be considered in that interim?

Mr. KITCHIN. Not at all; not even by unanimous consent to be considered then.

Mr. FITZGERALD. That will include a possible deficiency bill?

Mr. KITCHIN. If any emergency legislation should be contemplated or become necessary, we would give two or three days' notice to all the absent Members. I do not anticipate the food bill returning to the House within two weeks, and the revenue bill, I would say, within three weeks, or four weeks possibly. They have had it now five weeks, and the Finance Committee has not decided what it is going to do.

Mr. FOSTER. It decides in the morning and changes in the evening.

Mr. KITCHIN. It has decided to change a great many times. I would say that, after we have passed these bills that I have mentioned, it would be safe for the Members to go for at least two weeks. In the meantime we would be adjourning every third day.

Mr. SABATH. When does the gentleman think that we could get through with the bills he has mentioned?

Mr. KITCHIN. By Wednesday night or Thursday night.

Mr. ADAMSON. I did not hear the statement of the gentleman from North Carolina. Did he specify the four bills that I have given him on that paper, namely, the bill relating to the increase of the Interstate Commerce Commission, trading-with-the-enemy bill, and then the preferential shipment bill, and the pension bill for the surgeons of the Public Health Service?

Mr. KITCHIN. That included the four bills.

Mr. LENROOT. Has the gentleman in mind the food-control bill, that will probably get to conference?

Mr. KITCHIN. Yes. Let us dispose of these bills and see what they will do with that.

Mr. DENT. Mr. Speaker, I wish to state as a suggestion to the gentleman from North Carolina [Mr. KITCHIN] that I did not have an opportunity to confer with him before he made his statement. There are a number of amendments proposed by the Secretary of War to the national defense act that the Military Committee will consider this week and may be ready to report at any time within the next 10 days.

Mr. KITCHIN. Well, I would say that if he reported within the next 10 days you would have ample time to get it through the House while the committee of conference is considering the food-control bill, and certainly while the committee of conference is considering the revenue bill you would have plenty of time. I would say it would be some two or three weeks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. MAPES. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from North Carolina when it is proposed to take up the bill for aviation purposes?

Mr. KITCHIN. Some time within August 15, and by that time we will have gotten over these three-day adjournments.

Mr. MAPES. It is not proposed to take that up before you take the adjournment?

Mr. KITCHIN. Before adjournment, of course, but not before these three-day adjournments, because the committees will have to consider them. We will have plenty of time. It will not take the House more than half a day to pass the aviation bill. It will carry about $600,000,000. It would not take as long to pass a bill carrying $600,000,000 as it would if we were to pass a bill carrying $6,000,000. Then it might take, say, two weeks. [Laughter.]

Mr. HAMILTON of Michigan. At what time will the consideration of the river and harbor bill be finished?

Mr. KITCHIN. I think to-morrow, so that we can go right on with the other bills.

Mr. RAKER. Reserving the right to object, Mr. Speaker, there are a couple of measures—emergency bills—on the calendar providing for those who have enlisted and who have desert-land claims, and others. Of course those would not be excluded in the gentleman's statement this morning?

Mr. KITCHIN. We would not take those up during those three-day adjournments.

Mr. RAKER. When will we have a chance?

Mr. KITCHIN. After that. We will have at least three weeks here.

Mr. RAKER. Those are war emergencies.

Mr. FOSTER. They are designed to relieve men who have gone into the Army and Navy from going through certain requirements as to homesteading and mining. I think those ought not to be excluded from those bills that ought to pass before we begin the three-day recesses.

Mr. TILSON. What are they?

Mr. FOSTER. They are bills to relieve soldiers who enlist in the Army and Navy from service on their homestead claims. Otherwise they must live on those homesteads, and also they must do $100 worth of work on a mining claim.

Mr. RAKER. The same as those who have an assessment on their desert-land entries.

Mr. FOSTER. I think those ought to pass by unanimous consent.

Mr. KITCHIN. I think all those measures can be passed by unanimous consent, say, on Thursday morning or Wednesday night.

Mr. FOSTER. I do not think they should be excluded.

Mr. KITCHIN. We are not excluding them.

Mr. FERRIS. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. Yes.

Mr. FERRIS. Mr. Speaker, as the gentleman from Illinois [Mr. FOSTER] has said, and as the gentleman from California [Mr. RAKER] has said, there are two or three bills of minor importance that have always been passed during a time of war. One is to allow men to absent themselves and not be contested while serving in the war. I am sure they would appeal to the House. I think we should have an hour or two by unanimous consent, and I think they will be passed without any controversy. I was not going to sit still when the subject was taken up. I think if you do that, we will get them out of the way very promptly.

Mr. KITCHIN. Suppose we take them up after we rise this afternoon on the river and harbor bill?

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. GILLETT]?

Mr. RAKER. Reserving the right to object, Mr. Speaker, let us have an understanding on this. It will take but a moment.

Mr. MADDEN. Regular order, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. GILLETT]?

Mr. STAFFORD. What is the request?

The SPEAKER. The request is that at the end of the consideration of the river and harbor bill the gentleman from Connecticut [Mr. TILSON] be permitted to address the House for not more than an hour on the subject of aeronautics.

Mr. STAFFORD. No matter what the time of day the river and harbor bill is completed?

The SPEAKER. At the end of the consideration of the river and harbor bill. Is there objection?

There was no objection.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill. And, Mr. Speaker, pending going into Committee of the Whole, did the House resolve to convene at 11 o'clock to-morrow?

The SPEAKER. Yes. The question is on agreeing to the motion of the gentleman from North Carolina.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The CHAIRMAN. The Clerk will proceed with the reading of the bill for amendment.

The Clerk read as follows:

Removing the water hyacinth, Florida: For the removal of the water hyacinth from the navigable waters in the State of Florida, in so far as it is or may become an obstruction to navigation, $10,000.

Mr. TREADWAY. Mr. Chairman, one of my friends on the committee, when we were having general debate on the river and harbor bill some days ago, criticized my comments on appropriations for the removal of water hyacinths. I do not intend to take up the time of the committee in discussing that well-worn subject of the water hyacinth or the small amount of appropriation carried for it. I do wish, however, to emphasize the fact that in spite of the small amount carried we do make various appropriations for such an object as this without any reference whatever as to where that money is to be expended. We carry another item for the St. Johns River. I recognize the importance of commerce on the St. Johns River over a certain length from Jacksonville toward Palatka, and if the hyacinths, because of lack of commerce, grow there, all well and good, let us make an adequate appropriation for their removal. Why stop at $10,000 when you are doing such a valuable service for the commerce of the State of Florida? Let us do as was done to that well-known Congaree River last week. Let us add $50,000 or $100,000 if it is so important that water hyacinths should be removed as a means of commerce rather than making the water unnavigable and letting the water hyacinth grow, as has been frequently suggested on this floor. Let us be liberal, as we are trying to be with so many other propositions before us for river and harbor work, based on the national defense. This bill is based on national defense. Why be niggardly and mean and only ask Uncle Sam to come forward

with the very meager sum of $10,000 for such a meritorious proposition, and one so valuable for national defense as the removal of water hyacinths from other streams than the St. Johns in the State of Florida? I do not suppose that any of this $10,000 will be used on the St. Johns, because there is a specific item for the St. Johns, and if there are other streams as deserving of the removal of the water hyacinth, as we admit the St. Johns to be, will not our action here to-day in asking only the niggardly sum of $10,000 for that great cause for national defense be severely criticized?

Mr. HUMPHREYS. Will the gentleman yield?

Mr. TREADWAY. I was ready to yield the floor, but I will yield to the gentleman.

Mr. HUMPHREYS. For the purpose of trying to get some information about this.

Mr. TREADWAY. I think the gentleman has more information about this than I have, but I will try to give him some if I can.

Mr. HUMPHREYS. Was this appropriation of $10,000 recommended by the Chief of Engineers and the Secretary of War?

Mr. TREADWAY. In the cause of national defense. In spite of the fact that we can not get an item of that nature incorporated into the bill, we realize that all this bill is a national-defense measure. We, of course, recognize that every item is very worthy and deserving from the standpoint of national defense, and so, of course, the Secretary of War must have recommended this small appropriation of $10,000.

Mr. HUMPHREYS. The gentleman is a member of this committee. With the preliminary illumination we have just had, will he now answer my question?

Mr. TREADWAY. Will the gentleman from Mississippi kindly repeat his question in order that I may have it clearly before me?

Mr. HUMPHREYS. Did the Secretary of War or the Chief of Engineers recommend this appropriation of $10,000?

Mr TREADWAY. Both these distinguished gentlemen recommend the entire bill for national defense. That being the case, this specific item must necessarily be included in their recommendation.

Mr. HUMPHREYS. In view of that fact, I will ask the gentleman, Does he know whether or not the Secretary of War or the Chief of Engineers recommended this particular item?

Mr. TREADWAY. Only in the most general terms. The Committee on Rivers and Harbors has a letter from the Secretary of War, and Col. Newcomer appeared before the committee and carried out the purport of that letter. I will say to the gentleman from Mississippi that the whole bill is based on the one thought that we are in war, and whatever appropriations we make must have a direct bearing on national defense. I think that is as nearly an answer to the question as I can make.

Mr. DUPRÉ. Mr. Chairman, I wish to be heard in opposition to the gentleman's amendment.

This item for the removal of the water hyacinth is nothing but an item for maintenance, like many other items for maintenance that are contained in the bill. Streams are obstructed in various ways, by silting up, by shoaling up, by the caving of the banks, by falling trees and the like, and streams in south Florida and in Louisiana, Alabama, Mississippi, and Texas are obstructed very seriously by the growth of this water hyacinth. The object of this appropriation here for Florida, like the subsequent appropriation for the other States, is merely to maintain the streams and keep them open and free them from obstructions, just as you would free them from obstructions caused by silting or by the formation of shoals.

Every time this item comes up it is the subject of a great deal of merriment and a great deal of jest. I confess that the jests are very poor. They remind me of stories in Joe Miller's Joke Book. The jokes are old, as Kipling says, "old as my unpaid bills," and I wish that we could have something new, because they are getting very wearisome.

Mr. TREADWAY. Will the gentleman yield?

Mr. DUPRÉ. Yes.

Mr. TREADWAY. I suggest to the gentleman that in order to have any new jokes about it, gentlemen ought to get a new line of appropriations.

Mr. DUPRÉ. It might be possible for the gentleman from Massachusetts and others like him to get a new line of information on this subject that would preclude jests of that sort. Information can be easily obtained. For instance, I call attention to the RECORD of January 16, 1915, where my good friend, that distinguished statesman now out of a job, Mr. Callaway, of Texas, was performing on this subject. The water hyacinth was one of his favorite themes. After he had entertained the House on the subject for a while he took his seat, and the gentleman from Illinois [Mr. MANN] then arose and addressed the House as follows:

Mr. MANN. Mr. Chairman, the gentleman from Texas [Mr. Callaway] makes some eloquent observations in regard to appropriations concerning water hyacinth. I have often noticed that men frequently make the most eloquent observations about those things concerning which they know the least—

I do not know whether that will have any effect on the gentleman from Massachusetts or not. [Laughter.]

Recently I was at Panama on the canal. I noticed on Lake Gatun, which is quite a body of water, and in the streams running into the lake also, vast fields of water lettuce and a few water hyacinth. The water lettuce, like the hyacinth, is a water plant, which propagates rapidly. It has quite a short root, and vessels can go through it without difficulty. The water hyacinth, which also propagates very rapidly, has a very long root, and the people at the canal, after full investigation of the subject, still, possibly, not knowing as much about it as does the distinguished gentleman from Texas, wherever a water hyacinth makes its appearance on any of those waters proceed at once to put it out of business, because they know, if the gentleman from Texas does not know, that if the channel of the canal becomes filled with water hyacinth the most powerful boat will become so entangled in it with its propeller that it will not be able to proceed. Of course, such observations or information will have no effect on the distinguished gentleman from Texas, who fights the hardest when he knows the least.

So do some of the present Members of this body.

Mr. HUMPHREYS. I should like to get some information on this question. It is evident that I went to the wrong source when I applied to the member of the committee from Massachusetts [Mr. TREADWAY], who has taken up five minutes in criticizing an item about which he frankly confesses he knows nothing. I should like to ask the chairman of the committee, Mr. SMALL, if this has been recommended by the Chief of Engineers and the Secretary of War.

Mr. SMALL. It has been recommended by both.

Mr. TREADWAY. May I ask——

Mr. HUMPHREYS. If the gentleman from Massachusetts will answer my question first, before he propounds his inquiry, if water hyacinth obstructs navigation in the harbors of the rivers of this country, does the gentleman think it ought to be removed?

Mr. TREADWAY. I am free to say, in answer to the gentleman from Mississippi, that if the water hyacinth is causing obstruction to navigation, detrimental to the national defense, the matter of appropriation of $10,000 is beyond my comprehension. We ought to be so liberal that the national defense would not suffer from such a small appropriation as that.

Mr. HUMPHREYS. The gentleman says that he believes that if it is necessary in order to remove obstructions from navigable waters in the United States the appropriation ought to be made, even though it be for the removal of water hyacinth. He said in answer to the other question that he does not know anything about it. I had the honor to serve for a number of years on this distinguished committee, and we had numerous hearings on water hyacinth. No man who knows anything about it at all doubts that water hyacinth is a very serious obstruction to navigation. I repeat that nobody who knows anything about it doubts that. Appropriations were made in the good old days when Senator Burton was chairman of the committee, and there was no pork in it then. Appropriations were made for the removal of water hyacinth in these streams, and not being advised that the political complexion of the Congress had changed, and that the Democrats had got into control instead of the Republicans, the water hyacinth continued to grow and propagate and to interfere with navigation.

Now, the distinguished gentleman from Massachusetts rises on the floor and advises us that here is something he knows nothing about, and therefore the necessity that the appropriation should be increased from two thousand up to fifty or seventy-five thousand dollars.

Mr. SWITZER. Will the gentleman yield?

Mr. HUMPHREYS. Yes.

Mr. SWITZER. If the Chief of Engineers says that $10,000 is a sufficient amount, is there any necessity of increasing it?

Mr. HUMPHREYS. There is no necessity for it if we intend to enlighten the House in order that the House may proceed intelligently. If our effort is to muddy the waters; if our effort is to resort to such arguments as may persuade the will without convincing the judgment, then, of course, it is all right to deliver such an illuminating address as we heard a few minutes ago from the gentleman from Massachusetts.

Mr. SMALL. Will the gentleman permit an interruption?

Mr. HUMPHREYS. Yes.

Mr. SMALL. I might remind the gentleman that it appears from the annual report of the Chief of Engineers that there is considerable local cooperation in all these streams for the removal of water hyacinth.

Mr. HUMPHREYS. I thought it desirable to call the attention of the House at the beginning of another week to the char-

acter of the criticism made against the bill. It is not designated here what stream it was to be spent upon. This is a lump sum. That is the criticism. I wonder if the gentleman from Massachusetts himself has not it in his mind now to cut out all the items in the bill and provide a lump sum to be turned over to the Secretary of War and Chief of Engineers to spend on all the streams.

Mr. TREADWAY. I take that in the nature of an inquiry.

Mr. HUMPHREYS. Yes.

Mr. TREADWAY. I will say that I stand where I did when the bill was under discussion some days ago, and when I offered in behalf of the minority of the committee an amendment asking that we directly state in the bill that this is a war measure. We then said, speaking for myself, and I think I voice the sentiment of my colleagues—we will be perfectly willing, as we are to-day, with that amendment, which the distinguished chairman of the committee argued against. Put that in to-day and no further opposition is to be heard to the passage of the bill, so far as I am concerned. It has always been my idea that a lump-sum appropriation is a mistake, and in answer to the gentleman I will say I have no intention of asking the House to adopt any such provision.

Mr. HUMPHREYS. Has not the gentleman in previous Congresses voted for the motion to recommit?

Mr. TREADWAY. I have. It was better than the bill we had before us; but it is not a proper way to make river and harbor appropriations.

Mr. HUMPHREYS. It is not, and I always voted against it. The House has always voted against that over the argument and over the vote of the distinguished gentleman from Massachusetts heretofore. I know that he says he has seen a new light and will not vote for a lump sum this time. I am glad to hear that, and I hope that when the roll call comes he will adhere to that proposition.

Mr. TREADWAY. Will the gentleman allow me to interrupt him further?

Mr. HUMPHREYS. Yes.

Mr. TREADWAY. Is it not a fact that the majority in this House have voted for a lump-sum bill, showing that it was acceptable to the Democrats?

Mr. HUMPHREYS. The House has always voted it down. The House has been forced sometimes to submit to a lump-sum appropriation by the Senate and the report from the conference committee. The House has been forced to submit to that, but it has never been the judgment of the House, although the gentleman from Massachusetts himself has on several occasions, as I understand, voted for that very proposition to apply to all the items and all the projects in the country. Now he criticizes this one particular item about which he finally states to the House that he knows nothing. That is the character of the criticism that is urged against the bill. By whom? By a member of the committee charged with the responsibility to acquire knowledge and full information and whose duty it is to come here and inform us.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last two words.

Mr. SMALL. Will the gentleman from Pennsylvania allow me two minutes?

Mr. STAFFORD. Is this a filibuster indulged in by the friends of the bill?

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph close in five minutes.

Mr. MEEKER. I would like one minute.

Mr. SMALL. I will make it six minutes.

The CHAIRMAN (Mr. FLOOD). The gentleman from South Carolina asks unanimous consent that all debate on this paragraph shall close in six minutes. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, the gentleman from Massachusetts raises a very small question on an important bill, a very unreasonable one from my point of view. It might be just as fair to complain of an appropriation for the removal of sea grass that clogs the wheels of the propellers in Massachusetts, as to object to an appropriation for the removal of water hyacinths in such States as need it.

Mr. SMALL. Or a drift in New York Harbor.

Mr. MOORE of Pennsylvania. Oh, yes; they might as well object to appropriations for that purpose. I myself have asked to have consideration given to appropriations for the removal of sea grass in a stream in Maine. It was said that boats could not go up and down in consequence of it. The grass clogged the wheels.

Mr. TREADWAY. Is there not some difference between asking for appropriations and getting them? Have those appropriations ever been passed?

Mr. MOORE of Pennsylvania. There have been such appropriations. The gentleman from Massachusetts [Mr. TREADWAY] seems to be begging the question. He objects to a $26,000,000 war emergency bill because there is a $10,000 appropriation in it for the removal of water hyacinths, and he indicates that this is the only appropriation of the kind, and that it is so trifling that it ought to be raised.

Mr. TREADWAY. Oh!

Mr. MOORE of Pennsylvania. Oh, that is what the gentleman said. The gentleman said there ought to be more money spent upon it.

Mr. TREADWAY. Oh, the gentleman will not say that. I never said this was the only item in the bill that I would criticize from the standpoint of national defense.

Mr. MOORE of Pennsylvania. I am referring to the water-hyacinths item.

Mr. TREADWAY. If the gentleman says in connection with water hyacinths, all well and good, because there are only two in the bill; but I take it that the gentleman intimated that I favored all the rest of the bill.

Mr. MOORE of Pennsylvania. No; I say the gentleman finds fault with this important bill and would hold it up and possibly defeat it, because it contains a $10,000 item for the removal of water hyacinths.

Mr. TREADWAY. The gentleman does not want to state it right. Go ahead.

Mr. MOORE of Pennsylvania. The gentleman appeared not to know very much about water hyacinths, because the information he gave the House was not very accurate as compared with the report of the United States Army Engineers and the testimony before his own committee. I assume the gentleman was present when the War Department was represented before the committee and the statement was made as to why the department wanted to remove water hyacinths. There are two appropriations in this bill for the removal of water hyacinths—one for $10,000, which the gentleman from Massachusetts thinks ought to be increased, if it is to be of any service for war purposes, and another for $20,000 for the removal of water hyacinths in Alabama, Mississippi, Louisiana, and Texas.

Mr. DUPRÉ. Mr. Chairman, if the gentleman will permit, I will call his attention to a report which I know he has read, but which others may not have, a very interesting report on the subject, being Document 91, Fifty-fifth Congress, third session.

Mr. MOORE of Pennsylvania. I commend that to the gentleman from Massachusetts and all others who, like him, whether on the River and Harbor Committee or not, are seeking information upon this important question. It seems to me that the minority members of the Committee on Rivers and Harbors ought to go to the document that contains that information.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MEEKER. Mr. Chairman, I only desire to say a word. A general request was made on the floor that we save time in the consideration of this bill. I think we are all agreed to that, but if the gentlemen who have been opposing this bill are going to insist on repeating the kind of stuff that they have this morning, we will be here until next week in nailing down that kind of matter. This bill is not going to go through without these gentlemen being "called" on every such statement as that which comes from the gentleman from Massachusetts [Mr. TREADWAY] or anything like it. Here is a report as to what has been done about water hyacinths in the past: In 1899, $36,000 was appropriated; in 1902, $25,000; in 1904, $25,000; in 1905, $25,000; in 1907, $15,000; in 1910, $5,000; in 1911, $10,000; in 1914, $5,000; in 1915, $5,000; in 1916, $10,000. It seems to me that plain common sense ought to be enough to satisfy the Members of this House that the appropriations for this particular item have gone up and down just as the Army Engineers have seen the demand or the necessity for it. If there is any time to be saved upon this bill, it can be saved by gentlemen in desisting from making such speeches as have already been made by the gentleman from Massachusetts, but they can not get away with that kind of stuff without opposition.

The Clerk read as follows:

Carrabelle Bar and Harbor, Apalachicola, St. Joseph, and St. Andrews Bay, Apalachicola and Chipola Rivers, and channel from Apalachicola River to St. Andrews Bay, Fla., Flint River, Ga., and Chattahoochee River, Georgia and Alabama: For maintenance, $77,500; continuing improvement of Apalachicola River, including the cut-off, Lee Slough, lower Chipola River, and upper Chipola River from Marianna to its mouth, $18,000; in all, $95,500.

Mr. SEARS. Mr. Chairman, when the bill was last under consideration I offered an amendment seeking an appropriation for Key West, and it was agreed at that time that we would take up that amendment this morning.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. SEARS: Page 12, line 21, after the word "obtained," insert:

"For improvement of Key West Harbor by removing all middle ground and other improvements, $50,000."

Strike out "$156,000," in line 21, and insert "$216,000."

Mr. SEARS. Mr. Chairman, I offer an amendment to the amendment, that the final figures be "$316,000," and that the appropriation be "$150,000."

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Amend the amendment as follows: Strike out "$50,000," and insert in lieu thereof "$150,000"; strike out "$216,000," and insert in lieu thereof "$316,000."

Mr. SEARS. Mr. Chairman, when I offered this amendment I asked unanimous consent that it be passed until after the passage of the food-control bill, in order that the Members of the House might thoroughly study the proposition, and if they thought Key West was entitled to the appropriation to vote for it. There has been at no time any desire on my part to secure any appropriation which is not a worthy one, and I have repeatedly made that statement on the floor of this House. When the last river and harbor bill which was passed was before the House for consideration I secured a survey of Key West Harbor. That was in 1916, and the last time the House considered a river and harbor bill I offered nothing for Key West, because the report had not been made, and I did not care to come before the House arguing a proposition until the engineers had passed on it. In the meantime it might be advisable to state to the Members of the House that the Senate passed an appropriation in the sum of $50,000 for Key West, but the conferees of the House had it stricken from the bill because no report had been made of the survey. We are discussing what is supposed to be, and what in this instance I know to be, a war measure. That the House may not misunderstand, I believe any appropriation which is worthy should be made and that all internal improvements should not stop simply because our country unfortunately is at war. I voted for the $7,000,000,000 bond issue. I indorsed the loans that have been made to our allies, for I believe it would be better to spend our money that way, if by so doing we can save our Nation and our young men, but I, for one, am not willing to go back to my constituents and confess that we can loan $250,000,000 to $300,000,000 to other nations and spend billions of dollars for war material, and that we are so puerile in our legislation that all internal improvements must stop, our country must suffer, and our citizens be thrown out of employment. If to support a proposition like a river and harbor bill shall designate me as a pork-barrel follower, then I am willing to take that name, because I understand in Germany and in France more improvements in the way of rivers and harbors have been made in one year since the war began than in any three years prior to the war, and we might well follow their example. [Applause.] But, Mr. Chairman, on February 6, 1917, when the naval bill was before the House, in seeking to have Key West designated as a base for submarines and submarine destroyers, this House kindly consented to listen to me for a few moments, and at that time I stated from a military standpoint, from a naval standpoint, there was no place in the country more entitled to assistance than was Key West, Fla.

I do not care to go over those few remarks; but if any of you gentlemen care to read them, you will find them on page 2720 of the CONGRESSIONAL RECORD. At that time I had inserted in the RECORD an excerpt from a letter from Hon. Josephus Daniels, Secretary of the Navy, in which he stated:

The Navy Department fully appreciates the importance of Key West as an offensive and defensive base, and all the department's plans include Key West.

At that time I inserted a letter from the Secretary of War, Mr. Baker, in which he stated in part——

The CHAIRMAN. The time of the gentleman has expired.

Mr. SEARS. May I have five minutes more?

The CHAIRMAN. The gentleman from Florida asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SEARS (reading)—

It is understood, however, that Key West has certain well-recognized advantages from the standpoint of naval operations, but any official estimate of its value for naval purposes involves a consideration of naval policy and should emanate from the Navy.

Now, Mr. Chairman, in addition to that I have a letter from the Mallory Steamship Co., in which they state that they have constructed a boat 440 feet long, and that it would be impossible for this boat to land at the Key West port or harbor unless this improvement is made. They also state it would be necessary for them to withdraw some of their larger boats now going to Key West unless the harbor was widened. I have not time to go into that letter in extenso. It is hard to discuss a proposition intelligently to the Members of this House in five or ten minutes, and I therefore trust the House will be exceedingly lenient with me. I have not taken up your time, and I sincerely trust I am not imposing myself on you. May I briefly state, if you do not already know it, that Key West is located on an island at the southern end of the Florida coast about 516 statute miles from Jacksonville, Fla. My district runs from Jacksonville to Key West, approximately 565 miles the way we have to go. To show you the importance of Key West, I will briefly state that the value of the tonnage out of Key West for the year 1915 was $27,338,000, of which amount we find as follows: Sponges, over $1,000,000; packing-house products, over $2,000,000; general merchandise, over $3,000,000; eggs, over $1,000,000, and so forth. I mention these because so much has been said about lumber and logs.

About a year ago, and that is the last information I have, I understand there were over 300 freight cars tied up at Key West waiting to be unloaded on ships and carried from Key West, and this condition was brought about because it was impossible for larger boats to reach Key West. Since I made the speech of last year the Flagler System has placed another ferryboat running from Key West to Habana, and on their boats the Florida East Coast passenger trains and freight trains are carried. The passenger trains coming from New York direct with Pullmans are loaded on the boat and are carried across to Habana, the cars are again placed on the tracks and the passengers continue their journey through Cuba without ever leaving the cars. I contend if this appropriation is made it will relieve this congested condition of 300 or 400 or 500 cars waiting to be unloaded practically all the time. Now, let me explain why I offered an amendment to my amendment making it $150,000 instead of $50,000.

At the time I offered my amendment I had not secured from the War Department a report of the survey which was authorized last year. Therefore I was laboring somewhat in the dark inasmuch as I did not know what that report would be. I stated to the House last Saturday a week ago I would prefer to wait and get that report in order that you might have it before you before you voted. That report, in part, is as follows:

After due consideration of the above-mentioned reports, I concur in the views of the district officer, the division engineer, and the Board of Engineers for Rivers and Harbors, and therefore report that the improvement by the United States of Key West Harbor, Fla., with a view to removing the middle ground is deemed advisable to the extent of widening the channel opposite the wharves to a width of 800 feet and a depth of 26 feet at mean low water at an estimated cost of $232,700. The first appropriation should provide $150,000 and authority to enter into contract for the full amount of the estimate if satisfactory bids are received, or to purchase, construct, or hire a suitable dredging plant, and do the work therewith, if it is found that an advantageous contract can not be made; the balance of the estimate to be appropriated as needed.

That is signed by Gen. Black, in charge of river and harbor improvements. Now, the trouble with Key West is, as you will perhaps understand——

The CHAIRMAN. The time of the gentleman has expired.

Mr. SEARS. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Florida asks unanimous consent for five minutes more. Is there objection?

Mr. STAFFORD. Reserving the right to object, I would like to know before further extension is granted whether the gentleman will be able to complete in five minutes?

Mr. SEARS. I think I can.

Mr. STAFFORD. It is the desire of the House to hurry this bill. If every Member is going to take 15 minutes that proposes an amendment, the gentleman will understand we can not get this bill through.

Mr. SEARS. I will quit in five minutes, even if I do not finish all I want to say. Nobody is more anxious than I am to secure promptly the passage of this bill.

Mr. STAFFORD. I have no objection, then.

Mr. SEARS. At Key West is what is known as the middle ground, and this middle ground only has a depth of 13 to 16 feet. Between Key West and this middle ground the distance is only about 500 feet, making it impossible for the large steamers to turn around, or if they head in and do not turn they have to back out several miles, and if they try to turn they get on the mud banks and are tied up indefinitely. I would like to go into the report somewhat at length, Mr. Chairman, but I believe, having given this a week's study, and especially showing my desire to be frank, I do not think it is necessary. I do not desire to weary the Members of the House. An appropriation of $150,000 should not be discussed very long. An appropriation of $26,000,000 should, perhaps, take two or three weeks, as we are giving to the present bill. But an appropriation of

$7,000,000 should be passed, perhaps, in half a day. That is in no spirit of criticism, but it is usually the case.

I understand a good many Members vote for a proposition or against a proposition because the committee either favors it or is opposed to it, but I want to appeal to the Members of this House to give to Key West, with over $27,000,000 of commerce, this appropriation, and thereby relieve transportation, and which, as stated by the Secretary of War and the Secretary of the Navy, from a naval standpoint is a very, very important one, and one to which they are entitled. It was impossible for me to get the indorsement of the Committee on Rivers and Harbors, but there is a reason for not getting same. I will simply state, as I said before, until this report was made by Gen. Black it was impossible for me to go before the committee and intelligently argue the proposition. Not a single dollar has been appropriated for Key West since 1913, although they have been working faithfully and earnestly trying to secure some recognition. I believe the Members of this House will appreciate this condition, and Key West being 560 miles, as stated, from Jacksonville, the Florida Straits being here [indicating], and the Yucatan Channel here [indicating], if this naval base is finally adopted—and it was stated to me by one of the admirals high in authority that it was now being contemplated—it is certainly important, and besides it will materially assist the Navy Department in doing this work.

I do not care to take up more of your time, because it is hard to argue to men when they are anxious to vote on a proposition, but I trust the Members of this House on this appropriation will vote as I have always voted, and as I believe they will vote, for or against the proposition on its merits or lack of merit regardless of whether it has been officially reported by the committee or not. Of course I will have to abide by your decision.

I thank you. [Applause.]

Mr. SMALL. Mr. Chairman, the committee are opposed to this amendment and hope it will not be adopted. It was not among those projects recommended by the Secretary of War for inclusion in this bill. In fact, when the committee was considering the bill this report had not been submitted by the Secretary of War to Congress.

Mr. SEARS. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. SEARS. If it is true that this item was not in the last bill, and, as stated, the report not having been made, the committee could not consider it—that was one of the reasons why you did not?

Mr. SMALL. That is correct. The report, in fact, came in during this month.

Now, Mr. Chairman, if the committee were to include this item, they would do an injustice to a number of other worthy projects which have been omitted from the bill. I stated more than once that of eighty and odd new projects in the bill which passed the House during the last session, more than 50 have been excluded from this bill, and worthy projects, too. And in what I have to say it is not my purpose to disparage the commercial importance of this project, because that is obvious from the fact that the Chief of Engineers and the Secretary of War have made a favorable report upon it in the regular course of procedure under the law. The point I make is that under the limitation which the committee imposed upon itself in framing this bill, it would be inconsistent, it would be unfair to other projects, and it ought not to be adopted and made a part of this bill. I hope the committee will see it in that light.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Florida to the amendment.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. SEARS. A division, Mr. Chairman.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 26, noes 20.

So the amendment to the amendment was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment as amended.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. SEARS. I ask for a division.

The committee divided; and there were—ayes 22, noes 24.

Mr. SEARS. I ask for tellers, Mr. Chairman.

The CHAIRMAN. The gentleman from Florida asks for tellers. Those in favor of taking the vote by tellers will rise and stand until they are counted. [After counting.] Twelve gentlemen have risen, not a sufficient number, and tellers are refused.

So the amendment as amended was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Holmes and Backwater Rivers, Fla., Choctawhatchee, Escambia, and Conecuh Rivers, Fla., and Ala. the narrows in Santa Rosa Sound, and Pensacola Harbor, Fla.: For maintenance, $9,500.

Mr. SEARS. Mr. Chairman, I move to strike out the last word.

Mr. TREADWAY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts, a member of the committee, is recognized.

Mr. TREADWAY. Mr. Chairman, I do not desire to nor will I get into any personal argument with any colleague, but——

Mr. SMALL. Mr. Chairman, will the gentleman yield for a moment?

Mr. TREADWAY. Certainly.

Mr. SMALL. I ask unanimous consent, Mr. Chairman, that all debate on this paragraph and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph close in five minutes. Is there objection?

Mr. SEARS. Reserving the right to object, Mr. Chairman——

Mr. SMALL. Then I will make it 10 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, it is not my intention nor will I get into a personal controversy with any colleague in this House. I do feel, however, as a member of the Committee on Rivers and Harbors, that I am entitled to make a reference in reply to the gentleman from Missouri [Mr. MEEKER] when he criticized the line of argument I used in connection with the item we were discussing a few moments ago, the water hyacinth.

Mr. MEEKER. Mr. Chairman, will the gentleman yield for just one word?

Mr. TREADWAY. Certainly.

Mr. MEEKER. I will say to my good friend from Massachusetts that if he is satisfied with his argument against it I am.

Mr. TREADWAY. If the gentleman from Missouri is satisfied with his reply to me, well and good. If he is, I do not think that I care to enter into an exchange of criticisms between himself and myself. It is to the language he used in reply to me that I take exception at this time, and it is along that line that I propose to proceed.

Mr. MEEKER. Will the gentleman yield a moment there?

Mr. TREADWAY. Yes.

Mr. MEEKER. All that the gentleman from Missouri wishes to say is that so long as there is to be a consistent opposition to any amendment, we are all from Missouri, and we shall have to be shown as to each item.

Mr. TREADWAY. If the gentleman is as anxious to have the country shown the nature of the bill as are those who are in opposition to it, the gentleman from Missouri would not rise when I was discussing an item in the bill and offer a personal insult. That is exactly what he did. Now, I am not liable to personal anger at all. I know we say foolish things in debate on this floor, but I do wish most emphatically to call the gentleman to account when he refers to any Member of this House and a member of the committee discussing an item in the bill and says "he can not get away with that kind of stuff" and "is going to be called." I as a Member of the House have a right to discuss this bill in such a way, within parliamentary limits, as I see fit. Had it not been for the disgraceful scenes here on Saturday, in which the gentleman from Missouri participated, to his discredit, I should have asked that those words be taken down. I do not pretend, Mr. Chairman, to be equal to the gentleman in oratory, and I know that he will chastise me later on for what I am saying now. If I can help the gentleman in securing a higher rate on the Chautauqua circuit than he has heretofore had by criticizing his kind of language, I am going to do it when he offers the kind of offense to me that he did a few moments ago.

Now, I will say, Mr. Chairman, that this is the only reference that I am going to make to this incident and to the very peculiar kind of words the gentleman has used. I am not sure what kind of a "call" he is going to make, but let him continue to "call." I wish to say now that I shall continue to argue on the bill in such a way as I see fit, under the supervision and direction of the Chair, without asking the consent of the gentleman from Missouri as to the nature of the argument I choose to make.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Certainly.

Mr. MEEKER. I do not know whether or not in Massachusetts the term "call" is ever heard of or known. It is out West. I simply mean, when I say he will be "called" on that, that when he comes in here on a proposition and makes the suggestion that because an item carries $10,000 it ought to be $50,000, in an effort to hold the item up to ridicule——

Mr. TREADWAY. Does the gentleman ask me to yield the floor to him, or what is the nature of the yielding? I have only five minutes in all.

Mr. MEEKER. I want to explain what is meant by the term "call."

Mr. TREADWAY. I shall be glad to have it.

Mr. MEEKER. I do not know whether the gentleman ever was in a game or not. [Laughter.]

Mr. TREADWAY. I am not going to expose my ignorance of the national game, Mr. Chairman, for the benefit of the gentleman from Missouri. [Laughter.]

Mr. MEEKER. I used the word "call" advisedly. As I understand the term, I shall continue to "call" the gentleman who makes those statements to show us the proof. I will do that to the gentleman; and if we would save time on this bill we will only do it by saying in advance to gentlemen who come in here with opposition that so long as they are going to put up opposition we will ask to be shown.

Mr. TREADWAY. I fear my time is about expired.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. TREADWAY. I ask leave to proceed for five minutes more, Mr. Chairman.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. TREADWAY. This is the third Congress in which I have had the honor of serving as a member of the Committee on Rivers and Harbors, and I usually confine myself to the merits of measures; but I shall not submit to the gentleman's suggestion that I shall be "called." He is "bluffing." I mean business. [Applause.]

Mr. SEARS. Mr. Chairman, a few minutes ago I endeavored to present the Key West proposition to the House, believing then, as I believe now, that it is a worthy proposition. I am glad the distinguished gentleman [Mr. TREADWAY], who has just spoken, has preceded me, because I have had time to collect myself and perhaps now I will not say what I would have said if I had had the opportunity to speak at that time.

It is hard to secure anything for my State. I say this with all frankness. It looks like it is impossible for the distinguished gentleman from Wisconsin [Mr. FREAR] to make a speech without referring to my State and the appropriations therefor in a manner not altogether flattering. I have tried to state to this House that I shall always vote for worthy propositions, regardless of whether they are approved by the committee or not, and I ask the same treatment of the other Members of the House. Why they should adopt the amendment to the amendment and then vote down the amendment is beyond my comprehension, except perhaps that a few of them were better informed than other Members who were in the cloakroom and did not hear the argument. I am indeed glad to say a majority of those who were present during the argument and presentation of the Key West proposition voted with me on that proposition. I do not say this with any spirit of egotism. Perhaps I could not have convinced those gentlemen who only came out of the cloakroom to vote, anyway. I have listened patiently and with pleasure day in and day out to what they had to say, though they did not care to listen to me, but preferred to blindly follow the committee.

At the proper time I shall, if given the opportunity, move to recommit this bill, instructing the committee to incorporate therein the Key West item. I trust the Members will then vote for this proposition on its merits, and that they will vote for it because they consider it a worthy proposition, or vote against it because they consider that it is not. It is indeed galling to Members of this House that they must present propositions time after time and have them voted down, and then have the Senate insert those same propositions in the bill and let them come back to this House and become a part of the law in that way. I am glad to know that some enthusiastic river and harbor improvement men who voted against this proposition did so either from some selfish motive or because they believed it unwise to vote for it. I am sure they would not have voted against it if they had not honestly and conscientiously believed that the Key West item was not entitled to the appropriation. They have convinced me by their eloquence of the merits of other propositions that they were advocating, and I willingly voted for those propositions, and shall continue to do so.

As stated, I shall at the proper time, if I get the chance, move to recommit, and I shall do this because of the very small number of Members present when my amendment was voted on. Whether I get few votes or many, I only ask that the Members of the House do me the credit and justice to study the proposition, so that they may vote intelligently upon it. [Applause.]

The CHAIRMAN. The pro forma amendment will be considered as withdrawn, and the Clerk will read.

The Clerk read as follows:

Mobile Harbor and Bar, and channel connecting Mobile Bay and Mississippi Sound, Ala.: For maintenance of channel connecting Mobile Bay and Mississippi Sound, $5,000; for maintenance of Mobile Harbor and Bar and for improvement in accordance with the report submitted in House Document No. 1763, Sixty-fourth Congress, second session, and subject to the conditions set forth in said document, $110,000; in all, $115,000.

Mr. MEEKER. Mr. Chairman, I move to strike out the last word.

Mr. SMALL. Pardon me a moment.

Mr. MEEKER. Certainly.

Mr. SMALL. I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

Mr. TREADWAY. I should like five minutes on the item.

Mr. SMALL. And three minutes for the chairman of the committee. Does the gentleman from Missouri desire as much as five minutes?

Mr. MEEKER. About four minutes.

Mr. SMALL. Can the gentleman from Massachusetts get along with less than five minutes?

Mr. TREADWAY. I will say four minutes also.

Mr. SMALL. And my colleague, the gentleman from Alabama, wishes four minutes.

The CHAIRMAN. The gentleman from North Carolina [Mr. SMALL] asks unanimous consent that all debate on this paragraph and amendments thereto shall close in 12 minutes. Is there objection?

There was no objection.

Mr. MEEKER. Mr. Chairman, I was just leaving the floor when I met my good colleague from Massachusetts [Mr. TREADWAY] and he asked me to remain, saying that he wished to have something to say that he wanted me to hear. I told him that I was on my way to get shaved, but I have remained here to get skinned. [Laughter.] Now, I want to say that if he did not understand the meaning of the word "call" I will put it in this way, so that gentlemen from down East can understand it. When members of the committee come on the floor of the House to discuss an item, and when they are asked by another Member as to what they know about the item, and they say they do not know anything about it, but continue to belittle the item, I will say that instead of "calling" such Members we will hereafter graciously insist that to the fullest extent of their ability gentlemen who attack such items explain to the committee what they do not know about them if they can not explain what they do know.

Mr. DIES. Will the gentleman yield?

Mr. MEEKER. Yes.

Mr. DIES. Is not the man who objects to being "called" usually the man who is not in a position to make a show-down? [Laughter.]

Mr. MEEKER. Oh, yes, as was demonstrated a moment ago by one of the gentlemen. I will leave the gentleman from Texas to guess which one. Now, I do not want to bring down the wrath of the gentleman from Massachusetts [Mr. TREADWAY] upon my head, for we know how the East looks upon the West. We are men of plain, blunt speech out our way, and as we come East we must, of course, always worship with our faces toward the east, and I will revise my remarks by suggesting to the Members of the House that hereafter when a member of a committee who has served for three years or three sessions, and who never bluffs, who never filibusters, and never talks except when he knows what he is talking about, even though he admits in a speech that he does not know anything about it—when such a Member insists that those who are in favor of this bill shall remain quiet, while they be permitted to go on with their attacks on the bill, I will say that they will not be "called," but that, with all courtesy and with all respect to their knowledge of these things, we shall insist, without venturing to encroach too much upon the dignity and knowledge of Members who admit they do not know what they are talking about, that we shall have as much time as they to present the other side of the question. I do not know whether that can be understood by my friend from Massachusetts [Mr. TREADWAY] or not. I believe the gentleman objected to the word "call" and to the word "stuff." I think he took exception to that.

A MEMBER. "Bluff."

Mr. MEEKER. Oh, no; he said I was bluffing and that he was in earnest. We will see which one is bluffing before we get through with this bill. The proof of the pudding is to taste it, and we will wait until this fight is over and see who is bluffing and see who wins. If gentlemen were sure of their ground, I do not think they would take so much time to discuss items that they know nothing about, even though they are on the committee; and, with all due deference to the "effete East," I want to say to my good friend that we call things "stuff" when they are really not what we first thought they were. If the gentleman from Mississippi [Mr. HUMPHREYS] had remained off the floor and had not asked that point-blank question, "What does the gentleman from Massachusetts know about this item," it would have been a different story. But when he asked that "pinted" question—that is a southern phrase; you would say pointed, whittled down to a degree of nicety—when he asked that "pinted" question, "What do you know about that item?" he, the gentleman from Massachusetts, said, "I do not know anything." I thought at that time to call it—well, you might call it "trash" or "stuff" or "bunk" or "piffle," or any such western term which we use—that is what I meant. I might go down East and spend a month and get onto the ways there so that I would say, "Well, I don't mean that"; but what I am trying to get at is that the gentleman in some degree is varying in a slight way from the truth. Out West we have a shorter way of getting at it, and I think it is more virile and more vigorous. [Laughter.]

Mr. TREADWAY. Mr. Chairman, I will not take the time of the House in any further colloquy with the gentleman from Missouri, except to say that he brings a new feature into the river and harbor bill. He says that before we get through he is going to know who is going to win out on the matter of "pudding." I had supposed that previously it had been pork, but pudding will go well for dessert, and I suppose the gentleman wants his slice of both.

Mr. SLOAN. Will the gentleman yield?

Mr. TREADWAY. Yes; certainly.

Mr. SLOAN. Does the gentleman think the objection made by the gentleman from Missouri will lie [laughter] in this case?

Mr. TREADWAY. Well, that word brought on such a heated temperature the other day and such climatic conditions that I prefer not to indulge in any further reference in that direction, in using the word that the gentlemen says they use out West of the Mississippi. We will not have any difference as to the English language or what it means.

But I do want, Mr. Chairman, in all seriousness to ask for information with reference to the Mobile harbor item. I am in favor of that item and I am in favor of all items that have to do with the national defense and preparedness. I wish to call the attention of the chairman to one of these conditions under which this item is to be adopted.

Provided, That no work be done under the new project until local interests have established pilotage dues and port regulations satisfactory to the Secretary of War.

That is from the Chief of Engineer's report, and is one of the conditions under which the Mobile item is inserted in this bill. I am given to understand that port regulations of pilotage dues are made by the local authorities. The pilots in the harbor with which I am familiar are under State supervision and State control and there is a direct relation between the State organization and the pilots. I have had something to do with the pilots. They are a splendid class of men. There are no more vigorous men in the American community than the men who endanger their lives by bringing safely into port the big vessels as they enter the various harbors of the country. I would like to ask why for the first time, so far as I know, this new requirement is brought up having the pilotage dues established by the Secretary of War. Why should they not be left in Mobile, as they have been in every other port, in the hands of the local or State authorities? Is this a fair condition to make in order to secure harbor improvement in Mobile?

Mr. SMALL. I am very glad in the brief time I have to reply to the question of the gentleman from Massachusetts. On the Atlantic seaboard, from Maine to Virginia, the States themselves have abolished all compulsory pilotage on coastwise vessels of every kind. The act of Congress some years ago abolished all compulsory pilotage on coastwise steamers, so that the States have no right to regulate pilotage on coastwise vessels except those not propelled by steam. In the great port of Boston the pilotage is only charged on foreign vessels, not on coastwise vessels or steam vessels. That is true down as far and including Virginia. From North Carolina to Florida the States have, up to this time, abolished coast pilotage on sailing vessels and barges engaged in coastwise traffic.

There are many who believe that there are southern ports where compulsory charges of an excessive kind are imposed on sailing vessels and barges, and this reserves the right to regulate, so that these excessive charges on coastwise vessels and barges will not be imposed.

Mr. MADDEN. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. MADDEN. Do they require pilots?

Mr. SMALL. They require them to take and pay for a pilot whether they need them or not. The Congress has jurisdiction of this matter, but this only assumes jurisdiction as to steamers, not as to vessels and barges.

Mr. MADDEN. Does the gentleman think they ought to be permitted to go in without pilots?

Mr. SMALL. If they need pilots, then the pilotage rates and regulations ought to be reasonable.

Mr. MADDEN. Who will decide whether they need a pilot or not?

Mr. SMALL. That is an open question. The owners of the sailing vessels and barges say that since the channels leading to the harbors have been improved and since the aids to navigation in the way of buoys and lights have been established, and the channels thoroughly charted, sailing vessels and barges do not require a pilot. The pilots hold to the contrary.

Mr. MADDEN. Is it not a serious proposition to allow the captain of a ship to decide whether he needs a pilot or not? In order to save a few dollars he might jeopardize the lives of all the people on the ship.

Mr. SMALL. If it is a steamer, he is already relieved. But the barges and sailing vessels do not carry passengers.

Mr. MADDEN. That ought not to be the case.

Mr. SMALL. That was done in 1871.

Mr. ALEXANDER. Sailing vessels have to be towed in by tugs, and if they have to pay pilot charges it is a great embargo on commerce and a great burden. Years ago Congress decided to abolish compulsory pilotage.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. SMALL. Mr. Chairman, I have taken up four minutes of time unintentionally. My colleague from Alabama [Mr. GRAY] desires to use some time, and I ask unanimous consent that he be permitted to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GRAY of Alabama. Mr. Chairman, I have not consumed a great deal of the time of this House. Since I have been a Member of Congress, I have cooperated with the gentlemen in passing measures which were conceived to be for the good of the country. I will not, however, permit to go unchallenged any effort to minimize the importance of the items under consideration.

I desire now to speak in a general way concerning this measure and specifically in regard to that portion of it which pertains to the great section of the country which I have the honor in part to represent.

Since we have been unwillingly drawn into the European war, and fully realizing that enormous sums of money must, of necessity, be required to organize, equip, and maintain an army, we have consistently voted for and passed those measures making adequate appropriations.

But while at war we must not lose sight of everything else. I have listened patiently, and sometimes with misgivings, since the consideration of this bill began, to Congressmen upon the floor of this House suggesting that we do this very thing. If that advice is heeded and our Government should expend its resources almost entirely upon the war, regardless of other considerations, we will make a grievous mistake. Under no circumstances should we neglect, even in this crisis, those things that pertain to and sustain the very life of the Nation.

Let the war go on; but while it lasts do not let us forget and neglect the social, material, educational, and moral development of the country. Regardless of the war, we must build railroads and dig canals; we must continue to improve and cultivate our farms; we must continue to maintain and improve our rivers and harbors. Let us be for the development of America and her resources first.

As has been suggested, the warring nations of Europe are not to-day neglecting their internal improvements. War with them is not the only concern. England and France continue to build good roads and make the necessary improvements on their rivers and harbors at this very time. And it will be foolish, indeed, if we should be deceived by those who are crying out and inveighing against this bill under the guise and pretense that we should practice economy, and pass those measures only

that affect and promote the things directly pertaining to war. While I do not think this should be the only guide for our conduct in this matter, even if we consider it upon the war basis, the bill should pass.

The War Department considers that it is an emergency bill and ought to pass, and those men who stand here suggesting patriotic loyalty ought to give this measure their support.

As for me, I am willing to support any measure that may in some way aid in bringing the war to a speedy close. [Applause.]

I want to speak for a little while concerning that portion of the bill pertaining to my own section.

Mobile is one of the important harbors of the country, situated, as you know, at the mouth of Mobile River and at the head of Mobile Bay. This river and its tributaries comprise one of the most important systems in this country. I mean by this that the possibilities for development are great, and the natural resources of the territory near and contiguous to these great waterways compare in importance with any of the others, except perhaps the Mississippi and its tributaries. This statement is confirmed when we consider the vast and rich mineral resources in that section of Alabama, with Birmingham and Anniston as the centers of the present development.

Lieut. Col. Charles Keller, an able, conscientious officer of the Government, who was stationed at Mobile for a number of years, in a letter to the Chief of Engineers dated May 21, 1913, expressed himself as follows:

Mobile Bay and the streams emptying into it drain about three-fifths of the State of Alabama and portions of the States of Mississippi and Georgia, comprising in all an area of about 44,700 square miles. The Alabama and Tombigbee Rivers unite to form the Mobile River, and, together with their tributaries, run through some of the richest farming and mining sections in the United States. * * * When these locks are completed, a low-water draft of 6 feet can be carried from Mobile to the coal and iron fields west of Birmingham, a distance above Mobile of 441 miles up the Mulberry Fork of the Black Warrior River and 421 miles up the Locust Fork of this river.

The upper Tombigbee River, which unites with the Black Warrior just above Demopolis, Ala., to form the lower Tombigbee River, is open to steamboat navigation throughout the year up as far as Columbus, Miss., 379 miles above Mobile, except during the period of low water, and is actually navigated by regular packet steamers out of Mobile during the winter and spring seasons. This section of the river is bordered by some of the richest farming land in the United States. It flows through what is known as the "black belt," where it was estimated a few years ago that about one-fifteenth of the cotton produced in the United States is raised.

* * * * * * *

It will be seen from the foregoing that there is a network of streams connecting Mobile Harbor with a large area of country rich in farm and timber products, coal and iron mines—a country that is as yet in the infancy of its development.

The commercial waterways of Alabama, with their outlet into the Gulf of Mexico, if properly developed and maintained, together with the great railroads as competitive carriers, will afford a means for transportation of products highly important both in the present emergency and for the general commercial development of the country.

The Government has wisely spent millions of dollars to construct 17 locks on the Tombigbee and Warrior Rivers, which penetrate into the very heart of the mineral district of the State. Birmingham is within a reasonable switching distance from all-the-year-round river transportation facilities to the Bay of Mobile and the Gulf of Mexico. Steel and iron and coal can be purchased in Birmingham cheaper than at any other place in the United States. This Government is now peculiarly interested in such things and in their transportation.

At this very time the United States Steel Corporation is contemplating, under the direction of President George Gordon Crawford, of the Tennessee Coal, Iron & Railroad Co., spending approximately $11,000,000 for additional plants, and so forth.

In the Birmingham News, of the 9th instant, Judge Elbert H. Gary, chairman of the United States Steel Corporation, is quoted as saying:

The finance committee of the United States Steel Corporation, after full consideration, has decided to recommend to the Tennessee Coal, Iron & Railroad Co. that it proceed promptly and vigorously with the erection of additional works at Fairfield, which are intended to furnish in normal times products for the markets naturally supplied from the Birmingham district and in particular demand at present on account of the necessities of the Government resulting from war conditions.

The plans in detail have not been completed by Mr. Crawford, president, and his associates, but it is estimated the cost of making these improvements will approximate $11,000,000.

This newspaper further states that—

The purchase of options on properties lying between Fairfield and the Warrior River, down the valley, gives rise to the belief that there will be development of the river transportation facilities. It is known that Mr. Crawford has looked upon the water transportation with much favor. He is a member of the harbor commission at Mobile, and in all probabilities there will be some development of the transportation means not only in the immediate district but to the river and thence to the Gulf via Mobile.

The shipbuilding probabilities were announced in New York the first of the week, with the understanding that the plant would be accessible to the steel works at Ensley, but located for the actual assembling at Mobile.

At a hearing in Birmingham, Ala., on February 24, 1917, before the Government Armor Plant Board, Henry De Bardeleben, president of the De Bardeleben Coal Co., made the following interesting statement:

As to the Warrior River, our company's operation is located on the river bank, 10 miles north of the present head of navigation, and we are extremely anxious to demonstrate the practicability of the river. A year ago last summer we began the use of the river. We started in an experimental manner with a small towboat and took 1,000 tons of coal. We soon learned that it was not an economical proposition; we increased our towboat power and are now carrying tows of six 500-ton barges, or 3,000 tons per tow. We make two round trips monthly to Mobile. The straight away distance is 440 miles. Exclusive of depreciation, it costs us about $2,600 a month to operate that towboat, including repairs and insurance, and for that $2,600 we turn into Mobile 6,000 tons of coal a month. I think it is reasonable to state that for 60 cents a ton coal can be transported the year round from the head of the river to Mobile, including depreciation. There may be periods when it can be put down there for less than that, but 60 cents is a fair price. The river, as you may have been informed and see from the map, is a crooked stream. We have never had anything happen in the 14 months we have been operating to interfere with navigation. We have had the highest water and had the lowest. Never had water under 6 feet and very frequently as high as 60 feet.

At a conference of the Patriotic and Defense Societies in the city of Washington on June 14 Raymond B. Price, chairman of the committee on inventions of the Aero Club of America, is reported as saying, among other things:

No matter how well we have prepared to meet our obligations in this war, if the need is yet greater we have so far failed.

Italian munition plants run part time for want of coal. Germany is not worried over the Italian offensive because she knows it is limited by lack of coal.

If fuel becomes increasingly scarce, the British fleet next fall will be so restricted that the German fleet can escape. Then, indeed, will hell be let loose on our own unprotected shores.

Let me add that the coal famine is not only threatening in Europe, but a coal shortage is already alarming the people of many communities here in our own country.

Would it not be the height of folly at this time for the Government to refuse to lend its aid to keep open the avenues of commerce everywhere in order that the products of the land may move quickly, especially those products that must be had in the present war crisis?

At this time there is congestion in the movement of freight owing to a car shortage. It is therefore highly important to keep open all the commercial highways of the country.

Along the railroads in the lumber-producing section of Alabama and other States in the South, there are great quantities of lumber which, owing to a lack of cars, has remained idle for months, thereby causing a congestion of lumber products. The condition that prevails has grown to be alarming and is most hurtful, especially in those communities where the production of lumber is furnishing to labor its principal means of support.

The following interesting item appeared in the Mobile Register, one of the leading papers of Alabama, on June 18:

More than a million feet of lumber have passed up through the locks of the Warrior River during the past month, according to official reports of lock keepers. This was gathered along the Tombigbee and Warrior Rivers and was transported by the steel barges of the Alabama & New Orleans Transportation Co., which carry coal from the Alabama mines to New Orleans, and which have heretofore returned up the river empty. The lumber and a quantity of foodstuffs carried by the barges recently is the first freight handled by them in nearly three years.

The lumber was delivered to points along the river where there are extensive building operations, and a good portion found its way into the Birmingham district. The movement of this lumber by water is due primarily to the shortage of freight cars, but it is reported that the movement has been so satisfactory that large quantities will in the future be shipped by water, and that such shipments are expected to continue after rail service gets back to normal.

In addition to a territory rich in mineral resources, the rivers of Alabama, including, of course, the great Tennessee River in the northern part of the State, penetrate a region that produces now and is capable of producing in increasing abundance large quantities of varied agricultural and lumber products as well as live stock.

Alabama and the adjoining States have become great cattle-growing States. The rich, black alfalfa lands in the Demopolis, Greensboro, and Selma sections of the State are attracting and drawing to them farmers and stock raisers from many sections of the country. Go from Mobile up these rivers and you will find a soil and a climate that will grow a greater variety of farm products, including fruits and vegetables, than can be grown in any other country on the face of the earth. Out of Mobile Bay and the adjacent waters are caught great quantities of fish, an important food product at this time. There also are grown large quantities of vegetables, such as peas, corn, cabbage, potatoes, and beans, some of the very essential things we must have now and at all other times.

This is a great producing section adjacent and contiguous to Alabama's great waterways, their main outlet being through Mobile Bay, and it seems to me that this item along with the other items of this bill should receive enthusiastic support. [Applause.]

The Clerk read as follows:

Alabama River, Ala., and Coosa River, Ala. and Ga.: Continuing improvement and for maintenance, including the Alabama and Coosa Rivers between Montgomery and Wetumpka, $50,000.

Mr. DEMPSEY. Mr. Chairman, I move to strike out the last word.

Mr. SMALL. Mr. Chairman, will the gentleman pardon me for a moment? I suppose this is only a pro forma amendment?

Mr. DEMPSEY. That is all.

Mr. SMALL. How much time does the gentleman desire—five minutes?

Mr. DEMPSEY. Oh, possibly three minutes.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate upon this paragraph and all amendments thereto be closed in four minutes.

The CHAIRMAN. Is there objection?

Mr. MADDEN. I object to that, because the gentleman may say something that will require an answer.

Mr. SMALL. Does the gentleman desire to reply?

Mr. MADDEN. I do not know. I shall take my chances upon that.

Mr. SMALL. The gentleman would rather not agree to close debate now?

Mr. MADDEN. We do not propose to allow any debate to be closed upon one speech.

Mr. DEMPSEY. Mr. Chairman, the gentleman from Massachusetts [Mr. TREADWAY], in referring to the item which has already been passed for the removal of water hyacinths, said that he supposed that the item was not to be used on the St. Johns River, and he based his argument upon that assumption. It is simply to answer that proposition and to call attention to the record upon it that I desire to be heard. I direct the attention of the committee to the estimates for this item on page 202 of the report. The estimate is as follows:

For operations of hyacinth elevators on St. Johns and Withlacoochee Rivers and tributaries, $5,000.

So on the estimate itself the appropriation is for removing the hyacinths upon the river which has such a large tonnage, which carries so much freight that the gentleman says that the removal of the hyacinths upon that river would be justified. That it can not be expended, as the gentleman says, at other places is apparent from the report, and I call attention to another part of the report, wherein it says:

In the Withlacoochee River the hyacinths are still troublesome, and a considerable length of the middle and lower portions of the river is now blocked. No serious trouble is at present experienced on other streams in the State.

So, if the gentleman had taken the pains, had had the time, and had either read or been present when the estimate was presented, or if he had read that portion of the report, he would have seen that the use which he says is an admirable use, the use which he says is justified, is the only use contemplated to be made of this appropriation. The gentleman from Illinois [Mr. MADDEN] has stated that there might be some answer to what I have to say. I will say in connection with that that I would like myself to answer now what I did not answer when I was heard the other day and was asked a question by the gentleman from Illinois [Mr. MADDEN]. On several occasions, on two days when the river and harbor bill was under consideration, the gentleman, in a spirit of merriment, to poke fun at the bill, wanted to know if the water hyacinth was edible. He said if it was then the item no doubt was justified, and he propounded that question to me in my profound ignorance. I will call the attention of the gentleman to page 201 of the report, where that very question is dealt with, and where it is said that the removal of the water hyacinth by spraying with a poisonous chemical was abandoned and not pursued because of the fact that the cattle do eat the water hyacinth and it was found that to destroy it in that way led to their death.

Mr. MADDEN. So that, as a matter of fact, the answer of the gentleman is in the affirmative——

Mr. DEMPSEY. That the water hyacinth is edible?

Mr. MADDEN. To the query I made that if it was not good for the purpose of feeding the Army—if it was not good for food—the item was not justified?

Mr. DEMPSEY. Oh, no; the gentleman answers himself. If it feeds cattle, then it feeds the Army.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SLOAN. Mr. Chairman, I move to strike out the item respecting the Tombigbee River.

The CHAIRMAN. That item has not yet been reached.

Mr. MADDEN. Mr. Chairman, I rise to oppose the amendment of the gentleman from New York to strike out the last word.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate upon this paragraph and all amendments thereto shall close in five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, notwithstanding the very eloquent plea for the water hyacinth made by the distinguished gentleman from New York [Mr. DEMPSEY], I can not bring myself to believe that water hyacinths are of such value as to justify this large expenditure of money for their removal. When we began the consideration of this bill, it seemed to me that we ought to give serious thought to the problems of the war, and, as I understand it, there are no problems of war involved in this bill, unless the question of the value of hyacinths as a food for soldiers who are to fight the battles of the country is involved. For myself, I long since reached the conclusion that water hyacinths may retard the rapidity of the current in the river in which they grow, but I have not thought that water hyacinths retard any navigation anywhere because, as I understand it, there is no navigation on the rivers in which they grow.

Mr. DUPRÉ. Oh, the gentleman is misinformed.

Mr. MADDEN. That would not be the first time that I have been misinformed.

Mr. DEMPSEY. Does the gentleman claim there is no navigation on the St. Johns River, Fla., this stream for which this appropriation is made, which I was discussing?

Mr. MADDEN. If there was navigation on the St. Johns River, Fla., we would not need to make a special appropriation to remove the water hyacinth in order to make room for navigation. Navigation itself destroys the water hyacinth.

Mr. BATHRICK. The gentleman is wrong.

Mr. MADDEN. I may be wrong but——

Mr. BATHRICK. That is the second time.

Mr. MADDEN. This, then, will make it the third time I will say. What has the gentleman to say about it?

Mr. BATHRICK. I just say that these large bodies of hyacinths float from the tributary streams into the main streams and clog up the river and may float out to sea. You go up on the tributaries and kill them off.

Mr. MADDEN. We are not concerned about the water hyacinth that float from the tributaries into the main streams. I understand this appropriation is to remove the water hyacinth growing in the stream.

Mr. BATHRICK. You want to destroy this for the purpose of facilitating navigation, and in that case you must spend the money in a way to facilitate it.

Mr. MADDEN. That is what the bill says; I can not agree to the statement made by other eloquent gentlemen, who are so well versed in the matter, of taking appropriations out of the Public Treasury for things that are not needed. The time has come when the American people demand some sort of economy in the expenditure of public money for things that are not necessary. There is nobody who will claim that most of the items of this bill are necessary. Everybody who would be willing to make a statement on which his reputation was at stake would say in answer to the query that more than half the appropriations in this bill are neither needed nor worthy, and that none of them, not a single one of them, can be classed as a war measure. This bill comes before the House as a war emergency measure. That is the only excuse for its consideration here. I do not very often agree with a Democratic caucus, but I do agree with the Democratic caucus in this instance that nothing should be considered by the House during the special session except emergency war measures, and I have not been able to find a Democrat who attended the caucus, or any Democrat who is in close relation with those who did attend the caucus, who has been willing to say on his reputation as a man that the Democratic caucus considered this a war measure. The Democratic leader of the House said it is not a war measure, if I understood him, and we proposed a few days ago to express our faith in the President of the United States and the Secretary of War by making the appropriations contained in this bill with the condition that no money should be expended out of this appropriation except such sums as might be certified to by the President of the United States as a war measure.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. And the Democrats in the House refused to accept the provision in the bill that would give to the President of the United States the power to certify whether these are war measures or not. You talk about supporting the President.

Supporting the President? You do not stand by him when he needs you most.

The CHAIRMAN. The time of the gentleman has expired, and the pro forma amendment will be considered as withdrawn.

The Clerk read as follows:

Tombigbee River, Ala. and Miss.: For maintenance from mouth to Demopolis, Ala., $30,000, and from Demopolis, Ala., to Walkers Bridge, Miss., $10,000; in all, $40,000.

Mr. SLOAN. Mr. Chairman, I move to strike out the item for the Tombigbee River. Mr. Chairman, I do this because I think it is striking at the vital point of the whole bill. I do not look at it like some other Members of the House do, who attack it in detail. I think it should be attacked in its most vital part. If the Tombigbee survives, perhaps the bill should survive. I am in favor of striking it out for a number of reasons. One is that there appears to be no defense urged at this time. One of the redeeming features of the river and harbor bill has been heretofore not the appropriating item for the Tombigbee, but the regular annual speech we have had defending the Tombigbee appropriation. I understand it is a great waterway, that the water runs through there a majority of the days during the year, and that the water of this stream has special qualities of moisture not at all usual in other streams.

Mr. MADDEN. And that it is embowered by arching trees.

Mr. SLOAN. And, as the eloquent gentleman from Illinois, who is an expert on waterways, says, it carries trees over the stream so as to make an arch; and that leads me to say I believe this Tombigbee appropriation is the keystone of this whole legislative arch, whether it be good and wholesome or whether it be an arch of "pork."

Mr. COOPER of Wisconsin. Will the gentleman pardon——

Mr. SLOAN. I would be pleased to know what particular offense the gentleman wishes me to pardon him.

Mr. COOPER of Wisconsin. Did I understand the gentleman to refer to this river as the "keystone"?

Mr. SLOAN. Yes; because the keystone is almost fluid—the whole system will hold together little better than water. I am interested very much in this whole matter down there. We have from that section TOM HEFLIN, TOM SISSON, and Tombigbee; and the greatest of all these, for water navigation, is Tombigbee. [Laughter.] Its importance is the reason for my attack. I think that some good reason should be given why this appropriation should not be stricken out.

Mr. MADDEN. Will the gentleman yield?

Mr. SLOAN. I will.

Mr. MADDEN. Does the gentleman wish to associate his argument in reference to striking at the vitals only to those gentlemen whom he has named?

Mr. SLOAN. No; the gentlemen pluralized; I said "vital." I think this is the most vital of all. I have listened to the defense of that appropriation now for six years. I do not propose that this bill shall pass, or any part of it, unless this most interesting provision be defended. There is but one man on earth who can defend it. I expect him to defend it. A river and harbor bill without a Tombigbee River speech would be Hamlet with the "Melancholy Dane" omitted.

Mr. CANDLER of Mississippi. Mr. Chairman, this item in this bill does not require any defense of any kind whatsoever. Everybody has recognized for many years past that the only possibility on earth to pass a river and harbor bill through the House of Representatives and through the Senate and secure the approval of the President of the United States is to include within its provisions the appropriation for the Tombigbee River. Without the appropriation for this beautiful river in the river and harbor bill it would be an absolute impossibility to secure serious consideration for the measure, much less its passage. [Applause.]

The gentleman from Nebraska [Mr. SLOAN] stated, a moment ago, that he understood the water of this river had some moisture in it. It has so much moisture that it produces the most beautiful products, fruits and flowers as well as most splendid timber of all varieties, along its banks in all the world. And he was correct when he said it was the keystone, because it is the keystone to all the waterway improvement of the United States. It is the center; and in this time of difficulty and of strife, when the war clouds hang above us, we must take care of these important waterways in the United States, and if this one should be excluded there would not be any use whatever to appropriate any money for any other stream in the country. Without the improvement of this stream and the protection which is afforded to it by the provisions in this bill, the expenditure of money upon any other waterway or any other harbor, or anything else connected with waterways in the United States would be an absolute waste. And if there is one thing we are trying to protect the American people from at the present time it is waste. We want to protect them from that above everything else, because we want to conserve all our resources. [Applause.]

My friends, if you would refuse to improve this river, you would commit a crime against the people of the United States of America, and not only the people of this great Republic, but the people of the universe, because it is known far and wide throughout the length and breadth of this great world. A few years ago, when there was a similar motion pending with reference to this very provision in this bill, I replied to the assault made upon it, and at once the wires began ticking across the ocean waves to yonder lands, and cablegrams came back inquiring what the result of the motion had been to strike this important provision from the bill. [Laughter.] If you should take it out and deprive the people of this country of the benefits that are being derived from it and that have been derived from it during all these years, you could not in all the time to come accomplish anything that would compensate for the great calamity which would thereby be visited upon the people. [Laughter.]

You talk about the water in that stream; do you know that the Gulf of Mexico is absolutely dependent upon the Tombigbee River, because without the water that flows down the Tombigbee River into the Gulf of Mexico the Gulf of Mexico would go dry itself? But by reason of the fact that the waters flow down this beautiful stream and empty themselves through the Alabama River into the Gulf of Mexico the Gulf furnishes one of the greatest means of transportation into and from this country that is available at the present time.

Why, the truth of it is that in this present situation there is nothing more important than this river, which supplies the Gulf of Mexico, that furnishes the means of transportation across to the other side, and connecting various parts of this great Republic. You might dispose of the Pacific Ocean; you might dispose of the Atlantic Ocean. If we could get the latter out of the way now, we could get closer to the people that are troubling us at this time. Then we would be able to get at them without any serious difficulty and be done with this war and have it behind us. But the trouble is that now we have to go so far in order to reach them. But you might dispose of that and get that out of the way, and there would not be any serious trouble or difficulty or national calamity; but to go out of the way and refuse the people the benefits that are to be derived from the appropriation for the Tombigbee River in this bill that we are now considering would be, as I said, not only a national but an international calamity. [Applause.] I know that the House of Representatives will not seriously consider the adoption of any such motion as is proposed to strike out this appropriation, because if it does each one of you who vote for the motion would be a traitor to your country, and you would no longer deserve or be eligible to a seat upon the floor of the House of Representatives. [Laughter and great applause.]

The CHAIRMAN. The question is on the amendment of the gentleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. Mr. Chairman, I ask unanimous consent to proceed for one minute. The members of this committee owe me a vote of thanks for furnishing this new speech of entertainment, which I knew I could not deliver myself, but which I knew the gentleman from Mississippi [Mr. CANDLER] could. And in the interest of closing the war, and as it is purely a war measure, I propose to withdraw my amendment and leave the Tombigbee River for the navigation of tadpoles and turtles. and allow the submarines to become sunk in the mud between its mossy banks.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to withdraw his amendment. Is there objection? [After a pause.] The Chair hears none.

Mr. CANDLER of Mississippi. I felt sure the distinguished gentleman would withdraw it when he heard from me. He could not withstand the logic and force of the facts demonstrating the absolute necessity of this improvement; nevertheless, I thank him for withdrawing his opposition.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Gulfport Harbor, Miss.: Continuing improvement and for maintenance of anchorage basin at Gulfport and channel therefrom to the anchorage or roadstead at Ship Island, and for the improvement and maintenance of channel at Ship Island Pass, $80,000.

Mr. BORLAND. Mr. Chairman, in special reply to the gentleman from Illinois [Mr. MADDEN], who has repeated again today in the consideration of this bill those criticisms about the war measure, and in view of the fact that all of these criticisms are being printed throughout the country without a specific reply each time, I want to send to the Clerk's desk and have read a statement by a member of the Council of National Defense

on the importance of using the waterways of the country in this particular emergency.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

[From the Kansas City Times, June 16, 1917.]

MAY USE ALL RIVER BOATS—W. S. DICKEY SAYS RAIL LINE CONGESTION MUST BE AVOIDED.

Greater use of the rivers and other waterways and possible mobilization of the various Government-owned river craft as freight carriers to relieve the congestion that is certain to hamper the intensified transportation needs this year are part of the plans of the Council of National Defense, according to Walter S. Dickey, president of the Kansas City Missouri River Navigation Co. Mr. Dickey spent several days recently in Washington helping to solve the transportation problem. He was appointed yesterday a member of the inland-waterway committee of the defense council.

"Use of all the facilities for movement of food, munitions, and other supplies incident to the war is imperative," he said yesterday. "The congestion of freight on the railroads will be enormous this fall, and some prompt and effective action must be taken if the whole system is not to collapse under the strain.

"The railroad officials realize this, and they are as anxious as anybody to see the waterways used to capacity as freight mediums. They realize they will have more freight than they can handle, and now are urging that the canals, the Mississippi Valley, the western and eastern rivers, and the whole intercoastal water system bear a part of the burden.

"The Government has scattered through the Mississippi Valley large fleets of construction and repair boats that may be put into service drawing barges. The high water lessens their usefulness in their regular capacity The engineering department of the Army, under which the river work comes, has been ordered to make an inquiry into the tonnage available and the feasibility of this plan. I do not know how many of these boats here are, but their use would help a great deal."

Mr. JAMES. Mr. Chairman, I move to strike out the last word for the purpose of calling attention to an item just passed, which does not come under the class of the item just mentioned. This is a "war measure," so called, and we have just passed an item for Pascagoula Harbor, and in order to call attention to the importance of Pascagoula Harbor in this great "war measure" I want to cite the fact that the commerce has decreased at Pascagoula Harbor, according to the report on page 223 of the report of the majority of the committee. The commerce in 1913, in short tons, was 1,020,928; in 1914 it was 604,569 tons; and in 1915 it was 102,851 tons. The value in 1913 was $7,064,738; in 1914 it was about $4,557,484; in 1915 it was $910,570. There has been spent on this project $1,318,129.

I am glad that this item passed, because I am afraid that if this item were not in this particular war bill we would not be able to carry on the war successfully.

I notice also on page 223 that the inhabitants of Pascagoula are intensely patriotic, since during the year 1916 they constructed a municipal wharf at Pascagoula at the enormous expense of $300. [Laughter.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Pascagoula, Wolf, Jordan, Pearl, and East Pearl Rivers, and Biloxi Harbor, Miss.: For maintenance, $10,000.

Mr. FREAR. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin moves to strike out the last word.

Mr. FREAR. I do this, Mr. Chairman, in response to a suggestion made a few minutes ago in the statement that was read, attributed to a gentleman who is connected with the National Defense Board. I read from official Document 463, Sixty-fourth Congress, to show the interest that that gentleman may have in the improvement of inland waterways. I read from page 11 of the document:

The Kansas City-Missouri River Navigation Co. (Capt. Dickey, manager), the only through line on the river, operating between Kansas City and St. Louis, charges 80 per cent of the railroad freight rates. Assuming this to be the relation between the rail-and-water rates for the entire traffic, the saving to shipper by the use of the river in 1913 was about $10,000. It is evident that this saving is entirely inadequate to warrant the serious consideration of an expenditure by the Government of $1,100,000 per year in interest and maintenance. * * *

It is frequently argued that if the improvement of a river gives lower rail rates, such improvement is justified even if the river never carries a ton of freight. This might be true if there were no other method of controlling rail rates, but in these days, when the railroads claim that they are being regulated too much, there appears to be no lack of governmental machinery for controlling them, and it does not seem necessary to spend $20,000,000 to bring about a proper rail rate between Kansas City and St. Louis.

Remember, I am reading from the report of an Army engineer who had charge of the work.

Let me suggest, beyond that:

Mr. Dickey's boats collected about $40,000 in freight charges that year, according to Col. Deakyne's statement, but it will cost the Government approximately $1,100,000 per year to save $10,000 annually in freight rates for Kansas City shippers, according to Col. Deakyne's estimates.

Mr. BORLAND. Mr. Chairman, let me take two or three minutes, without delaying the consideration of this bill, to answer again the gentleman from Wisconsin [Mr. FREAR] on that proposition. That report of Col. Deakyne—and by the way Col. Deakyne was utterly unfamiliar with western rivers and was there only a brief time—that report of Col. Deakyne was filed scarcely 30 days after Congress authorized a rereport on the Missouri River. It so develops from the date of his report, so that his report could not have been based upon very extensive information. Thereafter the Board of Army Engineers, consisting of Col. Black, Col. Newcomer, and other officers, men serving in high positions, were called to Kansas City and reviewed that report and unanimously disapproved and disaffirmed it. That was the end of the Deakyne report save as it reappears from time to time in the remarks of the gentleman from Wisconsin. There is only one thing to say in regard to that, which is that no economist whom I ever heard of except the gentleman from Wisconsin [Mr. FREAR] ever insisted on measuring into the construction cost the tonnage carried during construction days. I have never heard of an improvement carried on in that way. We are carrying on a construction project there involving an expenditure of $20,000,000. During construction days a certain amount of traffic can be carried, but to measure into the construction cost the traffic carried during construction days is absolutely unsound from an economic standpoint. The gentleman has repeatedly made that criticism of this river and other rivers that are under course of construction, and I want to answer that criticism once for all. We do not claim that the freight carried during construction days is either a measure of the capacity or an element of the cost of the river. And I want to say further that as far as this report of Col. Deakyne is concerned, it has attained more prominence and been more commended by the gentleman from Wisconsin than by his fellow engineers in the Bureau of Rivers and Harbors of the United States.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn and the Clerk will read.

The Clerk read as follows:

Waterway from the Mississippi River to the Sabine River, La.: For maintenance, $7,000; for completing improvement from Mermentau River to Sabine River, La. and Tex., in accordance with the report submitted in Senate Document No. 705, Sixty-fourth Congress, second session, and subject to the conditions set forth in said document, $230,000; in all, $237,000.

Mr. FREAR. Mr. Chairman, I have not discussed any of the items to-day, although I have been referred to once or twice. I move to strike out the last word.

In the minority report there was a statement in regard to this project, and I refer to that briefly because there has been nothing presented in reference to it. I am referring to Document No. 705, Sixty-fourth Congress, second session.

This project, as I understand, and as it was presented to us in the committee, is included because of sulphur mines in the neighborhood of the proposed canal. There is a canal project that is in existence there now. On page 11 of the document appears a statement wherein it is proposed to enlarge the canal, because it states in the report—

The operators of this sulphur mine contemplate the dredging of a feeder canal at their own expense, at a cost of at least $200,000, into the river—

And so on. Let me say, Mr. Chairman, as nearly as I can ascertain over $700,000 has been expended on this project entirely upon these two connecting canals of 50 or 60 total miles length. One is a 5-foot canal and the other is a 7-foot canal. The proposition is to enlarge to a 7-foot canal and the other to a 9-foot canal. A statement of the commerce, which I do not care to discuss, is found on page 8 of the document, and, while it will not bear critical analysis, the point I wish to make is that over $200,000, or a $279,000 balance, to be more exact, exists in the Treasury at this time. This project is proposed as a war measure. There are five railroads, as I understand is, at this time reaching St. Charles, and I do not believe it can be sustained on that ground. It is a part of the inland waterway project, no better and no worse, as I understand from reading the document, than others down in that part of the country, but I can not see on what basis it can be determined that this should be improved as a war measure at this time. It will take several years to improve it. They have now over $279,000 balance on hand, and with five railroads in to these mines I submit that even a 7-foot canal will not be of any great advantage to the Government for the purpose of carrying sulphur to market. Nothing has been said heretofore, as far as I know, in reference to this project. It is mentioned in the minority report and is one of the few projects mentioned in the report, and for that reason I call attention to the document on which recommendation is based for this so-called war project.

Mr. SMALL. Mr. Chairman, I do not think it proper to leave this item, and the remarks which have been made by the gentleman from Wisconsin [Mr. FREAR], without a brief statement. If the gentleman from Wisconsin intends to criticize this item, and if he intended in his minority report to criticize this item—I put it in this interrogative form because the gentleman is so indefinite at times that it is difficult to say whether he intends to be critical or not—then I desire to add that there is no more meritorious proposition in the bill from any standpoint than this. This proposition is for the deepening of a waterway between the Sabine and Mermentau Rivers, which gives a waterway connection to the largest sulphur mine in the United States and in the world. It is at a cost of $460,000, of which $230,000 is contributed by the locality. In addition to that, the owners of the mine propose to connect this waterway, intended to be improved, by an artificial waterway constructed at their own cost, requiring an expenditure of $200,000, and to donate it to the Government of the United States. I ask the attention of the gentleman from Wisconsin [Mr. FREAR]. The production of sulphur to-day is absolutely essential for the prosecution of this war.

Mr. FREAR. I will ask the gentleman to yield for a moment.

Mr. SMALL. I do not desire to be interrupted now.

Mr. FREAR. Then, why did you seek my attention?

Mr. SMALL. Because I want to give you some information——

Mr. FREAR. I have it——

Mr. SMALL. Which you do not seem to possess, and which you do not seem to wish to have.

Mr. FREAR. Mr. Chairman——

Mr. SMALL. I decline to yield.

Mr. FREAR. Then I object to the gentleman's remarks, Mr. Chairman.

Mr. SMALL. I say the production of sulphur to-day is absolutely essential for the prosecution of this war in the making of munitions. We have heretofore been able to secure pyrites from abroad, but our supply of that is entirely cut off, and the only means of procuring sulphur as a substitute for pyrites comes from two great sulphur mines, one in Louisiana and one in Freeport, at the mouth of the Brazos River, in Texas. We have among the records here a very urgent request from the Board of Ordnance of the Navy Department, and of the Army, for this improvement, in order to make accessible the sulphur from this very large sulphur mine. That information was accessible to the gentleman if he had desired to secure it. As a member of the committee he may readily secure all information available. And yet he filed a minority report and attempts by his statement on the floor to criticize and disparage this project and have the country believe that it is unworthy of adoption with this appropriation. There are some newspapers and periodicals, it seems, which still take the gentleman from Wisconsin [Mr. FREAR] seriously, and assume that he possesses information, and that he is willing to secure information and to state the facts when he knows them. The gentleman is not giving correct information to the House. I am not speaking offensively, nor with any intention of being discourteous, but I say with all courtesy, that a member of the committee who criticizes any item in this bill owes it to his integrity and his reputation and his good name to endeavor to seek the truth, and when he has found it to have the courage to state it.

Mr. FREAR. Mr. Chairman, I move to strike out the item. I have listened to a good many lectures delivered on the floor of the House by members of the committee and others, but I have never yet hesitated to express myself on any project in this bill or any other bill and do not propose to do so. I shall not hesitate for a moment if I believe the facts do not warrant the appropriation, although I am not discussing the bill in detail. There has not been a fact which I stated which the gentleman from North Carolina has disputed. In addition to that I do not care to go into details, but on page 8 is an account of all the freight carried on this canal, on which they have spent $700,000 thus far. Not one ton of sulphur has been carried on this canal. Not one ton of sulphur can be carried during the existence of this war on this 5 or 7 foot canal. Let me tell you what commerce has been carried. Of the amount of 14,000 tons, 4,000 tons of shells, valued at $3,200, were reported in 1915, and live stock, which makes up two-thirds of the entire valuation, was carried 12 miles.

Mr. Chairman, I believe in paying every dollar that the Government ought to pay when any project is intended for war purposes, and I would not mislead intentionally on this or any other project, but I can not close my eyes to the fact that when a project like this is proposed as a war measure, when we know that it is impossible for years to come to make this canal capable of carrying this commerce, when we know that five railways run to this nearest town and take away all their sulphur now, when we know that after all the expenditure by the Government not one ton of sulphur has been carried during the past year, I say it is a duty I owe to the House to state what the facts are as shown by the report.

Mr. DUPRÉ. Will the gentleman yield?

Mr. FREAR. Yes.

Mr. DUPRÉ. Did I understand the gentleman to say that $200,000 had been expended on this?

Mr. FREAR. Two hundred and sixty-nine thousand dollars.

Mr. DUPRÉ. Does not the gentleman know that is the section from Mermentau to Calcasieu, while this project here is the Sabine section from Calcasieu to Sabine?

Mr FREAR I will accept the gentleman's statement, because I know that he knows as to the portion of the canal to which it is to apply

Mr. SLAYDEN. Will the gentleman yield?

Mr. FREAR. I will.

Mr. SLAYDEN. A number of gentlemen have been criticizing the measure by saying it is not a war measure. I do not know what they mean by that. My information is that the bill has come here with the approval of the Secretary of War, who has general charge.

Mr. FREAR. Oh, Mr. Chairman, I have only five minutes, and they tell me I can not have it extended.

Mr. SLAYDEN. Does not that bring it within the category?

Mr. FREAR. This is proposed as a war measure, and the reason that I referred to this particular project was because sulphur does enter into munitions for the war. Now, Mr. Chairman, I do not care to answer the personal remarks of the chairman of the committee. He says he does not mean them personally. I desired simply to place the facts before the House. I have not spoken to-day on a single item, and do not intend to speak on any item, or move to strike out any item except where the statement in the minority report is challenged. I think the report is correct, it was as far as I had anything to do with it, which was only a small part. I am opposed to the bill and believe that it ought not to pass.

Mr. DUPRÉ. Did not the minority refuse to state that the local people had contributed an equal amount?

Mr. FREAR. No statement was made in reference to it. Mr. Chairman, I withdraw my motion to strike out.

Mr. DIES. Mr. Chairman, I move to strike out the last two words. I do not think the argument of the gentleman is quite fair, that no sulphur has been hauled over this canal. Of course not, because the canal has not been completed to the sulphur mine. That is the object of getting this item. I appreciate wit, I think I can discover wit when I hear witty things said. I think I know a witty man when I hear him talk. My friend was talking a moment ago very wittily about the Tombigbee River. As a matter of fact——

Mr. FREAR. The gentleman is mistaken, I did not——

Mr. DIES. Oh, no; the gentleman from Wisconsin was witty about other things, but did not know it.

Mr. MOORE of Pennsylvania. The witty gentleman on the Tombigbee was the gentleman from Nebraska.

Mr. DIES. That stream, according to report, carries about 300,000 tons of commerce of the value of about $4,000,000, a thing which the would-be successor to the late Mark Twain overlooked.

In last Saturday's RECORD there appears a speech by the gentleman from Wisconsin [Mr. FREAR]. I do not recall to have heard it delivered in the House. It is a large collection of newspaper comments that would be very nice for him to use in the next campaign, approving his unwarranted and, in many instances, inaccurate attacks on the river and harbor bills. Among other things, the gentleman from Wisconsin [Mr. FREAR] has in that cold-storage speech, or posthumous edition, is that among the worthless rivers in this bill is the Sabine River. I call attention to it because you can not answer every speech the gentleman from Wisconsin makes. His verbosity is multitudinous. Nor can you answer the criticism that he makes on every worthy project in the river and harbor bills. To do so would be to bring down upon the Congress of the country the further criticism that it was taking up too much time. But just a word as to his criticism of the Sabine River: The gentleman from Wisconsin is a member of the Committee on Rivers and Harbors. Let the country know that. He is familiar with the truth; and this may surprise you gentlemen to hear me say it, but he is familiar with it in the sense that he knows what it is—not that he is using any of it in his speech; I do not mean to reflect on the gentleman in that way, for he

abstains from its use almost tetotally on the floor of the House—but he is chock full of it so far as the facts are concerned. He knew that in 1913 this river which he said was worthless carried 433,000 tons, of the value of $3,000,000. He knew that in 1915 it carried 541,260 tons, of the value of nearly $4,000,000. He knew, as a member of the Committee on Rivers and Harbors, that that commerce was carried at a time before the improvements were made which he is now criticizing. At that time the river was practically unimproved; and, now that the citizens there have taken their own money and improved the river, the tonnage has greatly increased. That river was not open under the improvement until June 30, 1916, and therefore no reports are available; but I doubt if there is a river in the United States that carries as large tonnage as that does, from Orange to the Gulf, mile for mile. I shall be able some time during the day to put in the exact amount of tonnage. It runs into several million tons.

I am informed that on the banks of that Sabine River, which my friend says is worthless, there are 10 or 12 shipyards, not all of them warship yards, for they were building ships there before the war occurred. I remember a year ago they launched a large ocean-going ship at the city of Orange, named the *City of Orange*. They are building there now a great number of ships, some of them for the United States Government, some for private contractors, and, I understand, some probably for foreign Governments. That illustrates to you gentlemen here, you Members of this Congress, who are not influenced by your desire for publicity, who are not influenced by what the newspapers are saying throughout the country upon which you may predicate a sort of fame built of cards—that illustrates the value of that river, and I appeal to you to know if it is treating you right to say nothing of the great body of the American people, when the gentleman from Wisconsin leads you to believe that this river and other rivers are worthless, when he ought to know the facts, if he does not. If he knows the facts, he ought to apologize to the House, and if he is ignorant of the facts he ought to apologize to his committee, the Committee on Rivers and Harbors.

The CHAIRMAN. The time of the gentleman from Texas has expired.

The Clerk read as follows:

Bayous Vermilion, Nezpique, des Cannes, Plaquemine Brule, and Queue de Tortue, Mermentau River, and Calcasieu River and Pass, La.: Continuing improvement and for maintenance, including channel, bay, and passes of Bayou Vermilion, and tributaries of Mermentau River, $51,000.

Mr. FREAR. Mr. Chairman, I move to strike out the last word to say in response to what has just been uttered by the gentleman from Texas [Mr. DIES]. I care not for the personalities, but in speaking of the Sabine River I was speaking of the project which was proposed at the last session, which was a new project and which was stricken out of the bill. I was not referring to the commerce at the mouth of the river. The official reports do not recognize any improvement on the river above its mouth. I assume that is what the gentleman has in mind. The canal of which I have just spoken was the Sabine Canal, which is one of the small projects that leads up to the mouth of the river. There is commerce at the mouth of the Sabine River, just as there is at the mouths of some of these other rivers. I said that about the river which was proposed for improvement last year, at which time a new project was offered.

I have not the document before me, but one of the reports said that there was water in the stream for two months in the year. That was the Sabine River proper.

Mr. DIES. The gentleman did not say anything about the upper Sabine River in the CONGRESSIONAL RECORD.

Mr. FREAR. It is the mouth of the river that the gentleman from Texas has in mind. I am not criticizing the mouth of the river. There has been no question raised by me here or heretofore about that project.

The Clerk read as follows:

Removing the water hyacinths, Alabama, Mississippi, Louisiana, and Texas: For the removal of the water hyacinth from the navigable waters in the States named, in so far as it is or may become an obstruction to navigation, $20,000.

Mr. TREADWAY. Mr. Chairman, I move to strike out the last word for the purpose of asking the question whether or not this is an item specifically approved by the Chief of Engineers for national-defense purposes. I would like to have the information to make sure that we are passing a national-defense act and that these frequent appropriations for water hyacinths have to do directly with the important item of national defense.

Mr. SMALL. Mr. Chairman, I do not know whether my colleague is serious or not, but I am going to assume that he is serious, and I will make this brief statement: As was well stated by my colleague [Mr. DUPRÉ] earlier in the afternoon, the hyacinths constitute an obstruction to navigation, an obstruction just as serious as the deposit of material, a shoal, or any other obstruction in a channel anywhere, and, being a serious obstruction to navigation on navigable rivers under improvement by the United States, where there is a substantial commerce, the obstruction should be removed. I ask the attention of the House for one minute to this proposition. The gentleman from Massachusetts asks whether this is an appropriation connected with national defense. The gentleman from Illinois [Mr. MADDEN] has perhaps facetiously observed, "How is this bill connected with war problems?" Mr. Chairman, is it really necessary to answer that question? If transportation to-day is not one of our resources which we should conserve and develop and promote in the interest of the prosecution of this war there is no resource which we should mobilize and promote. Transportation is perhaps the most urgent, the most important, and any action by this Congress which conserves our waterways, which promotes the establishment and the increase of water carriers, is primarily connected with the national defense and the prosecution of this war.

Do gentlemen need any further evidence to sustain that proposition? There was printed in the RECORD several days ago a paper prepared by the Secretary of Commerce, which the gentleman from Wisconsin [Mr. COOPER] commented upon very intelligently and tersely, which set forth in unmistakable terms the great importance of maintaining and improving our inland waterways and of promoting water-borne commerce upon them and the establishment of additional water carriers. We have had a recent report from the Federal Trade Commission upon the bituminous and anthracite coal situation in which they emphasized the great importance of the relation of transportation and the acute situation regarding fuel, and they recommend in specific and emphatic terms the coordination of rail and water instrumentalities of transportation as one of the factors in the proper solution of that important problem. And I could enumerate other pieces of evidence which are recent and available to establish the proposition that transportation is to-day of the greatest importance in the mobilization of our resources for the successful prosecution of this war. Why increase the production of agricultural products——

Mr. GALLAGHER. Will the gentleman yield?

Mr. SMALL. Why add to the production of our mines; why speed up our factories unless we have at hand the means of distribution? As means of distribution we are substantially confined to railways and waterways. Evidence has been piled upon evidence since this bill has been under consideration, repeated daily in the press of the country from official and unofficial sources, that the railways are unable to meet the demands of distribution and transportation made upon them and that the only resource to which we can turn are our waterways. I desire to ask in all seriousness and with courtesy, does it not behoove gentlemen in their official capacity as Members of the House of Representatives to join with others in a constructive process for maintaining our waterways and adding to the facilities of transportation upon them? [Applause.]

Mr. GALLAGHER. Will the gentleman yield? I want to ask——

The CHAIRMAN. The time of the gentleman has expired.

Mr. TREADWAY. Mr. Chairman, I directed my inquiry a few moments ago to this particular item which has just been read, removing the water hyacinth in Alabama, Mississippi, Louisiana, and Texas.

Mr. SMALL. Will the gentleman yield for a moment in order for me to submit a unanimous-consent request?

Mr. TREADWAY. I will.

Mr. SMALL. I suppose five minutes would be sufficient for the gentleman?

Mr. TREADWAY. That will be all I desire.

Mr. SMALL. I ask unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes, 5 minutes to the gentleman from Massachusetts and 5 minutes to the gentleman from Wisconsin [Mr. STAFFORD].

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. TREADWAY. Mr. Chairman, I directed my inquiry directly to the item before us, namely, to removing the water hyacinth in the States of Alabama, Mississippi, Louisiana, and Texas, and my question was as to whether or not this item had been approved by the War Department as necessary for preparation for our national defense. In reply to the inquiry, the chairman of the committee has given us a very illuminating and interesting address on the merits of waterway transportation, but, Mr. Chairman, I failed to hear any explanation from him in direct answer to the question I asked, nor did he explain wherein the removal of the water hyacinth from any of the

streams of the four States would in any sense add to the national defense as applied to those particular streams. His address certainly was extremely interesting and very able, as all his statements are, but he did not answer the direct question which I asked, namely, the benefits to accrue to national defense by an appropriation for the removal of the water hyacinth in the four States named. In other words, what are the streams wherein there will be any commerce or transportation having to do with national defense, which, of course, is the basis of this bill, by the removal of these hyacinths in those particular States? I really am serious and I am anxious to know just where the application of this appropriaiton comes in as regards this national defense.

Mr. McKENZIE. Will the gentleman yield?

Mr. TREADWAY. Certainly.

Mr. McKENZIE. Does not the gentleman from Massachusetts admit that it is really necessary at times to remove water hyacinths from streams because it really does at times become an obstruction to navigation, or does the gentleman base his opposition on the theory that it is not a matter of national defense at this time?

Mr. TREADWAY. I will say in answer to the gentleman's inquiry that this bill is supported by the majority of the Committee on Rivers and Harbors because in this existing emergency we must do everything we can toward national defense. So I wanted to know in what streams the removal of the water hyacinth in those four States will aid and improve the national defense in the great emergency facing us to-day.

Mr. DEMPSEY. Will the gentleman yield for a question?

Mr. TREADWAY. Yes.

Mr. DEMPSEY. I would like to answer the gentleman from Illinois——

Mr. TREADWAY. I would be glad to yield.

Mr. DEMPSEY. In the language of the report itself:

It—

Referring to the water hyacinths—

spreads rapidly, and before operations for its removal were begun the rivers affected were not infrequently so blocked with floating masses of the plant that navigation was seriously impeded, and the rafting of logs, on which the lumber industry was dependent, was at times entirely stopped.

I read both things. I did not read simply about rafting logs. I said that navigation was impeded and the rafting of logs was entirely stopped. That is the trouble with the gentlemen on the other side, that they will pick out one little thing, and because they think that separate thing is to be criticized, they magnify and enlarge and make that the whole picture instead of recognizing that it is but a flyspeck on the picture.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. TREADWAY] has expired.

Mr. STAFFORD. Mr. Chairman, the opponents of this bill do not lodge their objection to it on the ground that they are opposed to having all the present projects maintained. I question whether there would be one vote in this House in opposition to voting the necessary six or seven million dollars to keep the existing projects in a condition of maintenance, but we do contend, and contend strenuously, that it is a waste of effort to go ahead on new projects which will not add during the period of the war one ton to the transportation on our waterways. Time and time again in this discussion reference has been made to the statement that the railroads are congested. They are congested, and they are unable to carry the freight of this country, not because there are not adequate rail facilities, but because there is insufficient motive power and rolling stock. What the railroads of this country need to-day, and will continue to need, are more locomotives and more cars to carry the freight.

And any business man, any business corporation, having before them for solution this transportation problem that is confronting the country at the present time would not utilize the energies of the engineering force to the extent of thousands of skilled engineers and expert workmen in survey of projects which are obviously of no value at all, but they would conserve those forces in other lines of employment necessary to our Army preparedness and would utilize the money appropriated in this bill, something like $30,000,000, in the building of additional barges and ships to utilize our present waterways rather than providing for deepening of channels which will not during this war add one additional ton to the freight-carrying facilities of the country. True, Mr. James J. Hill said that the railroads were becoming congested, and his far-seeing vision recognized, as that of Mr. E. H. Harriman, that wonderful railroad magnate, to the necessity for more freight cars and greater strength of locomotives to carry the mobile freight of the country.

Those men at this time would have planned the construction of barges and ships rather than wasting money on the deepening of the channel of the Missouri River and these other channels, which will not during the period of the war carry any additional tonnage. Build ships, build more barges, and utilize this $26,000,000, utilize the men in this engineer department in other lines of employment, rather than to have them engaged on surveys that will never be reported favorably, when their services are more necessary for the welfare of the Government.

Mr. BOOHER. Would the gentleman advocate the building of river boats and barges and not improve the rivers?

Mr. STAFFORD. I would advocate, just as Gen. Goethals is advocating to-day, the building of ships in order to take the place of those ships that are being sunk by the submarines. What we need on these streams are more vessels, and it is admitted that even under existing conditions those barges can not be built and additional vessels can not be built to ply these streams because all the existing facilities are being utilized in the building of ships and the building of engines needed for the transportation of our supplies on the high seas.

That is the practical business question, namely, how to use the millions of dollars we are appropriating here and conserve and marshal the forces of these engineers who are needed in other avenues rather than in merely Government surveys of national projects that will never carry any tonnage whatsoever.

Mr. BOOHER. Why do you advocate the building of barges for river transportation when you would abandon the rivers?

Mr. STAFFORD. I started out by saying that everybody here favors the appropriation of money for the maintenance of these projects, but not for spending millions of dollars for new projects that will not add one ton to the river tonnage of the country during the pendency of the war.

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

The Clerk read as follows:

Atchafalaya River, La.: For maintenance, $20,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. It seems to me time to discuss the question.

Mr. SMALL. Will my colleague permit an interruption?

Mr. MOORE of Pennsylvania. I will.

Mr. SMALL. I ask unanimous consent, Mr. Chairman, that the debate on this paragraph and amendments thereto close in five minutes. Will five minutes give the gentleman time?

Mr. MOORE of Pennsylvania. I would like the gentleman to be a little more liberal just now.

Mr. SMALL. How much time?

Mr. MOORE of Pennsylvania. Make it 10 minutes.

Mr. SMALL. I ask unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, I would like the members of this committee to take a bird's-eye view of the geography of the United States and to do it seriously and apart from much of the badinage that has characterized the discussion of this bill thus far.

The United States is one of the best-watered countries in the world. The Mississippi River is 2,500 miles long from the Lakes to the Gulf. It has tributaries 2,000 miles long. The Atlantic coast has upward of 140 rivers leading to the sea. Every one of these rivers traverses territory that is more or less fertile and capable of food production.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Illinois?

Mr. MOORE of Pennsylvania. I will yield.

Mr. GALLAGHER. You mean this country is going to be the best-watered country?

Mr. MOORE of Pennsylvania. I mean to say that this country is to-day the best-watered country. [Laughter.] Under the present administration, if the gentleman wants to be political, we are traveling on the water wagon, and, as recent developments have shown, very much to the chagrin of the gentleman from Chicago. [Laughter.]

But if you will consider seriously the geography of the United States, you will observe that we have the best-watered country in the distribution of our streams. In the area of the thirteen original States where we have one-third of the population of the country and one hundred and forty-odd rivers leading to the sea, we do business on one-fourth of the railroad mileage of the United States. That is not enough.

Now, what do gentlemen argue who want to defeat a river and harbor bill? Do they insist that we shall not utilize the God-given waterways of the United States; that we shall not improve them; that we shall let them run to waste and be of no avail? Or are they contending that we shall use only one means of transportation, namely, the railroads? Is it the railroads that these gentlemen are arguing for when they contend against the river and harbor bill? Do they mean to stop transportation by water in the United States, or are they seeking to destroy this bill on the ground that it is not a war measure, and that it ought to come up at some other time?

If the latter is their proposition, I commend to them that war bill which was one of the first passed by Congress, which provided for the organization of a Council of National Defense; I commend to them the several clauses defining the duties of the Council of National Defense, one of which is to use and commandeer, if necessary, the railroads of the country, and another—and I quote literally—"the utilization of the waterways of the country."

Gentlemen ask if this is a national-defense measure. Go right to your Council of National Defense bill, for which you voted, and you will find that you provided therein that this great body, which was supposed to commandeer the food products of the country and centralize the industries, was instructed by Congress to utilize the great waterways of the country.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield to my friend from Illinois.

Mr. McKENZIE. I simply wish to ask this question: In speaking of the Council of National Defense the gentleman spoke of its being authorized to utilize the railroads and the waterways of the country. The gentleman would not mean to say that they were to build a new railroad or dig a new canal, would he?

Mr. MOORE of Pennsylvania. Yes; if necessary. Of course, if for the purpose of promoting war it would be necessary to take and destroy a canal, that could be done; and if it were necessary to build a railroad, yes; if necessary to destroy a railroad, yes. That is what the Council of National Defense is for; and it has been done time and time again, as my friend from New York suggests, in previous wars of the United States.

Gentlemen argue against the river and harbor bill as if they thought it was an iniquity, and some gentlemen have even used that very term as applicable to this bill. If they really mean that, then they mean that we shall use only the railroads for transportation; and if it should happen, as it has happened in numerous instances, that the railroads can not carry the freight made necessary by the exigencies of the war, then we shall let the freights stand and our Army shall be helpless for want of supplies. Distinguished Army engineers have asked this plain, blunt question: If you are to send the boys to the trenches and our men are going abroad to fight, what are you going to do at home to support them? Are you going to say, like a dog in the manger, that because you have not enough railroad cars, therefore you will not use the waterways, and the supplies shall remain behind and useless?

That is the effect of the argument used by those who would destroy this bill. There can be no other argument, even from the Illinois viewpoint, unless you hold the apparently chimerical notion that you may be able to make Chicago an international port by using the Canadian canals. If you propose to get this foreign and international trade, well and good. That looks like a dream, though in a thousand years it may come true.

I want to suggest to those gentlemen who want to destroy waterway traffic and who have been arguing here for exclusively railroad traffic—I want to call attention to the fact that the report of 1910 shows that the water-borne freight of the United States amounted to 177,000,000 tons. That is a pretty large amount of freight. If that meant men to be gotten to the front because the railroads were not sufficient to carry them, it would be mighty important. If it meant supplies it would be equally important. If it meant arms and ammunition and heavy or bulky freight which the railroads can not carry, even lumber in these days to build cantonments, it would be a very important matter. You must remember that waterways are the natural heavy-burden bearers and the capacity of the railroad cars is limited. As against that 177,000,000 tons of freight carried by water in 1910 the railroads carried 218,000,000,000 tons per mile, a very much larger amount. But why destroy the 177,000,000 tons carried by water, or the twice or three times that much that could be carried more cheaply than it can be carried by rail if you will only improve the waterways?

James J. Hill in 1907 indicated clearly what the trouble would be if we did not improve the waterways at once. He was the greatest railroad magnate of his time, a man for whom, I am inclined to think, some gentlemen on this floor are inclined to approve as an expert. In 1907, when there was just as much a car shortage as there is to-day, though the exigencies of war did not exist, Mr. Hill made an address in which he said:

> The railroads have prevented an actual blockade by increasing their equipment, while using more powerful engines and larger cars—

The very argument the gentleman from Wisconsin [Mr. STAFFORD] has made—evidently he read this address—

> And by such increased efficiency in operation as to raise the carrying power of each mile of road. But this process has reached a practical limit. I showed them that the deficiency of our national transportation system could be corrected only by building more track. Merely to accommodate existing traffic, I estimated that we would need to build 75,000 miles of new track, costing, with terminals, $5,500,000,000, or an outlay of $1,100,000,000 a year if the work were spread over five years. I pointed out the immensity of the physical problem in securing space for enlarged terminals, material, and labor for such construction, and the financial problem involved in securing such advances in cash and credit. And my conclusion may be quoted here, bearing, as it does, directly upon the object and labors of this body: "Two remedies may be found. The prohibitory expense now attached to enlargement of terminals at many points, and the absolute lack of available space at any price, may be met by a decentralization of traffic. There must be more points for export, more interior markets. A 15-foot canal or channel from St. Louis to New Orleans would go further to relieve the entire Middle West and Southwest than any other work that could be undertaken. With such a depth of water a single powerful tugboat, equipped with barges, would carry from 30 to 40 trainloads."

Now, gentlemen, in all fairness, has there been a perceptible increase in the construction of railroad mileage since 1907?

Mr. LONGWORTH. Will the gentleman yield for a question?

Mr. MOORE of Pennsylvania. I yield to the gentleman from Ohio.

Mr. LONGWORTH. Can the gentleman state what the price of steel rails is to-day as compared with a year or two ago?

Mr. MOORE of Pennsylvania. I can not give exact figures, but it is very considerably higher, I will say to the gentleman.

Mr. LONGWORTH. I understand steel rails to-day are $55 a ton, or more than double what they were two years ago.

Mr. MOORE of Pennsylvania. That argues that freight rates must continue to rise——

Mr. LONGWORTH. Precisely.

Mr. MOORE of Pennsylvania. And that the capacity of the railroads must be increased, or that there must be relief for the railroads, just such as Mr. Hill, the great railroad manager, was appealing for in 1907. Now, let any gentleman who is arguing against this bill, any friend of the railroads who is opposing water transportation, arise and tell this House whether or not the railroad capacity to carry the products of this country has increased materially, or in proportion to the increased production since 1907. If he can successfully show that I will agree that there may be something in his argument for the closing up of the streams of the country. But unless he can show that he is arguing against the development of the United States, against the full production and distribution of the food supply of the country, and in the last analysis, perhaps, against the men at the front who must be supported by the transportation of this country. That is the proposition it seems to me that is involved in the passage or defeat of this bill. [Applause.]

The Clerk read as follows:

> Harbor at Sabine Pass and Port Arthur Canal, Sabine-Neches Canal, and Johnsons Bayou, Louisiana and Texas: For maintenance, $110,000; continuing improvement of Sabine Pass and Port Arthur Canal, $300,000; in all, $410,000.

Mr. FREAR. Mr. Chairman, I move to strike out the last word. In reply to what the gentleman from Pennsylvania has just stated, and in order to have it in close connection with his remarks, let me suggest that $32,000,000 balance to the credit of these various projects remain on hand, in round numbers, according to the Army Engineers' Report. That is shown by the minority report. Let me read also from page 5 of that report:

> The minority are convinced that the only items that can be justified at this time are of two classes. First, items of maintenance for meritorious projects that would retain the present channel depths or are of such commercial importance as to require continual attention. Second, such harbor improvements as are of value and importance in the general plan of better preparedness, considering both the commercial requirements and naval needs.
>
> Unless the bill is materially amended along the lines suggested in this report, the minority of the committee believe that no rivers and harbors legislation should be passed in this critical time of our national life.

That report is signed by seven members of the committee.

Now, every man on this floor knows that not one proposition can be stricken from this bill. Every Member who has a project will stand with the others. Ordinarily so. Is it not our experience in the past? The gentleman says, "Why not appropriate for these rivers?" We have. On the Mississippi River we have spent $150,000,000, and the commerce has decreased 90 per cent in 40 years. The same decrease in actual freight may be said to be true of the Ohio and of the other rivers. The commerce has substantially decreased. It is not a question of the navigability of the rivers. We are willing to make the appropriations for these rivers; we are willing to make appropriations for canals if need be, if you can show that they are of value to the Government; but in this crisis, when the people of this country are being taxed as never before, when we talk and prate about the men at the front who are fighting our battles, we members of the minority say to you it is not right to spend $20,000,000 to buy up a canal, as proposed by this bill. That is what we say, and we can take up item after item of the same character and show to you that they are not for the furtherance of any war preparations that the great majority of these items have been put into the bill, but only five items alone have been proposed by the Army and Navy board as necessary, and only one of these, the Hell Gate project, has any comparative merit. In that project, Col. Newcomer states, a channel of 40 feet depth exists to-day, sufficient to move 33-foot battleships.

Mr. FOCHT. I understood the gentleman to say that notwithstanding this enormous appropriation there had been no increase in the tonnage of the rivers?

Mr. FREAR. There has been a 90 per cent loss according to statistics.

Mr. FOCHT. There have been half a dozen dams put into the Ohio River. Has not that work in any measure stimulated commercial activity on that waterway?

Mr. FREAR. Not according to the estimates as far as we get them from the Army Engineers, and their statement of the traffic is all we have. About 30 dams have been constructed thus far without any results.

Mr. Chairman, the members of the minority are not opposed to river and harbor legislation. I want to say that we do propose and we do urge that the channels be kept open for anyone who wants to use them, but we do not propose, as the gentleman says, to put in every project. Some gentlemen would like to put $100,000,000 annually in these river and harbor bills. We do not propose to do that unless we can see some material necessity at this time, because unless it is necessary it becomes waste.

Mr. MEEKER. May I ask the gentleman from Wisconsin how much time he has given to the investigation of the railroad manipulation and terminal facilities over routes on the rivers?

Mr. FREAR. I will say that the railroads of the gentleman's own town across the river own practically the whole river frontage, and that that land ought to be condemned and thrown open to the country at large before we continue river improvements. That is on the other side of the river from the gentleman's town. On his side—St. Louis—they are trying to improve the terminals, and are doing a good work.

Mr. HARDY. Would not the gentleman from Wisconsin be the first man in this House to object to any effort to condemn and pay money for these things on the ground that they were not needed?

Mr. FREAR. Unless there was an appreciable amount of commerce, I would. But until that necessity arises I would not, and for years the commerce has been decreasing 90 per cent of what it was 40 years ago.

Mr. HARDY. If, as the gentleman contends, the commerce has been decreasing, why would not the gentleman spend money on those rivers?

Mr. FREAR. We have spent millions and millions of dollars on them without result.

Mr. MEEKER. Mr. Chairman and gentlemen, I want to say something in connection with what has been said by the gentleman from Wisconsin. Since he began his remarks I have asked that the speech which I extended in the RECORD the other day shall be brought here so that I can get the telegram that was sent by the mayor of St. Louis showing what we are now doing for river improvement. What the gentleman from Wisconsin has been mentioning all the time in these debates in regard to the amount of tonnage on the river is true, but the peculiar thing to me is that the gentleman from Wisconsin, who is certainly a hard-working student on anything he starts out to dig up, has never given his attention to the question of terminal conditions for river traffic. Any man who rides these rivers knows that during the last half century, and especially during the last 25 years, the railroads have worked for the destruction of the terminal facilities for river transportation. We find, as will be brought out in debate on this bill before we get through, that the objection would not stand for a single moment if we went into the question as to what the railroads along the Erie Canal have done in order to get control of the elevators and terminal facilities along that canal. Gentlemen, you are going to make the Mississippi and the Missouri Rivers usable to this Nation. You will not do it this time, but the time is coming in this House when you will not vote for a few millions; you will vote for a hundred millions for improvements. That river is not going to be abandoned. There is another problem that you face now, and that is one of reorganizing these terminal facilities. Let me read you the telegram from our mayor. This is dated June 11:

ST. LOUIS, MO., *June 11, 1917.*

Hon. JACOB E. MEEKER,
Washington, D. C.:

Replying to your telegram 8th, St. Louis river front 20 miles long, one-half privately owned, one-half publicly owned. For many years St. Louis has followed uniform policy of not permitting private usurpation of public 10 miles of front by long-term franchises, but has renewed expiring franchises and granted new rights by revocable permits, in order that river terminals might be established when required. Remaining 10 miles privately owned offer private capital ample room for unrestricted developments. City owns and operates a river-front railroad extending 8 miles south from north city limits. Has just acquired a 7-mile extension making total length 15 miles of river-front railway. Plans and estimates completed and next bond issue will include funds for further extension of city railroad along entire 20 miles and a partial belt line, making total length 25 miles. This river front and belt railroad will connect with all railroads and all docks and wharves. Its use will be permitted by all railroads and boat lines. To expedite interchange of river traffic, by special concession, city has enabled marine railway and docks for boat construction and repair to continue in business. This will accommodate handling out of water, nine 300-foot barges or steamboats simultaneously. City has acquired for public use former car-transfer incline to enable freight cars to be switched alongside and level with barges at all stages. To promote interchange of rail-river freight, city has built and equipped and provided for free use of boat lines a landing dock and warehouse 500 feet long, served by tracks and paved streets. City has appropriated funds, let contract for, and has under construction for completion during coming low-water season modern concrete docks and warehouses 1,000 feet long with railroad tracks and all modern elevators, cranes, gantries, inclined conveyors, and other devices for mechanical freight handling. City maintains 2 miles of paved river front for use of present boat lines at nominal license costs. Riverfront situation has been studied exhaustively and outline of future use of entire front has been worked out. Next bond issue will include necessary sums for further development at city expense of such river and rail terminals, docks, wharves, warehouses, and mechanical equipment as will take care of all river business. Present facilities will accommodate largely increased tonnage and city stands ready to develop its plans for additional facilities as fast as required. Many private industries and grain elevators now located and equipped to take advantage of river transportation facilities.

HENRY W. KIEL.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 13 minutes.

The CHAIRMAN (Mr. HARRISON of Mississippi). The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 13 minutes. Is there objection?

There was no objection.

Mr. MEEKER. Now, Mr. Chairman and gentlemen, St. Louis has for the last 10 years taken the Government at its word and is working for a change in the whole freight problem. We are struggling to get out of the grip of the railroads, that have been built for the disadvantage of the Mississippi Valley cities and to the advantage of other cities.

If my friend from Wisconsin would be as industrious in bringing into the House information in regard to the railroads in driving off the river traffic as he has in opposition to these measures, he would make a far more enlightening speech. This bill is not going to be given up. The men who stand here now and every time we propose to do something for the rivers, only point out the fact that there is less tonnage on the river, instead of showing how it was done, are unwittingly playing into the hands of the railroads and those who are aiding them in their efforts. We are not going to stand for it, and unless you get some other line of opposition you may just as well come down off the perch. This is only the beginning of things. You will find in a speech I put in the RECORD that because of potential possibilities along the river what it means to us in the great cities along the Mississippi and Missouri. For the last 15 or 20 years we have seen the stream of manufactures go to the water-line cities for no other reason than the large freight rates, and we do not intend to surrender on the floor of this House to the railroads of the Mississippi Valley and give up our rivers. [Applause.]

Mr. SWITZER. Mr. Chairman, the appropriation for the improvement of the rivers and the maintenance of our water service along the Gulf of Mexico is important from this fact, that the railroads coming from the South, like the railways from

all over the country, are congested and can not carry the freight. The gentleman from Wisconsin [Mr. STAFFORD] says to appropriate money to build ships. Why, are we not appropriating millions of money for the building of ships? What is the use of appropriating six hundred millions or a billion dollars to build ships unless we have the harbors for the ships to go into and to carry the products of this country to and therefrom? It will be a great advantage along the southern ports, especially to Louisiana and Mississippi and Alabama and all the Southern States, for the reason that if the vessels are allowed to go up the rivers a short distance and into the bayous, they can carry the freight which prevent the railroads to-day from carrying the food products. We want this water service to carry the railway ties, which is as much of a necessary as is the iron ore, and the railways from the South will be free to carry the food products. A ton of railway ties is of as much value as that of a ton of iron ore in many parts of the country.

It is just as important to move that as it is to move iron ore. The gentleman from Wisconsin [Mr. FREAR] seems to be very much perturbed because he says it is impossible to have an item stricken out of this bill. Why? Perhaps no item ought to be stricken out of this bill. We can not help it because the gentleman is unable to convince the members of this committee that there is a bad project in the bill. What he needs to do is to gather up evidence and get some more assistance, and if he can convince this committee there is a bad item in the bill it will go out, and it will go out with my vote. The gentleman alludes to the Ohio River. He says that the freight upon these streams has been diminishing year after year, and I say to the gentleman that there is as much freight to-day on the Ohio River and all its tributaries as he can point out in any year of the past. The gentleman has put into the RECORD on two or three different occasions some comment upon the tonnage of the Ohio River, and he says it is only 4,000,000 tons, and when he gets down to the bottom of the page he says, "I desire to offer a brief statement of Ohio River traffic." He does not qualify or limit it, and what does he say? Then he turns to the traffic that is within the State of Pennsylvania upon the upper course of the Ohio River, and he points out that it is something over 4,000,000 tons. He could have taken the reports and turned back, and undoubtedly he knew where to turn, and he could have given this committee the annual traffic of the Ohio River, but he did not choose to do so. It was just as easy for him to give the correct traffic as to give what he did.

Mr. LONGWORTH. Mr. Chairman, will the gentleman state the amount of the traffic?

Mr. SWITZER. The traffic on the Ohio River, according to the last report we had, for the year 1915, was over 9,000,000 tons, and seven million and a quarter of that was traffic upon the river proper, and the other was that of ferriage.

Mr. LONGWORTH. Will the gentleman tell how many freight cars it would take to carry those 7,000,000 tons?

Mr. SWITZER. I can not recollect just at present.

Mr. LONGWORTH. I think I can tell the gentleman in round numbers. If you allow a carrying capacity to each freight car of 60,000 pounds, which I understand is a very large freight car, it would take something like 7,000 trains of 30 cars each to carry that traffic. In other words, it would be a case of running something like 20 trains per day during the year. Does the gentleman think that our railroads to-day have the facilities for carrying this amount of freight which the gentleman from Wisconsin seems to regard as negligible?

Mr. SWITZER. They certainly have not. I thank the gentleman very much for his information. I want to point out further to the committee this: That the gentleman alluded to the traffic of the Ohio River in the same speech that he puts into the RECORD——

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. SWITZER. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SWITZER. He makes a clear-cut statement here, and I want the committee to pay attention. The gentleman says on page 3819 of the CONGRESSIONAL RECORD that the traffic to-day is less than one-half, or possibly not one-tenth, of what it was 40 years ago. Does he know what the traffic upon the Ohio River was 40 years ago? If the traffic to-day is seven or eight million tons and it is only one-tenth of what it was 40 years ago, it would have been 80,000,000 tons 40 years ago. Think of this preposterous, this ridiculous assertion. Take him at the other horn of the dilemma. He says it is not one-half. If it is not one-half, then the tonnage of the Ohio River 40 years ago, according to the gentleman's statement, is sixteen to eighteen million tons; and I want to say to him that that is greater than the tonnage on the Ohio and all of its tributaries 40 years ago or even 20 years ago. I have taken the trouble to look up some of the statistics on this matter. Forty years ago about all that you could find was from three to four million bushels of coal passing down the Ohio River. The first known actual tonnage upon the Ohio River was something like six or seven million tons and to-day it is seven or eight or nine million tons. Recollect, if all of these criticisms are correct, the tonnage of 20 or 30 years ago included the ferriage, and the tonnage that I am giving you at this time is the tonnage exclusive of the ferriage. You should recollect also that while passenger traffic a few years ago—20 or 30 years ago—was four or five or six or seven hundred thousand annually to-day it is 2,000,000 annually, outside of the people who travel across that stream upon the ferries.

Why can not the gentleman be fair and make an accurate statement? The truth of the matter is that there was not over five or six million tons per annum on the Ohio River 40 years ago. Recollect, there were not as many people 40 years ago and there were not as many industries along that river 40 years ago. The gentleman asks in this same speech whether it reduces freight rates. I read from the report of the engineers, and, of course, it is unfair to charge up the cost of this improvement we are now making upon the Ohio River against the annual tonnage. A canal proposition is not worth anything until you complete the last link in it, connect up the last dam, and we are only halfway through with the construction of this project. But what do the engineers say? He could have read it on page 1212 of the reports of the engineers in 1916. In reference to the effect of the improvement he says:

> The great future benefit of the improvement will be felt only when the slack-water system has been extended far enough downstream to permit of continuous navigation at all times over a longer section of the river. It should be noted, however, that the large manufacturing concerns state that the certainty of coal delivery by water is a much greater advantage than the actual saving in cost, which has heretofore been computed as varying from 30 to 50 cents per ton in favor of water transportation.

That was before him. Now, this is the last report, you know:

> The nature of the commerce in recent years remains about the same, and no material change in lines of transportation has been made, so far as known. About 57 per cent of the tonnage for the calendar year 1915 was coal and the remainder miscellaneous freight.

Where the gentleman gets it into his head there has been a great decrease of freight tonnage on the Ohio River is perhaps the package tonnage. There is not as much package tonnage upon the Ohio River as probably there was 30 or even 20 years ago, but there is more low-grade freight.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. DIES. Mr. Chairman, it hurts me nearly as much to take up the time of the committee as it does the committee itself, but I want to tell you that for years and years, a number of years at least, we have sat here in the House and quietly, in order to expedite the business of Congress, we have allowed the gentleman from Wisconsin [Mr. FREAR] and other gentlemen equally reckless in their statistics to send out propaganda broadcast throughout the country, and the result is that now the harvest is coming in. It is coming into the gentleman from Wisconsin [Mr. FREAR] in the shape of favorable newspaper notices which he crams into the CONGRESSIONAL RECORD, which will cost the people, the taxpayers of the country, hundreds of millions of dollars to print and take the rural carriers of this country many rounds with bended backs to carry the hundreds of thousands of pounds of newspaper clippings favorable to the gentleman from Wisconsin because of the fact we sat here docile years ago and allowed him to put—well, I do not know what to call it, I do not want to be unparliamentary, but they are not facts at least. Now, this is a fact. If this Congress had taken time two or three years ago to cut this political fiasco in the bud, taken the wind out of these blustering sails—why is not the English language sufficiently large to describe it without being unparliamentary? [Applause.] I can do it, but I am afraid it would be unparliamentary.

Mr. LONGWORTH. Mr. Chairman, I ask unanimous consent the gentleman may be permitted to proceed out of order. [Laughter.]

Mr. DIES. Take my friend FREAR'S statement about the Sabine River. That has gone forth to the millions of readers who, gasping, anxiously were waiting for the RECORD to read FREAR'S speech. He said the river was worthless, and then here in the presence of 40 or 50 Members he retracts, and his retraction will not go to the millions of gasping, expectant readers who are awaiting these speeches. Now he says he meant the upper Sabine River. I have lived in that country all my life

and never heard of the lower or upper Sabine River. I have heard of the Sabine River. That river carries millions of tons of commerce and great shipbuilding plants dot its shores; but, on account of men like our friend FREAR, the people were compelled to put in dollar for dollar with the National Government in order to get the Government to do its duty, in order to make it a port. He said it would not do any good. The people of this section built the Port Arthur Canal and gave it to the Government, and now it carries 7,000,000 tons and is the tenth or eleventh port of the United States in point of tonnage. When we were going up the Neches to Beaumont and Sabine to Orange, men like FREAR said these rivers could not be used because they were so crooked.

Mr. MOORE of Pennsylvania. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. I hope the gentleman will proceed in a parliamentary way and address the gentleman from Wisconsin as the gentleman from Wisconsin.

Mr. DIES. The gentleman from Wisconsin——

Mr. MOORE of Pennsylvania. The gentleman is referring to the gentleman from Wisconsin by his proper name, which is improper under the rules.

Mr. DIES. I want to call him by the properest proper name that I can properly think of always.

Mr. MANSFIELD. Will the gentleman yield?

Mr. DIES. I have only a moment. Men like Mr. FREAR, from the State of Wisconsin, United States of America, when we were trying to get an improvement at Beaumont up the Neches River and the Sabine River up to Orange, said, "You never can do it; it is too crooked and worthless." The result of such speeches by such gentlemen as the gentleman from Wisconsin was that the people had the burden of putting in dollar for dollar to do a public service for the people of the United States, with the result that those ports are doing to-day a great commerce, and they have not been open 12 months, not 18 months until the 30th of June. They have been doing a business of millions of commerce, which men like my friend Mr. FREAR, of the State of Wisconsin, United States of America, said would be entirely worthless.

The people along these waterways have spent millions of their own money to build these waterways, and the Government is getting the principal part of its fuel oil from these ports that the people had to build and give to the Government. The Government is getting the lumber on those streams to build the merchant ships that you are talking about. You ought to introduce a bill in this Congress, Mr. FREAR, of Wisconsin, to refund the people the hundreds of thousands of dollars they have spent, so as to overcome criticism such as yours, out of their own pocket.

I will tell you. You talk about this bill not being a war bill. The hyacinths grow right along that stream where they are building the vessels that are to carry the commerce to our allies and save the war with Germany. You say it is all right as a war measure to build a ship, but when the committee proposes to take obstructions out of the river where the ship must float you say that is pork barrel. Gentlemen, it is immoral to carry on that campaign against one of the country's great essential improvements in time of war as gentlemen are carrying it on against this river and harbor bill. [Applause.]

The CHAIRMAN. The gentleman's time has expired. All time has expired on this paragraph.

Mr. WATKINS. Mr. Chairman, I desire to offer an amendment, and the proper place in the bill is before the next section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. WATKINS: Page 17, after line 17 and before line 18, after "$410,000," insert "$50,000 for the installment of the Seawell system of revetments on Red River in Louisiana.'

Mr. WATKINS. Mr. Chairman, a few days ago, after the rivers and harbors bill had been framed and after it was too late for the members of the Committee on Rivers and Harbors to investigate this proposition, by special request I filed a bill asking for an appropriation for the purpose of installing this Seawell system on Red River.

I will state in a few words that this is a system which is almost contrary in its operation to the regular system adopted by the United States engineers for placing revetments in navigable streams. In other words, the object is to place willow mattresses and other mattresses in the stream so as to catch the silt in the slack water instead of catching it in the water as it comes down the stream. This has been tried at Shreveport, La., where the water was encroaching upon the city to such an extent as to threaten its destruction, and it proved effective. It was tried at the town of Lenzburg, on the Red River, and also proved effective there. The Army engineers have antagonized it. I have introduced a bill, and I think when the vote is taken in the committee the amendment will probably be adopted, but I call the attention of the House to it so that when the Rivers and Harbors Committee prepare another bill they will be prepared to investigate the proposition which is now submitted.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Louisiana [Mr. WATKINS.]

The question was taken and the amendment was rejected.

The Clerk read as follows:

Red and Sulphur Rivers, Ark. and Tex., and Cypress Bayou and Waterway between Jefferson, Tex., and Shreveport, La.: For maintenance, $5,000.

Mr. FREAR. Mr. Chairman, three gentlemen have addressed themselves to me, and, of course, I can not ask the indulgence of the House sufficiently to answer fully the different gentlemen. I would like to do so if opportunity afforded, notwithstanding I do not ordinarily reply to personalities indulged in and the methods pursued, particularly by the gentleman from Texas [Mr. DIES], who criticizes me and directs his attention to me without even giving the courtesy of the parliamentary use of my name. He says I am the cause of this opposition and he regrets he did not stop this opposition at the outset.

It is unfortunate that he sat in the House all these years and did not realize until this time—until he just got on the Rivers and Harbors Committee—the importance of the "gentleman from Wisconsin" who has been consistently opposing these river and harbor measures, three out of four of which failed to pass the Senate.

I wish to read from Mr. Callaway's statement before the House. He was a Member of this House last year and a very able man, as we all know.

He was reading to the House from a letter written by Mr. R. W. Guyler, a president of several banks in Texas and a man of standing in that State. Here is what Mr. Guyler says, after describing the Brazos River, the one that the gentleman from Texas [Mr. DIES] has stood for every time. Guyler writes:

No patriotic American can continue to support such heartless graft.

I am reading from page 5670 of the CONGRESSIONAL RECORD of April 7, 1916, which contains the personal letter from Mr. R. W. Guyler. He says—I repeat Mr. Callaway's remarks and the letter:

SPENDING $2,000,000 FOR "WATER AT TIMES."

Mr. CALLAWAY. Oh, there is some water. You can find water at times. [Laughter.] Here is an interesting letter concerning the Brazos put into the RECORD April 7, 1916, by the gentleman from Wisconsin [Mr. FREAR]. The writer, Mr. Guyler, is president of a bank, as well as vice president of other banks, and connected with other business interests:

WALLIS, TEX., *January 26, 1916.*

Hon. JAMES A. FREAR,
Washington, D. C.

DEAR SIR: Noticing in the press our attitude respecting appropriations toward improvement of various streams and more particularly those applying to the Brazos and Trinity Rivers of Texas, I felt constrained to write you expressing my complete approval of your course. I am a native Texan, born and raised within 2 miles of the Brazos River; am 50 years old. My father and myself have owned land bordering on the Brazos for 58 years. I now own one tract which borders river for about 3 miles. I beg your pardon for mentioning these items. It is done to evidence my familiarity with the subject. The Brazos is an alluvial-banked stream; easily caves in banks. The work the Government has done and is doing is so utterly useless that it is contemptible and farcical, and, apart from the absolute, complete, total, utter waste of such appropriations, engineers have made regulations which are costing the people along the banks of said streams large sums of money.

I will mention two: If I should put in a ferry, I have to raise my cable 60 feet above low water; 40 feet ordinarily would do. This additional height necessitates longer cables and stronger and more costly posts for elevating. The same applies to bridges. It has cost the people of Fort Bend County at least $40,000 excess to erect four bridges across the river, and this same expense will apply to every bridge and ferry from the mouth to Waco. The reason given for this is to allow height sufficient to clear steamboats. Now, I have lived on Brazos for 50 years and my father since 1858, and never in all that time has there ever been a steamboat either up or down, except the Government snag boat and possibly one or two small gasoline boats sent out by Waco boosters to prove the navigability of the stream. I am not a civil engineer, but I believe it would be cheaper to dig a canal from the Gulf to Waco than attempt to deepen the Brazos; and if an honest, capable engineer would investigate, without being wined and feted by those interested, it would be overwhelmingly defeated. Our politicians seem to be governed by those who make the loudest noise, and the common people have no horns or bands or champions.

I wish you every success. No patriotic American can continue to support such heartless graft. We educate our children that it is proper and commendable to steal from the Government. You are welcome to use my name.

Yours, respectfully, R. W. GUYLER.

Now, Mr. Chairman, I would suggest to the people of Texas that here is an honest man, a man who shows statesmanship, for his home country, and will be a good candidate, in view of the vacancy which may occur, as I am informed, in that district. [Applause.]

Let me repeat Mr. Guyler's concluding statement:

No patriotic American can continue to support such heartless graft. We educate our children that it is proper and commendable to steal from the Government. You are welcome to use my name.

That is his statement regarding the Brazos River in Texas.

Now, I have not made those statements. That is from a man who lives on the Brazos River, and Mr. Guyler's statement was repeated and argued and supported by Mr. Callaway, of Texas, at that time. Mr. Callaway and Mr. Guyler, who know the Brazos, give that estimate of that river and the Trinity River.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes.

Mr. HARDY. Does the gentleman indorse that statement, that we educate our children that it is proper to steal from the Government?

Mr. FREAR. I should hesitate to make that statement. I am quoting, however, eminent gentlemen from Texas on the subject, both Representative Callaway and Mr. Guyler.

Mr. HARDY. Why does the gentleman read it if he does not believe it?

Mr. FREAR. I want to show how unfair the gentleman from Texas is. This is the kind of information furnished from the gentleman's own State. I am referring to Mr. DIES, of Texas.

Mr. HARDY. But the gentleman read that statement without a word of disclaimer.

Mr. FREAR. I leave the House to judge of Mr. Guyler's estimate. It is not fair for gentlemen in the House to assail me and not give me a chance to reply.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Pennsylvania?

Mr. FREAR. I can not unless I get more time.

The CHAIRMAN. The gentleman declines to yield.

Mr. FREAR. Mr. Chairman, I ask that my time be extended to 10 minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that his time be extended to 10 minutes.

Mr. MOORE of Pennsylvania. Reserving the right to object, I asked the gentleman to yield.

Mr. GALLAGHER. I ask that the gentleman be given 10 minutes.

Mr. SMALL. The gentleman from Wisconsin means 10 minutes, including the time he has already used?

Mr. FREAR. Yes.

Mr. SMALL. Does the gentleman from Illinois desire some time?

Mr. GALLAGHER. I want 10 minutes.

Mr. SMALL. Then, Mr. Chairman, I ask that the time be extended 15 minutes, including the time that the gentleman from Wisconsin has already used.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. MOORE of Pennsylvania. Now, will the gentleman yield?

Mr. FREAR. Yes; certainly.

Mr. MOORE of Pennsylvania. I think the gentleman will admit that it is not fair to read an anonymous letter reflecting on Congress or Members of Congress.

Mr. FREAR. This letter was commented upon by Mr. Callaway, of Texas.

Mr. MOORE of Pennsylvania. The name is given?

Mr. FREAR. Yes; the name is given. The name is R. W. Guyler, president of a bank in Texas. It was read before, with approval by Congressman Callaway, of Texas. It is signed by Mr. Guyler.

I made the statement respecting the Ohio River from information I had had from some of the best men I have known who have discussed the Ohio River, men who have known it and who have run it, I understand, in past years; and I reiterate the statement that probably not 10 per cent of the old actual freight traffic exists, excluding coal on that river, not nearly the commerce that existed 40 years ago.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

Mr. FREAR. I regret I can not yield. The gentleman takes the tonnage of the Ohio River in Pennsylvania, 4,000,000 tons, and then again includes the same tonnage all the way along the river. Remember half that tonnage also is sand and gravel hauled several miles. That has been the procedure from time to time—to add lockages and add the tonnages that go down the river. Now we are adding the ferriage. I had the RECORD here just a moment ago, showing that 10 per cent of the traffic on the Ohio River, open river and lock traffic, was lost during the two years from 1913 to 1915. This is the last report. That is given on page 352 of the committee report. But a great difficulty comes in discussing the value of improvements from the fact that much of this tonnage existed before any part of the $60,000,000 was spent by the Government, and much of that commerce went down the open river just as it does to-day. I repeat that the actual Ohio River business, according to the best information I can get, was much larger in the past than it is to-day. One-half is sand and gravel and 95 per cent of the balance is coal. It just drifts down the river as it did 40 years ago, and no one buys coal any cheaper.

I have made frequent analyses of this commerce in the past. What I did was done in good faith, and there was no answer that could be made to it. The commerce is decreasing. I took the various items of tonnage and showed what it consisted of. There was very little, comparatively, going through the locks, and that only averaged a 26-mile haul on a river 1,000 miles long. The gentleman from Missouri [Mr. MEEKER] questions this opposition, which he says helps railways. The gentleman from my State [Mr. LENROOT] will say that I have worked hard in my own State of Wisconsin and done some work in securing a railway commission for that State and in controlling the railroads of that State. I had charge of that bill when it was passed. I believe that the railroads should be controlled. Let me say that the gentleman from Wisconsin [Mr. LENROOT] deserves great credit for what we did there on that very same law governing the railroads. That is my feeling regarding the railroads. They should be controlled and prevented from driving commerce off the river.

Mr. HULBERT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from New York?

Mr. FREAR. I can not yield. I want to say that reasonable expenditures should be made on the rivers; but I do say that during recent years with these bills time after time we have been deliberately wasting money. Let me read to you here, if I may, the statement made by Mr. J. H. Bernhard, one of the best-known Mississippi River boatmen. It is found in the Appendix to the CONGRESSIONAL RECORD, under date of June 11, 1917, where I have placed his statement. I have been criticized because I tried to show you what public opinion is. I say this in passing: You demand to know what public opinion is. The chairman challenged us at the bar of public opinion, and you appeal on this bill to the bar of public opinion. I give you newspaper editorials on that very subject, any quantity of them. Some of them seemed to be so personal to members of the committee that I refused to give them. Others found in my speech of June 16, printed in the Appendix, serve to show you what public opinion is. We are challenged to show what public opinion is, and then we are criticized for showing it. The country is against this bill, and it ought to be defeated. Here is what Mr. Bernhard says about the Mississippi River:

> To-day the Mississippi from St. Louis to its mouth affords a channel which is the best to be found in any stream in the world * * * and see its emptiness. An 8-foot channel is all that the most efficient service requires. The Government works unremittingly to develop waterways, only to see the water-borne traffic grow less as the years go by.
>
> Still, the average river man will insist the poor condition of the channels keeps our inland waters idle. This is preposterous: the Rhine could never compare with the Mississippi in its advantages for transportation; its channel is narrower and shallower, more changeable, the current is swifter, and ice is known in the winter over its entire navigable length, yet in 1913 more than 97,000 vessels passed the Dutch and German frontier on the Rhine.

Can any statement be broader or more pointed than that?

It is shown by these tables in my speech of June 11, compiled by the St. Louis Chamber of Commerce, that the traffic decreased 90 per cent in the last 30 years. We are trying to show you where the money goes—is wasted—the money that belongs to the taxpayers of the country. Do not let us waste it unless you can show where we will get some returns. I do not believe there is a member of the committee—not one of those who signed the minority report—who will oppose proper appropriations. We should allow the channels to be maintained by a sufficient sum. We have not opposed doing so. Beyond that we say we give to the President of the United States the right to say what projects are necessary at this time, and you voted it down. Why did you not agree that the President of the United States should say whether these projects were right, surrounded as he is by the Government engineers? We offered you gentlemen on the Democratic side that proposition twice. We are going to offer it again. Why do you not permit him to strike out some of these bad projects? You are going to have the privilege of voting upon it again.

I did not expect to say anything particularly on the bill, but there have been constant assaults upon myself, and they have prompted me to attempt in a brief way to answer. I wish I had half an hour in which to answer. If I had, I would try the best I could to give you a correct statement and to show you where this bill wastes millions of dollars.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. GALLAGHER. Mr. Chairman, I should become somewhat suspicious of myself if I thought anything I could say would change a single vote that will be cast for the passage of this bill. I am one of the Members who signed the minority report. I gave my reasons for so doing in the general debate on the bill. I believed then and I believe now that we would be doing a judicious thing if we could save for war purposes the $26,000,000 that I expect will be spent in the improvements of rivers and harbors if this bill is passed. I want now more particularly to address myself to some of the remarks that have been made here, and the arguments that have been presented for the passage of this bill as a war measure. Some of my friends here say that the bill is necessary and should be passed to bring down freight rates. They say that the railroads are opposed to river and harbor improvements. Another element here say that the railroads are so crowded and congested that they can not move the freight, and that we have got to improve the rivers to remedy that condition. I have been on this committee for a number of years, and in this House for a considerable time, and as I look back over those years spent here I remember the vast expenditures that have been made for the improvement of these rivers; it must be surprising to everybody to notice the increased commerce that has been brought about as a result of those large expenditures. How filled with wonderment the people must be who stand upon the banks of these rivers and see the increased traffic that has been brought about on our streams as the result of the millions that have been expended. It is peculiar, is it not?

I do not want to make any argument against the bill. In fact, I am afraid that if I sit here and listen to the arguments that are being made for the necessity of spending this money to accommodate the commerce of the country I will actually believe this bill is a war measure; yet I can hardly believe that the House thinks so. Why, my friend from Ohio talks about the coal traffic on the Ohio River, and the chairman of the committee referred to a report by the Federal Trade Commission, made here the other day, in regard to the coal situation; did they say anything about reducing the price of coal? Everybody who uses coal must be surprised at the great reduction in his coal bills that has been brought about by this increased river traffic, and the tons of coal that are being delivered now as a result of increased number of boats on our rivers. Everybody who has an ounce of sense knows that coal is controlled at the mines. The traffic on the railroads is controlled, and every consumer, when he deals with the retail merchant, knows that he has to pay for his coal the price that is set upon it by the manipulators of the coal market. Do you believe river traffic is going to bring a change in those conditions? Oh, no, my friends; you can not make any sensible man believe that.

My friend from Pennsylvania, Mr. MOORE, talks about Chicago not being an ocean port. Chicago was an ocean port a few years ago, and we had a line of boats running from Chicago to the old country across the water; but those boats had to be pulled off, and it was stated that the reason they were pulled off was because they could not get marine insurance, that the great ocean-going lines had control of the insurance companies that issued marine insurance, and that they would not extend marine insurance to that line of boats—the ocean lines would not stand for it—so they had to be pulled off. Talk about the railroads controlling the river traffic. Everybody knows that river traffic was destroyed through the influence of the railroads, and nearly all the water frontage at every port on every river now is blocked by the railroads so that it is almost useless for harbor purposes, and at every boat landing the docks and warehouses are controlled by the boats that make the landing, and the passage of this bill will not remedy conditions; to pass it is a waste of money.

The CHAIRMAN. The time of the gentleman has expired. All time has expired under the agreement. The Clerk will read.

The Clerk read as follows:

Red and Sulphur Rivers, Ark. and Tex., and Cypress Bayou and Waterway between Jefferson, Tex., and Shreveport, La.: For maintenance, $5,000.

Mr. SWITZER. Mr. Chairman, I move to strike out the last word. The gentleman from Wisconsin [Mr. FREAR] seems to chafe greatly when some of his statements come out into the sunlight of the truth, and he reiterates the charge that he has been told by a good man from the Ohio River Valley that the annual traffic of that stream is not one-tenth of what it was 40 years ago, but he does not give the name of that man. I cite to you the official records of the engineers of the United States Army, and their official reports. He undertakes to controvert those reports with the say so of somebody whose name we do not know. I want to say to him that he can not find a man on the Ohio River, a good man, who knows anything about the traffic on that stream, who will ever say that the traffic to-day is only one-tenth of what it was 40 years ago. Why, gentlemen, think of it. That would mean 70,000,000 or 80,000,000 tons a year when I say to you if you look up the official records of the water-borne tonnage of this country, ocean and inland, 40 years ago the total tonnage did not exceed 125,000,000 or 140,000,000 after eliminating all duplications, and it is impossible to suppose that 80,000,000 tons of that traffic was initiated on the Ohio River, with probably one-third of the people then living along that river who live there to-day and not one-third as many industries on the banks of the stream as there are to-day. Think of the preposterous statement and then call to substantiate it here a witness whose name is not given. Gentlemen, I dislike to consume your time, but we can not let such statements as that pass without challenging them.

The gentleman from Wisconsin [Mr. FREAR] says that the tonnage passing certain locks is not what it was a year or two ago. I wish you to understand that the tonnage that goes down the Ohio River is not registered at every lock. If it were registered at every lock, the figures would be duplicated, triplicated, quadrupled, and sextupled as it passed the various locks.

The tonnage that leaves the harbor of Pittsburgh that goes to Cairo or to Louisville is registered at the first lock and is not registered again. The tonnage that is made up between the first and second locks and passes the second lock is registered at the second lock and not registered again. To register it again would be a duplication. The system that they have in vogue to-day for taking the tonnage of the Ohio River is an accurate one, and if there is any tonnage between two locks that does not go through either, that is reported by the boat to the Chief of Army Engineers.

The statistical tonnage furnished by the Army Engineers' reports for the Ohio River prior to 1912 contained numerous duplications, and the Chief of Army Engineers found that the reported tonnage of the river for the year 1905 of 13,955,918 tons contained many duplications and that the annual traffic on the river for this period was approximately 9,000,000 tons.

Now, I think I can point out to you how the gentleman arrives at the conclusion that there is a falling off of tonnage at some of the Ohio River locks. When the war broke out there was a firm at Pittsburgh, Pa., that sold one or two million tons of coal abroad that formerly went down the river. After the war broke out in Europe they sold a great quantity of coal to Great Britain at $16 or $20 a ton, and made more money in a year than they had made the 10 years before, so I have been informed. They immediately made a contract with the Island Creek Coal Co., of West Virginia, which has a coal tipple below my city, at Huntington, on the Ohio River, to supply a great deal of the coal they formerly sent down the Ohio River from Pittsburgh. The Island Creek Coal Co. tipple I have just referred to has a monthly loading capacity of 150,000 tons of coal into barges on the Ohio River. Of course that is not registered at any locks on the Ohio River referred to by the gentleman from Wisconsin, but it is registered at the first lock below Huntington, W. Va., as the coal loaded in barges at Huntington, W. Va., all goes down the river from that point.

Mr. HUMPHREYS. Mr. Chairman, I move to strike out the last word. The gentleman from Wisconsin quoted John H. Bernhard as one of his witnesses.

Mr. SMALL. Will the gentleman from Michigan yield for me to make a unanimous-consent request?

Mr. HUMPHREYS. Yes.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this section and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. SMALL. If the gentleman will pardon me for one more statement. After we get through discussing this paragraph, can not we confine the discussion hereafter to the item?

Mr. HUMPHREYS. In answer to the inquiry of the gentleman from North Carolina, if it is addressed to me, I will say that I doubt it. Now, I have a telegram from J. H. Bernhard to me, which is a long telegram, and I will only read two paragraphs from it, and you will see that Mr. Bernhard, the gentleman quoted by the gentleman from Wisconsin is thoroughly in favor of river and harbor improvement.

The Inland Navigation Co., to reap the rewards we believe available to those that succeed, has placed to-day upon the western rivers at a cost of $123,000 its first floating modern electric-operated freight carrier, notwithstanding the impossible channel and shore conditions, in order to hasten the economical use of inland rivers, which is absolutely essential for the efficient transportation system needed in the United

States to reduce the cost of living and increase the opportunities and chances for successful competition in foreign markets. * * * General public now aware of the fact how badly it is in need of river traffic, but men like yourself must foresee what is coming and look into the future, and God knows you do not need to look far into the future now to realize how sadly we are in need of home economy by abandoning the waste as embodied in the emptiness of our rivers. I carried millions of tons of freight on foreign rivers at one-fourth the cost freight is carried in America by rail over same distance. Our rivers here are good and powerful, but their freedom is license and their untamed wildness dangerous.

INLAND NAVIGATION CO.,
JOHN H. BERNHARD,
President.

I simply quote that in answer to the quotation of the gentleman from Wisconsin, made from Mr. Bernhard showing that Mr. Bernhard is thoroughly in favor of the improvement of the inland waters of the country.

Now, I want briefly to call attention to some figures in answer to a good deal of criticism from gentlemen of the rivers appropriated for in this particular bill.

The rivers appropriated for in this bill last year floated a very considerable commerce. Not counting the East River, the commerce of which last year was valued at more than $4,000,000,000; nor the Delaware River, the commerce of which was $1,134,000,000 plus; nor the St. Johns, the commerce of which was $61,000,00 plus; nor the Passes at the mouth of the Mississippi, the commerce of which was valued at $368,000,000 plus; nor the Ohio River, the commerce of which last year was valued at $188,000,000; nor the ship channels in the Great Lakes, including the Detroit and the St. Marys Rivers, the Soo Canal, the commerce of which was valued at more than $1,000,000,000—not including any of these, the streams cared for in this bill last year floated a commerce of about 135,000,000 tons, with a value of more than $2,000,000,000.

Mr. HULBERT. Will the gentleman yield?

Mr. HUMPHREYS. I can not yield now.

Mr. HULBERT. I simply wanted to know if the gentleman excluded the Hudson River, which carried a commerce of $7,000,000,000?

Mr. HUMPHREYS. I did not include it unless it was in the East River. Now, taking these small rivers, they last year carried 135,000,000 tons.

Now, to reach the conclusion as to whether or not this bill is necessary as a war measure, let me say that it would take 135,000 loaded trains, each train carrying 30 loaded box cars, and each box car carrying 60,000 pounds, to carry the freight that was floated on these rivers last year.

Suppose that freight is not to be carried on the rivers—it must be moved—where are we to get in this emergency that is coming next year the 135,000 extra trainloads for freight which must be moved?

When gentlemen make these assaults on the bill in general terms I submit that they must answer that question. How do you propose to move this freight? We have not freight cars enough now in this war emergency to do the business of the country, and yet you deny the fact that the bill that takes care of the inland streams in this country which last year did the work of 135,000 trains is a war measure.

Mr. JAMES. Mr. Chairman, the gentleman from Ohio [Mr. SWITZER] did not quote quite correctly the gentleman from Wisconsin [Mr. FREAR]. What the gentleman from Wisconsin did say was that there was a good deal of difference between the freight that passed through the locks and open rivers in 1913 on the Ohio and the amount that passed through in 1915; that there was practically a million tons short. That is shown on page 352 of the report of the majority of the committee. In 1913 the amount of freight that passed through locks and open rivers was 8,412,603.8 tons; in 1914 it amounted to 7,589,161.5 tons, and in 1915 a still less amount, 7,346,357.8 tons.

This bill is supposed to be a war measure, because on page 2 of the report of the majority of the committee we find the following:

As the result of an effort to ascertain the opinion and wishes of Congress in this respect it became apparent that a large number of Members on both sides of the House favored limiting legislation at this session to emergency measures and such as were necessary in the prosecution of the war.

The report goes on then to speak about the Secretary of War and the Chief of Engineers, and finally quotes, on page 3, the Chief of Engineers as saying that there should be included such new projects as are intimately associated with the question of national defense in a military way. That being so, I can not understand why they have such rivers as the Red River and the Scuppernong included in this war measure. The gentleman from Wisconsin read a letter a little while ago from a gentleman in the Red River section. Let me read another letter—written about the same time—from that section of the country:

As a Red River planter, one who has spent 20 years on Red River, allow me to say (and it is the consensus of opinion of all my neighbors) that the improvement (?) of Red River this high up by snag boats is not only a farce, but actually detrimental to navigation—were such a thing possible—and to the land on the banks of the river. It is even a joke among the crews of the snag boats themselves. I will not go into figures and dates as to the number of boats navigating Red River, amount of money spent on it, etc., as you have all these at hand. But as for the good it does I can speak. There has not been a boat (except a snag boat) on the river here in six years, and the last one was a booster boat that went to Shreveport to prove that Red River was navigable this high up, and it went down on the biggest rise we have had since 1843. The crews of these snag boats quit at 4 p. m.

I wish you to know that this plantation has actually suffered from the work of the Government snag boats.

These snag boats are all right in their places, but this Simple Simon business is the limit.

I understand the work on the Trinity is even more foolish and wasteful of money.

If this matter is of interest to you, I will gladly get up some more facts for you. At any rate, I would be pleased to have you keep me posted as to the headway you are making in this line.

GEORGE T. WRIGHT.

On page 132 of the report of the majority, in respect to the commerce on the Scuppernong, it states that the commerce on the Scuppernong for year ending June 30, 1913, was 27,224 short tons, and for year ending June 30, 1915, it was only 9,448 tons. The committee states reasons as follows: "The decrease in tonnage below that of last year is due to the closing down of a sawmill." If closing down one sawmill would take away two-thirds of the tons of commerce of the river, what would the closing down of another sawmill do? And yet we are informed by the committee that this is a war measure.

I come now to the Tennessee River, $401,000, instead of $944,000.

Mr. MADDEN. Did the gentleman say Tennessee River?

Mr. JAMES. Yes.

Mr. MADDEN. What State is that in?

Mr. SWITZER. It is in three States.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. FREAR. Mr. Chairman, let me say first to the gentleman from Missouri [Mr. MEEKER] that I believe his statement is correct in regard to railroad secret agreements, and the House generally will agree with him that those agreements do exist, and they are difficult to overcome; but you will not reach the secret of the trouble by appropriating money lavishly or by pouring millions into these rivers. That will not reach the situation at all.

Again, referring to the gentleman from Mississippi [Mr. HUMPHREYS], he quoted from what Mr. BARNHART said. Mr. BARNHART is in favor of the improvement of the rivers. So are we all. We all favor the continuance of maintenance of the best river channel in the world—8 feet from St. Louis to the mouth of the river; but here is $100,000,000 already spent on the lower Mississippi, and here is what Mr. BARNHART said before the American Society of Engineers in 1915. I can quote what he said beyond what I quoted before:

Still the average riverman will insist that poor conditions of the channels keeps our inland waters idle.

I am repeating his statement, for that is just the argument being made here. He continues:

This is preposterous. The Rhine could never compare with the Mississippi in its advantages for transportation; its channel is narrower and shallower, more changeable, the current is swifter, and ice is known in the winter over its entire navigable length; yet in 1913 more than 37,000 vessels passed the Dutch and German frontier on the Rhine.

The commerce on the Rhine is over 40,000,000 tons in round numbers annually, or it was before the war, whereas our commerce on the Mississippi at St. Louis is down to 153,000 tons, counting all, according to the report of the St. Louis Chamber of Commerce. We have spent six times as much on the Mississippi as has been spent on the Rhine, and look at the miserable showing. Now, just one more suggestion: The gentleman from Mississippi [Mr. HUMPHREYS] referred to commerce. Read my speech of June 11, Appendix to the CONGRESSIONAL RECORD, where I have made an analysis of the upper Mississippi River that shows about one-half of all the commerce reported by the Army engineers on the upper Mississippi is brush, stone, and sand taken out of the river in so-called river improvement, and that of the total reported, 1,974,000 tons, practically nine-tenths is either ferriage or sand or gravel taken out of the river, some of it hauled 10 to 15 miles, the total average length of the river haul being 26 miles on the upper Mississippi River, after we have expended $28,000,000 on that part of the river. Can any further evidence be needed to show extravagance and waste than that result, with a loss of over 90 per cent of the river commerce while we have been wasting $28,000,000, or nearly that amount, in river experimentation?

The CHAIRMAN. The time of the gentleman has expired; all time has expired, and the pro forma amendment is withdrawn.

The Clerk read as follows:

Port Aransas, Tex.: Continuing improvement and for maintenance, $100,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word——

Mr. SMALL. Will the gentleman pardon me. How much time does the gentleman wish?

Mr. MOORE of Pennsylvania. Five minutes is all I desire.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in eight minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Chairman, the gentleman from Wisconsin, who is making a gallant fight against this bill, has drawn to his aid the gentleman from Michigan [Mr. JAMES], who sits at my left and who occasionally reads off some statistics that he has gathered from some report or other, or he reads from some letter from an individual who may have more or less interest in the proceedings. I do not know just why the gentleman from Michigan rises so often to the aid of the gentleman from Wisconsin unless it is that Michigan has been so well provided for heretofore in appropriations made by Congress that it does not need any further help. Michigan, you know, is situated up yonder on the Great Lakes, and it is represented in part by the gentleman from Michigan [Mr. JAMES], who is making constant attacks upon this bill. It is a great waterway State.

Mr. MEEKER. Will the gentleman yield for a question?

Mr. MOORE of Pennsylvania. Not in five minutes.

Mr. MEEKER. Just one.

Mr. MOORE of Pennsylvania. Go ahead.

Mr. MEEKER. Is not Michigan in the Great Lakes?

Mr. MOORE of Pennsylvania. Yes; it is in the Great Lakes. And it is represented here by some very distinguished men, most of whom are broad minded and can see far over and above the border lines of their own State. The gentleman from Michigan [Mr. JAMES] is one of them. He looks over and above the boundary lines of his own State farther than any other Member perhaps, for he scrutinizes the Tennessee River, takes up the Scuppernong, goes down in the Santee country, and generally mixes it up for other sections. But up to the present time I have listened in vain for one word of encouragement from the gentleman of Michigan about the State of Michigan. He criticizes projects in other States, but never Michigan. Why is this? We must examine these reports the gentleman quotes so frequently and so copiously to find out. And what do they reveal? Only this: That up to 1915, not including appropriations for 1916 and the appropriations in this bill, the State of Michigan has been taken care of to the amount of $59,378,000. That is nearly $60,000,000 that Congress has given to the State of Michigan alone. Why, of course, the gentleman from Michigan can afford to cut out all other appropriations now. He has "got his," and he does not see any advantage at all in making appropriations for other States since every river and harbor in Michigan has been taken care of lavishly. If there is war Michigan is prepared to take care of itself, because the Government has spent of its income in improving the rivers and harbors of Michigan and making them navigable and profitable to the State of Michigan. The ships can come and go and Michigan can prosper and be happy. What is the use of talking about anything else so long as Michigan is all right? That is the spirit of the gentleman from Michigan who rallies so bravely and so often to the assistance, comfort, and aid of the enemy of the river and harbor bill, the gentleman from Wisconsin.

Now, I want to quote from one or two of the other aids of the gentleman from Wisconsin [Mr. FREAR]. Our friend from Iowa [Mr. KENNEDY] and several other Republicans signed the minority report which the gentleman from Wisconsin, the litterateur of river and harbor classics, is credited with having written. But the gentleman from Illinois [Mr. GALLAGHER], a Democrat, for the first time since the enthronement of Woodrow Wilson, was also gathered into the camp of the gentleman from Wisconsin, and the distinguished gentleman from New Jersey [Mr. SCULLY], who was one of the President's foremost champions in his home State. With these two distinguished Democrats in the camp of the gentleman from Wisconsin [Mr. FREAR], matters become serious, so I read from a speech which I have before me, put in the RECORD, if not delivered in this House, on March 19, 1912. It runs along like this:

Mr. Chairman, I am heartily in favor of this bill, and I earnestly hope that it will pass without one dissenting vote.

That was the river and harbor bill of 1912.

As a new Member of this House I am unequivocally in favor of the development and improvement of the waterways of this country. While I have at all times been a strong believer in the development and improvement of the waterways of the entire Nation, yet I am particularly interested in the development and improvement of the waterways of the State of New Jersey. My assignment to that great and powerful Committee on Rivers and Harbors gave to New Jersey for the first time in the history of Congress representation on that committee. Naturally, as a new Member of the House, it is with considerable satisfaction and great pleasure that I welcome this bill to the House. New Jersey has too long been neglected in the river and harbor bills, and it is about time that Congress should learn of the inadequate care bestowed upon the rivers and harbors of that great State.

That was the speech of the gentleman from New Jersey [Mr. SCULLY] in 1912. [Applause.]

Why should I read more? New Jersey was taken care of in the river and harbor bill of 1912, just as Michigan was taken care of to the tune of $60,000,000 up to 1915. Oh, the gentleman from Wisconsin [Mr. FREAR] is making converts; that is true. He is picking up some Democrats along with some Republicans; but you observe as you go along the line that most of them have been well cared for. Their nests have been feathered and now they are against others whose projects await consideration. Is that fair? [Applause.]

Mr. JAMES. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman can proceed a little later, but the gentleman from Wisconsin [Mr. LENROOT] has asked to be recognized, and the Chair will recognize him now.

Mr. LENROOT. Mr. Chairman, I had not expected to speak upon this bill to-day, recognizing the futility of attempting to strike out any item in it, as has been demonstrated during the previous consideration of this bill. But the discussion has taken a turn to-day that I think demands a little consideration. Up to this year one of the great benefits that has been urged in these improvements has been the reduction thereby caused in railroad freight rates. And even in this report that is now before the committee you will read time after time that the benefit of the improvement has been, to use their language, the reduction of rail freight rates.

Now, of course anyone can see that that is not the proper basis for the expenditure of millions of dollars by this Government. But I do thoroughly agree with the gentleman from Missouri [Mr. MEEKER] and others that one of the reasons for the lack of use of our rivers has been railroad discrimination. And all I want to say now is that if the Mississippi River, for instance, is to be utilized it will not be by pouring $2,000,000 into that river by this bill until this railroad question is settled. And I want to suggest to these gentlemen who are so strenuously urging these appropriations that if they would be consistent they will urge legislation by Congress for the regulation of that question, so that railroads by unduly reducing rates can not destroy commerce upon the rivers.

I have not so far seen one of these gentlemen either introduce a bill or make a speech upon the floor advocating that kind of regulation. And I shall be interested next winter when we do come to consider general legislation to see whether any of these gentlemen who are now so strongly urging this proposition and giving as a reason the railroad discrimination will join and fight to compel railroads to deal fairly by water transportation, because reducing freight rates by reason of water competition is of no benefit to the Nation. You are giving a benefit to one locality in railroad rates at the expense of all the people of the interior who have not the benefit of water. And therefore it is not in any national way any benefit at all to improve our rivers solely for the purpose of reducing freight rates. If we are to utilize the rivers of this country, we must see to it that the railroads can not destroy legitimate traffic by unduly low railroad rates.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn. All debate is closed.

The Clerk read as follows:

Anahuac Channel, mouth of Trinity River, Oyster and Clear Creeks, and Cedar, Chocolate, Turtle, Bastrop, Dickinson, Double, and East Bay Bayous, Tex.: For maintenance, $33,300.

Mr. JAMES. Mr. Chairman, I just listened to a little lecture from one of my leaders, or near leaders. I call him a near leader, because I do not often follow him.

Mr. SMALL. Will the gentleman permit me to interrupt him to make a unanimous-consent request?

Mr. JAMES. I will.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that the debate on this paragraph and amendments thereto close in five minutes.

Mr. MADDEN. I do not think the gentleman is fair.

Mr. SMALL. I did not see the gentleman from Illinois.

Mr. MADDEN. It does not make any difference whether you saw the gentleman or not. I think the gentleman from North Carolina ought to be sufficiently considerate of the time of the other members of the committee to be willing to let them discuss both sides of the question.

Mr. MEEKER. Reserving the right to object, Mr. Chairman, I will say to the chairman of the committee that this discussion is now taking a trend which I hope it will follow for a short time, and I take it we had just as well right here, in the committee, thrash out some of the questions that are now up, suggested by the gentleman from Wisconsin in response to what was said by the gentleman from St. Louis.

Mr. SMALL. We have been three days on this bill, and we have been discussing the same general propositions here, and we have gone far afield from the item which has been read. I hope we can read the bill and avoid discussion of general propositions as much as possible. I understand in addition to the gentleman from Michigan [Mr. JAMES] the gentleman from Illinois [Mr. MADDEN] wishes to speak, and the gentleman from Kansas [Mr. CAMPBELL].

Mr. MADDEN. I do not care whether I get in on this paragraph or not.

Mr. CAMPBELL of Kansas. I want five minutes.

Mr. SMALL. I make it 10 minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. JAMES. Mr. Chairman, the gentleman from Pennsylvania [Mr. MOORE] has seen fit to lecture everybody who has not the same views on this bill as he has. I call him one of our "leaders," or, rather, "near leaders," because I do not follow him, and if I did follow him I would not be here next time, because the people in my district do not agree with him on matters relating to rivers and harbors and public buildings and things of that kind. I am glad at last that we have a "war measure" that the gentleman from Pennsylvania can support at the first and not climb on the band wagon at last. I am glad this bill is not "in the interest of the allies." This is about the only bill that has come up here lately that the gentleman from Pennsylvania has not insinuated was "in the interest of the allies."

When the report came from the Committee on Mines and Mining on the bill, whose only object was to see to it that the ammunition factories and mines were not blown up, there was some doubt expressed by the gentleman from Pennsylvania as to whether the allies were not interested in that bill. When the matter came up here the other day regarding the insurance of merchant ships and their cargoes, the gentleman had some doubt in his mind as to whether it was not intended to carry some more insurance for the allies and protect the boats and cargoes of the allies rather than our own ships and cargoes, when anybody who knew anything about the subject knew it was to protect American commerce, so that American merchants could carry twice as much insurance protection as they did before under the old bill. When the food-control bill came up there were grave doubts in the mind of the gentleman from Pennsylvania that the food bill was designed "in the interest of the allies," so that they could eat whole wheat over there and we would be confined to a diet of corn meal. But now, happily, that bill has been disposed of.

The State of Michigan needs no defense at my hands, because neither the gentleman from Pennsylvania nor anybody else has been able to point out any bad item in the State of Michigan that is cared for in this bill. Let me call attention to an item where in 1913 they had a tonnage of 1,200,313 tons of through commerce of the value of $50,894,518, and where there was local commerce to the value of $44,322,561 in the year 1915. If all the items were like those, the gentleman from Pennsylvania and the gentleman from Wisconsin [Mr. FREAR] nor anybody else could criticize a bill of this kind. [Applause.]

The CHAIRMAN. The gentleman from Kansas [Mr. CAMPBELL] is recognized.

Mr. CAMPBELL of Kansas. Mr. Chairman, another reason than the reduction of freight rates for the improvement of rivers must be given by those who support this bill. Everybody who lives at what is known in freight-rate parlance as an interior point knows that no railway reduces its rate to shippers beyond the river points because of alleged river navigation. For instance, interior points in Kansas—that is, west of the Missouri River—where originates the traffic in wheat and cattle and corn and brick and coal and all manner of material, have no advantage whatever of any reduction that is made in the rates from Missouri River points to the sea or from Missouri River points to points beyond the river. Shippers have to pay a higher rate from Pittsburg, Kans., from Newton, Kans., on coal and on wheat, for example, to New Orleans direct from the place where the product originates than they do by way of a Missouri River point, and in order to take advantage of the river rates or the reduction in rates they must first ship to a river point and there unload and reship from that point to the sea or market.

Mr. DEMPSEY. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. DEMPSEY. Does not the gentleman believe that whenever a railroad puts in a low rate to compete with water transportation this low competitive rate is always used against the railroad in fixing its general rate, and so the country at large get the benefit of that competition?

Mr. CAMPBELL of Kansas. No. The Interstate Commerce Commission has always recognized river points as basic rate points, and has invariably sustained the higher rate to what they call the interior points. Now, there is as much traffic carried on the Lincoln Highway as there is on the Missouri River.

Mr. BENJAMIN L. FAIRCHILD. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. BENJAMIN L. FAIRCHILD. It is true, as the gentleman has stated, that the Interstate Commerce Commission does recognize the water rate; but is that an answer to the question of my colleague from New York?

Mr. CAMPBELL of Kansas. It is, because the general reduction does not occur for the benefit of points beyond the river. The Interstate Commerce Commission uses the reduced rate to the river points as a reason why the railway must be compensated by a higher rate, for example, to Topeka, Kans., and Newton, Kans., and Wichita and Pittsburg and Independence. A low rate to either of the interior points may be confiscatory, but not so to the river points.

Mr. BENJAMIN L. FAIRCHILD. They do recognize the water rate?

Mr. CAMPBELL of Kansas. Yes; but when there is no competition——

Mr. BENJAMIN L. FAIRCHILD. Then they go further; and, as my colleague from New York stated, these lower water rates are used as an effective argument when you come to inland rates.

Mr. CAMPBELL of Kansas. I hope the gentleman will get his own time. I have only five minutes. I say there is no such traffic on any of these alleged navigable streams as justifies the basing of rates from these points to the sea and a discrimination against what they call interior points, where the product really originates. Why, as I stated, there is really more traffic on the Jefferson Highway or the Lincoln Highway from Pittsburg, Kans., to Kansas City than there is from Kansas City to St. Louis on the Missouri River.

The CHAIRMAN. The time of the gentleman from Kansas has expired. All time has expired. The Clerk will read. The pro forma amendments are withdrawn.

The Clerk read as follows:

Waterway from Galveston to Corpus Christi and channel from Pass Cavallo to Port Lavaca, Tex.: For maintenance, $90,000.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I do not suppose anything I say will have any influence in shaping the policy of the Rivers and Harbors Committee, but I am going to say it at the risk of not being followed.

My own judgment is that in the expenditure of money for rivers and harbors, if we would adopt a well-defined policy of improving some important channel, and then use that as an example to show whether or not water navigation could be popularized, we could then go forward, if it proved to be feasible and desirable to have water navigation, and improve other important channels in the United States; but as long as we continue to spend money on every kind of a creek with every kind of a name, without any kind of an object except to take the money out of the Federal Treasury, we will never have water navigation made popular in the United States.

I would be delighted to see water navigation established and popularized, and I would like to see the Congress of the United States adopt a plan to improve one great river. Take the Mississippi River, if you like, or the Missouri River, if you like——

Mr. LONGWORTH. Or the Ohio River.

Mr. MADDEN. Or the Ohio River, if you like, but make it one river, and spend your money on it until you complete the

improvement, and then encourage your citizens to invest their money in facilities to move commerce by water. If you could do that you would soon learn whether it was worth while to spend money for water navigation in the interior of the country; and if such a policy was adopted, it would not take more than two or three years to prove the efficacy of the expenditure of money for that purpose. Because, if we devoted our energies and our money and our scientific knowledge to the improvement of some great waterway running through the interior of the country, we would soon learn whether or not it is possible to compete with the railroads by water. There is no doubt in the world but that you can move freight much more cheaply by water than you can by rail; but you can not move it by water at all on these inland streams until the streams are put in shape where you can run boats on them, and you can not run boats on them unless you have a channel, and you can not have a channel unless you spend the money to make it; and there is not money enough in the United States, and you could not raise money enough in the United States to improve all the channels that are proposed to be improved so that they would be worth one dollar for navigation purposes. But you can improve one channel, and when you have improved that channel, and by its improvement you have proved the case, the people of the United States will join in and improve other channels.

It will not do to say that you can not pass a bill with a single meritorious proposition in it. It will not do to say that you have got to have a lot of items in the bill that have no merit in order to pass the items that have merit. I venture to predict that if the Board of Engineers and the Chief of Engineers and the Secretary of War and the President of the United States were to come to this Congress with a message saying that the improvement of the Mississippi River was one of the prime needs of the development of the navigation of the United States, and that all other rivers in the United States ought to wait until that one was improved, the Congress would adopt it. I venture to say if we did the same thing about the Ohio River, Congress would adopt that, or if we did the same thing about the Missouri River, Congress would adopt that. But when nobody comes here with anything that has any merit, you can not wonder that many Members of the Congress, and all the people of the United States, except those who are living in the territory where their creeks are being improved, object to the expenditure of the money wastefully.

I have no disposition to retard the progress of this bill. I know it is going to pass this House, and nobody has retarded the progress of the bill to-day half as much as the men who are in charge of the bill.

The CHAIRMAN (Mr. HARRISON of Mississippi). The time of the gentleman has expired. The pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

Freeport Harbor, Tex.: For maintenance of mouth of Brazos River, $66,000; for improvement in accordance with the report submitted in House Document No. 1469, Sixty-third Congress, third session, and subject to the conditions set forth in said document, $150,000; in all, $216,000.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on the paragraph and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, if I understand the argument of the gentleman from Illinois and the arguments made by his allies, the gentleman from Wisconsin and the gentleman from Michigan, who has recently spoken in a more or less personal vein, it is that we should dispense with the waterways and confine all of our transportation operations in this vast war to the railroads. In other words, the argument is that so long as their particular waterways are improved and their railroads are running, it would be useless to develop any other waterways in the United States. For instance, the gentleman from Michigan, whose State has secured nearly $60,000,000 for waterway improvements, feels now that he is ready for war in his own territory because it has been improved and prepared for it.

The gentleman from Michigan, who was more or less personal and more or less accurate in his statements about the gentleman from Pennsylvania, chafes a little about the exposure of "pork" in the State of Michigan, although I for one am ready to compliment the gentlemen from that great State who succeeded in getting $60,000,000. They were wise and industrious Representatives.

But the gentleman from Michigan, having been a soldier and therefore sympathetic with the men at the front, would have it that the railroads, and the railroads only, should bring up the supplies. He would have the soldiers of the United States wait until the railroads came up with troops or supplies, whether the railroads were able to do it or not. Instead of having two means of communication he and the gentleman from Illinois would have but one. These are the arguments that the gentleman from Michigan, who was more or less personal and more or less accurate about the motives of other gentlemen, would rest upon, and he was a soldier and knows what it means to have relief and support in battle. The gentleman was engaged in the Spanish-American War, I understand, and fought valiantly. We can pay him that tribute without reflecting upon the other soldiers. But now he opposes a modest appropriation of $26,000,000 to enable us to stimulate production and set afloat to some of the ports and rivers of the country ships for which he and others who oppose this bill have already voted to appropriate $750,000,000.

Think of it! These antagonists of rivers and harbors who come forth boldly and bravely as soldiers ready for the fray and cheerfully vote three billions of the people's money into the hands of certain departments and the Council for National Defense for all sorts of purchases, including $750,000,000 for the construction of ships, now seek to turn down $26,000,000 to provide avenues of communication for the very ships they themselves have authorized.

They ridicule the idea that the river and harbor bill is a war measure. Why, gentlemen, I have in my mind one instance which I now submit to this House as appropriate—that of a river across from the city of Philadelphia—where the Government is seeking to have ships built—warships which it badly needs. They have the equipment along that stream to build the ships—men, material, and all that—but they are not sure they can get the ships out of the stream after they are built. They need a greater depth of water. Gentlemen who stop appropriations for rivers and harbors simply bottle up our ships. It is a poor pretense of patriotism.

Mr. MADDEN. They ought to build the ships where there is water enough.

Mr. MOORE of Pennsylvania. That might do in Chicago, but gentlemen should remember that they had to dig out the *Clyde*, and that shipbuilders must have a suitable environment.

Mr. MANSFIELD. Mr. Chairman, I am not a member of the Rivers and Harbors Committee and but a new Member of the House. I desire to call attention first to the fact that the gentlemen opposing this bill base their objections more from items embraced in former river and harbor bills than from the items of the bill now under consideration. For instance, the gentleman from Wisconsin [Mr. FREAR] has had a great deal to say about the Brazos River, and has quoted from the CONGRESSIONAL RECORD of two years ago in the extension of his remarks in the RECORD in regard to that project. I desire to call attention to the fact, and wish to have it put in the RECORD, that the present bill does not embrace any item whatever for the Brazos River.

Some gentlemen on the minority side of the aisle seem to oppose this bill for the reason that it has not been indorsed by the Democratic caucus. I am glad those gentlemen are beginning to look to this side of the aisle for light, but I desire to correct their impression as to the caucus action. I have a faint recollection of what took place in the Democratic caucus in regard to that measure, and my recollection is different from that as stated by those gentlemen who seem to be opposing it for that reason. For their information I desire to state that the Democratic caucus has not barred this bill from action in this Congress. When the caucus was held the gentleman from North Carolina [Mr. KITCHIN] introduced a motion that this Congress should embrace certain things within the scope of its legislation, and a motion was made by the gentleman from North Carolina—the chairman of this committee—to embrace a river and harbor bill. Several attempts were made to amend that motion and were all voted down. Finally they got into the question of prohibition and public buildings and grounds and all that, and then the gentleman from North Carolina [Mr. KITCHIN] withdrew the whole resolution, and it was all set at naught, and no action taken thereon at all. He then amended his motion and offered an amended program, which is as follows as I read from the minutes of the caucus:

Program: Measures for war, the additional-force bill, the additional Navy bill, and all legislation needed to put the country in a better state of defense and preparation for action; bills for safeguarding of the Nation.

These included bills recently submitted to the Judiciary Committee by the Department of Justice, and so on.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. MANSFIELD. For a question.

Mr. LAGUARDIA. May I ask the gentleman what caucus he is reading from?

Mr. MANSFIELD. The Democratic caucus, the one that has been under investigation here. Now, then, let us take the proposition of measures to put the country in a state of preparation for war. If I am correctly informed by the chairman of this committee, the measures embraced in this bill are recommended by the Secretary of War and by the President of the United States as war measures, or semiwar measures. I do not believe that any gentleman on the floor of this House will dispute that these measures for the improvement of rivers and harbors, for carrying our freight and our food and munitions to the fields of battle in Europe, are war measures, and those gentlemen who are opposed to improving these rivers and harbors and keeping them in proper repair for that purpose had as well and with as much judgment, in my opinion, get up here and say it would be improper to keep the railways in proper repair for the transaction of such business.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. MANSFIELD. Yes.

Mr. COOPER of Wisconsin. Secretary of Commerce Redfield, of the President's Cabinet, also in effect indorsed this bill, did he not?

Mr. MANSFIELD. Why, I am so informed.

I want now to speak of the item Freeport Harbor as a war measure, as well as from a commercial standpoint.

The item under consideration, Freeport Harbor, comes up to the full measure from both a commercial and a war point of view. The harbor was not made deep enough to accommodate ocean-going ships until about two or three years ago. Within the past two years the tonnage has increased approximately 150,000 tons, while the engineer's report shows that 90,000 tons were diverted to an all-rail traffic on account of the inability to obtain a sufficient number of light-draft vessels capable of entering the shallow harbor. Perhaps no other harbor in the country has had such an enormous percentage of increase, it being approximately an increase of 600 per cent within two years.

As to the war phase of the case, I desire to call attention to the fact that about one-half the sulphur output of the United States is produced by the mines at this place, and the Government will consume every ton of it in the manufacture of explosives for this war. So important is this question considered by the Government that the Secretary of War now has a company of soldiers stationed there to guard the sulphur mines and the docks, and the Secretary of the Navy is exerting due precautions to protect it on the Gulf. As to the great importance of this sulphur mine as a war measure, I will ask to have the Clerk read an article appearing in the Washington Star of yesterday, written by Mr. Frank G. Carpenter, the well-known author and correspondent, who has traveled in every land known to civilization, and who as an authority upon this subject will not be questioned.

The Clerk read as follows:

IMPORTANCE OF OUR SULPHUR INDUSTRY IN TIME OF WAR.

[Copyright, 1917, by Frank G. Carpenter.]

FREEPORT, TEX.

I have come to Freeport to write of an industry that means much as to victory or defeat in our great war with Germany. Away down here in southeastern Texas, at the mouth of the Brazos River and within a short distance of deep water in the Gulf of Mexico, lies a great bed of pure sulphur. The bed is more than 500 feet below the surface of the earth and it is crowned by a huge dome of rock which has a necklace of quicksand. It reaches only 23 feet above the surrounding country, and to look at it you would think it only a hill. The deposit of sulphur is just like another great bed that lies under a similar dome in southern Louisiana on the edge of the Gulf, and the two deposits are now furnishing 98 per cent of all the sulphur used in the United States. Each is producing tens of thousands of tons every month, and both will be worked to their full capacity throughout the war.

But before I describe the wonders going on here let me tell you how vital this sulphur has become to our life as a nation. It is needed to make the sulphuric acid which is employed in all high explosives, and it is the basis of acid phosphate, the commercial fertilizer upon which we rely for our food supply.

In the past we bought some of our sulphur from Japan, but this is now going to Russia, where it is used for making munitions of war. We once got the most of our supply from Sicily, but that was cut off when the Louisiana mines were developed, and of late we have been making our sulphuric acid from pyrites, the most of which we have been importing from Spain and Portugal. We took from those countries last year a million and a quarter tons, but the supply has been cut off by the submarines, and it will have to be replaced in large part by these sulphur mines.

Just now we are using more sulphur than ever before. Our usual consumption has been in the neighborhood of 300,000 tons per annum. Last year we used more than three times that quantity, and the bulk of the excess went into high explosives for the projectiles shipped to our allies. From the Freeport mine a quarter of a million tons was shipped to one munitions factory, and I understand that large contracts have been placed for the future.

The fertilizer companies will need more than 1,000,000 tons of sulphur for the acid phosphate required by the farmers, but their supply will be restricted by the amounts needed in the munitions factories, and it may be also by our shipments to Europe.

Sulphur is used also in many manufactures. Prior to this war 70 per cent of our product was consumed in making wood pulp and news print paper. The paper on which this letter is printed was bleached with sulphur, and this is so of almost all papers used for periodicals, magazines, and books. Sulphuric acid is a necessity in refining petroleum. It is employed in the making of sugar, and also in steel, iron, and coke manufactures. In connection with lime it forms the lime-sulphur insecticide which is used everywhere in our orchards, and it means the success or failure of our fruit crop. In short, it is the basis of so many different industries that we must have it in order to live.

Until the sulphur mines of Louisiana were developed the most of the world's supply came from the island of Sicily. It was dug up about the slopes of the volcano of Ætna, and Italy supposed that she had a monopoly of the business for all time to come. This was so notwithstanding sulphur was known to exist in Louisiana. It had been discovered there about the close of our Civil War, but the deposit was covered with quicksand and was buried 500 feet under the ground, so that it resisted all the attempts of the miners.

Then came from Germany a young chemist named Herman Frasch, who went into the employ of the Standard Oil Co. He was an inventor as well as a chemist, and he became interested in sulphur when he invented a process for taking the sulphur and other offensive odors out of coal oil. He had made good investments and was growing rich when he heard of the sulphur deposits of Louisiana, and turned his mind toward getting them out of the ground. He came down to the Gulf of Mexico and made many experiments. He drilled wells here and there over the deposit, and finally concluded that he could put down pipes into the sulphur and melt it by means of superheated water in such a way that the liquid sulphur could be forced up to the surface of the earth. He tried it and it proved a success. In 1903 he was taking out sulphur in paying quantities, and the following year he had enough to supply the American market and ship 3,000 tons to France.

In the meantime the Italians tried to undersell Frasch in the United States. He showed them what he had and offered to go into a combination with them to supply the world's market. They laughed at him, but he sent additional shipments to France and undersold them; and, to make a long story short, it cost them a million or so of dollars before they were ready to make a contract with him to keep out of the American market and to pay him an annual bonus not to enter their market in Europe.

Since then the Louisiana Sulphur Co. has, if reports are correct, been making enormous profits. The stock is said to be worth upward of $1,700 a share, and it is currently reported that every share brings in dividends of more than $1,200 a year, or $100 a month, year in and year out. The original value of the shares was $100, so that the stock really pays 1,200 per cent.

And now we come to the discovery of these great deposits of sulphur at Freeport. They were found shortly after the oil began to spout on Spindle Top Hill. The petroleum deposit at Beaumont, which began the oil industry of the Southwest, lay under a great dome of rock, and it was associated with sulphur. Capt. A. F. Lucas, who discovered that oil, conceived the idea that he could find oil under any similar dome along the Gulf coast. There were many of them, and he explored a great number. Among others he sank a well into the dome under which this sulphur lies. It was then known as Bryan's mound, and it lay here in the prairie only 23 feet above the low coastal plain.

Capt. Lucas has told me how he sank the well into the mound and how, after he had gone down about 900 feet, there came a rush of vile-smelling, poisonous, sulphurated hydrogen gas, so strong that it polluted the air for miles around. It was strong enough to kill a mule and was deadly to man and beast. It drove the miners away from the well, and it kept on flowing for months.

Capt. Lucas was prospecting for oil, not for sulphur, and he had no idea of the value of his discovery. He allowed his lease to lapse, and it was not until within a few years ago that the property came into the hands of the present owners—E. P. Swenson and others—who comprise the Freeport Sulphur Co., which has spent millions in sinking wells and in building the great plants by which the sulphur is brought to the surface.

But suppose we visit the mine and see how the sulphur flows from the earth. We start at the new town of Freeport, which is 2 miles away, and ride in automobiles over the prairie. On a little hill in the distance we see what seems to be enormous factories, with tall derricks about them and oil tanks near by. Between us and the buildings great mountains of light yellow stand out against the blue sky. The factories contain the machinery which heats the hot water and forces it a thousand feet down into the earth; the oil tanks are filled with the fuel oil that furnishes the great heat necessary for melting the sulphur; and the mountains of yellow are massive blocks of sulphur built up by the streams of lemon-yellow gold, which are pouring forth day and night all the year through.

This is our view from the distance. As the car brings us closer, the buildings seem to increase in size until they cover many acres. The great blocks of sulphur grow larger and larger, and the immensity of the plant dawns upon us. Look at that huge pipe which follows the road over which we are riding. That was laid to carry fuel oil from the tank steamers in the harbor out to the plant. The mines require 4,500 barrels of oil every day, and there are 90,000 barrels in the tanks which stand over them. The company has a fleet of tank steamers for bringing this oil from the wells of Tampico, in Mexico, and it is used solely for producing the heat.

The factories are really great hot-water plants. They are filled with huge boilers which burn more than a million and a half gallons of oil ever week and heat from 8,000,000 to 12,000,000 gallons of water a day. This water must be raised to a temperature of 332°, or 120° above boiling. It is then pumped down into the ground through pipes a thousand feet long at a pressure of 250 pounds to the square inch. It goes through the beds of sulphur and melts them to a liquid, which the compressed-air machines force to the surface so that it flows out in a stream of bright yellow which might be compared with the wine known as sauterne.

The beds of sulphur cover about 500 acres. The chemical lies in pockets and veins in a gypsum formation heavily loaded with water, but when it comes to the surface it is absolutely pure, and it has only to cool to be ready for sale. By chemical assays it is proved to be over 99 per cent pure sulphur, and it is sold on the guaranty that it is 99½ per cent pure.

Now come with me and let us look at the huge blocks of sulphur which stand out against the blue sky. There are a half dozen waiting for the steamers to come and take them away, and others are rising by the flow of the wells. Here is one that covers more than an acre and is more than 40 feet high. It is a mighty cube of light yellow

as clean as a canary bird fresh from its bath. It has the cubic contents, I should judge, of a half dozen large flats. Near by it is another which is 200 feet wide by 300 feet long and as high as a four-story house. It contains almost two and a half million cubic feet, and it weighs, I am told, about 100,000 tons.

There is a railroad track running by the second block I have described, and one section of it has been blasted down with dynamite so that the sulphur may be broken into such shape that it can be put on the cars. They are loading cars now. The yellow rock is picked up by a clamshell bucket attached to the end of a crane worked by an engine. The bucket takes two tons at a bite, and the steam crane swings it around and drops it onto the cars. The car is loaded in a very few minutes, and we can see long trains of this light-yellow chemical moving across the prairie and down to the harbor on their way to the North.

But let us see how these great blocks are built up. The sulphur as it comes from the earth is carried in pipes to an acre field close to the well. This has been smoothed and a fence of 2-inch planks run around it. The planks are nailed to a post 10 feet in height so that they make a tight board wall, which reaches as high as your head. The sulphur begins to flow in. It comes out of the pipe in a boiling, bubbling liquid so thin that it flows easily over the ground. It is now 100 degrees above the heat of boiling water, but it is sulphur, and it congeals or freezes at 250° F. It is so hot that it spreads itself evenly over the surface, and a little later solidifies, making a great bed of sulphur rock covering the ground. As more sulphur comes, it flows evenly over this surface, and the great mass is gradually built up in a solid rock 40 feet thick, as I have described. As the building goes on the fence is made higher and higher until you have at last a wall of plank inclosing the block. This block is as hard as stone and would stand for an indefinite time on the bed of the prairie. The planks are now taken away and used over again. It takes a well flowing about six weeks to make such a block, and at current prices the sulphur contained in it is worth in the neighborhood of $2,000,000. As I figure it, the company is now mining something like 2,000 tons of sulphur a day, and its product is about one-half of all the sulphur in the United States.

This will show you how necessary it is that these sulphur mines be protected and given every facility for exporting their products. They form one of the four great sources of supply of sulphur known to the world, two of which are in the United States. The other United States source, as I have said, is the Union Sulphur Co., of Louisiana, which has a capacity about equal to this. In addition are the mines of Sicily and the product of Japan, neither of which we can rely upon for any part of our supply. Until recently Sicily had been taking care of the needs of Europe and Asia. It had on hand prior to the war 650,000 tons of sulphur on top of the ground. It now has less than 140,000 tons, of which 40,000 tons are promised to France. The remainder it refuses to sell.

It is also important that the harbor at Freeport be deepened in accordance with the recommendation of the Board of Engineers for Rivers and Harbors of the War Department. This can be done at a cost of $455,000, and a bill to that effect is now before Congress. These recommendations advise the increase of the depth to at least 25 feet and they say that this sum will secure that depth and maintain it for three years, which would probably include the term of the war.

As it is now the harbor has a channel 18 feet deep and 3 miles long, connecting it with the Gulf of Mexico. At the entrance to the Gulf great jetties have been constructed, and there are all facilities for making an excellent and a permanent deep waterway into Freeport. The Brazos River, which is the longest and largest in Texas, is wide and deep all the way to its mouth. It makes a great bend between the Gulf and the harbor, and at that point it is crossed by the intercoastal canal, which runs north and south along the Gulf. This bend makes the harbor landlocked and serves as a protection against the storms of the sea.

The deepening of this harbor will give the Southwest another important gateway to the Gulf of Mexico. Freeport will form an additional outlet for the cotton and grain of this part of the world and the sulphur will probably bring chemical plants and sugar refineries here on account of its cheapness. The nearness of the place to the oil fields of Mexico may make it an oil-distributing center, and fuel oil will be the basis for a considerable industrial development. Moreover the port has the advantage of being absolutely free as to dock or wharfage charges. The land all around belongs to the company and its plans include the building of a city.

FRANK G. CARPENTER.

Mr. MANSFIELD. This article is from a man capable of speaking with authority and who in his travels had occasion to stop at Freeport and make a personal investigation of this matter.

The depth of the harbor being but 18 feet, only a limited number of vessels can enter it, and every ton that the Government will require to be shipped for its own use by rail to the factories of the East will be at an enormous additional expense. An increase to 25 feet, as recommended by the Board of Engineers and by the majority of the Rivers and Harbors Committee is absolutely essential in the defense of this country and for the prosecution of the war, and the Government itself will be more than repaid for the outlay in the lessened expense of transporting the tonnage it will require for the manufacture of explosives for this war, to say nothing of the increased facilities in other shipping.

Mr. Chairman, this bill has the approval of the engineers of the respective districts, it has the approval of the Chief of Engineers, it has the approval of the Secretary of War, the Secretary of the Navy, the Secretary of Commerce, and the President of the United States. Not only that, Mr. Chairman, it will in due time have the approval of Congress and of the people of the United States. [Applause.]

The Clerk read as follows:

Red, Black, Ouachita, Tensas, Boeuf, and Saline Rivers, and Bayous Macon, Bartholomew, D'Arbonne, and Corney, Ark. and La.: For maintenance, $65,000. The balance of appropriations heretofore made for the construction of Lock and Dam No. 7, Ouachita River, Ark. and La., is hereby made available, in the discretion of the Secretary of War, for the construction of Lock and Dam No. 5.

Mr. SWITZER. Mr. Chairman, I move to strike out the last word. I would like the committee to bear with me for five minutes. I want to make a reply to the argument of the gentleman from Illinois [Mr. MADDEN] who says that these projects, items of appropriations, ought to come in here in separate bills and be dealt with individually and in a separate manner. My reply is to read the argument of the distinguished Republican floor leader, the gentleman from Illinois, Mr. JAMES R. MANN, there being no better authority on parliamentary procedure and the efficicacy of parliamentary practice. Upon this very question on the 22d day of January, 1917, on the floor of this House, Mr. MANN said:

Now, Mr. Chairman, the river and harbor bill comes to the House. We call it a pork-barrel bill. It is in the sense that term is used. It comes to the House as an omnibus bill, with the items bunched together. If we had a thousand hours in the day and a thousand days in the year and could sit here all the time, possibly, but not probably, we might consider those items by themselves. It is never practicable to pass river and harbor items as separate bills, and with some experience in the House I venture to say that if the river and harbor items were introduced as separate bills by Members from their various districts, with those Members pulling and hauling, with the personal influence upon the committee, there would be more bad projects reported by that system than are reported now, because the committee then would say, "Oh, the items come up by themselves; the responsibility is not upon us, the responsibility is upon the House." It is an easy question to cite the Claims Committee of the House, a good committee, which has done excellent work, but which reports more bad bills through personal solicitation than all the other committees of the House combined, because they are separate bills. Pulling and hauling is what gets it. If we should make a lump-sum appropriation to the War Department, it would not benefit things at all, because half the scanning will be taken away. We do not provide for river and harbor bills until they have passed the War Department. Then they have to pass the Committee on Rivers and Harbors, they have to pass the House and Senate, though I do not know that that is very much under the circumstances, and the giving of a lump sum would only make it worse. But to let the Secretary of the Interior, the Secretary of Agriculture, the Secretary of War, and one other Secretary, as provided in this bill, select some chief clerk there or some high-priced clerk, wholly subject to political influence, wholly under the control of a superior officer, holding a tenure of office at the will of the man above him, without training, without expertness, for them to pass upon the methods now in existence of determining these things by the War Department, would be to ask an ignorant man to judge of the literary ability of a distinguished scholar. What is the use? [Applause.]

[Applause.]

Mr. Chairman, just as an evidence of what the Committee of the Whole will do, the other day in the consideration of this bill an item was brought up here and put into the bill without any recommendation by the Army engineers who came before the Rivers and Harbors Committee during the preparation of the pending bill. This incident illustrates the excellent judgment of the gentleman from Illinois [Mr. MANN] and shows the theory of the gentleman from Illinois [Mr. MADDEN] to be exceedingly faulty; and that better results will be obtained and that fewer items of appropriation for bad projects are likely to be enacted into law when river and harbor items are bunched together and come before the Committee of the Whole in the shape of an omnibus bill than if such items come up for consideration by the committee in separate bills.

Mr. GOODWIN of Arkansas. Mr. Chairman, at the last session of Congress an appropriation was made for the construction of Lock 7 on the Ouachita River. Nearly two years have passed since that appropriation was made, and thus far no part of the appropriation has been utilized. The Secretary of War or the War Department has seen proper to recommend that Lock 5 be constructed prior to Lock 7, and the bill provides that the appropriation heretofore made for the construction of Lock 7 be transferred to Lock 5. But some question arose as to the meaning of the language "in the discretion of the Secretary of War," so I addressed a letter to Col. Newcomer, Acting Chief of Engineers, as to the meaning of that language in the opinion of the War Department, and I asked to embody in the RECORD the reply to my letter from Col. Newcomer as to the construction of the War Department of the language "in the discretion of the Secretary of War."

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

The letter is as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, June 15, 1917.

Hon. WILLIAM S. GOODWIN,
House of Representatives.

SIR: 1. I have the honor to acknowledge the receipt of your letter of June 13, requesting a statement in writing concerning the interpretation placed upon the expression "in the discretion of the Secretary of War" as found in the following provision concerning the Ouachita River in the pending river and harbor bill:

"The balance of appropriations heretofore made for the construction of Lock and Dam No. 7, Ouachita River, Ark. and La., is hereby made available, in the discretion of the Secretary of War, for the construction of Lock and Dam No. 5."

2. It is the understanding of this office that the exercise of discretion by the Secretary of War, as authorized by this item, relates merely to

the application of these funds—that is, whether they should be used at Dam No. 5 or Dam No. 7. It is the purpose of the legislation, of course, to permit the use of these funds at Dam No. 5, but, as is usual in such cases where an alternative procedure is proposed, the change is not ordered without regard to the Secretary of War, but is left to his discretion

Very respectfully, H. C. NEWCOMER,
Colonel, Corps of Engineers,
Acting Chief of Engineers, United States Army.

The Clerk read as follows:

Arkansas River, Ark. and Okla.: For maintenance by snagging operations, $35,000.

Mr. FOCHT. Mr. Chairman, I move to strike out the last word.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection?

Mr. FOCHT. Suppose the gentleman makes it a little more. I want a minute or two more, possibly.

Mr. SMALL. Six minutes.

Mr. FOCHT. I have no wish to tire the committee, but if I should want a minute or two more to ask Mr. MOORE some questions I would like to have it.

Mr. STAFFORD. Reserving the right to object, the gentleman says he wants eight minutes.

Mr. FOCHT. Suppose you make it 10 minutes. I have not been here for a week, even to listen, being ill. [Laughter.]

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in seven minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FOCHT. Mr. Chairman, I really meant to ask my colleague from Pennsylvania a question; but much has been said since the gentleman took his seat, and I will therefore make a few additional observations and then propound the question; and I trust he may have abundant opportunity to make an amplified answer, because it involves the great State of Pennsylvania during a period of possibly half a century, and it may take him a little while to answer that question. Now, Mr. Chairman, I have heard a great deal here about waterways and about $150,000,000 being spent on the Mississippi River and the large amounts on its tributaries. There has been little said, or nothing said, about the old canal system we had in this country, which, I believe, in its time carried more commerce than is proposed to be carried with all these improved waterways we have been discussing since I have been here during the past 10 years. I believe this is the first session that a bill has had a fair chance of passing, and just how that happens I will refer to more specifically when I propound my question to the gentleman from Philadelphia.

These waterways were extended along every river and through every valley and carried this early commerce. It is a known fact that after they had been chartered and dug and put into operation, before there was an opportunity for a development of commerce sufficient to pay the overhead charges and bond interest, along came the railroads, which took away most of the freight with the result that in a very short time, in order to make the railroads pay, the gentlemen who were operating the railroads having control of the legislatures of the various States of the Union soon found a way to have the canals abandoned. Now the railroads are said to be unable to carry the traffic which has since developed, and this "pork barrel" bill is the result. I merely want to go on record here this afternoon in the presence of this prolonged debate in regard to waterways, and what you are going to do on the rivers of the West and elsewhere, that with this enormous sum of money appropriated for the restoration of those old canals I believe you will get better results, more permanent results than you will by using it to clean out rivers, then forever keep them free. I understand the bed of the Mississippi River is higher than the adjacent land, and might not the operation affect other streams in lowlands in a similar way? Instead of trying to dam a river, why not arrest at the source the flow of the water that comes in a mighty tide and sweeps down through that great valley; why not do what is proposed to be done and is being done in Pennsylvania, and that is to arrest the flow of water which will give you an average flow throughout the year and will restrain the awful floods that come down as they do in the Missouri and Mississippi and fill up and change your channels and cause a necessary continual recurrence of these enormous expenditures to keep them open.

Therefore, let me say in passing, if you had canals as you had in the old days you would be getting somewhere and you would be getting somewhere in a permanent way without recourse to a pork-barrel legislation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOCHT. Mr. Chairman, I ask the indulgence of the committee that I may come to my real point and ask my friend a question.

The CHAIRMAN. All time has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] asks unanimous consent that the time of the gentleman from Pennsylvania be extended five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FOCHT. Now, Mr. Chairman, in the presence of the fact that we have been here during all these months and have responded, as some say, patriotically, and others say foolishly, to every call made by the President of the United States to delegate to him every conceivable kind of power, power which is such as no despot upon any throne ever had, why is it, sir, that you decline here to permit the President of the United States to meet this whole situation and end all disputes by permitting him to select such enterprises as may be necessary for helpfulness in this time of trial when we are to "bring Germany to terms and end the war"?

Mr. SMALL. The gentleman was not here when we debated it the other day?

Mr. FOCHT. I may not have been here but, nevertheless, you declined to permit him to do it.

Mr. SMALL. The House did that.

Mr. FOCHT. You represent the House——

Mr. CAMPBELL of Kansas. Mr. Chairman, I rise to a question of order.

The CHAIRMAN. What is the question of order?

Mr. CAMPBELL of Kansas. The rules of the House forbid that gentlemen should be addressed in the second person. That rule is violated here every day by gentlemen who really know better.

The CHAIRMAN. The gentleman from Pennsylvania will proceed in order.

Mr. SMALL. If the gentleman will pardon me, I started to say the statement had also been made here a number of times that every item in this bill had been recommended by the Secretary of War and the Chief of Engineers and the President had approved them.

Mr. FOCHT. This bill as it stands now?

Mr. SMALL. Yes.

Mr. FOCHT. Now, in justice to you, I want to say——

Mr. FREAR. Will the gentleman yield?

Mr. FOCHT. Yes.

Mr. FREAR. Then why not permit the President to pass upon these items if they should be questionable?

Mr. FOCHT. I will give the gentleman a quarter of a minute to answer his question.

Mr. SMALL. That would be superfluous. The President has already passed upon them.

Mr. FOCHT. Mr. Chairman, inasmuch as the gentleman from Kansas wishes to so scrupulously observe the proprieties and the canons of good taste in this very decorous debate that I have heard for a number of days, I will then refer to the gentleman from Philadelphia—if you will please tell me how I shall designate him. I do not think it is necessary——

Mr. MADDEN. He is the "Little Napoleon" of the House.

Mr. CAMPBELL of Kansas. "The gentleman from Pennsylvania" is correct.

Mr. MADDEN. I should say "the Little Napoleon of the House."

Mr. FOCHT. In other words, he knows his business and never loses?

Mr. MOORE of Pennsylvania. Does the gentleman desire me to stand?

Mr. FOCHT. Oh, no; not for this question. You can not endure it. Now, my friends, a Member of Congress is supposed to have graduated from an earlier school of politics. If he is a statesman, he has certainly been a politician, and now I am not certain whether my friend——

Mr. MADDEN. A statesman is a politician who is dead.

Mr. FOCHT. A dead statesman; well, a successful politician is a statesman, and there are no dead ones here. It is evident to my mind from what has been said here in regard to this that there are very few Members living on a water front or asking for an appropriation in this bill who have not been members of some legislative body, for they all seem too familiar with "logrolling."

Mr. MADDEN. I think some of them ought to be tapped.

Mr. FOCHT. I think I heard the "Little Napoleon" from Pennsylvania—the "Little Corporal"—make the declaration——

Mr. MEEKER. Mr. Chairman, I rise to a point of order.

Mr. MOORE of Pennsylvania. I ask my friend to let that stand. That is beautiful. It is the finest thing that has come along for some time.

Mr. FOCHT. He asked for his own designation, and probably he will get an epitaph some time, but let us hope not soon. I do not know what it will be, but it is evident from what he said here about this gentleman getting his, and that gentleman having already gotten his, and consequently turned reformer, that "logrolling" is familiar. I am also from Pennsylvania, and when I saw those dams being erected in the great Ohio River, down by the home of my old friend, Matthew Stanley Quay, I wondered if he had not had something to do with putting those improvements there, and that presented the question——

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOCHT. I ask unanimous consent for one minute.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for one minute more. Is there objection?

There was no objection.

Mr. FOCHT. Now, I want to know from my friend from Pennsylvania, who is clearly the leader of our delegation, before I could consider for a minute if I am to be in the class of the rest of the gentlemen whom he has described before this committee, what are you getting out of the "pork barrel" for Pennsylvania? Get up and answer if you want the 36 votes from the Keystone State. [Laughter.]

Mr. MOORE of Pennsylvania. In this bill we are securing an appropriation for the Ohio River that carries the coal from Pennsylvania into the great bread basket of the world, all the way down to New Orleans; we are providing for a channel in the Delaware River, which is the greatest commercial river in the United States; also for a channel in the Schuylkill River; and consideration is given to the Delaware and Chesapeake Canal, a war measure, which I have confidence will enable the commerce of Pennsylvania to kiss the commerce of the Southern States and pass it on to New York and New England. [Laughter and applause.]

Mr. MADDEN. Why kiss the commerce? [Laughter.]

Mr. FOCHT. Mr. Chairman, I will say it is a worthy if not brilliant championship, although I have not yet said I would vote for the "pork-barrel" bill. [Laughter.]

Mr. CAMPBELL of Kansas. Mr. Chairman, may I ask the gentleman a question on this paragraph, under the paragraph?

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that the gentleman from Kansas [Mr. CAMPBELL] may have one minute.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the gentleman from Kansas may proceed for one minute. Is there objection?

There was no objection.

Mr. CAMPBELL of Kansas. I wanted to know from the gentleman from North Carolina, the chairman of the committee, what justification there is for this item on lines 22 and 23? I know something about the Arkansas River. I am just interested in knowing what justification there is for this item of $35,000.

Mr. SMALL. I will answer the gentleman's question frankly. The commerce on that river is not as large in volume as could be desired. [Laughter.] I am speaking seriously and frankly.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. MADDEN. Mr. Chairman, will the gentleman from North Carolina yield to me for one question?

Mr. SMALL. First, Mr. Chairman, may I be permitted to proceed for one minute?

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. SMALL. This $35,000 carried on this item is under a modified project to confine the work upon the rivers named to snagging operations.

Mr. MADDEN. Why did they snag the operations? [Laughter.]

Mr. CAMPBELL of Kansas. I beg the gentleman from Illinois not to interrupt. This is serious. [Laughter.]

Mr. SMALL. And it is intended as a modification of all previous projects. Now, it is believed that the existing commerce on the river will justify the increased appropriation. The gentleman has some familiarity with the river, and I hope he will vote for this.

Mr. CAMPBELL of Kansas. My familiarity with the river is that you can always see more of the bottom than of the water. [Laughter.] You can rarely see anything but the sand in the Arkansas River.

Mr. SMALL. That is not always true.

Mr. CAMPBELL of Kansas. Yes. In flood time, just as in Cow Creek, the Arkansas will show considerable water. [Laughter.]

The CHAIRMAN. The time of the gentleman from North Carolina has expired. The Clerk will read.

The Clerk read as follows:

Black and Current Rivers, Ark. and Mo.; White, St. Francis, and L'Anguille Rivers and Blackfish Bayou, Ark.: For maintenance, $28,700.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MADDEN. I dislike very much to interrupt the proceedings of the House, but——

Mr. SMALL. Will the gentleman from Illinois allow me to interrupt him in order to ask unanimous consent that the debate on the pending paragraph close in six minutes?

Mr. MADDEN. I probably will take not more than two minutes.

Mr. SMALL. Make it four minutes, including two minutes for the gentleman from Wisconsin.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the debate on the pending paragraph close in four minutes. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, I simply wanted, if I could, to call attention to the awkwardness of the language in the preceding paragraph for maintenance of snagging operations. I can not understand why we should spend $28,000 to snag the operations in the Arkansas River. It seems ridiculous. I think if we are to spend the money it should be for improvement. [Laughter.]

Mr. CAMPBELL of Kansas. That is to enable the sand to go down the river. Occasionally there is a tree lying diagonally across the river, and that stops the sand from running down, and the idea is to take out this snag so as to enable the sand to go down.

Mr. MADDEN. I did not so understand the language. I thought when you snagged the operation you stopped it. [Laughter.]

Mr. CAMPBELL of Kansas. It is to promote the flow of the sand. [Laughter.]

Mr. MADDEN. I do not think the sand flows very quickly. You ought not to snag it when it does begin to flow. [Laughter.]

Mr. RANDALL. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. RANDALL. I understand that the gentleman considers that there is no water in sight in this river and other rivers?

Mr. MADDEN. I have not had my glasses adjusted so that I am able to see those things.

Mr. RANDALL. If that is true, I wonder whether that is the reason why it is supported by the gentleman from Missouri [Mr. MEEKER]?

Mr. MADDEN. As I say, I have not had my glasses adjusted so as to enable me to see these things, but I am quite sure if you went down into the sand far enough you would find some moisture. But I do not see why you should snag that. [Laughter.] Why not keep the money in the Treasury rather than snag the water that is hidden in the sand? [Laughter.]

Mr. FREAR. This is directly in line with the question of the gentleman from Kansas [Mr. CAMPBELL]; $189,517 is on hand to the credit of the Arkansas River, uncontracted for, on the 1st day of March; $3,823,000 has been appropriated for the Arkansas River. In 1915 the actual commerce, excluding sand hauled a short distance, was about 14,123 tons. That is the return for an expenditure of nearly $4,000,000.

Mr. MADDEN. Why does the gentleman exclude sand from the boats upon these rivers?

The CHAIRMAN. The time of the gentleman has expired.

The Clerk will read.

The Clerk read as follows:

Toledo, Port Clinton, Sandusky, Huron, Vermilion, Lorain, Cleveland, Fairport, Ashtabula, and Conneaut Harbors, Ohio: For maintenance, $132,000; completing improvement of Lorain Harbor in accordance with the report submitted in House Document No. 980, Sixty-fourth Congress, first session, and subject to the conditions set forth in said document, $16,500; for improvement of Cuyahoga River, Cleveland Harbor, in accordance with the report submitted in House Document No. 707, Sixty-third Congress, second session, and subject to the conditions set forth in said document, $5,000: *Provided*, That the Government's share in the cost of the improvement in accordance with the final plans

adopted shall not exceed $400,000; in all, $153,500. The unexpended balances of appropriations heretofore made and authorized for the improvement of Conneaut Harbor, Ohio, are hereby made available for completing improvement in accordance with the report submitted in House Document No. 983, Sixty-fourth Congress, first session.

Mr. BATHRICK. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. BATHRICK offers the following amendment: Page 19, line 12, after the figures "$16,500," strike out the semicolon and insert " in accordance with House Document No. 985, Sixty-fourth Congress, completing improvement of Lorain Harbor, $63,150, and $5,000 annually for maintenance."

Mr. BATHRICK. Mr. Chairman, I wonder if the members of the committee will not do me the favor to give me their attention on this item, pertaining seriously to the welfare of a very prosperous community and an important harbor in my district?

Mr. MADDEN. Lorain?

Mr. BATHRICK. The harbor of Lorain.

Mr. MADDEN. If it will not interrupt the gentleman, I want to say that I was very happy to help to originate the improvement of Lorain Harbor several years ago when I was on the Committee on Rivers and Harbors, and I think it is a very worthy project.

Mr. BATHRICK. I thank the gentleman very much and I am sure the committee will respect his judgment. I wish to say that the citizens of the town of Lorain, a place of 60,000 inhabitants, have very thoroughly shown their good will by spending $550,000 of their own money, bonding the city, to improve the harbor and the river that runs into it, in order to make it a successful business proposition.

When the jetties were built which form this harbor an old mistake was made that has been made at many other harbors. The jetty on the west side was not brought up close to the shore. The result was that this construction created a current. For years that current, coming in from the west out of the lake, has carried into the harbor thousands of tons of sand, cutting away a high bank upon the shore, until the facilities for shipping there have become seriously impaired. This amendment that I ask you to put into this bill has been approved by Gen. Black in Document 985. A memorial was made to Congress by the Secretary of War in April a year ago to the effect that this item was approved by the Board of Engineers, but it has not been put into this bill by the committee.

We speak about river and harbor improvement being connected with war purposes. In this harbor is a very large shipbuilding firm that will likely build ships for the Government in this emergency. Time after time the tugs have been obliged to pull ships off these sand bars because of the bank erosion, which I have explained to you. The bill carries an item of $16,500 to bring this west jetty up to the shore and stop the current that is carrying in this sand. but that does not help the present condition of the harbor. Of the 60 acres of the harbor a large proportion of the anchorage has been thus destroyed. If we are to maintain these various harbors and keep them for the commerce that is plying in and out, to carry on not only the commercial trade of the country but to afford suitable war transportation facilities, we must not pare these expenditures too closely. We have in Lorain a large steel company which must get in boatloads of ore and get out its finished products. If you wish to assist the Government in its shipbuilding, you must aid the Lorain company to take out the ships that it builds for the Government, and to do this you must fix our harbor, and this is a war measure in this respect.

I ask you gentlemen of the House to put this into the bill. It has been recommended by the Board of Engineers, as I wish to repeat, in Document 985, and evidently the matter was overlooked in the committee consideration of this bill. Water that was 21 or 22 feet deep has been decreased in depth to 15, 12, and even to 8 feet by the filling in of this sand. I ask gentlemen of the House to help me put into the bill this item of $63,500, and $5,000 for maintenance. It is a very small matter, considering the fact that 8,000,000 tons of commerce are carried into and out of that port every year.

Mr. STAFFORD. Will the gentleman kindly explain to me the source from which this sand came?

Mr. BATHRICK. I explained that the jetty was not brought in close to the shore, a common mistake formerly made in the construction of many harbors, and the current thus created by the winds and waves has eroded the sand from the bank, bringing thousands of tons of it into the harbor. That is the situation we want to cure. Now, in this item of $16,500 the citizens contribute $3,000, which makes it $19,500. But they have already expended a large sum, and the whole project, costing about $800,000, is not much more than we have ourselves contributed.

Mr. SMALL. Mr. Chairman, it is never any pleasure to oppose the wishes of a fellow Member who wishes to amend a pending bill, and certainly it is no agreeable task in this instance. The gentleman from Ohio [Mr. BATHRICK] has certainly done his part in urging this additional new project before the House, and whatever may be the action of the committee, the gentleman in every respect has discharged his duty diligently and faithfully.

Mr. BATHRICK. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. BATHRICK. The gentleman went with me to see Col. Newcomer, and in our presence did not Col. Newcomer say he did not object to this going into the bill?

Mr. SMALL. I will come to that in a moment.

Mr. BATHRICK. The gentleman was present; he can say yes or no.

Mr. SMALL. Col. Newcomer stated that, but that was not the entire conversation. He said as representing the Chief of Engineers he would not object to any item going in the bill or to the exclusion of any item, but that this was not one of the projects the Chief of Engineers or the Secretary of War could recommend for inclusion in this bill. The gentleman will remember that such was the conversation.

Now, Mr. Chairman, Loraine Harbor is an important harbor; it has a large commerce of about 7,000,000 tons, and no one questions the importance of the project, but what is the status of that harbor? The existing project provides for an outer harbor protected by a breakwater to provide a depth of 21 feet below mean lake level. We have one new project included in the bill of $19,500, and the city of Loraine is to contribute $3,000, leaving $16,500 for the Government. That new project that is in the bill provides for the extension of the west breakwater to the shore to stop the erosion and filling up of the channel of the harbor. Now, the gentleman wants to have an additional new project the purpose of which is to increase the depth of the harbor 1 additional foot. I want to be frank with the gentleman, because it is a serious matter with him.

Mr. BATHRICK. I am much obliged to the gentleman for his desire to compliment me in this matter, but the matter would not be serious with me if it was not serious for the commerce of Loraine Harbor.

Mr. SMALL. I meant serious in the gentleman in his representative capacity, of course. Loraine Harbor is not the only harbor for which an increased depth is sought and not the only harbor with a favorable report for an increased depth. We must look after them all. If the project is adopted for Loraine Harbor, it will differentiate it from all the other harbors which are seeking increased depth. Loraine Harbor will be provided for in good time just as other harbors will be.

I want to state another fact about the matter: The project has been carefully considered by the Chief of Engineers on its merits and in relation to other harbors on the lake, and the conclusion of it all was that the emergency was not sufficient to justify the recommendation of its inclusion in this bill; that there were other harbors on the Great Lakes similarly situated and seeking greater depth, and in good time they will be recognized in the bill.

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. SMALL. Yes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CAMPBELL of Kansas. I wish the gentleman from North Carolina would take enough time to answer a question.

Mr. SMALL. I will ask for one additional minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CAMPBELL of Kansas. The gentleman from Ohio having made out a good case for Lorain Harbor, and the gentleman from North Carolina having stated that there was a large commerce, what object is there to taking $16,000 out of the Arkansas River project and putting it into Lorain Harbor—cutting down the Arkansas River project to that extent?

Mr. SMALL. I do not know whether the gentleman is facetious or serious in his question.

Mr. CAMPBELL of Kansas. I am positively serious.

Mr. SMALL. The gentleman had an opportunity to strike out the item relating to the Arkansas River, but he did not do it. We are now considering Lorain Harbor.

Mr. BATHRICK. Mr. Chairman, I ask unanimous consent for one minute.

The CHAIRMAN. The gentleman from Ohio asks for one minute. Is there objection?

There was no objection.

Mr. BATHRICK. Mr. Chairman, I would not impose upon the House if this were not a serious matter. I have told you that there is a 60-acre harbor there and that nearly half of it

has been filled in, and it is a positive impediment to the large ships bringing the raw materials and the finished products in and out, and it is absolutely necessary that this work should be done. If I did not think so, I would not come to you under the circumstances of the present and ask the House to vote with me on this proposition. I have made no representation that is not entirely correct regarding the matter, and the people of my community, with its big factories, where they employ thousands of men, are positively hampered by these conditions. At times it is difficult to pull these big lake steamers off the bottom. I ask the gentlemen to vote this in, for I know it is right.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The question was taken; and on a division (demanded by Mr. SMALL) there were—ayes 31, noes 15.

So the amendment was agreed to.

Mr. STAFFORD. Mr. Chairman, I believe the amendment is faulty in its description of the document referred to. and I ask unanimous consent that the amendment may be read.

Mr. SMALL. Mr. Chairman, I did not hear the amendment when it was read. I will ask the gentleman if it is inserted in the proper place?

Mr. STAFFORD. It is in the proper place, but it fails to properly describe the session of Congress in the document referred to.

The CHAIRMAN. What is the request of the gentleman from Wisconsin?

Mr. STAFFORD. To have the amendment again read.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the amendment just adopted be again reported. Is there objection?

There was no objection, and the Clerk again reported the amendment.

Mr. SMALL. Mr. Chairman, can it not be agreed that that language may be corrected informally by the Clerk? For instance, the item of $5,000 made in this does not belong there.

Mr. STAFFORD. The document is not properly referred to. It just refers to the Sixty-fourth Congress, and it should say "Sixty-fourth Congress, first session."

Mr. SMALL. Mr. Chairman, I ask unanimous consent that we may recur to this later on and put it in proper shape.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the committee may recur to this amendment later on for the purpose of correcting its verbiage. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, I would like to ask the gentleman from North Carolina what his intention is about running to-night?

Mr. SMALL. Until about 7 o'clock.

Mr. MADDEN. A good many Members object to that.

Mr. SWITZER. I would suggest that there probably will not be any discussion of the next two pages.

Mr. MADDEN. I desire to determine whether the gentleman expects to rise pretty soon?

Mr. SMALL. My thought was to move to rise at 7 o'clock.

Mr. MADDEN. Mr. Chairman, I do not want to embarrass the progress of the bill by making the point of order that there is no quorum present, but all of the delay that has been caused in the consideration of the bill to-day has been by the chairman of the committee and the members of the committee in making speeches.

Mr. DUPRÉ. How about the gentleman from Illinois?

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. MADDEN. If the gentleman will agree to stop at half past 6, I shall not make it.

Mr. SMALL. Let us read until half past 6.

Mr. MADDEN. No; I want to have an understanding.

Mr. SMALL. I may have been unfortunate in my expression, but I intended to agree to that.

Mr. MADDEN. Does the gentleman agree to that?

Mr. SMALL. Yes; and I couple with it the hope that we may read the bill.

The Clerk read as follows:

Mackinac, Cheboygan, Rogers City, Alpena, Harbor Beach, and Monroe Harbors, Saginaw, Black, Clinton, and Rouge Rivers, Mich.: For maintenance, $13,500; for improvement of Harbor Beach Harbor in accordance with the report submitted in House Document No. 1700, Sixty-fourth Congress, second session, $100,000; in all $113,500.

Mr. SMALL. Mr. Chairman, I offer the following committee amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 21, line 7, after the numerals "$100,000," insert the following:

"For improving the Rouge River, Mich., in accordance with the report submitted in House Document No. 2063, Sixty-fourth Congress, second session, and subject to the conditions set forth in said document, $490,000: *Provided*, That the Secretary of War may in his discretion substitute Plan B for Plan A."

And strike out the numerals "$113,500" at the end of line 7, page 21, and insert in lieu thereof the numerals "$603,500."

Mr. SMALL. Mr. Chairman, probably the committee desires some statement about this amendment which has been offered. This is a new project for the further improvement of the Rouge River, Mich., near the city of Detroit. The project is for a channel 200 feet wide, 21 feet deep, leading up the river, at a cost of $490,000. There is an alternative plan, although the engineers prefer plan A. It is put in the alternative form in the bill in order to avoid the possibility of being held up by contiguous landowners. Mr. Chairman, the urgency of this appropriation consists in this: There is a large prospective commerce on that stream. The largest increment will come from certain improvements by the Ford Motor Co. They are constructing a large blast furnace for the production of pig iron. and also a plant for the production of steel, and also a large plant for the manufacture of the new Ford farm tractor, which has been developed and which it is now believed is such a device as will meet a great demand among the farmers of the country. I need not refer to the importance of increasing our production of iron and of steel. The amount of both iron and steel being produced at this plant, it is said, will largely exceed the quantity required by this company in the production of Ford automobiles and the farm tractor.

Mr. WALSH. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. WALSH. Will the gentleman give some explanation as to why this item was not included in the original bill?

Mr. SMALL. With pleasure. There seems to have been some misunderstanding as to when the committee was going to consider the bill. After the committee had reported the bill, several gentlemen came here from that section, one of whom was Mr. William Livingstone. He came to the committee, and I told him the situation, and referred him to the Secretary of War. The matter was discussed at that time. That was after the bill was reported, but no final conclusion was reached. At a later time they presented the matter to the Council of National Defense and the Department of Agriculture. The Department of Agriculture has tested quite thoroughly this farm tractor and has given it their approval, and it may be of interest to Members to know that this tractor will do the work of four horses and will be a great labor-saving device. But to proceed, they then took it up with the Council of National Defense and the Department of Agriculture with the result that the department and the Council of National Defense entered into correspondence with the Secretary of War regarding the matter and urging that it constituted an emergency, in view of the production of farm tractors, including the production of steel, which entitled it to be included in this bill.

Mr. GILLETT. Will the gentleman yield?

Mr. SMALL. I will.

Mr. GILLETT. Is this land of which the gentleman spoke on the river?

Mr. SMALL. The plant, the gentleman means?

Mr. GILLETT. Yes.

Mr. SMALL. On the river, yes.

Mr. GILLETT. So it will vastly increase the value of the land, I suppose, to have this improvement made?

Mr. SMALL. I thought the gentleman meant where was the plant of the Ford Co.

Mr. GILLETT. I did.

Mr. SMALL. It will be located on the river.

Mr. GILLETT. I say it will very much increase the value of that land to have this improvement made?

Mr. SMALL. Yes, naturally it would. It may be also of interest to the gentlemen to know that this farm tractor has within the past three months been adopted by the English Government and Mr. Ford very generously sent his men over with plans and a plant has been erected there and they are manufacturing them largely.

It has been recently brought——

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMALL. Mr. Chairman, I ask unanimous consent to proceed for one minute more.

Mr. STAFFORD. Mr. Chairman, I ask that the gentleman's time be extended five minutes, because I wish to direct some inquiries to the gentleman.

Mr. SMALL. I ask for five minutes, then.

The CHAIRMAN. Is there objection?

Mr. SMALL. The Belgian mission since their arrival here have also become interested in it, and on account of the increased production of steel and on account of affording opportunity for the easy production of this farm tractor this project was regarded as one proper to be included in the bill.

And I have here a letter from the Secretary of War, which I will not have the time to read fully, but will insert in the RECORD. The letter is as follows:

WAR DEPARTMENT,
Washington, June 13, 1917.

MY DEAR MR. SMALL: I have given consideration to the suggestion that the pending river and harbor bill be amended so as to include the immediate undertaking of the proposed improvement of Rouge River, Michigan, and I now beg leave to recommend that an amendment to that effect be introduced into the bill if it can be done at this stage. It is unnecessary for me to tell you personally the nature of this improvement. The War Department has already recommended the expenditure of about $490,000 at that place, provided local interests assume the cost of the land rights, alteration of bridges, etc., which would provide a channel from the Detroit River to the site of the new blast furnaces which are being built by Mr. Ford on the Rouge River. At this point Mr. Ford is also building a factory for the manufacture of tractors, thus combining the reduction of iron ore and its finished manufacture to a valuable implement for farm use.

I do not feel justified in expressing my personal opinion on the importance of this improvement from a commercial or agricultural point of view, but the economy of transportation effected by making this river available as an inlet for raw material seems to me directly related to the present emergencies of national defense, and, as all the conditions imposed by the War Department in its original recommendation of the project have been met, I hope it will be found possible to include the project in the pending bill.

Cordially, yours,

NEWTON D. BAKER,
Secretary of War.

Hon. JOHN H. SMALL,
Chairman Rivers and Harbors Committee,
House of Representatives.

So it has the recommendation of the Secretary of War. The matter has been carefully considered, and this conclusion has only been reached after mature consideration, and I hope the amendment, which is offered as a committee amendment, will be adopted.

Mr. STAFFORD. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. STAFFORD. As I understand the proposition, it is to improve the River Rouge, which is a tributary of the Detroit River, some 12 miles from Detroit, in a suburb of what is known as Dearborn Township?

Mr. SMALL. I am not familiar with that location.

Mr. STAFFORD. Do I understand this expenditure is to be for the benefit of just merely one private individual or a firm, namely, Henry Ford & Son, which is the concern that is to manufacture the Ford farm tractor?

Mr. SMALL. Unquestionably the Ford company will furnish the largest commerce. And I should have said that the largest commerce, of course, will be iron ore going up the river, and the standardized boats on the lake which transport iron ore can not load to their full capacity and go up the river at its present depth. If the gentleman has the map before him, he will see——

Mr. STAFFORD. I have just obtained a copy of it, but I have not had time to study it.

Mr. SMALL. The gentleman will see that there are other industries there. There is the Detroit Steel Co., for instance, and a lumber company and carbon works. There is other commerce to be affected.

Mr. STAFFORD. As I understand the project, if the gentleman will permit, if he has stated it—and I have not given it the thorough consideration that the gentleman may have given it—this improvement is for the sole purpose of improving the property of Henry Ford & Son, located in Dearborn Township.

As I understand the gentleman's amendment, the purpose is to expend some four hundred thousand and odd dollars on this improvement. Is that the amount of the gentleman's amendment?

Mr. SMALL. That is the amount to be appropriated.

Mr. STAFFORD. What is the total amount that will be expended to complete the project?

Mr. SMALL. Four hundred and ninety thousand dollars is the total amount. The total amount is recommended because of the necessity of completing the improvement at the earliest date and in the interest of economy.

Mr. STAFFORD. Will the gentleman inform the committee as to the extent of the improvement, as to what length on the Rouge River this dredging is going to take place in order to reach the Ford property?

Mr. SMALL. It provides for a channel 21 feet deep through a canal, which is designated as plan "A," and which is recommended as preferable to plan "B." Local interests must donate the land, assume the cost of bridge alterations, and all damages that may result from the improvement; and further, must provide a suitable turning basin for public use at the upper end of the improvement.

Mr. STAFFORD. Then, as I understand, the project the Government is undertaking——

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. STAFFORD. As I understand the project, the Government is undertaking the dredging of a stream that is to-day not navigable, for a distance of 4.4 miles, to reach the property of some private individual who wishes to erect a private establishment there, so that the lake boats can reach his premises?

Mr. SMALL. If the gentleman will permit me to answer, I will state very frankly that the Ford Motor Co. from the port will furnish the greater part of the commerce.

Mr. STAFFORD. Is it not a fact that Henry Ford & Son, who control this property, as distinguished from the Ford Motor Co., will be the sole beneficiaries of this improvement on the Rouge River? Is it not a fact that Henry Ford & Son own all the land above the mouth of the Rouge River?

Mr. SMALL. I will read from the report of the Chief of Engineers. He says the district officer states that other companies make use of the river, and some of them desire an increased depth, which will be fully met by the improvement proposed.

Mr. Chairman, if the gentleman will permit me just along that line, I would like to say this further: As I stated frankly, Ford, by whatever name you please, the Ford Motor Co. or Henry Ford & Son—whoever is the owner of this blast furnace for the production of pig iron and steel and this tractor plant—will furnish the greater part of the commerce. But, Mr. Chairman, that does not militate against the proposition that if there is commerce there, justifying the appropriation for the improvement, it ought to be made. The mere fact that there is only one company or one partnership which is going to engage in this large industry, to furnish all of this large water commerce, ought not to militate against it.

Mr. DEMPSEY. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. DEMPSEY. Is it not a fact that the Ford Co. alone will require a daily tonnage of about 6,000 tons of ore, averaging that every day throughout the year? And is it not a fact also that where a vast industry of that kind springs up at one given place it always necessarily and inevitably carries in its train other industries which grow out of it and become assessory to it and a part of the same line of industries which that simply is the beginning of?

Mr. SMALL. That almost invariably follows. May I call the attention of the gentleman from Wisconsin to this? There is no commerce from this plant at the present time at all.

Mr. STAFFORD. A year ago it was nothing more than farm land.

Mr. SMALL. I was going to call the gentleman's attention to the commerce already on the river.

Mr. STAFFORD. The part of the property that is to be improved for the benefit of Henry Ford & Son was only farm land a year ago. Then he started the plant to manufacture Ford tractors.

Mr. SMALL. The Rouge River had a commerce in the year 1915 of 1,651,833 tons.

Mr. STAFFORD. That commerce is only at the mouth of the river, not at this point, where this improvement is sought to be made. There is the gentleman here from Detroit, and if I am in error I would like to be corrected.

Mr. SMALL. I have never been to Detroit, and I can only base my statement on the engineer's report. I think the gentleman is mistaken about this. I think the commerce exists on the river. I admit that the proposed improvement provides a channel farther up the river than has heretofore existed for general commerce, but——

Mr. STAFFORD. I would like to direct this inquiry to the gentleman: Is there any instance where the National Government has appropriated money for the dredging of a channel which is for the sole benefit of one individual concern?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. WALSH. Mr. Chairman, I rise to a point of order.

Mr. STAFFORD. I ask unanimous consent that the time of the gentleman may be extended.

Mr. WALSH. Mr. Chairman, I make a point of order that there is no quorum present.

Mr. SMALL. Will not the gentleman withdraw that and let us complete this item?

The CHAIRMAN. Does the gentleman from Massachusetts withhold his point of order?

Mr. WALSH. It is apparent that you are not going to complete it in the near future. I will withhold it for five minutes further.

Mr. SMALL. We are going to rise at half past 6. We will complete it by that time.

Mr. WALSH. I will withhold it for five minutes. Then I will renew it.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] asks unanimous consent that the gentleman from North Carolina [Mr. SMALL] may proceed for five minutes. Is there objection?

There was no objection.

Mr. SMALL. I can not recall where any river has been improved solely for the benefit of one corporation or one firm. However, the fact that one corporation may furnish the larger proportion of this commerce may be somewhat unusual. Still they do not furnish all the commerce. There are other industries there, as shown by the fact that for the year 1915 there was over 1,600,000 tons of commerce, at a valuation of over $3,000,000.

Mr. STAFFORD. That is at the mouth of the river where there is a coke establishment. That is not at the place where the land is owned exclusively by Henry Ford & Son, and where this improvement is to be made.

Mr. SMALL. Will the gentleman from Michigan [Mr. DOREMUS] give us some information on that point?

Mr. DOREMUS. I will state to the gentleman from Wisconsin that this improvement is not entirely for the benefit of Mr. Ford. It is true that the land on which he is building this establishment was at one time farm land. It is also true that the land upon which the city of Milwaukee stands was at one time farm land; and to my mind the fact stated by the gentleman forms no logical objection to this project.

Mr. STAFFORD. Will the gentleman yield?

Mr. DOREMUS. Yes.

Mr. STAFFORD. Is it not a fact that the land on the upper stream, where most of this money is to be expended, is owned exclusively by Henry Ford & Son, and that the benefit will redound exclusively to that concern?

Mr. DOREMUS. No; that is not true. The gentleman is entirely mistaken. There are various property owners along the River Rouge, and if this river is deepened, as provided in the amendment offered by the committee, it will inure to the benefit not only of Mr. Ford but of every other manufacturer who locates upon the river.

Mr. STAFFORD. How much land do Henry Ford & Son own at Dearborn and along the River Rouge?

Mr. DOREMUS. I have no idea.

Mr. STAFFORD. Several thousand acres, do they not?

Mr. DOREMUS. Quite a lot of it; yes.

Mr. SMALL. I am obliged to the gentleman for furnishing the information. If he desires to make any further statement in my time he may do so, or we will get him time.

Mr. DOREMUS. I have nothing further to suggest, unless some one wishes to ask me another question.

Mr. STAFFORD. I will ask the chairman of the committee this question: I notice in the report of the Chief of Engineers that he makes a recommendation for only $200,000 as the first appropriation.

Mr. SMALL. As the initial appropriation.

Mr. STAFFORD. And he recommends a contract authorization for the balance?

Mr. SMALL. Yes.

Mr. STAFFORD. But the amendment provides for the appropriation of $490,000.

Mr. SMALL. The recommendation of the board was for an initial appropriation of $200,000, but because of the importance of finishing this improvement as soon as possible and because economies in the work could be effected, it was deemed advisable to recommend the appropriation of the entire amount at this time. These constitute the reasons for appropriating in this case the entire estimated cost.

SEVERAL MEMBERS. Vote! Vote!

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. WALSH. Mr. Chairman, I renew my point of order that there is no quorum present.

Mr. SMALL. We had an agreement with the gentleman from Illinois to rise at 6.30. Let us go on until then.

Mr. WALSH. I was not aware of any agreement with the gentleman from Illinois, but I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman makes the point of order that there is no quorum present. The Chair will count. [After counting.] Forty-four Members present, not a quorum.

Mr. SMALL. Mr. Chairman, we had a discussion of this matter a while ago and an agreement to rise at 6.30. I do not think it was gracious or right for the gentleman to make the point of no quorum. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HUMPHREYS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the river and harbor bill (H. R. 4285) and had come to no conclusion thereon.

ADJOURNMENT.

Mr. SMALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 22 minutes p. m.) the House, under its previous order, adjourned until to-morrow, June 26, 1917, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication of the Secretary of the Interior, submitting an estimate of appropriation for removal and storage of Patent Office models (H. Doc. No. 203); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of communication from the Secretary of Agriculture, submitting an urgent estimate of appropriation for preventing establishment and spread of pink boll worm in Texas (H. Doc. No. 204); to the Committee on Appropriations and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. TINKHAM: A bill (H. R. 5180) to authorize the establishment in the War Department of a board on military engines; to the Committee on Military Affairs.

By Mr. MASON: A bill (H. R. 5181) to amend an act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States"; to the Committee on Military Affairs.

Also, a bill (H. R. 5182) to amend an act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States"; to the Committee on Military Affairs.

By Mr. NEELY: A bill (H. R. 5183) accepting the establishment of the route of the national or Cumberland road through the city of Wheeling, in the State of West Virginia, as declared by the Legislature of the State of West Virginia; to the Committee on Roads.

By Mr. BRITTEN: A bill (H. R. 5184) to authorize the President to exempt from foreign military service, upon their request, such citizens of German or Austrian birth or descent whose blood ties in the enemy country might discourage the supreme effort that is necessary for the victory of our troops on foreign soil; to the Committee on Military Affairs.

By Mr. HULBERT: A bill (H. R. 5185) to appropriate $500,000 and authorizing the expenditure thereof to provide instruction in French to the soldiers of the United States Army; to the Committee on Appropriations.

By Mr. DILL: Resolution (H. Res. 108) providing payment for clerical service rendered the mileage committee; to the Committee on Accounts.

By Mr. FLOOD: Joint resolution (H. J. Res. 109) authorizing the Secretary of War to issue temporary permits for diversions of water from the Niagara River; to the Committee on Foreign Affairs.

By Mr. CHARLES B. SMITH: Joint resolution (H. J. Res. 110) to appoint a commission to visit countries cooperating with the United States in the present war; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FESS: A bill (H. R. 5186) granting a pension to Mary E. Phillips; to the Committee on Invalid Pensions.

By Mr. HARRISON of Virginia: A bill (H. R. 5187) for the relief of James P. Wayland; to the Committee on Military Affairs.

By Mr. KALANIANAOLE: A bill (H. R. 5188) granting an increase of pension to Frank Godfrey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5189) to correct the military title of Fred R. Nugent; to the Committee on Military Affairs.

By Mr. KINKAID: A bill (H. R. 5190) granting an increase of pension to Francis J. Uhler; to the Committee on Invalid Pensions.

By Mr. KRAUS: A bill (H. R. 5191) granting an increase of pension to Jacob Reichard; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 5192) granting a pension to Frank Arnett; to the Committee on Pensions.

Also, a bill (H. R. 5193) granting a pension to Cottington Bond; to the Committee on Pensions.

Also, a bill (H. R. 5194) granting a pension to George W. Blanton; to the Committee on Pensions.

Also, a bill (H. R. 5195) granting a pension to Ross D. Caudill; to the Committee on Pensions.

Also, a bill (H. R. 5196) granting a pension to Leslie Higgins; to the Committee on Pensions.

Also, a bill (H. R. 5197) granting a pension to W. O. B. Tibbs; to the Committee on Pensions.

Also, a bill (H. R. 5198) granting a pension to T. H. Williams; to the Committee on Pensions.

Also, a bill (H. R. 5199) granting a pension to Henry Stratton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5200) granting a pension to Henderson Scott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5201) granting a pension to William F. Robertson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5202) granting a pension to Benjamin H. Kimbler; to the Committee on Pensions.

Also, a bill (H. R. 5203) granting a pension to Solomon Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5204) granting a pension to G. W. H. Kimbler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5205) granting a pension to John Preston; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5206) granting an increase of pension to William R. Horn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5207) granting an increase of pension to Joseph Halcomb; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5208) granting an increase of pension to Isaac Montgomery; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5209) granting an increase of pension to Sherwood Osborn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5210) granting an increase of pension to Cyrus O'Brian; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5211) granting an increase of pension to Anderson Peters; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5212) granting an increase of pension to W. R. Pinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5213) granting an increase of pension to Samuel Williams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5214) granting a pension to S. B. Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5215) granting an increase of pension to William Pemington; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5216) granting an increase of pension to William Freeman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5217) granting an increase of pension to Charles B. Daniel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5218) granting an increase of pension to Elijah W. Prater; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5219) granting an increase of pension to Harmon Hall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5220) granting an increase of pension to James P. Neikirk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5221) granting an increase of pension to John McKinney; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5222) granting an increase of pension to Alfred A. Gambill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5223) granting an increase of pension to Thomas Campbell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5224) granting an increase of pension to Henderson Craft; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5225) granting an increase of pension to Elihu Cammel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5226) granting an increase of pension to Delaney Bowling; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5227) granting an increase of pension to Nathaniel Blackburn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5228) granting an increase of pension to Major S. Bowman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5229) granting an increase of pension to George W. Adkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5230) granting an increase of pension to Isaiah Blair; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 5231) to reinstate Alonzo E. Wheat to his former rank and grade in the Philippine Scouts, United States Army; to the Committee on Military Affairs.

By Mr. STEENERSON: A bill (H. R. 5232) granting an increase of pension to John F. Gibbons; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 5233) granting an increase of pension to Johnson Harris; to the Committee on Invalid Pensions.

By Mr. TIMBERLAKE: A bill (H. R. 5234) granting a pension to A. P. V. A. McCoy; to the Committee on Invalid Pensions.

By Mr. VAN DYKE: A bill (H. R. 5235) authorizing the appointment of Morten R. Brock as a captain in the United States Army and providing for his retirement; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the women of Franklin County, Mo., urging that the Government at Washington use all honorable means to induce the entente allies to propose peace without annexation or indemnity; to the Committee on Foreign Affairs.

Also (by request), petition of the women voters of Oregon, urging the passage of the Federal suffrage amendment at this session of Congress; to the Committee on the Judiciary.

Also (by request), petition of the Presbytery of Allegheny of the United Presbyterian Church, Springdale, Pa., urging the prohibition of the manufacture and sale of intoxicating liquors; to the Committee on the Judiciary.

Also (by request), petition of Platteville District Epworth League Convention, Platteville, Wis., urging immediate prohibition of the liquor traffic; to the Committee on the Judiciary.

Also (by request), petition of Federal Employees' Union, No. 15294, urging the enactment of the Lever food-control bill; to the Committee on Agriculture.

Also (by request), petition of the First Christian Church of Jacksonville, Fla., urging the enactment of national prohibition as a war measure; to the Committee on the Judiciary.

Also (by request), petition of residents of Danville, Ill., urging the prohibition of the manufacture of alcoholic liquors as a food conservation measure; to the Committee on Agriculture.

Also (by request), petition of the Louisiana League for Woman Suffrage, urging the immediate passage of the Susan B. Anthony amendment; to the Committee on the Judiciary.

Also (by request), petition of the Cumberland North Association of Congregational Churches and Ministers, Freeport, Me., urging the immediate enactment of national prohibition as a food conservation measure; to the Committee on Agriculture.

Also (by request), memorial of citizens of Evansville, Ind., favoring regulation of food prices, etc.; to the Committee on Agriculture.

By Mr. ANTHONY: Memorial of Mrs. Jessie Armel, of Holton, Kans., for prohibition during the war; to the Committee on the Judiciary.

By Mr. ASHBROOK: Memorial of Ohio Wesleyan Branch of the Association of Collegiate Alumnæ; Delaware (Ohio) Chapter of the Daughters of the American Revolution; and 126 Christian women of Delaware, favoring an effective zone for all military camps, within which the sale of liquor and the presence of prostitutes are prohibited; to the Committee on Military Affairs.

By Mr. AUSTIN: Memorials of Woman's Missionary Societies, of Knoxville; Woman's Missionary Society of Methodist Epis-

copal Church South, of Tennessee; and citizens of Clinton, Tenn., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. DRUKKER: Petition of sundry citizens of Paterson and Clifton, N. J., opposing the passage of prohibition measures; to the Committee on the Judiciary.

Also, petition of the Citizens' Union of Paterson, N. J., through its secretary, John E. Tylee, commending the action of the House of Representatives in passing the food-control bill with its provision for the prohibition of the manufacture of intoxicating liquors during the period of the war; to the Committee on Agriculture.

By Mr. EDMONDS: Petition of Philadelphia Chamber of Commerce, relative to abrogation of certain patents of enemy countries; to the Committee on Patents.

By Mr. ESCH: Petition of the Wisconsin State Council of Defense, urging the immediate assumption of control by the United States Government over the coal mines in the United States and the operation of these mines by the Federal Government to insure an adequate supply and a proper distribution; to the Committee on Interstate and Foreign Commerce.

By Mr. GALLIVAN: Memorial of the New England Newspaper Alliance, against tax on newspaper advertising; to the Committee on Ways and Means.

By Mr. GOODALL: Petition of George E. Ackerman and other citizens of Brunswick, Me., for prohibition; to the Committee on the Judiciary.

Also, petition of Alexander Hamilton and other citizens of Old Orchard, Me., for prohibition; to the Committee on the Judiciary.

Also, petition of Gerry Plummer and citizens of Cornish, Me., for prohibition; to the Committee on the Judiciary.

Also, petition of the residents of Portland, Me., for prohibition; to the Committee on the Judiciary.

Also, petition of Thomas P. Baker and other citizens of Kennebunkport, Me., for prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Sarsfield Literary Association, of Woonsocket, R. I., protesting against any increase in rates on second-class mail matter; to the Committee on Ways and Means.

Also, resolutions of Roger Williams Free Baptist Church, of Providence, in the State of Rhode Island, favoring the prohibition of the use of food materials in the manufacture of intoxicating liquors; to the Committee on Agriculture.

By Mr. KETTNER: Petition of the Southern California branch of the Association of Collegiate Alumnæ, urging the creation of effective zones about all military camps; to the Committee on Military Affairs.

By Mr. LUNDEEN: Petition of the Ladies' Bible Class of the Linden Hills Congregational Church, Minneapolis, Minn., Mrs. Max Farwell, secretary, favoring prohibition; to the Committee on the Judiciary.

Also, telegram of the Minneapolis branch of the National Association of Post Office Clerks, M. J. Harkin, chairman, indorsing the Lever food-control bill and urging its passage; to the Committee on Agriculture.

By Mr. McFADDEN: Petition of the Woman's Foreign Missionary Society and the Woman's Home Missionary Society of the Methodist Episcopal Church, Athens, Pa., urging the passage of a bill to prohibit the manufacture and sale of alcoholic liquors during the war; to the Committee on the Judiciary.

By Mr. McKEOWN: Petition of the Osteopathic Association of the State of Oklahoma, favoring national prohibition during the period of the war; to the Committee on the Judiciary.

Also, petition of the State Board of the Osteopathic Association of Oklahoma, tendering the osteopathic services of the members to the Government of the United States; to the Committee on Military Affairs.

By Mr. MORIN: Petition of the Central Trades and Labor Council, Mr. Fred J. Domard, secretary, of Allentown, Pa., urging equal pay for women who are called to take the place of men in industry; to the Committee on Labor.

By Mr. NEELY: Petition of Woman's Club of Fairmont, W. Va., urging national prohibition; to the Committee on the Judiciary.

By Mr. PLATT: Petitions of sundry citizens of Newburgh, Goshen, Middletown, and Rhinebeck, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. RANDALL: Petitions of 249 citizens of Meriden, 217 citizens of South Manchester, 534 citizens of New Britain, 501 citizens of Hartford, 205 citizens of New Haven, 280 citizens of Bridgeport, and 330 citizens of Stamford, all in the State of Connecticut, urging national prohibition of the manufacture and sale of intoxicating liquors for the period of the war, in conservation of the man power, military and industrial efficiency, and the food supply of the Nation, and that all liquors now in bonded warehouses be redistilled by the Government for war purposes; to the Committee on the Judiciary.

Also, memorial of Whittier Women's Christian Temperance Union of Whittier, Cal., against any change in the child-labor law in order that children may work in factories; to the Committee on the Judiciary.

Also, memorial of Women's Christian Temperance Union of Riverside, Cal., indorsing request of General Medical Board of the Army that an effective zone be created about all military camps within which the sale of liquor and the presence of prostitutes shall be prohibited; to the Committee on the Judiciary.

Also, memorial of Woman's Missionary Society, First Congregational Church of Glendale, Cal., to prohibit the manufacture and sale of intoxicating liquors; to the Committee on the Judiciary.

Also, petitions of various citizens of Pasadena, Cal., against transformation of foodstuffs into intoxicating liquors, and to limit liquors on hand to nonbeverage uses; also protesting against evasive reference of issue to overburdened President; to the Committee on the Judiciary.

Also, petitions of the Trinity Missionary Society of Trinity Methodist Episcopal Church South, of Los Angeles, Cal., and Woman's Missionary Society of Redlands, Cal., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROBBINS: Petitions of the Presbyterian Church, New Florence; United Presbyterian Church, Bolivar; citizens of Philadelphia; Baptist Church, Scottdale; O. A. B. C. of the Presbyterian Church, New Salem Borough, Delmont; United Brethren Church, Ligomer Valley; all in the State of Pennsylvania; favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SANDERS of New York: Petition of 130 residents of Rochester, N. Y., protesting against the enactment of any legislation, excessive taxation, or other regulation that would result in the prohibition of the liquor traffic; to the Committee on the Judiciary.

Also, petition of the members of the Baptist Church of Churchville, N. Y., favoring prohibition during the period of the war for the conservation of the food supply; to the Committee on Agriculture.

By Mr. SANFORD: Papers to accompany House bill 5019, for the relief of John McNeil; to the Committee on Military Affairs.

By Mr. SHOUSE: Petition of residents of Coldwater and Larned, Kans., and vicinity, favoring legislation prohibiting the use of foodstuffs in the manufacture of alcoholic liquors; to the Committee on Agriculture.

By Mr. SNYDER: Petition of the New Century Club, Utica, N. Y., for the moral protection of the Army; to the Committee on Military Affairs.

By Mr. STEENERSON: Petition of a mass meeting for the organization of the Roseau County Public Safety Commission of Minnesota, urging prohibition of the manufacture and sale of alcoholic liquor as a beverage; to the Committee on the Judiciary.

By Mr. TAGUE: Petitions of Switchmen's Union of North America and Chamber of Commerce of the United States of America relative to passage of the food-control bills; to the Committee on Agriculture.

Also, petition of F. W. Whitcher Co., of Boston, Mass., favoring passage of House bill 4630 relative to food control; to the Committee on Agriculture.

By Mr. WALDOW: Petition of the citizens of Hamburg, N. Y., favoring national prohibition and protesting against war tax on the same; to the Committee on the Judiciary.

Also, petition of the New York State conference of mayors and other city officials, favoring the immediate enactment of laws conferring upon the national administrative authorities the power to regulate the prices of food products to insure an equitable distribution of the food supply and also to provide for the proper distribution of coal at reasonable prices to the cities and to the consumers; to the Committee on Agriculture.

By Mr. WOODYARD: Petition of the Woman's Club of Fairmont, W. Va., protesting against the use of grain in the manufacture of alcoholic liquors; to the Committee on Agriculture.

By Mr. YOUNG of North Dakota: Petition of the North Dakota Branch of World's Purity Federation, and of Mrs. W. W. Anderson and 38 other citizens of Englevale, N. Dak., urging the adoption of national prohibition as a war measure; to the Committee on the Judiciary.

SENATE.

TUESDAY, *June 26, 1917.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we invoke Thy blessing and seek Thy guidance for the duties of this day. We thank Thee that Thou hast brought us into a great league of nations with a common impulse of humanity and with a desire only to advance the interests of man. We thank Thee for our conception of the human life. Above all the institutions of the world Thou hast placed this crowning glory of Thy creation. Grant, we pray, that we may stand in deathless and loyal devotion to the interests of humanity, and that we may press forward in our glorious cause. Do Thou, O Lord, lead us to victory. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of the proceedings of the legislative day of Friday, June 22, 1917, when, on request of Mr. GALLINGER and by unanimous consent, the further reading was dispensed with and the Journal was approved.

Mr. SHAFROTH. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	McNary	Shields
Bankhead	Hollis	Martin	Smith, Ariz.
Beckham	Husting	Myers	Smith, Ga.
Brady	James	Nelson	Smith, Md.
Brandegee	Johnson, Cal.	New	Smith, Mich.
Calder	Johnson, S. Dak.	Newlands	Smoot
Chamberlain	Jones, N. Mex.	Norris	Sterling
Colt	Jones, Wash.	Overman	Stone
Culberson	Kellogg	Owen	Sutherland
Cummins	Kendrick	Page	Swanson
Curtis	Kenyon	Penrose	Thomas
Dillingham	King	Phelan	Thompson
Fernald	Kirby	Poindexter	Tillman
Fletcher	Knox	Pomerene	Underwood
Frelinghuysen	La Follette	Ransdell	Vardaman
Gallinger	Lewis	Robinson	Wadsworth
Gerry	Lodge	Saulsbury	Warren
Gronna	McCumber	Shafroth	Weeks
Hale	McKellar	Sheppard	Williams
Harding	McLean	Sherman	

Mr. FRELINGHUYSEN. I desire to announce that the senior Senator from New Jersey [Mr. HUGHES] is detained by illness.

The VICE PRESIDENT. Seventy-nine Senators have answered to the roll call. There is a quorum present.

CITIZENS OF FOREIGN NATIONS.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 21st instant, a statement relative to the number of men in the United States between the ages of 21 and 31 years who are citizens of foreign nations now engaged in war with the Imperial German Government, and also those who are denominated alien enemies. The communication and accompanying papers will be printed in the RECORD and referred to the Committee on Military Affairs.

The communication is as follows:

WAR DEPARTMENT,
Washington, June 22, 1917.

To the SECRETARY UNITED STATES SENATE.

SIR: In response to Senate resolution of June 21, 1917, which is as follows:

"*Resolved*, That the Secretary of War be, and he is hereby, requested to furnish to the Senate a statement, by States, of the number of men in the United States between the ages of 21 and 31 years who are citizens of foreign nations now engaged in war with the Imperial German Government, and also those who are denominated alien enemies,"

I have to say that complete information of the citizenship of persons registered was collected on registration cards, but for the purposes of the execution of the selective-service law it was only desirable to have included in the telegraphic reports rendered to the office of the provost marshal general the following citizenship classification:

(a) Citizens of the United States and persons who have declared their intention to become citizens and who are not citizens of a country with which the United States is at war.

(b) Persons who have not declared their intention to become citizens of the United States and who are not citizens of a country with which the United States is at war.

(c) Citizens of a country with which the United States is at war regardless of whether such persons have declared their intention to become citizens of the United States. (These are denominated "alien enemies.")

From the above statement it will appear that it is not possible at present to furnish information in precise response to the resolution of the Senate of June 21. There is, however, inclosed herewith a statement showing classes (b) and (c) as described above, by States, with the total in each class for the United States.

The registration cards and their copies are now segregated in some 4,000 groups in the possession of the various registration boards, and it would not be practicable at this time to excerpt from them the number of citizens of foreign nations now engaged in war with the Imperial German Government without considerable interference with the prompt execution of the selective-service law. Within two or three weeks the copies of these cards will be collected in fewer and larger groups and, if the information requested by the Senate is still desired, it can conveniently be obtained at a cost of about $3,000.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

United States.	Aliens.	Alien enemies.

(1) Not reported.

MANUFACTURE OF PRISON-MADE GOODS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting reports from the consuls at Punta Arenas, Chile; Teheran, Persia; Madras, India; Mombasa, East Africa; Seville, Spain; Milan, Italy; Basel and Geneva, Switzerland; and Edinburgh, Scotland, relative to the extent to which prisoners, paupers, or detained persons are utilized in the production or manufacture of the commerce of various countries, which, with accompanying papers, was referred to the Committee on Printing.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by G. F. Turner, one of its clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 3548. An act providing for the modification of the designs of the current quarter dollar; and

H. R. 4897. An act to amend section 10 of the national-defense act approved June 3, 1916, and for other purposes.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of the Frederick District Epworth League, of Maryland; of the congregations of the First Baptist Church and the Methodist Episcopal Church of East Greenwich, R. I.; of the Camden Baptist Association of Merchantville, N. J.; and of sundry citizens of Apollo, Pa., praying for national prohibition as a war measure, which were ordered to lie on the table.

He also presented a petition of sundry citizens of Boston, Mass., praying that all bequests, legacies, devises, or gifts to the United States be exempted from taxation, which was referred to the Committee on Finance.

He also presented resolutions adopted at the annual convention of the Ladies of the Grand Army of the Republic for the

Department of California and Nevada, pledging support to the Government during the war, which were ordered to lie on the table.

He also presented resolutions adopted by the council of the city of Oshkosh, Wis., relative to the coal situation in that State and throughout the country, which was referred to the Committee on Agriculture and Forestry.

Mr. SHEPPARD presented memorials of the Woman's Missionary Society of the Methodist Church South, of Plano; of the Ladies' Methodist Missionary Society of Chireno; of the Missionary Society of the Methodist Episcopal Church South, of Cooper; and of the Gleaner Missionary Society of St. Paul's Church, of Houston, all in the State of Texas, praying for national prohibition as a war measure, which were ordered to lie on the table.

Mr. THOMPSON presented petitions of sundry citizens of Glade and Olsburg, Kans., praying for national prohibition as a war measure, which were ordered to lie on the table.

He also presented a petitions of sundry citizens of Natoma, Kans., praying for the enactment of legislation to provide for the prohibition of the manufacture of alcoholic liquors as a measure of food conservation and to prohibit the manufacture of intoxicating liquors for beverage purposes, which was ordered to lie on the table.

Mr. ROBINSON. I present telegrams in the nature of petitions from citizens of my State, relative to the passage of the pending food bill, which I ask to have printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

CHICAGO, ILL., *June 21, 1917.*

Hon. JOSEPH T. ROBINSON,
The Capitol, Washington, D. C.:

Respectfully recommend immediate passage of Lever food bill, H. R. 4961. Our experience as wholesale grocers and our knowledge of the food conditions of the country convince us that immediate action is imperative.

W. J. ECHOLS & Co.,
Fort Smith, Ark.

—

CHICAGO, ILL., *June 21, 1917.*

Hon. JOSEPH T. ROBINSON,
The Capitol, Washington, D. C.:

Respectfully recommend immediate passage of Lever food bill, H. R. 4961. Our experience as wholesale grocers and our knowledge of the food conditions of the country convince us that immediate action is imperative.

REYNOLDS-DAVIS GROCERY CO.,
Fort Smith, Ark.

—

MEMPHIS, TENN., *June 21, 1917.*

Hon. J. T. ROBINSON,
Senate, Washington, D. C.:

In response to President Wilson's call farmers of Mississippi, Arkansas, and Tennessee have raised greatly increased crops of food and feed. the preservation and marketing of which absolutely requires immediate cooperation of some organization vested with authority such as pending food-control legislation contemplates. Delay in passage of such legislation will work irremediable injury to the South as a reward for her patriotic response to the Nation's call. Representatives of business organizations of Memphis, Little Rock, Jackson, and other cities and towns of three States, also representatives of agricultural departments of the three States, cooperative extension forces and agricultural departments of eight railroads assembled in meeting of tri-State better farming committee demand immediate action on food-control measures now pending.

CHARLES J. HAASE, *Chairman,*
E. R. LLOYD,
H. A. MORGAN,
W. C. LASSETTER,
Committee.

—

PINE BLUFF, ARK., *June 21, 1917.*

Senator JOSEPH ROBINSON,
Washington, D. C.:

We, the International Association of Machinists of Cotton Belt Lodge, No. 51, ask you to use your influence in the passage of the Lever food administration bill.

Yours, respectfully,
ROBERT MALLEY,
Legislative Committee.

—

ARGENTA, ARK., *June 21, 1917.*

Hon. JOSEPH T. ROBINSON.

DEAR SIR: At our last regular meeting a resolution was passed to appeal to our Senators and Representatives to vote for the Lever food bill, also asking your influence to have others to vote for its immediate enactment, that it may become a law before food speculators buy up the incoming crops. This is more important to our Nation than soldiers' guns or ammunition. Hoping this will meet with your favorable consideration, we all beg to remain.

Very truly,

J. B. SWISHER,
909 Pike Avenue, Recording Secretary,
C. P. CLARK,
H. M. STALEY,
Committee.

Mr. BECKHAM. Mr. President, I have received a telegram from Col. E. H. Taylor, jr., of Frankfort, Ky. Col. Taylor is a prominent citizen of Kentucky, and one of the largest and most successful distillers in the State. His views on war prohibition, as expressed in this telegram, are therefore especially interesting and significant at this time. I ask that the telegram be inserted in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

FRANKFORT, KY., *June 22, 1917.*

Hon. J. C. W. BECKHAM,
United States Senate, Washington, D. C.:

I beg to respectfully suggest that the corn crop of the entire corn belt is certain to be shortened by abnormal prevailing conditions, and the certain scarcity of all foodstuffs is a greater national menace than is the German submarine, and that the use of grains to-day in the manufacture of whisky and beer is entirely speculative and in bad faith to the Government. Conservation of every unit is essential, and my belief is well grounded that no bushel of grain should be used pending the war in the manufacture of either whisky or beer. The specious pretensions in favor of the latter are absurd. Every bushel of barley, every bushel of corn, is of certain requirement for food purposes at hugely remunerative prices to the farmer. I am one of the largest growers of barley in the State and know whereof I speak. Total prohibition of the uses of these grains for other than food purposes during the war, I am sure, would be in the direction of wise and conservative legislation, and any delay in enacting it, every minute, is playing into the hands of ruthless speculators. Craving your earnest consideration and action, I am, for the Nation's good,

Most respectfully,
E. H. TAYLOR, Jr.

Mr. SHAFROTH. I present a resolution adopted by the Federated Trades Council of Colorado Springs, Colo., which I ask to have printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the United States has entered into an international war to fight for democracy, and also for the right of those who submit to authority to have a voice in their own governments, it is imperative that we first establish democracy in our own country by giving political freedom to our women citizens; and

Whereas women are now being called to aid the Government in the prosecution of war in defense of the Nation's interests, and without their aid this war could not be conducted: Therefore be it

Resolved, That we, the Federated Trades Council of Colorado Springs, Colo., urge a prompt and favorable report by the Judiciary Committee of the House of Representatives on the Susan B. Anthony amendment and the immediate passage of that amendment as a war measure during this session of Congress.

Resolved, also, That a copy of this resolution be sent to EDWIN Y. WEBB, chairman of the Judiciary Committee, to the President, to Speaker CLARK, to the Vice President, to Senator JACOB H. GALLINGER, Senator THOMAS S. MARTIN, Representative CLAUDE KITCHIN, Representative JAMES R. MANN, and to the Colorado delegation, with the request to Hon. CHARLES B. TIMBERLAKE, of the House, and to Senator JOHN F. SHAFROTH, of the Senate, that the resolution be read into the CONGRESSIONAL RECORD.

Mr. CUMMINS. I present sundry telegrams from organizations in the State of Iowa, which I ask to have printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

ROCKWELL CITY, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Senate Chamber, Washington. D. C.:

We, the undersigned, representing the below-mentioned organizations, wish to enter a protest against any legislation that would fix prices for the producer of foodstuffs. Only to prove that farmers are not receiving exorbitant prices I present the following from the books of the Rockwell City Elevator Co. for the period from June 1, 1916, to June 1, 1917, viz, 222,192 bushels of corn, the average price paid was 90 cents; 291,813 bushels of oats, the average price paid was 42½ cents. Please use your influence in behalf of the farmer.

Very respectfully,

HENRY PARSONS,
President of the Rockwell City Elevator Co.
B. E. MORTON,
Director of the Farmers' Grain Dealers' Association of Iowa.

—

EAGLE GROVE, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

If Congress fixed prices on farm products we demand that it fix prices on all other products that we as consumers have to buy.

A. L. MIDDLETON,
Director Iowa Farmers' Grain Dealers' Association.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Care Senate Office Building, Washington, D. C.:

I am in favor of food control of farm products, providing the same control is used in regard to all other products. I demand that speculation be curbed, but that it be left alone unless curbed in everything else.

L. E. TYLER.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I am a farmer and am in favor of control of speculation, but insist that what I have to sell be not placed under Government control unless what I buy be placed on same basis.

GEO. B. BERGESON.

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Care Senate Office Building, Washington, D. C.:

I am in favor of food control of farm products, providing the same control is used in regard to all other products.

R. J. BOURNE.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I am in favor of food control of farm products, but insist that the same control be used in regard to all other products.

L. A. ROBINSON.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I am in favor of curbing the speculation in food and produce, providing it is curbed in everything else.

W. HENDERSON.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I believe in food control of farm produce, providing the same control is used in regard to everything else. Curb prices in everything or let them alone.

E. THOMPSON.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Senate Office Building, Washington, D. C.:

I demand that if speculation is restricted in farm produce it is also restricted in all other produce.

ELMER T. OLSON.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I am a farmer and do not favor control of food prices unless prices are controlled in everything I have to buy.

JOHN OLSON.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

Am a farmer and ask that the control of food products be left as it is unless prices be curbed in everything else.

OLE DANIELSON.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Senate Office Building, Washington, D. C.:

I am a farmer and not in favor of controlling food prices unless everything taken in, and not mostly what the farmer produces.

E. J. KELLEM.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I am a farmer and do favor speculating be curbed, but do not favor control on what I have to sell and not on what I have to buy.

C. E. CARUTH.

—

ELLSWORTH, IOWA, *June 25, 1917.*

Senator A. B. CUMMINS,
Washington, D. C.:

I am in favor of curbing the price of food providing all other produce is curbed likewise.

J. T. THOMPSON.

—

DES MOINES, IOWA, *June 25, 1917.*

Hon. A. B. CUMMINS,
Washington, D. C.:

There has been a general demand on part of Des Moines citizens that the Lever food bill be passed by Congress before July 1, if possible. Trusting you will do all possible to hasten passage of this measure, we are,

DES MOINES CITY COUNCIL,
TOM FAIRWEATHER,
Acting Mayor.

—

MOUNT PLEASANT, IOWA, *June 25, 1917.*

Hon. A. B. CUMMINS,
Care the Senate, Washington, D. C.:

Representing 60,000 families, executive committee, Wesleyan College, commend you heartily for your stand on the prohibition question and ask you to stand solidly for that feature of the food bill regardless of any necessary rearrangements of the national finances. Education, man power, and food are grave questions before world. This answers all.

EDWIN A. SCHELL,
President.
H. A. COLE,
President Board of Trustees.

Mr. SMITH of Michigan. I present resolutions adopted by the common council of the city of Detroit, Mich., relative to the control of food prices, which I ask to have printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

DETROIT, *June 21, 1917.*

Hon. WILLIAM ALDEN SMITH,
United States Senate, Washington, D. C.

DEAR SIR: By direction of the common council, I am transmitting herewith copy of a resolution adopted by said body on the 19th instant, urging the passage of a bill now pending before Congress, having for its purpose the control of food prices:

"By Alderman Burton:

"Whereas there is now pending before Congress a bill to check the operations of the 'food pirates,' so called, and to give the President control of food regulations, which bill seems to be opposed by a well-organized lobby, representing the persons who are largely responsible for the very excessive prices of foodstuffs: Therefore be it

"*Resolved*, That the common council of the city of Detroit, representing a constituency of 850,000, approves the bill now before Congress, known as the Lever bill, introduced by the chairman of the Committee on Agriculture, and earnestly implores the Michigan Representatives of Congress and all other Members of Congress who have the interests of the people at heart to immediately enact a law which will protect the working people of the Nation from the tyrannical ravages of the food barons; and it is further

"*Resolved*, That the city clerk send a copy of this resolution to the chairman of the committee in charge of the bill, and also to Representatives NICHOLS and DOREMUS, and also to the United States Senators from Michigan; and further

"That Representatives NICHOLS and DOREMUS insist, on behalf of Detroit's 850,000 population, that immediate action be taken, before all the foodstuffs and growing crops in the country are contracted for by the food speculators."

Adopted as follows:

Yeas—Aldermen Allan, Ashe, Auch, Bahorski, Bleil, Bradley, Brennan, Burton, Cowan, Crane, Cranshaw, Dill, Ellis, Glinnan, Guthard, Holden, Kronk, Kunz, Littlefield, Lodge, Mitter, Nowe, Riopelle, Robinson, Ross, Schultz, Starkey, Thompson, Vernor, Walsh, Wartell, Zink, and the president—33.

Nays—None.

Respectfully,

RICHARD LINDSAY,
City Clerk.

Mr. SMITH of Michigan. I present a communication from the president and secretary of Hope College, Holland, Mich., relative to the tax on educational, philanthropic, and religious bequests, legacies, and gifts. I ask that the communication be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the communication was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

HOPE COLLEGE AND PREPARATORY SCHOOL,
Holland, Mich., June 14, 1917.

Hon. WILLIAM ALDEN SMITH,
United States Senate, Washington, D. C.

DEAR SIR: I desire to direct your attention to the fact that the existing Federal estate tax law provides no exemption for educational, philanthropic, and religious bequests, legacies, and gifts, but may tax them at a rate which may run up to 30 per cent. This law should certainly be amended by the present Congress so as to conform with previous national and prevailing State legislation.

In the entire United States, for higher education only $36,842,421 comes from private endowment, as compared with $38,061,768 from public taxation. A tax on educational, philanthropic, and religious bequests will cut off a large part, if not all, of this distinctively American contribution to civilization.

It is the earnest desire of the trustees of Hope College that you should use your influence in favor of amending the Federal estate tax law referred to.

Very truly, yours,

A. VENNEMA,
G. J. DIEKEMA,
President and Secretary.

Mr. BRADY. I present resolutions adopted at a mass meeting of the citizens of Sand Point, Idaho, pledging support to the country, to the President, and to Congress during the time of war. I ask that the resolutions be referred to the Committee on Military Affairs.

The VICE PRESIDENT. Without objection that action will be taken.

Mr. CALDER presented petitions of sundry citizens of Jamestown and Lakewood, in the State of New York, praying for the prohibition of the liquor business as a war measure and remonstrating against tax on the same, which were ordered to lie on the table.

Mr. PAGE presented a petition of the Vermont Branch National Association of Game and Fish Commissioners, praying for the conservation and protection of migratory birds, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. MYERS presented a petition of the Woman's Missionary Society of Trinity Methodist Episcopal Church South, of Missoula, Mont., praying for national prohibition as a war measure, which was ordered to lie on the table.

Mr. LODGE presented resolutions adopted by the City Council of Fall River, Mass., favoring the independence of Bohemia, which was referred to the Committee on Foreign Relations.

Mr. McLEAN presented petitions of sundry citizens of New Haven, of the State Young Men's Christian Association, of the Woman's Christian Temperance Union of Torrington, of the Woman's Christian Temperance Union of West Haven, of

the Second Methodist Church and the Second Baptist Church of Waterbury, and of the Connecticut Branch of Collegiate Alumnae, all of the State of Connecticut, praying for national prohibition as a war measure, which were ordered to lie on the table.

He also presented memorials of the New England Brewing Co., of Hartford; of the Hellman Brewing Co., of Waterbury; of the Weiber Brewery, of New Haven; of the Ropkins Brewing Co., of Hartford; of the State Liquor Dealers' Association; of Bartenders' Local Union, of Waterbury; of the F. E. Lalley Co., of Bridgeport; of Brewery Workers' Associations, of New Haven, Bridgeport, and Waterbury; of Charles E. Griffin Manufacturing Co., of New Haven; of Thomas Hine Cigar Manufacturing Co., of Ansonia; of Garde Hotel Co., of Hartford; of Allyn House Hotel Co., of Hartford; of the Hartford Central Labor Union; and of sundry citizens of Hartford, New Haven, Ansonia, Meriden, Bridgeport, and Waterbury, all in the State of Connecticut, remonstrating against national prohibition as a war measure, which were ordered to lie on the table.

He also presented a memorial of Local Union No. 42, Cigar Makers' International Union of America, of Hartford, Conn., remonstrating against the proposed increase of the tax on cigars, which was referred to the Committee on Finance.

THE COMMITTEE ON INTERSTATE COMMERCE.

Mr. THOMPSON, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution No. 92, submitted by Mr. NEWLANDS on the 22d instant, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Interstate Commerce, or any subcommittee thereof, be, and hereby is, authorized, during the Sixty-fifth Congress, to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POINDEXTER:

A bill (S. 2511) to amend section 704 of the act of Congress approved September 8, 1916, entitled "An act to increase the revenue, and for other purposes," to the Committee on Finance.

By Mr. MYERS:

A bill (S. 2512) for the relief of Jacob Osterhus;

A bill (S. 2513) authorizing issuance of patent for certain lands to Clarence E. Broadbrooks; and

A bill (S. 2514) authorizing the leasing for grazing purposes of public lands withdrawn for power sites; to the Committee on Public Lands.

TRADING WITH THE ENEMY.

Mr. PHELAN submitted an amendment intended to be proposed by him to the bill (S. 2445) to define, regulate, and punish trading with the enemy, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

OIL AND GAS LANDS.

Mr. PHELAN submitted an amendment intended to be proposed by him to the bill (S. 45) to encourage and promote the mining of coal, phosphate, oil, gas, potassium, and sodium on the public domain, which was referred to the Committee on Public Lands and ordered to be printed.

WAR REVENUE.

Mr. GERRY submitted an amendment intended to be proposed by him to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

EMPLOYMENT OF MESSENGER.

Mr. NELSON submitted the following resoution (S. Res. 93), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Sergeant at Arms of the Senate is hereby authorized and directed to place on the Senate rolls a messenger for the minority, at the rate of $1,200 per annum, to be paid out of the contingent fund of the Senate until otherwise provided for by law.

CANTONMENT OF NINTH DIVISION.

Mr. NEW. I submit the following resolution and ask for its present consideration.

The VICE PRESIDENT. The resolution will be read.

The Secretary read the resolution (S. Res. 94), as follows:

Resolved, That the Secretary of War be, and is hereby, directed by the Senate of the United States, if not inconsistent with interests of the public service, to transmit to the Senate the reports of the board of officers appointed to select and designate the site for the cantonment of the ninth division, comprising the States of Indiana and Kentucky, together with the report and recommendations relating to its selection made by Gen. T. H. Barry, commanding general, Central Department, United States Army.

Mr. THOMAS. I think that the resolution should go over under the rule.

The VICE PRESIDENT. The resolution will lie over and be printed.

HOUSE BILLS REFERRED.

H. R. 3548. An act providing for the modification of the designs of the current quarter dollar was read twice by its title and referred to the Committee on Banking and Currency.

H. R. 4897. An act to amend section 10 of the national-defense act approved June 3, 1916, and for other purposes, was read twice by its title and referred to the Committee on Military Affairs.

LANDS FOR MILITARY PURPOSES.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 2453) to authorize condemnation proceedings of lands for military purposes, which were, on page 1, line 6, after "land," to insert "temporary use thereof or other interest therein"; on page 1, line 8, to strike out "and" and insert a comma; on page 1, line 8, after "defenses," to insert "and"; on page 1, line 9, to strike out "and other military purposes"; on page 1, line 13, after "land," to insert "interest"; on page 2, line 1, after "purchase," to insert "or enter into a contract for the use of"; on page 2, line 4, after "the," to insert "interest and"; on page 2, line 5, after "purposes," to insert "*And provided further*, That when such property is acquired in time of war or the imminence thereof upon the filing of the petition for the condemnation of any land, temporary use thereof, or other interest therein or right pertaining thereto to be acquired for any of the purposes aforesaid, immediate possession thereof may be taken to the extent of the interest to be acquired and the lands may be occupied and used for military purposes, and the provision of section 355 of the Revised Statutes, providing that no public money shall be expended upon such land until the written opinion of the Attorney General shall be had in favor of the validity of the title, nor until the consent of the legislature of the State in which the land is located has been given, shall be, and the same are hereby, suspended during the period of the existing emergency."

Mr. CHAMBERLAIN. I move that the Senate concur in the amendments of the House.

Mr. SMOOT. Mr. President, I should like to ask the Senator from Oregon just what the amendments propose?

Mr. CHAMBERLAIN. The Government was having some trouble in securing sufficient sites for some of the training camps. This bill proposes to extend the power that the Government already has, and further to give the authorities permission without question to take charge of the sites as soon as proceedings are initiated in the courts.

Mr. SMOOT. I remember the provisions of the bill very well, of course, as it passed the Senate; but what amendments did the House make?

Mr. CHAMBERLAIN. The only material amendment is the one at the end of the bill.

Mr. KIRBY. Mr. President——

Mr. CHAMBERLAIN. That amendment explains itself, if the Senator will have it read. As I gather the amendment, it consists chiefly in striking out the words "and for other military purposes."

Mr. KIRBY. Mr. President, if the Senator from Oregon will permit me, I shall be glad to answer the question.

Mr. CHAMBERLAIN. Certainly.

Mr. SMOOT. I shall be glad to have the Senator from Arkansas do so.

Mr. KIRBY. The House amendment provides for condemnation of the temporary use of the land, which was not in the Senate bill; and the House struck out entirely the words "and other military purposes," as we had it here. The rest of the amendment was recommended by the War Department.

The whole matter has been recommended by the War Department as it now stands. They also recommended, further, the insertion of the words "and for other military purposes"; but, as I have stated, the House struck that out. It is a complete measure, as I understand, and I hope it will be passed without objection.

Mr. SMOOT. I think the action of the House was wise.

The VICE PRESIDENT. The question is on agreeing to the amendments of the House.

The amendments were agreed to.

RECEPTION OF THE RUSSIAN MISSION.

Mr. MARTIN. Mr. President, in order that Senators may have an opportunity to be presented to the distinguished Russians who are now the guests of the Nation I move that the Senate take a recess for 30 minutes.

The motion was agreed to.

The VICE PRESIDENT. The Chair appoints Mr. MARTIN, Mr. GALLINGER, Mr. SAULSBURY, Mr. BRADY, Mr. STONE, and Mr. LODGE as a committee to present our distinguished guests to the Senate.

The Senate thereupon took a recess for 30 minutes.

At 12 o'clock and 15 minutes p. m. the members of the Russian mission to the Government of the United States were escorted by the committee appointed by the Vice President into the Senate Chamber, the members of the mission being the Russian Extraordinary Ambassador Boris A. Bakhmetieff; Lieut. Gen. Roop, representing the Russian general staff; Captain of the Guard Dubassoff, aid-de-camp; Prof. Lomonossoff, member of the council of engineers, representative of the ministry of ways and communications and head of the railroad mission; A. Nikolaieff, colonel of the general staff, military attaché; M. Novitsky, representative of the minister of finance; Capt. Shutt, from the ministry of war; M. Soukine, diplomatic representative; and Alexander Smirnoff, lieutenant, Russian Army, Russian Embassy.

Maj. N. K. Averill, United States Army; Hon. Breckinridge Long, Assistant Secretary of State; and Mr. Jefferson Caffery, United States Diplomatic Service, Department of State, aid to the mission, accompanied the mission into the Senate Chamber.

Ambassador Bakhmetieff was seated on the right of the Vice President and Lieut. Gen. Roop upon his left.

ADDRESS BY THE VICE PRESIDENT.

The VICE PRESIDENT. Senators, the kaleidoscope of current history is being turned so rapidly that to the normal eye the combinations of yesterday are forgotten, of to-day are uncertain, and of to-morrow are unknown. And yet, as from time to time there are unfolded in this most sacred and historic spot portions of the panorama of the greatest tragedy that has been enacted since Calvary, there stands out one clear-cut central figure, the figure of the dauntless and undaunted man who dares to draw his sword either to preserve or to obtain for himself and for his fellows the right of self-government, the heritage of life, of liberty, and of the pursuit of happiness. [Applause.] It matters but little to us the features and the form of that man, his lineage or his language, if he speak in the full and confident tones of a manhood, or in the lisping tongue of infantile, possession of those rights. But if we hear from his lips the golden rule of statecraft then he is our brother. [Applause.] He has a right to be, and he has a right to be here.

We are honored this day by the representatives of a people who have been our long-time and unvarying friends. [Applause.] It is not possible for me to think in the terms of countries and continents and governments. My mind thinks only in the terms of men; and perhaps this is as it should be, for the Goddess of Liberty is not always a strong and virile woman. In the hours of peace she becomes pale and anemic, and it is oftentimes necessary to keep her alive by transfusing into her veins the blood of patriotic and self-sacrificing men.

I can not think of France, of England, of Italy, of America; I think only of Viviani and Joffre, of Balfour and Haig, of Udine and Cadorni, of Wilson and Pershing. [Loud applause.] On this day as I look into the eyes, the storm-tossed eyes, of these our guests, I can not think of Russia as the land of Alexander and Nicholas. She seems to me to be only the home of Krapotkin and of Tolstoi.

Travelers tell us that there is a point in Iceland where the rays of the setting and of the rising sun mingle. Already upon the far-flung eastern battle line of Europe the rays of the setting sun of autocracy have mingled with the rays of the rising sun of democracy. [Applause.] May that sun grow in light and warmth, and may it be undimmed by the clouds of internal dissension. May democracy everywhere understand that its first duty is to make a democrat a free man everywhere on earth. [Applause.]

Last week we went with little Belgium sadly to her Gethsemane; to-day let us go gladly, with mighty Russia, to her Mount of Transfiguration. [Applause.]

I present to you the chairman of this commission, Mr. B. A. Bakhmetieff.

ADDRESS BY AMBASSADOR BAKHMETIEFF.

Ambassador BAKHMETIEFF. Mr. President and gentlemen of the Senate, at the outset permit me to express to you sincere thanks and keen appreciation for the warm reception you have so graciously given to the members of the mission and to myself. Great is the honor you have bestowed by permitting me to address your distinguished body, abrogating thus a custom which has been upheld for more than a century, but still more gratifying is the expression of cordial sympathy and friendly feeling which have been so manifestly exhibited by your reception.

From the moment of our arrival in this country we have been deeply affected by the extraordinary greeting accorded us and by the constant expression of hearty welcome and sincere sympathy with which we have been hailed on all sides.

That bonds of friendship and sympathy united the people of the two nations we knew before we departed from Russia. They were amply manifested during the early days of the revolution. The act of prompt recognition of our new Government has been of incalculable value. For the brotherly encouragement which you gave us, and for the noble manner in which you so generously stretched forth a helping hand, we are here, in behalf of the new Russia, to express to you our deepest and most heartfelt gratitude. [Applause.]

We have come here as well to make clear the spirit and meaning of the great events taking place in our country. A thorough understanding is indispensable to enable our mission to accomplish the important task of establishing a close and effective cooperation between the two countries for common action and common cause. With the greatest of hope do I look forward to the results of such cooperation so vital to our mutual desire to form a league of honor among free nations on the smoking ruins of autocratic militarism.

At this moment all eyes are turned on Russia. Many hopes and many doubts are raised by the tide of events in the greatest of revolutions at an epoch in the world's greatest war. Justifiable is the attention, lawful the hopes, and naturally conceivable the anxiety. The fate of nations, the fate of the world is at stake, all dependent on the fate of Russia. Freedom and peace will be the blessings of the future if Russia happily emerges from the struggle a powerful democracy, sparkling with the gallantry of her army returning from fields won in common strife with her allies. [Great applause.]

An unprecedented epoch of spiritual depression, a new period of strenuous and anxious military depression would follow, should Russia fail to accomplish her task of political regeneration or should she collapse for economical reasons or the insufficiency of her arms. In all frankness and sincerity do I expose my cause, confident in your good will and paying tribute to the manifest feelings of sympathy, may I say affection?

I am not going to conceal the gravity of the situation that confronts the Russian Provisional Government. The revolution called for the reconstruction of the very foundations of our national life. It is not easy to comprehend what it means to reorganize all of Russia on democratic lines. Such work involves the whole of our social, economic, and political relations. The entire State structure is affected by the changes, involving village, district, county; in fact, every part from the smallest to the central State. The creation anew of a country of boundless expanse on distinctly new principles will, of course, take time, and impatience should not be shown in the consummation of so grand an event as Russia's entrance into the ranks of free nations.

We should not forget that in this immense transformation various interests will seek to assert themselves, and until the work of settlement is completed a struggle among opposing currents is inevitable and exaggerations can not be avoided. Attempts on the part of disorganizing elements to take advantage of this moment of transition must be expected and met with calmness and confidence. [Applause.]

In exposing to you a true picture of the situation I feel that it is my duty to present to you two considerations which make me feel that Russia has passed the stage of the world when the future appears vague and uncertain.

In the first place, it is the firm conviction of the necessity of equality, which is widely developing and firmly establishing itself throughout the country.

In the eyes of the Russian people this principle of equality is based on the fertile democratic doctrine that governments derive their just power from the consent of the governed [prolonged applause], and hence that a strong government must be created by the will of the people. [Renewed applause.]

Three days ago in the House of Representatives I stated that a strong majority of the Russian people had united around the coalition cabinet on a national program. I mentioned the confidence and powerful support which the Government is at present enjoying, and which from day to day gives it more strength and determination, not only to suppress acts of lawlessness on the part of disorganizing forces but also to carry out the constructive work of national reorganization.

Since then my latest advices give joyful confirmation of the establishment of a firm power, strong in its democratic precepts

and activity, strong in the trust reposed in it by the people in its ability to enforce law and order. [Prolonged applause.]

In the second place, and no less important, is the growing conviction that the issues of the revolution and the future of Russia's freedom are closely connected with the fighting might of the country. It is such power, it is the force of arms, which alone can defend and make certain the achievements of the revolution against autocratic aggression. [Applause.]

There has been a period, closely following the revolution, of almost total suspension of all military activity, a period of what appeared to be disintegration of the army, a period which gave rise to serious doubts and to gloomy forebodings. At the same time there ensued unlimited freedom of speech and of the press, which afforded opportunities for expression of the most extreme and antinational views, from all of which resulted widespread rumors throughout the world that Russia would abandon the war and conclude a separate peace with the central powers.

With all emphasis and with the deepest conviction, may I reiterate the statement that such rumors were wholly without foundation in fact. [Great applause.] Russia rejects with indignation any idea of separate peace. [Prolonged applause.] What my country is striving for is the establishment of a firm and lasting peace between democratic nations. Russia is firmly convinced that a separate peace would mean the triumph of German autocracy, would render lasting peace impossible, create the greatest danger for democracy and liberty, and ever be a threatening menace to the new-born freedom of Russia. [Applause.]

These rumors were due to misapprehension of the significance and eventful processes of reorganization which the Army was to undergo as a result of the emancipation of the country. Like the Nation, the Army, an offspring of the people, had to be built on democratic lines. Such work takes time, and friction and partial disorganization must be overcome.

To adapt new principles to a body so huge, so very manifold, and so self-dependent as is a modern army is no simple task. Patience is required to mold it in accordance with forms of democracy and personal liberty, preserving at the same time discipline so essential for success on the field of battle.

One must also realize that the time has passed when the fates of nations can be decided by an irresponsible government or by a few individuals, and that the people must shed their blood for issues to them unknown. We live in a democratic epoch where people who sacrifice their lives should fully realize the reasons therefor and the principles for which they are fighting. [Applause.]

Just as the Russian people had to undergo a process of reorganization and political revolution, so also did the Russian Army. It was necessary for it to live out illusions and deceptions, and to rally about a program of historical necessity and national truth.

The national program of the Government calls for effective organization and consolidation of the army's fighting power for offensive as well as defensive purposes. [Applause.] This has been the outcome of the crystallization of the will of the people. That is the program as to warfare which has rallied around the Government, Russia's democracy, giving its leaders vigor and strength.

Conscious of the enormous task, the Provisional Government is taking measures promptly to restore throughout the country conditions of life so deeply disorganized by the inefficiency of the previous rulers and to provide for whatever is necessary for military success.

In this respect exceptional and grave conditions provide for exceptional means. In close touch with the panpeasant congress the Government has taken control of stores of food supplies, and is providing for effective transportation and just distribution. Following the example of other countries at war, the Government has undertaken the regulation of the production of main products vital for the country and the army. The Government at the same time is making all endeavors to settle labor difficulties, taking measures for the welfare of workmen consistent with active production necessitated by the national welfare.

As to the army, the process of crystallization of the national will is expressing itself in a growing sentiment of general and common appreciation of events and a thorough understanding of the situation.

Peaceful in its intentions, striving for a lasting peace based on democratic principles and established by democratic will, the Russian people and its army are rallying their forces around the banners of freedom, strengthening their ranks in cheerful self-consciousness; to die, but not to be slaves. [Great applause.]

Russia wants the world to be safe for democracy.

To make it safe means to have democracy rule the world. [Prolonged applause.]

The VICE PRESIDENT. The chairman and members of the Russian mission will be delighted to have presented to them the Members of the Senate.

The members of the Russian mission took their places at the left of the Vice President's desk, and the Members of the Senate were presented to them by the committee appointed by the Vice President.

The distinguished visitors were escorted from the Chamber, and (at 12 o'clock and 45 minutes p. m.) the Senate reassembled upon the expiration of the recess.

GOVERNMENT OF RUSSIA.

Mr. GORE submitted the following concurrent resolution (S. Con. Res. 7), which was read, considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That the Congress have heard with profound satisfaction the assurances of Special Ambassador Bakhmetieff of the devotion of the Russian people and their constituted representatives to their new-found liberties and to their newly found republican institutions, and of their determination to defend and maintain these liberties and institutions: And be it further

Resolved, That it is the earnest hope of the Congress that democracy and self-government may bring to the people of Russia that large measure of prosperity, progress, and freedom which they have brought to the people of America, and that Russia may be entirely successful in her concerted efforts to secure the unequaled blessings of an honorable and enduring peace.

CONSERVATION OF FOOD AND FUEL.

Mr. CHAMBERLAIN. I move that the unfinished business be laid before the Senate.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Mr. THOMAS. Mr. President, the bill before the Senate is concededly an emergency measure. It is designed to meet a crisis, not perhaps immediately upon us, but one which will surely confront the Nation in the near future. In the opinion of many, the bill is not designed to accomplish what is expected of it. On the other hand, it is confidently asserted that as far as can be adjudged from the experience of other nations since the outbreak of the war it is, at least, a step, and a very long step, in the right direction.

I believe, therefore, that we should consider the bill very largely, if not entirely, to ascertain whether the emergency requires its enactment. If so, then, irrespective of some of its details, and conscious of the impossibility of securing perfection in legislation, and particularly in emergent legislation, we should place it upon the statute books.

The President and his immediate advisers have declared, not once, but several times, that in the administration of our war policy, food control is absolutely necessary.

They have so declared, Mr. President, neither lightly nor hastily, nor have they reached the conclusions without a full and anxious investigation of the subject from every point of view. We can not question the earnestness and the patriotism of the President and his advisers, nor yet their evident sincerity with regard to the presence of this momentous proposition. They may be mistaken, for it is not given to human nature and human experience to be perfect in anything. They may be impressed with an undue sense of their responsibility and fear that without this far-reaching authority the campaign of the Nation may miscarry. As to that ours may perhaps be as fair a judgment as theirs. But our respective stations have his profound difference, that upon their shoulders rests the ultimate responsibility, a responsibility which can not be transferred, one of the consequences of the miscarriage of which should make us consider well before declining to intrust the Executive with the authority he requests.

Therefore, Mr. President, I am not disposed to attribute to the administration any hysterical or ungrounded opinions or fears or feelings with regard to this far-reaching subject of food control. I am not disposed to charge him with any lack of its investigation. I affirm that it is as anxious as we are to do whatever the situation requires and which seems expedient for the success of the United States in this great war.

Popular sentiment, as far as I am able to judge, supports this measure. We derive our views of popular sentiment from the press, from those local currents of opinion with which we come in contact, and from direct correspondence with our constituency. Mr. President, so far as I am able to judge from the range of that experience this bill commends itself to a healthy, popular sentiment. Now, popular sentiment is fallible, it is

sometimes hasty, frequently impulsive. Occasionally it is the result not of careful and close consideration; but it nevertheless conveys to men in our position a pretty good general view of what the average man upon the street thinks of a pending measure.

The House of Representatives has with practical unanimity declared in favor of this measure by the overwhelming vote of 365 to 7. After a long, very careful, and very able consideration of its every feature it has responded almost as unanimously as it did for the bond bill, and with far more unanimity than it manifested in its vote upon the resolution declaring war..

Mr. President, the administration being favorable to this bill, public sentiment being seemingly in its support. the House of Representatives having with practical unanimity voted in favor of it, the responsibility of its rejection rests upon the Senate of the United States. We must either confirm what has been done, comply with the request of the administration, or assume the responsibility of its defeat. Mr. President, I do not feel authorized to take so momentous a step, especially since I do not pretend to have that degree of information regarding all features of the situation which those charged with governmental authority are assumed to possess.

Let me inquire, Mr. President, therefore, what is the emergency and whether we should confront it with a measure like this? I shall not in my discussion of the bill go very far into its various details. I shall not occupy the time of the Senate with what would necessarily be a repetition of them, as they have been made upon far more intimate knowledge than I possess, and which, are doubtless aimed at vulnerable sections. To do so would be a mere repetition, and entirely outside of the line of discusssion which I propose to follow.

To begin with, Mr. President, I am not at all impressed with the constitutional argument which has been directed to the bill. I believe that I am as much disposed at all times to recognize constitutional limitations, and particularly limitations upon the legislative power, as any Member of this body. I am satisfied that in many instances we have transgressed the letter and perhaps the spirit of the organic act not alone in this time of crisis but in the previous consideration of urgent measures aimed at existing abuses, or conditions which are assumed to be such. I am satisfied, too, Mr. President, that the legislation or some of the legislation which has already been placed upon the statute books at this session of Congress would not in ordinary times bear the scrutiny of constitutional analysis.

But, Mr. President, while recognizing the existence of certain limitations, necessary limitations, upon all legislative authority, when that authority operates by virtue of a written Constitution we must not be unmindful of the fact that in a state of war everything except the fundamentals and sometimes the fundamentals themselves must yield to existing conditions in order that the greater need, the life of the Nation, may be preserved.

I was opposed to conscription. I did not believe it necessary or desirable that this Nation should depart from a traditional policy, one which had always been found equal to previous crises until a fair opportunity had been afforded to ascertain whether it would not be equally efficacious now. But the Senate and the House decided otherwise. Both declared by very substantial majorities for the conscription system. The President approved the bill; the registration of our young men has been accomplished; and 10,000,000 of our citizens are subject to draft within the next 60 days. Conscription, therefore, as applied to the individual, is the established law of the country, and inasmuch as conscription is to be our policy, I am not disposed even to question it or to recognize the argument that it can be limited in any direction where its exercise may seem to be necessary to the administration during the course of the war. It other words, having provided for the conscription of our boys, there can be no legitimate reason why the same principle should not be applied to all the products and all the property of man, to everything within the realm of the Republic, the taking over of which may be desirable to our success in this war. If it be necessary, as it is, to draft our young men into the service of the country at this hour, and if it be necessary, as it seems to be, to now draft the food products of the Nation into its service during the war, then let us do it by all means, trusting in the same power that administers the one to properly administer the other.

Mr. VARDAMAN. Mr. President, I am sure that Senators left the Chamber before the Senator from Colorado rose to speak. He is making a very interesting and illuminating argument. I should like to have Senators here to hear him, and if the Senator from Colorado will permit, I would like to suggest the absence of a quorum.

Mr. THOMAS. I shall not object, although I do not think it would accomplish anything.

The PRESIDING OFFICER (Mr. KIRBY in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gronna	McNary	Shields
Borah	Hale	Martin	Simmons
Brady	Harding	Myers	Smoot
Brandegee	James	Nelson	Sterling
Broussard	Johnson, S. D.	New	Sutherland
Calder	Jones, Wash.	Norris	Swanson
Chamberlain	Kendrick	Overman	Thomas
Culberson	Kenyon	Page	Thompson
Curtis	King	Pittman	Tillman
Dillingham	Kirby	Poindexter	Underwood
Fernald	Lewis	Ransdell	Vardaman
Frelinghuysen	Lodge	Reed	Wadsworth
Gallinger	McCumber	Robinson	Warren
Gore	McKellar	Sheppard	Weeks

The PRESIDING OFFICER. The roll call discloses that 56 Senators have answered to their names, and there is a quorum present. The Senator from Colorado will proceed.

Mr. THOMAS. Mr. President, the call for a quorum has succeeded in securing quite as large an audience as I anticipated before the call was made. I am not complaining of this, because to be perfectly frank the condition of the atmosphere is such that if I did not occupy the floor I would be absent myself.

Mr. President, in what I said a moment ago, I do not agree with those who advocate the complete suspension of every constitutional limitation during the time of war. By no means. There are certain fundamentals which can not be abrogated without doing irreparable violence to the structure of republican government. Such great principles as trial by jury, liberty of conscience, the right of every man to worship God as he pleases, or not worship Him at all, if that should be his choice, can not be imperiled, even in times of war, with safety to the perpetuity of republican institutions. There are others; but I simply mention these by way of illustration.

Fundamentally, however, so far as property is concerned, there is nothing which hedges it about that gives it greater sanctity than or as much sanctity as human life. Hence I am not at all impressed with those protests against this bill which appeal to the sacred right of property, to the inability of the Government to interfere with the callings of men or with warnings regarding the disturbances that may follow in the event such interference shall be established by legislation, so that the necessity of this measure—entirely constitutional, in my opinion, in view of the existing state of war—must be found in the war itself and the rôle which America must play in that war, if it shall properly perform its duty to itself and to its allies; in other words, does this crisis require this legislation, and is that legislation essential to the duty imposed upon us as a nation by virtue of our entrance into the great world conflict? These are the fundamental propositions, the solution of which should determine the action of the Senate upon this bill.

Mr. President, in order to intelligently consider this situation, let me for a moment refer to the war itself, to its character. A brief résumé of its history, the causes which compelled us to enter the terrible arena, a mere survey at close range, may illuminate the part which has been assigned to us in this tragedy of nations.

The war, Mr. President, apart from being the greatest war of civilization, is the one long-premeditated war of civilization—a war which has its genesis in the ambition of one nation, drunk with success and with power, and ambitious to establish itself as the supreme people of the earth on both hemispheres.

Germany's preparations for this war began, Mr. President, at Fontainbleau, at Versailles, in 1871, with the formation of the Germanic Empire, with the crowning of the Kaiser as the German Emperor, and with that spirit which actuated and fought the Franco-Prussian War to complete success.

The student of German history can now perceive how every step taken since then by that mighty people in the arts, in the sciences, in literature, in politics, in military affairs, in naval development, in commercial activity, in all her spheres of human life and effort, were bent upon the accomplishment of one purpose, and one purpose only—the conscription of every activity and energy of the people, the organization of their every activity, and their development in the direction of military and political world supremacy.

We have marveled at their growth; we have paid tribute to their organizing power, to their marvelous mastery of details, to the interrelation of every pursuit of their people, each to the other, and all to the domination of a single will, manifesting itself directly and through the General Staff.

What were her purposes? What were her ambitions? Domination, and its accomplishment through Bismarck's policy of "blood and iron"; a complete transformation in methods of

military activity by the mobilization of the people of the entire nation for war and the abandonment of the old and limited standing army.

Germany was jealous of England's supremacy upon the sea; of France in the arena of continental politics; of the massive growth and power of Russia; of the wonderful development of republicanism in the Western Hemisphere; of the growing power of Japan; and covetous of the marvelous resources of the Orient. Her every step we can now see was taken premeditatedly, intelligently, and designedly toward the consummation of one single purpose—the indivisibility of the German people and the extension of the German Empire.

To perfect this wonderful scheme of organization and to knit close the powers that would some day, when brought to perfection, be brought to bear in the scheme of conquest, she filled the world with spies, with detectives, with German subjects, charged with the duty of inquiring into and communicating information about the activities of all the peoples under the sun. Macaulay's wonderful description of the growth, the activities, and the expansion of the Jesuit Society is the one example in history which properly illustrates the extension and perfection of the information department of the German Empire during the last 40 years.

All these things, Mr. President, reached their apogee in 1914. After a world, which had viewed these things with apprehension, had become indifferent to them through the lapse of time, Germany struck with all her force and with the swiftness of lightning. As a result, within two or three days after the war was declared, it appeared as though all the nations of Europe would be overrun and conquered over night. So perfect had been the plans, so magnificently had they been designed and consummated, and so thorough had been the work of preparation, that naught save the hand of Providence could have stayed the conquest of France, which, if it had been accomplished, would have resulted in the speedy subjugation of Russia and the collapse of the British Empire, with Germany dominating the world.

Now, what were to be the consequences of this triumph? The supremacy of the German theory of government; a State exalted and apart from the people, directed by the absolute power of a single man; democracy discredited and driven from the face of the earth; the Germans universally dominant as "the chosen people of the world."

Our country and our hemisphere were to be involved in this world-wide conquest as well. Germany's designs against both were merely a question of time, manifested by various evidences of hostility occurring at intervals during recent years. I have but to refer, Mr. President, to the incident at Manila Bay, to Venezuela, and to Haiti to impress the Senate with this fact. And Germany's purpose to establish herself in America would have materialized in time had we held aloof from the war or even became her partisan.

But, Mr. President, we kept out of this war for two years and a half. It was the fervent hope of many of us that we should not be called upon to bear our part or any part in this mighty struggle The Western Hemisphere, to use a popular expression, seemed for a long time "safe for democracy," whatever the issue of the conflict in Europe. We bore and forbore time after time with many violations of international law, many infractions of American rights, contenting ourselves, amid the murmurings of a large part of our population, with the assurances of Germany that our protests would be heeded and our demands for reparation be complied with.

We finally entered this war, Mr. President, because of the menace of the submarine to the rights of the world, and particularly because of its interference with our right freely to enjoy the highways of the seas, without danger to life and without the consent of Germany.

But we came in at a time, Mr. President, when the war had drained France, Italy, and Great Britain of much of their fighting strength and resources in men, in munitions, in finances, and in supplies; at a time when Germany's success was painfully apparent; when Belgium and Servia and Roumania had been extinguished; when a vast area, comprising the western provinces of the Russian Empire, had been practically conquered and withdrawn from her dominion; when German dominion stretching from Antwerp to Bagdad, covered an area thrice as great as the Germany of 1914; when the submarine had made vast inroads upon the tonnage of the world and was threatening the mightiest of modern empires with severe stringency in food and essential supplies; when the Kaiser felt as confident of success, perhaps more confident of success, than ever before; at a time, Mr. President, when from the standpoint of man power, the mightiest of the allies had seemingly collapsed; when the Government of Russia had disappeared like a child's house of cards, within the lapse of 24 hours; when anarchy and disorder and lack of restraint and all of the vicious conditions succeeding a successful revolution were rampant in all parts of that great country; and when, to the thoughtful man, it seemed more than probable that we should be compelled, not only to do our own part in the mighty struggle, but bear that portion of the burden which till then had been carried by the Russian Empire.

Such, Mr. President, briefly stated, was the situation last April when we declared war against a country whose business is war, whose occupation is war, all of whose energies and activities have been directed to preparation for and the waging of war, while we, a peaceful people, inert, unprepared, averse to strife, proclaiming the freedom of the individual and the right of self-government, but possessed of vast and enormous resources, were suddenly plunged into the maelstrom and gave solemn pledge to do our part.

Ours has been the pursuit of wealth. Germany has developed unity, efficiency, organization, and, what perhaps is of greater importance, a national spirit—that unity of sentiment and devotion to the fatherland, without which no people, however brave and deserving, can achieve success in warfare. We have developed individualism through competition, laxity, and indifference to what I may call the spiritual things of a nation, the ideals of a united people. We began this war rich in all the material things of the world, but deficient in the esprit de corps, and lacking the elements of virile and powerful organization, the Navy Department only excepted. Yet our task, Mr. President, was and is the mightiest of all our allies, largely because of the conditions confronting us when we became actors in the conflict, largely because of our enormous and immense resources, for during this war we have become the reservoir of the wealth of the world. Money, property, all that goes to make up our material welfare have increased more than a hundredfold per year. We have waxed fat upon the spoils of Europe.

While property has been destroyed across the seas, while men have offered up their lives by the hundred thousand, and women have been widowed and children have been beggared and lost, we have profited and grown rich; our wealth has become so great that it menaces very seriously our immediate social and material future. But because of our possession of these enormous resources, because of the condition of our allies, because of the drains which they had endured, because of the immense activities which they immediately confronted ours became the task in large degree to feed and to munition and equip not only ourselves but the entire fighting force allied with us—the troops of Great Britain, of France, of Italy, and doubtless of Russia in large degree; a task calling for the exercise of every ounce of energy and activity and every element of patriotic impulse which we possess; a task which up to this time I believe, Mr. President, we have met as well as an unorganized people could, not alone by the administration, not alone in the Halls of Congress, but throughout the country.

But, Mr. President, I sometimes wonder if we appreciate the extent and the magnitude of the work that is before us; if we fully understand how much is expected of us; if we fully realize the degree of sacrifice and service that we shall be called upon to render. The immediate field of conflict is far away. Three thousand miles of ocean lie between our own and the coasts of France and of Italy. It is not given to man to appreciate to the full extent the calamities that visit humanity unless he comes in immediate contact with them. We can read with composure of a flood in China, destroying thousands of human lives; we shudder at the news of a cyclone in one of our own States; while a minor tragedy occurring in our immediate community overcomes us utterly.

It is the remoteness of the contract therefore, Mr. President, that prompts me to believe that we do not as a Nation yet realize to the full extent the magnitude of our task and what we must do in all directions if we are properly to so perform it, that we may at the end of this struggle feel that we have been equal to the mighty responsibility placed upon our shoulders, that we have done our part, that we have kept the faith.

Mr. President, I have said that we have to furnish not only ourselves but practically all of our allies with many of the essentials, and with the one prime essential of food supply. We can do it; but only with satisfaction provided we mobilize every possible resource, every possible energy which can be equipped and organized to that end.

We have hitherto produced a surplus of agricultural products—not enough to meet present demands, but a large surplus. We have hitherto been regarded as one of the granaries of the world, and the crowded populations of older countries have been able to rely upon that surplus for their sustenance. But, Mr. President, conditions then were normal. Now they are not.

Conditions then required no special effort upon our part to meet the requirements and demands of trade, because the energies and business selfishness of the people were all that were necessary to do so. To meet now the extraordinary conditions necessarily requires the most extraordinary effort, and we must not overlook the fact in considering food supply that a great portion of it will be destroyed and wiped completely out of existence through the active hostility of our enemy. Since the beginning of the submarine warfare I have been told, Mr. President, that fully one-third of the vessels sent to the bottom of the sea have been loaded with food supplies for man and beast.

It is natural that it should be so, for our foe is alert, intelligent, and desperate. He realizes fully the overwhelming and stupendous importance of the food supply to England and to France; that we must feed Russia to some extent, England, France, Italy, and ourselves, if they are to be fed at all. Therefore we must feed the submarine; and the toll which it will continue to take, until the American genius shall devise an antidote for that scourge of mankind, we must also take into consideration in determining the magnitude of our present obligation. We can not fail; we must not fail; for if we fail, our allies fail as well, and, failing, Germany rules the world. Let us make no mistake about that. She will not only rule the world, but self-government will have become an experiment of the past.

German imperialism has long dreamed of a Germany in Africa, a Germany in Asia, and a Germany in America. And she will not abandon any of them should her eagles rest in victory upon the banners of France and England.

If I am correct, Mr. President, in my assertion that we must carry this burden to success or all must fail, then it follows that upon the shoulders of America rests the fate of modern civilization, and that is the emergency which this bill, among others, is designed to meet. I do not believe, Mr. President, granting my premises to be correct, that we should hesitate to give the administration every power, consistently with the essential liberties of the citizen, which in its judgment—reasons, of course, being assigned therefor—seems essential for the accomplishment of its mighty task.

Something was said yesterday by way of inquiry, I think, as to whether such a power as this was ever conferred, or even asked, at any time by any other ruler in America. I think not; but, Mr. President, if, during the War between the States, the Government had been confronted with a crisis making it necessary, the Congress then in existence would not have hesitated to clothe Mr. Lincoln and his administration with the authority which is here requested. I do not recall a single power he asked which was not given to him—not freely, always, but which was not given to him—and all of us, those in rebellion and those fighting for the flag, have long since in unison acknowledged the wisdom and the justice of every request and of every act of legislative response thereto. Some of them threatened and menaced then, as this is said to now, many rights of the citizen and the commercial and business prosperity of the country, but the course of events have justified them all, and the magnificent heritage to mankind was preserved through such agencies, as it will be carried safely through this greater ordeal.

Autocracy has thrown its gage at the feet of democracy, and the gage has been accepted. What, then, shall we do? Hesitate, take half measures, halt between the first and the final step, or, with that confidence in the administration which all Americans, I believe, feel—certainly in the integrity of its purposes—respond to its requirements, conceding that what is asked is needed, and without it the country may be sore pressed while the conflict is raging?

Mr. President, I have spoken of German autocracy, of its strength, of its cohesion, of its long preparation, of its belief in its own destiny, and of the national spirit which undoubtedly supports it and has led its arms to so many victories. But we are confronted with some autocratic conditions here which have their origin in free institutions, which are the outgrowth of that liberty which we so much prize and which flourish like parasites upon the tree of freedom. The only spirit they foster is the spirit of greed. Some of them are more sinister than the powers and the purposes of the Kaiser in their influence upon our social structure while the war is waging. I refer, Mr. President, to what I may call an autocracy of distribution of the essentials of life, composed of middlemen, speculators, boards of trade, jobbers, extortionists, and adventurers. I do not by that statement mean to indict the great body of our citizens engaged in the work of distribution—not at all. There can be no question but that that portion of our body politic is composed of honest, upright, hard-working, God-fearing men. But there are within the throng scattered all over the country many combinations and conditions flourishing in times of peace, but doubly flourishing in times of war, carrying on a work of extortion, and giving full play to the spirit of greed, with the resulting condition of unrest and discontent not only threatening and menacing at present, but which may easily result in explosion somewhere, thus distracting our attention from the mighty task ahead to the conditions at home requiring immediate solution if we would survive at all.

Mr. McKELLAR. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. KELLOGG in the chair). Does the Senator from Colorado yield to the Senator from Tennessee?

Mr. THOMAS. I yield.

Mr. McKELLAR. Does the Senator think it would add anything toward curbing the particular class of our people known as speculators if we were to put in the bill an absolute prohibition against them, rather than the section which proposes merely to regulate and license them?

Mr. THOMAS. Mr. President, I stated at the outset—the Senator, perhaps, was not here at the time—that there were doubtless some features, perhaps many features, of the bill which, in detail, might not address themselves to my judgment, but that in its discussion I proposed to deal with it in a larger sense. The details of the bill are familiar to Senators who have already spoken upon it and who will hereafter discuss it. I shall not attempt to go into that subject. In the first place it is argumentative, and will therefore provoke colloquial debate, which I would avoid. In the next place, my judgment would doubtless be no better, perhaps not so good, as that of the Senator who raises the question. I am concerned more with securing general legislation upon this subject which in its operation will disclose hidden weaknesses and evils, thus enabling us properly to correct them, than I am with spending weeks here in a vain effort to agree upon details.

Mr. McKELLAR. I will say to the Senator, I am in hearty accord with his views along that line. I am very much in favor of this bill. At the same time, it seems to me the bill might be strengthened by making an absolute prohibition against the speculators, who have unquestionably caused a great deal of the trouble.

Mr. THOMAS. That may be. I want to say, however, before leaving the subject, since it has been presented, I have not much confidence in the efficacy of legislative prohibitions—legislative restraints—as applicable to these situations. I believe that by controlling the subject matter of the speculation the evil can be reached, and only in that way.

The Senator from Missouri [Mr. REED] the other day criticized the Trade Commission, not unjustly, perhaps, but somewhat harshly, and, referring to these various abuses, asked the very pertinent question, what that commission had been created for, why it had not long ago remedied these evils, what it was doing now, and whether it had accomplished any of the purposes so fondly hoped for and predicted by the advocates of the bill creating it when it was before Congress. To my mind, and I think I said so at the time, the difficulty about all that sort of legislation lies in the comparative ease with which men can avoid it. There never was a statute, however well prepared, that somebody could not somewhere some time drive a coach and four through it. The Senator perhaps may be interested in a little incident illustrating that. The first bankruptcy law passed by the Congress of the United States was devised and framed by Mr. Justice Story, one of the greatest jurists of his time. He was requested to do so by a congressional committee. He spent days and weeks and months upon the bill, and when it was presented to Congress it was passed precisely as the justice had framed it. But after listening to Mr. Webster for an hour, with regard to the construction of the second section of the law in the first case reaching the Supreme Court under it, Mr. Justice Story confessed he did not know what it meant. It is the poverty of language and the existence of new conditions and new experiences which I think have much to do with the miscarriage of what seems to be excellent legislation at the time of its enactment, coupled with that general spirit which pervades the community, the spirit of speculation, and which opposes stringent application of the law because of the success of those who practice it rather than because of the evils of the thing practiced.

I am bold to say that this bill is an experiment, which may wholly miscarry; and I concede in the fullness of my heart that Senators opposing it may be wiser than I. They certainly are entitled to the weightiest consideration, but I hope that their analysis of the bill and their assertions of its unwisdom may prove to be incorrect by experience.

But this condition, Mr. President, is the natural offspring of exciting times, of a troubled public situation. It springs from war and from revolutions in society, from the immediate needs

of government, as naturally as air arises to the surface from the depths of the ocean. It is not peculiar to us. It has been recognized and curbed in large degree by England and Canada; and the experiences which we are told have been the result of their experimental legislation, if you please, have had much to do, in my judgment, in moving the administration to urge the passage of this legislation.

Speculation in the necessities of life is bad always. It is worse than criminal in times of great national crisis. And yet, unfortunately, it is an element of human nature that when these opportunities arise advantage is taken of them without regard to anything except the immediate probability of profit for those in a position to avail themselves of them.

These men are the pirates of the commercial seas. They prey upon the needs of the people. The Nation's crisis is their opportunity, and in their exactions they are more oppressive than the Kaiser ever was. The man or combination of men who compel the poor or even the well-to-do of this country, for that matter, to pay two, three, and four prices for the necessities of life in times of stress and trial are enemies of the Republic. They are traitors to the Government, and more deadly to our future than the helmeted legions of Germany. There is no way to meet them except through the strong hand of our own administration armed with legislation, with power, and held responsible for the lawful and proper exercise of its authority.

I read the other day of a couple of men who had control, and had secured it by far-reaching purchases in advance, of a necessity of life, and thus controlled the supply of one of the chief cities of the country. Those men had more power over the people of that city than the President of the United States possesses, more power through that one fact over the consumers of that community than the Kaiser wields over the people of Berlin; far more power, Mr. President, than the British Government exercises anywhere on the face of the earth, and that in a free country whose boast is that all men are created equal; that its laws are made for the protection of all the people.

I read the other day the testimony of the Food Commissioner of New York before the Committee on Agriculture, in which he stated that it had been the practice for a long time of fishmongers to destroy on the way to market vast quantities of fish taken fresh from the ocean in order to limit the supply and increase the price to the consumer.

Sometime ago I received letters from Shreveport, La., informing me that immediately after the announcement that rice was a good substitute for potatoes a number of speculators appeared in the immediate vicinity and cornered all the rice of that section so that the price went up 100 per cent within a week.

Let me read one or two clippings upon the subject taken at random from different sections of the country. I read one from New York, May 19:

FOOD BEING WASTED—NEW YORK COMMISSION MEN DESTROY MILLIONS OF POUNDS.

NEW YORK, *May 19, 1917.*

Millions of pounds of food intended for New York City are wasted every year, according to a report issued to-day by the bureau of foods and drugs.

In the first 125 days of this year 8,330,896 pounds of food were either condemned or destroyed by commission men before entering the market.

I clipped this communication from the World a few days ago:

CORN MEAL OR WHEAT FLOUR?

To the EDITOR OF THE WORLD:

We are asked to eat corn meal instead of wheat flour. But note the result: A 24½-pound sack of flour (one-eighth of a barrel) retails for $1.85; one barrel (196 pounds) will cost $14.80.

Corn meal is sold in packages—the only way the stores sell it here—as follows: Quaker corn meal (1 pound 8 ounces), 10 cents; D. & C. corn meal, 12-ounce packages), 12 cents—either 24 ounces for 10 cents or 12 ounces for 12 cents.

Therefore corn meal at 1 cent an ounce would be 16 cents per pound; 196 pounds at 16 cents would be $31.36; or with flour at (196 pounds) $14.80, corn meal would cost $16.56 more than flour.

Or corn meal at 6⅝ cents a pound, as in the other quotations, would cost, for the 196-pound barrel, $13.06⅝, or only $1.74 less expensive than flour at $14.80 per barrel.

NEW YORK, *June 12.*

I have a quotation here from a Denver paper which I will not take the time to read, but will ask leave to insert in the RECORD, which recites that 3,750,000 pounds of old potatoes had been unearthed in storage in Denver, and which were held so long that they were unfit to use:

OLD POTATOES HELD IN SILO TO LIFT PRICE—STATE INSPECTORS FIND CARLOADS OF SPUDS BOUGHT FROM GROWERS.

There are 3,750,000 pounds of old potatoes in storage in Denver, Secretary of State Noland announced to-day following investigation of the potato situation by inspectors of his office. The prices on these old potatoes has been forced down by the arrival yesterday of the first shipment of new potatoes—six carloads from California.

The secretary of state said that there are 125 cars of old potatoes in storage in this city. The cars average 300 sacks and the sacks contain 100 pounds each.

"Farmers at Greeley are indignant because 25 carloads of potatoes which were bought from the growers there last fall at $1.90 for 100 pounds are being held in silo," said the secretary of state. "Those potatoes still are in storage in the silo and will be thrown away."

The 25 carloads at Greeley represent 750,000 pounds, which will be wasted. Secretary Noland will make investigations to find out if potatoes have been held at other points in the State in similar manner on orders of dealers.

The arrival of the new potatoes brought down the price of the old 25 and 50 cents. Old potatoes are selling at prices ranging from $5.50 to $5.75 per 100 pounds. A year ago at this time the prices ranged from $2 75 to $3. Two years ago they ranged from 90 cents to $1.10 per 100 pounds.

There are practically no onions and beans in storage in Denver, the secretary of state finds. He is making his investigations for benefit of the State ways and means committee and the State war council.

I call attention to a dispatch relating to the same commodity from Chicago bearing date June 4, and this appeared in one of the local papers within the last 10 days:

LEAVE POTATOES TO ROT ON SIDING—DISTRICT ATTORNEY IN CHICAGO ORDERS INQUIRY, SUSPECTING A PLOT.

[Special to the World.]

CHICAGO, *June 4.*

Government investigators reported to District Attorney Charles F. Clyne to-day that they had discovered 15 carloads of potatoes which had been sidetracked at Seatonville, Ill., so long that many of them had rotted.

Suspecting that the discovery may give him a clue to the conspiracy to boost food prices, the district attorney ordered an investigation to learn why the potatoes were left to rot instead of being brought to market.

Further investigation of the food situation awaits the assembling of the grand jury Wednesday. By next week Oliver E. Pagan, Government investigator, who drew the indictments against the butter and egg dealers a few days ago, will be back from Washington to draw up more bills.

This announcement appeared in a Washington paper last week:

$120,000,000 BREAD "PROFITS" A MONTH—THAT'S MIDDLEMEN'S TAX ON NATION—UNIONS GET BEHIND BILLS.

Middlemen are gouging the public for more than $120,000,000 a month in wheat and breadstuffs alone. It was declared last night at a conference held by 25 Representatives in Congress and 15 labor leaders with Herbert C. Hoover, who has been designated by President Wilson to be food administrator, on the food bills in Congress. Other foodstuffs also are being manipulated.

Figures were submitted to show that while flour is now selling around $15 a barrel, the cost of production is about $7.75, and that the extra $7.25 is going to the middlemen. This is based on the assumption that the farmer is receiving a fair price for his wheat, around $1.60 a bushel.

Hoover promised a reduction to meet the lowest wages if the Lever bill is passed, and the labor men decided to get behind the measure. The American Federation of Labor and the big unions will send thousands of letters to-day to local organizations throughout the country directing them to urge on their representatives in Congress passage of the food bills.

The food bill was yesterday made a privileged measure in the House for Monday.

Mr. President, that is a most astounding statement. Whether it is true, I do not know, but if it is 25 per cent true, if it is a fact that approximately $30,000,000 a month represent the fruits of extortion in breadstuffs alone in this country, then we have for the whole year $360,000,000; and if it be true in breadstuffs alone, it must be equally true with regard to the other staple foodstuffs of the country. If that be true, then these extortions exceed in the aggregate for the good year 1917 the total sum of the liberty loan. In other words, the extortionists of the country are making as an unlawful and undue profit out of the absolute necessities of the people the equivalent of the mightiest loan ever issued and sold by any nation in the history of civilization.

I care nothing, Mr. President, for prevailing prices wholesale. I care nothing for quotations which indicate different conditions. If this is true as regards the ultimate consumer, upon whose shoulder rests the ultimate burden, current wholesale prices are of little consequence. Upon his purse the drain falls heaviest. He must feed and clothe himself and his family regardless of the extent of his income or become a public charge.

Let me read one more quotation, and this is an editorial from the New York World referring to the coal situation, appearing, if my recollection serves me aright, in last Friday's issue:

JUGGLING COAL PRICES.

After a careful investigation, the committee on the coal situation of the Manufacturers and Business Men's Association, in its report, makes the direct charge that speculators and coal sales agents are not only responsible for the shortage to-day but are juggling output and prices.

As evidence the committee calls attention to "the fictitious circular price list published by the coal companies." In explanation it tells how the consumer is systematically gouged:

"By publishing a low circular price the sales agents have to pay a low royalty [to the mine owners], but the consumer does not get the benefit. The sales agents manage to squeeze both the mine owner and the consumer. This is accomplished by selling only a limited amount, or none at all, to the retailers at the circular price. The coal is sold to middlemen, who advance the price to the highest possible point and then perhaps go 'fifty-fifty' with the sales agent. * * * When re-

tailers apply to the coal companies for coal they are told there is none for sale. They must then go to some jobber and pay $2 or more above the circular prices to get supplied. The 'company price list' is therefore false and fictitious, and is published with the evident intent to deceive the public.'

This system of extortion may or may not call for action by the grand jury. But in any case it is not to be tolerated, because of the way it affects the people's supply of coal and the excessive prices they are forced to pay to an inside ring of operators. An effective remedy will be to empower the Government to fix prices during the war and suppress the unscrupulous speculator who preys on the public in this time of national emergency.

Mr. President, there are many ways to accomplish a given object. Indeed, it is very necessary to resort to various ways to accomplish some objects. To accomplish food monopoly requires the convenient cooperation, passively or actively, of our lines and means of transportation.

Mr. President, I hope I am not given to the unquestioning acceptance of newspaper statements and of public rumors. In my earlier life I sometimes did so and was led far afield by being credulous, and have done injustice occasionally both to men and to interests in consequence. But where there is so much smoke as there is at present there must be some fire, and in view of what I know to be the enormous number of cars in the country and the facilities for traffic movement, I am not wholly satisfied with current assurances of the difficulty of securing transportation in crises such as coal famines and similar critical conditions occurring at different times, and particularly in our large community centers. They may be true, but occasionally one gets information from private sources of undoubted reliability upon which reliance can be had. I therefore read one of a number of letters upon the subject of transportation which I received from a friend in Boston a few days ago, of whose credibility there can be no question. I shall withhold his name:

MAY 31, 1917.

Hon. C. S. THOMAS.

DEAR MR. THOMAS: I am confidentially informed by a coal broker that barge owners are quietly sending barges away and laying them up in order to create a shortage in water transportation and continuing present exorbitant rates on those barges kept in service.

The papers this a. m. chronicled the sale to and withdrawal from our service of three large steam colliers by New York interests. That move cuts off transportation for 250,000 tons a year.

Can conduct like this be condoned or permitted to continue with impunity? Every vessel withdrawn from active service now aids Germany's U-boat campaign by just so much.

Mr. President, assuming these conditions, I am fully justified in my denunciation of the men engaged in them, of the men responsible for them, of the men profiting by them, of the men who, without regard to the welfare of their country, are taking advantage of its peril to enrich themselves, and at the expense of their helpless countrymen. I would rather be a German spy serving the Kaiser and be caught en flagrante delicto than to be a food speculator in the United States in the good year 1917. I would rather be a professed disloyal subject than exploit my fellow countrymen in times of war. He should be suppressed in free America by such legislation as in the opinion of the powers that be will enable them to do so. And if that fails, let them by all means resort to more drastic but more effective remedies.

We have had enough of these practices in times of peace. In war they constitute treason, because they give aid and comfort to the enemy. How can a man living or attempting to live upon a salary of $1,200 a year with a family to support be expected to love a country that permits him to be robbed of his substance through extortionate prices for the necessities of life? What citizen can be inspired by the strains of the Star-Spangled Banner with a salary of a thousand dollars and who must give it all in the vain effort to sustain himself and his dependents? How can the spirit of loyalty grow; how indeed can it coexist with the sense of prevailing wrong and injustice of which the common people are the victims? How can patriotism find root side by side with extortionate prices of food, which the great majority of people can not meet with their hoarded means?

Mr. President, under the withering influences of this condition the springs and sources of patriotism must dry up and disappear. Whatever else, let me say here, may be said of Germany, she has always shielded her subjects from perils such as these both in times of peace and in times of war. Let it be said to her credit, despotic as she is, imperialistic as she proposes to be, that she finds ample time to look after and protect the interests of her meanest subject and shield him as far as the Government can from the extortions which grow and expand into intolerable abuse under our more liberal and democratic institutions.

Mr. President, this spirit of monopoly is sapping our substance and undermining the vital sources of our spiritual life. It is destroying our ideals. You can not preserve a national spirit if you are to starve the people. Love of country can not survive in an atmosphere of suffering and want accompanied by a sense of overpowering injustice. The country must protect the needs and foster the welfare of its people if it would inspire these feelings, or if, when inspired, they shall survive.

Mr. President, unless we arouse and stimulate the national spirit in America, unless that sense of devotion to the Republic, to its ideals, and to its purposes, which is the soul of a nation, shall become our mental attitude, our ships, our guns, our food, our bonds, our men may be organized in vain. They may go down before the superior forces of an enemy so equipped, for it is that unity which springs from devotion which forms the source of victory. When a man fights to preserve his home, he wins only when he feels that to win is the sole alternative to destruction.

There are two old soldiers, Mr. President, among the Members of this body. One sits here. [Indicating Mr. BANKHEAD'S seat.] He fought under the stars and bars, and he fought nobly and to the end. Great in martial deeds, he has shown equal devotion to his country in the discharge of his civic duties. The other, the grand old Senator from Minnesota [Mr. NELSON], who has served his State upon this floor so long and so conspicuously, and has commanded our respect and affection from the day he took his oath of office, sits over on that side. He fought with equal devotion under the Stars and Stripes for the cause of the Union. If these two men were in their seats they would realize what I mean when I essay to describe that national spirit which must animate the hearts and consciences of men in times of great national peril if success shall crown their efforts and the precious heritage of democracy shall be preserved.

It is the spirit, Mr. President, which carried Pickett and his forces up the heights of Gettysburg; the spirit which, confronted, drove them down again; the spirit which inspired both sides of that great Anglo-Saxon conflict and which was conquered in the one only because it burgeoned into full flower in the other.

That spirit, Mr. President, I am sorry to say is sadly lacking in America when we survey the country as a whole. We have long been engaged in developing the resources of a virgin continent. We have been making our fortunes, piling wealth upon wealth, exploiting the great agencies which nature has bestowed upon this favored land. This has been our task as a people during the long years while Germany was preparing to conquer the world and preaching devotion to fatherland. There is the primary principle of her military and civic policy. Deutschland über alles is more than a battle cry. It is the cohesive spirit that cements the unity of a nation and carries it beyond the goal.

We have been doing just the contrary. We have subordinated everything to the spirit of gain. We have lost, or at least forgotten, the finer impulses of a free people. My thought was well expressed by Lloyd-George, who two years ago, speaking of England and her people similar in tendency and in struggle with ourselves, said:

> We have been living in a sheltered valley for generations. We have been too comfortable and too indulgent, many perhaps too selfish, and the stern hand of fate has scourged us to an elevation where we can see the everlasting things that matter for a nation—the great peaks we had forgotten of honor, duty, patriotism, and clad in glittering white the towering pinnacle of sacrifice pointing like a rugged finger to heaven.

Mr. President, I have sometimes thought that this war might be necessary to bring this Nation to a realizing sense of its duty to itself and to its people; to remind us of the contrast between the greatest private fortunes ever known yet amassed under democratic institutions and the democratic assertion of equal rights for all; to reveal the lethargy which prosperity inspires our indifference not only to civic duty, but to all the things that make for the peace, the freedom, and the welfare of the common weal.

Mr. President, if we are to arouse the spirit of nationality among our people we must feed them; we must relieve their apprehensions of bodily suffering while they fight, we must protect them from the exploiter, while they fight the battles of their country. I know it will be said that there is no starvation in America. I think that is true. There is acute suffering nevertheless, and there have been times when revolt was active, but suppressed for the time, and with the immediate assurance of speedy relief.

Let us not forget that we are a congeries of peoples. This is a composite Nation; it is made up of sectors from every race on earth. Our great cities, for the most part, show a minority of resident natives, and in our greater cities there are huge communities where the English tongue is seldom heard, and where, among its members, it is never spoken; where American ideals are interpreted in terms of opportunity for work, and

sometimes with the opportunity for plunder; and where "get all you can and get while the getting is good" is the motto.

Mr. President, it is those communities—those great communities—whose social structure justifies the statement that we are not a cohesive people, but a congeries of nations; that we possess no cohesiveness or community in ideas, no common or set purpose of which "fatherland" or its equivalent is the center. If in waging this war domestic conditions are such, Mr. President, as to drive discontent and suffering into revolt, as is apt to be the case, we may find ourselves with an army fighting at the front, and with the necessity of employing another army to fight in the rear; of maintaining the national flag in the trenches and carrying on all of the various details and agencies essential to active conflict, but disturbed and embarrassed behind by food riots and revolts consequent upon domestic conditions. Hence, I say, men now engaged in food exploitation are traitors, they are giving aid and comfort to the enemy, to say nothing of the fact that extravagant prices mean robbery and suffering.

A sullen and rebellious civilian population always paralyzes military enterprise; a country whose heart is not in the conflict can not fight; it can only pretend to do so for a time. It renders organized effort practically impotent.

I admit, Mr. President, very freely, that the rise in prices of the necessities of life is attributable to many legitimate and unavoidable causes, the chief of which is the large increase in the volume of circulation and of credit. As money increases in volume, it decreases in value; as money decreases in volume, it increases in value. Its cheapness is always reflected in rising prices; its value in falling prices. As prices rise, those receiving fixed compensation in life are apt to suffer, and as they fall the same class is correspondingly benefited.

Mr. VARDAMAN. Mr. President, if it will not interrupt the Senator, I should like to say that I thought that law of economics was repealed in 1896.

Mr. THOMAS. Oh, Mr. President, the law of economics was then denied, as the Senator remembers. It was denied vigorously and venomously. The Senator may recall Macaulay's reflection that greed and avarice would deny the law of gravitation should it be to their interest to do so.

Mr. VARDAMAN. Absolutely.

Mr. THOMAS. That law of economics was denied, but it was there just the same. About the only benefit those of us who then championed what we thought a wiser and a more liberal financial policy have derived from the final verdict is the establishment by events of the eternal truth of that proposition. But, Mr. President, that accounts for a general normal level of high prices. It is the encouragement to the speculator, and the advantage to him of this rise, and not that natural rise of which I complain. It is not the fact that better times are always reflected in higher prices; it is the control and absorption of the necessaries of life, already high enough and made doubly high through that power of control, which always rests, as I have said before, more severely upon those least able to bear it.

I am therefore for this bill, because I want the administration armed with the power to put a stop to these extortions, if it can be done, and if it can not, then I want to be in a position to say that we sought to encompass its suppression, failing in which we can at least comfort ourselves with the reflection that we did the best we could.

Mr. President, the Senator from Illinois [Mr. SHERMAN] the other day in one of his illuminating speeches referred to the fact that our social troubles and discontent generally proceeded from the great communal centers of the country—from Chicago and New York——

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Illinois?

Mr. THOMAS. I will do so in just a moment—and other huge congregations, none of whom, in the strict sense of the phrase, are producers of food. Now, I yield to the Senator from Illinois.

Mr. SHERMAN. Mr. President, I will join the Senator from Colorado in any effort to prevent those who have food in large quantities from oppressing the public. I want, however, to ask the Senator what he thinks of Samuel Gompers, president of the American Federation of Labor, who used this language in an interview given to the press a few days ago:

> The food pirates have for months been diligently profiting through the needs of the people. Speculation has forced prices, and food riots have already happened in this rich country. To-day speculators are trying to buy up crops before the plants are out of the ground. Speculators gamble on human needs. By creating human want these ghouls expect to coin enormous profits.

I want to ask what the Senator thinks of this statement of Mr. Gompers, when compared with his action not long ago in sacrificing the needs of the entire American people in order to benefit a few over whom he had control in relation to the wage scale; whether it was justified any more in the one case than in the other when he proposed to institute a national railway strike in order to procure the accomplishment of his ends?

Mr. THOMAS. Mr. President, I shall not be drawn away from the discussion of this bill by the consideration of a subject, which is not only controversial, but about which there is much bitter feeling, both as to the situation and as to the facts.

The Senator from Illinois asked me what I thought of Mr. Gompers, who wrote the statement which he has read. I am not certain whether he wants me to express my opinion of Mr. Gompers or of his statement, and, consequently, I shall take advantage of the double entendre by withholding my opinion of both. I will, however, say to the Senator that whatever faults Mr. Gompers may have exhibited it was not Mr. Gompers who originated or consummated the threatened railway strike, to which the Senator from Illinois has referred. That was the work of the four brotherhoods, who are entirely independent of Mr. Gompers and of his organization. Their work and their efforts were indorsed both actively and sympathetically by Mr. Gompers.

Moreover, Mr. President, it is not fair, and I am sure the Senator upon reflection will agree with me, to measure one evil by the existence of another or to advocate it because it is censured by some man identified with the creation of another. I am glad that Mr. Gompers views the food situation from the truthful and the essential standpoint, even though he uses superlatives to express his conviction concerning them.

I am very anxious to cooperate with any and all in providing against immediate difficulties, leaving others to be solved as they are encountered. When the Senator interrupted me——

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Illinois?

Mr. THOMAS. I do.

Mr. SHERMAN. I did not want to break in on the continuity of the Senator's address, which is very illuminating, and I appreciate it, I hope. In other words, Mr. Gompers is an opportunist as I see it. He now sees an opportunity to turn public wrath against some against whom it ought to be turned, but it would reach and oppress, in the event of a national railway strike, as many or more people and as unjustly as those whom he now denounces as food speculators. I am not asking the Senator to take my view, but I only want to interpolate the inconsistency of this alleged leader of American thought in this crisis.

Mr. THOMAS. I want to assure the Senator from Illinois that his opinions on any subject are entitled to the greatest respect. I always listen to him when I can; I am always interested, and I am frequently edified. Mr. Gompers may be an opportunist; let me admit it for argument sake; but I welcome in this fight everybody who will act with us—the opportunist, the man who is discontented, the man who suffers, the man who sees and sympathizes with suffering, Republican, Democrat, Socialist, everybody—that we may keep our house in order while we overcome the enemy, that there may be no mutiny at home when the boys are fighting across the seas, no disturbance justified by suffering and injustice.

When the Senator from Illinois interrupted me I was referring to a recent statement of his regarding the sinister influences of huge congested communities upon the social structure, which become the breeding places of all of the social ills and discontents of mankind; and that is true. There is not a social pestilence or a social reform which does not have its origin in the great centers of our population, and the more huge they become the more unwieldy, the more lawless they become the greater the contrast between enormous wealth and condign poverty, between the well-to-do and the poor, between wanton luxury and squalid want, the greater the visible chasm between the extremes of civilization, which sometimes flow apart and frequently touch each other, the greater the opportunity for interchange of ideas, the greater the medium for the spread of propaganda for the creation of groups, the ease of individual contact. Hence epidemics, both mental and physical, characterize the modern metropolis.

Crime, wrong, discontent, disorder spring as spontaneously from the soil of these large modern cities as maggots are bred from carrion; but we have them with us, and we must deal with their mighty problems, one of which is a food supply at living prices. The Senator says they do not produce; that is true. The Senator says that if conflict and riot come they will arise in these great cities, and that is true. The Senator says that after they shall have run their course their populations must go to the country; they must go where food is; they must leave after

destroying them; and it might be better for all mankind that it should be so; but the Senator overlooks the terrible destruction and loss of life, the horrible disorder, the tremendous strain upon all of our institutions which a huge riot, lasting perhaps for days, in great cities like Chicago, New York, Philadelphia, and San Francisco, and putting the resources of the Nation to their supreme test for its suppression. And when the overflow spreads into the country it will inevitably bring along its trail of bloody destruction. Those drunk with murder may be hungry for more sacrifices. Their awful work will not be confined by the circumference of the great cities, they will extend throughout the countrysides, wherever those demanding food and eager for destruction shall wend their way.

I want to avoid these horrible dangers, Mr. President. I wish we could purge this country of its great cities. They are a menace to our institutions, to our well-being; a menace to our industrialism, to society. They have grown far greater during the last few years in proportion to their increase in former times. They are a result of that general law of consolidation which works socially as well as industrially. We have them with us, and we can not mitigate or modify the fact now. But it is necessary that we should so legislate, Mr. President, as to reduce their dangers to a minimum.

In some respects it would seem that this bill is hardly drastic enough. It leaves too many things, in my judgment, for voluntary action. I should like to see a few more teeth inserted in the bill. It may not be necessary. Those in charge of it say that it is not necessary, and I shall accept that statement for the present. Mr. Hoover relies upon voluntary cooperation as fully equal to the emergency. The situation is well expressed by him in his statement before the Committee on Agriculture, from which I will read a very brief extract. He says:

In distinction from this—

That is, in distinction from a system of dictatorship, with which he has been charged—

In distinction from this, our conception of the problem in the United States is that we should assemble the voluntary effort of the people, of the men who represent the great trades; that we should, in effect, undertake with their cooperation the regulation of the distributing machinery of the country in such a manner that we may restore its functions to as nearly as may be a prewar basis, and thus eliminate, so far as may be, the evils and failures which have sprung up. And at the same time we propose to mobilize the spirit of self-denial and self-sacrifice in this country in order that we may reduce our national waste and our national expenditure.

If democracy is worth anything, we can do these things by cooperation, by stimulation, by self-sacrifice, by the patriotic mobilization of the brains of this country. If it can not be done in this manner, it is better that we accept German domination and confess the failure of our political ideals, acquiesce in the superiority of the German conception and send for the Germans to instruct us in its use. At the same time, while we may rest with assurance upon the volunteer support which we shall receive and which we are receiving from hundreds of trades throughout the country, there is no population so perfect, so filled with idealism, that there is not some residue who will refuse to cooperate and thereby nullify every endeavor of the majority. Therefore it is necessary to have considerable powers for the regulation of trade in order that we may give support to those patriotic men who are willing to bend their energies to the national necessity and force the minority to follow their leadership.

Mr. Hoover here recognizes, Mr. President, one of the stern facts in life—the existence of a recalcitrant, sometimes of a criminal, minority in every society, large or small, an element which will not cooperate, which frequently rebels, an element which is sometimes criminal. The existence of that element accounts for an overwhelming percentage of all the legislation of mankind. It is the stubborn and lawless few who make it necessary to enact rigid rules for the lawful many; but if it be true—and I hope it is—that this system of voluntary effort, supplemented by a mild and liberal statute, can be made effectual, then, of course, this is the character of legislation we should enact. But my experience has been that the most drastic of laws sometimes fails to rule the lawless minority, and that the absence of sanctions to legislation are apt to render them wholly innocuous.

Mr. President, I was impressed some days ago with a remark attributed to Bismarck, and which is here very appropriate. In asserting the superiority of the autocratic over the democratic system of government, he emphasized the fact that while in war democracy might organize the fighting line, it always found it difficult, and sometimes impossible, to organize the civilian behind the lines, while under an autocracy organization of the civilian behind the lines was as certain as that of the soldier at the front. Hence his faith in centralized authority.

Whether our vast unorganized civilian majority behind the lines can be organized under this bill is, to say the least of it, a problem. It has been said that autocracy seemed more efficient than it was, while democracy was always more efficient than it seemed. Let us hope that this is truer than the aphorism of Bismarck, and that its truth may be signally illustrated in the operation of this bill.

Mr. President, the conservation of the food supply, the elimination of waste, the practice of those economies which a prudent people should always observe, if organized and systematized in this country will, in my judgment, solve the food problem and make it easy for us to discharge our duty to our allies and to feed our own people abundantly, provided always that its ultraspeculative features may be dominated and suppressed by the Government.

I have said, Mr. President, practically all that I care to say regarding this very important measure; but, before I take my seat, let me say a word in deprecation of some of the criticisms and strictures which have been aimed at Mr. Hoover during the course of this debate. I recognize that there has been nothing personal in these criticisms; indeed, Senators have been careful to assure us that nothing personal was intended, and I have no doubt such is the case; but, Mr. President, when a great public character like Mr. Hoover, responding to the earnest request of the President, who assured him that his services are needed by his country, returns to his home, abandons for the time a mighty task of national benevolence, and in obedience to the command of the Government accepts a greater task, and without money and without price devotes all his energies and his experience to its performance, is entitled to the gratitude of the people whom he is attempting to serve. His counsel may be defective, but it is founded upon an exhaustive knowledge of the subject. Mr. Hoover has made a wonderful and, I have no doubt, a just reputation in Belgium as a man of vast administrative capacity. He undertook a formidable and what seemed to be a hopeless task, that of feeding a hungry nation when it was completely disorganized and under the heel of a ruthless conqueror. He performed it in the face of the most tremendous obstacles, confronted everywhere by the resentful and suspicious opposition of the German invader. He overcame these, and at a time of world-wide war he organized and directed a stream of food supplies, abundant in their extent and never-ending in their source, from the markets of the world to the shores of these helpless people. He fed every mouth. He administered the financial and commercial features of his great task with the same conspicuous ability that he displayed in that of collection and of distribution—so much so that he wrung from reluctant Germany its unwilling appreciation. He has forever invoked the love and the gratitude of that helpless people, and established a reputation for ability, a heart filled with the love of mankind, and an intellect devoted to their service.

Mr. President, I welcome such a man to America. I am proud that he is an American. I am glad that the President called upon him at this hour of the Nation's crisis. I am doubly glad that he responded. He may be unequal to the task. He may be entirely mistaken in his policy of administration; but he has success behind him, patriotism to inspire him, and I believe that success also lies before him.

Mr. President, let us control, as far as we can, the food supply of this country and of its distribution, injure no man, yield to all the profit to which they are entitled, recognize the existence of a high level in prices, yet administer with vigor those things which are essential to the needs and the welfare of the Nation in this exigency, so that every man will feel a sense of justice and the spirit of anarchy and of revolution be exorcised.

Mr. SHERMAN. Mr. President, has the Senator concluded his remarks?

Mr. THOMAS. Yes, sir; I am through.

Mr. SHERMAN. I want to make this inquiry: Does the Senator think, if I possess 5,000 bushels of wheat in an elevator in Colorado, not having made any attempt to pass it into the interstate commerce of the country, that we could by an act of Congress authorize a Government agent to come and seize it, either in the hands of myself, a local elevator man, or myself, a farmer in the State of Colorado, not for the purposes of the Government? If it be for the purposes of the Government, the Army or the Navy other military operations, concede that; but outside of that, can the Government seize it in order to sell it to people in Chicago who are short of food?

Mr. THOMAS. Does the Senator think, if I have a son in the State of Colorado of the age of 22 years whom the Nation needs, that we can authorize the President to go out there and take possession of him and put him in the ranks and put a musket in his hands and send him to the front?

Mr. SHERMAN. Undoubtedly.

Mr. THOMAS. I think if the same exigency arises with reference to that 5,000 bushels of wheat, it is no more sacred than my son's life.

Mr. SHERMAN. With this distinction, Mr. President: The Government, under the legislation of Congress and its prac-

tices in years past, as well as the executive department, takes the son for the purpose of waging war. If the Government takes the food or the articles to be turned into food for the purpose of waging war, undoubtedly it would be within its war power.

Mr. THOMAS. Then I do not think the Senator and I disagree.

Mr. SHERMAN. But if it takes my food product to serve hungry people in Chicago when I have not yet passed it into interstate commerce, the inquiry I am making is, does Congress have the power to authorize that to be done?

Mr. THOMAS. I think, Mr. President, that Congress has that power if, in a state of war and for war purposes, it is necessary that the Government should take that wheat and remove it from Colorado to Chicago; not otherwise.

Mr. SHERMAN. That is the point on which I wished to get the Senator's view. Again, if the Senator will pardon me, I should like to ask whether, beginning in 1914, and by several acts of legislation since then, notably in 1917, the English Parliament has not enacted various food-control measures of similar kind to the one we are considering?

Mr. THOMAS. There has been food legislation.

Mr. SHERMAN. That is true, is it not?

Mr. THOMAS. I am not entirely familiar with all of its details.

Mr. SHERMAN. I understand so. I understand, further—and I will ask if it is not the Senator's understanding—that the only constitution that England has is an act of Parliament, practically, for legislative purposes?

Mr. THOMAS. Oh, that is all. In other words, any act of Parliament is valid.

Mr. SHERMAN. It is vital, it is omnipotent in a governmental way, as the courts sometimes put it.

Mr. THOMAS. Yes.

Mr. SHERMAN. In view of that, I want to read an extract from the London Times of May 29, 1917, in which it is said:

> The Commercial Travelers' Association at their conference at Liverpool yesterday—

That would be the 28th of May—

> passed a resolution calling on the Government to take "immediate and effective steps to stop profiteering in foodstuffs, and by a firm control to bring about an equitable distribution of available supplies."

That is the resolution. The news column goes on with the following:

> Meat, bacon, margarine, tinned fish, milk, and bread all cost more today than is necessary to give a fair profit to the producer and retailer. In regard to meat, prices are so high that even the farmer is astonished. The following is an extract from a letter sent by a farmer to a relative: "I hope I shan't make your mouth water when I tell you I sold to-day 10 fat bullocks for £557. At any sale previously, and I have sampled the sales for many weeks, they would not have made so much by £80. Where is the food controller?"

Continuing, the news column proceeds:

> The extraordinary thing about the high meat prices is that there is no real scarcity of supplies. Consumption has gone down, the stock of cattle and sheep in the country was never higher, but prices have reached an unparalleled figure.

This was after Lord Devonport had been at least for two and a half years, I think, food controller. He resigned a week or 10 days ago.

But with all the omnipotent power of Parliament, Mr. President, limited by no written constitution and by no rights of States under the respective constitutions and property adjudications of the several States as long as they keep outside of interstate commerce, this has been the result in England up to the 29th day of May, 1917. Now, I should like to ask the Senator if he thinks we would have any better fortune here in matters that are entirely within the jurisdiction of States unless his war-power theory is correct?

Mr. THOMAS. Mr. President, I answer that I would not want to judge of the effect of an act of Parliament by the isolated instance of its operation to which the Senator refers in a newspaper editorial. I should want a general line of information as to the effect of them all, as a whole. Of course, if this law does not work, then I do not see that it is going to injure anybody. But my understanding, in a general way, from my reading upon the subject, is that through the operation of restrictive food laws, both in Great Britain and in Canada, the general run of the prices of the necessities of life is much less than it is here.

Mr. SHERMAN. This is from the paper published by Lord Northcliffe, the British commissioner, who is in Washington or its vicinity now.

Mr. KNOX. Mr. President, I think this is perhaps an appropriate time, if any, when by common consent the consideration of the details of the matter which is under technical consideration has been suspended, to make such general observations as one may have to make in regard to the general subject of the bill.

This scheme of legislation has been forced upon us by the exigencies of the war. It is akin in principle to several measures already enacted and will without doubt be followed by other projects of law of similar portent growing out of our relation to the war, our relation to our allies, our relation to those nations who have this far held aloof from the war, and defining policies we must pursue in the various situations created by war and conditions that must inevitably follow the war.

One principle clearly emerges from the somewhat complicated and confused provisions of this program of legislation, and that is that the powers proposed to be conferred upon the President are intended to be adequate for and proportioned to the end to be accomplished.

An important American newspaper, in commenting upon the probability of such proposed legislation, declared:

> The President's supreme authority as Commander in Chief of the Army and Navy of the United States is to be extended by the most logical of processes to supreme command of the industrial forces of the Nation. Wars are no longer fought wholly with guns. The plow and hoe on the soil, the pickax and drill in its depths, the loom, the forge, the sewing machine, all have their vital part in the economy of modern war. The President's authority over Bethlehem should be as complete as it is over the batteries it builds. He should be as able to order a coal company to dig coal as he is to order a brigade to dig trenches.
>
> Once vested with these powers the administration must give us action and show accomplished work. The submarine menace must be met and beaten. It is folly to delay in the face of it. The production of our farms must be enormously increased. Every expert knows it can be done. Our industry must be organized so as to produce at the highest possible rate. Our people must not be starved by scarcity of products nor beggared by high prices due to monopoly and extortion.
>
> It can all be done, and in the name of all that is patriotic. Do it now!

Hamilton said, as I partially quoted on a previous occasion:

> The authorities essential to the care of the common defense are these: To raise armies, to build and equip fleets, to prescribe rules for the government of both, to direct their operations, to provide for their support. These powers ought to exist without limitation, because it is impossible to foresee or define the extent and variety of national exigencies, and the correspondent extent and variety of the means necessary to satisfy them. The circumstances which endanger the safety of nations are infinite, and for this reason no constitutional shackles can wisely be imposed on the power to which the care of it is committed. This power ought to be under the direction of the same councils which are appointed to preside over the common defense. It must be admitted, as a necessary consequence, that there can be no limitation of that authority which is to provide for the defense and protection of the community in any matter essential to its efficacy—that is, in any matter essential to the formation, direction, or support of the national forces.

It is, indeed, impossible to foresee the extent and variety of the means necessary to be employed to avert national disaster.

However wise and prudent we may be, our measures will be superfluous in some respects and wanting in others.

For myself, entertaining no doubt as to the necessity of such legislation, I shall not demand that it fully satisfy a hypercritical examination of its details. I believe that in such an adventure as that upon which we are now embarked, the executors of the law will mollify its enforcement to avoid unnecessary hardships and by liberal construction of its spirit see that it accomplishes the purposes of its creation.

Among the war powers already invoked, the first in importance and potentiality is found in the embargo provisions of the espionage bill, now become law. Through this act the American people are to be protected against the dissipation of their food and other of the sinews of war in any manner determined by any consideration whatever other than that of the vital national aim—speedy and complete victory in this war. This power of embargo, wisely and boldly exercised, should also serve to hasten the day when many more peoples, still neutral through fear or indifference and not through conviction, shall join the powers arrayed for freedom and civilization in a death struggle with ruthless militarism and the lust for world dominion.

The President's new power to control exports will at last end the absurdity of our supplying the necessities of life to countries which find it possible to export to Germany similar or corresponding necessities. Actually and potentially America and her allies are and will be able, through tariff arrangements and in many other ways, to show that they remember their friends, and that they remember also who it was who gave comfort to their enemies, or who sat by mute and cold when liberty and civilization were at stake.

The fear of a merited moral ostracism and the fear of an economic boycott are factors in awaking Germany from the villainous hypnosis of Prussianism. Germany will be beaten. The German people will be taught that they must discard the low ideals of Prussia if they are to fit into a civilized world. They will no doubt fight blindly on until they see that to continue will only prepare them a worse future. And still there are nations, priding themselves upon their civilization, who do

not even raise their voices as moral factors and so hasten the victory of right. Those who are not with us are against us.

In these animadversions I am quite sensible of the fact that much the same might have been said of the United States during the more than two and a half years of neutrality on the part of the Government of the American people. The moral, the vital, the unescapable issues of this war were vivid enough, even from its opening weeks, to one who wished to envisage them. Clear enough was the need to prepare to meet them. The truth was as true then as now. But we are concerned here and now with the burning problem of the to-day, not with what is past. And although we may well accuse ourselves, yet perhaps our guileless indifference to the menace preparing before our eyes hardly matches that of Europe in the years while that menace was growing to loom black upon a continent and a world. It arrived in 1914, and America rubbed its eyes for more than two years—and then awoke.

In such a struggle economic and political and moral pressure upon neutrals is not to be overlooked as a weapon. By such means and by the righteousness of our just cause we with our allies may so consolidate the opinion and the moral sense of mankind that Prussianism must inevitably bow before the true springs of civilization.

We have provided for governmental control of the priority of shipments within our own borders by the Newlands bill, which passed the Senate on the 15th instant. In this way the American people are to be protected against the paralysis of their sinews of war by any clogging of the arteries of circulation by matter obstructive of the vigor of the body politic. In this way the American people will be protected against any waste of their labor or of precious time in the transportation of nonessentials at the expense of those things the prompt distribution of which is a life and death matter to the national aim—speedy and complete victory.

We are now asked to pass a food-control bill. To fail to do so, after what we have already done, would be to adopt a conclusion while denying its major premise. By a food-control law the American people are to be protected against the dissipation, in inadequacy of production, in wasteful methods of dealing and marketing, in thoughtless extravagant consumption of those things which are the basic necessity in all we may do for the winning of the war, as well as for our very national life itself, namely, food. What avails it to prevent the waste or misuse in export of war necessities, of which food is the first; what avails it to prevent the slow movement of war necessities within our borders, if we should neglect the scientific application of every measure conducive to abundance and conservation of the very necessities themselves? The food bill should be passed, and passed quickly. We shall then have arranged to keep war necessities from foreign use against our purpose, at the same time giving the President a diplomatic and economic weapon which we can at any time still further sharpen, if need be, by discreet applications of the tariff as well. We shall have arranged to give war necessities the right of way in domestic transportation. And that, without which the other provisions are but meaningless corollaries, we shall have arranged to have the maximum of that first necessity of war or peace—food, food for the war, and food without extortion for the American public.

We are committed by necessity and by laws already enacted to the principle of extreme concentration and centralization of authority for the conduct of war. Through bloody years of experience our allies have blazed the way, and have found in that principle the first essential for their salvation, through an efficiency and celerity of action to be attained in no other way. We should not be faithful to our trust if we did not heed that lesson.

The Senate is united in the national aim—complete and speedy victory in the war. It has shown itself united in the principle of concentrated and centralized authority essential to the attainment to that aim. Upon constitutional grounds there need be no qualms. The Constitution imposes no limitations upon the power of self-preservation. If we now delay in another application of the same principle, at a time when every day is of tragic importance, why shall we do so?

From what has been said on this floor I conclude that some Senators, if they do not fear an abuse of powers by the Executive, still fear that the President might execute the new laws through men not wisely chosen. Some Senators, I think, due to the very ardor of patriotic zeal for service and to anxious solicitude for the cherished interests of our country, feel repelled by the idea of seeming abdication of participation in counsel and of advice and consent in appointments in respect of the momentous decisions and the far-reaching official actions to be called for by these new laws or which are automatically created by the country's state of war. I dare say such feeling exists also in the House of Representatives, and in the country as well. I think it is a natural feeling. I believe there is a good way to satisfy it and at the same time to allay these seeming fears and feelings.

The President has selected six men, each eminent in his field, as an advisory commission to the Council of National Defense. The Council of National Defense consists of heads of the Departments of State, War, the Navy, Commerce, Labor, and Justice. Through the advisory commission and its auxiliary personnel it is sought to place at the disposal of the President and of his Council of National Defense the wisdom, experience, and skill of the business, industrial, labor, financial, and scientific talent of the country, as is being patriotically and unselfishly done. These arrangements are more or less informal.

At this critical time, when common council and universal cooperation are declared by the President to be absolutely indispensable, the Executive should be glad to have likewise at his constant disposal the mature governmental experience, the close touch with the people, and the trained judgment of the Congress, if only this could be done in a practical way. Now, not all, but a very few representatives of the business world could be called into council if expedition and efficiency were to be attained. Just so, not all, but a very few Representatives of the Congress could regularly participate in council as to the day-to-day conduct of the war if they were to constitute anything but a very unwieldy body.

Reflection brings conviction of the impracticability of that idea as hitherto developed. It violates the principle of concentration and centralization of authority in war time as contemplated by the Constitution and as demonstrated by the experiences of our allies to be vital, in an extreme measure, to successful combat against Prussian militarism. Not as a separate body, but as participants in council with the Executive, should the Congress be represented in the conduct of the war. Only in this way will unity of direction be preserved.

In this way only can the Congress remain in helpful touch with Executive deliberations.

If anyone shall still be appalled at the concentration and centralization of authority which we are legalizing, let him remember that America has been inexorably drawn into the whirlpool of the most appalling and catastrophic crisis that has ever visited the world. If we are giving legislative sanction to startling innovations, we are compelled by a novelty of horror and of menace hitherto undreamed of.

Democratic governments have often failed to serve the best interests, nay, to guard the very safety of peoples because of the fear to lead, the fear to face prejudice in bold advocacy of necessary change. Often they have not dared tell the people the truth. As one historian remarks, "The constitution of man is such that for a long time after he has discovered the incorrectness of the ideas prevailing around him he shrinks from openly emancipating himself from their dominion, and, constrained by the force of circumstances, he becomes a hypocrite, publicly applauding what his private judgment condemns." The Government of the United States is fortunate indeed. The American people are showing themselves brave, united, earnest, and quick to respond to reason and necessity. They demand efficiency, not the coddling of prejudice or the fetish of obsolete political cries.

It is customary to attribute the fall of governments to the decay of morals and ideals among peoples. It is very questionable whether ruin has not been equally due to the failure of governments to build, to make adaptation, to progress with the fateful march of change. To keep things as they are has been thought the art of statesmanship. But a thoughtful, a constructive progress, a gradual adaptation of formula to new realities, must be in the mind and soul of a nation's statesmanship if that nation is to escape ruin. Otherwise, unattuned to orderly progress under natural laws, no longer fitted to their New World environment, institutions and even nations themselves sicken and die.

How great will be the flux of change wrought by the epoch of this war we do not know. The world will never again be quite the same for us. To meet the great impetus to be given political and social evolution by this war our statesmanship will need all its resource, all its foresight, and all its adaptability.

How much more, then, in war time, with all at stake, must we be undaunted by innovation and boldly constructive in our measures.

We need not be afraid of Prussianizing the United States. Not forms and names but results are the criteria of human institutions. It is not its efficiency but its intolerable purpose, its unconscionable means, its cynical and brutal materialism, its medieval sophistries that have made the name of Prussianism abhorred.

What Victor Hugo said of Napoleon and Waterloo may well be applied to Germany and to-day. He said:

Was it possible that Napoleon should win this battle? We answer, No. Why? Because of Wellington? Because of Blucher? No. Because of God. For Bonaparte to be conqueror at Waterloo was not in the law of the nineteenth century. Another series of facts were preparing in which Napoleon had no place. The ill will of events had long been announced; it was time that this vast man should fall. The excessive weight of this man in human destiny disturbed the equilibrium. This individual counted of himself alone more than the universe besides. These plethoras of a human vitality concentrated in a single head, the world mounting to the brain of one man, would be fatal to civilization if they should endure. The moment had come for incorruptible supreme equity to look to it. Probably the principles and elements upon which regular gravitations in the moral order, as well as in the material, depend began to murmur. Reeking blood, overcrowded cemeteries, weeping mothers—these are formidable pleaders. When the earth is suffering from a surcharge there are mysterious moanings from the deeps which the heavens hear. Napoleon had been impeached before the Infinite, and his fall was decreed. He vexed God. Waterloo is not a battle; it is the change of front of the universe.

Does anyone still ask why America is at war? Let each, if he will, answer according to his favorite phrase; according to the phase of the question it may please him at the moment to emphasize. He will do no harm so long as he remembers that behind all nice phrases, back of all generalizations and altruistic idealizations stalks this stark fact: America is in this war to defend its honor, its liberty, and its life once and for all time from menace by the Germanic power. That power stands forth as a nation drilled for generations in a religion of dominion by force, a nation that has learned to laugh at justice and good faith, whose conscience has been made callous to the most horrible cruelties. It is not so much forms of government as the spirit and aims of governments and peoples that count. Such a nation must unlearn the long lesson of Prussianism.

Unbounded hostile design and unbounded power leave no room in the world for free men. The peoples who stand for a civilization of freedom, of justice, and of law must stand together now or perish one by one. Should Germany triumph the Western Hemisphere and the United States itself would be her next victim. The realization of the German purpose in Europe would have at once brought interests we are bound to defend within the scope of her imperious designs. Whatever forms of government other peoples may prefer, the American people are at war to make the world safe for this particular democracy lying between Canada and Mexico in North America. We are at war to save America, and the means employed must be proportioned to the end.

Mr. SHERMAN. I wish to ask the Senator from Pennsylvania if he is in favor of extending the scope of the bill to other necessaries than food? We can not fight a war by food alone. What about copper and dynamite and iron and steel?

Mr. KNOX. I am in favor of extending the scope of the bill, or if not of this bill, if the necessity arises, of some other bill to include everything that it is necessary to use to win this war.

Mr. STERLING. Mr. President, while what I have to say may strike a somewhat different note from that touched by the distinguished Senator from Pennsylvania [Mr. KNOX], yet I wish to express my hearty appreciation of the noble sentiments he has just uttered and of his faith in the triumph of democracy and of humanity in this great war.

Mr. President, I find in the Sioux City Tribune of June 20 the following dispatch, which I wish may serve as a sort of keynote or text to what I may have briefly to say on the pending bill. The dispatch, which shows what the volunteer efforts of patriotic farmers in my State may accomplish, is as follows:

KIMBALL, S. DAK., *June 20.*

George E. Woodraska, a prominent Bohemian of Brule County, is circulating a copy of the Pukwana branch of the farmers' volunteer war pledge, by which each farmer pledges to deliver at Pukwana in November 5 bushels of wheat, or equal value, to be shipped anywhere designated by the Government. The pledge cites: "Whereas the United States has declared war with Germany and its allies, with the object to restore the rights of oppressed nations and to maintain the rights of America on land and water, and realizing that such an act has involved a burden upon our Nation, we, the patriotic farmers of Brule County, pledge ourselves," etc. The farmers are joining the patriotic movement very fast.

Mr. President, I am in hearty sympathy with the object of this bill as expressed in the title, which is "To provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," and in sympathy with the purposes of the bill as expressed in part 10 of the hearings of the House Committee on Agriculture:

The chief aims of the bill, as there set forth, are to eliminate waste, to conserve the supply of human food, to stimulate production, to prevent hoarding, to restrain injurious speculation, to prevent corners and extortion, and to prevent deceptive practices and effect equitable distribution.

There is the need, and some legislation along the lines and for the purposes named in the title and the committee hearings should be enacted at an early day.

It may be observed in passing, however, that the elimination of waste, the conservation of the food supply, and the increase of production are closely related to the daily habits, lives, tastes, and interests of the individual producer. They are difficult of control by legislation. And this aside from any question of power to so legislate. Furthermore, grave questions of policy must always arise in considering proposed legislation of this kind, affecting as it is apt to do the personal daily life and business of the individual who theretofore had been left free to follow his own judgment and act on his own initiative.

And still I am quite willing in the present emergency to go as far as we can under the Constitution or as far as wise policy will permit, in preventing waste, in conserving the food supply in increasing production. All of which I agree are material in this time of war to our national security and defense.

I would not be heard to criticize or object to this bill if in its text it did not go beyond, and, as I think, in some respects and in some places, very far beyond, these legitimate and beneficent purposes and aims.

In my humble opinion the bill lays down principles, asserts or establishes policies and confers powers which are subversive of free government.

Great as are the exigencies of war, they do not require that our Government be transformed into an autocracy to carry it on or to win it.

Although I deplore war, I have supported with some enthusiasm the various war measures so far enacted, including the declaration of war, the selective conscription bill, the espionage bill, the big money supply bill; and now that all these bills have been considered and passed in so short a time, I have thought with what efficiency and rapidity, after all, can a democracy act when confronted with a great emergency, its people thoroughly aroused.

But in none of these heroic measures has the principles of democracy been violated. Let us pass a reasonably good food-control bill and still stop short of their violation. Let it be a bill free from ugly precedents which may rise up to plague us in the future.

I have indulged the hope that we could take up this bill and by the elimination of some of its "waste" provisions, the reconstruction of two or three of its sections, and with the addition of the House amendment in regard to prohibition make a bill that would, as far as legislation could do it, accomplish the purposes set forth in the title of the bill, one that the House would accept and which would meet with the approval of the country.

I trust I shall not be considered presumptuous in suggesting some changes I believe to be reasonable as I proceed.

The first section is largely a declaratory section concerning the subject matter of the bill. According to this section foods, feeds, fuels, and the articles required for their production are necessaries the production, manufacture, and distribution of which are to be the subject of the control provided in the bill.

But even so, this first section asserts a doubtful principle. Among other things it asserts as one of the specific objects of the bill the following:

To establish and maintain governmental control of such necessaries during the war.

And, then, after an enumeration of purposes comes the following portentous sentence:

For such purposes the instrumentalities, means, methods, powers, authorities, duties, obligations, and prohibitions hereinafter set forth are created, established, conferred, and prescribed.

I think, as I read that portion of the bill, that it must have been the intention of the author that "nothing should get away." There seems to have been a search for words that would in the mind of the framer or framers of the bill be amply descriptive of all the things that could be done by the President and all the means he might employ in doing them in this grant of unprecedented Executive power.

I am not disposed to be hypercritical as to the language or phraseology of a bill. If it be reasonably plain and clear as to the intention of the legislator, that as a rule is sufficient whether I agree with the bill or not, but words in excess of those sufficient to make an act valid and operative may be taken sometimes, as I think they may be taken here, as reflecting an ultimate design or spirit of the sponsors or framers of the bill or of their serene confidence in the principle supposed to be involved in such a multitude of words. They feel, therefore, that in the framing of an act they can not make things "too sweeping." But I forget, there is another consideration. It may be that the framers of this bill in their excitement induced by the war overlooked a few of the fundamental principles underlying American life and American institutions.

So in the first section of the bill I would strike out a part of the language, so that the latter part and that to which I have

especially called attention would read, after striking out the words relative to governmental control of such necessaries—

for such purposes the powers, duties, obligations, and prohibitions hereinafter set forth are created, conferred, and prescribed.

You would then have language amply fitted to describe everything that should have been intended.

But it is in section 3 that we find full elaboration of the principle involved in section 1 relating to governmental control of necessaries. In this respect section 3 reads as follows:

That there is hereby established a governmental control of necessaries which shall extend to and include all the processes, methods, activities of, and for the production, manufacture, procurement, storage, distribution, sale, marketing, pledging, financing, and consumption of necessaries, which shall be exercised and administered by the President for the purposes of this act; and all such necessaries, processes, methods, and activities are hereby declared to be affected with a public interest.

Mr. President, neither the existence of a state of war nor our hurried preparation for the war, nor any condition of our material resources now or likely to be can prevent some amazement on my part upon reading these words. It is as though—that is the way they sound to me—we had been transported to foreign shores to live under another flag, the emblem of a government that compelled the subordination of all individual impulse, all individual activity and enterprise to the supposed good of the State—some land where the individual existed for the State and was lost in the State, as in ancient Sparta or modern Germany. I am left to wonder if here at one fell enactment we are to surrender up all we have longed for and hoped for, all our forefathers fought and died for in the way of freedom of initiative and civil liberty, to forget we are Americans by adopting this un-American provision.

I can not help but ask the question, Could autocracy itself decree anything much more drastic and all-embracing than this which the Congress of the United States is seriously proposing to enact for the government of the American people?

Why, Mr. President, the production, manufacture, distribution, sale, marketing, pledging, financing, procurement, and storage of the necessaries described in this bill have from the beginning and do now constitute by far the greater part of the activities of the American people. Left to their own devices, their own energy and enterprise, Americans have in the various pursuits connected with or arising out of the production of these necessaries of life made of this the richest Nation and the granary of the world. This has been, for the most part, achieved through ordinary times without the extraordinary stimulus which a foreign war has given to the production of food products, although we have had, of course, during much of the time a correct tariff policy, which has been a material factor in our industrial development.

But this is a food-control bill. The direct and immediate source of the great bulk of food consumed at home or which we send abroad is the farm. The governmental control, then, extends to the processes, the methods, and activities of the farm. Sowing, planting, cultivating, harvesting, thrashing, and storing are the various processes by which various crops are raised and saved. They have always been subject to the control and management of the individual farmer; henceforward they are to be under governmental control.

Methods, whether he shall plow deep or shallow; whether he shall rotate his crops; whether it shall be timothy or alfalfa, corn land or pasture land; whether he shall raise hogs, cattle, or sheep, may not be determined by what the farmer's experience and judgment, aided by the information he may get from the experiment station at his own agricultural college, may dictate, but be determined by the Federal Government at Washington under the language of this bill.

Mr. President, the average American farmer in the great grain and stock-producing States is a capable, level-headed, self-reliant citizen. He knows his business, and that one part of his business is to know and follow the most approved methods, to use the best machinery, to breed the best cattle, hogs, and sheep. He is in the business because it is more or less remunerative. Quantity and quality are both factors in determining what his reward shall be; and hence the ever-present inducement is for him to produce the most he can of the best he can.

The production of an adequate supply for our domestic needs, for the needs of our allies, is, of course, now the first great consideration.

But under the provisions of section 3 you will have all this governmental interference with and control of the activities, the methods, and the processes of the farm, with all the attendant inspection and expense involved in such control, and as a result you will not add one bushel of wheat, of corn, or of oats, nor one pound of beef, or pork, or mutton to the supply. And, indeed, Mr. President, if it is desired to stifle and discourage rather than help in this great fundamental industry of agriculture, I know of no better way than to adopt these provisions of section 3. The governmental interference contemplated by these provisions will, I fear, serve to discourage rather than stimulate production, and is likely to be resented by the industrious, thrifty, and intelligent farmers of the United States.

It may be said that the control of the various methods of activities and processes of the farm will not be exercised, but you have given the broad power for their exercise, and the farmer will live and work under the shadow of it instead of feeling free, as he should, to exercise his own good judgment and discretion and perform what he believes to be his patriotic duty in the way of producing the foodstuffs necessary for the national security and defense.

The clipping which I read at the beginning of my remarks, disclosing the action of the farmers in a county in western South Dakota, was but illustrative of their patriotism and what may be accomplished by purely voluntary service on the part of American farmers.

Why, Mr. President, think of what is now being done under existing governmental machinery and the voluntary effort being made throughout the Union in answer to the call for increased production in this crisis. The Secretary of Agriculture in his testimony before the Senate Committee on Agriculture on April 23, at that early date in the history of this legislation, or within the time that we have been considering it, graphically depicts some of the voluntary means and agencies which are now, if not at that time, employed in all the States in the Union, extending as they do to counties, to townships, and to precincts throughout the various States.

I now read briefly from the hearings of the Agricultural Committee and from the testimony of Secretary Houston. At a hearing, which occurred on April 23, the Secretary said:

I think the country is fortunate in having laid the foundations of agricultural agencies many years ago; and it is interesting in this crisis to remember that the foundations of the two greatest agricultural agencies in the world were laid in another period of stress—in 1862. In that year the acts creating the Department of Agriculture and the land-grant colleges were signed. We have, therefore, in the country to-day the Federal Department of Agriculture employing about 17,000 people, constituting in a sense a Federal commission of food production, conservation, and distribution.

These are existing forces acting under authority of law.

We have in the aggregate in the State land-grant college agencies about an equal personnel, with large support—

Making, all told, about 34,000 national and State employees engaged in aiding in and encouraging the production and conservation of food products—

We have also in the various States the State departments of agriculture and many farmers' organizations, some of general national scope and others dealing with particular lines of agriculture. You are doubtless aware of the fact that recently there was a conference in St. Louis of official agricultural representatives of the Nation east of the Rocky Mountains, State commissioners of agriculture, representatives of the land-grant colleges, and Federal officers. We could not get the Pacific coast delegates there in time, so I asked that a conference be called on the Pacific coast, which was done. Earlier a conference was held in New England and also one in Atlanta, Ga.

The State agencies are being welded together in many of the States into a State central board of food production, conservation, and distribution. As a rule, on these State boards there is a representative of the State department of agriculture, of the land-grant college, of farmers' organizations, and of business men. Therefore we have the leading agricultural organizations represented in a centralized body in many of the States I hope there will be one in each State. There is being formed in many States similar small boards in the counties, or their local subdivisions.

In addition, then, to the forces, National and State, regularly engaged in this work under the law there is what might be termed an auxiliary of the Council of National Defense in every State, the business of which is particularly that of looking after the production and conservation of food products.

Mr. SHERMAN. And without cost.

Mr. STERLING. And it costs nothing, as suggested by the Senator from Illinois. It is purely voluntary, and is under the system from which you will get the best and the most patriotic service with the grandest results.

There has been protest, Mr. President, from farmers and from farmers' organizations against these drastic provisions of the bill—provisions which I regard as un-American and undemocratic—provisions which are not necessary in order that there may be full production and conservation of the food supply, and which are not necessary in order that we may regulate the boards of trade, the elevator companies, prevent hoarding, and speculation to the detriment of the great public. I read from American Cooperative Journal for June, 1917, just a short extract or two from a lengthy article, most of which is of the same general tenor:

When this great Nation, which was conceived in liberty and dedicated to the proposition that all men are created free and equal, suddenly appoints a "food dictator," and introduces into its National Congress a "food bill," the text of which empowers the President to seize all food, fix all prices on the same, and arbitrarily and at will close the natural channels of trade through which the products of our farms have from the beginning of our very existence passed in distribution, it is fitting and proper that every man whose freedom, whose business, or whose just and equal rights are thus disturbed and even threatened with destruction should lift his voice in solemn warning and in patriotic protest.

I understand, Mr. President, that the bill in its text as now presented is not quite the same as it was when first introduced in regard to the fixing of prices, but yet the bill as it stands at present does undertake to fix a guaranteed minimum price for nonperishable farm products. Furthermore——

Mr. SHERMAN. Mr. President——

Mr. STERLING. If the Senator will excuse me a moment, I desire to say that I think under the drastic provisions of section 3, giving these tremendous powers to the President in regard to all the activities and methods and processes of production, the President might fix a price for the purpose of controlling those methods or activities. Now I yield to the Senator from Illinois.

Mr. SHERMAN. I suspect the farmers who are writing the Senator from South Dakota and the journal from which he reads represent actual farmers, do they not?

Mr. STERLING. The journal is called the American Cooperative Journal, and, as I understand, it does represent the sentiment of actual farmers. If the Senator will permit me——

Mr. SHERMAN. Yes, sir.

Mr. STERLING. I will read a quotation here from "An explanation," which is found on the same page and in the midst of the article from which I read:

The National Council of Farmers' Cooperative Associations represents over 2,500 cooperative grain companies in North Dakota, South Dakota, Nebraska, Minnesota, Indiana, Ohio, Kansas, Iowa, Illinois, and Oklahoma, with a membership of about 400,000 grain growers. Each of these States has a State association and each State association is a member of the national council.

Mr. SHERMAN. In a way—a very large way—this journal is the press agency through which they communicate their affairs to each other and to the public?

Mr. STERLING. I understand so.

Mr. SHERMAN. As against those, Mr. President, I wish to ask the Senator if he will permit me to call attention to three requests—I do not care to read them at length—of constituents, who are quite explicit in asking the immediate passage of this bill in the form in which it passed the other House. Those gentlemen live in Chicago, and their names are R. J. Karnick, William E. Mikolajczyk, and A. E. Mazurkiewicz, all of whom are ultimate consumers, living at Chicago. I should like to have them considered as against the men who are actual producers.

Mr. STERLING. Certainly.

Mr. SHERMAN. Also a further one by Mr. Reuben Bobinsky, who is clamoring lustily for the passage of the bill in its original form.

Mr. STERLING. I desire to ask the Senator from Illinois if he thinks that any one of those gentlemen who have written him has any idea in regard to the contents of the bill or its provisions?

Mr. SHERMAN. He has no more idea of its contents than he would have if he were living astride of one of the rings of Saturn, Mr. President. [Laughter.]

Mr. STERLING. I thought so. I desire to say in this connection, Mr. President, that I have just received three telegrams asking support of this food-control bill. Those three telegrams come signed by three wholesale houses or jobbers' houses in South Dakota; all are in exactly the same language, and all are dated at Chicago. Aside from these I have not any telegrams or letters either, for that matter, from any business man or farmer in South Dakota urging the passage of this bill. I doubt if the senders of the telegrams I mention, even if they have seen the bill, have grasped the full import of some of its provisions.

Now, Mr. President, I have considered section 3. That section is fundamental. It is at the foundation of unwarranted powers conferred by other parts of the bill. We can pass a bill here, as I stated a while ago, that will prevent hoarding, that will prevent speculation so far as legislation can prevent it at all, that will prevent the permissible deterioration of food products or willful waste of food products so far as legislation can accomplish that end, without the declaration of an autocratic and un-American principle such as is found in section 3.

I object to a part of section 5 of the bill on much the same grounds. Section 5 may be termed the license section of the bill. It provides that the President may license importers, exporters, manufacturers, storage men, and distributors of "necessaries" as defined in the bill. In trying to prepare a bill that I hoped might meet the approval of the Senate, I have stricken out that part of section 5 authorizing the licensing of these different industries or vocations, and have combined sections 4 and 5 into one section, namely, section 4. I do not find that proposed amendment here on my desk; but it is the section which makes it unlawful willingly to destroy food products or to permit preventable waste or to permit preventable deterioration of food products. It condemns all evil practices in the handling of or dealing with any of these necessities.

What is the necessity for a license system? I have tried to express in the amendment I have drawn, by combining sections 4 and 5, the fact that there is no such necessity. I put all persons, whether manufacturers, producers, storage men, or distributers of any kind, on exactly the same plane and prohibit evil practices on the part of any or all of them.

I see absolutely no need for a license system, with its inspections, its espionage, and its Government expense. What does it involve? The "necessaries" are foods, feeds, and fuel. It would involve the power on the part of the President to require of a man in South Dakota who runs a little flour mill or a feed mill to take out a Government license, to pay the fee for the Government license, and to be subjected to inspection as a licensee under the Government. There is hardly a little village of 150 or 200 inhabitants which has not at least a feed mill, where the farmers take their corn, their barley, and oats to be ground for feed for their stock; and yet under this bill they, too, could be compelled to submit to Government license and inspection. What has become of the rights and authority of the State under this arrangement?

Mr. President, this bill in some of its provisions, such as section 3 and that part of section 5 pertaining to a license, is not a bill expressive of trust in the energy, in the intelligence, and in the patriotism of the American people, but a bill that discloses suspicion of them, for at every turn in their daily lives and occupations they would be subjected to Government supervision and discipline. That is Germany; it is not America. If I recall correctly one statement made by the distinguished Senator from Pennsylvania [Mr. KNOX], it was to the effect that he did not so much fear broad powers in the Executive; that they would be mollified in their execution; but, Mr. President, I would rather see to it that we here say what we mean and that we determine what powers the President shall have; and that those powers shall not contravene the Constitution even in time of war or be opposed to our continuous American policy.

To be a little more specific in regard to section 4, that section makes unlawful the willful destruction of necessaries for the purpose of enhancing the price or restricting the supply. Knowingly to permit waste or willfully to permit preventable deterioration of any necessaries is also made unlawful. So also it is made unlawful to monopolize either locally or generally any necessaries.

In addition to these acts and omissions declared to be unlawful by section 4, it is also made unlawful to engage in any discriminatory and unfair or wasteful practice or device, or to make any unjust or unreasonable rate or charge in handling or dealing in or with any necessaries. By section 4 also conspiracies, combinations, and agreements for the purpose of restricting or limiting the supply or for charging any excessive rate or price are prohibited. With all these provisions, Mr. President, I am in accord, except that the agreement or combination in order to come within the inhibition of the act should be an agreement for the purpose of unreasonably enhancing prices. It would then be a combination or agreement which would be analogous to the combination or agreement which is condemned by the antitrust law. An agreement to limit facilities, to lay off help, to suspend operations when to operate would be at a loss, because the market was sufficiently supplied and there was no demand, ought not to be under the ban of the law.

But section 5 is the license section of the bill. It authorizes the President to license either of the five activities or enterprises I have already named—exportation, importation, manufacture, storage, or distribution of any necessaries in order to carry into effect the purposes of the act. If any licensee is guilty of any unfair, unjust, unreasonable, discriminatory, or wasteful rate, charge, or practice, he may, on the order of the President, be required to discontinue such acts, and the bill further provides that, if he does not discontinue them, the President himself shall establish what shall be a reasonable and just rate.

But why a license? As I have said, Mr. President, it involves a useless and needless expense. If we strike out the provision requiring a license, we can then harmonize the two sections, bringing them into one, and yet have a sufficiently drastic bill as against all evil practices in the handling of or dealing with or in hoarding, storing, or speculating in food products.

Mr. SHERMAN. Mr. President, before the Senator takes up another branch, will he permit an inquiry?

Mr. STERLING. Yes, sir.

Mr. SHERMAN. I have made an investigation in the District of Columbia, and I have reasons to believe, Mr. President, that there is a combination in the District of Columbia, which exists contrary to the Sherman Antitrust Act. I do not believe that a farmer or a truck gardener can come into Washington and sell direct to the consumer without inviting upon himself a practical boycott by the retail dealers, under which they refuse—and they go to some trouble to find out who the farmer or truck gardener is—to buy or handle his products thereafter if he sells directly to the consumer in his kitchen. This same thing holds true, Mr. President, in its application to commission men. A commission man, having brought a product into Washington that has been the subject of interstate traffic, can not, if he wishes, sell directly to the consumer in the city of Washington without being boycotted by the retail dealers in the article.

The same thing holds true all over the country. There are grocers' associations—I will be specific—in most of the larger cities of the Union which boycott commission men, farmers, truck gardeners, and market gardeners if they sell to the consumer instead of to the retail grocer. This reaches out into interstate traffic, the commodities involved being frequently the winter products that come from the Mexican Gulf coast into the various northern markets of the country. I ask the Senator whether it would not be productive of good results if the officers charged with the enforcement of existing laws would themselves become active and thereby, without additional legislation, somewhat reduce the high cost of living of which people are now complaining?

Mr. STERLING. Mr. President, I am inclined to think the Senator is right in the suggestion that if the antitrust act of 1890 as amended, the Clayton Act of 1915, and the Federal Trade Commission act were enforced by the officers of the Government there would be less need for this legislation. But I may add, in connection with what the Senator has suggested by his inquiry, that in these previous acts, together with the other provisions of this bill to which I have alluded, and which I favor, we have done all that legislation can do, or ought to do, without any license system or without the provisions of section 3 giving governmental control of all the activities, methods, and processes relating to food production.

Mr. President, I want to speak briefly about two more sections of this bill. They are sections 9 and 10 in the original bill. Section 9 is the section authorizing the President, in order to carry into effect the purposes of the act—

to purchase, provide for the production or manufacture of necessaries—

Remember that necessaries are food, feeds, and fuels and the articles required for their production—

to store them and to provide storage facilities for them.

Then, there are the further provisions authorizing the condemnation of plants for storage purposes. That is provided for in section 10.

Mr. President, do we want to give the President this absolute power without condition? So, in the combination of these two sections, I have provided as follows:

That whenever the President shall find that existing conditions or facilities are such as not to assure an adequate supply of any given necessary or necessaries for the successful prosecution of the war, and that it is impossible by voluntary arrangement or agreement to assure such supply, he is then authorized—

Not to purchase, but—

to take over, for use or operation by the Government, any factory, mine, or other plant, or any part thereof, in which such necessary or necessaries are or may be manufactured, produced, prepared, or mined.

Mr. SHERMAN. Mr. President——

Mr. STERLING. I yield to the Senator from Illinois.

Mr. SHERMAN. While the Senator is discussing that language of the bill, does that embrace a farm now in private ownership and operated by a farmer?

Mr. STERLING. I have not thought of the particular question asked by the Senator, but my interpretation of that is that it would not authorize the taking possession of a farm. The words are "factory, mine, or other plant, or any part thereof." I do not believe that the word "plant" is ever applied to a farm. It would be applied to industries other than agricultural in which there is more or less of machinery. I will say to the Senator from Illinois that if I thought for a moment that it did apply to the farm, I would want to see an exception made in the terms of the bill.

So that dispenses with the purchase of necessaries themselves on the part of the Government. What does the amendment which I have proposed invite? The voluntary cooperation of the patriotic business men of the country in the production and the manufacture of the necessaries as defined by this bill. When these facilities are not sufficient, or when these men are so unpatriotic as not to do the work they can and ought to do, then, and not until then, let the President exercise the commandeering power and take over any plant, factory, or mine for the purpose of serving the needs of the Government in regard to such necessaries.

We are safe, are we not, if we stop there? What need is there now, what need can we contemplate, that requires us to go beyond that? I think it is a good principle in legislation always and everywhere to legislate for the present or the imminent needs, and not to conjecture that some time in the far-distant future a condition will arise requiring such legislation. Conditions may change, and we ought to remember that Congress convenes in another session on the first Monday of December next.

Mr. President, that is about all that I have to say concerning the particular terms of the bill, save one thing, and that relates to the section of the bill which provides that the President, in order to stimulate the production of nonperishable farm products, may ascertain what is a reasonable price under existing conditions of such products; that, having ascertained that reasonable price, he may guarantee that the farmer shall receive a price not less than that; and that if importations from abroad threaten the guaranteed price, he may impose a duty upon those importations as provided in the act.

Mr. President, I am opposed to the Government going into the business now of guaranteeing a price. Look here: In a memorandum on the constitutionality of House bill 4630, submitted to the House Committee on Agriculture by the Solicitor for the Department of Agriculture, it is said, with regard to section 12, in which section this guarantee is provided for:

By reason of the fact that there is a subnormal supply of food in the world and an abnormal demand for military supplies, increased production is essential for the successful prosecution of the war. It is impossible to forecast weather conditions and crop yields—

We grant that.

In many directions farmers may be faced with increased costs of labor, of fertilizers, of farm machinery, and of capital. In respect to one or more staple crops the Nation may find it desirable directly to stimulate production by giving producers a guaranty of a reasonable price.

All of this in the face of facts which show almost conclusively that, not only for this year, even though the war should be brought to an end within this year, but for years to come—two, three, or many years to come—the farmer will be receiving for the products of the farm more than the ordinary price, more than the usual range of prices for the last several years up until after the beginning of the war. Yet, in the face of conditions like these, we propose to put the Government in the position of guaranteeing prices!

In my proposed amendment I have provided that the President might determine the reasonable price of nonperishable farm products at any given time, and that, having determined that reasonable price, if he finds then that importations from abroad—as wheat or meats from Argentina, for example, or cattle from Mexico—should, in coming in competition with that price, cut it down so that the farmer could not realize the reasonable price found by the President, then, and not till then, let him impose under the terms of the bill a duty on the foreign importations sufficient to protect the American producer and yield him the reasonable price as determined by the President. This will afford some work for a tariff commission, and they can study what our friends on the other side were afraid to put in the tariff commission bill—the question of the difference between the cost of production at home and abroad. That may then become one of the studies devolving upon the Tariff Commission created under this administration.

Mr. SHERMAN. Mr. President, before the Senator yields the floor, will he permit an inquiry?

Mr. STERLING. Yes; I yield to the Senator from Illinois.

Mr. SHERMAN. Does the Senator expect to discuss the difference between the price-control laws in regard to food in this country and in England?

Mr. STERLING. I will say to the Senator that I do not expect to discuss that question.

Mr. SHERMAN. I want to make this inquiry: The tendency in England is not to vest this power in the King. Practically, the King does nothing except to be the center around which a ministry is formed. He possesses practically no veto power and very little executive power save the formal power of organizing the ministry in the event of a change following a popular election. In England the governmental power, which is omnipotent in a worldly sense, remains in Parliament, to be exercised through a ministry in an executive way.

Mr. STERLING. Surely; yes.

Mr. SHERMAN. I understand that this administration is opposed even to a joint congressional committee which will form an avenue of communication so that an understanding may be had between the legislative branch of the Government and the Executive, even under these enlarged powers. It has been reported credibly, I think, that the Executive is opposed to such a means of communication. In England, the power exercised by the food commisioner in regard to these public questions concerning food supplies in a state of war remains in Parliament. It has abdicated none of its functions except to create an agency to exercise the power. It has not vested in King George the power to administer these affairs and to appoint the officers.

Mr. STERLING. I understand the Senator; and in this respect the practice in England, in her stress and in her great emergency, is altogether different from the policy proposed in certain portions of this bill.

Mr. President, I have said enough, I think, to give the Senate, or those who have heard me, my ideas in regard to the fundamental principle underlying certain provisions of this bill.

What constitutes the strength of the Republic? Mr. Whitelaw Reid several years ago answered that question in the way I am about to read.

I think it worth while to call attention to it, because in our excitement, in our zeal, in our fervor in regard to this war and the great and efficient part we shall take in it, we are apt to lose sight of some of the old landmarks under which we have grown as we have grown and become the powerful, efficient nation we are.

Mr. Reid says:

> Wherein lies its great strength? * * * The answer has become a truism. Its strength lies in the equality of man it develops. The real merit is not in the machinery, but in the skilled intelligence absolutely required to frame and to work it, in the combination of respect for authority on the one hand, with training in individual initiative on the other, which this work brings out and which the Government has thus far scrupulously and religiously guarded.

And the fear is that by some of the terms of this bill you destroy that which this Government in its legislation and in its administration has hitherto religiously and carefully guarded.

He says:

> We brought the respect for authority from the birthplace of the common law; and in proportion as harshness from its officers was resented in the old home, in like proportion the law itself was instinctively elevated into a veritable pillar of cloud by day and of fire by night in the wilderness of the new world. We found the individual initiative in the necessities of an untamed continent; were driven to it, shut up to it at every turn—in the imperative beginning of orderly self-government at a thousand isolated spots; in the long-protracted struggle with wild lands, wild beasts, and wild men—till it became the inheritance of the race, till under its stimulus men found their solitary way through trackless woods to make lonely clearings or start frontier settlements across the Alleghenies, through trackless prairies to possess the Mississippi Valley, through alkali deserts to wrest their gold from the mountains, and at last through the Sierras to scatter up and down the enchanted shore of the Pacific. To such a continental conquest of nature and of men have those two traits of the fathers brought us; their respect for authority and their widest freedom of individual initiative. These with the original vigor of the stock have made Americans what they are, and by consequence have made this blessed country of ours the joy and pride and hope of our lives. To harm either is criminal—whether to break down respect for authority by unlawful combinations, tricky evasions, and open defiance of order, or to cramp the widest freedom of the individual in any lawful enterprise or labor anywhere. Whoever or whatever now dares to interfere with the permanent union of these two traits and their continued development in the American life is an enemy to the Republic, whether known as political boss, or as trust, or as trades-union.

And never before in our history, Senators, has there been a finer exhibition of the union of these two great traits—individual initiative and respect for authority—than here in this war. Through individual initiative has come and is coming that voluntary activity and cooperation of all industries and interests in the prosecution of the war of which we may be justly proud. Let us not, by legislation which gives governmental control of all the activities, processes, and methods of our daily lives, so far as they are engaged in production, destroy the principle which left alone will meet the very emergencies you seek to cover by the objectionable features I have sought to point out.

Mr. LEWIS. Mr. President, will the Senator state from what he read? Was it from the address of Whitelaw Reid?

Mr. STERLING. Yes; the address of Whitelaw Reid on "The strength of the Republic." It is found in volume 2 of the work entitled "The Making of America."

In conclusion, Mr. President, let me say that we are capable of stopping, and we should stop, all unnecessary and unreasonable hoarding of food products in this time of emergency. We should arm the Executive with power to prevent all evil practices among dealers or distributors of such products, whether on boards of trade or buyers or dealers outside of boards of trade, and whether they be dealers at wholesale or at retail. Whatever method or practice may, in this time of war, by its limitation of supplies or its unwarranted increase of prices of necessaries, injure the public, disturb the public tranquillity, and thus prejudice the national security and defense, these we shall do all in our power to prevent. The people expect nothing less at our hands, but as to the rest I am confident it is their will to remain a free people.

Mr. NELSON. Mr. President, it is not my purpose at this time to make any extended remarks on this legislation; but after sitting here and listening to the speech of the Senator from South Dakota [Mr. STERLING] and his criticisms of certain portions of the bill, I can not help taking up a few moments of the time of the Senate in replying to a part of his argument.

What is the purpose of this legislation? It has a twofold purpose, Mr. President. One purpose is to provide an ample supply of food and fuel for our own people and for our allies. The next is—and that is perhaps the most difficult and most important problem—to prevent undue extortion among our own people.

The Senator from Illinois [Mr. SHERMAN] a moment ago called attention to the combinations that existed in this city. I can tell him the easiest way to regulate those combinations and reach them, as we found it in Minnesota by a legislative experience.

We had in our State large terminal elevators at St. Paul and Duluth. They were connected with a system of country elevators, between 2,000 and 3,000 of them. They were a law unto themselves, and were guilty of unfair dealing both in the matter of grading, weighing, and prices with the farmers of the country. Now, how did we cure that evil in Minnesota?

I have always been proud of the fact, if the Senators will permit me to say so, that I drew the bill that reached the evil. I will read the first section of it, and you can see how simple it is, and it is pertinent in connection with the criticisms of the license section of this bill:

> An act to regulate the receipt, storage, and shipment of grain at elevators and warehouses on the right of way of railroads, depot grounds, and other lands used in connection with such line of railway in the State of Minnesota—

And so forth.

> All elevators and warehouses in which grain is received, stored, shipped, or handled, and which are situated on the right of way of any railroad, depot grounds, or any lands acquired or reserved by any railroad company in this State, to be used in connection with its line of railway at any station or siding in this State, other than at terminal points, are hereby declared to be public elevators, and shall be under the supervision and subject to the inspection of the Railroad and Warehouse Commission of the State of Minnesota, and shall for the purposes of this act be known and designated as public country elevators or country warehouses. It shall be unlawful to receive, ship, store, or handle any grain in any such elevator or warehouse unless the owner or owners thereof shall have procured a license therefor from the State railroad and warehouse commission, which license shall be issued for the fee of $1 per year.

We made the fee nominal. Our object in enacting that law was to put them on the State hook and make them subject to State regulation. In other words, we required all of those country elevators—and there were between 2,000 and 3,000 of them—to take out a State license at the rate of only $1 a year to make them subject to State regulation and State control.

The Cargill Elevator Co., a corporation of Wisconsin, doing business in southern Minnesota, among other points at a place called Lanesboro—I referred to it the other day—disputed the right of the State to require a license. They said: "It is true that we have an elevator on the right of way of this company, but we are buying grain simply for our own use, and the grain we buy we store in our own elevator. It is our own, and hence we are not amenable to this law and ought not to pay a license fee." The lower court found in their favor. The supreme court of the State found against them. They then took the case to the Supreme Court of the United States, and here is what the Supreme Court of the United States said in that case, its title being Cargill Co. *v.* Minnesota (180 U. S., 452). I read this from the syllabus, and I will read a little from the opinion:

> That the mere requirement of a license to engage in the business specified in the statute was to be referred to the general power of the State to adopt such regulations as were appropriate to protect the people in the enjoyment of their relative rights and privileges, and to guard them against fraud and imposition, and is not forbidden by the fourteenth amendment.

After referring to the statute, the court said in its opinion:

> Thus considering the statute, we are of opinion that the mere requirement of a license from a person, firm, or corporation engaged in such business as that conducted by the defendant is not forbidden by the fourteenth amendment of the Constitution of the United States. "The liberty mentioned in that amendment," we have said, "means not only the right of the citizen to be free from the mere physical restraint of his person, as by incarceration, but the term is deemed to embrace the right of the citizen to be free in the enjoyment of all his faculties; to be free to use them in all lawful ways; to live and work where he will; to earn his livelihood by any lawful calling; to pursue any livelihood or avocation, and for that purpose to enter into all contracts which may be proper, necessary, and essential to his carrying out to a successful conclusion the purposes above mentioned."

The court adds this quotation from the decision in the case of Allgeyer against Louisiana:

But to require the defendant company to obtain a license is not forbidden by the amendment. The authority to make such a requirement is to be referred to the general power of the State to adopt such regulations as are appropriate to protect the people in the enjoyment of their relative rights and privileges, and to guard them against fraud and imposition.

Mr. BRANDEGEE. Mr. President, if the Senator will permit me, I wish to ask him how the opinion laid down in that case would correct the grievance complained of by the Senator from Illinois?

Mr. NELSON. I will come to that. If we require these institutions, if we require these commission men, if we require these men at the market here who are guilty of these practices to take out a license, and not to do business without a license, and, in addition to that, prescribe that unless they comply with certain regulations they shall not be entitled to do business, that will be more effective than any prosecution under the antitrust law. For years in our State this question of regulating and controlling grain houses and elevators in the State was a burning question. It entered into every political campaign. The farmers were in arms about it. But after we had succeeded in passing this law and requiring a dollar license from each country elevator, and putting them on the State hook and under State control, we got full jurisdiction; we regulated the industry to the satisfaction of the farmer.

So here, Mr. President, this license section does not apply to farmers; it does not apply even to retail dealers; but it applies to all middlemen, the very men we are trying to reach. One of the most important things, as I said at the outset, is not only to furnish food for our own people and for our allies, but one of the great objects of this bill, and the one that I am more vitally interested in than anything else, is to prevent extortion from being practiced by the middlemen on our own people.

It is very easy to make the argument, and we have heard much of it during this session of Congress—wherever we have attempted any remedial legislation under the war power, the Constitution has always been hurled in our faces. What would a poor woman on the streets of Chicago, starving and crying for bread, say to the Senator from Illinois when he said to her, "Here is the Constitution of the United States, my dear madam; I want you to be satisfied with that. We have kept within the pale of the Constitution, and that is worth more to you than a loaf of bread."

Mr. SHERMAN. That happens a great many times; it may happen in Minneapolis; and, according to the Senator's philosophy, she had to raise a mob and go out in some adjoining county and find a farmer and loot his pantry. That is the Senator's philosophy, as I understand it.

Mr. NELSON. This is not a loot bill.

Mr. SHERMAN. It is the next thing to it.

Mr. NELSON. I am sorry that——

Mr. SHERMAN. I am, too.

Mr. NELSON. I am sorry that the vision of the Senator from Illinois is so distorted, but I can not help it, I am sure. It was a rule of common-law pleading—and the Senator is familiar with it—that when a lawyer pleaded in abatement it was not sufficient to show that the defendant ought to be out of court; he ought to be able to put in not only that his plea was good, but he ought to point out where the defendant could secure a better remedy, and prescribe a remedy. As Mr. Chity describes it, as I recall it, in his work on pleading, if a man pleaded in abatement he must give the defendant a better writ.

Mr. SHERMAN. I will give the Senator a better writ.

Mr. NELSON. I will yield in a minute. The Senators who are contesting the constitutionality of this legislation are here complaining of the extortionate pirates, and they are here shouting and saying we ought to relieve the American people, yet when we attempt to do it they fail to prescribe a remedy. They are merely in the position of objectors. I am not referring to the Senator from Illinois. I see that he looks at me very wistfully. My whole argument is impersonal. Now, I yield to the Senator.

Mr. SHERMAN. My inquiries are impersonal, except they must be handled through flesh and blood in some way; I can not communicate with the powers above directly. According to the argument of the Senators who adopt certain lines here—and I must be impersonal, Mr. President—the argument is, if there be a hungry woman on the streets of Chicago that would justify an uprising against the laws of the land, the creation of a mob, and the destruction of somebody else's right who had nothing to do with starvation in Chicago. That is the attitude of Senators here. Still speaking in an impersonal way, they justify mob law because there is a shortage of food in the city where many people persist in congregating. I am not responsible for Chicago, neither are any of the Senators here. It grew without our permission; it is there just as other large cities, just as New York City; but will the Senators justify lawlessness because people are hungry in the cities? Would any Senator say so?

Mr. NELSON. The question of lawlessness is not involved. I have not advocated lawlessness. I am afraid the Senator from Illinois looks at this question through the glasses of Mrs. Goldman. She advocates lawlessness. I have not advocated it. Nothing I have said here on the floor would indicate that. I simply chided in a most gentle and Christian spirit those who are all the time flinging the Constitution in our faces when we attempt to enact remedial legislation under the war powers of the Government. How the genial Senator from Illinois could construe that into an advocacy of mob law it is difficult for me to comprehend.

Mr. SHERMAN. Mr President, I must still be impersonal, but some Senators every time they are confronted with something that requires some authority by Congress reply that that is an objection raised by those who always fling the Constitution into our faces. They are similar to the lawyers who lecture on the Constitution, in which lectures they prescribe a correction of obstacles and not a charter of human rights. The Senators who take that view, still making myself impersonal, answer constitutional objections by saying that we fling the Constitution into their faces, and then they ask about somebody in Chicago who is starving, and consequently would be a fit foundation for a mob.

Mr. NELSON. If the Senator calls that a question, I would find myself in the condition of floundering. If it was a sort of text for a brief sermon, I might take a different view of it. But, laying all strange and peculiar doctrines aside, it seems to me we are confronted with this question, and it is our duty as legislators to provide a remedy. I think we are all agreed that in one direction at least we need a remedy to protect the American people against extortion.

Last November when I left my home at Alexandria our farmers were getting 90 cents a bushel for their potatoes in the potato warehouse at the station. I was coming to Washington, and on my way down through Minneapolis, a distance of 132 miles from my town, I found the retailers were charging $2.25 a bushel for those potatoes, and the cost of transporting them from my home to Minneapolis did not exceed 6 or 7 cents a bushel. It is something of that kind that we want to reach.

If the Senator from South Dakota and the Senator from Illinois can prescribe a more effective and drastic remedy to reach that evil, I shall certainly be glad to cooperate with them; but I have found nothing either in the very able remarks of the Senator from Illinois the other day or in anything the Senator from South Dakota said this afternoon that will give me any clew or any indication where we could reach and cure this evil in a more effective way.

Mr. STERLING and Mr. SHERMAN addressed the Chair.

Mr. NELSON. I yield the floor. I just took it for a few minutes to reply to one feature of the argument of the Senator from South Dakota [Mr. STERLING]. I shall at a subsequent time, it may be, say something further on this bill.

Mr. STERLING. I wish to say to the Senator from Minnesota that he must have misunderstood or misconstrued my argument. I am in favor, and so expressed myself, of all the drastic provisions of the bill to prevent hoarding, to prevent speculating, and so forth, in necessaries, as prescribed in the bill.

Mr. NELSON. But you are not in favor of the machinery of enforcing it. There is the difficulty with you.

Mr. STERLING. Will the Senator point to any remark that I made in which I took that position?

Mr. NELSON. To-morrow when the Senator's speech appears in the RECORD I shall be glad to do so.

Mr. STERLING. I would be glad to have the Senator do it.

Mr. SHERMAN. Mr. President, what I wished to inquire of the Senator was if he is in favor of the instrumentalities already made for preventing these combinations and the abuses? I know he would answer that affirmatively. The statement which led to the discussion so far as it affected the inquiry I made of the Senator from South Dakota was as to the combinations that evidently exist among retail dealers to prevent a farmer or market gardener from selling directly to the consumer. The Senator has very entertainingly and instructively explained how the license system operated in Minnesota and will reach that evil. I will cordially join with the Senator in a license system. If prosecutions under the Sherman Antitrust Act will reach it, I would call on the Attorney General or any prosecuting agency to enforce the penalties provided in that act. But I am not attacking the license system; I have not done so at any time. I called attention to the fact that officers under

existing agencies of Government do not use the machinery that is put in their hands. That is notorious all over the United States, all the way from Chicago to Washington. I anticipate that the Senator will explain the license system more at length some time in the future and apply it. If the Senator can show that the license system will break up such combinations as the kind I have described and permit the consumer to buy directly from the farmer without being boycotted in the Center Market here in Washington, he will find no quicker supporter of the license system than I.

Mr. NELSON. The license system will undoubtedly effect that. We had an antitrust law in our State statutes and we had a Federal antitrust law, but we found that practically, for one reason or another, they were dead letters. But after we enacted this law and required a license and put them under the control of the railroad and warehouse commission our farmers got the relief they had been laboring for for many years.

Mr. STERLING. Mr. President, I think perhaps I ought to say a word further in the way of modifying what I just said in answer to the Senator from Minnesota with reference to the machinery provided by the bill. If the license system is a part of the machinery, and I suppose it may be so termed under this bill, I admit I did criticize it and object to it, and I stand on what I said in regard to it. Beyond that I did not criticize anything except some of the powers given the President under the bill.

Mr. CURTIS. I move that the Senate adjourn.

Mr. NELSON. Before the motion is put I desire to give notice that to-morrow evening at the close of the legislative business I shall ask for an executive session to take up the nomination of Mr. Woolsey to be Solicitor of the State Department.

The VICE PRESIDENT. The Senator from Kansas moves that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 27, 1917, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

TUESDAY, *June 26, 1917.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Lead us, O God, our Heavenly Father, as a people in Thine own way through the great contest which has been thrust upon us by a stern and relentless foe. We love peace and hate war; but we love the sacred rights which Thou hast woven into our being better than we love peace at their expense; illustrated by our fathers at Bunker Hill, Valley Forge, and Yorktown. Make us wise and painstaking in preparation, strong in brain and brawn, courageous in valor, unbounded in our faith and confidence in Thee as the Upholder and Sustainer of right against might; and we will praise Thy holy name in an everlasting peace. Amen.

The Journal of the proceedings of yesterday was read and approved.

SPECIAL BELGIAN MISSION.

The SPEAKER. Under the order of the House the Chair communicated with the Belgian commissioners, and they have set 1 o'clock to-morrow as their time to be here. The Chair will ask that the letter of Baron Moncheur, the chief of the special Belgian mission, be inserted in the RECORD.

The letter is as follows:

2118 MASSACHUSETTS AVENUE.

The honorable CHAMP CLARK,
Speaker House of Representatives.

DEAR SIR: I thank you for your very kind invitation, and it will give me and the other members of the Belgian mission much pleasure to come to the House on Wednesday, June 27, at 1 o'clock.

Most respectfully,

BN. MONCHEUR,
Chief of the Special Belgian Mission.

LEAVE OF ABSENCE.

Mr. HOOD. Mr. Speaker, I ask unanimous consent for the indefinite leave of absence of my colleague, Mr. DOUGHTON, who has been called home on account of sickness in his family.

The SPEAKER. The gentleman from North Carolina asks unanimous consent for indefinite leave of absence for his colleague, Mr. DOUGHTON. Is there objection?

There was no objection.

RIVER AND HARBOR BILL.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HARRISON of Mississippi in the chair.

The Clerk, continuing the reading of the bill, read as follows:

Ship channel connecting waters of the Great Lakes between Chicago, Duluth, and Buffalo, including St. Marys River, St. Clair River, channels in Lake St. Clair, and Detroit River, Mich.: For maintenance, $185,000.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. I wish to ask a question for information. I wish to have the learned gentleman on river and harbor affairs inform the committee where this special channel is that connects the Great Lakes between Chicago, Duluth, and Buffalo.

Mr. SMALL. This is a general designation of a channel which comprises St. Marys River, Lake Huron, St. Clair River, Lake St. Clair, and Detroit River.

Mr. STAFFORD. Where is the channel connecting the waters of the Great Lakes between Chicago, Duluth, and Buffalo? I do not know of any such channel.

Mr. SMALL. These are simply terminal points which can be reached by reason of these waterways. It is an old designation, and they comprise the connections of the St. Marys River, St. Clair River, Lake St. Clair, and Detroit River.

Mr. STAFFORD. Has the item been included in prior river and harbor bills in this phraseology?

Mr. SMALL. It has, in the river and harbor bill of 1915 and 1916, and prior bills.

Mr. STAFFORD. I withdraw the pro forma amendment.

Mr. EMERSON. Mr. Chairman, I desire to proceed out of order for a few moments.

Mr. Chairman and members of the committee, I believe in the freedom of speech; it is the foundation of a republican form of Government.

But I do feel in this great crisis that now confronts this Nation that it is the imperative duty of each citizen not to abuse this privilege by saying things that may be construed by less-thinking people as disloyal.

Many people in this country who know better are making speeches which are not only treasonable but encourage less-thinking people to be disloyal and unpatriotic.

Practically 10,000,000 loyal young men in this country have come forward and registered, showing their willingness to serve their country and obey its laws.

But there are many slackers who are dodging their plain duty. Many men who are enjoying the blessings of liberty in this country, enjoying all its privileges and opportunities, who absolutely refuse to serve their country when their country calls.

The Government should deal with these slackers with a strong arm and a mailed fist.

Every citizen who enjoys the privileges of our free institutions owes an obligation to protect the Government in the hour of national danger.

These people who make speeches urging men not to register, not to obey the laws of this country, not to perform their plain duty, are traitors to their country and should be severely punished.

Every time they get a chance they talk against the Government—urge disloyalty.

If this country gains nothing else by entering this war, I hope the strong arm of the Government will be used to at least "Americanize" America.

If we can Americanize this country we have accomplished all we need to in one war.

Weed out these traitors to our country, expose them, punish them, and teach them respect for American institutions and American laws.

I congratulate the Attorney General of the United States and his many able assistants all over this country who have assisted him in this great work.

Now is the time for all Americans to work together for the common good of the entire Nation.

Each citizen must yield a little for the good of all.

Teach these trouble makers that liberty is not license.

This is the most important thing for this country to do at this time.

First let us thoroughly Americanize this country, and after we have done that we have nothing else to fear.

I am for America first, last, and all the time. [Applause.]

The Clerk read as follows:

Manistique Harbor, Mich., Menominee, Oconto, Green Bay, Algoma, Kewaunee, Two Rivers, Manitowoc, Sheboygan, Port Washington, Milwaukee, Racine, Kenosha, and Waukegan Harbors, Sturgeon Bay and Lake Michigan Ship Canal, and Fox River, Wis.: For maintenance, $52,100. The project for the improvement of Green Bay Harbor, Wis., is hereby modified to include the maintenance of the turning basin at Depere in accordance with the report submitted in House Document No. 1017, Sixty-fourth Congress, first session.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. I would like to inquire, in view of the action of the committee yesterday in voting an appropriation, for instance, for the Lorain inner harbor, providing for maintenance, and the acknowledged fact that throughout the bill there are provisions for maintenance of inner harbors on the Great Lakes and on rivers tributary to the Atlantic and Pacific Oceans and Gulf Stream, whether the gentleman would have any objection to an amendment providing for making the appropriation of $52,100 available for maintenance of the Milwaukee, Menomonee, and Kinnikinnic Rivers, at Milwaukee, Wis.?

Mr. SMALL. Will the gentleman ask leave to return to that later?—and we will consider it.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that this item be passed over.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to pass over this item. Is there objection?

There was no objection.

The Clerk read as follows:

Mississippi River from the mouth of the Ohio River to and including the mouth of the Missouri River: Continuing improvement and for maintenance, $350,000.

Mr. FREAR. Mr. Chairman, I do not intend to take any particular time of the committee to-day; in fact, I have taken little time since the bill was first brought before us. I endeavored in a brief way to state some objections to the bill in the RECORD of January 23, in response to an invitation to do so from the committee chairman, and that will answer, I take it, because there is no desirability in presenting motions to strike out, because those motions will all be voted down.

I wish to call attention to this great river, the largest river in the world, which, if any river, ought to have a large commerce, but which is practically a deserted stream. For continuing improvement, $350,000 appears in the bill, in addition to maintenance on that 200-mile section of the Mississippi River. It was stated by Senator Burton when a Member of Congress—and I assume that he knew whereof he spoke, because he was considered an authority in this House and at the other end of the Capitol—that more money had been expended—$18,000,000—on that short 200 miles than on the entire river Rhine, and the Rhine River floats nearly 40,000,000 tons of commerce every year, while on this part of the river near St. Louis the commerce has practically disappeared.

We have an 8-foot channel from St. Louis to the mouth of the river, and yet we have practically no commerce. It is not a question of having a channel, it is a fact that the people will not use it; they will not put boats on the channel, because they have not done so. Whether or not the action of railways is responsible or not should be for some commission or some able body of men to investigate and to determine; and if so, to control railroad rates. As it stands to-day, we are simply pouring money year after year, millions upon millions, into the Mississippi River and receiving no return. That is the largest and apparently the best project we have in this entire bill—that is, for inland waterways. As far as harbors are concerned, there has been no disposition heretofore to criticize generally. I repeat the suggestion made by Col. Townsend, the head of the Mississippi River Commission, who said that outside of one project on the Mississippi River and one on the Ohio, which, he says, should be continued—outside of these two projects, he said, all other projects in the Mississippi Valley, some fifty-odd, should remain—to use his term—in statu quo, or keep their present status.

That is the opinion of a capable Army engineer. All of the statistics that we have, when they are sifted down and we take out the humbug that exists in many of them and ascertain what is the actual freight, serve to carry out his judgment. As to the upper Mississippi, I recommended heretofore that that be cut down, but I know it is useless to make these offers here or elsewhere. I am simply going to state this much for the RECORD, that on the largest river in the country, where we have expended nearly $150,000,000, the commerce has decreased practically 95 per cent, and we are in a hopeless position to-day, so far as creating freight is concerned, unless we take hold of the railroad situation, which we are not attempting to do, by simply deepening the channel.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes.

Mr. KINCHELOE. Does the gentleman not think that the main cause for the decrease in the tonnage on these rivers is the fact that the railroads get hold of them through subsidiary corporations with their packet lines and absolutely crush out competition?

Mr. FREAR. That would be so if there was any real transportation, I assume, but there is practically no commerce upon the Mississippi River. On the other hand, practically all of the domestic commerce along our Atlantic seaboard is controlled to-day by boats that are owned by railways or that are controlled by the railway companies, so far as that is possible under existing law. Practically all of what is called our domestic coast commerce to-day is in the hands of lines controlled by railway companies, according to the Commissioner of Commerce; but inland waterways, which have only occasional boats here and there, I think, are practically free from railway control, and will be until they become real competitors, and when that point is reached there will be some actual effort upon the part of the railroads or the people who control the railroads to take them over. Of course I know the statutes which exist to-day which prevent that sort of thing as a matter of law.

Mr. KINCHELOE. Mr. Chairman, I desire to ask another question for information. What would be the gentleman's remedy in this sort of a case? I have a river in my district—the Green River—which is navigable 365 days out of the year. That river runs through a territory where there are practically no railroads. A subsidiary corporation of the Louisville & Nashville Railroad runs all of the packet lines there, and you start any competition with them and they will carry the freight for nothing and put you out of business. What would be the gentleman's idea of a solution of that problem?

Mr. FREAR. I have a solution for that problem. I have proposed a waterway commission that will take hold not only of the waterways but of the railroads, in connection with the Interstate Commerce Commission, so as to prevent efforts to drive legitimate traffic from the rivers.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FREAR. The proposal in that amendment for an expert commission is that minimum rates be fixed on the railroads, so that they can not take advantage and drive legitimate commerce from the rivers. I believe that these waterways could be improved, and they ought to be improved, just like they have been in Germany. In Germany to-day about 40,000,000 tons are carried on the Rhine River annually, whereas they have not put as much money into that river as we have into 200 miles of the Mississippi, and why? Because Germany owns and controls the railroads. That is the secret, and that is the reason they can place commerce upon their waterways.

Mr. KINCHELOE. Then does not the gentleman think that his solution of this problem would be more effective than opposing appropriations for rivers and harbors of the country?

Mr. FREAR. No; because this present method is an absolute waste of money. We have put millions of dollars in rivers, but we are getting no results.

Mr. KINCHELOE. We are getting a channel; we are getting the avenue through which they can go.

Mr. FREAR. But the commerce is decreasing, and you are not reaching the seat of the trouble. It is the competition on the railroads, and channels on rivers do not need further deepening until we can get some commerce.

Mr. BORLAND. Mr. Chairman, if the gentleman will yield, I think the gentleman and I agree on that. We must have regulation of the waterways in connection with the railroads, but the difficulty is to secure articulation between the two.

Mr. FREAR. With this commission which I propose, which may stand no chance of being considered here, we would then be able to secure some comprehensive system by means of which we could take in not only the railroads, but the waterways as well, and endeavor to coordinate them and compel the railroads to carry the commerce that legitimately belongs to the railroads and the waterways to carry their proper commerce.

Mr. BORLAND. The gentleman recognizes that a single boat operated independently would stand very little show of getting business?

Mr. FREAR. Yes.

Mr. BORLAND. He also recognizes that a short haul can very seldom live in competition with a long haul?

Mr. FREAR. Yes.

Mr. BORLAND. We must have articulation with the rest of the transportation system of the country.

Mr. FREAR. Yes; but we are not getting at it under this system of legislation and will not get it until we change the system.

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. SMALL. Mr. Chairman, I think I ought to say this: The item under consideration is for the improvement and maintenance of that part of the Mississippi River from the mouth of the Ohio to and including the mouth of the Missouri River, carrying an appropriation of $350,000. If I understand the attitude of the gentleman from Wisconsin [Mr. FREAR], he is in favor of striking out that item. It is unthinkable that we should neglect the continued improvement and maintenance of that part of this great river between the Ohio and the Missouri, and we ought not to do so.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. FREAR. Does the gentleman mean to say in view of my discussion all of the time heretofore that I am in favor of striking out that item, that he believes that? Does the gentleman mean to say honestly that he believes that after all that has been said here?

Mr. SMALL. I am in the habit of speaking honestly all of the time, so that I have no need for making any differentiation along that line. I do not understand what a gentleman means when he refers to a project as worthless, as having no commerce, as one that ought not to be in the bill, as one that is an imposition upon the Treasury of the United States, unless he is opposed to the item, and I do so believe.

Mr. Chairman, just this suggestion in regard to a thought expressed by the gentleman from Wisconsin [Mr. LENROOT] yesterday and also by the gentleman from Kansas [Mr. CAMPBELL]. We all realize that there is not sufficient commerce on the Mississippi River. In this section, for instance, for the last year there were 58,501 tons, at a valuation of over $14,000,000. Still we freely admit it ought to be more. And the gentleman from Wisconsin [Mr. LENROOT] suggested yesterday that the attitude of the railroads in the past in charging low competitive rates with water, so low in some instances as to prevent competition, was a condition which should not continue to exist. I agree with the gentleman. I agree that the only hypothesis upon which appropriations for improvements of interior waterways can be justified is the existence of water-borne commerce and that Congress is beyond its right when it makes appropriations for the improvement of rivers for the purpose of reducing competitive rates by rail. That is an important suggestion made by the gentleman from Wisconsin [Mr. LENROOT], and I hope to join with him and other Members at the next session of Congress to devise proper legislation to meet that suggestion. It will be constructive, it will be in the interest of the promotion of water-borne commerce, it will tend to justify further appropriations for the improvement and maintenance of the great interior rivers, and I believe we may reach some remedy to be proposed, and I agree with them entirely on that proposition. I wished to say so yesterday afternoon but opportunity did not present itself, and I desire to take advantage of this opportunity to express cordial assent to the suggestion that was made along that line.

The Clerk read as follows:

Mississippi River from the mouth of the Missouri River to Minneapolis, Minn.: Continuing improvement and for maintenance, $1,200,000.

Mr. ESCH. Mr. Chairman, I move to strike out the last word. I rise to make an inquiry of the chairman of the committee. In 1910 the river and harbor act contained an item of $500,000 for the construction of experimental tows and barges. As a result of that appropriation the Chief of Engineers appointed a commission which went to Europe and made a full investigation of tows and barges, loading and unloading devices, upon the navigable streams of Europe. The report of that board was made in 1914. Since that time little or nothing has been done. In 1916, in the rivers and harbors act, I secured the incorporation of an amendment directing the Secretary of War and Chief of Engineers, or such board as the Secretary might appoint, to make experiments with tows and barges on the upper Mississippi River and giving them a period of two years from the approval of that act within which to make such experiments. The experiments were to be made on certain portions of the upper river. I want to know what has been done under that authority granted in 1916 to the Chief of Engineers, and whether or not these experimental tows and barges, plans and specifications for which were enumerated in their report of 1914, have as yet been constructed, and whether they are now in operation.

Mr. SMALL. In answer to the gentleman I will say that the statement he makes as to legislation in the past is entirely correct. The only report which is available to the committee is shown in the last Annual Report of the Chief of Engineers, pages 1739, 1740, and 1741, and it appears from that, while they have made experiments and investigations, that no final report has been made, and if a final report has been submitted since this annual report it has not come to the attention of the committee, and, according to my best recollection, there has been no final report.

Mr. ESCH. I have seen it stated in the press that the Government is going to place upon the upper river some 12 or 14 steel barges and that the War Department has secured a couple of towboats from the Mississippi River Commission and that they were installing on those towboats the equipment recommended by the Chief of Engineers.

Mr. SMALL. That is correct. The Secretary of War, primarily at the instance of the National Council of Defense and the committee on waterway transportation of the National Council of Defense, has directed that such barges, towboats, and tugboats owned by the Government and connected with the improvement of the Mississippi River that could be spared could be leased under liberal terms and with proper security to indemnify the United States for commercial use upon that section of the Mississippi River, primarily for carrying coal up and bringing iron ore down.

Mr. ESCH. The gentleman is advised that the commission of the Chief of Engineer's office has made very long experiments at the University of Michigan to determine the proper lines for tows and barges. Are those barges being put in commission built on the plans and specifications as developed by these experiments at Ann Arbor?

Mr. SMALL. They are not. Those are barges which are used in the improvement and maintenance of the Mississippi River. They do not represent any improved type in accordance with this legal direction to the Secretary of War to make the experiments to which the gentleman refers.

Mr. ESCH. So then there has nothing as yet been concluded in regard to that matter?

Mr. SMALL. Nothing finally yet.

Mr. FREAR. Mr. Chairman, I move to strike out the last word. I asked the chairman of the committee a minute ago, when he was replying to my statement in regard to the Mississippi River, whether or not he really believed that I wished to strike out the item for the Mississippi River, and he said he did. Now, I leave it to this House, which has always treated me with manifest fairness in the past, to judge between the two of us as to who has been fair throughout this discussion now and at other times. I have not to my knowledge moved to strike out this item at any time in the past, and gentlemen with any understanding of the situation must know it. I have always been for the maintenance of any commerce-carrying waterway, and he knows it, and yet he makes that statement here on the floor of this House, as he always does, misrepresenting the position of those opposed to the bill. We are not opposed to reasonable waterway expenditures, and that includes general maintenance of this Mississippi River channel—not carrying on extravagant improvement projects but for maintenance. I have just explained—and the gentleman knows it—in accordance with the opinion of Col. Townsend, that that is reasonable and right to pursue, and yet the chairman says, and he will repeat it upon this floor, that those who are opposing this bill want to strike out all waterway improvements. The trouble with the gentleman is this: He is vice president of the Inland Waterway Association, accustomed to such meetings where they believe in all these expenditures. One hundred million dollars has been proposed annually by some of these associations, and it has been proposed that all kinds of improvements should be put through.

I submit in all fairness I have never made such a statement as he has repeatedly made, that I am opposed to all these improvements. It goes back to my constituents. The gentleman asserted when we were on the $1,200,000 item for the upper Mississippi River last year that I was opposed to all appropriations for the upper Mississippi River. He is not fair in that statement. On this one project, the 200 miles of the Mississippi that we have just passed, in which $350,000 is contained in the bill, how much is left? Two hundred and eighty-five thousand dollars balance is on hand now. The minority of the committee says we do not need any more. How much balance for the upper stretch? Six hundred thousand dollars. And yet this bill contains an item for $1,200,000 more for the upper river, and still there is no particular commerce on the upper river. These tables of commerce do not indicate actual conditions, as I have disclosed by analysis of items. I went down the river last year at a busy time of

the year—in the month of September—and we passed only one boat in 300 miles during the daytime, when we were on deck, that carried any noticeable commerce, and that boat carried only a small amount of freight. What was it? A flat boat of sand towed below Davenport. There is practically no commerce to speak of on the upper river apart from that produced by these so-called waterway improvements. The statistics are put here, it is true, but I have explained how those statistics were gathered and what they disclose.

I do not care to indulge in personal recrimination. There is no object in misrepresenting the opposition to this bill. We are opposed to it because this balance of $32,000,000 will meet all the exigencies of the situation, because part of that appropriation can be used on any of these projects, the part that is left over from the old allotment. But if now any single project will be urged as a war measure on proper authority I do not think any Representative on either side of the aisle will oppose it. But to put through all these little different creeks, three or four hundred projects, grouping them as you have done, and then to say this is a commercial and war necessity is beyond the province of reason, and particularly so at this time of all times.

This bill carries a small appropriation, $27,000,000, compared with the tremendous appropriations we have been making, I admit; but why not stop waste at this time? Why not stop waste when we can see no return for the expenditures we have been making? [Applause.]

Mr. SMALL. Mr. Chairman, the gentleman from Wisconsin [Mr. FREAR] says he is not opposed to the appropriations for the further improvement and maintenance of the Mississippi River from the mouth of the Ohio River to Minneapolis. Then we shall be glad to enroll him as in their favor, and I therefore am glad to announce to the House and to the country that the gentleman from Wisconsin [Mr. FREAR] is in favor of these two appropriations as they appear in the bill.

Now, if that does not suit him, then he may be described as neutral. His mental attitude is not understandable, and is not based on any facts. I simply do not understand the attitude of the gentleman. But if he insists that he is in favor of them, I shall be very glad to take him at his word and announce him as a late convert to the improvement and maintenance of the Mississippi River.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. WALSH. Has the gentleman any objection to stating what those names mean that he called the gentleman from Wisconsin? [Laughter.] I will withdraw that question, but I do desire to ask the chairman of the committee if he hopes to finish the consideration of this bill to-day?

Mr. SMALL. We do. We are very anxious to do so.

The CHAIRMAN. The Clerk will read.

The Clerk reads as follows:

Mississippi River between St. Paul and Minneapolis, and between Brainerd and Grand Rapids, Mississippi and Leech Rivers, and reservoirs at headwaters of Mississippi River: For maintenance, $2,000; continuing improvement of Mississippi and Leech Rivers, $50,000; in all, $52,000.

Mr. FREAR. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin moves to strike out the last word.

Mr. FREAR. The gentleman from North Carolina persists in misrepresenting the gentleman from Wisconsin, and I shall insist on getting this statement correct even if we spend all day upon it. He says the gentleman from Wisconsin is in favor of the item as it appears in the bill, when he knows I am not, and I have given the reason why. Yet he turns the thing around. Is that fairness in discussion? Can it get anywhere?

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes.

Mr. ALEXANDER. Will the gentleman state to the committee just what he favors?

Mr. FREAR. Yes. I will state exactly what is in the minority report. But it will be misstated the minute I get through I am in favor of maintaining the channels on the Mississippi River just as they are to-day, and I have stated it time after time; and yet in two minutes the gentleman from North Carolina will get up and say the gentleman is opposed to all the items in this bill, and to all river and harbor projects.

Mr. SEARS. May I ask what the gentleman is discussing?

Mr. FREAR. The very point the chairman of the committee was discussing.

Mr. SEARS. I make the point of order that the gentleman is not discussing the paragraph.

Mr. FREAR. I am discussing this paragraph of the bill. The gentleman from North Carolina said I was in favor of this item as it stands, when he knows I am not. I have so stated before, because it provides for a continuing improvement, which is in addition to maintenance. That is the opinion of the minority as to the only expenditure that ought to be incurred at this time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Missouri River: For maintenance and continuing improvement with a view to securing a permanent 6-foot channel between Kansas City and the mouth of the river, $1,000,000; for snagging and maintenance between Kansas City and Sioux City, $35,000; for maintenance between Sioux City and Fort Benton, $50,000; in all, $1,085,000.

Mr. LITTLE. Mr. Chairman, I desire to offer an amendment, which the Clerk will please read.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Kansas.

The Clerk read as follows:

Amendment offered by Mr. LITTLE: Page 23, line 5, after the word "City," insert a comma and the words "Kansas, from the upper end of Quindaro Bend."

Mr. LITTLE. This, Mr. Chairman, will then read, "To securing a permanent 6-foot channel between Kansas City, Kans. (from the upper end of Quindaro Bend), and the mouth of the river."

As it appears, nobody can tell just where this channel begins. It says simply "Kansas City," but there are two Kansas Cities, one in Missouri and one in Kansas, with nothing between them but a State line. They both lie side by side on the same side of the Missouri River. This will fix definitely a place from which to work. It does not ask for any additional contribution to the river.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. LITTLE. In a minute. It does not ask any more money. It appropriates exactly the same amount, $1,000,000. It simply gives Kansas City, Kans., the same treatment as Kansas City, Mo., and as ours is the manufacturing town, the productive town, and most of the shipments must eventually come to and from us, I think it is no more than fair. I spoke of this the other day, and I have presented it to the committee, and the chairman of the committee [Mr. SMALL] has been good enough to say, I believe, that it will be satisfactory to the committee.

Mr. SMALL. Mr. Chairman, the committee has no objection to this amendment. It simply extends the Missouri River project so as to include Kansas City, Kans., as well as Kansas City, Mo.

Mr. STAFFORD. Will the gentleman yield?

Mr. LITTLE. Yes.

Mr. STAFFORD. How much greater distance will the channel be extended by this amendment?

Mr. LITTLE. A very slight distance.

Mr. SMALL. About 7 miles.

Mr. STAFFORD. What is the depth of the channel in that portion of the river?

Mr. SMALL. More than half the channel, I think, is of as great depth as 6 feet, which is the project depth.

Mr. BORLAND. The channel there is very good. It is the big sweep of the bend, and the channel is very good at that point; but it is necessary to include the whole of the bend in the project.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman's time may be extended three minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the time of the gentleman from Kansas [Mr. LITTLE] be extended three minutes. Is there objection?

There was no objection.

Mr. BORLAND. I can tell the gentleman about the geography of the place, if he wishes to know.

Mr. STAFFORD. I wished to inquire whether there are any wharves or commercial activities along the line of this channel which is purposed to be extended by this amendment?

Mr. LITTLE. I can say to the gentleman that Kansas City, Kans., has expended nearly $2,000,000 upon the Kaw River and the Missouri. The Kaw Valley Drainage Board have improved the Kaw River for 4 miles, down to the Missouri. For example, that part of the Missouri River from the Kansas River to the State line, 1,030 feet, was improved there to protect the bank last year, at a cost of $28,000. The Government gave $10,000 of it and we gave $18,000.

Mr. STAFFORD. What is the character of the shore line along the channel for which this improvement is desired?

Mr. LITTLE. Some of it is of a character that will not need improvement and some of it is of a character that will need improvement.

Mr. STAFFORD. Is it utilized for commercial purposes or is it merely farm land?

Mr. LITTLE. A portion of it belongs to Kansas City, Kans., itself.

Mr. STAFFORD. What portion of this 7 miles?

Mr. LITTLE. The part of it next to, or near to, the Kaw River.

Mr. STAFFORD. What proportion of the 7 miles is really in Kansas City, Kans.; half a mile?

Mr. LITTLE. More than that; but the chairman of the committee has overstated it in saying 7 miles. It would be nearer half of that than 7 miles. The chairman of the committee got it a little high. It would probably be about half of that. We have spent nearly $2,000,000 in river improvement.

Mr. STAFFORD. But above the half-mile limit it is merely agricultural land, is it not?

Mr. LITTLE. No; the city extends far out, almost to the point named. There is agricultural land in the immediate vicinity of the bend, but the city extends practically to this point that we have suggested, cutting across the bend there. The waterworks of both Kansas Cities are near there.

Mr. STAFFORD. This improvement will enable pleasure yachts to reach the upper end, I presume?

Mr. BOOHER. Pleasure yachts do not run much on the Missouri River. The gentleman from Wisconsin and his friends may travel that way, but we do not.

Mr. STAFFORD. No; I travel in canoes, not in pleasure yachts.

Mr. BOOHER. May I ask the gentleman from Kansas if there have been any estimates from the Board of Engineers as to the cost if amendment be adopted?

Mr. LITTLE. The Board of Engineers some time ago reported that there should be $80,000 spent there, and proposed that the Government spend $10,000 if we would spend $70,000.

Mr. BOOHER. The gentleman is wrong about that. It was not to be spent on that stretch of the Missouri River, but spent in cleaning out the obstructions to the Kaw.

Mr. LITTLE. This munificent Government kindly said to us that if Kansas City would spend $70,000 on the Kaw River the Government would spend $10,000. They also said to us in another report that these Army engineers presented that they would do the same on the Missouri River—that if we would spend $70,000 the Government would spend $10,000.

Mr. BOOHER. There was a proposition that if the Government would extend the work to the point where it is now proposed by the gentleman from Kansas [Mr. LITTLE], the parties interested at that time would pay one-half of the expense.

Mr. LITTLE. Possibly that might be arranged again. Kansas City, Mo., had an arrangement whereby the Government was to spend some money and Kansas City, Mo., to spend $105,000. That agreement was made, but last year the mayor of that city declined to do that. He said they did not care to do that. Now, we in Kansas City, Kans., have spent something like $2,000,000.

Mr. BOOHER. Your money was not spent for river work, was it?

Mr. LITTLE. Certainly it was; and last year we spent $18,000 on this Missouri River right down to the State line.

Mr. BOOHER. For what purpose?

Mr. LITTLE. To protect the river, so they could carry commerce up and down and have a permanent channel.

Mr. BOOHER. The $80,000 proposition, let us understand that. Is that on the Kaw River?

Mr. LITTLE. That was on the Missouri River that I mentioned.

Mr. BOOHER. Wait a moment. That appropriation is to clear out the Kaw River.

Mr. LITTLE. Oh, no.

Mr. BOOHER. That was to take out the railroad bridges that had fallen in the river and piling that had been put in there by the Government, and the engineers held that if the railroad companies and the citizens who had caused those obstructions would appropriate $70,000 the Government would use $10,000 in taking out the old piling that they had driven into the river.

Mr. LITTLE. The only way in which I can answer that is to repeat what I said before. The Government said they would spend $10,000 on the Kansas River if we would spend $70,000, and the Government also said they would spend $10,000 on the Missouri River if we would spend $70,000. There were two different propositions.

Mr. BOOHER. In what report do you find it?

Mr. LITTLE. I can not tell the gentleman unless I have time to look it up. I am not as familiar as the gentleman is, who has been on the committee and has been studying it for years.

Mr. BOOHER. I am not opposing the gentleman's proposition.

Mr. LITTLE. I know; the gentleman from Missouri assured me that it was all right.

Mr. BOOHER. Out of what fund does the gentleman propose to take this money? Thirty-five thousand dollars is appropriated for maintenance and snagging from Kansas City to Sioux City, Iowa.

Mr. LITTLE. I discussed the matter with the gentleman the other day, and he indicated to me that mine was a satisfactory solution. As to the amount it will cost, I can not tell, except to say there has been one estimate made under which they said if the city would spend $70,000 they could spend $10,000, which would indicate about $80,000. I am not asking for an additional appropriation; I am asking that the channel be fixed as it was originally intended to be, at the north or upper line of both cities. I am not saying to these people how much they will spend. I presume they will spend whatever is necessary.

Mr. BOOHER. Does it come out of the $1,000,000?

Mr. LITTLE. Exactly.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas.

The question was taken, and the amendment was agreed to.

Mr. WHEELER. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman from North Carolina a question relative to the $1,000,000 appropriated for the Missouri River. The information I have received about the Missouri River is—I do not know whether it is correct—that the channel may be dredged every day and you can not make a permanent channel in the Missouri River. It is the most treacherous river in the country.

Mr. BORLAND. If the gentleman will permit, I think I can explain that. The Missouri River is what is called an alluvial stream and has a bed of alluvium about 70 feet deep before bedrock is struck. The valley is 2 to 7 miles wide, so that the banks of the Missouri River are not permanent, and the speed of the current erodes the banks. That is what causes the narrowing of the stream when the river gets down near the low-water mark. It shoals down to 22 inches when there really is an abundance of water in the river. The contemplated improvement is to revet the banks and give an artificial resisting bank, so that the current will not erode the bank, and then go down where the current strikes the opposite bank and revet again, and so on down the river. That constitutes the engineer's policy in an alluvial stream. That has been done for about 40 per cent of the total distance.

Mr. WHEELER. The gentleman believes that when this improvement is made along the river banks the banks will be permanent and the channel will be permanent?

Mr. BORLAND. It will maintain a 6-foot channel within the improved area. It will also prevent erosion of the banks and carrying the trees into other streams, which forms snags and necessitates snagging operations. It will also prevent erosion of banks and the carrying of sand and silt down, which clogs up the Mississippi River. The Missouri River carries 50,000,000 cubic yards of silt into the Mississippi River, and when we prevent the banks' erosion we prevent that enormous amount going into the Mississippi River. This improvement is contemplated for 400 miles, the stretch between Kansas City and the mouth, and when completed it will give a clear 6-foot channel without erosion.

Mr. WHEELER. I thought the appropriation was simply for dredging purposes and that that would not help the case at all.

Mr. BORLAND. No; it would not. What they want is to revet and make it a permanent proposition. The dredging is an annual matter, and unless followed up by permament improvement is a sheer waste of money.

Mr. HUMPHREYS. Is it not a fact that there was about 40 miles of the Missouri River revetted a number of years ago, which demonstrated beyond any sort of peradventure that the channel could be and would be maintained by that process to a depth of something like 12 feet?

Mr. BORLAND. There was a 40-mile stretch revetted way back in 1882. That 40 miles was originally the worst portion of the river, and to-day it is absolutely firm; the banks are firm and it has a channel varying between 7 and 9 feet at a low stage of water. It has required almost no repairs. It is in the same condition as when improved, and this proposition is to carry that sort of improvement throughout the whole area.

Mr. MADDEN. I want to say for the information of my colleague who is looking for light, that the channel in the Missouri River is so winding that it sometimes meets itself coming back. You can not tell whether it is mile 1 to-day or mile 2 to-morrow. Frequently the current meets itself coming back.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word. I want to say that the question of the gentleman

from Illinois is one of the few questions in this House that has thrown a little light on this subject.

Mr. MEEKER. Will the gentleman allow me?

Mr. BORLAND. I want to make my statement.

Mr. MEEKER. In reply to the statement of the gentleman from Illinois [Mr. MADDEN] I wanted to say that the bed of the river is not higher than the rest of the country.

Mr. BORLAND. We spent in the last system of improvement on the Missouri River somewhere in the neighborhood of $7,000,000 on this lower stretch of the river, and then Congress was induced to abandon the improvement without completing it and allow it to go to waste. Unfortunately most of that money which is still being charged up to us as a part of the total amount was absolutely wasted. If we stopped the present improvement at the present time the amount spent on this will be largely wasted. The reason for that is, as the gentleman from Illinois [Mr. MADDEN] truly and facetiously pointed out, that the Missouri River erodes its banks and will finally cut out any improvements that you have put there unless you have the system extending from one place where the river impinges upon a rock bluff to another place where the river impinges upon a rock bluff. If you take two rock bluff points of contact and revet the banks between, you will have a permanent system of improvement, and if you stop anywhere short of those points in between, which some gentlemen here are now urging should be done and that we should go back to a snagging proposition, you will have the river eating up in the course of a few years all of this valuable improvement. That is the point I want to make clear.

Mr. MILLER of Minnesota. Is it possible to find these rock bluffs along the stream?

Mr. BORLAND. Yes.

Mr. MILLER of Minnesota. In sufficient numbers to anchor the Missouri?

Mr. BORLAND. Yes. If the gentleman will refer to the map, he will find a number of places where the river impinges upon a rock bluff. Take, for instance, Kansas City. Within the limits of Kansas City there has not been a dollar of public money expended, and never will be, because the commercial interests have finally riprapped the river on both sides, so that you can easily begin there, and you can also at St. Louis.

The unimproved river is being navigated at this time by these boats, and I want to say right here, for the information of every Member of this House, that to-day there is more freight being carried upon the Missouri River between Kansas City and St. Louis than in the palmiest years of its history. Eighteen hundred and sixty-six was the big year of Missouri River steamboating, and yet that year there was less freight carried than last year; and why? The big open-deck boats they used then were not so large. The largest boat they had then was the *Emily*, which carried a 500-ton deck load at the maximum. The boats averaged from 150 to 400 tons. The smallest boat we have in the present fleet on the Missouri River is 300 tons, and the capacity of the barges run up to 1,400 tons, and we carried more freight on the Missouri River last year than was carried in the palmiest days of its history.

Mr. WHEELER. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. WHEELER. The Government has appropriated fifteen or twenty million dollars for the Missouri River, and I understood the gentleman to say a while ago that that has been absolutely wasted?

Mr. BORLAND. No; I said that the river was improved under the Missouri River Commission to the extent of about $7,000,000, and the Government stopped, and practically all of that was wasted, and that ought not to be charged to the present improvement. Then we began in 1912, and we have now got dollar for dollar of the money that we have spent since 1912. If we continue our improvements, we will have within the limits of the estimated cost a channel of 6 feet.

Mr. SMITH of Michigan. About how much of the river is improved now?

Mr. BORLAND. About 40 per cent of the river is improved for the $6,000,000, approximately, which have been expended, but the 60 per cent of the unimproved portion would not all of it need improvement. In some of it the natural condition will be allowed to remain for a great many years.

Mr. SMITH of Michigan. About how long will it take to improve the river?

Mr. BORLAND. The project was to improve the river in 10 years, and that would be the economic and businesslike thing to do.

Mr. SMITH of Michigan. And that could be done?

Mr. BORLAND. Yes. If we only appropriate $1,000,000 a year, however, it will take close to 30 years, and that I think would be a mistake. In navigating this river in its unimproved condition these shoal places occur, and they reduce the tonnage of the boats, because you can only load your boats to the capacity which will permit them to go over the shoals. Therefore you are navigating at a heavy expense and under great difficulty, and the pilots have to learn those shoal places, as they change very rapidly.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BORLAND. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

Mr. BOOHER. Mr. Chairman, reserving the right to object, I suggest that the friends of the bill ought to cease talking.

Mr. BORLAND. I think the gentleman is right, and yet I think if the opponents of the measure talk the friends better get some of the facts before the House.

Mr. STAFFORD. This project has been discussed at length by the gentleman from Missouri [Mr. BORLAND] and he had a good audience here that paid attention, and it should not be repeated in this sultry weather.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BORLAND. Mr. Chairman, I do not intend to impose upon the patience of the House, and yet if this bill is worthy of discussion at all I am ready to give some facts. If we do not indulge in anything but personalities, we may as well vote now. I am ready to give some of the facts about the project that I know something about. The Kansas City-Missouri River Boat Line Co. runs a through line of boats, and it has to maintain, of course, at high expense pilots. They are the most expensive employees, and the great difficulty about reducing your tonnage charge is to cut down the wages, and the pilot is the big cost. Our pilot only goes with the power boats. The freight is carried in a barge. When the barge is tied up at the wharf it does not tie up the power boat, and the pilot goes with the power boat and takes another barge. That is the modern system, which differs from the old system of navigation, where the boat was run under its own power and the pilot was living around town while the boat was being loaded and unloaded. We have further reduced the charge in this way: The pilot now only goes half the distance down from Kansas City. He meets the boat coming up from St. Louis, and he exchanges his tow with the other boat. The other pilot takes it down and he takes it up, and the result of that is that each pilot can become acquainted with the bad spots in half the river instead of all of the pilots having to know all of the bad spots in all of the river.

That illustrates to you some of the difficulties that we are contending with while the Government is dallying along improving the river. I have here a clipping from a paper, and I would like to read it, showing that a boat went through from Kansas City to St. Louis in less than 48 hours, which is a record trip on the Missouri River, and it shows exactly how it was done, by one pilot knowing one half the river and another pilot knowing the other half.

The Clerk read as follows:

A RIVER BOAT SPEED RECORD—LAST TRIP TO ST. LOUIS WAS MADE IN RAPID TIME.

A new speed record for freight transportation has been established by the Kansas City-Missouri River Navigation Co. The steamer *A. M. Scott* left Kansas City towing the barge *Epsilon*, loaded with general merchandise, at 4.30 o'clock Monday morning. Monday night the *Scott* met the *Advance* coming upstream from St. Louis with the barge *Gamma*, and traded barges. The *Advance* towed the barge *Epsilon* into St. Louis at 2.30 o'clock Tuesday afternoon. The plan recently adopted of dividing the river into two sections and trading barges has helped to speed up the schedule, as the captains become more familiar with their section of the river. Two trips between Kansas City and St. Louis are being made regularly every week.

Mr. BORLAND. I wish I could convince this House that we are solving what I regard as the problem of the navigation of our inland waterways. If we can do this it is a tremendous gain, and we trying our best, putting in our own efforts, and our own money, and our own sacrifice and risk to solve what I believe is a great national problem. We know we have got to articulate with the railroads and have got to do business along modern lines.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. BORLAND. If I have any time.

Mr. MILLER of Minnesota. I want to ask the gentleman a question for information. The gentleman stated the year just closed was the banner year for navigation between Kansas City and St. Louis?

Mr. BORLAND. No; the gentleman misunderstood me. I said the year 1866 was the banner year of the old steamboat and this last year exceeded that banner year; but it was not the

banner year of our season; the banner year of our season was 1915.

Mr. MILLER of Minnesota. I was mistaken. Can the gentleman state the tonnage carried on the Missouri River between those two points?

Mr. BORLAND. The gross tonnage of 1915—I am speaking now of general merchandise by railroads—was about 40,000 tons. Now, in addition, the 1915 tonnage, such tonnage as appears on other rivers, the Mississippi, the Ohio, such as coal and sand, runs about a quarter of a million tons.

Mr. MILLER of Minnesota. What is the distance between the two points?

Mr. BORLAND. The 40,000 tons, which is high-grade merchandise, is worth $11,000,000. And it is the significant fact as showing the real revival of commerce.

Mr. MILLER of Minnesota. What is the distance between Kansas City and St. Louis?

Mr. BORLAND. Four hundred and ninety-eight miles.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FREAR. Mr. Chairman——

Mr. SMALL. Mr. Chairman, if the gentleman will yield for me to submit a unanimous-consent request, I wish to ask unanimous consent that all debate on this paragraph and amendments thereto close in 20 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in 20 minutes. Is there objection?

Mr. SMALL. Five to the gentleman from Wisconsin [Mr. FREAR], five to the gentleman from Iowa [Mr. TOWNER], five to the gentleman from Wisconsin [Mr. LENROOT], and five to the gentleman from Missouri——

Mr. RUCKER. I would probably want five minutes, but it somewhat depends on what the gentleman says.

Mr. SMALL. Make it 25 minutes.

The CHAIRMAN. Is there objection?

Mr. MONDELL. Would the gentleman yield me five minutes of that time?

Mr. SMALL. If I may have the attention of the committee I would like to remind the committee that we are all anxious to conclude this bill as early to-day as we may, and while of course there is no disposition to curtail discussion on the items——

Mr. MONDELL. I have so far restrained my desire to talk on this bill and I would like to have five minutes of this time.

Mr. SMALL. I will make it 30 minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in 30 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FREAR. Mr. Chairman, I move to strike out the last two words. I would rather the gentleman from Missouri [Mr. BORLAND] could have followed me than that I should have to follow him, because there are certain statements I would have been very glad to have had explained. On page 2666 of the Engineer's Report of 1916, in reference to this project, it shows that $15,417,000 have been appropriated by the Government on the project. Now, the gentleman truly says that of the amount given that project, which is the lower 400 miles of the Missouri River, $7,763,000 was practically wasted, so that we are appropriating over $15,000,000 on these 400 miles, with several millions to come. The gentleman forgot to state what appears in the record, that 500,000 acres of reclamation projects lie along that river; that is the estimate of the Army engineers as to the amount of land that will be reclaimed by Government expenditure at this time. Now, speaking about the commerce which we have been promised on this stream—the gentleman just referred to that—last year, in 1915, there was some grain shipped on the Missouri River—2,339 tons of grain; quite a commerce after an appropriation of over $15,000,000; but it was not shipped from Kansas City to St. Louis. It was only shipped 43 miles. That is about one-tenth of the distance from Kansas City down to St. Louis. There was some small commerce there, and I have no question but what the people there are trying to get commerce on the river; but here is what the Army engineers said, and lest the gentlemen forget it I will repeat it. Col. Deakyne said—page 11, House Document No. 463, Sixty-fourth Congress—when he opposed this proposition and tried to cause it to be abandoned, and in that he was supported by Col. Townsend, president of the Mississippi River Commission:

> The Kansas City-Missouri River Navigation Co., the only through line on the river operating between Kansas City and St. Louis, charges 80 per cent of the railroad rates, which is a saving to the shipper by use of the river in 1913 of about $10,000. It is evident the saving is entirely inadequate to warrant the serious consideration of an expenditure by the Government of $1,100,000.

We spend $100 a year in order to save $1 for Kansas shippers, according to Col. Deakyne's statement.

Mr. Chairman, we have on the Missouri River a balance in the hands of engineers uncontracted for on the 1st day of March last of $1,692,639, according to the engineer's report, showing that we could easily get along for another year in saving that $10,000 in freight rates to those shippers with this amount of money in the improving of the channel and reclamation of the land.

Now, I thought it was advisable at this time to put in some statistics. I would be glad to do so, but the gentleman from Missouri [Mr. BORLAND], who has just spoken, spoke feelingly on this river project, because I know it lies close to his heart, and yet I have always contended, and it seems to me there can be no question, that when the Army engineer says we are spending $100 of Government money, and will spend it in the future, in order to save $1 in freight rates, there should be some stop to this waste in Government funds.

Mr. TOWNER. Mr. Chairman, I would like to have the attention of the chairman of the committee, if he will be kind enough to give it to me.

In the appropriation for snagging and maintenance between Kansas City and Sioux City I notice that the appropriation is only $35,000. In previous years this appropriation was $75,000. I would like to ask the chairman of the committee why that reduction has been made.

Mr. SMALL. It is true that this is a less appropriation than has at times been carried in previous bills. As the gentleman stated, the work there is snagging. The hindrances to navigation in rivers are snags and shallow channels, which are mostly caused by caving banks. The only answer I can make is that the engineers say that the available balance on hand makes only this appropriation necessary.

Mr. TOWNER. I will say to the chairman that I understood $40,000 was on hand unexpended from the previous appropriation, and that probably is the reason why this appropriation is so small.

Mr. SMALL. That is correct.

Mr. TOWNER. I want to make this observation regarding that policy:

Here is a stretch of the river from Kansas City, Mo., to Sioux City of 415 miles. For that is appropriated now $35,000. There is appropriated for the 392 miles between Kansas City and St. Louis $1,000,000, and altogether about $12,000,000 to be expended. I know that it is not expected that this stretch of water between Kansas City and Sioux City shall be improved for navigation purposes, but it has been the policy of the Government to protect as far as they could what little navigation there was by snagging, and to maintain the channel of the river as nearly without changing as it could be done.

The difficulty is that the engineers have practically abandoned even any effort to prevent the changes in the channels of the river. Individuals along the Iowa side and along the Nebraska side of the river have been expending large sums of their own money. I know one farmer who spent $1,200 for the protection of his own land, having to secure from the engineer the privilege to go there and do this work in order to prevent the channels changing so as to cut into his land and take his farm away.

Now, it does seem to me that at least the money that has been appropriated for the Government ought to be used before telling individuals to go down into their pockets and pay this money for the protection of their own land, not from overflow but from being actually carried away by the changing of the channels of the Missouri River. The policy ought to be maintained, if it ever has been established, of keeping the channel of the Missouri River within established boundaries if possible. It occurs to me that this appropriation, instead of being diminished from the pitiful sum of $75,000 down to $35,000, which means, of course, practically nothing in this work, ought to have been increased at least until we could have maintained practically inviolate the present channel of the Missouri River so that men might know whether they were living in Iowa or in Nebraska or whether in Missouri or in Kansas. This changing and shifting of the channel of the Missouri River is a great injury.

I want to say this, further, that I hope the time will come, if you are to maintain any policy that really means for the betterment of the people along these rivers, when you will protect them from these annual inundations that this year are destroying entirely the corn crop on hundreds of thousands of acres of the best land that there is in Iowa and Missouri.

The CHAIRMAN. The time of the gentleman has expired. The gentleman from Wisconsin [Mr. LENROOT] is recognized.

Mr. LENROOT. Mr. Chairman, I have no doubt that the greater part of the appropriation for the Missouri River should be stricken out of the bill at this time; but it is very apparent that it is absolutely useless to make any such motion, and my only reason for taking any time at all on the subject is to reply to the gentleman from Missouri [Mr. BORLAND] upon one proposition that he made, and that was that the Missouri River from Kansas City to St. Louis will be utilized to a very large extent as soon as railroad rates can be articulated to the Atlantic coast.

Now, I want to say that railroad rates, no matter how you make them, will never have any effect whatever upon the commerce of the Missouri River if it involves the unloading of cars in Kansas City, loading the commodity upon boats, unloading in St. Louis and loading upon cars, and shipping to the Atlantic coast. It is an absolute waste of money, if that is the theory of the gentleman of the improvement of the Missouri River, because there is no waterway in the United States where they have railroad communication where as a matter of economy they would utilize 350 miles of water, where they must load and unload and use railways at both ends of the line.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Just for a question.

Mr. BORLAND. Does not the gentleman know that that is what they are doing now, and getting freight through quicker?

Mr. LENROOT. Where does your tonnage go?

Mr. BORLAND. Between Kansas City and St. Louis.

Mr. LENROOT. I can not yield for that.

Mr. BORLAND. They are saving time.

Mr. LENROOT. I can not yield for that. This tonnage of 40,000 tons——

Mr. MADDEN. It is only 26,000 tons.

Mr. LENROOT. Well, whatever it is, it originates at Kansas City, the bulk of it, and the termination of it is at St. Louis, or a very great bulk, and to that extent it is of some small value. But there is no tonnage, I will undertake to say, of any substantial amount, and never will be, so far as it originates in the West, to go to the Atlantic coast. It can not be defended for a single moment. Take Lake Superior, about the same distance, 350 miles in length. Do you suppose there would be a ton of through freight from my city of Superior to the Atlantic coast if they had to unload that freight at the Soo Canal and ship the rest of the way by rail? Of course, they would not; and if you will turn to the report of the engineers themselves you will find that they substantiate that absolutely on another question, not speaking of the Missouri River, where Col. Newcomer said, referring to the Tombigbee River:

> We do not, as a matter of fact, find in practice that tonnage of that kind—

Speaking of heavy traffic—

> will go by rail and then be transferred to boats to be carried a few hundred miles and be transferred again. In other words, if it could go through, or if you had a canal connecting the Birmingham district with the Black Warrior system, then it is possible that it might be cheaper by water. Of course, I do not mean to say that it is not possible to do it that way, but we have not been expecting to see shipments of these heavy things by water unless there is water at the point of origin.

There must be water at the point of origin or of final destination, or else the waterway must be of such a length that it is an economy to load and unload and transfer by water.

Mr. MADDEN. It must be a through water shipment?

Mr. LENROOT. Absolutely.

Mr. MADDEN. In this case it costs $40 for every ton of freight every year that goes on the Missouri River.

Mr. LENROOT. Yes; and if the gentleman's theory is that the Missouri River is to be utilized for through shipments from Kansas City to St. Louis and then to go on to the Atlantic coast, every dollar of this money is wasted except such sum as will provide for purely local traffic between Kansas City and St. Louis. And I will say to the gentleman that there will never be a possibility of utilizing the Missouri River unless you can send commerce to New Orleans by water and thence along the coast or across the sea. [Applause.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. ALEXANDER. Mr. Chairman and gentlemen of the committee, this is not a Kansas City project alone. The business men of Kansas City are not the only people interested in the improvement of the Missouri River. It is true that in recent years they have taken a lively interest in the project, and they have proven their interest by organizing a company and putting a boat line on the Missouri River and making it available for transportation purposes.

I confess to some irritation when I hear Members on this floor speak of the present traffic on the Missouri River and suggest that as a limit of the potentiality of the stream for transportation purposes. I wonder if the Representatives in Congress from the Mississippi Valley do not regard the Mississippi and the Missouri and their tributaries as one of our greatest national assets? In the years to come, if not in the years of the recent past, do they not think these great waterways will increase in value as carriers of commerce?

Can it be that the benefits of water-borne commerce shall be enjoyed only by the Atlantic and Gulf and Pacific seaboards? May not the Mississippi and the Missouri Rivers by judicious improvement be made to the inland cities of our country of the same value as the Atlantic and the Pacific and the Gulf are to the great cities on those coasts?

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield for a question?

Mr. ALEXANDER. Yes.

Mr. CAMPBELL of Kansas. What possible benefit would it be to the shipper of a trainload of wheat originating at Hutchinson, Kans., if destined, say, to Cincinnati, Ohio, to have the distance covered from Kansas City to St. Louis on the river?

Mr. ALEXANDER. I do not think that if that were the only benefit it would amount to a great deal. But if the shipment of all the grain from Kansas should be shipped by rail to Kansas City or Leavenworth, and was shipped by barge from those ports to Cincinnati by water, I apprehend the gentleman will agree that large benefits would accrue from it.

But the route suggested by the gentleman from Kansas is not the natural course of commerce on the Missouri River. It is thence on the Mississippi down to the Gulf. New Orleans will be our great port, as New York is on the Atlantic, and as Chicago is a great port on the Great Lakes.

But I want to call attention to this additional fact: Is it not of interest to the people of the United States that 500,000 acres of the most valuable land in the United States is in the Missouri River Valley between Kansas City and its mouth, that by the revetment of that stream, by making it navigable, by insuring a 6-foot channel from Kansas City to its mouth, we will at the same time protect this vast amount of rich land, as rich as there is in the world, from erosion and waste?

But that is an incident, though one of very great value. We do not ask for the improvement of the river as a reclamation project. I represent a district two counties of which lie on the Missouri River. We have expended much money in dikes and in levees, but that money has been wasted by the erosion of the banks of the stream. Those levees have been washed into the Missouri River. We are not asking for this as a conservation scheme, to protect our lands from overflow; but if the channel of that river is fixed, if the banks by revetments are prevented from shifting year after year and causing the destruction of immense quantities of rich land, we will build levees and protect ourselves from overflow. I wanted to call attention to these facts as worthy of your consideration. Men lack vision and lack a proper estimate of the value of these inland waterways when they talk of tonnage and talk of the cost of transportation at this time. Why not look to the future, when this is a completed project?

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. MONDELL. Mr. Chairman, in very briefly discussing this matter, I shall not express any opinion as to the bill in general or the wisdom of passing at this time a river and harbor bill without some such provision as is proposed in the motion that will be made by the gentleman from Massachusetts [Mr. TREADWAY] to recommit. I shall not even stand here as arguing for the specific items of appropriation in this paragraph. But I want to make a brief observation in regard to the improvement of the Missouri and the Mississippi Rivers.

It is all very well to say, and it is true to a very considerable extent, that at the present time our expenditures in the improvement of inland rivers have not generally been fully justified by the increase of commerce. I think we must all admit that. But that is not conclusive of the matter by any manner of means, because we can not tell and we do not know what the ultimate use of these streams is to be until we shall have completed our improvement of them, and we at least hope that if we do not secure a very great amount of through commerce on these streams, we shall build up local commerce along them that in the running of time will fully justify the expenditure made.

But there is altogether another side of this question of the improvement of the Missouri and Mississippi Rivers. It is unthinkable that in this great, rich, and powerful Nation we shall allow these wonderful waterways, running for thousands of miles through the richest alluvial land in the world, to continue to cut hither and yon, destroying year after year hundreds

of thousands of acres of tremendously valuable land. Gentlemen may say this is a river and harbor bill——

Mr. GREEN of Iowa rose.

Mr. MONDELL. I can not yield. I have only five minutes. Gentleman may say this is not a reclamation bill. Very well, but if work along these streams in the interest of navigation shall render as great or even a greater service in the protection of private lands we are justified—in fact, we are obligated—in making these improvements, for there is a national obligation relative to the Mississippi and the Missouri Rivers and their great tributaries. We have drained vast areas of swamp and low-lying lands, hundreds of thousands of acres, into these great streams. We have increased their water-carrying burdens. We have made them to a greater extent than nature intended the natural drainage channels of vast areas. They run through a number of States. The obligation is national and not local, and, in my opinion, there is little doubt but that eventually we will, as in my opinion we should, make such improvements on these streams as are necessary to hold them within fixed channels. It can be done. To a very considerable extent it has been done. In my opinion it is unfortunate that we have laid so much stress on the matter of navigability that some of our work, which is really intended for the purpose of maintaining the river banks, has not been done in the best possible manner, because of the fact that the engineers have felt that they were constrained, if not compelled, to do their work wholly with a view of improving navigation. The sooner we recognize the national duty to fix these great streams within their banks in the aid of navigation, but also that the people locally may be able to reclaim their land, the sooner we shall have performed a work of as great value as any ever undertaken by this or any other Nation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RUCKER and Mr. MEEKER rose.

Mr. SMALL. Mr. Chairman, I think all time has expired.

The CHAIRMAN (Mr. CRISP). The present Chairman is occupying the chair only temporarily, but, according to what the permanent Chairman told him, there are nine minutes remaining.

Mr. SMALL. I beg the gentleman's pardon. That is correct.

Mr. RUCKER. Mr. Chairman, I will detain the committee only a few minutes. I believe that every member of this committee realizes, whether it meets with his particular and peculiar personal views or not, that it is a part of the broad policy of this great Republic to improve and protect our inland waterways. No man can meditate upon that thought without intuitively and involuntarily having in mind the Mississippi River, the Ohio River, and the Missouri River, composing a great system of rivers reaching from north to south across the United States, and from away up toward the Northeast and the Northwest, connecting vast areas of the very best and most productive sections of our country. This must be thought of. And, Mr. Chairman, it seems to me that no person can logically conceive of the thought or for one moment reflect on the proposition without realizing that the improvement of one of these rivers is almost a necessary incident to the improvement of the others. They are bound together and should be dealt with as one great problem. What will it avail the people of the United States if we expend additional millions and hundreds of millions of dollars in building levees along the lower Mississippi River, through cooperation, perchance, dredging that stream and revetting its banks, if we are going to continue to pour into the Mississippi River annually, to find lodgment somewhere in its bed, hundreds of farms which are washed down the Missouri from Iowa, Nebraska, and Missouri?

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. CAMPBELL of Kansas. That applies also to nonnavigable streams like the Kaw River, the Neosho, and the Marais des Cygnes, does it not?

Mr. RUCKER. Those rivers empty into the Missouri River.

Mr. CAMPBELL of Kansas. But the lands are destroyed just the same as they are on the main stream.

Mr. RUCKER. The gentleman magnifies the importance of the Kaw River. The Kaw River, although it is a great stream, in a great State, I am willing to admit, yet it does not compare with the Missouri River, and I can not discuss it now.

Mr. ANTHONY. It is a very noble stream.

Mr. RUCKER. But the Missouri River is one of the three great streams whose names enter one's mind the very minute he begins thinking about the improvement of our inland waterways, I repeat; and I say again that just as long as we continue to pour rich, fertile Missouri farms into the bed of the Mississippi, so long will efforts toward improving that great stream prove a useless and wasteful expenditure of the public money.

Mr. GREEN of Iowa. Will my friend yield there?

Mr. RUCKER. If the gentleman will make his question short.

Mr. GREEN of Iowa. Does not the gentleman think that more than $35,000 ought to have been appropriated for the river from Kansas City to Sioux City when not only individuals but railway companies have spent hundreds of thousands of dollars there?

Mr. RUCKER. I do not want to pass judgment on that matter. Let me say this: I will be frank with you. I have never declaimed very much on the volume of the tonnage of freight carried on the Missouri River, but I have insisted and now insist it is a Government stream, a navigable stream, and as stated by the gentleman from Wyoming [Mr. MONDELL] a few moments ago, this great Republic owes a duty to those patriotic, loyal citizens who builded their homes along the rich valley and it should discharge that duty and give them protection. I say to you, Mr. Chairman, that the improvement of this river, the revetment of its banks so as to confine that great stream within certain channels, will prove of inestimable value to the people of the United States, whether we carry commerce upon its bosom or not. It would save homes and farms. If the farms which have been washed down the rivers to the Gulf, through the neglect and failure of the Government to give this protection, were now under cultivation, instead of giving the Missouri River its nickname of the Big Muddy, or adding to the Delta of the Mississippi, those farms would have produced millions of bushels of wheat and corn this year to feed the people of the United States and our allies. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. MEEKER. I ask unanimous consent that I may proceed for three minutes.

Mr. CANNON. I should like to have three minutes, if the time is to be extended.

Mr. MEEKER. Then I modify my request, and ask that the time be extended six minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that the time for debate may be extended six minutes. Is there objection?

There was no objection.

Mr. MEEKER. Mr. Chairman, in reply to the gentleman from Wisconsin, who read a paragraph from Col. Deakyne, I want to quote another paragraph, and, although I may not be able to quote it literally, I can give the gist of it. He said in that report that he was satisfied that the river in the future would be of no commercial value, because the care of the freight and traffic had been provided for by other means. Of course the "other means" was by railroad or by automobiles. I would like to call attention to the fact that in less than 24 months after Col. Deakyne had made that statement the operators of these other means of transportation, namely, the railroads, were running up and down the river looking for boats to assist them in taking care of the traffic. As a commercial prophet Col. Deakyne was not a howling success.

Now, one of three things has got to occur in the Mississippi Valley. We have either got to double-track the railroads, and the Government is not going to give away any more land to build railroads. The great transcontinental lines were built largely by Government grants of land to the extent of hundreds of millions of dollars. They have not got any more land to give away. We have got to go to the double-track system all up and down the Mississippi Valley, or we have got to get on the rivers, or else we must quit business. One of these three things must occur. Just about the time that Col. Deakyne had gone elsewhere, after he had endeavored to stop the improvement, along came the railroad men, not the river men but the railroad men, begging for every scow and boat and barge and tug and everything that could be found to take care of the traffic which the colonel had pleasantly remarked was no longer needed.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. MEEKER. Yes.

Mr. MOORE of Pennsylvania. Does the gentleman know that the waterway section of the National Council of Defense has an agent going along the Mississippi Valley now, seeking boats and tugboats to aid them?

Mr. MEEKER. That is exactly so, and it meets in Washington this afternoon.

Mr. CAMPBELL of Kansas. Happily while this bill is under consideration.

Mr. MEEKER. Yes; unfortunately for the opponents of the bill.

Mr. MOORE of Pennsylvania. This began long before this river and harbor bill came up?

Mr. MEEKER. Yes; and they need every boat that they can get and the gentleman from Kansas will have 2,000,000 more bushels of wheat to haul than they thought he would a month ago.

Mr. CAMPBELL of Kansas. And not a bushel will be hauled on this river.

Mr. CANNON. Mr. Chairman, I have taken no part in the consideration of this bill, but I want to say two things about this item. I recollect very well in years past that large appropriations were made for improvement of the Missouri River. After they had been made, when the floods came, the Committee on Rivers and Harbors would recommend to the Appropriations Committee, in writing, recommending the proposition to the House, that so much might be used for the protection of the bridges of the railroads. I do not know whether they have stopped that now or not, but I call attention to it.

Now, then, if I was defending this proposition I would be square and, I believe, forceful about it, and that would be to agree with the gentleman from Wyoming [Mr. MONDELL]. The Mississippi River has no more respect for State lines than a duck has for a June bug, and that is largely so with the Missouri River. The question of the navigation of these rivers is a thing of the past, in my judgment. The question of confining the river to the channel with extensive revetments has been going on, and they will be building and placing them there a hundred or a thousand years from now along both rivers, not for navigation but for the protection of these alluvial lands that, if they were under a high state of cultivation, could almost feed the world. [Applause.] I withdraw the pro forma amendment.

The Clerk read as follows:

San Diego Harbor Cal.: For maintenance, $20,000; completing improvement of San Diego Harbor in accordance with the report submitted in Senate Document No. 3, Sixty-fifth Congress, first session, and by dredging area "A" in accordance with the project submitted on page 14 of House Document No. 648, Sixty-fourth Congress, first session, as modified in the report printed in Rivers and Harbors Committee Document No. 8, Sixty-fourth Congress, second session, $154,000; in all, $174,000.

Mr. SMALL. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 33, in lines 11 and 12, strike out the words "Senate Document No. 3" and insert in lieu thereof "House Document No. 140."

Mr. SMALL. That simply corrects a clerical error.

The amendment was agreed to.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

Mr. MONDELL. I was about to submit a request for 10 minutes on this item.

Mr. SMALL. Can not the gentleman get along with less than 10?

Mr. MONDELL. Not well; this is the first day I have spoken on this bill.

Mr. FREAR. I would like three minutes.

Mr. HARDY. I would like three minutes.

Mr. SMALL. Mr. Chairman, I modify my request and make it 16 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on the paragraph and amendments thereto close in 16 minutes, the gentleman from Wyoming to have 10, the gentleman from Wisconsin to have 3, and the gentleman from Texas [Mr. HARDY] to have 3. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, I assume that there will be no objection on the part of anyone to this item, and it is not necessary for me or anyone else to defend it. The harbor of San Diego is one of the very important harbors on the Pacific coast, and will become increasingly important as time passes. The people of that wonderful western city have shown such liberality and enterprise on their own behalf and have expended so much out of their own pockets to make the harbor available and useful that the Federal Government may properly be liberal in its appropriation.

But for the moment I want to discuss the general question of river and harbor items. I live in one of the very few States of the Union that never has an item in the river and harbor bill, and never will have one. In fact, there are no items on this bill within several hundred miles of the border of the State I have the honor to represent. That being true, our people having no direct interest in any of these items, it might be considered good political policy in my section of the country to pose as an opponent of expenditures for river and harbor improvements and join in the general chorus of condemnation which is frequently so popular relative to these bills. I have been condemned at times because I have supported river and harbor bills. I do not think I have ever been particularly thanked by any of my constituents for supporting them. But the very fact that we have no direct interest, the very fact that we are not directly affected by these appropriations, the very fact that they are national appropriations and must be viewed as such, in my opinion, increases my responsibility with regard to them, and I am heartily in favor, as I have frequently said on the floor of this House, of these appropriations so far as they are wise and just and justifiable, and in the main they are. [Applause.]

At one time and another I have taken my little fling at some of the, from my standpoint, indefensible items of these bills, but I have always realized that they were a small, in fact an almost infinitesimal, portion of these great appropriations. No work undertaken and being carried on by the Federal Government has the approval of the American people as a whole more than river and harbor appropriations have, and none are more essential to the development of the mighty empire embraced within the continental boundaries of the Republic. It is true that we have made appropriations and expenditures which do not seem to have been justified in the increase in the amount of navigation, but that is not conclusive, as I said a moment ago. It is persuasive with regard to the advisability of certain improvements, but not tremendously persuasive with me in view of the fact that the cases where we have failed to develop navigation have been, in the main, cases where we have not completed the improvements, and therefore not given full opportunity. We must recollect that we are not building, if we build properly under this bill, for to-day or to-morrow, but we are building for the increasing population and the increasing business of the country; and if we develop as we hope to and feel confident we shall, we shall find it absolutely essential to utilize every available waterway and finally grow into the habit of a larger use of waterways as the people of Europe have grown into that habit. We must have the waterways improved before that habit can be developed and fixed among our people.

So far as the improvement of the great ports of the country are concerned, my opinion has always been that we have gone too slowly, that we have been rather niggardly in our appropriations than otherwise. So far as the appropriations for the preservation of certain great streams are concerned, we have not, in my opinion, gone too fast. I am even one of those who are heartily in sympathy with the Atlantic coast inland waterways system, so ably advocated by the chairman of this committee and by the gentleman from Pennsylvania [Mr. MOORE] and others. I have no doubt that eventually we shall develop, and I think we ought to develop, along the Atlantic coast a line of waterways inland, safe from the storms, secure in time of war, and tremendously valuable in carrying the enormously increased commerce which we hope the country will have in time to come. [Applause.] So much for that.

As to the present situation, at the beginning of this Congress the Democratic caucus very properly, as I understand it, took the position that for this session we should pass only those things that were directly or indirectly connected in an important way with the war situation, and this bill is brought in as one of those measures. There are no doubt some items in it that might have been left out without the country suffering very greatly, but in my opinion they are comparatively small and comparatively few. While we should strive to eliminate such items, we realize we never can expect absolutely perfect appropriations or legislation with regard to these matters. The bill is brought here as a war measure, and therefore I am of opinion as a friend of river and harbor improvements, as one who has voted for most of the river and harbor bills in the 22 years which I have had the honor of occupying a seat upon this floor, that we do not pursue a wise course in passing this measure at this time with a provision putting it clearly in the line of war legislation. I say that I have voted for most of the river and harbor bills in the 22 years which I have been upon this floor. There have been a few exceptions. I have had to hold my nose a little a time or two, but I have assumed that what was good so outvolumed that which was questionable that it was my duty to vote for the bill. Under the present situation it occurs to me that the friends of river and harbor improvement could well have afforded to accept the amendment offered by the gentleman from Massachusetts [Mr. TREADWAY], and that it will be wise for them to vote for the motion that he will make to recommit the bill, leaving it to the judgment of the President as to whether these items, first, as to maintenance, are essential to commerce and navigation, and, second, as to

new projects, are essential to the successful prosecution of the war.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. In just a moment. I should hope, and I should expect, upon the part of the President a very liberal construction and a very liberal use and exercise of his discretion and responsibility. I should expect that most of the projects would be continued and that at least those that are essential among the new projects would be undertaken. I yield to the gentleman.

Mr. HARDY. Does not the gentleman think that there is at least a strong probability that the membership of this House and the Committee on Rivers and Harbors, after a full investigation, will be less likely to be partial than the administrative officers who might be influenced?

Mr. MONDELL. That is not exactly the question as I see it. River and harbor appropriations are always under fire, and frequently very unfairly in my opinion.

Mr. HARDY. Then I understand the gentleman would seek that way of escaping the fire?

Mr. MONDELL. That is not the idea at all. I am speaking now as a matter of policy. I think as a matter of policy it would be well to have, in addition to the indorsements that this bill already has from the Secretary of War and the President and the indorsement of the committee, a further indorsement from high authority that would remove all questions as to the advisability and propriety under the circumstances of taking up or going on with these improvements.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. FREAR. Mr. Chairman, several gentlemen have spoken in regard to the necessity for revetting these streams for the purpose of reclaiming lands and suggesting that it is the duty of the Committee on Rivers and Harbors to embody propositions purporting to be for navigation when they have really in contemplation the saving or reclaiming of lands. Now, it is not my understanding that that is the province of the Committee on Rivers and Harbors; if so, I concede that some of the criticism that has heretofore been made has been unwarranted. If the position of the gentleman who has just finished speaking, the gentleman from Wyoming [Mr. MONDELL], is correct, that the Committee on Rivers and Harbors should consider the question of the reclamation of land at Government expense, making the people who live along these streams, whether it is the Missouri, Mississippi, or any other stream, a present of all revetments and diking which the Government may put in—if that be the province of this committee, I concede, then, the criticism against these projects has been wrong in the past. If it be the position of the gentlemen who are insisting that the Government expend all this money for the benefit of those living along the river, whereas the people in the various States are obliged to reclaim their own land at their own expense, whether it be marsh land or small rivers that are nonnavigable, then I concede there has been a mistake in understanding the purpose of this River and Harbor Committee.

Mr. RUCKER. I hope the gentleman does not understand me as making a statement like that.

Mr. FREAR. I can not yield. I have only five minutes. But the position taken by three or four gentlemen who have just spoken that revetments may be undertaken for the purpose of reclaiming land because of the people who have lived along the borders of certain streams——

Mr. RUCKER. I believe that——

Mr. FREAR (continuing). Seems to me is not a correct position for the Rivers and Harbors Committee to undertake, because we are engaged purely in the question of navigation. Now, the gentleman from Wyoming says none of these projects have been completed. We have already spent $150,000,000 on the Mississippi River, and the best men on the river say that the lower part has been completed, and they have lost 95 per cent of the commerce during that time; so that it seems he was mistaken about some of the items I have repeatedly quoted here. There is no need of repetition. If you are going to dig out these streams and hold them for years in order to await boats and commerce, I believe it is an economic mistake for the Government.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FREAR. Has my three minutes expired?

The CHAIRMAN. The gentleman has spoken for three minutes.

Mr. HARDY. Mr. Chairman, yesterday the gentleman from Wisconsin [Mr. FREAR] reinserted in the RECORD a formerly inserted letter from a gentleman by the name of Guyler, in which that gentleman took occasion to say that we are educating or are willing to teach our children that it is right to steal from the Government. I wish to call attention to the fact that that letter was originally addressed to Mr. FREAR, apparently handed by Mr. FREAR to Mr. Callaway, inserted in the RECORD by Mr. Callaway last year, and now is reinserted this year by Mr. FREAR as coming from Mr. Callaway. By this circular method of insertion and reinsertion of the same matter the gentleman from Wisconsin has filled a vast space in the CONGRESSIONAL RECORD in doing what he says that we demand of him to do, to show public sentiment on this bill. To show public sentiment he reads this one letter from one man on the Brazos River, and yesterday excused himself for doing it by trying to make Mr. Callaway sponsor for Mr. Guyler. He tried to add the strength of Mr. Callaway to the weight of Mr. Guyler.

He did not read the whole letter yesterday, but he inserted it in the RECORD. The whole letter I think shows between the lines where the sore spot was with Mr. Guyler. One might judge from reading the letter that under the engineering regulations he possibly had been compelled to raise the cable of his ferryboat 40 feet or more and that the expense was hurting him. I do not know that is the case. Possibly Mr. Guyler may be just one of these men naturally opposed to all improvements. While the gentleman was giving that as an evidence of public sentiment along the Brazos, I was reminded that that same summer a great convention was held at Bryan, in the Brazos Valley, attended by representatives from every county from the Gulf up to Waco, urging the improvement and cleaning out of the Brazos River. The Brazos River is not in this bill, but it is attacked by the gentleman from Wisconsin because he can hang upon that some criticism and reinsert some letters heretofore obtained. Can not we let things alone that are not in the bill and confine ourselves to things in the bill? And I make this talk just simply to say that the gentleman from Wisconsin is urging here all sorts and kinds of objections. A great deal of his talk is about things not in the bill, and he always professes to favor deserving river improvements. Yet in that same talk yesterday he placed in the RECORD a letter from a gentleman on the Mississippi River saying that the Mississippi River is useless and worthless and that navigation on it has been suspended, although it has 8 feet actual depth of water, and yet the gentleman said he would maintain our rivers and that he would vote for worthy appropriations. What is a worthy river in the gentleman's estimation, when he quotes here letters of condemnation for the Mississippi River? He will find some kind of letter on which to base a contention that no river in America is worthy of improvement by the American Government, and if it were the Mississippi River involved in this bill he would be reading such extracts as that from a man by the name of Bernhardt opposing further expenditure on the Mississippi River. Why pretend you are in favor of any improvements when your record shows you are opposed practically to all inland waterways?

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. HARDY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Los Angeles Harbor, Cal.: For maintenance, $25,000; and for improvement in accordance with the report submitted in House Document No. 896, Sixty-third Congress, second session, and subject to the conditions set forth in said document, $50,000: *Provided*, That no expense shall be incurred by the United States for acquiring any lands required for the purpose of this improvement; in all, $75,000 Such modification as may be recommended by the Chief of Engineers and approved by the Secretary of War for the plan of silt-diversion works adopted by the river and harbor act approved July 27, 1916, for the protection of Los Angeles and Long Beach Harbors, in accordance with the report printed in House Document No. 462, Sixty-fourth Congress, first session, is hereby authorized, subject to the conditions set forth in said document: *Provided*, That such modifications shall not increase the total cost of the work to the United States.

Mr. FREAR. Mr. Chairman, I move to strike out the last word. The gentleman from Texas [Mr. HARDY] who has just spoken——

Mr. SMALL. Mr. Chairman, I suppose this is a pro forma amendment?

Mr. FREAR. Yes.

Mr. SMALL. How much time does the gentleman wish?

Mr. FREAR. Only five minutes.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph just read and all amendments thereto close in five minutes.

Mr. HARDY. I may want five minutes, Mr. Chairman.

Mr. OSBORNE. Mr. Chairman, I do not want to take any time if I may be permitted to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. SMALL. Does the gentleman from California desire any time.

Mr. OSBORNE. No; I just wanted to extend my remarks in the RECORD.

Mr. SMALL. Does the gentleman from Texas wish time?

Mr. HARDY. I may want some time.

Mr. SMALL. Fifteen minutes, then, Mr. Chairman.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. FREAR. Mr. Chairman, the gentleman from Texas [Mr. HARDY] takes me to task for a letter that was introduced in the RECORD yesterday. He forgets that shortly before the gentleman from Texas [Mr. DIES] took me to task for my attitude on river improvements, and stated that I was not reflecting the sentiment of the country. So far as I could I have endeavored to show what the sentiment of the country is. I took the record of a man who lived upon a river where Freeport Harbor, at the mouth of the river, is carried by this bill. It was a letter sent voluntarily—the letter from Mr. Guyler—and which said just what he thought of river improvement down on the Brazos, on which the engineer's report says there was no commerce on the river proper in 1915 whatever. We will let that stand where it is. Mr. Guyler may have been prejudiced. I know not. I feel he has reason to know whereof he speaks. But the letter was brought in here and read on the floor of the House by an able Congressman from Texas, Mr. Callaway, with his approval and his indorsement, and was supposed to have reflected the sentiment down in Texas. Now, Mr. Chairman, if I am to be criticized for it—and the gentleman has said——

Mr. HARDY. Will the gentleman yield for just one question? Did you give that letter to Mr. Callaway?

Mr. FREAR. Oh, yes; certainly. I knew nothing about the gentleman. Mr. Callaway vouched for him and introduced the letter in the RECORD, as I now remember, and I am very glad he did so, and I approve of Mr. Callaway's judgment, although I do not know particularly about the gentleman in question.

Now, Mr. Chairman, I have been criticized repeatedly for putting these things in the RECORD. I am going to put them in the RECORD. When people along the river say that they can wade the Trinity and the Brazos Rivers, and engineers propose to dig artesian wells in the Trinity River to aid navigation, it seems to me at such times we ought to show what public sentiment is in the particular community.

Now, a word in regard to what the gentleman from Wyoming said a moment ago. To the gentleman from Texas [Mr. HARDY] he said:

> Why not accept the amendment to permit the President of the United States, in whom we all have confidence, to say whether or not any of these projects are bad and strike them out?

I suppose Members want to see projects left in the bill when they are all interested in some particular river or harbor. Let us assume the President is going to do what is right. We have given him power to control practically all the affairs of the Government, and have practically turned over $7,000,000,000 to his use, and this food-control question is now in his hands, and can we not turn over to him a little river and harbor bill that carries only about $27,000,000, and let him strike out, if he chooses, any bad project which he thinks ought not to be placed in the bill? It is said that this bill has his approval, and that the War Department has approved it. We do not know whether that is so. But we will have a positive certification of the project when he speaks and says this project or that project is necessary for the purpose of carrying on the affairs of the Government.

I do not care to unnecessarily take the time of the committee. I said when I started out that I was not going to criticize items generally. I propose while a Member of the House to offer criticisms of such bills. Whether they succeed or not is immaterial, providing the criticisms are well founded.

As I have said before, we have spent nearly $900,000,000 on these rivers and harbors. Some of it has been well expended, and it ought to be so spent in the future. Much of it has been wasted. I am in favor of maintaining the channel of the Mississippi River. Bernhard is the only man who in the last five years has had the nerve to build a line of barges on the Mississippi River. I leave to the gentleman from Mississippi [Mr. HUMPHREYS] the standing of Mr. Bernhard. He says it is the best channel of any stream in the world to-day, not excepting the Rhine, and yet Bernhard says in effect there is no need of further expenditures for improvement along the lower Mississippi River. Commerce not deepening of the river is needed.

That is the reason I offered his statement. I supposed he was excellent authority on the subject. I know that he has built a line of barges and has been doing all he can, and the people of this Government would like to see him make a success of it, and we are giving him the best channel in the world, as he says, and all he needs is freight, but the people do not give him freight. That is the trouble with this matter of river navigation as a rule. We need commerce before furthering extravagant projects, and this is significant when we remember the commerce has diminished on practically every river in the country.

The CHAIRMAN. The gentleman from Texas [Mr. HARDY] is recognized.

Mr. HARDY. Mr. Chairman, I shall not use my five minutes, because I think the gentleman from Wisconsin has practically admitted what I charged a little bit ago, namely, that he got the letter he read and gave it to Mr. Callaway to put in the RECORD, and now reads it as coming from Mr. Callaway. Of course this country has been covered with the gentleman's effusions denouncing alleged pork-barrel legislation. Everybody in our country that has taken the least interest for or against waterways knows he is the man to write to if they have anything to say against river improvement. And, of course, Mr. Guyler being disgruntled wrote to Mr. FREAR. I did not expect the gentleman from Wisconsin [Mr. FREAR] to tell me of the public sentiment in my district embracing the territory largely between the Trinity and the Brazos Rivers. I did not demand he should do so; so that excuse for his rereading the Guyler letter will not answer. I knew what that sentiment was, and it was evidenced by the public meetings in the district. It seems to me that just to fill the RECORD with aspersions he reads this letter from this gentleman by the name of Guyler, who charges that we are teaching or are educating our children that it is right to steal from the Government. And he puts that sentence in the RECORD without any disclaimer on his part of his indorsement of it, and when called to task tries to put the indorsement of it on my friend Callaway. And he says Callaway vouched for Guyler. I venture the gentleman will not say that Callaway knew Guyler. All he knew was that a man who signed his name "Guyler" had written it to a Member of Congress by the name of FREAR. Mr. FREAR hands that letter to Mr. Callaway to help Mr. Callaway fill the RECORD with such charges as he is filling the RECORD with every day. And then when Mr. FREAR has received it and got Mr. Callaway to put it in the RECORD last session, he now puts it in the RECORD as a quotation from Mr. Callaway, and says that Mr. Callaway vouched for Guyler.

Mr. FREAR. Will the gentleman say that Mr. Guyler is not a gentleman of high standing in his own State, and the president of banks?

Mr. HARDY. Mr. Guyler lives in a small town of some hundreds of inhabitants named Wallis. He may be the president of a bank; I do not know. He evidently owns some land along the Brazos River where ferry facilities may be interfered with. And the gravamen of his disgruntlement seemed to be, from reading his letter, that certain expenditures are increased to those who put in ferryboats on that river where he owns 3 miles of front. I do not know Guyler, neither do you, and neither did Mr. Callaway, neither did anybody in this House except my friend here [Mr. MANSFIELD] who is for this river and harbor bill. We are all irritated by expenditures we are forced to make, and the gentleman in order to show me what public sentiment in my district is gives one letter from this Mr. Guyler. That is his idea of public sentiment. And then I want to call attention to the utter lack of consistency in the gentleman's position. He is in favor of maintaining the channel on the Mississippi River and spending vast sums for that, at least he so declares in his tortuous speeches, and yet another letter which he inserts, a letter from Mr. Bernhard, says the traffic on the Mississippi is worthless. It is strange to me that he inserts that letter and yet, almost in the same sentence, says he is in favor of keeping up the improvement on the Mississippi.

Mr. Chairman, traffic is going to go down on all inland waterways unless the Government by suitable legislation protects it from the cutthroat methods of railroads who are back of all the opposition to the improvement of canals and inland waterways in this country. I want to see the Government pass proper laws to control the railroads and prevent them from destroying navigation. The gentleman from Wisconsin [Mr. FREAR] wants

the Government to abandon our inland waterways and leave the railroads alone in their monopoly. That is the real difference between us.

Mr. MONDELL. Mr. Chairman, I am sure the gentleman from Wisconsin [Mr. FREAR] does not want to be unfair and does not desire to quote me in an unfair way, but the gentleman did not quote me quite correctly when he said that I approved expenditures for the purpose of reclamation under the color of river and harbor improvements.

What I did say, or what I intended to say, was this: That there are certain classes of river and harbor improvements that are of very great value in reclamation, and it is not an argument against such improvements, I submit to my friend, as he has constantly urged, that in expending Federal money for the primary purpose of aiding navigation you incidentally save many acres of very valuable land.

I think that the fact that incidentally, and in connection with an improvement primarily for navigation, you do reclaim or make possible the reclamation of lands is an added argument for, rather than against, such expenditure.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. In just a moment. And particularly when the improvement is not directly in the line of reclamation, but simply for the maintenance of a river channel, rendering it possible for the individual owner to take advantage of that work to protect his own property.

Mr. FREAR. Does not the gentleman think that in a case of that kind it would be proper for the one who is the beneficiary to pay a proportionate part of the expense, the same as he would in the State of Wyoming for a reclamation project there conducted, as they do, by irrigation? Is it not the same principle that the man who gets the benefit should help pay for it, without placing the burden on the taxpayers of the country at large, for the benefit of that private individual who happens to live along the river?

Mr. MONDELL. I think this may be said of many governmental expenditures, including those for rivers and harbors, that they do benefit individuals and do benefit communities tremendously, and if it were always possible in connection with public expenditures to determine the exact amount of private benefit, and if it were practically possible to levy on the private individual in all cases for his part of the benefit of the improvement, it would be a most excellent thing. But as a practical matter that is often impossible. Many individuals are tremendously benefited by the improvement of great harbors. The great steamship companies that operate in them are very greatly benefited by such improvements as well as small users and the public generally, but it is impossible to determine the exact amount of that benefit, to assess it, and to collect it.

And so with this general work of river and harbor improvement. We have undertaken it as a national work. It does, in benefiting the country as a whole, benefit individuals locally. There is no doubt about that, and when we get to the maintenance of river banks, the maintenance of a fixed and definite channel, there is a very great private benefit, and if the river is one wholly within a State and not navigable to any appreciable degree the Federal Government ought not to undertake that work. But we have a great system of inland waters, particularly in the Mississippi Valley, which we are all using as a sewer and as a drainage channel for all of our lands. We have a responsibility, then, over and above that of improvement for navigation.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I ask that I may have three minutes more.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for three minutes more. Is there objection?

Mr. SMALL. I am not going to object, Mr. Chairman, but reserving the right to object, I want to make this statement: We have spent 15 minutes on the San Diego item and 15 minutes or more on the Los Angeles item, with very little discussion upon the items. The chairman of the committee does not wish to ask the enforcement of the rule, but I will ask Members if they can not confine the discussion from now on to the items themselves? I have no objection.

Mr. MONDELL. Not for the purpose of bringing myself within the rule, but for the purpose of expressing myself upon the matter, I will say that this is a very necessary and important item, and certainly no one can criticize it. The only criticism that could be properly leveled against it would be that it is too small.

But coming back to the question of general river and harbor policy, there is a national duty not only to these great streams, but smaller streams in various places, and the people have recognized that national duty, and we are trying to fulfill that national duty in the river and harbor bill.

Now, I am not inclined to criticize my friend from Wisconsin [Mr. FREAR]. I think he has performed an exceedingly valuable service. I think it is important that some one shall, in the discussion of every river and harbor bill, call attention to and rivet attention upon the questionable items in the bill.

I think that the Committee on Rivers and Harbors owes a debt of gratitude to a man who does that as intelligently as the gentleman from Wisconsin does in the main, because it makes it a little easier, I hope, the next time they take up a river and harbor bill, to turn down questionable items by reason of the fact that it will be fearlessly and emphatically denounced and criticized on the floor. But I do regret that gentlemen performing that exceedingly helpful office do sometimes unconsciously, I think, arrive at a state of mind where they become critics of a great policy that our people have undertaken and which in my humble opinion they will adhere to. We will make mistakes. We will spend money where from the broad national standpoint it is not advisable. We will in some places do work that has perhaps more of the flavor of reclamation than of navigation. But however that may be, with a constant effort to keep the bill within bounds, this great work of the development of our harbors and the improvement of our rivers will, in my opinion, go steadily forward. [Applause.]

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. SMALL. Mr. Chairman, I ask unanimous consent to return to page 19, line 12, for the purpose of offering an amendment.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to return to page 19, line 12, for the purpose of offering an amendment. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from North Carolina.

The Clerk read as follows:

Page 19, line 12, after the semicolon, insert the words "for completing improvement of Lorain Harbor in accordance with House Document No. 985, Sixty-fourth Congress, first session, $63,150."

Mr. SMALL. Mr. Chairman, that amendment was adopted by the Committee of the Whole, but the language was not correct. It was agreed that it could be corrected. So it is offered this morning in correct phraseology, as it should appear in the bill.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

San Francisco, Oakland, Richmond, Monterey, and Humboldt Harbors, Redwood and Petaluma Creeks, Napa River, San Pablo Bay, Mare Island Strait, and Suisun Channel, Cal.: For maintenance, $287,500; continuing improvement of Oakland Harbor, $92,000: *Provided*, That if in the judgment of the Secretary of War the prices received in response to advertisements for bids for dredging are not reasonable, so much of the amount herein appropriated as shall be necessary may be expended for the purchase or construction of a suitable dredging plant; for improvement of Richmond Harbor in accordance with the report submitted in House Document No. 515, Sixty-third Congress, second session, and subject to the conditions set forth in said document, $100,000; continuing improvement of Humboldt Harbor and Bay, $190,500; for improvement of San Pablo Bay and Mare Island Strait in accordance with the report submitted in Senate Document No. 3, Sixty-fifth Congress, first session, if required for naval needs, $330,000; in all, $1,000,000.

Mr. SMALL. Mr. Chairman, I offer a committee amendment.

The CHAIRMAN (Mr. WEBB). The gentleman from North Carolina offers an amendment which the Clerk will report.

The Clerk read as follows:

On page 25, lines 4 and 5, strike out the words "Senate Document No. 3," and insert in lieu thereof "House Document No. 140."

Mr. SMALL. This is merely to correct a clerical error.

The amendment was agreed to.

The Clerk read as follows:

Sacramento, Feather, San Joaquin, and Mokelumne Rivers, and Stockton and Mormon Channels (diverting canal), Cal.: For maintenance, $31,000.

Mr. CURRY of California. Mr. Chairman, I know the House is tired of talk and is ready to vote, and I would not take up the time of the committee if I did not believe it was my duty to explain to the committee the Richmond, Cal., inner harbor project, which in an extension of remarks has been attacked, and which in the minority report has been attacked as a reclamation project.

The city of Richmond is situated on San Francisco Bay, across the bay and 8 miles north of the ferry slips of San Francisco.

In 1901 what is now the city of Richmond was a wheat field and a garden patch. In 1910 it had a population of a little over 6,000 people. In July, 1916, it was a bustling, metropolitan city, with a population of 24,000 people. It is the western terminus of the Santa Fe Railroad, and the Santa Fe has its shops there and employs 600 to 700 men. At Richmond is located the largest oil refinery and distribution plant of the Standard Oil Co., which employs nearly 1,000 men. It is also the location of the largest winery in the world, belonging to the California Wine Association.

In addition to this, there are in Richmond 35 manufacturing plants, employing over 6,000 people, with an annual pay roll of over $6,000,000. Among the manufacturing plants are two powder factories, a percussion-cap factory, a steel plant, a machine shop, rubber works, an automobile factory, a car factory, and so forth.

The Bay of San Francisco last year carried 38,000,000 tons of commerce, of which 9,000,000 tons were ocean-going commerce. Of the 38,000,000 tons 5,000,000 tons were shipped from Richmond, and of the 9,000,000 tons of ocean-going commerce over 2,000,000 tons were shipped from Richmond. All of the commerce from Richmond was shipped over the private wharves of the Standard Oil Co., the California Wine Association, the Santa Fe terminal, and a rock-crushing quarry, with the exception of about 200,000 tons, which were shipped over the municipal wharf, completed about six months ago.

Every person who has been in San Francisco recently and has given any attention to the situation out there knows that the wharfage facilities of the port of San Francisco Bay are not sufficient properly and expeditiously to care for the commerce of that great port. A few years ago the commercial interests around San Francisco Bay looked around to find where the wharfage facilities could be best and most cheaply extended, and came to the conclusion that the Richmond Inner Harbor was the place where that could best be done. The proposition was indorsed by resolutions of the Chambers of Commerce of San Francisco, of Oakland, of Alameda, of Berkeley, of Stockton, Sacramento, and all of the surrounding interested cities and by the State board of harbor commissioners. It was taken up by the War Department and approved by the Secretary of War, and the project has twice passed through this House as an item in the river and harbor bill.

In 1913 the people of Richmond asked the Legislature of California to pass an act permitting them to have the use of the water front of Richmond. That water front is 8 miles long. The bill was passed through the assembly and the senate of California without a dissenting voice, and was signed by the governor. The State of California has no right to divest itself of its proprietary interest in the beds of navigable rivers or of tidelands, but it may by an act of the legislature permit the use of its rivers and tidelands for harbor and commercial purposes by cities and municipalities. In this act, which I shall include as a part of my remarks, the city of Richmond is permitted the use of this land in perpetuity.

The bill is as follows:

Chapter 317.—An act conveying certain tidelands and lands lying under inland navigable waters situate in the bay of San Francisco and the bay of San Pablo to the city of Richmond in furtherance of navigation and commerce and the fisheries, and providing for the government, management, and control thereof. [Approved June 11, 1913.]

Whereas since the admission of California into the Union all tidelands along the navigable waters of this State and all lands lying beneath the navigable waters of the State have been and now are held in trust by the State for the benefit of all the inhabitants thereof for the purpose of navigation, commerce, and fishing; and

Whereas it is the duty of the State to govern, administer, and control such lands and to improve and develop navigation, commerce, and fishing thereon and thereover; and

Whereas the State has not the general power of alienation of such lands, but may, when the interests of commerce, navigation, and fishing require it, convey to municipalities limited and defined areas of such lands with the power to govern, control, improve, and develop the same in the interests of all of the inhabitants of the State; and

Whereas the conveyance to the city of Richmond of the lands hereinafter described, together with the right to govern, control, improve, and develop the same will result in great advantage and benefit to all the inhabitants of the State, it is provided: Therefore

The people of the State of California do enact as follows:

SECTION 1. There is hereby granted and conveyed to the city of Richmond, in the county of Contra Costa, in the State of California, all the lands situate on the city of Richmond side of the bay of San Francisco and the bay of San Pablo lying and being between the line of mean high tide and the line of mean low tide as the same has been or may be hereafter established between the prolongation into the bay of San Pablo of the north boundary line of the said city of Richmond and the prolongation into the bay of San Francisco of the southerly boundary line of the city of Richmond.

SEC. 2. The city of Richmond shall have and there is hereby granted to it the right to make upon said premises all improvements, betterments, and structures of every kind and character proper, needful, and useful for the development of commerce, navigation, and fishing, including the construction of all wharves, docks, piers, slips, and the construction and operation of a municipal belt line railroad in connection with said dock system.

SEC. 3. No grant, conveyance, or transfer of any character shall ever be made by the city of Richmond of the lands described in paragraph 1, or of any part thereof, but the said city shall continue to hold said lands and the whole thereof unless the same revert or be receded to the State of California. The harbor of Richmond shall remain always a public harbor and the said city shall never charge or permit to be charged on any of the premises by this act conveyed any unreasonable rate or toll, nor make nor suffer to be made any unreasonable charge, burden, or discrimination. In the event of a violation of any of the provisions of this act the said lands and the whole thereof shall revert to the State of California.

SEC. 4. The city of Richmond may lease for a term not exceeding 25 years any wharves, docks, or piers constructed by it, and all such leases so executed shall reserve to the council of the city of Richmond the right and privilege, by ordinance, to annul, change, or modify such leases as in its judgment may seem proper. The aggregate amount of all wharves, docks, and piers so leased by said city shall never exceed 50 per cent of all of the wharves, docks, and piers actually constructed.

SEC. 5. The city of Richmond may lease not to exceed an aggregate of 50 per cent of the lands conveyed to it by this act for a term not to exceed 25 years, and upon which wharves, docks, or piers have not been actually constructed, and no such lease shall be for a larger area than 40 acres, and such leases shall not be assignable or transferable, nor shall any lessee have the right to sublet the leased premises or any part thereof except by the consent of the city council of said city of Richmond set forth in an order of said city council, and all such leases so executed shall reserve to the council of the city of Richmond the right and privilege by ordinance to annul, change, or modify such leases as in its judgment may seem proper.

SEC. 6. The foregoing conveyance is made upon the condition that the city of Richmond shall, within 12 months from the approval of this act, exclusive of such times as said city may be restrained from so doing by an injunction issued out of any court of this State or of the United States, and exclusive of such further delay as may be caused by unavoidable misfortune or great public or municipal calamity, issue its bonds for harbor improvement purposes in an amount of not less than $250,000, and shall, within 18 months after the approval of this act, exclusive of the time in this section hereinbefore mentioned, commence the work of such harbor improvement, and the said work and improvement shall be prosecuted with such diligence that not less than $250,000 shall be expended thereon within three years from the approval of this act exclusive of the time in this section hereinbefore mentioned. The said harbor improvement work shall be so done and performed that accommodation will be furnished and maintained for ocean-going vessels and a depth of water shall be obtained and maintained at the piers of not less than 20 feet.

If said bonds be not issued or said work be not prosecuted and completed as and in the manner herein provided, then the lands by this act conveyed to the city of Richmond shall revert to the State of California.

SEC. 7. The State hereby reserves unto itself at all times the reasonable use of and access to all wharves, docks, piers, slips, and quays hereafter constructed under the provisions of this act for any vessel or water craft owned, leased, or operated by the State.

SEC. 8. The city of Richmond shall in the name of the State of California have and is hereby granted the power and authority to maintain and prosecute to final judgment in any court of the State or United States in which jurisdiction may be vested any and all actions necessary to recover possession from any private persons, partnerships, or corporations all or any part of the lands granted in section 1 hereof.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CURRY of California. May I have five minutes more?

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. CURRY of California. In this act the city of Richmond is prohibited expressly from selling any of the land, but it is permitted to lease in small parcels, parts of the land for a period not exceeding 25 years. The acceptance of the conditions of the act of the legislature was submitted to a vote of the people of Richmond, and was approved by a vote of 98 per cent of those who voted at that election, and there was a full vote.

The city of Richmond, by a referendum vote, bonded itself for $1,170,000 to do certain work on the water front under the plan approved by the War Department. Up to last November they had spent $638,000 and at that time had made a contract for $362,000, which would make an expenditure of $1,000,000, leaving a balance of $170,000 in the Treasury.

There is no such thing as a reclamation project connected with the Richmond inner harbor.

Mr. SMALL. Will the gentleman permit an interruption?

Mr. CURRY of California. I will.

Mr. SMALL. I have been very much interested in listening to the description of Richmond Harbor which the gentleman has given, and I now read from the minority report these words, among the items that are criticized:

And an indefinite amount for Los Angeles and Richmond, Cal., both of which last-named harbors show very decided appearance of reclamation schemes.

Mr. CURRY of California. There is not a square foot of reclamation scheme connected with the Richmond inner harbor. It is true that the city of Richmond is filling in the tideland. It has filled in two blocks long of tideland at its own expense. The people there are not asking the people of the United States to contribute any money for that, but it is a municipal improve-

ment in which no human being has any financial interest whatever, and the work does not benefit any individual personal interest any more than it benefits all. I have a photograph that I filed with the committee showing one of the municipal dredges at work during this filling in of the tideland, and another photograph showing the $160,000 grammar school that was erected on part of this filled-in tideland. I have a letter here from the War Department informing me that they were considering the proposition of leasing the municipal wharf at Richmond for a period not exceeding three years, and they wanted to know the terms, which I got and filed with the War Department. After looking into the matter they stated under present conditions right now they did not care to enter into the agreement. They sought that lease themselves, the city did not try to lease it to the War Department.

Now, in regard to the so-called protest that was not filed with me or through me, but was filed with the committee by a gentleman by the name of Loomis, the chairman of the committee was kind enough to tell me about the protest two years ago. Anson Blake, in whose name is filed one of the protests, is a man of good habits but of no business sense. A few years ago he inherited a fortune and he has lost it all in bad business ventures because he did not know how to do business. The last enterprise he started was a rock quarry at Richmond in connection with which he intended to pave streets. From the beginning he lost money. He went to E. S. Pillsbury to finance a belt railroad and the wharf in connection with the rock quarry. Mr. Pillsbury is a multimillionaire, one of the best lawyers in the State of California, about 75 years of age, still maintaining his law offices in San Francisco, and rather liberal in spending money for his own personal wants.

[The time of Mr. CURRY having again expired, he was given five minutes more.]

When it comes to business, Mr. Pillsbury has Shylock skinned a city block. He always nominates in the bond the blood that goes with the flesh. So when Blake went to Mr. Pillsbury he said, "Issue bonds, and I will take the bonds; you take the money and build the belt railroad and the wharf." But Blake did not make the belt road and wharf a financial success, and Pillsbury took it in for the bonds. He now signs his name as president of the belt railroad. He is also owner of the rock-crushing plant, but permits Blake to act as president of the institution for a salary.

Two years ago before election I was down in the city of Richmond, and a friend of mine said, "Pillsbury would like to see you." I said, "All right"; and I went to San Francisco and called on him. He said "CURRY, I want you to quit on the Richmond inner-harbor proposition." I said, "Why do you want me to quit? It is a good proposition, and there are not wharfage facilities enough in the Bay of San Francisco. It is a good thing for Richmond, and the people have approved of it by 98 per cent, and I have told them I would do the best I could to have it passed and incorporated into law." "Well," he said, "you have kept your word to the people of Richmond; it did pass the House once, but the bill did not pass the Senate. Now you don't have to do any more." I said, "Mr. Pillsbury, I am going to pass it if I can." He said, "I don't want you to do that; if the inner harbor is built and the city puts in a belt road, it will interfere with the revenue of my belt road and my wharf." I said, "If I can pass it, I will." He said, "If I can stop you, I will."

So Mr. Pillsbury has sent a person here—employed a Mr. Loomis—who at one time was Second or Third Assistant Secretary of State. He was a lawyer and is now a Washington lobbyist. Mr. Loomis is sneaking around here seeing a few Members and two or three Senators, not thinking that they would speak to me about it. He has met me a number of times but never said anything to me about the protest. He may stop it and get his money, but this is a proposition that ought to go through, for the port of San Francisco needs the additional wharfage facilities. I present the proposition to the Committee of the Whole on its merits; and if it is right, adopt it; and if it is not, cut it out.

Mr. MADDEN. Will the gentleman yield?

Mr. CURRY of California. Yes.

Mr. MADDEN. Does the gentleman think that Mr. Loomis had any influence with members of the committee to get this into the bill?

Mr. CURRY of California. He is opposing, not favoring, the project.

Mr. MADDEN. But his opposition might have got it in. I do not think the statement ought to be made in the House unless the gentleman is able to prove the facts of the case.

M. CURRY of Califonia. I have made my statement.

Mr. MADDEN. I do not know to whom the gentleman refers when he says that Mr. Loomis has lobbied to keep it out. If the gentleman means by that statement that Members of the House have been lobbied with to keep the item out of the bill, he ought to give the names.

Mr. CURRY of California. I will do it if I feel like it.

Mr. MADDEN. I insist upon it. Mr. Chairman, I move to strike out the last word.

Mr. CURRY of California. I will tell the gentleman the name of one Member that he spoke to. One of the gentlemen that Mr. Loomis saw was the gentleman from Massachusetts, Mr. TREADWAY.

Mr. MADDEN. Who else?

Mr. CURRY of California. That is enough.

Mr. MADDEN. I do not think it is. Mr. Chairman, I insist.

Mr. MOORE of Pennsylvania. Mr. Chairman, Mr. TREADWAY is not here.

Mr. TREADWAY. I am here; I was not in at the beginning, but I am here now.

Mr. MADDEN. I have as much respect for the gentleman from California as I have for any man in the House—in fact, I have a great deal of admiration for the gentleman from California—but I do not believe that any Member of the House has a right to make a statement with respect to what somebody who is named as a lobbyist has done with some Member or Members of the House unless he is willing to state who the Members of the House are and what he did and what he said.

Mr. CURRY of California. I did not say that Mr. Loomis had done anything to any Member of the House or had swayed any Member of the House. I said he had seen Members of the House.

Mr. MADDEN. And his influence was exercised——

Mr. CURRY of California. I did not say he had influenced any Member of the House at all.

Mr. MADDEN. The gentleman may not have said that directly, but he left that impression on my mind, and I do not believe an insinuation of that kind ought to go unchallenged without clearing up the facts.

Mr. CURRY of California. Mr. Chairman, I did not say anything that in my opinion could give the gentleman from Illinois any opportunity of drawing the conclusions he seems to have drawn. [Applause.]

Mr. MADDEN. I think the gentleman did, and I do not believe it is the province of any man on the floor of this House to make such statements without stating all of the facts in the case.

Mr. CURRY of California. I did state the facts in the case.

Mr. MADDEN. The people of the United States are entitled to know if there is anything behind the lobby that seeks to influence Members of the House with respect to river and harbor or any other improvement or any other proposition that takes money out of the Treasury of the United States, and I challenge the right of any man on the floor of the House to make such a statement without disclosing everything that he knows about it. We have a right to know, the people have a right to know, and I insist on behalf of the American people that we shall know, and I shall introduce a resolution demanding an investigation if the gentleman does not do it.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. ALEXANDER. Mr. Chairman, I followed the statement of the gentleman from California [Mr. CURRY] with very great interest, and if he said a word that reflected upon any Member of this House I did not catch it.

Mr MADDEN. Of course he did not say anything which reflected upon the Members of the House. He refused to give the names of anyone except one Member.

Mr. CURRY of California. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CURRY of California. Mr. Chairman, I have not reflected upon a Member of this House. I have not said that Mr. Loomis's attempts in influencing any Member of this House were successful. I did say that Mr. Loomis had seen Members of this House and tried to get them not to have this item included in this bill, and I did say that Mr. Loomis had filed Mr. Blake's and Mr. Pillsbury's protest with the chairman of the Committee on Rivers and Harbors, and the chairman of the Committee on Rivers and Harbors did tell me about it.

Mr. MADDEN. The gentleman also said that Mr. Loomis was employed as a lobbyist. What is the business of a lobbyist?

Mr. CURRY of California. I said that Mr. Loomis was employed by Mr. Pillsbury on a contingent fee—that if this did not go into the bill he would get paid, and if it did he would not.

Mr. MADDEN. Did not the gentleman say that Mr. Loomis had been Third Assistant Secretary of State?

Mr. CURRY of California. Yes; Second or Third.

Mr. MADDEN. And that he was afterwards employed and is now employed as a lobbyist, and that as a lobbyist he saw Members of Congress in connection with this item in the bill?

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. TREADWAY. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, I am very much surprised that there should have arisen the strong feeling in reference to a gentleman calling at a Member's office. We all have very frequent calls. A moment ago my friend from California [Mr. CURRY] mentioned that Mr. Loomis had called upon me. There is nothing at all private or confidential in respect to that call, and I am very glad to explain it. It was the privilege of the Committee on Rivers and Harbors two years ago to visit the State of California.

During the course of our trip we visited this very project now under discussion—the Richmond inner-harbor project. One of the gentlemen who showed courtesy to the committee at that time was the gentleman who came to my office a few weeks ago in company of the gentleman from Wisconsin [Mr. FREAR]. At that time I did not recall his name and had forgotten him. I did recall that he had been very polite to us in our tour of California, and that he had been about in various sections of the State with us. I understood at that time that he was connected with a newspaper in the city of Richmond, and I also was informed that he was formerly Third Assistant Secretary of State here in Washington under a previous administration. As I say, a few weeks ago that gentleman came to my office—as polite a gentleman as any man can desire to meet under any circumstances, a gentleman if I am any judge of one. He referred to the Richmond Harbor project as being a land-development scheme. I knew nothing about his being a lobbyist, so called, until later on the gentleman from California [Mr. CURRY] told me that he understood that Mr. Loomis was here in the employ of some private interests opposed to the Richmond Harbor project. Of that I knew nothing, except the word of Mr. CURRY, which, of course, I am only too glad to accept as correct. Whether or not Mr. Loomis is so employed I have no knowledge. Mr. Loomis later on, under the letterhead of the Metropolitan Club, of this city, sent me some pamphlets, of which the gentleman from California [Mr. CURRY] has copies, showing the possibility of the development of the Richmond Harbor project as being beneficial to the sale of certain lands. Whether or not those lands had anything to do with the project under discussion I am unable to say. The gentleman from California [Mr. CURRY] knows the location very much better than I do.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. MADDEN. When the Committee on Rivers and Harbors went to California did they visit the site of this improvement?

Mr. TREADWAY. We did.

Mr. MADDEN. Did the committee reach any conclusion in respect to whether there was a land scheme in it then?

Mr. TREADWAY. There was no formal committee meeting during the trip to California. Personally I am free to say that I was not impressed with this being a land scheme, but there are in existence certain circulars showing that the adoption of the project will be beneficial to private interests. Indirectly, perhaps, that could be called a land scheme, but I charge neither the gentleman from California [Mr. CURRY] nor the gentleman from the city of Richmond, Mr. Loomis, with in any way trying to bring undue influence either for or against this project from the viewpoint of a land scheme.

Mr. CURRY of California. Mr. Loomis is not from Richmond.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. TREADWAY. Mr. Chairman, I ask unanimous consent to proceed for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TREADWAY. The gentleman from California says that Mr. Loomis is not from Richmond. We met him in Richmond, and that is all I know about it, but I do wish to absolve the gentleman from California [Mr. CURRY], as well as these other gentlemen, from any effort whatsoever at using any undue influence upon any member of the Committee on Rivers and Harbors, either for or against a project, in the nature of any lobbying.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. DUPRÉ having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the amendments of the House to the bill (S. 2453) to authorize condemnation proceedings of lands for military purposes.

The message also announced that the Senate had passed the following resolution, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 7.

Resolved by the Senate (the House of Representatives concurring), That the Congress has heard with profound satisfaction the assurance of Special Ambassador Bakhmetieff of the devotion of the Russian people and their constituted representatives to their new-found liberties and to their determination to defend and maintain these liberties and institutions; and be it further

Resolved, That it is the earnest hope of the Congress that democracy and self-government may bring to the people of Russia that large measure of propriety, progress, and freedom which they have brought to the people of America, and that Russia may be entirely successful in her concerted efforts to secure the unequaled blessings of an honorable and enduring peace.

RIVER AND HARBOR APPROPRIATION BILL.

The committee resumed its session.

Mr. FREAR. Mr. Chairman, may I proceed for 10 minutes? This is the last project I expect to speak on.

Mr. SMALL. Mr. Chairman, I must object.

Mr. FREAR. This is the last project I expect to speak on, and it involves $455,000. [Applause.]

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FREAR. Mr. Chairman, I want the gentlemen of the committee to concede I have not taken as much time as usual. [Applause.] Let me join with the gentleman from Massachusetts [Mr. TREADWAY], who just spoke, in the eulogy which he pronounced upon my friend from California [Mr. CURRY], and also let me state that the gentleman from California, Mr. Loomis, former Assistant Secretary of State, never suggested to me anything improper when he spoke to me about this project. I had been over this tract when out in San Francisco, not as a member of the committee, but I was called over there to look at the project by people who at that time claimed they were taxpayers and who said that the city of Richmond proposed to raise a large amount of money unnecessarily for the Government to carry on this proposed improvement of the harbor. That was the reason given me. I went over the project; went over a share of it in an automobile, because some of this land is under water, practically, so shallow—that is, if it was the land pointed out to me correctly—there is no possibility of a harbor there without great expense, and it will be a land-reclamation scheme and be of especial benefit to landowners there. I did not rise in opposition to the item at all and had no expectation of speaking on it until criticism was made by the chairman as to the statement on this project contained in the minority report, so it involves a statement at this time. This, in my judgment, is a land-reclamation project. The gentleman from California [Mr. CURRY] says not. Well, that is for Congress to determine, and it may be an individual judgment which I have from having seen it and having had the project pointed out by, let me say, a gentleman who is a large taxpayer of Richmond. I now desire to read from Document No. 515, page 2, wherein the board states, in its report to the office of the Chief of Engineers:

The board states that the plan now proposed would confer special benefits to the immediate vicinity, would add largely to the taxable property of the city, and would give value to the city land yet to be improved.

Turning over to page 5:

The board recognizes that it may be desirable in the near future to add to the terminal facilities within the harbor of San Francisco, but it believes that the plan now proposed would confer special benefits to the immediate vicinity, would add largely to the taxable property of the city, and would give value to city lands yet to be built up.

Again, on page 10 of this official report, Document No. 515:

The area covered by the proposed harbor has been divided into tide lots and sold by the State of California to individuals. The validity of the title of these lots is in question, but it appears that when such lots are permitted to be reclaimed the title becomes good. It will be necessary to deposit dredged material on such lots as lie shoreward of the proposed bulkhead line and on adjacent swamp lands and on the lots crossed by the dike and training wall.

Now, that was in 1914, when the report was submitted. I received this statement subsequently, and let me say this was sent me by Mr. Loomis. I met Mr. Loomis in Oakland when I was there. These papers were handed me several days ago by Mr.

Loomis, he stated what the papers were and whether they were of value for investigation on this proposition, and I told him the committee had reported the bill, and that the minority report had been made. I told him that Mr. TREADWAY was then looking after the minority report, and I advised him if he cared to meet him I would be very glad to introduce him to Mr. TREADWAY. That is all that was said outside of the papers presented. The bill was then reported and the item was not opposed on the floor. It has now been discussed, and now I am going to read from a paper Mr. Loomis handed me, a certified copy of a protest signed by a number of taxpayers. Let me show you how many taxpayers there were. There were 1,377 taxpayers of the city of Richmond in 1915, and 700 taxpayers, as I understand, added to that, who protested against the project, and this is a certified copy. Now, here is what they say in regard to it:

The undersigned, who are all enrolled taxpayers of the city of Richmond, Cal., hereby respectfully protest to your honorable committees against any further appropriations by the United States for the so-called inner harbor within said city of Richmond, upon the grounds that the said project has already involved the city in a large debt to no useful purpose; that the same is absolutely impracticable, and was put on foot by real estate speculators, contractors, and others to further their own interests at the expense of the city and its taxpayers, who will reap no benefit therefrom. That this project will, if prosecuted, needlessly create a much greater debt upon the city and turn away legitimate business enterprises from it.

Now, as I said, I expected to make no comment on this project. The report had then been made and the bill was completed, and I simply intended to say something if any criticism was made of the minority report.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. FREAR. If the gentleman makes it short.

Mr. MADDEN. I would like to know what the inner harbor improvements consist of. How much it is going to cost the Government to fill this land according to the engineer's report?

Mr. CURRY of California. Will the gentleman yield?

Mr. FREAR. My time is limited.

Mr. CURRY of California. I will ask to have the gentleman's time extended.

Mr. FREAR. I am afraid the chairman will not consent to it. Will the gentleman ask now if he can get me five minutes?

Mr. CURRY of California. I ask unanimous consent for five minutes more for the gentleman from Wisconsin.

Mr. DEMPSEY. Will the gentleman yield?

Mr. FREAR. I can not afford interruptions unless I can have extra time.

Mr. MADDEN. The gentleman did not answer my statement.

Mr. FREAR. I was going to state that something like $450,000 is the amount of the project named in the bill.

Mr. MADDEN. What is the nature of the improvement?

Mr. FREAR. To dredge out the harbor where there is no water, or a few feet of water, say, 4 or 5 feet of water, to a depth sufficient to bring up large vessels there. I have set out the facts in the RECORD. I can not afford to discuss them here, because there is so much to cover, but I want to say here that the gentleman from California [Mr. CURRY] referred to Pillsbury's statement. He has given you his estimate of Mr. Pillsbury.

I know nothing about the gentleman whatsoever, except that he is president of the Richmond Belt Line Railway and has made a strong argument against the project. There are other protests against that project. There are protests from those representing one-fourth of the taxable property of the city opposing this proposition. There are several other statements here that have been handed me. This further article was sent to me from the Army and Navy News, of San Francisco. It contains a number of real estate advertisements of the city of Richmond over the signature of Mr. Rees, who is a lieutenant colonel of Engineers. I submit to the House that when a statement is given by a Government official in a case of that kind, and surrounded by real estate advertisements, as it is, on both pages of this publication—and here is a large diagram of the project surrounded by advertisements—when Government officials place their seal on the project in that form, the proposition leads to conviction that there are real estate interests connected with this proposition. That statement is supported, as I said, by an affidavit, or a protest, signed by 1,300 people——

Mr. DEMPSEY. Is it an affidavit? Is it verified and is it acknowledged?

Mr. FREAR. It is verified and acknowledged. I am simply offering evidence which is offered here on a project of which I did not intend to speak until criticism was made of the item. This lieutenant colonel is given a conspicuous place in all the advertisements. His picture is shown here. This is a newspaper that has page after page of advertisements of this proposed harbor and of the harbor real estate scheme, of people that have lands for sale; and I say that a Government engineer's picture, with these write ups, indicates that there is a strong effort to connect the Government with private interests. I have seen the harbor, and it looks to me, Mr. Chairman, as evidence of a land-reclamation project.

Now I understand there are other land-reclamation projects that have been justified here on the floor of the House. I have made no especial attack upon them and I have made no attack on this item. It is in the bill. But it does not seem to me it is the province of the Government at this time to go into these projects.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent that my time may be extended one minute.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FREAR. I wish to say to the gentleman from California [Mr. CURRY] that I have the highest respect for him. He has treated the matter very courteously. He knows my opposition to it, and it is founded, as I said, precisely upon the facts as given. I know he believes this is a good proposition. It is a proposition in his own district, and I have not criticized his advocacy of it. Now, $455,000 by the Government is the part, I understand, we are to appropriate, and $100,000 of it appears in this bill.

Mr. CURRY of California. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

Mr. LENROOT. Is there any amendment pending before the committee?

The CHAIRMAN. The Chair is advised that there is no amendment pending. The gentleman from California asks unanimous consent to proceed for two minutes.

Mr. LENROOT. I understand there is no further time to be extended.

Mr. MADDEN. I object.

Mr. SMALL. Does the gentleman from Illinois desire time?

Mr. MADDEN. I might, but I might not. I will make the request when the time comes.

Mr. SMALL. Can not we have a consent, then, for four minutes?

Mr. MADDEN. I do not want any consent now. I am perfectly willing to let the matter of the gentleman from California [Mr. CURRY] go on its own merits.

The CHAIRMAN. The gentleman from California [Mr. CURRY] asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. CURRY of California. Mr. Chairman, Col. Rees, whose name has been brought into this proposition, is in the Philippine Islands, and has been there for over a year. He was succeeded in California by Col. Burr, who in turn was succeeded by Col. Heuer, who is now in charge. Col. Rees owns no property and has no financial interests in Richmond.

This is a project to dredge a channel 600 feet wide, 20 feet deep, with a turning basin of 1,800 feet. The dredging will be about 3½ miles in length, and it will leave on each side of the channel about 2 miles for wharves.

Mr. MADDEN. What does it connect?

Mr. CURRY of California. It will cost the city of Richmond $428,000 and the United States Government $428,000 to dredge the channel, and the city of Richmond has already spent $1,000,000 out of a bond issue of $1,170,000 on harbor work connected with the inner-harbor project.

Mr. MADDEN. Does that connect with the open sea or the bay?

Mr. CURRY of California. It connects with the bay northeast of the Golden Gate, right in a cove. The land is tideland covered to a depth of from 3 to 15 feet when the tide is in.

Mr. MADDEN. Is it usual for the Government of the United States to build interior harbors for cities?

Mr. CURRY of California. It is not building an interior harbor for the city. The Government of the United States appropriated $92,000 for Oakland. It has appropriated over a million and a quarter dollars for New York in this bill, and this is only $428,000. One hundred thousand dollars is proposed to be appriated at this time.

Mr. MADDEN. New York City has an open harbor to the world.

Mr. CURRY of California. This is an open harbor, absolutely free and open to the world. It is closer to the ocean than New York Harbor is.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Coquille, Coos, Siuslaw, and Yaquina Rivers, and Coos, Tillamook, and Nehalem Bays, Oreg.: For maintenance, $34,000; continuing improvement of channel over the bar at Coos Bay, $70,000; in all, $104,000.

Mr. HAWLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oregon offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAWLEY: Page 25, line 13, strike out the period, insert a colon, and the following:

"*Provided*, That hereafter the project depth for the inner harbor of Coos Bay, Oreg., shall be 22 feet from the entrance of Smiths Mill."

Mr. HAWLEY. Mr. Chairman, the purpose of this amendment is this——

Mr. MADDEN. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Illinois reserves a point of order on the amendment.

Mr. HAWLEY. I do not desire to take the time of the committee in discussing the merits of the proposition until the point of order is decided.

Mr. MADDEN. I will withhold the point of order until the gentleman makes an explanation. It is not germane to this bill.

Mr. HAWLEY. I can not see how it is subject to a point of order. It deals with a subject matter in this paragraph and is germane to it and to the bill as a whole.

Mr. MADDEN. But it is new law. It is a new project. It has not been passed upon by anybody, so far as we know. It changes the whole law connected with this improvement.

Mr. HAWLEY. The bill is made up of many projects in which the law is changed, and in which additions to existing law are made. It is necessary that a bill of this character should have these features.

The CHAIRMAN (Mr. BORLAND). The river and harbor bill is an appropriation bill and a legislative bill.

Mr. MADDEN. Well, while the river and harbor bill is an appropriation bill and a privileged bill, it can not come in here as a privileged bill and have anything in it that is not privileged if it stood alone, and if the proposition that the gentleman brings in here were presented alone to the House in the form of a bill, it would not have any privilege. It would have to take its chances on the calendar.

Now, the gentleman can not come in with a proposition to amend this section of the bill, which would not have any standing if it stood by itself. The committee itself could not bring in a proposition on this bill that in itself was not privileged.

That question was settled the other day when the gentleman from Mississippi [Mr. HARRISON] was in the Chair, and he made a decision in favor of a point of order that was made, which the committee afterwards overruled; but there never was a fairer decision by any man than the decision made by Mr. HARRISON on that occasion, notwithstanding the fact that those vitally interested in the proposition overruled the decision of the Chair.

Mr. HAWLEY. Mr. Chairman, will the gentleman permit a question?

Mr. MADDEN. Certainly.

Mr. HAWLEY. Does not the bill under which we are proceeding contain some new projects?

Mr. MADDEN. No. If anything comes along on this bill, it comes along under the authority of the Secretary of War or by the recommendation of the Chief of Engineers, and it appropriates money to start or continue improvements.

Mr. HAWLEY. This amendment is based upon the recommendation of the Secretary of War.

Mr. MADDEN. Wait a moment. This amendment that the gentleman proposes does not appropriate any money. It comes in here and changes the entire project. It changes the depth of the channel.

Mr. HAWLEY. It is less than is otherwise proposed. For present purposes this additional depth will suffice, although I think the depth of 25 feet should have been recommended.

Mr. MADDEN. But that changes the law, and I contend that this committee could not report the proposition that the gentleman is suggesting to the House without its being subject to a point of order.

Mr. HAWLEY. Every new project in the bill changes the law.

The CHAIRMAN. As to the suggestion of the gentleman from Illinois [Mr. MADDEN], the Chair is of the opinion that this amendment is germane to this section and is in order on this bill, unless the gentleman from Illinois has some proposition bearing on the privileged status of the bill that controverts that.

Mr. MADDEN. The Chairman is in the chair and is going to rule, and I am not going to raise a question about his right to rule. But I maintain that a privileged bill can not contain an item that is not privileged in itself. Even a river and harbor bill can not do that. The Committee on Rivers and Harbors has not the power to report a privileged bill containing appropriations for river and harbor improvements and report items on that bill which of themselves would not be privileged. I maintain that the item suggested by the gentleman from Oregon, if presented on the floor of the House in the form of a bill, would not have privilege under the rule; that it could not be called up except on Calendar Wednesday, or on the call of committees, or by direction of the House under a separate rule; and that being the case it is not in order on this bill at this time.

The CHAIRMAN. The Chair is ready to rule. The Chair is of opinion that the proposition is germane to this section. It was reported by the committee originally and is in order now. The Chair overrules the point of order.

Mr. HAWLEY. Mr. Chairman, in 1913, 1914, and 1915 the port commission of Coos Bay expended over $650,000 on the inner harbor, under the supervision and direction of the engineers of the War Department. They obtained a depth of 25 feet from the entrance to Smiths Mill. They maintained that depth for some time. Recently a survey was made of the inner harbor. That survey was authorized in a recent river and harbor bill. A favorable report was made by the district engineers. The Board of Engineers also favorably reported upon the project, and it is approved by the Secretary of War and the Chief of Engineers for a depth of 22 feet.

I am submitting this as an emergency matter. The present project depth is 18 feet in the inner harbor. It will be a misfortune if the $650,000 expended by the port commission to get a suitable depth of water, which they absolutely need for their commerce, should be lost and the Government should not have an opportunity of spending the money that is provided for in this bill in maintaining that depth of 22 feet which the engineers recommend as necessary for the commercial needs of that waterway.

In addition to the large lumber mills and ordinary commercial enterprises there are shipbuilding plants which have been building wooden ships, and I understand, will build some wooden ships for the Government. It is the only port south of Portland on the Oregon coast, a distance of about 400 miles, into which the larger vessels can enter and from which they can go out at their convenience. The depth of water on the bar will admit of the passage in or out of vessels drawing a considerable depth of water, and it will be a place in which Government vessels in case of necessity can go in the future as in the past to seek the repairs they need. The gentleman from Washington [Mr. MILLER] reminds me that one ship which sought refuge there saved a great many lives by so doing, and that it could not have gone in except for the enterprise of these people.

I am submitting this on its merits. Here is a project which has cost the locality $650,000. The engineers recommend 22 feet, and I am asking the committee if, in their judgment, it is not wise to save the 22 feet now obtained at no cost to the Government and to increase the present project depth from 18 feet to 22 feet, so that the money appropriated in the bill may give the commerce going in and out of there a channel of 22 feet. All the vessels serving that section can not be accommodated any more on 18 feet of water. They can not load to anything like their capacity, and to go in for less is a continual loss. I trust the committee will approve this amendment.

Mr. SINNOTT. Will the gentleman yield?

Mr. HAWLEY. I will.

Mr. SINNOTT. Is not this the harbor through which the Government timber, or the great majority of it, cut on the west coast, or in Oregon, will seek an outlet?

Mr. HAWLEY. A vast amount of Government timber, some fifty or more billion feet, will seek an outlet through this harbor in course of time, I suppose.

Mr. SMALL. Mr. Chairman, the gentleman has presented this amendment seriously, and, of course, it is entitled to the serious consideration of the committee; but the amendment ought not to be adopted. The present project provides for a depth of 18 feet in Coos Bay from the bar up to Marshfield, a distance of about 13 miles. The gentleman from Oregon [Mr. HAWLEY] says that a report has been submitted recommending this new project. I was not aware of it, and so far as I know it has not yet reached the committee, and I am sure the gentleman will say it was submitted very recently. It has never been considered by the committee, and because of the lack of time since the report was submitted to Congress we have had no opportunity to consider it.

I will say that this appropriation not only provides for $3,000 for the maintenance of Coos River, but also $70,000 to-

ward the completion of the project of 18 feet in Coos Bay, and in view of this appropriation for the continued improvement of a project which has been already adopted, I think the new project which is sought to be introduced as an amendment to this bill may well await future consideration. It is not believed that it is a matter of sufficient urgency to induce the committee to depart from the limitations which have been imposed by the River and Harbor Committee in the formulation of this bill, and I hope the Committee of the Whole will defeat the amendment.

Mr. HAWLEY. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. HAWLEY. Will not the gentleman agree that where localities have expended such very large sums of money in making improvements that are necessary and that will undoubtedly be continued, it would be a very wise policy to preserve them when they are so made?

Mr. SMALL. I did not intend, in anything I said, to disparage the new project. While I have not seen the report, doubtless it contains strong reasons in its favor, or it would not have been so reported. I am only suggesting that the amendment ought not to go into the bill, and that there is ample time in the future for its consideration.

The CHAIRMAN. The question is on the adoption of the amendment of the gentleman from Oregon [Mr. HAWLEY].

The question was taken; and on a division (demanded by Mr. HAWLEY) there were—ayes 18, noes 24.

Accordingly the amendment was rejected.

The Clerk read as follows:

Cascades and Dalles-Celilo Canals, Oregon, Columbia River and tributaries above Celilo Falls to the mouth of Snake River, Oreg. and Wash., and Snake River, Oreg., Wash., and Idaho: Continuing improvement and for maintenance, $70,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. I do not know that I am altogether gratified——

Mr. SMALL. Mr. Chairman, I wish to make a request for unanimous consent.

Mr. MOORE of Pennsylvania. I hope this will not be taken out of my time.

Mr. SMALL. No; it will not. I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

The CHAIRMAN (Mr. BORLAND). The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, I do not know that I am altogether gratified at the announcement just made by the gentleman from Wisconsin [Mr. FREAR] that he has made his last important speech on this bill. I know of no one who derives more satisfaction and more entertainment from the luminous addresses of the gentleman from Wisconsin than myself. He has become an expert upon the subject of waterways in the United States and gives more or less information to the Congress and to the public from time to time. Sometimes I do not agree with the accuracy of all the information that he presents, as, for instance, in the case of the Chesapeake & Delaware Canal, concerning which he speaks with very great persistency upon the minority side. I find in the RECORD of yesterday morning an extension of remarks by the gentleman from Wisconsin [Mr. FREAR], which I would much rather he had delivered upon the floor in person, because with his entertaining manner and his fine delivery what he said would have been more effective so far as most of the Members of the House are concerned. But had he delivered the speech which he extended in the RECORD it would have given us an opportunity to have checked up some of his utterances and to have corrected a few of the remarks he made as he proceeded on his waterway. [Laughter.]

The gentleman took occasion in this extension of remarks to attempt to undo what the House had already done with respect to the Chesapeake & Delaware Canal. He chastised that project again, just as he has chastised it in previous speeches and just as he chastised it in the minority report which he wrote and which reflected upon several other projects.

Mr. MADDEN. Will the gentleman yield to me for a question?

Mr. MOORE of Pennsylvania. Yes.

Mr. MADDEN. Does the gentleman want somebody to filibuster on this bill? Because if he does, I would like to do it.

Mr. MOORE of Pennsylvania. No; I wish the gentleman would take his seat. Much as I like to hear the gentleman from Illinois talk, I like more to hear the gentleman from Wisconsin.

Mr. MADDEN. I should like to filibuster, if that is what the gentleman wants.

Mr. MOORE of Pennsylvania. No; I acquit the gentleman from Illinois as well as the gentleman from Wisconsin——

Mr. TREADWAY. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. TREADWAY. The gentleman is unfortunate in giving the gentleman from Wisconsin undue credit, if there is anything wrong in the report, as to the Delaware & Chesapeake Canal. I regret to say that I shall have to shoulder all the blame in that respect.

Mr. MOORE of Pennsylvania. The gentleman from Massachusetts was just as inaccurate and as thoroughly misinformed in regard to that project as was the gentleman from Wisconsin. They were as inaccurate as two peas in a pod. [Laughter.]

Mr. GOOD. Will the gentleman explain the inaccuracy of two peas in a pod?

Mr. MOORE of Pennsylvania. I will add the gentleman from Iowa, and that will make three peas in a pod. [Laughter.] Mr. Chairman, these little pleasantries having passed over without harm, the gentleman from Wisconsin having promised to make no more speeches on the bill, I take occasion to undertake to convert him and the gentleman from Illinois to the necessity for the passage of this bill as a war emergency.

Mr. HAMLIN. Will the gentleman from Pennsylvania make the same promise to the House as did the gentleman from Wisconsin? [Laughter.]

Mr. MOORE of Pennsylvania. The Missouri River having been safely tucked away in the bill, I assume the gentleman from Missouri is ready to have the bill passed.

Mr. WALSH. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. WALSH. I would like to ask the gentleman if he has heard that the chairman of the Rivers and Harbors Committee expects to complete the consideration of this bill to-day?

Mr. MOORE of Pennsylvania. Yes; the gentleman from North Carolina said that when the gentleman from Cape Cod was absent; he said he hoped he might get through with the bill to-day.

Mr. WALSH. He said it in the presence of the gentleman from Massachusetts, and directly to him.

Mr. MOORE of Pennsylvania. Mr. Chairman, how much time have I remaining.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. I ask unanimous consent to proceed for five minutes in my own time.

Mr. JOHNSON of Washington. I ask for the regular order.

Mr. WALSH. I object.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for five minutes. Is there objection?

Mr. WALSH. I object.

Mr. MOORE of Pennsylvania. The gentleman from Cape Cod objects, I understand.

The Clerk read as follows:

Willamette River above Portland and at Willamette Falls, Yamhill and Clatskanie Rivers, Oreg.; Cowlitz, Lewis, and Grays Rivers, Wash.: For maintenance, $48,300; completing improvement of Willamette River around the Willamette Falls at Oregon City, Oreg., in accordance with the report submitted in House Locument No. 1060, Sixty-second Congress, third session, $80,000; continuing improvement of Lewis River, including North and East Forks, $13,500; in all, $141,800.

Mr. TREADWAY. Mr. Chairman, I move to strike out the last word. Some days ago the Chesapeake & Delaware Canal item was argued pro and con for an extended time.

Mr. SMALL. Will the gentleman from Massachusetts yield for me to make a unanimous-consent request?

Mr. TREADWAY. Yes.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this item and amendments thereto close in five minutes.

The CHAIRMAN. Is there objection?

Mr. MOORE of Pennsylvania. I desire five minutes on this.

Mr. SMALL. I will make it 10 minutes, Mr. Chairman.

Mr. FREAR. Make it 15 minutes; I desire 5 minutes.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that we close in 15 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this item and amendments thereto close in 15 minutes. Is there objection?

Mr. WALSH. I object.

Mr. TREADWAY. Mr. Chairman, the gentleman from Pennsylvania has seen fit to recur to an item in the bill which was passed several days ago, and I am afraid that the gentleman from Pennsylvania is filibustering in order not to permit us to

get through with the bill this afternoon. I can not see any other object in his recurring to the item for the Chesapeake & Delaware Canal. I, for one, after careful perusal of the reference to which he has called attention, do not see any inaccuracy in the minority report. In other words, he said we were as much in error as two peas in a pod. Now, there is great similarity between peas in a pod in all that I have ever shelled or eaten. It must be a very fair statement if he can not find any worse criticism than that.

But be that as it may, I have a feeling that this House made a grievous error when it failed to support the decision of the presiding officer who ruled this item was out of order. That matter has been referred to by my colleague, the gentleman from Massachusetts [Mr. GILLETT], wherein he said that the decision was overruled not on its merits but on the desire of various Members in favor of this bill to stick together. That is where very frequently this criticism comes in that there are in this bill items—call it pork or pudding or what you may—that are unjustifiable. I did not speak against the Delaware & Chesapeake proposition when before the House, but I do say that it is unjustifiable in spite of the fact that the president of the Inland Waterways Commission is particularly anxious for its adoption. We are correct when we say that it will cost this Government eight to twelve million dollars and that it is not a war project. The gentleman from Mississippi, Chairman of the Committee of the Whole House, should have been supported in his decision when he ruled it out of order. It does look as if this House was open to the very serious charge in the minds of the people of the country that we are not considering such projects as these on the merits and that there is an undercurrent or a league, as it might be called, to get these projects through. That is why the able and correct decision of the gentleman from Mississippi, Chairman of the Committee of the Whole, was not sustained. It was not on its merits, it is not on the merits of the project itself, but rather that the able defender of the project and the president of the Inland Waterways Board wanted to see his pet project put through. If we are in error in the minority report and differ as much as two peas in a pod, all well and good. I am willing for one to stand on the statement made in the minority report whether it pleases the gentleman from Pennsylvania or not.

Mr. SMALL. Mr. Chairman, I move that all debate on the paragraph and the amendments thereto be now closed.

The CHAIRMAN. The gentleman from North Carolina moves that all debate on the paragraph and amendments be now closed.

The motion was agreed to.

The Clerk read as follows:

Columbia and lower Willamette Rivers below Vancouver, Wash., and Portland, Oreg., and mouth of Columbia River, Oreg. and Wash.: Continuing improvement and for maintenance, $310,000: *Provided*, That of the funds herein appropriated $6,000, or so much thereof as may be necessary, may be expended in completing improvement at Cathlamet, Wash., in accordance with the report submitted in House Document No. 120, Sixty-third Congress, first session.

Mr. HAWLEY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 26, after line 13 insert the following as a new paragraph:

"For the improvement of the Yaquina Bar and Harbor in accordance with the report of the Chief of Engineers, United States Army, submitted to Congress on May 2, 1917, in House Document No. 109, Sixty-fifth Congress, first session: *Provided*, That the improvement shall not be undertaken until local interests have made available for the use of the Secretary of War under such rules and regulations as he may prescribe, one-half of the cost of such improvement, but when such one-half of the cost has been so provided the improvement shall be proceeded with."

Mr. LENROOT. Mr. Chairman, this is a new paragraph which is being offered by the gentleman from Oregon and I desire to be recognized on the paragraph in the bill which was read. I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin is recognized, and the amendment of the gentleman from Oregon will be considered pending.

Mr. LENROOT. Mr. Chairman, I desire to say a word with reference to the failure to include in this bill an appropriation of $975,000 for the improvement of the mouth of the Columbia River which was included in the last bill and was included in the estimates made for this bill. It is interesting to learn how this item of $975,000 was excluded from the bill when reported to the House. The hearings disclose the fact that it was included until the conclusion of the consideration of the bill had almost been reached. This bill, it should be remembered all of the time, is being considered as a war measure.

It will also be remembered that there was a special report made by a special board as to what improvements were absolutely necessary for our Navy, and when the bill had been almost concluded by the committee it was then observed that this war measure did not include a single item, with one exception, that of the East River, of New York, for these absolutely necessary improvements that this special board had reported as essential for the purpose of carrying on the war. Evidently it was determined to keep the bill down to about $28,000,000, and when this error had been discovered it was necessary to increase the appropriations to take care of these absolutely necessary war appropriations by about $971,000. It is interesting to read from the hearings as to how this was taken care of. I read now from the testimony of Col. Newcomer:

I might interject a remark at this point which will possibly ease the minds of the members of the committee to some extent by stating that the additional items which will be recommended amount to $971,000; but, by good fortune, I can recommend a reduction of $975,000 in another item, which has just come to my knowledge, the improvement at the mouth of the Columbia River, which involves the jetty work, and for which there was an estimate here of $975,000 for bringing it to completion. I have just had a report from the district officer showing that that work should be suspended, apparently, at this time, on account of the great cost involved and the fact that the jetty has now been brought up to what they consider a fair grade for several years, so that the estimate that has been proposed for that item can be reduced by that amount, and the changes that will be recommended will leave the total in the bill substantially as it was before.

Mr. Chairman, what a commentary it is upon the way these bills are being framed! Nine hundred and seventy-five thousand dollars claimed to be absolutely necessary in this time of war, included in this bill up to the last moment, passed upon by the Board of Engineers, and then suddenly on a telegram from the district engineer out in the State of Washington saying it was not needed this board finds all at once that it is not necessary at all!

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. JOHNSON of Washington. Is it not rather an evidence of the honest efforts of the district engineers in charge of river and harbor work on the North Pacific coast to faithfully serve their Government?

Mr. LENROOT. I am not complaining at all of the district engineers. The complaint I make is that that knowledge should have been in the possession of the Board of Engineers here before urging $1,000,000 in this time of war, rather than to insist upon its being incorporated, and then upon a telegram from a subordinate officer, a district engineer, saying now that they find it is not necessary.

Mr. SINNOTT. What the gentleman read is evidently all of the data that the committee had upon which to reject the item.

Mr. LENROOT. Oh, that shows absolutely on the face of it.

Mr. GOOD. If I understand the gentleman, here was $900,000 that was dropped from the bill—an item that was intended to aid in the prosecution of this war—in opposition to the recommendation of the Secretary of War and on the sole recommendation of some minor official out on the Pacific coast?

Mr. LENROOT. Yes.

Mr. GOOD. Is that the way we are determining what is necessary to prosecute this war? Are we depending upon the reports coming in from district engineers up and down the coast, or does the Secretary of War have some knowledge of this subject?

Mr. DUPRÉ. We brought that knowledge to the committee's attention, and therefore it was dropped because the Secretary of War, through Col. Newcomer, informed the committee it was not necessary.

Mr. GOOD. I know; but is this engineer out on the Pacific coast conducting this war?

Mr. LENROOT. Mr. Chairman, I can not yield further. I want to say this: That the Secretary of War, on a telegram from a subordinate officer in a matter involving a million dollars, takes the judgment of the subordinate officer and does not exercise any of his own.

Mr. DUPRÉ. Whose else should he take?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. HAWLEY. Mr. Chairman, the amendment which I have proposed is for the improvement of Yaquina Bar and Harbor, and is based on the favorable report of the Chief of Engineers submitted May 2, 1917, in House Document No. 109, of this Congress, in which are stated the reasons moving them to a favorable report on this project. Since that report was submitted the people of that locality have, under the laws of the State of Oregon, formed a port commission.

Recently there was submitted to the people on the Yaquina watershed in Oregon the question of bonding the port to secure

money with which to proceed with the improvement. The people voted the bonds. If we wait until the next bill is passed in the succeeding Congress all the operating period of this year will be lost. The people of this section of the country have submitted to the engineers in Washington and to myself a proposal for immediate operations, stating they were ready to put up their money and proceed with this improvement and desired authority to do so. In order that their money may be safely and wisely used they desire to have it expended under the direction of the engineers. In fact, they can not modify or change the harbor lines without the consent of the engineers in Washington. The amendment I have proposed authorizes the Secretary of War to receive the money raised by the sale of bonds and to use it in the construction of this improvement, which is recommended by the engineers, approved by the Board of Engineers for Rivers and Harbors and the Secretary of War, and is regular in all respects. Now, these people are thoroughly convinced, and have so voted, that the waterway is worthy of support and are providing funds to the extent of $418,000. There have been submitted to the War Department from large timber owners undertakings in writing that they will construct large mills. They have been waiting for years for this opportunity, and will contribute a large part of this $418,000. These mills will be in addition to those already in existence. This is also a rich farming section. It is estimated from careful cruises that there are more than 30,000,000,000 feet of merchantable-timber ready to cut tributary to this waterway. I respectfully ask the committee to agree to this amendment so that these people can spend their money under the supervision of the War Department by improving a waterway for which they have great and essential need.

Mr. SMALL. Mr. Chairman, before replying to the gentleman who offers this amendment I would like to make this brief statement in answer to the comment made by the gentleman from Wisconsin [Mr. LENROOT] as to the omission in this bill of the amount estimated for the improvement of the mouth of the Columbia River.

Mr. LENROOT. I did not criticize the omission, I want the gentleman to understand.

Mr. SMALL. Well, the method, then. Gentlemen know that the United States as to its navigable waterways is divided into districts. In each district is stationed an engineer called the district engineer. He is there all the while; he is on the ground; he is making a constant study of the improvements and is presumed to be well informed as to existing conditions, and the Chief of Engineers, anxious to reduce any appropriation to the utmost limit consistent with maintenance and improvements of projects, wired the district engineer at Portland asking his opinion as to whether this appropriation for the mouth of the Columbia River could be reduced. The reply came that the whole amount could be stricken out for the reason stated by the representative of the Chief of Engineers, Col. Newcomer, a large part of which was read by the gentleman from Wisconsin [Mr. LENROOT]. So there is nothing unusual about it. It was done in the ordinary course and done with a view to reduce the appropriations in the bill.

Now, Mr. Chairman, as to the amendment offered by the gentleman from Oregon [Mr. HAWLEY], I desire to say that the amendment ought not to be agreed to.

In the first place, it is based upon a report which has just come in; a report that has been printed since we were considering the bill, and on page 150 of the hearings Col. Newcomer, before the committee and representing the Chief of Engineers, made quite an extended statement about this project. I do not want to disparage the project for the purpose of influencing the committee, but I must say there are many projects which have been favorably reported which are not in this bill, some of them reported one and two years ago, many of them of equal merit and emergency with this project which has been recently reported. While the gentleman from Oregon may be justified, of course, in what he considers the discharge of his duty, the Committee of the Whole would not be justified in adopting this amendment, and I hope they will not do so.

Mr. HAWLEY. Will the gentleman yield?

Mr. SMALL. Yes; certainly.

Mr. HAWLEY. Do I understand the gentleman correctly when I understood him to say that Col. Newcomer opposed this project for which I have offered an amendment?

Mr. SMALL. No; Col. Newcomer, representing the Chief of Engineers, would not have criticized a project which the Chief of Engineers had just reported favorably.

Mr. HAWLEY. I thought not, and which he himself as a member of the Board of Engineers for Rivers and Harbors had approved in a written document.

Mr. SMALL. This is not the only pebble on the beach. There are many other projects that have been favorably recommended, many of them of equal merit, and we would open up a Pandora's box if we discriminate by adopting this amendment and inserting this new project in the bill. It would be unfair to other sections of the country, and I hope the amendment will not be agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon.

The question was taken, and the amendment was rejected.

Mr. HAWLEY. Mr. Chairman, I desire to offer another amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 26, after line 13, insert as a new paragraph:
"Mouth of Columbia River, Oreg. and Wash.: Continuing improvement and for maintenance, $975,000."

Mr. HAWLEY. Mr. Chairman, this language is taken from the river and harbor bill passed by the House at the last session of the Sixty-fourth Congress. This item was included in the tentative bill prepared by the committee at this session, as I understood the gentleman from Wisconsin to say, but eliminated at the last moment. The first information we had that the item was in danger came when the papers from the State of Oregon indicated that there were demands on the part of the laborers employed on the project for an increase of wages, and following that demand for an increase of wages, or an alleged demand for an increase of wages, there were two or three articles printed by the newspapers of Portland in which it was intimated that probably the solution of the problem to prevent the granting of the increase of wages would be the suspension of the work for a year.

I can not see why the Government of the United States should not advance wages if a reasonable advance is justified.

Mr. JOHNSON of Washington. Will the gentleman yield for a question?

Mr. HAWLEY. Yes.

Mr. JOHNSON of Washington. What does the gentleman think wages for day labor would have to be on the north jetty to continue work there this year? It is almost impossible to get men at $3.50 a day. Where are the laborers who were in that part of the country?

Mr. HAWLEY. I will say to the gentleman from Washington when the work was suspended they had the men.

Mr. JOHNSON of Washington. Yes.

Mr. HAWLEY. And could have kept them.

Mr. JOHNSON of Washington. But we did not then have the Canadian Government combing those counties for men and taking the men away.

Mr. MOORE of Pennsylvania. Is that not one of the reasons why an annual river and harbor bill should be passed, because the moment you stop the whole force of the Government is disorganized?

Mr. HAWLEY. This jetty is about 2½ miles long. In the construction of the jetty a very large number of piling of great length are used, and are correspondingly expensive. There are four piles in each bent. The bents, if I remember, are 10 feet apart. The cost of the piling, the braces, and caps on the piling, and the stringers, on which the rails are placed, is enormous. If this work is suspended now, within a year portions of that woodwork, which by that time will be over two years old, will be in such a condition that the sea will sweep them away or they will be unsafe for use. And if the work is suspended for a year, as was done when the south jetty was in process of construction, they will have to replace the woodwork at a cost of many tens of thousands of dollars. The jetty is not complete, according to the statement of the Chief of Engineers. There are 400 feet at the outward end that are below the surface of the sea at lower low water.

Up to this submerged portion there is a comparatively good jetty at present. But for the last 400 feet it varies from 7 feet below mean lower low water to 75 feet below mean lower low water, and is absolutely valueless for any purpose whatever if left in its present condition. It was the intention to construct this remaining 400 feet to the proper height above high water and place at the outer end a mass of rock that would stand the tremendous pounding of the northwesters and to confine the waters of the river for the purpose of scouring the bar and to protect the harbor from a drift of sand from the north.

Now it is proposed to abandon that work, and no sufficient reason has been assigned. The Chief of Engineers does not assert that the jetty is complete, but some trouble arose with the men, and so the work is to be abandoned. And, as I said a moment ago, if it is abandoned now it must necessarily be completed in the future, because that great artery of commerce

will demand the attention of this Congress, and command it, as it has in the past. You have approved year after year appropriations for the improvement of this waterway, and it has been fully justified by the results. They started with about 32 feet on the bar, and they have now practically 50 feet on the bar.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. HAWLEY. May I have two minutes more?

The CHAIRMAN. The gentleman from Oregon asks unanimous consent for two minutes more. Is there objection?

There was no objection.

Mr. HAWLEY. The work has proceeded well, the river has responded to the attempt to control it, and in due time, if this north jetty is completed as originally planned, we will have a permanent jetty work that will protect that river, and Congress can practically forget its existence. But if it is left now, I predict that within a year or two the engineers will report that it was a mistake to leave the work incomplete—that the outer end of the jetty, that 400 feet or more, with a large section adjoining it which is now insufficiently protected, should have been completed—and they will recommend to the committee and to Congress appropriations with which to complete it. We will then have to reconstruct all that tram work, and not only the tram work but all the operating works. We will be compelled to replace not only the piling and lumber, at a cost of tens of thousands of dollars, but to add to that cost the wages of the labor employed in redriving the pilings, sometimes down through the rock; in replacing the caps, braces, and stringers; in relaying the track; and in reassembling the plant. All that work will involve a tremendous loss to the Government. And it seems to me the most prudent thing to do, when you have a job about completed and are ready to dump the last load of rock off the end of the tram, when the tram is there, and the workmen are there, and the rock is there, is to put the rock in the ocean and complete the work at the time and have it finished.

Mr. SMALL. The gentleman's amendment proposes to add an appropriation of $975,000 to the bill for improvement at the mouth of the Columbia River, and I will endeavor to make that situation plain with a brief statement. That amount was intended to be expended on jetty work at the mouth of the river, where very expensive jetties have been constructed, and on that point the engineer reported that the work should be suspended on the jetty at this time on account of the great cost involved and the fact that the jetty has now been brought up to what they consider a fair grade for several years, so that the estimate that has been proposed for that item can be reduced. That is the recommendation upon which the reduction was made.

Mr. HAWLEY. Does the gentleman yield?

Mr. SMALL. Certainly.

Mr. HAWLEY. The gentleman does not controvert the statement the Chief of Engineers made under date of May 25, 1917, which I quoted?

Mr. SMALL. Oh, no. But we know nothing about that. I do not, of course, deny any statement that the gentleman from Oregon makes about it, but I am talking about the information that was before the committee. On page 150 of the hearings Col. Newcomer, for the Chief of Engineers, stated that only dredging at the mouth would be required, and that the balance on hand was sufficient for that purpose. The balance on hand, estimated as of June 30, 1917, is $189,000, so that we have for the mouth of the Columbia River $189,000, which will, during the next fiscal year, serve amply for the purpose of open-channel dredging, the only suspension of work being upon the jetties; the report being that the jetties will last during that time without any further expenditure or further improvement, and therefore that the appropriation for the jetties need not be made.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oregon [Mr. HAWLEY].

The question was taken, and the amendment was rejected.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last two words.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. SMALL. What I had to say a while ago does not affect the gentleman from Pennsylvania, but I hope hereafter we shall confine ourselves to the items.

Mr. FREAR. Why should special license be given to the gentleman from Pennsylvania?

Mr. GILLETT. Why should we not always confine ourselves to the subject of the debate?

Mr. SMALL. I expressed the hope that the gentleman from Pennsylvania would confine himself to the paragraph.

Mr. MOORE of Pennsylvania. The gentleman has taken up a minute of my time already. When I was interrupted a little while ago I had something serious to say, and I hope I can say it now without interruption. We have passed the items along the Pacific coast, and I am in favor of those items. I believe there should be river and harbor improvements on the Pacific coast equally with those on the Atlantic coast. I am very glad that the committee has put in southern items, and items for the Middle West, and items affecting the Great Lakes. If the committee is correct and if the Secretary of War is correct and if the President is correct, every one of them has direct reference to the national defense.

Now, some gentlemen have opposed this bill on the ground that it is not a national-defense measure. I have contended several times that the matter of the conservation of the food supply and the transportation of all other supplies in this country in time of war, by virtue of the utilization of the waterways of the country, makes this a national-defense bill. I have here a very remarkable document, which I intended to read a little while ago when I was interrupted. I hope I shall be able to read enough of it now to bring this whole subject to a point.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Massachusetts?

Mr. MOORE of Pennsylvania. No; I will not.

The CHAIRMAN. The gentleman declines to yield.

Mr. WALSH. Mr. Chairman, I rise to a point of order. The gentleman is not discussing the amendment to strike out the last two words.

Mr. MOORE of Pennsylvania. I am discussing the matter of the advisability of improving the waterways along the Pacific coast equally with those on the Atlantic coast, which the gentleman from Massachusetts in part represents, but which he does not defend. I am defending the waterways of the Pacific coast equally with those of the Atlantic coast and of Massachusetts, which the gentleman from Massachusetts ought not reject. On the plea that we should have protection on the Pacific coast equally with protection on the Atlantic coast, I am proceeding in order; and I do not like to be interrupted by the gentleman from Massachusetts or any other Member on the floor who is opposed to this bill.

Now, Mr. Chairman, Maj. Gen. Tasker H. Bliss, Assistant Chief of Staff of the United States Army, is an authority worth considering. When he was a lieutenant, in 1884, he wrote an article on the subject of waterways and their utilization in time of war that now sounds like a prophecy. This in part is what he said:

> It is the immensity of the interests involved that guarantees the speedy completion of at least two of these lines as now proposed and that will give the greatest military value as lines of supply. The 10 grain States of the Mississippi Valley—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska—produce nearly 70 per cent of the wheat, corn, and cereals generally of the United States. These States are for the most part covered with a network of railways, yet, as already stated, it costs on an average the produce of 3 acres to get that of 1 to market.

This, of course, was in 1884.

> Everyone knows that at times when corn was selling for 90 cents in New England it was being burned for fuel in Iowa; when wheat sold for $1.35 in New York it brought 45 cents in Minnesota; when beef brought $7 a hundred on the hoof in the East cattle were being slaughtered for hides in Texas.

Mr. WALSH. Mr. Chairman, I rise to a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. WALSH. The gentleman from Pennsylvania is reading from a document that has absolutely nothing to do with the item under discussion.

The CHAIRMAN. The gentleman's time has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. WALSH. Mr. Chairman, I object.

Mr. MOORE of Pennsylvania. I renew my request for leave to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Pennsylvania renews his request for unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. WALSH. Mr. Chairman, I renew my objection.

The CHAIRMAN. The gentleman renews his objection, and the request is denied.

Mr. MOORE of Pennsylvania. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for five minutes. Is there objection?

Mr. WALSH. I object, Mr. Chairman.

The Clerk read as follows:

Puget Sound and its tributary waters, Olympia, Tacoma, and Bellingham Harbors, Lake Washington Ship Canal, Snohomish and Skagit Rivers, Swinomish Slough, waterway connecting Port Townsend Bay and Oak Bay, Columbia River between Wenatchee and Kettle Falls, Wash.: For maintenance, $30,000; for improvement of Lake Washington Ship Canal in accordance with the report submitted in House Document No. 800, Sixty-fourth Congress, first session, $200,000; in all, $230,000.

Mr. HADLEY. Mr. Chairman, I offer an amendment, which I send to the desk..

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HADLEY: Amend, by inserting after line 7 on page 27:

"Skagit River, Wash.: Completing improvement in accordance with the report submitted in House Document No. 935, Sixty-third Congress, second session, $30,000."

Mr. HADLEY. Mr. Chairman and gentlemen of the committee, I know you are impatient, as we are nearing the end of the projects. I would like your attention for just a few moments. I think I can make a statement in five minutes which will justify this item.

The item covered by this amendment was carried in the last river and harbor bill which passed the House in the Sixty-fourth Congress. I have here House Document No. 935 of a previous session, covering the reports of the engineers, the River and Harbor Board, and also the Secretary of War. The item was passed in the House at the last session of the Sixty-fourth Congress without any criticism or suggestion of criticism. It is eminently meritorious, and I submit it upon these facts: The Skagit River is the largest of all the great rivers flowing into Puget Sound. At the mouth of the Skagit River there is a wide and large delta. There are two principal outlets for the river, the North and South Forks. Formerly there were many outlets through the delta, which is 5 or 6 miles in width. A few years ago the Government adopted a project and completed it at the mouth of the South Fork of this river, putting in a training dike directing the flow of the water and opening the channel, and maintaining it across the bar at the mouth of the river. That improvement has performed its function successfully; but 7 miles above the mouth of the river and above that improvement a bar has been forming at what is known as Skagit City, called the Skagit City Bar. That bar threatens all of the commerce of the Skagit River, threatens to impede and ultimately to destroy it unless it is taken care of. Unless it is taken care of, it will destroy the result of a $100,000 improvement which has already been perfected and completed at the mouth of the river.

The proposition here recommended by the engineers and by the board, and adopted, as I say, by the House in the last Congress, is an expenditure of $30,000 to open the channel to a greater width and depth through the Skagit City Bar, 7 miles above the other improvement, and to erect a training dike about 6,200 feet in length in connection with the dredging operations. The one at the mouth of the river is about 2 miles in length. This will create a channel which will permit the transit of vessels at all stages of the water and of the tide. The engineer's report shows the controlling depth of the water on the bar is about 3 feet, and after every freshet the vessels hang up on the bar. They can only pass over the bar at high tide. The commerce on this river amounted to a little less than $4,000,000 in 1914, as shown by the report which I have in my hand. I have seen authority for the statement that the commerce of the river for 1915 was something more than $5,000,000. I have not the statement for 1916, but it was undoubtedly approximately the same. This commerce consists of hay, grain, oats, condensed milk, and miscellaneous articles of commerce produced in one of the richest valleys in the world.

This is no Jim Crow creek of which I am speaking. I want the committee to understand that it is one of the great rivers of this country, and that an improvement which cost this Government $100,000 at the mouth is about to be rendered useless and sacrificed because of the refusal to incorporate here an item providing for the expenditure of $30,000 to make good the commerce of that river.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HADLEY. Mr. Chairman, there is much more that might be said in support of this item. May I have half a minute?

The CHAIRMAN. The gentleman from Washington [Mr. HADLEY] asks unanimous consent for half a minute. Is there objection?

There was no objection.

Mr. HADLEY. I do not criticize the committee for its action. I think it could not have fully understood or reviewed these reports that were before it. I submit to the committee that upon the brief statement I have made this injustice ought to be corrected. It would take 15 or 20 minutes to cover the subject. I have not asked that, but I submit that this is the time and place to correct this injustice to this river and to the commerce upon it, and to the people of the locality and the people of the country. Therefore I ask the committee to restore the item to the bill.

Mr. SMALL. Mr. Chairman, the amendment of the gentleman from Washington [Mr. HADLEY] seeks to include a new project in this bill for the improvement of the bar at the mouth of Skagit River, involving an estimated cost of $61,500, the proposed improvement being the construction of about 6,200 feet of dike for the purpose of confining the water, so that by scouring action a greater depth of water will be maintained.

Mr. HADLEY. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. HADLEY. I wish to correct the impression that would be created by the gentleman's statement. This amendment asks for only $30,000. The engineer's report recommended $61,500, but this amendment is for only $30,000. I think the chairman of the committee overlooked that fact.

Mr. SMALL. I cheerfully submit to the correction. The original recommendation was $61,500.

Now, Mr. Chairman, it is not necessary to disparage this project which was favorably reported by the Chief of Engineers and has passed through all the stages of investigation. I may say further that it was included in the bill which passed the House at the last session, but there were 50 or more new projects which passed the House in the last bill but which are not included in this bill. I submit to the House that it was agreed to submit finally to the recommendations of the Chief of Engineers, when approved by the Secretary of War, as to whether new projects were of sufficient urgency to be put in the bill, or whether the failure to appropriate for new projects in the bill would cause such a loss as to make it an emergency. In their opinion this was not sufficiently urgent to justify their recommendation for inclusion in the bill. I hope that Members, by reason of their regard for the distinguished Member from Washington, in which we all join, will not permit personal considerations to move them in voting for this amendment. Because if you do so, you can well understand that an injustice would be done to fifty-odd other new projects not included in this bill. Let me illustrate. There is the Crescent City Harbor proposition, in California, a very important project which has been insistently urged for inclusion in the bill. How unjust it would be to have other projects included and not that project. All these projects will be taken care of in the bill recommended by the committee at the next regular session. This bill illustrates that there are important projects involving large commerce, and yet they can not all be taken care of in one bill at the same session.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington.

The question was taken; and on a division (demanded by Mr. HADLEY) there were—ayes 21, noes 43.

Mr. HADLEY. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Amend by inserting after line 7 on page 27:

"Anacortes Harbor, Wash.: Completing improvement in accordance with the report submitted in House Document No. 1117, Sixty-fourth Congress, first session, and subject to the conditions set forth in said document, $56,000."

Mr. HADLEY. Mr. Chairman, this is another project included in the last bill reported through the usual channels, and passed the House in the Sixty-fourth Congress. In the Anacortes Harbor, Wash., there is a waterway known as Cap Sante waterway. It is proposed to dredge that out to a depth of 12 feet at mean lower low water, 150 feet at one end and 250 feet at the other, for the purpose of creating a shelter and safe retreat for vessels of light draft that are used in the commerce in that locality. On the north side is a very strong current and at times a tempestuous sea rages outside, and these light-draft vessels that perform the ordinary functions of commerce in that vicinity have no other shelter, and this would afford them ample facilities.

The commerce there consists mainly of fish and lumber. There are about 40 large industries, including shingle mills and fish canneries. The fishing craft can not well be sheltered at any

other point in a period of storm. The depth of the water is only a few feet at low water and is wholly inadequate for the purposes contemplated by the proposed improvement.

The cost of the improvement will be about $84,000, $56,000 of which is proposed to be paid by the Government. The local people have assumed $28,000 by way of cooperation as specified by the engineers in the report. I will not detain the committee beyond stating this brief outline. It is a worthy project and ought to command your consideration at this time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington.

The question was taken, and the amendment was rejected.

Mr. STAFFORD. Mr. Chairman, at the suggestion of the chairman of the committee I ask that the Clerk return to page 21, lines 13 to 22, passed over this morning without prejudice, for the purpose of offering an amendment.

The CHAIRMAN. The gentleman from Wisconsin asks to return to page 21, lines 13 and 22, passed over this morning without prejudice, for the purpose of offering an amendment, and the Clerk will report the amendment.

The Clerk read as follows:

Page 21, line 18, after the amount, $52,100, insert:

"*Provided*, That this amount is hereby made available for maintenance of the channel to the established depth of the Milwaukee, Menomonee, and Kinnikinnic Rivers, inner harbor, Milwaukee, Wis."

Mr. STAFFORD. Mr. Chairman, when this item was reached I directed an inquiry to the chairman of the committee whether in view of the fact that yesterday we adopted the policy of providing for the maintenance of the inner harbor at Lorain, and in view of the further fact that it is the policy recognized through the bill to maintain the channel of all the rivers tributary to the coast and the Gulf, and also the Great Lakes, whether he would have any objection to providing specifically for this amount to be utilized for the maintenance of the channel of the inner harbor of the Milwaukee, Menomonee, and Kinnikinnic Rivers, where there is a tonnage of several million tons each year. For some reason or other the United States Government has not been undertaking the work of maintenance there, the work being confined entirely in prior years to the outer harbor as far as the channel is concerned. For a number of years I have directed inquiries to the chairman of the committee concerning this feature of the work, and they have never been able to explain why the inner harbor at Milwaukee was excepted from the usual course of maintenance by the Government.

Mr. SMALL. Mr. Chairman, since the gentleman from Wisconsin [Mr. STAFFORD] introduced the amendment, the chairman of the Committee on Rivers and Harbors has investigated this as carefully as he could in the limited time, and he sees no objection to the amendment, and hopes that it will be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The amendment was agreed to.

The Clerk read as follows:

Nome Harbor and Apoon mouth of Yukon River, Alaska: Completing improvement of Apoon mouth of Yukon River in accordance with the report submitted in House Document No. 991, Sixty-third Congress, first session, $45,000; completing improvement of Nome Harbor in accordance with the report submitted in House Document No. 1932, Sixty-fourth Congress, second session, and subject to the conditions set forth in said document, $105,000; in all, $150,000.,

Mr. SULZER. Mr. Chairman, there seems to be an impression amoi some of the Members of the House that this bill is not in interests of national defense and that those who are advocating its passage are not taking a broad, patriotic stand, but are in favor of the bill because of particular projects in certain localities. I do not believe there is a Member of this body who would advocate or vote for anything not in the interests of the successful prosecution of the war. When it is said that Members are not advocating this bill for national defense the criticism would seem to include the Commander in Chief of our military and naval forces and his advisers, upon whom rests the enormous responsibility of the successful conduct of the titanic struggle in which we are engaged, for their approval has been given this measure and surely their purposes can not run counter to our national interests.

It is a serious mistake to imagine that this war is going to be concluded in six months' time, and it would be a serious and grievous error to send our brave soldiers to the battle fields of Europe and our courageous sailors upon the high seas without exhausting every means at our command to provide them with all the material and supplies of war that they can possibly need and use. To do otherwise would be to send them to needless sacrifice, and they must be supported by every resource available in the Nation.

The war of to-day can not be won by the men at the front alone; it must be won by the entire industrial and commercial capacity of the Nation cooperating to the fullest extent with our military forces. In order to accomplish this purpose our commerce and industrial life must be developed to the highest possible point. It is imperative that the Government lend every assistance to our commerce in order that the productive capacity of the Nation may be as great as it is possible to make it, for in the last analysis the strength of the Nation lies in its wealth of resources.

I wish to say at this time that in the great war in which our country is engaged the people of Alaska stand loyally and patriotically behind the Government. Alaskans have entered every branch of the military and naval forces and are ready to give themselves with devotion to the defense of the Nation's honor and the sacred rights of humanity.

We Alaskans are few in number, and we can but add our bit to the man power of our fighting forces, but in material resources of vital importance in the prosecution of the war we are very rich, and it is in the utilization of these resources of Alaska and their highest development at this time that the Nation can most benefit from its great possession in the North. It is in regard to the development of these great resources in Alaska that I especially appeal for the favorable consideration of two small items in this bill, an item of $105,000 for the creation of a harbor at Nome, and the other an item of $45,000 for the improvement of the mouth of the Yukon River, $150,000 in all.

The Nome Harbor project is one of exceptional merit. There is at present no harbor of any sort for any craft at Nome, and vessels are forced to lie in an open roadstead several miles from the beach. During storms the nearest shelter is in the lee of Sledge Island, 27 miles distant.

Large vessels bringing passengers and freight for Nome and Seward Peninsula anchor 2 miles offshore and transfer their passengers and freight to lighters, which are towed to the beach through the surf and discharged. Some years ago there was constructed a caisson and tower about one-half mile from the beach in 12 feet of water. From this tower cables were extended to a similar tower on shore and passengers and freight were taken ashore over this cableway. A year ago last winter this tram was completely wrecked by a severe storm, and the need for some adequate facility at Nome is now very great.

Nome is the metropolis and distributing point for all of the coast of Alaska from the Kuskokwim River to Herschel Island, a distance of 2,000 miles. Many gasoline and sailing vessels are engaged in the coastwise trade, making Nome their headquarters and outfitting point. Numerous vessels ply back and forth between the Siberian ports, engaged in developing a rapidly growing trade. All of these vessels are now subject to great hardship by reason of there being no harbor of refuge at Nome, and no way that the passengers, mail, and freight involved in all the Bering Sea trade can be handled except through the surf.

This project proposes to deepen the basin at the mouth of Snake River within the city of Nome, to widen and deepen the channel leading into the river from Bering Sea, and to protect this channel by two jetties.

This will enable the lighters from the large vessels to be taken within the harbor and discharged there in safety, effecting a great saving in costs of handling. It will give the small gasoline and other vessels comprising the "mosquito fleet" a safe refuge and an ample harbor, and greatly lessen the trials and hardships of all those engaged in the development of this far northland. It will give a great impetus to all lines of endeavor in that section.

There was shipped to Nome last year merchandise valued at $1,049,245, for use in the town alone. The shipments to the Bering Sea settlements, which are in a great part landed at Nome and distributed from there in the small gasoline craft, totaled $4,105,999 for the year. The reports of the collector of customs of Alaska shows that the tonnage entered and cleared at Nome was exceeded only by two places in the Territory—Ketchikan and Cordova.

Nome is one of Alaska's most important gold camps. The gold-bearing sands of the Nome district are of enormous extent; they have been thoroughly prospected and developed and will continue to yield greater and greater annual returns for generations. It is conservatively estimated that the gold production of Seward Peninsula will eventually total a billion dollars. Tin, platinum, bismuth, antimony, tungsten, and other rare metals necessary and vital in the manufacture of war munitions and supplies are found in the district. The section to be benefited by these improvements contains the only tin mines on the continent, which, during a short space of time have produced over half a million dollars worth of metal and which, with properly

encouraged development, are susceptible to a very large expansion. And it is this project that makes this particular item essentially a war measure. There is at this time a great shortage of tin in this country, and nearly every department of the Government is spending every resource to obtain an additional and adequate supply. At this time we are putting up, on this very day, in the Territory of Alaska, 250,000,000 cans of salmon, and if it is possible to get additional tin it is hoped to make that product at least 50,000,000 cans more. There is nothing of more importance in supporting our armed forces and supporting our own people and the people of the allied countries than an adequate food supply, which must be prepared and preserved in tin.

Nome also has a fur-trading industry of large proportions. Some years ago a few reindeer were imported from Siberia into Alaska, and to-day there are over 100,000 of them in the Territory. This industry centers at Nome, and while it is as yet in its infancy, it is surely destined to develop into enormous proportions and become one of the food supplies of the Nation. Already considerable reindeer meat is being shipped to our Pacific coast ports.

The coast of Bering Sea is a very treacherous one. During the past 17 years over $1,000,000 worth of shipping has been lost in the vicinity of Nome and many lives have been sacrificed. As the small craft have been destroyed, many have not been replaced, owing to the hazards and risks involved, and this fact has greatly retarded the development of this most important section. The construction of this harbor will put new life and activity into the exploitation of these new fields.

These sturdy Alaskan pioneers who have given the Nation over $75,000,000 in gold from the tundra of Seward Peninsula, who have opened up an area three times the size of the State of Massachusetts and made it productive, deserve some consideration at the hands of this Congress. In their behalf I appeal to you.

Now, with reference to the improvement of the Apoon mouth of the Yukon, I wish to say that the Yukon River is one of the great rivers of the continent, one of the noble rivers of the world. With its tributaries, which include the Tanana, the Porcupine, the Innoko, and the Koyukuk, all comparable to the Missouri, Ohio, and other Mississippi tributaries, the Yukon affords access to a great part of the interior of Alaska. The Yukon discharges two-thirds the water at its mouth that the great Mississippi of continental United States does.

Large river steamers navigate this great river and its tributaries for thousands of miles, carrying passengers and supplies to the cities and camps and river distributing points, and thus far this has been the only means of affording settlement and development to this great section of the Territory.

The Apoon mouth of the Yukon is its most easterly mouth, and is the one used by all navigation. For many miles from the mouth of the river Bering Sea is shallow, and the river can be approached only by shallow-draft river boats. The terminal point for all Yukon River navigation is at St. Michael, 60 miles distant from the Apoon mouth. All ocean vessels from Seattle, Portland, and San Francisco transfer their cargoes at St. Michael to the river barges and steamers.

A bar beyond the mouth of the river and in the open sea now obstructs navigation and makes it extremely hazardous. This fact causes great delay and expense to all vessels operating on this route, because they are unable to enter or leave the river except at the highest stages of the tide and under favorable wind conditions. It is hazardous and dangerous, because if a vessel grounds at this point it remains grounded for a day or more in the open sea, where sudden and violent wind storms arise. If a vessel could be assured of entering the river without delay, the weather can be safely judged for the time required to travel the 60 miles, but if the vessel is delayed at this bar, or unfortunate enough to become grounded in the mud, it is at the mercy of a rising sea.

There is a very great loss of time caused all navigation, and much danger to life and property, by reason of the existence of this bar at the mouth of the Apoon Pass.

The statistics of the Treasury Department show that during the year 1916 there was shipped to the Yukon River Basin merchandise of a total value of $3,855,197. During this same period, the gold production of the Alaska camps in the Yukon Basin amounted to $7,100,000, according to figures compiled by the United States Geological Survey. The value of antimony and tungsten produced in the year was $100,000. New districts are continually being opened up along the river, the most recent of which, the Marshall Camp, during the first year produced a half million dollars and promises to produce added millions during the next year.

It is of extreme importance for the settlement and development of all the Yukon drainage basin that this project under consideration be authorized and navigation thereby made reasonably safe and expedient by the removal of this bar.

The grandeur and magnificence of Alaska has become much better known during the past few years, and tourist travel down the Yukon is growing rapidly. No more beautiful trip can be taken in the world than to sail down this majestic river under the midnight sun. This travel is surely destined to become of tremendous volume and importance, and this small appropriation will do much to encourage the development of such travel.

The United States Government is now engaged in building a railroad across Alaska, 400 miles of a line that will open up a new virgin country for farmers and miners and develop two vast coal fields. This railroad is being constructed from the interior terminal as well as the coast terminal, and all the supplies for the interior terminal must go up the Yukon and Tanana Rivers. The loss of a single barge load of Government supplies at the mouth of the river would mean more than the cost of the whole project.

I am personally familiar with the merit of this project, for only last summer I traveled up and down the Yukon with my family on the good ship *Schwatka*, which was unfortunate enough to run aground on this bar and was forced to remain there for 30 hours.

Alaska, during the past 50 years, has received approximately $500,000 for river and harbor improvements, $10,000 a year for a territory of nearly 600,000 square miles, seventy-two times the extent of my native State of New Jersey. With a coast line of 26,000 miles, with thousands of miles of riverways, surely we have not been extravagant in our requests for improvements. We ask for these two small appropriations, because they mean so much to the commerce, the industry, and the development of all that great northern section of Alaska, and so much to the comfort and happiness and safety of the loyal pioneers who are standing as the outposts of our Nation in the far Northland.

The present year is the fiftieth of Uncle Sam's possession of Alaska. During this time the vast empire has been built up out of a wilderness by struggling, indomitable Alaskan courage and brawn. Until the last few years Alaskans were given little encouragement or aid in their efforts to open up the fastnesses and bring the rich resources of our Territory to the lap of the world.

Alaska has many pressing needs. Government at a 3,000-mile range is not effective government, and if the Territory is to be permitted to develop naturally and to the full extent of its resources, Congress must grant it complete powers of self-government. The leading strings and red tape by which Alaska has been so long bound should be cut away at once, and the American citizens in that great Territory given the freedom and blessing of a real and adequate self-government.

With the Nation engaged in the greatest war of all time, and the dormant resources of Alaska, such as copper, gold, coal, oil, rare metals, food fish, and timber products, invaluable to the Nation in the prosecution of war, the petty restraints and restrictions which have caused stagnation in Alaska and acted as a discouraging deterrent to real development, should be summarily removed. Broad powers should be given the people of Alaska, and our citizens who have undertaken the pioneer work in our northern Territory should be given that latitude of action necessary in the development of a frontier country. Liberal appropriations should be given the Territory for aids and improvements commensurate to the vast extent of its domain. [Applause.]

The Clerk read as follows:

SEC. 2. Where separate works or items are consolidated herein or hereafter and an aggregate amount is appropriated therefor, the amount so appropriated shall, unless otherwise expressed, be expended in securing the maintenance and improvement according to the respective projects adopted by Congress after giving due regard to the respective needs of traffic. The allotments to the respective works so consolidated shall be made by the Chief of Engineers as authorized by the Secretary of War. In case such works or items are consolidated and separate amounts are given to individual projects, the amounts so named shall be expended upon such separate projects unless, in the discretion of the Chief of Engineers and the Secretary of War, another allotment or division should be made of the same. Any balances remaining to the credit of the consolidated items shall be carried to the credit of the respective aggregate amounts appropriated for the consolidated items.

Mr. FREAR. Mr. Chairman, I move to strike out the section. I expected some one else was going to make this motion, but I desire to show what the effect of this section is. This section provides, as I understand, that Army engineers can group, as they have done in this bill, different projects into separate groups. Money may be appropriated for those groups, and full authority given to the engineers to make the allotment to a specific project. Under the system proposed in this bill it will hereafter be practically impossible to strike out any project, however bad or unsatisfactory it may be as a commerce-bearing project, because it will be grouped with others, in accordance

with this new plan of Army engineers. To show how close this came home to members of the committee, I may say that two members who are interested in respective projects on the Pacific coast objected to their projects being grouped together, for the reason that they desired to have appropriations remain separate and distinct. I only speak of that in passing because it is a suggestion that comes home to those who are interested in different projects. Under this provision it is possible hereafter, because we are establishing precedents, for Army engineers to first group any number of these different projects and then to determine how much money shall be appropriated for a specific project, and we are giving them power to make any allotments they may desire. Congress has heretofore claimed to be jealous of its powers and rights in specific appropriations that are being made. It will hereafter, by section 2, place Army engineers in the position where they will be continually importuned to make allotments for specific projects in which individuals are interested, and I believe it is unfortunate to place in this bill at this time or at any other time this provision. For that reason I have moved to strike out the item.

Mr. LENROOT. Mr. Chairman, this matter is so important that I think we ought to have some explanation from the chairman of the committee. It does seem that it absolutely revolutionizes the policy of Congress in this respect. While I am upon my feet I want to call the attention of the chairman to this fact: The language as it now reads authorizes any appropriation for maintenance, even though grouped, to be used for work of improvement.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. SWITZER. Did not the last lump-sum appropriation take all of the unexpended balances to the extent of $5,000,000 and turn them over to the Army engineers?

Mr. LENROOT. Oh, yes; I understand; but Congress should declare that in a specific case, if it does so. If we have a bill with several million dollars for maintenance and this becomes the law, there will always be the suspicion—and it will be an additional suspicion, let me say, I think very largely unwarranted—that items have gone into a bill under the guise of maintenance, whereas the real purpose is to get improvements. I do not think the chairman would desire that there should be any further complication in respect to these matters than now exist, and if this is to be done at least the words "any improvement" should be stricken out, so that it would be confined to maintenance where appropriations are grouped for maintenance and improvements permitted only where appropriations are grouped for improvements.

Mr. SMALL. Mr. Chairman, I did not rise in opposition to the motion to strike out this paragraph, because it has been discussed more than once during the consideration of this bill. The gentleman from Wisconsin [Mr. LENROOT], who last spoke, I am sure, is perfectly sincere, but I think his theory is founded upon an erroneous impression. Not only are grouped items a familiar method in river and harbor bills, but also this is not a new law which is proposed in this section. As far back as the early days of the service of Mr. Burton, as the chairman of this committee, there have been grouped items, and the appropriations therefor have been expended substantially as provided in this paragraph.

Mr. LENROOT. May I ask a question, because I want information?

Mr. SMALL. Certainly.

Mr. LENROOT. In the past has there been any case where items have been grouped and a maintenance appropriation made where that appropriation may be used under the will of the Secretary for improvement? That is my point.

Mr. SMALL. In the river and harbor act approved March 4, 1913, in section 7 I find this paragraph, which I think is substantially the one under discussion, and I ask the gentleman to follow it in the bill here:

SEC. 7. That where separate works or items are consolidated in this or subsequent rivers and harbors acts and an aggregate amount is appropriated therefor, the amounts appropriated shall, unless otherwise expressed, be expended in securing maintenance and improvement according to the respective projects adopted by Congress, after giving due regard to the respective needs of traffic. The allotment to the respective works consolidated shall be made by the Secretary of War upon recommendations by the Chief of Engineers. In case such works or items are consolidated and separate amounts are given with each project, the amounts so named shall be expended upon such separate projects unless, in the discretion of the Secretary of War, another allotment or division should be made of the same. Any balances remaining to the credit of the consolidated items shall be carried to the credit of the respective aggregate amounts appropriated for the consolidated item.

Mr. LENROOT. It is somewhat different in phraseology, but in reference to the point I make it is the same. Now, I would like to ask the gentleman what the practice has been, if there has been a grouping of appropriations for maintenance, whether any portion of that has been used for improvement?

Mr. SMALL. The practice has been this, and I am very glad the gentleman asked the question in that way. In the annual report of the Chief of Engineers estimates are submitted either for maintenance, if it is a completed project, or for continuing improvement. Now, in these grouped items there may be, say, eight items, all for maintenance, we will say, and out of the eight, estimates are only made for three of them. The gross amount appropriated is based upon the amount estimated for those three items, and expenditures will be confined to those three items unless before the end of the fiscal year, by reason of some unanticipated condition, there should be some deterioration in the channel of those for which no estimate is made, either by flood conditions or some other unanticipated deterioration of the work. If no deterioration in the channel or works should occur before the end of the fiscal year, all the appropriation would be expended in accordance with the original estimate. If there should be in the consolidated item an appropriation for the further improvement of any project, the appropriation would be expended on that project, unless some unforeseen exigency should require the diversion of a part of the appropriation.

Mr. LENROOT. I thoroughly agree that is the correct practice, but the gentleman will see this language does not limit it to that practice at all. That is my point.

Mr. SMALL. I am very glad the gentleman made the suggestion, and I promise we will study it before a future bill is submitted.

Mr. LENROOT. That is all I ask.

Mr. STAFFORD. Mr. Chairman, will the gentleman permit a further inquiry?

Mr. SMALL. Certainly.

Mr. STAFFORD. The gentleman says that he will consider it before another bill is presented. Will the gentleman, under that condition, be willing to strike out the words, in line 19, "or hereafter," so as to have it only applicable to the present bill, to the appropriations that are available at the present time?

Mr. SMALL. Well, it has been so carried heretofore.

Mr. STAFFORD. I do not recall in the reading of the provision in the prior bill the words "or hereafter" were carried.

Mr. SMALL. I am perfectly willing that should go out. We want to act in good faith in the matter.

Mr. HUMPHREYS. Should it not be "or hereafter and"?

Mr. STAFFORD. I move to strike out——

The CHAIRMAN. The Chair will state to the gentleman there is pending a motion to strike out the paragraph.

Mr. STAFFORD. This is a preferential motion, Mr. Chairman, to perfect the paragraph by striking out the words "or hereafter."

Mr. HUMPHREYS. "Or hereafter and."

Mr. STAFFORD. It is line 19, page 28.

The CHAIRMAN. Does the gentleman offer it as a substitute or as an amendment?

Mr. STAFFORD. As an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 28, line 19, strike out the words "or hereafter."

Mr. HUMPHREYS. If the gentleman will yield, the word "and" ought to go out. It says "where separate works or items are consolidated herein or hereafter and."

Mr. SMALL. I think the correct amendment is to strike out "or hereafter." That makes better language.

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from Wisconsin to strike out the paragraph.

The question was taken, and the motion was rejected.

The Clerk read as follows:

SEC. 3. That in all cases where the authorized project for a work of river or harbor improvement provides for the construction or use of Government dredging plant, the Secretary of War may, in his discretion, have the work done by contract if reasonable prices can be obtained.

Mr. LENROOT. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman the reason for this section. It is not found in previous bills.

Mr. SMALL. Is the gentleman referring to section 3?

Mr. LENROOT. Yes.

Mr. SMALL. As I understand, the purpose of that is for better administration. Frequently an appropriation provides that work shall be done by Government dredging plants, but it may well happen that by reason of a demand for work by private dredging companies and their bidding against each other, conditions may arise by which the work can be done cheaper than by the Government plants. And it is only for the purpose of economy that this is done.

Mr. LENROOT. Mr. Chairman, I am afraid the gentleman has forgotten the purpose in other bills of expressly providing that certain work shall be done by the Government itself, and when he refreshes his recollection he will remember the circumstances. I remember them very well. There were three or four cases in one of the recent harbor bills, where the bids for contracts had been very large, and Congress determined that a portion of the work—and it was only a small portion of it—should be done by a Government plant in order that the Government might have a basis upon which to check the bids that were made so that the Government would know in a given case what a reasonable cost for doing the work was. One of the cases I remember was some of this canal work of the intercoastal canal, and it seems to me it was a proper, wise, and beneficial provision. It was not extensive, but certainly operated to the benefit of the Government, and I do not believe that that should be stricken out at this time, because with these increasingly higher and higher bids the Government should have some basis, by doing some of its own work, of determining what a reasonable price is. And for that reason, Mr. Chairman, the gentleman not having given any other reason than that which he has given, I move to strike out the section.

Mr. HUMPHREYS. Mr. Chairman, I wanted to ask the chairman some questions about that. I know some cases heretofore where work has been authorized to be done by contracts and authority has been given to the Chief of Engineers to construct a dredge where he could not get proper prices under the contract. That has frequently, perhaps universally, resulted in reasonable bids for the work. And I was just wondering why it was that section 3 was not framed along that line, which is just the reverse of what you have, that where the work is authorized to be done by contract that the Chief of Engineers is authorized to build a dredge unless reasonable amounts can be gotten by the contract. As you have it written here, where the work is authorized to be done by the dredge, he can let it out by contract if he gets reasonable rates. Just briefly reading it here, it occurs to me that you have got the cart before the horse.

Mr. SMALL. I will say to the gentleman from Mississippi and to the gentleman from Wisconsin that this is a provision which was inserted in the bill by the Senate Committee on Commerce; that is, in the last river and harbor bill in the last session. When we were formulating this bill I took occasion to consult with the chairman of the Committee on Commerce, and also with the Chief of Engineers, and the reason assigned was the one which I stated; that is to say, that conditions sometimes existed by which the work was offered to be done by private dredging companies even cheaper than it could be done by the Government, arising, it was said, from unusual competition or because of a dullness of work among the private dredgers, or for some similar reason.

Mr. JOHNSON of Washington. Let me tell the gentleman one of the reasons for the labor situations that arise on certain Government works. On the jetty work on the north bank of the Columbia, done by the Government during the year ending with the last report, over 300 men were injured and quite a number of them disabled for life. The Government pays to men disabled by complete injury wages for one year. A man injured for life gets about $1,000, if he is working for the Government, but in the State of Washington and in many other States, if he is working for a corporation under the employers' liability act he is paid a stated sum per year for the balance of his life. As I said, on the north jetty of the Washington side of the Columbia River more than 300 men were injured in one year. The hospitals in the counties on the north side of the river were filled with these men who have used up the one year's Government salary in hospital fees, and so forth. Now they find themselves turned out and repudiated by the counties and State on the ground that they were not working for the State, and they are left as Ishmaelites—helpless—all begging me to introduce special bills for their relief.

Mr. SMALL. I was diverted at the time from the fact that Col. Newcomer, representing the Chief of Engineers, when he was before the committee was examined about this paragragh, and this is what he said:

That was introduced in the Senate Committee on Commerce with the idea, particularly in view of the present situation of the cost of construction of Government dredges, that where a project provides for a dredge, as for instance, at the mouth of the Brazos River, it may be preferable, instead of constructing the Government plant at this time, to do the work by contract until conditions are more favorable for building the dredge. It is simply a precaution in the interest of economy in the present administration of the work. We have hitherto had authority of law for doing work by hired labor where contracts are provided for, and here is practically the reverse of that proposition.

Mr. LENROOT. Will the gentleman yield?

Mr. SMALL. I will.

Mr. LENROOT. The gentleman knows in this present bill there is not one single item that requires the work to be done by the Government, and in bills that it did require it it was for the very purpose that dredges had already been provided and were in operation.

Mr. SMALL. Well, I might cite the gentleman to Grays Harbor, Wash., a very important improvement, where the recommendation was made for the authorization of a dredge. But the engineers did not advise the inclusion of an authorization of a dredge in this bill on account of the great expense involved.

Mr. LENROOT. In this particular case it would not require, under section 3, that that work be done by contract, because that was one of the cases where the Government had an option of either doing the work on Government account or by contract. But there are four or five cases where, for the purpose I stated, Congress deemed it desirable that a small portion of the work should be done on Government account for the purpose of ascertaining the reasonableness of the bill under the contracts. Col. Newcomer was not here at that time, and was not informed, and could not have been informed of the purposes for which it was done.

Mr. SMALL. I think the paragraph had better remain in.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 4. That for examinations, surveys, and contingencies for rivers and harbors for which there may be no special appropriation, the sum of $200,000 is hereby appropriated: *Provided*, That no preliminary examination, survey, project, or estimate for new works other than those designated in this or some prior act or joint resolution shall be made: *Provided further*, That after the regular or formal reports made as required by law on any examination, survey, project, or work under way or proposed are submitted no supplemental or additional report or estimate shall be made unless ordered by a concurrent resolution of Congress: *And provided further*, That the Government shall not be deemed to have entered upon any project for the improvement of any waterway or harbor mentioned in this act until funds for the commencement of the proposed work shall have been actually appropriated by law.

Mr. MADDEN. Mr. Chairman, I move to strike out this section.

The CHAIRMAN. The gentleman from Illinois moves to strike out the section.

Mr. TREADWAY. Does the gentleman mean the section or the paragraph?

Mr. MADDEN. I mean the paragraph.

I think if there ever was a time when we ought not to pass a provision of this sort, this is the time. It can not be said that these surveys which are sought to be authorized by this paragraph will have anything whatever to do with the emergency caused by the war. I do not believe the chairman of the committee, even, enthusiastic as he is for the development of water transportation, so that the products of the field and the mine and the factory may be moved from place to place to supply the soldiers engaged in the conduct of the war, would say that this would add one iota to the facilities that are supposed to be needed for the successful conduct of this great enterprise upon which this country is already engaged.

If we can save $200,000 by striking out this paragraph and preventing the expenditure of money that may follow as the result of these surveys, we will have done at least something to prove that we are not engaged entirely in an effort to further empty the Treasury of the United States. Unless it be the item that provides for the removal of the sand bars at Great Lakes Naval Training Station, where we are already training 12,000 men to supply the ships of war, I do not think there is an item in this whole list of 75 surveys that is justified, and not one dollar of money ought to be expended for them. It is not merely the $200,000——

Mr. OSBORNE. Mr. Chairman, will the gentleman allow me to ask him a question?

Mr. MADDEN. Yes.

Mr. OSBORNE. I ask the gentleman if he knows anything about the item on page 36, authorizing a survey of Los Angeles Harbor, Cal., with a view to dredging a channel of adequate width and depth in the west basin?

Mr. MADDEN. Personally, no.

Mr. OSBORNE. I would like to tell him something about it.

Mr. MADDEN. I have not the time. The gentleman can do that in his own time.

What I do say is—and I say it without fear of successful contradiction—that whatever we do by the adoption of this section will not add one iota to the facilities required to conduct this war; not an iota; because the surveys are to be made merely, and no expenditure of money except for surveys is authorized. No work can be conducted under the surveys until a final concurrent resolution is enacted or a bill passed appro-

priating the money under the survey until the Board of Engineers approves the projects and it is reported upon favorably by the Secretary of War and reported by the Committee on Rivers and Harbors to the House and then to the Senate and they act upon it and the President signs the concurrent resolution or the bill. That procedure will take a year before we begin to realize on the expenditure that is to be made under this section. And now, if we are in earnest in our desire to promote the public welfare, if the chairman of the committee and the members of the Committee on Rivers and Harbors are sincere, as they say they are, in the conservation of the public interest and in the promotion of the public welfare, here is a chance for them to prove it by joining with other Members and striking out this item which provides for the expenditure of $200,000, which has no place in the bill as an emergency war measure.

I am quite sure that the Secretary of War did not certify to this section or to the items that follow or to the expenditures which would result from its enactment, as emergency war measures. I am quite sure the President of the United States was not consulted about these surveys, and I am quite sure that if he had been he would simply declare that they have no rightful place in the bill, because they are in no sense emergency measures caused by the war. [Applause.]

Mr. HICKS and Mr. OSBORNE rose.

The CHAIRMAN. The Chair will recognize the gentleman from New York [Mr. HICKS].

Mr. HICKS. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Illinois, and I am going to ask permission to speak for 10 minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. MADDEN. I object to that. Nobody has been allowed to speak 10 minutes on this question. I am surprised at the gentleman attempting to filibuster. [Laughter.]

The CHAIRMAN. The gentleman from Illinois objects. The gentleman from New York is recognized for five minutes.

Mr. MADDEN, of Illinois, having moved to strike out the paragraph referring to surveys, the Chair recognized Mr. HICKS in opposition to the motion.

Mr. HICKS. Mr. Chairman, ordinarily I am glad to follow the genial gentleman from Illinois [Mr. MADDEN]. Oftentimes he is right, but sometimes he is wrong, and now I think he is in error in what he has said. I am going to lay before the House three matters in regard to these surveys that have just been objected to.

Let me say, in the first place, that I am strongly in favor of the great costal canal system which has been advocated so consistently and so ably by the gentleman from Pennsylvania [Mr. MOORE]. Let me say also that there have been statements made on the floor of this House in regard to these coastal canals—statements made in good faith, but in ignorance—which can not be substantiated by facts. Men assert that because there is the great Atlantic Ocean it is absolutely useless and nonsensical to build a great canal parallel with the shore line, the inference being that because we have a great body of water near at hand, it is an extravagance, a useless extravagance, to build a canal within a few miles of the coast.

Now, of course, to men who know the sea it is absolutely unnecessary for me to say anything to refute that proposition. Those of us who come from marine districts, those of us who may have had some actual experience upon deep water, know that it is only on rare occasions, extremely rare occasions, that a small, deeply laden vessel can venture out to sea. Gasoline having revolutionized the marine engine, small-cargo boats are now the rule, and for a small boat, which is the usual and most profitable method of distribution, to venture on the ocean is risking not only the cargo of that vessel but the crew as well. On land the day may be as clear and calm as it is here in Washington to-day, but the ocean may be telling the story of a storm of several days ago, far out at sea, the echoes of which roll in billows and cresting waves that will endanger any but large vessels. And at all times vessels in tows—the most profitable way to handle water freight—are liable to break away under the swell of the sea. The wash of even small waves on a vessel deck loaded with coal or sand or any bulk commodity is wasteful in the extreme, and when gentlemen rise on this floor and say it is ridiculous to spend money for canals because they are close to the ocean it is because they are not acquainted with deep water.

Mr. MADDEN. Will the gentleman yield?

Mr. HICKS. I will.

Mr. MADDEN. I was not talking about the canal at all. I was talking about these surveys.

Mr. HICKS. I was not criticizing the gentleman from Chicago because of the canal system. I recognize that the gentleman is a great and able sailor, coming from the raging main of Lake Michigan [laughter], but I was merely referring to what has been said about this canal proposition by other gentlemen, and not by the gentleman from Illinois.

Mr. MADDEN. Yes; but that is not talking to the pending question. The canal has nothing to do with this question at all. Talk to the question.

Mr. HICKS. Mr. Chairman, may I be allowed to proceed for a few moments without interruption?

The CHAIRMAN. The gentleman from New York will proceed.

Mr. MOORE of Pennsylvania. Is the gentleman talking in favor of a survey?

Mr. HICKS. Yes.

Mr. MOORE of Pennsylvania. The gentleman from Illinois moves to strike it out, and the gentleman from Long Island is talking to the amendment.

Mr. HICKS. I merely made the statement with regard to canals as a whole. Now we are talking about specific items. I have three items in this bill which call for surveys, one for a breakwater at Gardners Island, one for dredging Sterling Basin, and one for constructing the South Side waterways. I will first take up Gardners Island. Let me say in regard to the military importance of this survey that the Navy Department has established a great practice zone in Gardners Bay, and laid it off in ranges, and during the summer they have target and torpedo practice on this body of water. Formerly a great sand spit ran from the north side of Gardners Island out northward, with a fort situated on the end, placed there by the Government. That sand spit gave protection to the bay inside, but a few years ago a great northeaster came and swept over that piece of ground, cutting it through, and to-day the northern part of Gardners Bay is only about one-half of what it was a few years ago. By putting a breakwater upon that piece of low ground you will restore Gardners Bay to what it was formerly; you will protect the property on this part of Long Island, and afford the protection so necessary to the target practice of the Government. This breakwater with Gardners Island will afford the first line of defense for the waters around Shelter Island and Greenport.

The next project which I have in the bill is for a survey for an anchorage at Sterling Basin, Greenport.

It is a landlocked arm of Greenport Harbor situated at the northeastern end of Long Island, about 115 miles from New York. Its distance from the New England coast across the Sound is about 20 miles. Sterling Basin has an area of about 16.5 acres inside the harbor lines. The depth of the anchorage and of the entrance thereto at present is insufficient, being only 3 and 4 feet at low water in the deepest parts. As the bottom is soft the cost of the improvement would be inconsiderable. Greenport Harbor was improved some years ago by the construction of a breakwater and by dredging, and in the annual report of the Chief of Engineers for 1895 Col. Robert stated, in his opinion, "the harbor is worthy of further improvement by the United States with the object stated—that is, deepening the anchorage ground in Sterling Basin and widening and deepening its approaches." In 1909, then Col. W. M. Black, of the Corps of Engineers, reported, "It would appear that the commercial conditions of Greenport warrant the improvement requested; therefore, in my opinion, the harbor is worthy of improvement." In 1910 the district officer recommended the dredging of the basin to a depth of 10 feet with the formation of a channel and approach of proper depth and width. Col. W. T. Rossell, of the Corps of Engineers, recommended that a depth of 6 feet be dredged, but that the area to be improved be reduced in size. This report was never acted upon. Greenport is one of the most important towns on the eastern end of Long Island and is a commercial center. It is the home port of a large fishing fleet and the point for shipment of large quantities of oysters, clams, and scallops, this industry employing many vessels of deep draft. There are a number of shipbuilding concerns located here, employing many men. The surrounding country is a rich agricultural section. The need of increased harbor facilities is imperative in order to accommodate the ever-increasing maritime development, and this basin should be deepened to 12 feet.

The next project and one of great importance is the South Side waterways development.

Long Island, with a length of 123 miles and an area of 1,365 square miles, has a population of nearly 3,000,000 people, of which the major portion live along the line of this proposed waterway. This vast aggregation of people demand increased facilities of transportation for the enormous quantities of commodities consumed and produced. Brick, lime, lumber, coal, cement, fertilizers, and material for road construction naturally belong to

water traffic. This canal would enable boats to discharge and receive cargoes in the very centers of the towns, for nearly all the larger villages on the south side of the island are situated on the estuaries and arms of the many bays that indent the shore line. There is a large amount of island-grown produce to be shipped westward, so that the freight to be shipped would be both outward and inward.

Agricultural products, fish, and oysters would find their way to the New York markets by means of this canal, and these industries are prime factors in our prosperity. Our farmers could bring their produce to the docks on the lateral canals for shipment to the city and out baymen would be enabled to take their catch direct to the New York markets, thus lessening the present cost of transportation, a saving which would inure to the benefit of the producer and consumer.

From the military standpoint such a canal as contemplated in the proposed survey would have immense value, enabling light-draft war vessels to reach the eastern end of the island, protected the entire distance by the outlying sand bars. Supply vessels could also reach our warships patrolling the coast by the use of this canal without exposure to the dangers of the open sea.

It is not a costly project, for the material to be dredged is soft and the chain of bays in nearly every instance already possess sufficient depth of water. The need is to connect these bays by dredging out and straightening existing shallow channels, cutting a short canal and constructing a few bridges. One of the connecting links, Jamaica Bay, is now being improved, and will shortly become one of the world's greatest terminal harbors. It is the desire of the State officials to have the depth of this canal conform to that of the Erie Barge Canal, 12 feet at least.

New York State has appropriated $15,000 to help pay part of the expense of the survey and will do her share by providing funds to procure the right of way and will cooperate with the Federal Government in building this much-needed and entirely practicable canal.

New York out of its own treasury has expended $140,000,000 for the Erie Canal and terminals, and in view of the enormous amount which the State pays annually into the Federal Treasury should receive consideration for this and other projects in the bill. When I speak of the necessity of making these improvements, I speak not for a real estate development or of commerce that we hope will come. New York makes no apology for her trade and asks no consideration for hopes or idle dreams. Our trade and our commerce are facts, not fancies, and New York, the premier city of the world, challenges in friendly rivalry the competition of the earth.

Our industries on Long Island—agricultural, marine, and industrial—add their share to the greatness of the Empire State, and we appeal to the Federal Government to do its share in cooperating with us in maintaining our prosperity. [Applause.]

I ask leave to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, I realize the interest of the gentleman from New York [Mr. HICKS] in the meritorious surveys to which he has just referred, but I desire to call his attention to the fact that even should these surveys be adopted as they appear in the present bill, a generation will have time to grow up and these places will have an opportunity to increase largely in population before his particular surveys will ever be reached. In referring to the hearings on the subject of surveys I find that Col. Newcomer, in answer to a question propounded in the committee about the number of incompleted surveys, said:

> There are 106 cases still outstanding. The number of investigations ordered is 1,864, and of that number 1,587 have been completed prior to this year, and 171 last year, leaving 106 remaining in addition to those that were in the bill approved July 7, 1916.

Mr. DEMPSEY. Will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. DEMPSEY. Are not the surveys made in the order of their importance and not in their chronological order?

Mr. TREADWAY. We have no evidence of that fact, Mr. Chairman, as far as I know.

Mr. CALDWELL. Will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. CALDWELL. Is it not a fact that a great many of the States and localities desire to improve these waters and can not do so until the Government has made the surveys of the waters?

Mr. TREADWAY. Do I understand the gentleman to mean that these improvements are going to be made by the State authorities?

Mr. CALDWELL. The one spoken of by the gentleman from New York just now has an appropriation of the State of New York to work on when the survey is made.

Mr. MADDEN. Why does not the State of New York make the surveys?

Mr. TREADWAY. Yes; let the State of New York arrange for that. I am talking about the surveys as they appear in the present bill, and I am heartily in favor of the motion made by the gentleman from Illinois [Mr. MADDEN] to strike these surveys out of the present bill.

Mr. HULBERT. Will the gentleman yield?

Mr. TREADWAY. My time is very limited and I want to refer to this one argument.

Mr. HULBERT. I want the gentleman simply to yield for a brief statement on the question of the order in which the surveys are taken up.

Mr. TREADWAY. The gentleman can make that statement in his own time.

Mr. HULBERT. I am correcting the gentleman on the order in which the surveys are taken up. Is it not a fact that the surveys authorized——

Mr. TREADWAY. Mr. Chairman, I have not yielded. If I can get more than five minutes I will yield.

Mr. HULBERT. I beg the gentleman's pardon; I thought he invited me to ask him a question.

Mr. TREADWAY. Now, Mr. Chairman, in our committee hearings the question was asked Col. Newcomer what is the need of these items for survey. He said:

> We did not really pay much attention to the question of surveys. That is a matter that we did not consider especially important from our point of view. There are a great many of those items in here that appeal to me as being superfluous. At the same time they could be taken up if time permits. I do not see any particular objection to them, and the amount, I think, is not great.

There is the evidence of the representative of the engineers on the subject of the many surveys in which we are to-day asked to appropriate $200,000, and for the carrying out of which we are asked to employ engineers who can be of a great deal more service in the cause of national defense than they can in making the various surveys in different sections of the country. There are 106 in addition to those that went into the bill in 1916 which have not been carried out. Therefore, it seems to me, that we can rightly adopt the motion of the gentleman from Illinois.

Mr. SMALL. Before the gentleman from New York proceeds, may I submit a request for unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes?

Mr. MOORE of Pennsylvania. I would like five minutes.

Mr. OSBORNE. I want five minutes.

The CHAIRMAN. I will make the request that debate close in 20 minutes.

Mr. WALSH. I shall object to any unanimous-consent request.

Mr. SMALL. Mr. Chairman, I move that all debate on this paragraph and amendments thereto close in 20 minutes.

Mr. MADDEN. And I move to amend that, Mr. Chairman, by providing that the debate shall close immediately.

Mr. HULBERT. Mr. Chairman, I offer an amendment in the nature of a substitute that all debate close in five minutes.

Mr. MADDEN. Mr. Chairman, I raise the point of no quorum. I do not see why anybody wants to fillibuster on the bill at this time.

The CHAIRMAN. The gentleman from Illinois makes the point of no quorum. The Chair will count. [After counting.] One hundred and one Members present.

Mr. MADDEN. I demand tellers.

The CHAIRMAN. The Chair does not think that the gentleman is entitled to tellers. The gentleman from North Carolina moves that the debate close in 10 minutes, and the gentleman from Illinois moves to amend by making it immediately, and the gentleman from New York [Mr. HULBERT] offers a substitute that the debate close in five minutes. The first question is on the substitute.

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Illinois to the motion of the gentleman from North Carolina that all debate close immediately.

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The question now is on the motion of the gentleman from North Carolina as amended by the gentleman from Illinois.

The motion was agreed to.

The CHAIRMAN. The question now is on the motion of the gentleman from Illinois to strike out the paragraph.

The question was taken; and on a division (demanded by Mr. MADDEN) there were 24 ayes and 60 noes.

Mr. MADDEN. Mr. Chairman, I raise the point of no quorum.

Mr. CALDWELL. I demand tellers.

The CHAIRMAN. The gentleman from Illinois makes the point of no quorum, and the Chair will count. [After counting.] One hundred and five Members present, a quorum, and the gentleman from New York [Mr. CALDWELL] demands tellers.

Mr. CALDWELL. I withdraw the request.

So the motion to strike out the paragraph was rejected.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word.

Mr. HULBERT. Mr. Chairman, I make the point of order that nothing has been read since the motion to close debate.

Mr. GARNER. I make the point of order that we have just voted to close debate on the paragraph and all amendments thereto.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

The Secretary of War is hereby authorized and directed to cause preliminary examinations and surveys to be made at the following-named localities, and a sufficient sum to pay the cost thereof may be allotted from the amount provided in this section.

Mr. LENROOT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 30, line 11, after the word "section," insert:
"*Provided*, That not more than $250 shall be expended for any specific preliminary examination or survey."

Mr. LENROOT. Mr. Chairman, if the amendment I propose be adopted, it would permit the surveys to remain in the bill; it would permit all the surveys to be made by existing organizations without any increase of officials or men. I appreciate that there are many of these surveys that will require little beyond the data already in the hands of the district engineer. But when you come to a proposition of expending thousands of dollars in the employment of men and taking the time of engineers and officials in this time of war I do want to plead with this House not to go on record in favor of any such thing. We are to-day scouring the country and enlisting regiments of engineers to serve in this war. We want every West Point educated officer in this war in order to win it. We ought not to use them for the purpose of spending months and months on surveys of very large magnitude, involving large crews of men, when every man is needed in the prosecution of the war. This is considered by some as a war measure. I do not impute any lack of good faith to those gentlemen when they do it, but surely they ought to remember that we are in war, and we ought not to be willing to lessen the possibility of a quick and successful prosecution of the war because we have some project in our district that we want a survey of.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. CAMPBELL of Kansas. Does not the gentleman from Wisconsin realize that this bill could not pass if these surveys were not included?

Mr. LENROOT. I would not say that. I may think it, however, if the vote on this amendment shall be of the same character as votes heretofore cast. How many of you think for a moment that if a bill were brought in here independently for each one of these surveys, like the Youghiogheny River, a very large survey, or like the one in Texas, involving a large crew of men, in this time of war, it would get many votes? How many votes do you think it would get? It ought not to get a single more vote now if we remember that we are at war. Our first duty is to our country. We all know there is not one of these surveys that will assist in the slightest degree in the successful prosecution of this war, but that, on the contrary, every engineer, every man who is taken in making the surveys, will be just that much detriment to our country in the carrying on of the war.

Mr. SMALL. Mr. Chairman, I desire to submit this brief statement: If the gentleman from Wisconsin [Mr. LENROOT] desires to defeat about one-third of these surveys, perhaps more, his amendment will serve that purpose. Some of these examinations and surveys can not be completed within the limit of $250. It is impossible to estimate the exact amount. I take it that the gentleman himself had no official estimate from the engineers when he formulated his motion.

Mr. LENROOT. Mr. Chairman, will the gentleman yield for a question?

Mr. SMALL. Certainly.

Mr. LENROOT. My purpose is this: I am willing the surveys should be made when they do not require additional men; but if they do, then it will require more than $250. That is why I placed the limit.

Mr. SMALL. I think the language of the gentleman's amendment is rather crude in carrying out his purpose.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. STAFFORD. I understand it is the purpose of the gentleman to complete this bill this evening?

Mr. SMALL. Yes.

Mr. STAFFORD. Would it be agreeable to the gentleman and to the committee to present a unanimous-consent request that this entire section be read and considered as one, subject to points of order and amendments, so that we could hasten the consideration of the bill?

Mr. LENROOT. Mr. Chairman, I prefer that this amendment of mine be disposed of before that is taken up.

Mr. STAFFORD. I am making the suggestion at this time in the time of the gentleman from North Carolina.

Mr. SMALL. I think in the interest of the economy of time it is a good suggestion, and we shall ask it.

Mr. DEMPSEY. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. DEMPSEY. I have the following suggestion to make, which I think will meet the approval of the gentleman from Wisconsin and may meet the approval of the chairman of the committee. Instead of the language of the gentleman from Wisconsin adopt this language:

Provided, That not more than $250 shall be expended upon the average for the surveys below enumerated.

Mr. LENROOT. Oh, that would not do at all, because many of these surveys will not cost anything.

Mr. DEMPSEY. That is just what I had in mind—that in cases where the survey will cost more than $250 the survey that is inexpensive will contribute its share.

Mr. LENROOT. My whole point is to save the employment and time of officers and men outside of their ordinary duties. That is the purpose of my amendment.

Mr. SMALL. Mr. Chairman, if my colleague will yield, I think it is better that we should follow precedent here. We are providing for surveys just in the manner they have been provided for for more than 20 years. The amendment here, as I said, would have no other purpose than to destroy some of the surveys proposed to be authorized by this bill, and I think that we can do no better than to observe the precedents in all former rivers and harbors bills providing for surveys. I hope the gentlemen will permit a vote to be taken.

Mr. HUMPHREYS. Mr. Chairman, I just want to make one very brief statement in answer to one of the criticisms offered by the gentleman from Wisconsin. Under the law the Chief of Engineers now has authority, which he universally exercises, to employ engineers from civil life to perform this work, and the department is now sending men from the active list, taking them away from the work to which they have been assigned in river and harbor improvements and assigning in their places officers of the Engineer Corps who are on the retired list, so that there is no force whatever in the suggestion of the gentleman from Wisconsin that we are taking Army engineers away from their work pertaining to this war and setting them upon river and harbor work.

Mr. MOORE of Pennsylvania. Will the gentleman yield? Suppose we consider the item for Charleston and Cooper River, S. C., from the entrance of Saunders Creek, including Sound Creek channel, which is absolutely a war proposition, being near the coast and being within the vicinity of the navy yard and where naval vessels must come and go; suppose it costs more than $250 to make that survey when war is pending or existing, would the gentleman think it wise to stop all work because we only authorized $250?

Mr. HUMPHREYS. Personally, I think the amendment is unwise.

Mr. MOORE of Pennsylvania. Would it not halt preparation for war?

Mr. HUMPHREYS. I think very likely. My only purpose in rising was to reply to the gentleman from Wisconsin.

Mr. DIES. Mr. Chairman, I dislike to take up the time of the committee, but this amendment offered by the gentleman from Wisconsin, in my judgment, would be a very unwise thing to do. He just repeats the old saw that has been sawed over until it is threadbare—that you are taking useful Army engineers and putting them at work on useless work. I want to call attention to a survey in this bill for my district. I do not know about the balance of them like I do about my own, but the district I rep-

resent has a port and three subports. It carries a commerce of between 7,000,000 and 8,000,000 tons, just about half the tonnage of the entire State of Texas. These waterways have been completed mostly at the expense of the people, and here we have been putting half of our money against the Government's half.

Our wish is that instead of continuing to deal with them as separate entities, to wit, Sabine Pass improvement, Port Arthur improvement, Beaumont improvement, and Orange improvement, that the projects should be surveyed as one project. It is proposed in this bill to resurvey them as one project, as they carry about half the commerce of the entire State of Texas, in the neighborhood of 7,000,000 tons. Now, then, two of these subports have been opened within a year, and on one of them—the subport of Orange—four shipyards are in actual operation. One ship has been completed and is in service; 15 ships are now under construction, 2 of which are practically complete; gross tonnage under contract, 41,600 tons; 20 ships under contract. At Beaumont two shipyards are in actual operation; one other shipyard under Government contract; for vessels, two others about to close contracts with the Government. Three other concerns have secured sites and are building shipyards; one ship is completed and at sea; four are building. Those are the conditions on those rivers—the Neches and the Sabine. My friends, the facilities there are absolutely inadequate to the commerce. The people have taken millions of their own money, and are taking it now; they are contemplating a bond issue upon the citizens, despairing of the Government taking hold of the matter, for a survey, with a view to further improving these waterways to answer the purpose of commerce. Do you think it is fair that a proposition of this kind, such a national project, being used in a national way for the country, should be compelled to stand still during the war? These engineers are rendering as patriotic and useful service to the Government as though they were in France, England, or upon the western trenches. Now, then, that is a fair statement. I do not think $250 would survey it.

In effect the gentleman's amendment would be to cut out a great many of the more important surveys in this bill. I do not know a more essential thing to win this war than to have these 10 or 15 shipyards construct these vessels and when constructed have them able to get down to the sea and carry the commerce of the country to the allies who need it.

Mr. MADDEN. Does the gentleman think the surveys will reach the completion of this work before the war is ended?

Mr. DIES. You do not want to stop the wheels of progress just because we are in war. Our export trade this year is $7,000,000,000. Before the war it was two billions. We need better facilities to export these seven billions' worth of exports than two billions in normal times. You need three times the ship facilities now to handle the $7,000,000,000 worth of trade that you did in peace times to handle the $2,000,000,000 worth of trade.

Mr. HULBERT. Mr. Chairman—— [Cries of "Vote!" "Vote!"]

Mr. SMALL. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. HULBERT. Mr. Chairman and gentlemen, I have been trying for several minutes to get an opportunity to emphasize one fact, at least, in connection with this survey matter that has not heretofore been presented. The provision for an expenditure of $200,000 is not mandatory, and the order in which the surveys are made, so far as their relative importance is concerned, rests with the sound judgment and discretion of the Chief of Engineers. The gentleman from Massachusetts [Mr. TREADWAY], my colleague upon the committee, said that there was nothing before the committee to indicate the preferences with regard to undertaking these surveys. I want to call attention to the fact that in a river and harbor bill which became a law in July of 1916 there was contained an authorization for a survey of the Hudson River, at New York, and so important did the engineers deem it to be that they began work immediately, and when Congress convened in December, 1916, the report of the engineers was in the hands of the committee.

A bill was introduced by me covering the particular item, and it was included in the bill which passed this House last February, and which failed to pass in the Senate, due to the filibuster on the armed-ship bill. And it is in this bill. And if that particular survey had not been passed last July it would not be possible, provided the amendment of the gentleman from Wisconsin [Mr. LENROOT] prevails, to get the survey under this bill, because so expensive is the cost of making a survey covering an important river like the Hudson, having a commerce greater in value than the war-bond issue, that you can not possibly do it within the limit proposed to be fixed by him in his amendment.

Now, I want to call attention to the necessity for a survey of the Harlem River, which is now being improved under a project adopted by Congress in 1878 with some supplemental amendments. Upon the Harlem River, if you please, in the last year there were transported 15,000,000 tons of freight, having a value of $1,500,000,000, and the accommodation that you are giving the city of New York for carrying that tremendous commerce is the plan adopted by this Congress 39 years ago! We are progressive!

On the 4th of July, 1918, the State of New York will put into full operation the great State barge canal, which will serve as a great relief to the tremendous commerce from the Great Lakes, a large part of which now passes through Canadian waters to world-wide ports.

Is the policy of this Government so niggardly that you are unwilling now to appropriate a paltry $200,000 as a means of getting a survey of the Harlem River, after the people of the State of New York have expended $160,000,000 in the construction of the State barge canal? How do you suppose, upon this antiquated waterway, which is taxed to-day to its utmost capacity, we are going to be able to carry the enormous tonnage that will be brought down the Hudson into the Harlem River to be distributed to various terminals that my city and my State are constructing now at an expense of nearly $40,000,000, if you propose to pursue the penny-wise-and-pound-foolish policy limiting the cost of surveys to $250, which would not cover the expense of a survey of the Harlem River? The effect of this amendment is to authorize an examination of all the so-called "mud holes" and prevent an examination of real commerce-carrying waterways.

Now, just a word, Mr. Chairman, in regard to the survey of the canal on the south side of Long Island, which my colleague, Mr. HICKS, was not permitted to explain. The State of New York has appropriated $15,000 for a field survey, looking to cooperation between the State of New York and the Federal Government. Our progressive people, who have taken the lead in waterway development from Clinton's time, stand ready to-day to appropriate $1,000,000 for the purpose of acquiring the right of way and turning it over to the Federal Government, which is only expected to dredge where necessary in order to secure a through canal upon that waterway.

If you do not provide for it in this bill, you delay the preparatory work that is necessary in order to put that great improvement under way, which is one of the connecting links in the development of Long Island, to bring commerce into the great city of New York and help to feed a population now approximating 6,000,000 people.

Mr. LENROOT. Does the gentleman think we can conduct this war without hindering anything throughout the United States?

Mr. HULBERT. Well, I want to say to the gentleman something he apparently is not aware of. There are a large number of Army engineers upon the retired list who would be perhaps unfitted physically to perform the tasks that will rest upon their brothers whom we are sending to France, and this House only recently passed a bill authorizing the Secretary of War to call those men back into the service, and it is they who will carry on the commercial pursuits, while the younger men will carry the banner of victory in France. [Applause.]

It will be for the Chief of Engineers to determine which surveys are urgent, and he will not undertake the work if he can not spare the officers. This work will not be permitted to interfere with the war, but if the war is over before we pass another river and harbor bill we must not let the adoption of a short-sighted policy by this House forestall our commercial development. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

Mr. LITTLEPAGE. Mr. Chairman, this bill making appropriations for the purpose of improving the rivers and harbors of the Government is one of vital importance to the country at large. Nothing the Congress can do is of more importance to the people, both internally and externally, than to improve the waterways which are the natural arteries of trade and commerce throughout the length and breadth of the country, in many instances affording natural transportation to the sea. For instance, in my State the Government has heretofore improved the great Kanawha River by the construction of 11 locks and dams therein, which affords transportation facilities for coal and coke and lumber for about 100 miles on the great Kanawha

River; thence to the Ohio River and on to the Mississippi and the Gulf of Mexico, and finally the Atlantic Ocean, at a freight rate of less than one-fourth of the same rate charged by the railroads. The Mississippi, the Ohio, and the Kanawha are very great and important navigable streams, but before their natural conditions are rendered available and, you might say, in a more perfect state for transportation purposes, additional improvements and expenditures of public funds will have to be made, and in due time will be made, by the Government.

The item in this bill for the improvement of Hell Gate at New York, so as to create a depth of water of 40 feet, is of vital importance not alone to New York City—the great money center of the world—but to the entire country as well, and I think this item is one of the most meritorious in the entire bill from one end to the other. It is particularly gratifying to me that the amendment for this 40-foot channel at Hell Gate was accepted by the committee and included in this bill, for as a member of the Committee on Naval Affairs I have a just appreciation of its importance in providing a double entrance to and double exit from the New York Navy Yards, thus making the East River serve in the defense of New York as the Kiel Canal does to Germany.

The New York delegation in this House is composed of some of the very finest Members in the House, and of that delegation my colleague, Mr. MURRAY HULBERT, a most excellent gentleman, is tireless in his efforts, painstaking, and courteous. He is deserving of the gratitude of every man, woman, and child in his great city for the faithfulness and determination with which he has worked for the needed improvement at Hell Gate as well as for the improvement of the port of New York. He has been broad, liberal, able, and conscientious in his efforts to bring to the attention of the Committee on Rivers and Harbors, which he himself graces as a member, as well as the membership of this House, the vital importance of these improvements, both at Hell Gate and the port of New York, and I have no doubt his people will appreciate his efforts at home in these respects as we appreciate him here as a faithful public servant.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that the remainder of section 4 may be read before it shall be in order to offer amendments.

Mr. MADDEN. I object.

The CHAIRMAN. The gentleman from Illinois objects. The Clerk will read.

Mr. SMALL. Mr. Chairman, if it is in order, I move that the remainder of the section be read before it shall be in order to offer amendments.

The CHAIRMAN. The Chair does not think it would be in order.

Mr. SMALL. Would not the gentleman from Illinois agree in the interest of saving time?

Mr. MADDEN. I will say to the gentleman from North Carolina that nobody has been filibustering on this bill except the gentleman from North Carolina himself and the gentleman from Pennsylvania [Mr. MOORE]. Until within the last 5 or 10 minutes all the time taken up in the Committee of the Whole to-day has been taken up by the gentlemen in charge of the bill. The bill would have been passed before now if those in charge of the bill had not taken up so much time. But I propose, Mr. Chairman, to exercise every right I have got from this moment on during the consideration of this bill. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Sterling Basin, at Greenport, N. Y., with a view to securing adequate width and depth.

Mr. MADDEN. Mr. Chairman, I move to strike out that section.

The CHAIRMAN. The gentleman from Illinois moves to strike out the section.

Mr. MADDEN. It is very apparent, Mr. Chairman, that there is no disposition whatever on the part of those in charge of this bill to exercise any economy in the expenditure of public money. Anybody must realize who has given some consideration to this question that the only purpose the Committee on Rivers and Harbors has is to further embarrass the Treasury of the United States by taking all the money there is in it out of it. [Laughter.] Of course, if the Committee on Rivers and Harbors was in favor of proper economy in the expenditure of public money they would have agreed to the motion to strike out these items for surveys; they would have agreed to that because they would have then shown that they were doing what they believed to be in the interest of the public service. But no. They give no consideration whatever to the public service or to the conservation of the public interest. They propose to economize time by asking that the debate be closed on a particular item of the bill in which they are interested. There are five or six items here in a single county, or two or three items in a single county, in North Carolina for surveys, one, I presume, in each of the counties of the district of the gentleman who presides over the Committee on Rivers and Harbors.

We have items in this bill providing for surveys, not for the purpose of conserving the public interest, not for the purpose of winning the war, not for the purpose of doing the things we are charged to do, but for the purpose of getting votes for the bill. We have items in the bill sufficient to insure a majority of votes for the bill. Does anyone assume to say that these items would pass if they stood by themselves? Does anyone assume to justify them on their merits? There is no doubt about it. The time has come when the people of the United States ought to know that there is no disposition on the part of the majority of this House to do anything except to extravagantly spend the public money. They do not seem to realize that we are in war. They say this is "a war measure." They say it is approved by the President of the United States. [Cries of "Vote!"]

Oh, gentlemen, you can shout "vote" all you please, but I am going to stand here and claim every right I have got, and I insist upon being heard. If you do not want to hear me, go into the lobby. I am going to talk whether you want to hear me or not. You can not drive me off the floor by shouting "Vote!" You have got to have something more meritorious than that to drive me off the floor. I insist on being heard. I insist that somebody on this floor should speak for the American people. I insist that somebody on this floor should speak in behalf of economy, and I insist that somebody on the floor shall call attention to the Democratic extravagance and waste of public money, and I am going to continue to do it, notwithstanding the fact that the chairman of the Committee on Rivers and Harbors protests that these items are in the interest of the public service and for the conduct of war measures, not one word of which can be proved to be the case. [Applause and cries of "Vote!"]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CALDWELL rose.

Mr. SMALL. Mr. Chairman. I ask unanimous consent that the debate on the pending paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the debate on the pending paragraph and amendments thereto close in five minutes.

Mr. STAFFORD. I move to amend it by making it three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CALDWELL. I will not take it all. You need not worry.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. CALDWELL. Mr. Chairman, I have not taken any time on this bill before. This item and the next three affect the district I have the honor to represent. They are meritorious items.

The State of New York is spending thousands and thousands of dollars—yes, millions of dollars—in the development of these waterways, and all that we are asking for here is the cooperation of the United States Government. This provision is to map the waters adjoining a canal, the route of which is now being surveyed. There is no question in the world but that this is a meritorious provision. The question asked by the gentleman from Illinois [Mr. MADDEN] is answered by the fact that a Republican State legislature has passed an appropriation looking to exactly the same thing, in which they will expend a great deal more money than the Democratic House is asked to expend.

Gentlemen, it would not be right to close debate here to-day without taking exception to the remarks of the gentleman from Illinois [Mr. MADDEN] concerning the attitude of the gentlemen of the committee. There is no question but that the able chairman of the Committee on Rivers and Harbors has conducted this bill with great skill, with great forbearance, and he is entitled to the confidence and respect of the Members of this House for his fortitude in facing many irritating situations and in resisting the attacks made by Members on the Republican side of the House against this bill, the most meritorious river and harbor bill that has ever been presented to the American Congress. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired. Without objection, the pro forma amendment will be withdrawn.

Mr. STAFFORD. I move to strike out the paragraph.

The question being taken, the motion was rejected.

The Clerk read as follows:

Flushing Bay, N. Y.

Mr. MADDEN. I move to strike out the paragraph just read by the Clerk.

The CHAIRMAN. All in favor of the motion——

Mr. MADDEN. Just a moment, Mr. Chairman. I insist on being heard. I do not believe there is any merit to this item in the bill. I do not believe the public money ought to be expended in this way. I believe we ought to consider these items on their individual merits in every case.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. MADDEN. No; I do not yield. I think that under no circumstances ought we to waste the public money upon useless expenditures. I believe that at this time the engineers of the War Department ought to be allowed to be taken from the work in which they are at present engaged in order that they may go over and help fight for the preservation of the Union. We have already enlisted nine regiments of Engineers from civil life, simply because we had to have men to go over and build railroads behind the lines in France, and we ought to take our own engineers from the various river and harbor improvements throughout the United States to lead the army of engineers now in France and going over there. The time has come when we ought to realize that we here in the Congress of the United States have a duty to perform, and that duty is to conserve the public interest. If we do not realize it, somebody will realize it for us.

Mr. DUPRÉ. Will my good friend yield to me?

Mr. MADDEN. This bill is supported here on the ground that it is a war-emergency measure. Does the chairman of the Committee on Rivers and Harbors [Mr. SMALL] stand before the Members of this House and assert on his honor as a man that the survey for Flushing Bay, N. Y., is a war-emergency measure?

Mr. DUPRÉ. Will the gentleman yield?

Mr. MADDEN. Will the chairman of the Rivers and Harbors Committee state here that the expenditure of the money required for this survey is justified by the situation?

Mr. DUPRÉ. What is the gentleman trying to do, filibuster?

Mr. MADDEN. I am trying to exercise my right as a Member of this House, and to criticize the items in this bill that I believe have no merit.

Mr. DUPRÉ. About which the gentleman knows little or nothing.

Mr. MADDEN. Regardless of whether I know anything about them or not, I am not going to let the gentleman from Louisiana say——

Mr. DUPRÉ. Who is your very good friend, by the way——

Mr. MADDEN. My personal friend, yes. I decline to yield. I am a Member of the House, and have a right to talk about anything in the United States.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. MADDEN. No. Get up on the floor and talk in your own time. I propose to criticize every item in this bill that I believe has no merit, and I believe the expenditure of the public money is not justified for the making of this survey in a time like this. We are drafting men into the service of the country to fight the battles of the Union; we are drafting the revenues of private citizens to pay the expenses of the war, yet we are taking money out of the Public Treasury for a purpose of no consequence.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CALDWELL. I ask unanimous consent that the gentleman's time be extended 30 minutes. [Laughter.]

Mr. SMALL. I move that all debate on this paragraph be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from Illinois [Mr. MADDEN] to strike out line 22, page 30.

The question being taken, the motion was rejected.

The Clerk read as follows:

The Kill Van Kull from Shooters Island west to junction of channels with a view to dredging shoals between channels to provide anchorage grounds.

Mr. MADDEN. Mr. Chairman, I move to strike out the paragraph.

Mr. HULBERT. Will the gentleman yield for a question?

Mr. MADDEN. I do not yield. Here we are proposing to expend money to survey Kill Van Kull from Shooters Island. That must be a game resort, one of these delightful places where gentlemen spend their time in the hunter's costume with a gun in their hand.

Mr. CALDWELL. Will the gentleman yield?

Mr. MADDEN. No; I decline to yield. Here we are engaged in an effort to appropriate money out of the Public Treasury to dredge the shoals between channels to provide anchorage ground at Kill Van Kull, Shooters Island, one of those delightful spots where the angler and the hunter may put in his time after his strenuous effort to get the coin of the realm. [Laughter.]

Mr. HULBERT. Will the gentleman yield and tell us where Kill Van Kull is?

Mr. MADDEN. I do not yield. Here we are appropriating money out of the Public Treasury for Kill Van Kull, Shooters Island. Is there anybody in the House who will say that Shooters Island has any merit in connection with the war? Is there anybody here who would be willing to stake his reputation that Kill Van Kull has any place in a war emergency? The President of the United States has requested the Congress of the United States to help him in every way in its power to have the war brought to a successful conclusion. We have enacted laws conscripting men and laws conscripting money, and now the only dark spot on the face of an otherwise beautiful history since the 2d of April is the effort to appropriate money for Kill Van Kull, Shooters Island, in order that the hunter and the angler may find an easy place to rest after their busy toil. Oh, gentlemen, it is ridiculous to sit here representing the American people and spend money lavishly for so unworthy a project as Kill Van Kull. Why don't you pay some attention to the President of the United States in his appeal for harmony and unity on the part of the American people and render him every assistance that can be rendered? While men in every quarter of the Nation are contributing their means not only to the war but to the maintenance of the Red Cross Society to the extent of $100,000,000 this distinguished Committee on Rivers and Harbors is devoting its time and energy wasting the money of the American people to the extent of $27,000,000 more out of the Public Treasury and thereby add to the burden of those who are already overladen with taxation that you have laid on their backs.

Mr. SMALL. Mr. Chairman, I move that all debate on this paragraph be now closed.

The motion was agreed to.

The Clerk read as follows:

Youghiogheny River, Md. and Pa.; Kiskiminitas River and Clarion River, Pa.; with a view to devising plans for flood protection and determining the extent to which the United States should cooperate with the States and other communities and interests in carrying out such plans, its share being based upon the value to navigation.

Mr. HUMPHREYS. Mr. Chairman, I make a point of order against the paragraph. I will reserve the point of order.

Mr. LENROOT. I make the point of order.

Mr. SMALL. Mr. Chairman, I move that the paragraph be stricken out.

The CHAIRMAN. The Chair sustains the point of order.

Mr. SMALL. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Page 31, lines 13 and 14, insert the following paragraph:
"Youghiogheny River, Pa., from its mouth to West Newton, including the report of the existing and prospective water terminals."

Mr. LENROOT. Mr. Chairman, I think the chairman of the committee ought to explain a new amendment that is offered by him. Mr. Chairman, I demand recognition.

Mr. SMALL. Mr. Chairman, I think the gentleman is entitled to recognition.

Mr. ROBBINS. Mr. Chairman, I will explain the amendment if I may be permitted.

The CHAIRMAN. Will the gentleman from Wisconsin yield?

Mr. LENROOT. Yes; if I may have some time following it, if I desire.

Mr. SMALL. I do not think the gentleman will desire it after he hears the gentleman from Pennsylvania.

Mr. LENROOT. Very well.

Mr. ROBBINS. Mr. Chairman and gentlemen of the committee, this proposed survey will not cost the Government a cent.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. LENROOT. This has nothing to do with the item that has been stricken out?

Mr. ROBBINS. Oh, no.

Mr. LENROOT. Very well; I do not insist upon the explanation.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ROBBINS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD upon this amendment.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

Elizabeth River, Va., including eastern, western, and southern branches, and approaches thereto.

Mr. SMALL. Mr. Chairman, I move to strike out that paragraph. That survey is now unnecessary in view of the report of the Secretary of War, based on the recommendation of the General Board of the Navy.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Trent River, N. C., with a view to deepening the channel along that portion of the river known as Foys Flats.

Mr. HOOD. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 31, line 19, after the words "Foys Flats," strike out the period, insert a comma, and add the following: "and creating a turning basin at the confluence of Mill Creek and Trent River."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from North Carolina.

Mr. HOOD. Mr. Chairman, I shall, with a great deal of pleasure, vote in favor of this rivers and harbors bill that we are now considering. I believe that it will add greatly to our economic conditions. It is essential for the successful conduct of our war that every encouragement be offered the producers, and giving them better water transportation will certainly be a great stimulant and make their efforts to produce abundant foodstuffs easier. I regret that it was not deemed wise to embody the new projects that appeared in the bill which passed the House at the regular session of Congress, but unfortunately, as a result of the congested condition of the Senate Calendar, was never considered by the Senate.

The amendment I propose simply authorizes the survey not only along that portion of the river known as Foys Flats but gives authority for surveying a proposed turning basin at the confluence of Mill Creek and Trent River. Mr. C. E. Foy, a prominent business man of Newbern, N. C., wrote me on June 21, in connection with this survey, as follows:

We have been trying for some time to get the Trent River improved so as to locate and develop certain large industrial interests at that point. The river is not quite wide enough there for the usual barge or vessel which we should want to go in there from Baltimore and Norfolk to turn around. In order to do this successfully, the mouth of Mill Creek, which empties into Trent River at Pollocksville, should be pumped to a greater depth, so as to make a turning place at that point. It would also give the people an opportunity to establish a cotton yard just up the creek where boats might be loaded with cotton and other products.

The town of Pollocksville, with several hundred inhabitants, is located near the proposed location of the turning basin, and vast quantities of merchandise and farm products are transported over the river. Large quantities of marl, which is used by farmers as fertilizer, is embedded in the vicinity of the river, and the creation of a turning basin and the deepening of Foys Flats would be a great help in getting this marl to the farmers.

Under date of May 7, Mr. Walter West, an officer of the Trent River Marl & Lime Co., wrote me as follows:

We were compelled to turn down several thousand dollars' worth of orders from the counties of Hyde and those adjoining because we could not get boats of sufficient size to our landing. Twelve miles up the river our people are unloading $7,500 in machinery to-day and are prepared to invest $50,000 in our efforts to get out the marl in paying quantities, but as more than one-half of the output is shipped by water you can readily see how we will be handicapped in production. We are putting in improvements that will turn out between 50,000 and 100,000 tons this summer and fall, but if we have no better means of transportation than at present, we will be seriously held up.

With the exception of Foys Flats there is a channel depth of 6 feet at dead low water, which is equivalent to 9.3 feet at mean low water as far as Pollocksville.

Pollocksville is located about 15 or 20 miles above Newbern, where the Trent River empties into the Neuse River. When the boats reach Neuse River they have no trouble in reaching the commercial centers.

I have several other items in this bill for surveys, and, without an exception, they are all meritorious and worthy of favorable consideration. It is indeed difficult for gentlemen who are not acquainted with the conditions that confront the people of my district who are dependent upon transportation by water to understand how much benefit is derived by reason of the improvements of their waterways.

If you will indulge me, I desire to briefly call your attention to the merits of the various other surveys which the committee has been kind enough to embody in this bill for my district.

SMITHS CREEK.

There is an item providing for the survey of Smiths Creek, Pamlico County, N. C. There is great need for the removal of several lumps and projecting points in the entrance channel at the mouth of this creek, known as Oriental Harbor. The project for this improvement was adopted by the rivers and harbors act of 1910, which provided for the excavation of a basin in the small bay located in the center of the town of Oriental and just inside the mouth of the creek to the depth of 10 feet at mean low water. It was provided that local interests construct a bulkhead for the deposit of dredged material. The bulkhead was constructed by the people of Oriental, but unfortunately a controversy arose in regard to the capacity of the bulkhead to hold the material dredged. The people of Oriental contended that the dredging company, through carelessness, tore down a portion of the wall; on the other hand, the Government contended that the bulkhead was not constructed in a proper manner to hold the excavated material. They therefore abandoned the project.

Messrs. W. J. Smith & Son, prominent business men of Oriental, wrote me in connection with this matter as follows:

The bulkhead on the outer portion of the basin was constructed by the Oriental Bulkhead Co. according to blue prints furnished by Mr. Brown's engineers office at Wilmington, N. C. At that time the construction was of ample strength to hold the mud had the dredging company done their duty. But instead their wire cables were fastened to the bulkhead wall by which the dredge was swung. The end of the 22-inch discharge pipe was dumped in 4 feet of the bulkhead wall, pouring a steady stream of mud and water, cutting up ground beneath, tearing down the wall for some distance. The wall stood at all other points.

Oriental is a prosperous town of several hundred people, and the improvement of this harbor will be a great commercial advantage to these people. Thousands of tons of commerce go in and out of this harbor monthly. I earnestly hope that Members will vote favorably upon this project so that another opportunity may be given to finish the improvement undertaken by the Government or make such improvements as are essential.

Oriental, to a large extent, is used as a distributing point for traffic from Morehead City and Beaufort, and is in close proximity to New Bern, Washington, and other centers of commerce.

BROAD CREEK.

Another item provides for a survey of Broad Creek, Pamlico County. Broad Creek empties into Neuse River, and for several miles up the creek there are located on both sides mercantile establishments, lumber mills, and fish and oyster factories.

The towns of Pamlico and Whortonsville are also located on this creek, and these people are dependent solely upon water transportation. The deepening of the creek would be a great help to the people living adjacent thereto, and I am sure it is a matter worthy of approval.

Mr. T. G. Wise, a well-known lumber manufacturer of that section, in writing me, says:

There is 7 feet low water up the creek, a distance of 200 yards to the west of the Dale Mill site. The channel along there is now about 5 feet, and to make the channel 7 feet it would be necessary to dig a space of about 1,200 yards. I do not think it would cost exceeding $3,000 to do this work, and thereby remedy the shallow portions of the creek.

QUEENS CREEK.

There is another item in reference to Queens Creek, Onslow County. This creek is located in Onslow County and empties into Onslow Sound, and is the only way by which the people of that section can get merchandise and dispose of farm products except to haul same over dirt roads for 15 or 20 miles. Mr. S. A. Starling, a well-known merchant and farmer, in writing me in connection with this survey, says:

This creek is the only way by which we can get goods and fertilizers and carry off our farm products without carting them for a distance of about 15 or 20 miles. There is a lot of freight handled up and down the creek, as much as from 15 to 30 tons a week, and if we can have this creek properly opened up to Hubert, where the boat now goes, there would be a great deal more business done, and it would save to the farmers in this entire county an immense amount in the way of cheapening their freight rates.

I know this is a meritorious and worthy proposition.

NORTHEAST RIVER.

The only other item I have for a survey in the bill for my district is Northeast River. This river is navigable as far up as Hallsville, and it is the purpose to have it surveyed from Hallsville to the mouth of Goshen Swamp, a distance of a few miles.

These people have no railroad facilities, and they are anxious to have the channel of the river dredged and trees, underbrush, and other obstacles taken from the bed of the river so that boats can operate to the mouth of Goshen Swamp. A petition was submitted to me, signed by over a hundred of the best citizens of that vicinity, asking that Congress authorize a survey in

order to ascertain the advisability of undertaking the improvement.

All of these surveys are exceedingly important to my constituents. With the expenditure of a trifling amount, I believe circumstances will so develop that the Government can make such improvements as will be for the convenience, welfare, and happiness of the people adjacent to these waterways.

I earnestly appeal to Members of Congress to allow these items to remain in the bill.

A leading newspaper of my district, the Sun-Journal, in a recent issue, had the following to say:

According to statements made by local boatmen there is no abatement in river shipping, as is usually the case during the summer months, and every boat that is water-tight and can be used is employed in navigating the waters of this section. Quite a large portion of the potato crop is being sent to Newbern on boats to be loaded on the freight cars, and this requires many boats, while others are being used in the transportation of general freight.

The streams down in this section of my district are swarming with small boats, laden with fish, fruits, vegetables, truck, and other kinds of commerce, hastening same to the markets. In this day of the scarcity of foodstuffs and high prices, it seems to me the Government should not deny the expenditure of a few dollars that might enable the marketing of foodstuffs that might otherwise decay for lack of transportation. In turn, the boats carry merchandise, fertilizer, and other supplies back to the farms where they are able to produce another crop.

Mr. SMALL. Mr. Chairman, I think there is no objection to that amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I move to strike out the paragraph as amended. I do not know where Trent River, N. C., is, or how deep it is at present, how wide the channel is, or how much water there is in it, whether it has any water at all, or what these flats amount to, whether they are simply swamps, whether you want to drain swamps in order to reclaim land, or if this is proposed to be done in the interest of navigation. It seems to me, if you are going to drain these flats at the expense of the Government, that there ought to be some cooperation on the part of the people of North Carolina.

I have no objection to cooperating with the people of North Carolina in any legitimate enterprise, but there is no reason on earth why the Government of the United States, including the people of Illinois, should pay taxes for the purpose of deepening a river, if there is a river there, or putting water into a channel, if there is a channel there. Nor is there any reason why they should pay taxes for the purpose of reclaiming a lot of bogland unless you want to cut the turf and use it for fuel in place of coal, which I understand is not found in this section of North Carolina. Of course, turf is useful as a fuel, and it may be, inasmuch as the food bill which we passed a day or two ago provides that we shall conserve and control and regulate the production and distribution and sale of feeds, food, and fuel, that the draining of these flats down there, which as I understand consists of bogs on which I understand grows a lot of turf which will prove useful to obtain fuel. But I do not think that the money out of the Public Treasury ought to be used to create a condition in that section of North Carolina which will enable you to engage in the fuel business and thereby reap a rich harvest as a result of the war. If it is true that this is an emergency war measure, on that account I am not so certain that I have not made a mistake in moving to strike it out, for I am inclined to do everything within my power to help conserve the natural resources of the country, even the water that we are obliged to put into some of these creeks by the construction of artesian wells.

Mr. HOOD. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. HOOD. Does the gentleman regard marl containing the ingredients of phosphoric acid, carbonate of lime, and potash essential to the prosecution of the war?

Mr. MADDEN. Well, I would think that is one formation that is not worth much anywhere on earth except for the purpose of destroying the utility of land on which it grew. I have seen marl in such places you could not dig it at all; you could not even dynamite it. Marl is one of those fractious substances that can not be even drilled into and blown out by dynamite, and sometimes it is nothing but blue clay and pebbles or round stones washed smooth by the floods of time.

Mr. DOOLITTLE. Will the gentleman yield for a question?

Mr. MADDEN. I will.

Mr. DOOLITTLE. Does not the gentleman think that we can conserve the resources of the country by defeating this bill?

Mr. MADDEN. I do; and I think we are conserving the Treasury of the United States to some extent. I think the time has come when raids on the Treasury are no longer popular. The time was, I believe, when such things were popular; but the time is here when they are not going to be popular any more. We have already authorized an expenditure of $12,000,000,000 of the American people's money for the conduct of the war. For all war measures I am in hearty accord with the President of the United States, but this is not a war measure.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Lynchs River, S. C.

Mr. SMALL. Mr. Chairman, I offer a committee amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 32, between lines 2 and 3, insert:
"Broad and Congaree Rivers and Columbia Canal, at or near Columbia, S. C., with a view of combining improvements for navigation and water power, consideration to be given to any proposition of local cooperation."

Mr. MADDEN. Mr. Chairman, I make the point of order against the amendment offered by the gentleman from North Carolina, and my reason for the point of order is the Committee on Rivers and Harbors has no jurisdiction over water power or over dams. That belongs to the committee——

Mr. SMALL. I ask to strike out the words "water power."

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to modify his amendment by striking out the words "water power." The Clerk will report the amendment as modified.

The Clerk read as follows:

On page 32, between lines 2 and 3, insert:
"Broad and Congaree Rivers and Columbia Canal, at or near Columbia, S. C., with a view of combining improvements for navigation——

Mr. SMALL. I would like to strike out the word "combining."

Mr. MADDEN. I make a point of order against the amendment as amended.

The Clerk read as follows:

On page 32, between lines 2 and 3, insert:
"Broad and Congaree Rivers and Columbia Canal, at or near Columbia, S. C., with a view of improvements for navigation, consideration to be given to any proposition for local cooperation."

The CHAIRMAN. Is there objection to the modification? The Chair hears none.

Mr. MADDEN. Mr. Chairman, I make the point of order that this committee has no jurisdiction over canals, and that if the question of a canal was up for consideration on the floor of this House and stood alone that it would not be privileged, and not being privileged standing alone, that this committee can not take jurisdiction in an appropriation bill to make it privileged.

Mr. SMALL. If the chairman will read the amendment, he will see that it is not for any canal, but a survey of the Broad and Congaree Rivers. The word "canal" is simply used for the purpose of designation.

The CHAIRMAN. Does the gentleman from North Carolina state to the committee that as to the Columbia Canal they have no intention of surveying for the purpose of improving any canal?

Mr. SMALL. That is my understanding. A gentleman was up here representing the Legislature of South Carolina, I may say, and the amendment was drawn in the office of the Chief of Engineers, and in all my conferences with him it was not my understanding that it included the improvement of the canal.

Mr. MADDEN. The fact that the amendment was drawn in the office of the Chief of Engineers does not imply that the Chief of Engineers holds himself responsible for the merits of the question. I want to know, first, whether the Chief of Engineers becomes responsible for it, or whether he speaks with authority; and even then it has nothing to do with the germaneness of the subject.

Mr. STEVENSON. Mr. Chairman, Mr. LEVER, the Representative of that district, I believe, is not in the House, but I will state to the gentleman from Illinois that the canal is quasi State property and the survey is to complete the river up to the mouth of the canal, and I understand the State has prepared itself, and the water-power company that is exploiting it with the State, to develop the canal to the river.

There is no proposition pending to in anywise spend any of the Government money on the canal. The designation there is merely to designate to what point it is to be surveyed and the connection that is to be made between the canal and the river.

The CHAIRMAN. The Chair will ask the gentleman from South Carolina a question: This is purely a question of fact?

Mr. STEVENSON. Yes.

The CHAIRMAN. This is for the survey of the Broad and Congaree Rivers and Columbia Canal at or near Columbia, S. C., with a view to combine improvements for navigation and water power, consideration being given to any proposition of local cooperation.

Is the purpose of the amendment a survey of the Columbia Canal?

Mr. STEVENSON. No, sir; the Columbia Canal, as I understand, has been surveyed, located, and a large part of it completed.

The CHAIRMAN. And the purpose is to improve the Broad and Congaree Rivers, but up to the Columbia Canal?

Mr. STEVENSON. The Broad River and the Saluda River unite just above Columbia, and they become the Congaree River at and below Columbia. The proposition is to survey the Congaree River and the Broad River, which are the same river, to determine the feasibility of its being made navigable above and below, and of course the canal is a part of the river right there, and is taken into consideration. But it does not contemplate that the Government should have anything to do with it.

The CHAIRMAN. Is it the purpose to survey this canal with the idea of improving this canal in conjunction with the Broad and the Congaree Rivers?

Mr. STEVENSON. I really do not know, Mr. Chairman. I do not know what the purpose is there, but I know the provision is made by the State for the canal to be improved independently of the Government. And it is a representative of the State that is asking this to be done.

The CHAIRMAN. The Chair would like to ask the gentleman from North Carolina [Mr. SMALL] if he can enlighten the Chair on that proposition?

Mr. SMALL. Mr. Chairman, I intended to state before that so far as I am informed, and I talked with a gentleman who said he was entirely familiar with it, and I conversed with Mr. LEVER, of this House, briefly. At that time he was so busy I could not confer with him but a short time, and all my information is to the effect that the proposed survey is for a natural waterway and not a canal. The word "waterway" is used to designate——

Mr. MADDEN. Is the gentleman willing to make that statement on his responsibility as a Member of the House and chairman of this committee?

Mr. SMALL. I can not make myself any clearer than I have already.

Mr. SHACKLEFORD. Mr. Chairman, I want to be heard on that. The Chairman has asked for the facts here. If this amendment should be carried, the War Department or the Engineering Department would not look at the statement of the gentleman from South Carolina or the statement of the gentleman from North Carolina, or to the statement of the gentleman from Illinois, but would look at the text of the amendment. You must read the amendment itself to see what the facts are. The Engineering Department, when these instructions go down to it, in order to make that survey will have to do what the identical words in the amendment say they shall do, and they can not be, it seems to me, enlarged by statements that gentlemen may here make upon the floor that are not a part of the amendment itself. If on their face they carry something subject to a point of order, they could not be rendered immune to a point of order by some statement a gentleman makes on the floor.

Mr. ADAMSON. Why can not you strike out the Columbia Canal?

Mr. STEVENSON. Mr. Chairman, I move to strike out the words "and Columbia Canal."

The CHAIRMAN. Does the gentleman from North Carolina make that modification?

Mr. SMALL. I do.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to modify his amendment by striking out the words "and Columbia Canal." Is there objection?

Mr. MADDEN. I object.

Mr. SMALL. I move to strike out——

Mr. MADDEN. I have a point of order pending against it.

The CHAIRMAN. The point of order is sustained.

Mr. SMALL. I offer the amendment now with the words "and Columbia Canal" stricken out.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Amendment of Mr. SMALL: Strike out the words "and Columbia Canal."

Mr. MADDEN. Let us hear how it will read with the words stricken out.

The CHAIRMAN. The Clerk will report it as it would read with the words stricken out.

The Clerk read as follows:

Broad and Congaree Rivers at or near Columbia, S. C., with a view to improvement for navigation, consideration being given to any proposition of local cooperation.

Mr. MADDEN. Now, Mr. Chairman, I desire to be heard on that. We have a proposition here which unquestionably is intended to provide for the creation of a lot of water power and for cooperation with private individuals who are engaged in the development of water power. In the first place, this amendment proposed that the Government of the United States shall make a survey with a view to creating a dam, or rather creating a water power, and then that was stricken out, and then the amendment still provided for a survey of the canal.

Mr. DEMPSEY. Mr. Chairman, I make the point of order that the gentleman is not discussing the amendment that is presented to the House now. He is discussing the previous amendment.

The CHAIRMAN. The point of order is overruled.

Mr. MADDEN. Just a moment. You can not make a point of order of that sort.

Now, the amendment proposes to authorize a survey of these two rivers and to cooperate with any other interests that may seek to cooperate with the Government of the United States. For what? Why, for the development of water power. It is for the development of water power, and who knows who is going to control this water power? Is the Government of the United States to have anything to say about the control of the water power?

Mr. DEMPSEY. Mr. Chairman, I rise to a point of order. The gentleman is discussing the merits of the proposition. He is not discussing at all the question whether it is in order or not.

Mr. MADDEN. Mr. Chairman, I refuse to yield.

The CHAIRMAN. The amendment is now pending. The Chair overrules the point of order.

Mr. MADDEN. I am talking to the amendment. Now, we propose to authorize a survey for the purpose of developing water power on these two rivers in South Carolina at the junction of a certain canal. It is true we have stricken out the words "water power," but we still have in the amendment that is pending a provision that the Government of the United States is to cooperate in the expenditure of what money it is proposed to expend together with private interests.

Now, why should private interests be permitted to enjoy any benefits to be derived from the expenditure of public money unless there is somebody somewhere who has a friend who wants to develop water power to sell to the innocent bystander without the power on the part of the United States to regulate the charge to be made or the income to be received? I do not believe that this sort of legislation is worthy. I do not believe it is justified. I do not believe that it ought to receive the serious consideration of this House. When we legislate on a great problem like this, involving the expenditure of public money and for cooperation between the Government of the United States and private individuals, from which private individuals are to receive benefits from the expenditure of public money, we have the right to ask the question, "Why?" and I desire to ask the question of the chairman of the Committee on Rivers and Harbors.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. I desire to ask why do we propose to insert this amendment in the river and harbor bill that will give to some private individual, or some corporation, either in North or South Carolina or somewhere else, an opportunity as the result of the expenditure of public money to organize and control the hydroelectric energy that may be developed by this water power at the expense of the American people?

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. No; I do not yield.

Mr. MEEKER. I thought you wanted an answer.

Mr. MADDEN. I am asking the question of those in charge of the bill, who have made themselves responsible for these amendments.

I do not propose to sit here quietly and permit any such amendment as this to be inserted in this bill without my protest. Some one must protest; some one must call attention to the iniquity of such legislation; some one must call attention to the slipshod way in which it is proposed to insert important legislation on a river and harbor bill; some one must make himself responsible for a protest to prevent the turning over of public property out of the Treasury of the United States to private individuals in North or South Carolina to enable them to foist upon the

people of those States electric current at two or three times its cost.

Why, should we, the representatives of the American people, stand here in our places and vote to make these men down there rich by developing water power upon these streams at the cost of the American people? I protest against it with all the vigor of my soul. [Applause.]

Mr. STEVENSON. Mr. Chairman, the gentleman from Illinois is mistaken as to his facts. The Columbia Canal was constructed partially by the State at a cost of about $1,000,000 and then conveyed to the city of Columbia on condition that she procure the completion of the canal, connecting Congaree River below the city with Broad River above Columbia and above the shoals of Broad River, so as to make navigation practicable from Georgetown to the upper reaches of Broad River. The city, finding itself financially unable to complete the same, conveyed it to a syndicate, who were to complete the same and have the right to the water power developed. This syndicate completed it to the point of developing water power, but has never completed to the connection with Congaree River below Columbia, and the State is now endeavoring to require this to be done so as to open Broad River to navigation and bring the boats up to the city proper. In order to force this company to do this in accordance with its contract, the commission appointed by the State desires this survey to show the possibility of navigation to be developed by this improvement, and the statement that it is to help some company to develop water power to sell to the city or State is entirely erroneous.

Mr. SMALL. Mr. Chairman, I move that all debate on this amendment be now closed.

The CHAIRMAN. The gentleman from North Carolina moves that all debate on this paragraph and amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. SMALL].

The amendment was agreed to.

The Clerk read as follows:

Ashley River, S. C., from the Standard Wharf to the Virginia-Carolina Chemical Co. to Lambs, with a view of improving the channel to a depth of not less than 8 feet.

Mr. WALSH. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman of the committee a question. I notice that this improvement is to run to the wharf of the Virginia-Carolina Chemical Co., evidently located on this river. I want to inquire whether they are cooperating with the Government in any way in carrying out improvements in that locality which are contemplated with a view of improving the channel to a depth of not less than 8 feet. I want to know whether this company will contribute anything to it.

Mr. SMALL. What they will do will depend upon the report of the engineers after the examination and survey.

Mr. WALSH. Has there been any improvement made here before?

Mr. WHALEY. If the gentleman will allow me, I can answer that question.

Mr. SMALL. I yield to the gentleman from South Carolina.

Mr. WHALEY. I will say to the gentleman from Massachusetts that there has been a survey and an improvement up to the wharf of this company and beyond it, and this proposed survey is above the wharf of the company. It does not affect their property at all.

Mr. WALSH. Has this company cooperated at all?

Mr. WHALEY. They have nothing to do with it. This improvement is beyond the company's wharf.

Mr. WALSH. I am inquiring about the improvement that has already been made.

Mr. WHALEY. That was below their wharf.

Mr. WALSH. This says it is up to their wharf.

Mr. WHALEY. There is a misprint in the bill. The word "to" at the beginning of line 9 should be "of," and I move to strike out the word "to" in line 9, page 32, and to insert the word "of."

The CHAIRMAN. Does the gentleman from Massachusetts yield for that purpose?

Mr. WALSH. I do. I hope the amendment will prevail.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from South Carolina.

The Clerk read as follows:

Amendment offered by Mr. WHALEY: Page 32, line 9, strike out the word "to" and insert the word "of."

Mr. HUMPHREYS. The word "to" appears twice in line 9. Which one is to be stricken out?

Mr. WHALEY. At the beginning of the line.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. WHALEY].

The amendment was agreed to.

The Clerk read as follows:

For the construction of a navigable waterway of suitable depth and width to answer the needs of commerce, connecting the waters of the Flint and Ocmulgee Rivers in the State of Georgia.

Mr. CALDWELL. Mr. Chairman, I move to strike out the last word. I would like to ask what kind of commerce they have down there and how extensive an improvement would be required in order to accommodate that commerce.

Mr. PARK. It will cost about two or three thousand dollars to make it.

Mr. CALDWELL. Is it a canal?

Mr. PARK. Yes.

Mr. CALDWELL. Then I raise a point of order against the item.

The CHAIRMAN. The point of order is overruled. The Chair thinks it comes too late. The Clerk will read.

The Clerk read as follows:

Savannah River at and near Augusta, Ga., for the purpose of determining what additional improvement is necessary, if any, in the interest of navigation and of flood protection; also the consideration of any proposition for cooperation on the part of local or State interests.

Mr. HUMPHREYS. I make a point of order against the paragraph.

Mr. VINSON. Mr. Chairman, I think the point of order is well taken, and I have no objection to it.

The CHAIRMAN. The point of order is sustained.

Mr. VINSON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 32, line 15, insert a new paragraph as follows:

"Savannah River at and near Augusta, Ga.: For the purpose of determining what erosion is taking place and what improvements are necessary to prevent the same in the interest of navigation, and also the consideration of any proposition for cooperation on the part of the local or State interests."

Mr. STAFFORD. Mr. Chairman, I make the point of order that this is not in order on this bill, because the Committee on Rivers and Harbors has no jurisdiction on the question of erosion of banks and streams. That is a matter that relates to the Committee on Flood Control. The Chairman will see that the purpose of the amendment is to determine erosion, and that that comes particularly and peculiarly under the control of the Committee on Flood Control. Certainly if that is the fact it is not in order on this bill, which is a privileged bill, to take jurisdiction of the erosion of banks.

Mr. HUMPHREYS. Why does the gentleman think that the erosion of banks belong peculiarly to the Committee on Flood Control?

Mr. STAFFORD. Because the erosion of banks comes as a result of floods on various rivers.

Mr. HUMPHREYS. Oh, no; banks may be eroded by streams without any flood.

Mr. VINSON. They may be eroded in dry weather.

The CHAIRMAN. Is it the gentleman's opinion that if the investigation was touching erosion which affected navigation, the Committee on Rivers and Harbors would have no jurisdiction?

Mr. STAFFORD. I do.

The CHAIRMAN. The point of order is overruled. The question now is on the amendment offered by the gentleman from Georgia.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Banana Creek, Fla.

Mr. MADDEN. Mr. Chairman, I move to strike out the item. I am glad we have reached the stage where we are going into the fruit business. I thought that bananas were only grown in Central America, but I discover now that we have a creek in Florida celebrated for the quality of its bananas, and we propose to spend out of the Federal Treasury the money of the American people to encourage the development of bananas as a war measure.

Mr. MEEKER. Will the gentleman yield for a question?

Mr. MADDEN. Yes.

Mr. MEEKER. Does the gentleman intend to strike at the great American banana?

Mr. MADDEN. If the gentleman can show where we have grown any bananas in America, I would be glad, because I have not been able to discover that we grew bananas in this country. I have been fortunate enough to travel through Central America and over banana plantations there, and saw great quantities of bananas grown there, as well as in other parts of the world. This is the first time I ever knew there was a banana creek on which

there was a possibility of spending any of the American people's money with a view to floating bananas. We are asked to engage in an enterprise that will encourage the American people in floating bananas. We have had them floating whisky and sometimes wines. We heard yesterday about their floating sand down some of these creeks, and they had to snag the creeks to prevent the sand from going down too rapidly.

Mr. SEARS. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. SEARS. Does the gentleman believe that this creek should be criticized simply because of its name? It is no more responsible for its name than the gentleman is for his name.

Mr. MADDEN. If I were responsible for my own name, I might change it. I do not know whether I would or not; but I am quite sure that the banana is a very delicious fruit and the American people are fond of bananas. They feed them to the children frequently in their adolescent period, but when people grow a little older they discover that the banana is an indigestible commodity and they do not eat much of them. We ship these bananas to Europe and sell them to the European people, and I hope we will be able to develop enough bananas on Banana Creek to enable us to fight the war; but I should like to know how much of the American people's money is to be invested in this, so that we may be able to tell whether we get our money's worth for it or not.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. JOHNSON of Washington. I would like to ask the gentleman if he is making his speech on a mileage basis, as he seems to be moving about a great deal?

Mr. MADDEN. I am a good deal like the newspaper reporter who has not got a regular job. They hire them at space rates. I realize that if I keep moving about I shall cover more space, though I do not know that my pay will be increased by the number of additional words that I use.

Mr. MEEKER. Are we to infer by that that the gentleman is covering more space with his feet than with his head?

Mr. MADDEN. The gentleman can infer what he pleases, but if I did not use any more sense in the exercise of the thoughts that I express than the gentleman from Missouri does when he has the floor, I think I would be doing more with my feet than the gentleman does with his head [laughter], but I am against bananas generally speaking, and particularly against bananas grown at the expense of the American people and paid for out of the Treasury of the United States, and I sincerely hope that the membership of the House will have sufficient wisdom to see the importance of striking this out of the bill.

The CHAIRMAN. The time of the gentleman from Illinois has expired. The question is on the amendment of the gentleman from Illinois.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Black River, Ark. and Mo.

Mr. SMALL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 34, amend by striking out paragraph in line 16 and inserting the following:

"Black River, Ark. and Mo., above Black Rock, Ark., an instrumental survey with a view to preparing plans and estimates of cost for an improvement looking to the diversion of the flood waters of the St. Francis Basin to the basin of the Black River, and to determine what would be the effect upon the navigation of the two rivers if such diversion should be made. The report of survey shall also include consideration of any proposition by local interests for participation in the operation of said project on account of the benefits that may be derived by local interests from said diversion, if it should be done."

Mr. HUMPHREYS. Mr. Chairman, I make the point of order against the amendment.

The CHAIRMAN. The Chair would like to hear the gentleman from Mississippi.

Mr. HUMPHREYS. Mr. Chairman, I would like to ask the gentleman from North Carolina if the purpose of the amendment is not to do exactly the thing which is proposed in lines 17, 18, and 19, with respect to the St. Francis River, Ark.?

Mr. SMALL. I will say to the gentleman that that paragraph has not been reached, but there will be no objection to its going out.

Mr. HUMPHREYS. Mr. Chairman, there is no question but that the point of order would be sustained as to the St. Francis River item. This amendment here, Black River, Ark. and Mo., as I understand it, is to do exactly the same thing that it was originally intended the survey ordered for the St. Francis River should do. There was a survey ordered in the river and harbor bill a year ago of the St. Francis River, with a view to control of its floods, and as the investigation proceeded it was suggested by the engineers that by diverting the flood waters from the upper reaches of the St. Francis into the Black River it might have a very beneficial effect upon the control of the floods of the lower St. Francis. I think, however, that I am mistaken about this other item. Now, this amendment as proposed simply amplifies the authority which has heretofore been given the engineers in surveying the St. Francis River for the purpose of controlling its floods. That being true, I think there can be no question as to the fact that this is the purpose of the amendment, and if it is a fact I submit that it is not proper to be carried in a river and harbor bill, because it is not a privileged matter. It gets the benefit of the privilege of an appropriation bill to which it is not entitled. There are many surveys for flood problems throughout the country that are now pending properly before the Committee on Flood Control. This is simply an effort to take this particular one out and give it a privilege that is denied to all the others. I submit that it is not in order.

The CHAIRMAN. Does the gentleman from North Carolina desire to be heard?

Mr. MOORE of Pennsylvania. Will the gentleman yield for a single question?

Mr. HUMPHREYS. I will.

Mr. MOORE of Pennsylvania. Was a separate bill introduced in the House for the improvement of the St. Francis River?

Mr. HUMPHREYS. Yes.

Mr. MOORE of Pennsylvania. Was a bill introduced in the regular way for the improvement of the St. Francis River as provided for in this paragraph?

Mr. HUMPHREYS. No; the bill providing for the improvement of the St. Francis River went to the River and Harbor Committee before the Committee on Flood Control was created. A survey was ordered of the St. Francis River, the principal purpose being for the control of its flood and the reclamation of sunken lands of the St. Francis. Now, in the prosecution of that investigation the engineers concluded that the surveys were not broad enough. They thought that they ought to make a survey of the Black River to take care of the flood waters of the upper St. Francis down through the Black River and thereby relieve the situation on the St. Francis. Now, the purpose of the amendment——

Mr. MOORE of Pennsylvania. But the point I am making is this: The Chair has held that it is too late to make a point of order on a paragraph like this when a bill has been introduced in the regular way and the objector has lost his day.

Mr. HUMPHREYS. The gentleman from Pennsylvania, with all due respect, in my opinion misconceives the decision of the Chair. What the Chair decided is that a matter that is not privileged can not be made privileged by putting it into a river and harbor bill, which is an appropriation bill, but if it is merely an appropriation and it was introduced in the bill, although it might originally have gone to some other committee, it is too late to make a point after the committee has reported it to the House.

Mr. LENROOT. There is one exception to that point; when a committee having the right to report at any time does not introduce an original bill and reports it, there has been no opportunity to raise the question, and the principle the gentleman now states does not apply.

Mr. HUMPHREYS. There has been no opportunity to raise an objection.

Mr. MOORE of Pennsylvania. The situation would be different if a bill was introduced in the Sixty-fifth Congress and the gentleman came in making an objection.

Mr. HUMPHREYS. I think the gentleman misses my point.

Mr. SMALL. Mr. Chairman, this provision on its face is not subject to the point of order as being beyond the jurisdiction of the committee. Now, I want to be perfectly frank, and, for all I know, the question of improving this stream for navigation may involve in part a matter of the control of floods; but if so, it will be merely incidental to the question of navigation. There are hundreds of rivers of the United States where a greater or less degree of deterioration of channel has taken place and specific plans for the improvement may be affected by the fact that at certain seasons of the year the river rises and falls as a result of excessive rains, and I submit all the Chair can do in determining this point of order is to look at the face of the proposition to determine whether the point of order should be sustained.

Mr. CARAWAY. Mr. Chairman, that is all I intended to say. I want to call the attention of the Chair to the Manual, section 777, as appears on page 344. The rule is, "Whether or not an amendment be germane should be judged from the provisions of its text rather than from the purposes which circumstances may suggest," and references are made to the fifth volume of Hinds'

Precedents, pages 5785 and 5803. The Chair can only look at the face of the amendment and can not go back and determine what may be the purpose.

The CHAIRMAN. The Chair is ready to rule on this proposition. The amendment is in reference to the—

Black River, Ark. and Mo., above Black Rock, Ark., an instrumental survey with a view to preparing plans and estimates of cost for an improvement looking to the diversion of the flood waters of the St. Francis Basin to the basin of the Black River, and to determine what would be the effect upon the navigation of the two rivers if such diversion should be made. The report of surveys shall also include consideration of any proposition by local interests for participation in the operation of said project on account of the benefits that may be derived by local interests from said diversion if it should be done.

The Chair thinks that the rule is plainly laid down that the Rivers and Harbors Committee is a committee, under Rule XI, section 56, with power to report the rivers and harbors bill at any time. It has a privilege that is beyond the Flood Control Committee. This bill, if offered in the House as a separate bill, would have been referred to the Flood Control Committee, and if the Rivers and Harbors Committee had made complaint about it they could have made a motion in the House and had it referred from the Flood Control Committee to the Rivers and Harbors Committee. But this provision now offered is the first time that it can be objected to. The question could not have been objected to sooner because it was not introduced as a separate bill.

Mr. CARAWAY. Will the Chair permit me? He is in error about that.

Mr. MOORE of Pennsylvania. I understood a bill was introduced in this Congress.

Mr. CARAWAY. The Chair is in error. The bill was introduced in the House.

The CHAIRMAN. The bill probably was introduced in the House, but it would be reported not as a privileged bill but as bills of ordinary character. This amendment has never been introduced until now, and could not have been objected to sooner.

It is offered as a committee amendment; it is put on a privileged bill, and the Chair does not think that the Committee on Rivers and Harbors has jurisdiction of this question in this bill, but that since the creation of the Flood Control Committee that committee has jurisdiction of it. They are not permitted under the rules of the House to report at any time as the Rivers and Harbors Committee is permitted.

The Chair sustains the point of order.

Mr. CARAWAY. Mr. Chairman, I wish to ask unanimous consent at this time to pass over that in order that I may offer an amendment.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent that this item be passed for the present.

Mr. HUMPHREYS. That he may refer to this particular part of the bill again for the purpose of offering an amendment?

The CHAIRMAN. Yes. Is there objection?

Mr. STAFFORD. What is the request of the gentleman from Arkansas?

The CHAIRMAN. The request is that this part of the bill be passed for the present that he may offer another amendment, if he desires to. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

St. Francis River, Ark., with a view to the construction of a lock and dam near the mouth, to improve navigation and to withhold the flood waters of the Mississippi River.

Mr. HUMPHREYS. Mr. Chairman, I make the point of order against that.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Main ship channel in or near the mouth of the Columbia River on the southerly or Oregon side from a point in the vicinity of Point Adams along channel to or a short distance above Tongue Point, and of Youngs Bay from the Columbia River channel to a point 1 mile above the county bridge, so as to give a depth of 40 feet at low tide.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee if this survey is designed for the purpose of fixing the main ship channel in the Columbia River near its mouth?

Mr. HAWLEY. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. SMALL. Now, if the gentleman will repeat his question.

Mr. JOHNSON of Washington. I am asking if this survey, as proposed to be provided for on page 36, lines 14 to 19, is designed for the purpose of affecting the main channel of the Columbia River near its mouth?

Mr. SMALL. No; I do not think that the purpose of it is to affect the channel at the mouth of the Columbia River, but the gentleman will understand how difficult it is to answer accurately questions regarding surveys. The primary purpose is to secure a detailed examination and survey.

Mr. JOHNSON of Washington. That being the case, why is it necessary to so closely specify where this survey is to be?

Mr. SMALL. This survey was inserted at the earnest instance of the gentleman from Oregon [Mr. HAWLEY], and I would like to read what he says about this. He says:

WASHINGTON, D. C., *June 25, 1917.*

Hon. JOHN H. SMALL,
Chairman Committee on Rivers and Harbors,
House of Representatives.

MY DEAR SIR: The item on page 36, in lines 14 to 19, of the pending river and harbor bill provides for two surveys. That part contained in these words: "Main ship channel in or near the mouth of the Columbia River on the southerly or Oregon side from a point in the vicinity of Point Adams along channel to or a short distance above Tongue Point" relates to what I understand has been for a long period the natural channel of the river along the city of Astoria and its mills and factories and to provide specifically for its improvement and preservation. The port of Astoria has constructed very large expensive public docks, modern in every particular and properly located. Also across Youngs Bay and down the river from Astoria on the same channel—that is, using the same channel—the Northern Pacific Co. have built large docks. The port commission also have done much work in the channel by dredging, using the dredged material to make fills and bulkheads. This channel accommodates all the business on that part of the river, and is the natural course for vessels to take bound for points above.

The part of the paragraph reading "and of Youngs Bay from the Columbia River channel to a point 1 mile above the county bridge" is to provide for the growing business in that section. There are located on this bay several shipbuilding concerns, which are engaged in the construction of wooden ships, and I have been informed that others will be located there. There are also other commercial uses for the bay. There is a draw in the county bridge and in the railroad bridge. Youngs Bay is a wide, sheltered arm, and the businesses already located on it, as well as those proposed for it, have explained to me the urgent necessity for the proposed improvement.

The depth of 40 feet provided in the item is to make accommodation for the character of vessels natural to a port, and which will seek and discharge cargoes at a port located so near the mouth of this great river. The depth on the bar is approaching 50 feet, if that depth is not already attained, as latest reports indicate it has.

I made personal examination of both propositions and believe them to have unusual merit.

With best wishes, I am,
Truly, yours,
W. C. HAWLEY.

Mr. JOHNSON of Washington. Did the gentleman say this was a side channel?

Mr. SMALL. It is not the main channel at the mouth of the river. Will the gentleman from Oregon [Mr. HAWLEY] explain that to the gentleman?

Mr. HAWLEY. I understand that the channel as described in the amendment has for a long period of years been considered the main ship channel.

Mr. JOHNSON of Washington. Is it possible to answer every purpose and leave the engineers open and free in the matter by taking out the words "on the southerly or Oregon side"?

Mr. HAWLEY. It proposes to authorize a survey for the improvement and maintenance of the long used channel at the city of Astoria. All vessels engaged in foreign trade report to the customs officials at Astoria; they either discharge cargo at Astoria or proceed to destination through this channel. Coastwise vessels likewise use it. The channel should be improved and maintained to accommodate the commerce.

Mr. JOHNSON of Washington. Is it used now?

Mr. HAWLEY. Yes; it is used all the time.

Mr. JOHNSON of Washington. If it is spoken of as the "main ship channel" why is it necessary to speak of it in the letter as "a side channel"?

Mr. HAWLEY. I did not say "side channel."

Mr. JOHNSON of Washington. Would the gentleman be satisfied to take out the specific direction?

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I ask for an additional five minutes.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Washington moves to strike out the last two words.

Mr. JOHNSON of Washington. Would it not answer every purpose to strike out the words "main ship channel," on line 14, and on line 15 the words "on the southerly or Oregon side," thus leaving it free, so that a survey can be made in front of Astoria?

Mr. HAWLEY. The main ship channel, a natural channel, has for a long period of years followed the course outlined in the item in the bill. The city of Astoria is constructing public docks at the cost of about a million of dollars on this channel,

All the other wharves and docks of the city are on this channel. The docks of the Northern Pacific Co. on the west side of Youngs Bay are so situated that vessels lading and discharging cargo at them use this channel. The item in the bill proposes that this natural channel shall be improved and maintained at a sufficient depth to accommodate the traffic. Astoria is prepared to enlarge its docks to accommodate the developing traffic.

Mr. JOHNSON of Washington. Why is it necessary in line 14 to call it "the main ship channel," and on line 15 to call it "on the southerly or Oregon side"?

Mr. HAWLEY. Because it is not intended to interfere with the channel out farther in the river that is used by coastwise vessels going up and down.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the words, in line 15, "on the southerly or Oregon side," after the word "river."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Washington.

The Clerk read as follows:

Mr. JOHNSON of Washington moves to amend by striking out, on page 36, line 15, the words "on the southerly or Oregon side."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Washington.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Secretary of War is directed to make a survey and submit a report to Congress upon the advisability of securing a channel in the Columbia River from the mouth of the Willamette River to the eastern limits of the city of Vancouver, Wash., equal in width and depth to the project channel from the mouth of the Willamette to the city of Portland, Oreg., and what cooperation, if any, should be given.

Mr. SMALL. Mr. Chairman, I offer a committee amendment.

The CHAIRMAN. The gentleman from North Carolina offers a committee amendment, which the Clerk will report.

The Clerk read as follows:

Committee amendment: Amend, page 37, after line 2, by inserting a new paragraph:

"Columbia River, between Carrolls, Wash., and Stella, Wash., and Cowlitz River, below Ostrander, Wash., with a view to devising plans for bank protection, including consideration of any proposition for cooperation on the part of local and State interests."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Tillamook Bay and River and Hoquarten Slough, Oreg., with a view to securing the most feasible channel from the entrance to the city of Tillamook.

Mr. MADDEN. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Illinois moves to strike out the paragraph.

Mr. MADDEN. Mr. Chairman, as to Tillamook Bay I do not know what that is, whether it is in a slough or cay, or whether there is a river connected with the bay. I notice that we have Hoquarten Slough, Oreg. I do not know whether that is one of those sloughs such as we dealt with a short time ago in North Carolina, where we were going to dig out the slough and furnish the turf as a fuel supply to the Army. I do not know exactly what kind of a slough this is. I do not know what kind of agricultural products they raise there, whether they have muskrats or catfish. I should like to see if some gentleman from Oregon will explain this thing. Is there any gentleman from the State of Oregon who is willing to stand responsible for the money to be expended on this improvement? Does the gentleman from Oregon [Mr. HAWLEY] refuse to state the merit of the question involved in Tillamook Bay and River and Hoquarten Slough, and to state whether the slough is to be drained, or whether it possesses any mineral of any importance to enable the Government to reimburse itself for this expenditure?

Mr. HAWLEY. If the gentleman will pause for a moment in his eloquence I believe I can satisfy his inquiring mind.

Mr. MADDEN. I shall be delighted.

Mr. HAWLEY. The people of that section of the country have spent $407,000 in improving Tillamook Bay up to the point where Hoquarten Slough ends and Tillamook Bay begins.

Mr. MADDEN. What is Hoquarten Slough?

Mr. HAWLEY. Hoquarten Slough is an arm of the bay. The people of the port of Tillamook want to enlarge their port, and to raise money by issuing bonds to provide, practically at their own expense, deep water for the city of Tillamook by means of Hoquarten Slough, or on the Tillamook River, whichever the engineers decide to be the most feasible project; but they want a Government survey of it, so that it will be a Government project. In fact, they have no right to deal with it unless it is a Government project, and they want a definite survey for a project into which they can put their own money.

Mr. MADDEN. About how large a city is Tillamook?

Mr. HAWLEY. About 5,000 people.

Mr. MADDEN. Where does it stand with respect to an open channel from the sea?

Mr. HAWLEY. The distance above the present terminus of the project in a straight line is about 3 miles, as I recall.

Mr. MADDEN. What is the amount of commerce there now? Is there any commerce?

Mr. HAWLEY. Yes; they produce lumber and cheese and various agricultural products. There is a considerable amount of tonnage brought in. I do not remember the tonnage.

Mr. MADDEN. Is the cheese made in such large quantities that they have to send it out from Tillamook in ships?

Mr. HAWLEY. They make about $700,000 worth of it a year, as I recall.

Mr. MADDEN. How much money does the city of Tillamook expect to spend on the development of this harbor?

Mr. HAWLEY. Practically whatever is necessary.

Mr. MADDEN. How much cooperation do they want from the Government?

Mr. HAWLEY. When the project at the mouth of the bay, involving an expenditure of $814,000, was under contemplation they proposed to pay one-half of the proportion of the locality, which would be one-fourth of the whole cost, or $200,000. I understand they are ready to put that amount into this improvement.

Mr. MADDEN. Why does this slough come into the question? What has that to do with navigation?

Mr. HAWLEY. Because the slough connects Tillamook City with the upper end of the present project.

Mr. MADDEN. Does the gentleman mean that Tillamook City is on the edge of the slough?

Mr. HAWLEY. On a deep arm of the bay there. I think they would call it a bayou down south.

Mr. MADDEN. Does the slough contain water?

Mr. HAWLEY. If the gentleman should try to wade across it he would find that the top of his head would go out of sight.

Mr. MADDEN. If this improvement should be made would it drain the slough?

Mr. HAWLEY. No.

Mr. MADDEN. Would it make more water in the slough?

Mr. HAWLEY. It would take a slice off the bottom and make the water deeper.

Mr. MADDEN. The reason I ask these questions—and I ask them in good faith—is that in my section of the country when we drain a slough we get tillable land.

Mr. HAWLEY. The gentleman ought to see this slough. It looks like a deep, narrow river.

Mr. MADDEN. Any water hyacinth grow in it?

Mr. HAWLEY. No; nor no hippopotamuses.

Mr. MADDEN. Then it is not a good place to hunt.

The CHAIRMAN. The question is on the motion of the gentleman from Illinois to strike out the paragraph.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Mouth of the Cowlitz River, Wash., for the purpose of determining the advisability of the construction of a jetty, or other means, for deepening the channel at the mouth of the river.

Mr. MADDEN. Mr. Chairman, I move to strike out the paragraph.

Mr. SMALL. I offer the following committee amendment.

The Clerk read as follows:

Page 37, amend by inserting after line 12 and following the paragraph ending with the words "of the river," the following:

"Waterway between Port Townsend Bay and Oak Bay in Jefferson County, Wash., with a view to increasing depth and width."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. MADDEN. Now, Mr. Chairman, I move to strike out the section as amended.

I do not know how much money it will take to clean out the mouth of the Cowlitz River, and I do not know what purpose will be served when you do clean out this mouth. I do not know whether they propose to use disinfectants to do it, but I know they propose to use money of the United States Treasury to find out how much it costs to clean out the mouth. It seems to me that the mouth of the river was only intended to reach the Treasury of the United States. It is only intended to add to the burden of the already overburdened taxpayers of the country.

We considered a bill a short time ago in which we proposed to raise $2,000,000,000 out of the incomes of the American people

for the next year, and to raise it we had to go back and lay new taxes again for the year on which the people had already paid taxes. When the Senate reports the bill I presume it will include taxes from the 1st of January, 1917, up to the 1st of January, 1918, so that we will be paying taxes on things we have already done, and still we continue to add to the burden. There is no thought in anybody's mind about the relief of the overburdened taxpayer; all we think about is adding to it.

You can unload all of your burdens onto the backs of the American people to a certain point, but they will finally rebel. Even the worm will turn when you step on him too often. The American people have been a very patient people since the Democrats came into power. They have never borne such burdens in all their lives as have been imposed upon them since you came into power. They have borne those burdens patiently, but they have begun to see the day, they have begun to see the light, they are beginning to realize that these burdens are unjust and they are beginning to protest. You will have to trim your sails very soon if you expect to maintain their confidence. You can not continue to rob them of their last dollar by imposing the taxes that you do impose upon them and have them continue to support you in your reckless extravagance and waste of the public money.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. JOHNSON of Washington. If the gentleman really wants to know the truth about the Cowlitz River, I will say that for some years past a Government dredge has gone up and down the river taking out the sand and putting it on the banks and then during the winter the floods come and wash it back into the river.

Mr. MADDEN. And so they are spending money for the purpose of keeping the dredge at work.

Mr. SMALL. Mr. Chairman, I move that all debate on this paragraph be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from Illinois to strike out the paragraph.

The question was taken, and the motion was lost.

The Clerk read as follows:

Controller Bay, Alaska.

Mr. LENROOT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

At the end of section 4 add the following:
"*Provided*, That no survey herein provided for shall be made until after the close of the war with Germany except such as the Secretary of War shall recommend as necessary as associated with the prosecution of the war."

Mr. LENROOT. Mr. Chairman, the chairman of the committee has signified his willingness to accept this amendment. It will leave all the surveys in the bill but will postpone the operation except such as the Secretary of War may find to be associated with the prosecution of the war. With this proviso, it makes the surveys entirely in harmony with the purpose of the bill as expressed by the committee and its chairman many times. I do not desire to take any further time.

Mr. HUMPHREYS. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. HUMPHREYS. I want to ask the gentleman something about the wording of his amendment. This comes in as a new paragraph?

Mr. LENROOT. As a proviso.

Mr. HUMPHREYS. To what?

Mr. LENROOT. To section 4.

Mr. HUMPHREYS. It has to be a new paragraph unless it is a proviso to the item respecting Controller Bay, Alaska.

Mr. LENROOT. If it was, it relates to all of the surveys, so there could be no difficulty of construction.

Mr. MILLER of Minnesota. I would like to ask the gentleman from Wisconsin a question. Will the gentleman inform us whether or not some of these surveys provided for in this section are continuations of old surveys previously ordered, which might not fall within the class that the Secretary of War would recommend?

Mr. LENROOT. These are all new surveys.

Mr. MILLER of Minnesota. Is the gentleman sure about that?

Mr. LENROOT. The committee has stated many times that there are 106 still pending not affected by this at all.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken; and on a division (demanded by Mr. LENROOT) there were—ayes 75, noes 15.

So the amendment was agreed to.

The Clerk proceeded to read section 5.

Mr. GALLAGHER (interrupting the reading). Mr. Chairman, is this not the section that it was agreed should be stricken out? At an early stage in the consideration of the bill I think the House voted to turn this proposition over to the Interstate Commerce Commission.

Mr. SMALL. Oh, I think not. I was going to make a motion, in the economy of time, to strike out section 5.

Mr. STAFFORD. Mr. Chairman, section 5 has not yet been read. I desire to make a point of order upon it.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 5. That the Secretary of War is hereby authorized and empowered to grant leases or licenses to municipal corporations and to public service or other corporations for the use of the surplus water not needed for purposes of navigation at the United States Government dams constructed at Lake Winnibigoshish and at Lake Pokegama, in the State of Minnesota, at such rates and compensation as he may deem just and reasonable, giving to municipal corporations the preference. That such leases or licenses shall not extend beyond the period of 50 years and that the moneys paid for the same shall go into the Treasury of the United States, to be used for the maintenance of the dams and the improvement of navigation in said river. The Secretary of War shall make such rules, regulations, and conditions as he may deem necessary to protect the interests of navigation and the United States, and the same shall be incorporated in the leases or licenses.

Mr. STAFFORD. Mr. Chairman, on that I reserve the point of order.

Mr. SMALL. Mr. Chairman, I move to strike out the paragraph.

Mr. COOPER of Wisconsin. Mr. Chairman, I make the point of order. [Cries of "Rule!"]

The CHAIRMAN. The point of order is sustained.

Mr. SMALL. Mr. Chairman, I desire to be heard for just a moment. There have been objection to and controversy about this item. With a view to avoiding any controversy and because the sponsors of it were willing that it should be stricken out, I stated to a number of gentlemen as representing the committee that we were willing to have the item stricken from the bill; but I protest that it shall not go out upon the theory that the Committee on Rivers and Harbors has no jurisdiction of the question of water power and its development on navigable streams, and I insist when the proper time comes that in the improvement of streams for navigation where water power may be developed as an incident this committee reserves the right to consider such legislation. I desire to say here now that the Committee on Rivers and Harbors in its own good time will consider some legislation for water-power development on navigable streams, and I take this occasion to serve notice on the Committee on Interstate and Foreign Commerce, which is so jealous about its jurisdiction of water power, that it must formulate and submit to this House some legislation, legislation that will protect the interest of the country and at the same time invite capital to invest in the development of water power. Hundreds of thousands of horsepower in hydroelectric energy are now going to waste, involving a serious economic loss, while Members of Congress are discussing academic questions. The differing opinions as to Federal and State jurisdiction should be reconciled. They are perfectly capable of reconciliation, and Members are under obligation to the country to make a frank, honest effort to do so. Speaking modestly, I may say that I am actuated by such a purpose, and I am sure I speak for the membershsip of the Committee on Rivers and Harbors.

The CHAIRMAN. The point of order is sustained.

Mr. ADAMSON and Mr. MILLER of Minnesota rose. [Cries of "Regular order!"]

The CHAIRMAN. The regular order is demanded, and the Clerk will read.

Mr. VOLSTEAD rose.

The CHAIRMAN. For what purpose does the gentleman from Minnesota rise?

Mr. VOLSTEAD. I desire to offer an amendment.

Mr. MILLER of Minnesota. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MILLER of Minnesota. Was the point of order made upon this paragraph?

The CHAIRMAN. It was made and sustained.

Mr. MILLER of Minnesota. Upon what theory was it made, and upon what theory was is sustained?

The CHAIRMAN. It was sustained upon the theory that other committees in the House have jurisdiction of certain questions embodied in this section.

Mr. BURNETT. Mr. Chairman, that is res adjudicata.

The CHAIRMAN. The Chair desires to state the reason. The gentleman is asking in good faith. This is a question where the rulings of the Chair have been that the matter should go to

the Committee on Interstate and Foreign Commerce. This is a privileged bill, and questions that are not within the jurisdiction of the Committee on Rivers and Harbors can not be reported in a privileged bill.

Mr. MILLER of Minnesota. I was about to suggest, in view of the sort of gentlemen's arrangement that has been made, and I think satisfactory to the entire House, that that question ought not to be raised; and inasmuch as it is going out, I want to ask the gentleman from Wisconsin if he will not withdraw his point of order and consent that it may be stricken out on the motion of the gentleman from North Carolina, in order that the men who are interested, and deeply interested, may not be prejudiced in their views and be obliged to submit to extended arguments.

Mr. SMALL. I thought that I had offered my motion first.

The CHAIRMAN. The Chair will state to the gentleman from North Carolina a point of order has priority over a motion, and as the point of order was made by the gentleman from Wisconsin [Mr. COOPER], the Chair had no option but to pass on the point of order. [Cries of "Regular order!"]

Mr. VOLSTEAD. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

At the end of line 5, on page 38, insert the following new paragraph: "SEC. 5. That the Congress consents that the States of Minnesota, North Dakota, and South Dakota, or any two of them, may enter into any compact, agreement, or agreements with each other to improve navigation of boundary waters between said States and the waters tributary thereto; and said States, or any two of them, are authorized to and may, with the approval of the Secretary of War, make such improvements."

Mr. LENROOT. Mr. Chairman, I make the point of order against the amendment that it is not germane to this bill and under its provisions the committee would not be authorized to incorporate it in the bill.

The CHAIRMAN. The Chair sustains the point of order.

Mr. VOLSTEAD. Mr. Chairman, I desire to be heard on the point of order. It seems to me the amendment is clearly in order. I am not an expert on parliamentary law, but this is a provision for the improvement of a river in line with the purpose of the bill. It differs only in the fact that it takes no money out of the Treasury, but there are any number of provisions in this bill authorizing contributions, so in principle it does not differ from other authorizations. You have provisions in this bill that Porto Rico shall contribute $600,000, and you have various other provisions to the effect that expenditures shall be made in accordance with certain documents, which documents in many instances require contributions. We simply authorize that these States do this work themselves.

Mr. STAFFORD. Mr. Chairman, will the Chair hear me before he renders his decision?

The CHAIRMAN. The Chair withholds his decision.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield? I would like to know what the intention is; to improve a river, for what purpose?

Mr. VOLSTEAD. For navigation. That is what my amendment says—improvement of the river for navigation. The Red River of the North divides the State of Minnesota from North and South Dakota.

Mr. STAFFORD. Mr. Chairman, the Chair, in considering this amendment, must give construction as to whether it is in order from the phraseology that is carried in the amendment. I direct the attention of the Chair to the fact that it authorizes the States designated to enter into an agreement. For what purpose? To improve navigation of the boundary waters between said States and waters tributary thereto. Certainly this amendment, so far as the phraseology is concerned, is limited to the question of the navigation of those waters. No one will dispute the Committee on Rivers and Harbors has authority to report on the improvement of rivers and harbors. That is clause 8, section 11. Clause 56 authorizes them to make privileged bills that relate to the improvement of rivers and harbors. I agree fully with the decisions that the Chair has made during the day on these other provisions, which were not privileged from the committee. But supposing this was brought in as a privileged matter from the Committee on Rivers and Harbors. The Chair could not decide that it was not privileged, because its very purpose is to improve rivers and harbors dividing the States of Minnesota and North and South Dakota. Why, the very purpose of authorizing the surveys is to provide for the improvements of rivers and harbors.

It delegates authority to the engineers to make a preliminary investigation.

The CHAIRMAN. Does the gentleman from Wisconsin think that boundary waters include only rivers and harbors? Might they not include lakes and canals?

Mr. STAFFORD. The fact is there is the Red River of the North, a boundary stream. I am making statements of facts as I know them.

The CHAIRMAN. The gentleman will concede the fact that if a part of the amendment is out of order the whole of it is out of order?

Mr. STAFFORD. Yes; I will agree that if a part of the amendment is out of order that the rest of it will have to be eliminated on the ground that it is not privileged.

Mr. HUMPHREYS. Mr. Chairman, the Committee on Rivers and Harbors has jurisdiction over matters relating to the improvement of the rivers and harbors. Under the Constitution no State could enter into any compact of any character to do anything without a small chance by Congress giving those States its consent. Now, in this matter there is no attempt by this amendment for Congress to undertake the improvement of any river of any sort. The purpose is for Congress to give its consent to the States of Minnesota and Wisconsin that they may enter into a compact touching the improvement of rivers that the States of Minnesota and Wisconsin are to undertake. I state that that is a matter which is not entitled to a privilege which was obtained by being a paragraph in a privileged bill.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

Mr. SEARS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Florida offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend, on page 37, by inserting after line 13 the following paragraph as a new section:

"SEC. 5. That authority is hereby conferred upon any person, persons, or corporations, subject to the approval of the Chief of Engineers and the Secretary of War, to construct not more than three inlets from the Atlantic Ocean to Indian River, Fla., at such points and in accordance with such plans and under such conditions as may be approved by the Chief of Engineers; the right being expressly reserved to the United States to close or to order the closing of any one or all of these inlets whenever in the opinion of the Chief of Engineers this is deemed necessary in the interest of navigation: *Provided*, That no expense shall be incurred by the United States in connection with these improvements: *Provided further*, That a bond or bonds may be required to indemnify the United States for not exceeding a period of five years against any damage to said navigable waters, the conditions thereof to be determined by the Secretary of War."

Mr. LENROOT. Mr. Chairman, I make a point of order against the amendment.

Mr. SEARS. Will the gentleman reserve the point of order?

Mr. LENROOT. I will.

Mr. SEARS. I think I can persuade the gentleman not to make it.

This amendment to the section does not incur any expense to the Government. The proposition is simply this: Parties for years have tried to open up inlets from the Indian River to the ocean without expense to the Government. The Board of Engineers several times have granted permission to construct these inlets, and the only trouble seems to be that the Board of Engineers require a lifetime bond, and parties in that section of the country have refused, and I think rightly, to give a lifetime bond. This does not cost the Government a thing.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. SEARS. I will.

Mr. MOORE of Pennsylvania. Is it not the intention to have the salt water come into the Indian River for the purpose of propagating fish and encouraging the fish supply?

Mr. SEARS. That is true. The fact of the business is, I will say to the gentleman from Wisconsin [Mr. LENROOT] that the War Department has granted permission for canals to open into the Indian River, thereby making the river, which was formerly salt, practically fresh. Neither fresh-water fish nor salt-water fish can now live in that river, and these inlets simply let the water again become salt. The gentleman from Pennsylvania [Mr. MOORE] and many other Members on this floor are familiar with the situation and indorse it.

Mr. WALSH. This being a fish-propagation project, does anything pass up and down these inlets besides the fish? Is there any commerce?

Mr. SEARS. Boats can pass out and in if they so desire.

Mr. WALSH. What connection has this project with the present war emergency?

Mr. SEARS. It does not cost the Government a cent, I will say to the gentleman.

Mr. WALSH. But you have got to get authority to do it; and will there not be in the future calls upon the Federal Government to deepen, widen, dredge, or snag these inlets?

Mr. SEARS. Not at all. If the gentleman will read my amendment it is specifically provided there that the Government can close these inlets at any time it hurts navigation or interferes with navigation. I hope the gentleman will not insist on the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield further?

Mr. SEARS. Yes.

Mr. MOORE of Pennsylvania. Is it not a fact that the Indian River parallels the ocean, very close to the ocean at that point, and runs along parallel to it for hundreds of miles?

Mr. SEARS. Yes; about 200 miles.

Mr. MOORE of Pennsylvania. Private interests want to do this cutting?

Mr. SEARS. Yes. It is to be done by private interests. In fact, these inlets will be cut by the fishermen, merchants, and public-spirited citizens who are solely interested because of the value of fish as an important food supply.

Mr. LENROOT. Mr. Chairman, this being a river and harbor bill, it ought to be confined to the improvement of rivers and harbors. No private project should go into a river and harbor bill. As I read the amendment, it does not purport or pretend to have anything to do with navigation. I therefore insist on my point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

SEC. 7. That Bayou Meto, in the State of Arkansas, be, and the same is hereby, declared to be a nonnavigable stream, within the meaning of the Constitution and laws of the United States. The right of the Congress to alter, amend, or repeal this section is hereby expressly reserved.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on that paragraph.

Mr. ADAMSON. I make the point of order, Mr. Chairman. The jurisdiction to declare streams nonnavigable rests with the Committee on Interstate and Foreign Commerce, and not with the Committee on Rivers and Harbors.

Mr. TAYLOR of Arkansas. Will the gentleman kindly reserve his point of order?

Mr. ADAMSON. I do not know why. The bills have gone before us for quite a number of years.

Mr. TAYLOR of Arkansas. I ask that the gentleman will kindly reserve his point of order.

Mr. ADAMSON. I will reserve it.

Mr. TAYLOR of Arkansas. Mr. Chairman, this identical item was carried in the river and harbor bill that passed this House but which did not pass the Senate. It was copied from an item contained in the bill in 1915 and in the bill in 1914, so that so far as precedent is concerned it is thoroughly established.

Now, I want to say to my friend, the gentleman from Georgia [Mr. ADAMSON], that I do not think he ought to make the point of order. The object of this amendment is for the conservation of thousands of acres of land in order that the Bayou Meto, a little creek that floods all these thousand acres of land, may be controlled and diverted. The landowners, one of whom is in this building now, Judge KINKAID, want to open it and hold back this water so that the lands may be cultivated and food and bread may be supplied to the people of this Nation.

I hope that the gentleman will not insist on his point of order. I sincerely hope he will not.

Mr. SMALL. Mr. Chairman, I desire to be heard.

Mr. TAYLOR of Arkansas. I want to say one word further, Mr. Chairman. Have I exhausted my time?

The CHAIRMAN. The gentleman has not.

Mr. TAYLOR of Arkansas. I have talked with Gen. Black about this, and he said this stream had never been taken over or adopted by the Government in any respect whatever. He said it was not to be considered a navigable stream in any sense except in so far as it contributed water to the navigable waters of the Arkansas River; and now we have more water in the Arkansas River than we know what to do with, notwithstanding the gentleman from Kansas [Mr. CAMPBELL] and the gentleman from Illinois [Mr. MADDEN] yesterday did not seem to know that there was any water in there, although I have seen that water measured in front of my city at a depth of 7 feet.

Mr. MADDEN. That was in flood time.

Mr. TAYLOR of Arkansas. I hope my good friend from Georgia will not destroy, or cause to be destroyed, this valuable land for the production of so much food needed by the people of this country. It is a war measure. If the gentleman insists upon it, of course I must yield.

Mr. ADAMSON. I did not know that my friend TAYLOR from Arkansas was interested in this matter. The matter of declaring streams nonnavigable has been a very interesting one in the last 15 or 20 years. The bills have invariably gone to our committee. We have always considered them, and in most cases we have found it unwise to declare a stream nonnavigable.

I do not know whether this item has been properly considered or not. It has not been called to our attention. It is our business to look into all such matters, but if the gentleman thinks his committee has given it proper consideration, and although the chairman of the Committee on Rivers and Harbors has seen proper gratuitously to say something about the jealousy with which we defend our jurisdiction, for my part, on account of my personal affection for my friend from Arkansas, I will not make the point of order against it, although I think it ought to be made.

Mr. COOPER of Wisconsin. Mr. Chairman, I reserve a point of order on that. This practice of declaring nonnavigable streams that have always been considered navigable is a very serious thing; and I do not know of any investigation or presentation of facts, on this floor or elsewhere, that would justify me, or justify the majority of this House, in voting that to be a nonnavigable stream.

Mr. TAYLOR of Arkansas. Will the gentleman from Wisconsin yield to me for a moment?

Mr. COOPER of Wisconsin. I yield to the gentleman.

Mr. TAYLOR of Arkansas. This stream, as I have said, has never been a navigable stream, never been taken over by the Government, and there never has been one cent appropriated for it. There never was a boat upon it. I have lived upon that stream for 30 years. But here is the point: The property owners on each side, owning hundreds of thousands of acres of land, can not get the legislature to pass a bill authorizing them to float bonds to borrow money to build locks and dams to hold this water back and keep it off of the lands that are so rich and so productive of food products.

Mr. COOPER of Wisconsin. Have the legislature of your State ever passed any petition——

Mr. TAYLOR of Arkansas. They are waiting now, sir, and this bill was drawn——

Mr. COOPER of Wisconsin. Have the legislature of that State ever passed a petition requesting Congress for any legislation?

Mr. TAYLOR of Arkansas. Why, no, sir; they have not done that.

Mr. COOPER of Wisconsin. These property owners could very easily have had their representatives in the State legislature pass a petition asking the Congress of the United States to declare the stream nonnavigable. I hate to do anything to disoblige my friend, but I shall make the point of order.

Mr. TAYLOR of Arkansas. I hope the gentleman will not do that.

Mr. HUMPHREYS. Mr. Chairman, I do not care to argue the point of order, because I do not know anything about that; but the gentleman from Georgia [Mr. ADAMSON] is mistaken when he says it has been the invariable practice to refer such matters to the Committee on Interstate and Foreign Commerce. Such matters have been referred frequently to the Committee on Rivers and Harbors, and we have frequently reported provisions declaring streams nonnavigable, and such bills have passed and become laws. I do not recall any bill declaring any stream nonnavigable that did not come from the Committee on Rivers and Harbors.

Mr. ADAMSON. If the gentleman will yield, I will state that there is a good reason for that. We never report such a bill unless there is a good reason for it, and in most of the cases we have found that the bills ought not to be reported favorably, and therefore have not done it.

Mr. HUMPHREYS. That carries with it, of course, the inference that the Committee on Rivers and Harbors have not made proper investigation.

Mr. ADAMSON. I do not know what bills they have had before them.

Mr. HUMPHREYS. Well, the Cane River, for instance. Of course the gentleman does not know any more now than he did before I stated that. I have that particular one in mind. We had very elaborate hearings on that proposition, and reported out a bill declaring it to be nonnavigable. Whether this is subject to a point of order now I am not able to state, but the subject is one that has heretofore been handled by the Rivers and Harbors Committee.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption there?

Mr. HUMPHREYS. I will.

Mr. COOPER of Wisconsin. My friend the gentleman from Wisconsin [Mr. STAFFORD] has just called my attention to section 4101 of Hinds' Precedents, volume 5, page 739, which says:

Bills declaring as to whether or not streams are navigable and for preventing hindrances to navigation are reported by the Committee on Interstate and Foreign Commerce.

On January 23, 1902, the bill (H. R. 9213) declaring the St. Joseph River to be not a navigable stream was by order of the House referred from the Committee on Rivers and Harbors to the Committee on Interstate and Foreign Commerce.

Mr. HUMPHREYS. I will state in reply to that, as I stated before, that I do not know anything about whether this is subject to a point of order or not. I was not in Congress in 1902, and I did not recall that incident; but the Committee on Rivers and Harbors has several times in the last 10 or 12 years reported paragraphs in bills just like this.

Mr. SMALL. Mr. Chairman, just a word. As the gentleman from Mississippi says, the books are full of statutes reported from the Committee on Rivers and Harbors declaring streams nonnavigable. For instance, I hold in my hand a river and harbor act approved March 4, 1915, which contains:

SEC. 13. That Swan Creek, a stream lying within the limits of the city of Toledo, State of Ohio, is hereby declared to be not a navigable waterway of the United States within the meaning of the laws enacted by Congress for the preservation and protection of such waterways, and the consent of Congress is hereby given for the filling in of said creek by the local authorities.

Mr. ADAMSON. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. ADAMSON. That bill was before our committee for a long time and we absolutely refused to report it out. Then the author of it went over to the Senate and got it put on the river and harbor bill there, and when it came back to the House in the conferees' report it was resisted by the gentleman from Kentucky [Mr. SHERLEY] and others, but it was agreed to. It was not put on the bill in this House, and the House Committee on Rivers and Harbors never had jurisdiction of it nor considered it.

Mr. SMALL. The Committee on Rivers and Harbors has reported many bills of this character. One, Cache River, Ark., declaring it to be a nonnavigable stream. I have one before me in 1894——

Mr. GILLETT. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. GILLETT. Does the gentleman think that it is any argument that this is in order because such bills have been passed reported by the Committee on Rivers and Harbors unless the point of order was made? That is no argument at all unless you can show that the point of order was made and overruled. There are quantities of bills reported from the Committee on Appropriations containing legislation. That does not prove that the Appropriations Committee has any right to legislate. It all depends upon whether the point of order was made.

Mr. SMALL. If the gentleman will pardon me, I was going to suggest as a part of the argument that the Committee on Interstate and Foreign Commerce by reason of inaction had lost its jurisdiction, that they can not at this late day claim jurisdiction.

Mr. ADAMSON. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. ADAMSON. I wish to state to the gentleman that the Committee on Interstate and Foreign Commerce has not had a minute of inaction for 21 years to my knowledge. They have been at work day in and day out, and they could not watch all the other committees either in committee or on the floor of the House as to how much they encroached on the jurisdiction of our committee or whether or not they properly discharged their duties. The legislation which the gentleman referred to never came to my attention.

Mr. ROSE. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. ROSE. Where does the power first lie to declare that a stream is navigable? The gentleman states that this has never been declared a navigable stream.

Mr. SMALL. I think in Congress. Congress has jurisdiction of all navigable streams.

Mr. ROSE. But this is not navigable.

Mr. SMALL. If it has jurisdiction of a stream that is navigable, then by inference it has the power to declare the stream nonnavigable.

The CHAIRMAN. The Chair is not concerned in what has been passed before by the Committee on Interstate and Foreign Commerce or the Committee on Rivers and Harbors. The question of jurisdiction should have been settled at that time, but clearly bills declaring rivers nonnavigable belong to the Committee on Interstate and Foreign Commerce.

Mr. TAYLOR of Arkansas. Mr. Chairman, this is not a river; it is a small stream running in two counties.

The CHAIRMAN. If it is not a river, it certainly is not a harbor; but anyway, whether it is or not, the jurisdiction has always been placed in the Committee on Interstate and Foreign Commerce to declare streams nonnavigable. The decision read by the gentleman from Wisconsin is so clearly in line that the Chair could not overrule the decision. There was a plain action of the House voting to transfer the matter that had been referred to the Committee on Rivers and Harbors to the Committee on Interstate and Foreign Commerce. I will not read the decision again, but clearly this comes within the jurisdiction of the Committee on Interstate and Foreign Commerce.

Mr. SMALL. Mr. Chairman, I hesitate to interrupt the Chair while he is delivering an opinion, but upon what theory does the Committee on Interstate and Foreign Commerce have superior jurisdiction to the Committee on Rivers and Harbors?

The CHAIRMAN. The committee has jurisdiction over commerce and the question of declaring a river nonnavigable certainly affects the commerce of the country, especially on navigable rivers.

Mr. SMALL. The decision that the gentleman from Wisconsin read a moment ago simply referred to the action of the House.

The CHAIRMAN. Mr. Hinds's decision puts in heavy type at the head:

Bills declaring as to whether or not streams are navigable or preventing hindrances to navigation are reported by the Committee on Interstate and Foreign Commerce.

I recall very vividly that only a few days ago that the Speaker of the House in passing upon a question here affecting a certain matter took the interpretation of Mr. Hinds and followed the decision down as voicing what he believed about the proposition. This is what Mr. Hinds thought when he put this in his Precedents, that the Committee on Interstate and Foreign Commerce did have jurisdiction. The action of the House enforced that proposition, and the rules of the House gave the committee jurisdiction over the question relating to commerce, life-saving stations, and so forth. This is a question that declares a stream nonnavigable and affects commerce, and the Chair thinks it is properly within the jurisdiction of the Committee on Interstate and Foreign Commerce.

Mr. TAYLOR of Arkansas. Mr. Chairman, I respectfully appeal from the decision of the Chair.

The CHAIRMAN. The gentleman from Arkansas appeals from the decision of the Chair, and the question is, Shall the decision of the Chair stand as the judgment of the committee?

The question was taken, and the Chairman announced that the ayes had it.

Mr. STAFFORD. Mr. Chairman, I think where there is an appeal from the decision of the Chair there is an invariable custom to have a division, and I ask for a division.

The CHAIRMAN. The Chair thinks the gentleman is too late, but the Chair will ask for a division.

The committee divided; and there were 58 ayes and 1 no.

So the decision of the Chair was held to be the judgment of the committee.

Mr. SMALL. In the economy of time, I move to strike out section 8, because Congress has passed an act in the exact words of this provision.

Mr. HAWLEY. It was in the last session of the last Congress that this was passed. It is now existing law.

Mr. SMALL. Yes; in order to save the time of reading, I move that it be stricken out.

The CHAIRMAN. The question is on the motion of the gentleman from North Carolina to strike out the section.

The motion was agreed to.

Section 8 is as follows:

SEC. 8. That all of that portion of Ollala Slough in Lincoln County, Oreg., above a point where a line that is 120 rods south and running east and west and parallel with the section line between sections 8 and 17 in township 11 south, range 10 west of the Willamette meridian, crosses said stream, be, and is hereby, declared to be a nonnagivable stream.

The Clerk read as follows:

SEC. 9. That section 4 of the river and harbor act of August 18, 1894, as amended by section 11 of the river and harbor act of June 13, 1902, be, and is hereby, amended so as to read as follows:

"SEC. 4. That it shall be the duty of the Secretary of War to prescribe such regulations for the use, administration, and navigation of the navigable waters of the United States as in his judgment the public necessity may require for the protection of life and property, or of operations of the United States in channel improvement, covering all matters not specifically delegated by law to some other executive department. Such regulations shall be posted, in conspicuous and appropriate places, for the information of the public; and every person and every corporation which shall violate such regulations shall be deemed guilty of a misdemeanor and, on conviction thereof in any district court of the United States within whose territories jurisdiction such offense may have been committed, shall be punished by a fine not exceeding $500, or by imprisonment (in the case of a natural person) not exceeding six months, in the discretion of the court."

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on that.

Mr. LENROOT. Mr. Chairman, I make the point of order.

Mr. SMALL. Mr. Chairman, will the gentleman reserve the point of order?

Mr. LENROOT. Very well.

Mr. SMALL. Mr. Chairman, this is a very important provision, which ought to be enacted into law. I ask the attention of the gentleman, because I hope upon its explanation that he will withdraw the point of order. The present statute applies to canals and similar works of navigation that now are or that hereafter may be operated or maintained by the United States. The words used in the pending section are "the navigable waters of the United States." The existing law covers only such regulations as are necessary to protect improved channels or to prevent interference with the operations of the United States in improving navigable waters. The section in the pending bill goes further and provides such regulations as in the judgment of the Secretary of War the public necessity may require for the protection of life and property and of operations of the United States in channel improvements, the essential difference being that the language in the pending section authorizes regulations for the protection of life and property. Let me illustrate the condition which the Chief of Ordnance, Gen. Crozier, has impressed upon the committee as emphasizing the importance of the enactment of this section. At the proving grounds at Sandy Hook and at other experimental stations for the proving of our guns and projectiles there is at present no power in the Secretary of War to suspend navigation for the time being or to give notice to ships not to sail across or within a certain area during a certain time, and if they are to carry out the purposes of the proving grounds, which are constantly used during this period of war, it is absolutely essential that the Secretary of War be given larger authority.

Mr. LENROOT. Mr. Chairman, I shall not make the point of order, in view of the statement made by the gentleman, but I do want to say it is clearly outside the jurisdiction of the committee, and it is only because of the very exceptional circumstances that the gentleman states that I do not make the point of order.

The CHAIRMAN. The point of order is withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 10. That an act entitled "An act authorizing the condemnation of lands or easements needed in connection with works of river and harbor improvement at the expense of persons, companies, or corporations," approved May 16, 1906, be amended so as to read as follows:

"That whenever any person, company, or corporation, municipal or private, or any State, or any reclamation, flood-control, or drainage district, or other public agency created by any State, shall undertake to secure any land or easement therein, needed in connection with a work of river and harbor improvement duly authorized by Congress, for the purpose of conveying the same to the United States free of cost, or for the purpose of constructing, maintaining, and operating locks, dry docks, or other works to be conveyed to the United States free of cost, and of constructing, maintaining, and operating dams for use in connection therewith, and shall be unable for any reason to obtain the same by purchase and acquire a valid title thereto, the Secretary of War may, in his discretion, cause proceedings to be instituted in the name of the United States for the acquirement by condemnation of said land or easement, and it shall be the duty of the Attorney General of the United States to institute and conduct such proceedings upon the request of the Secretary of War: *Provided*, That all expenses of said proceedings and any award that may be made thereunder shall be paid by such person, company, or corporation, or State, or reclamation, flood-control, or drainage district, or other public agency as aforesaid, to secure which payment the Secretary of War may require such person, company, or corporation, or State, or reclamation, flood-control, or drainage district, or other public agency as aforesaid, to execute a proper bond in such amount as he may deem necessary before said proceedings are commenced.

Mr. LENROOT. Mr. Chairman, I make the point of order against section 10, first, as being not germane to the bill, and, second, that it is a section beyond the authority of the committee to incorporate as a provision of this privileged bill. In support of the point of order, I desire to call the attention of the Chair to the following language:

That whenever any person, company, or corporation, municipal or private, or any State, or any reclamation, flood-control, or drainage district, or other public agency created by any State, shall undertake to secure any land or easement therein, needed in connection with a work of river and harbor improvement duly authorized by Congress, for the purpose of conveying the same to the United States free of cost.

If they had stopped there, it might be argued that it was within the jurisdiction of the committee to report in this privileged bill, but they go on, and it is in the alternative——

or for the purpose of constructing, maintaining, and operating locks, dry docks, or other works to be conveyed to the United States free of cost, and of constructing, maintaining, and operating dams for use in connection therewith—

The condemnation proceedings are then authorized. The subject matter of the section is authorizing condemnation proceedings in these cases upon the part of the United States, and those condemnation proceedings are not limited to cases where improvement of navigation is to result, but they may be for reclamation, flood control, the building of dams for which charters have been granted, for wholly private purposes, and it seems very clear to me that it clearly falls within the rule that a portion of it being beyond the authority of the committee to report in a privileged bill, the entire section must go out.

Mr. CURRY of California. Will the gentleman withhold his point of order?

Mr. LENROOT. I will withhold the point of order.

The CHAIRMAN. Does the gentleman from California desire to be heard?

Mr. CURRY of California. Mr. Chairman, just a moment. This is an amendment to existing law—the eminent-domain act. The words objected to by the gentleman from Wisconsin are in the existing law. The existing law was quoted just as it is in the amendment, so that nothing that was in existing law should be cut out. Now, this amendment is necessary on certain river work being done for navigation and for navigation only on the Sacramento River, at the mouth of the Sacramento River, Cal. Maj. Rand, who has charge of that work, requested me to try to have this act amended at the earliest possible moment, and the easiest and best way was to get it in the river and harbor bill if it can go in without a point of order. Now, the point of order that is made is against what follows: "Free of cost" is already existing law; it is not new law at all. It would hardly be right to cut out existing law to meet present conditions. It is simply adding "or any State reclamation, flood-control, or drainage district," and it only gives authority and power for condemnation proceedings where those condemnation proceedings are directly connected with rivers and harbors, and I hope the gentleman will not insist on the point of order.

Mr. LENROOT. The gentleman is not quite accurate. If this remains in the bill it would give a reclamation district, for instance, the right to have the United States exercise its right of eminent domain for a purpose wholly for the interest of that reclamation district, namely, for the construction of dams, and so forth, used in connection with a Government improvement.

Mr. CURRY of California. I am willing to strike out "or any reclamation, flood control, or drainage district." Those are additional words in the bill, with the exception of the words "or any State."

Mr. LENROOT. Let me ask the gentleman a question. Why can not the State, having the greater power of exercising the right of eminent domain than the United States Government has—why can not it exercise its right of eminent domain for this purpose?

Mr. CURRY of California. It can not exercise the right of eminent domain for this purpose because it is not in the Federal statute, and this land is to be conveyed free of cost to the United States Government.

Mr. LENROOT. Where is the land; all in the State of California, is it not?

Mr. CURRY of California. Yes.

Mr. LENROOT. And the purpose is to take that land for a public purpose and convey it to the United States?

Mr. CURRY of California. Yes.

Mr. LENROOT. Why can not the State of California institute condemnation proceedings itself?

Mr. CURRY of California. The local authorities out there seem to think they can not and so does Maj. Rand, and he is in charge of this work.

Mr. LENROOT. They may not be able because the State of California has not given them power to do so, but the State of California unquestionably has the power to give them the right.

Mr. CURRY of California. No; I do not think so.

Mr. ADAMSON. Will the gentleman yield for a question?

Mr. CURRY of California. Yes.

Mr. ADAMSON. Does the gentleman think if this language of the section goes out of the bill on a point of order that it would repeal or affect the law as it now exists?

Mr. CURRY of California. Certainly not. I want the law as it now exists amended so as to include the State and public agencies, that is all. I want it to include the State; that is all I want. This section after considerable discussion at the last session was unanimously agreed to in the Committee of the Whole. It meets the condition, and I hope the gentleman will not make the point of order. I recognize it lies, but the condition out there is such that I hope he will permit it to be amended.

Mr. MEEKER. Will the gentleman yield?

Mr. CURRY of California. Yes.

Mr. MEEKER. Where are the words the gentleman proposes to strike out, and just what did the gentleman say would be satisfactory to be stricken out?

Mr. CURRY of California. I am satisfied to have stricken out "or any reclamation, flood control, or drainage district."

Mr. MEEKER. Where is that?

Mr. CURRY of California. Line 26, page 39, and on page 40, wherever those words appear in the bill.

Mr. LENROOT. I feel very clear the State has the power, and why can not the State do the thing which the gentleman here wants to make the United States Government do? I make the point of order.

Mr. SMALL. Has the gentleman from California concluded?

Mr. CURRY of California. Yes.

Mr. SMALL. Mr. Chairman, I would like the attention of the gentleman from Wisconsin.

This only amends existing law in this particular. If the Chair has the bill before him, he will see that the section begins as follows:

That whenever any person, company, or corporation, municipal or private—

That is in the present law. Then there is added:

Or any State, or any reclamation, flood control, or drainage district, or other public agency created by any State.

Those are the words that are added to existing law.

The CHAIRMAN. The Chair would like to ask the gentleman if those are all the words that are added to existing law?

Mr. LENROOT. Those are all.

The CHAIRMAN. Are these words, on lines 5, 6, 7, 8, and 9, in the law? They are as follows:

For the purpose of constructing, maintaining, and operating locks, dry docks, or other works to be conveyed to the United States free of cost, and of constructing, maintaining, and operating dams for use in connection therewith.

Mr. SMALL. They are in the existing law, and the gentleman from Wisconsin [Mr. LENROOT] will so admit.

Mr. LENROOT. They are. I want to call the Chair's attention to this fact: That under existing law neither the State or a drainage district could utilize the law for the purpose of constructing and maintaining and operating dams, which is no part of the improvement of rivers and harbors. But if this remains in the bill they may do so, which is clearly beyond the jurisdiction of the committee.

Mr. SMALL. Now, the point I was making on that line was this, that existing law permits any person, company, or corporation, municipal or private, to do all the things in the pending section, and it is only extended to any State, or that power is only extended to any State, or any reclamation, flood control, or drainage district, or other public agency, created by any State. Now, the purpose of this is plain that wherever there is any local cooperation requiring local interests to provide certain lands to the Government of the United States, the United States will institute the condemnation proceedings, but that the expense of same, as well as the award, shall all be paid by the local interest which is to contribute the local cooperation. So, Mr. Chairman, if this had been an original proposition, upon the criticism of the gentleman from Wisconsin [Mr. LENROOT] I would have yielded the point, because, as he says, it does seem to go beyond the scope of river and harbor improvements, but as this only amends existing law in these particulars it seems to me it is not subject to a point of order.

Mr. LENROOT. I would like to make this suggestion to the chairman of the committee, that if he would consent to an amendment to strike out of lines 8 and 9 the words "constructing, maintaining, and operating dams for use in connection therewith," I think it would then not be subject to the point of order that I made, and I would be willing to let the section remain.

Mr. SMALL. Striking out what?

Mr. LENROOT. Striking out the words "and of constructing, maintaining, and operating dams for use in connection therewith." Lines 8 and 9 on page 40.

Mr. CURRY of California. I will make this proposition to the chairman of the committee. I will agree to that if he will.

Mr. SMALL. Well, Mr. Chairman, I would not on the spur of the moment be willing to strike out something which will change existing law.

Mr. CURRY of California. Will you pass this over and think about it for a little while?

Mr. LENROOT. I am very clear it is subject to a point of order, unless these words are stricken out.

Mr. SMALL. The worst that can happen is that the existing law will remain. You would mutilate existing law to gratify the gentleman.

The CHAIRMAN. The Chair understood the gentleman from North Carolina to say the language in lines 6, 7, 8, and 9 was in the present law? The Chair does not find it.

Mr. LENROOT. It is the amendment of June——

Mr. SMALL. Maybe I did not give the last act. I handed it to the gentleman from Wisconsin during the afternoon.

Mr. LENROOT. That is in the law, but I do want to emphasize, Mr. Chairman, if I may, that this amendment that is now proposed to be made may authorize a State or a public agency or a reclamation district to institute this condemnation proceeding, not for the purposes of the improvement of navigation but for wholly different purposes, and therefore, although those words are in existing law, this amendment does not relate to the improvement of navigation at all.

Mr. CURRY of California. Mr. Chairman, I wish to call the attention of the Chair to the fact that no State can condemn and take over land and transfer it to the United States Government or to any other corporation without the authority of Federal law, and there is no such authority in Federal law. Under the State law they can not do that. Unless this is enacted it can not be done.

The CHAIRMAN. The Chair would like to ask the gentleman from Wisconsin what committee would have jurisdiction of this subject if a separate bill were introduced?

Mr. LENROOT. It is not a matter of jurisdiction of committee, but as the Chair has been ruling, and correctly, during the day, the Committee on Rivers and Harbors, while it has the right to report legislation on this bill, has no right to report any legislation that does not relate solely to the improvement of rivers and harbors. My point is that this goes beyond that, because it gives the right to the State and drainage district to have condemnation proceedings, not for the improvement of navigation but for the erection of dams, which under the language of the act have nothing to do with navigation.

The CHAIRMAN. The Chair would like to ask the gentleman if a bill were introduced, to what committee would it go?

Mr. LENROOT. To the Committee on Rivers and Harbors, I think, but it would not be privileged. If the Chair has any doubt about the correctness of my proposition, I submit that the Committee on Rivers and Harbors might have jurisdiction of a bill, but unless it relates to the improvement of rivers and harbors it is not privileged, and that committee can not incorporate matters in this privileged bill that do not relate to the improvement of rivers and harbors.

Mr. STAFFORD. Mr. Chairman, the Chair must make this distinction, as stated by my colleague, Mr. LENROOT, that though the Committee on Rivers and Harbors may have jurisdiction of the subject matter, yet that committee would not have authority to come in here in a separate bill and embody this very provision and say, "Mr. Speaker, I submit a privileged bill." It would not be privileged, because it would not relate, as clause 56 of Rule XI provides, to the improvement of rivers and harbors. That committee might have jurisdiction of the question, but upon any person making a point of order that it was not privileged he could have it dropped into the basket and have it considered in the regular course. Every item in this bill must have that character of privileged status, such as, if the chairman of the committee presented it, he could say, "I present a privileged measure under clause 56 of Rule XI."

The CHAIRMAN. The Chair would like to hear from the gentleman from North Carolina.

Mr. SMALL. Mr. Chairman, I want to be brief, but it seems to me that when we are amending the existing law the point of order must be directed to the amendment alone.

Now, the position of the gentleman from Wisconsin [Mr. LENROOT] is this: If we admit that the committee would have jurisdiction of this amendment to existing law, that it is deprived of its jurisdiction because it affects existing law beyond the jurisdiction of the committee. I do not think that the gentleman can successfully contend that there is anything in this amendment here to existing law which would warrant the Chair in sustaining the point of order; because the point of order is directed to what? To the amendment of the existing law, and the amendment only increases the agency of the State for which the right of eminent domain may be exercised on the part of the United States in favor of parties who are compelled by a local cooperation to seize such property.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Just one minute, until I conclude this thought.

Now, it seems to me that that is an undue stretch of the question of jurisdiction of this committee in a river and harbor bill, and I submit that the question of jurisdiction ought to be confined to the amendment, and that it ought not to reach to the original act, which is amended, because perchance the original act contains some provision which, if offered here originally, might be subject to the point of order.

Now I yield to the gentleman.

Mr. STAFFORD. Does the gentleman contend that this original act, when it was presented in the House, would have authorized the chairman of the committee to have presented

it as a privileged bill? Would not the bill have had to be presented and reported to the House in the regular way through the basket?

Mr. SMALL. Well, that is a question of the past, and is not necessary to consider at this time.

Mr. STAFFORD. The question is whether the committee, in presenting it to the House, would have the right to present it as a privileged matter or whether it would have to be submitted through the basket.

Mr. SMALL. The point I make is that the question of jurisdiction ought to be confined to the amendment, and ought not to reach to the original act which is amended. This is simply an amendment to the existing law.

Mr. LENROOT. Mr. Charman, may I suggest this to the Chair: That supposing in a river and harbor bill a municipal corporation had been given the right to build a dam, and the provision under which they could build it is laid down in that act, and then the gentleman, in a later river and harbor bill, undertakes to provide that any State or drainage district or other public agency would have the right to build dams without further provision as to the matter of navigation, does the gentleman say, because a provision relating to the building of these dams was in preexisting law, that when you extend the scope of it the provisions of existing law can not be referred to as going to the question whether the committee exceeded its authority or not?

The CHAIRMAN (Mr. HARRISON of Mississippi). The Chair is ready to rule. The Chair thinks that the Committee on Rivers and Harbors would have jurisdiction of this bill and that that committee might have reported it out and placed it upon the calendar. The fact that part of it might be subject to a point of order would not destroy the right of the Committee on Rivers and Harbors to report that bill, let it take its usual place on the calendar, and come up in its order, without having a privileged status.

Under section 56 of Rule XI the Committee on Rivers and Harbors has the right to report as a privileged matter upon bills for the improvement of rivers and harbors. The Chair thinks that the proposition in this bill to amend the law so as to read as follows:

That whenever any person, company, or corporation, municipal or private, or any State, or any reclamation, flood-control, or drainage district or other public agency created by any State shall undertake to secure any land or easement therein, needed in connection with a work of river and harbor improvement duly authorized by Congress, for the purpose of conveying the same to the United States free of cost, or for the purpose of constructing, maintaining, and operating locks, dry docks, or other works to be conveyed to the United States free of cost, and of constructing, maintaining, and operating dams for use in connection therewith—

And so forth, destroys its privileged status, and destroys the right of the Rivers and Harbors Committee to report such an amending provision in this bill; and therefore the Chair sustains the point of order.

The Clerk read as follows:

SEC. 13. That the Secretary of War is hereby authorized to permit the Betterton-Morgan Co. (Inc.) to construct a dock or docks upon lots 1, 4, and 5, block 6, Seattle tidelands, or upon such portions thereof as he may designate, the construction of said docks to be under the supervision of and all material used therein to be approved by the Secretary of War and the necessary expenses of such supervision and construction to be borne by said company. Said company shall maintain said docks at its own expense and use and maintain the same under such regulations as the Secretary of War may prescribe. Said company shall vacate said docks and remove all its property therefrom upon 24 hours' notice to do so from the Secretary of War, and it shall give the Secretary of War satisfactory assurances that upon 30 days' notice to do so it will demolish said docks and remove all débris pertaining thereto as may be required by the Secretary of War. Said docks shall from the time of their construction be the property of the United States and subject to the use of the United States for any purpose whatsoever, and the only interest the said company shall have hereunder is a revocable license to use the same under the terms and conditions set out herein.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on section 13.

Mr. SMALL. Mr. Chairman, the committee is not wedded to this provision, but with a committee amendment which I desire to offer the United States would be entirely protected in the matter, and information has come to the committee very recently that haste is necessary in the giving of this grant.

Mr. STAFFORD. I examined the index of the hearings and the index of the report to find some reference to this project, but was unable to find any reference whatever to it. Will the chairman of the Committee on Rivers and Harbors furnish the Committee of the Whole with some reason for this authorization?

Mr. SMALL. Is the gentleman from Washington [Mr. MILLER] in the Chamber?

Mr. JOHNSON of Washington. He is getting his lunch in the restaurant, but will be here in a moment. I would like to suggest that the paragraph be passed for a moment.

Mr. SMALL. Does the gentleman from Wisconsin consent?

Mr. STAFFORD. Let us have the amendment proposed by the gentleman from North Carolina read for information.

Mr. SMALL. The amendment I propose is this: At the end of line 5, page 42, insert the words:

under such terms of rental as he may approve.

So that it would read:

That the Secretary of War is hereby authorized, under such terms of rental as he may approve, to permit the Betterton-Morgan Co. (Inc.) to construct a dock—

And so forth.

Mr. STAFFORD. I am willing to let the paragraph be passed over for the present.

Mr. JOHNSON of Washington. I ask unanimous consent that the paragraph be passed without prejudice.

The CHAIRMAN. The gentleman from Washington asks unanimous consent that the paragraph be passed without prejudice.

Mr. STAFFORD. Without prejudice to the point of order.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

SEC. 14. That amounts hereafter paid by private parties or other agencies for rental of plant owned by the Government in connection with the prosecution of river and harbor works shall be deposited in each case to the credit of the appropriation to which the plant belongs.

Mr. STAFFORD. Mr. Chairman, I make a point of order against section 14.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. STAFFORD. Mr. Chairman, this is a provision that does not relate to the improvement of rivers and harbors. It relates merely to an authorization that when the plants of the Government are utilized by private parties, the funds that accrue from the rental or use of those plants shall be placed to the credit of the appropriation to which the plants belong.

Mr. SMALL. Will the gentleman pardon an interruption?

Mr. STAFFORD. Yes.

Mr. SMALL. I think I can make that perfectly clear to the gentleman. The engineers, by permission of the Chief of Engineers and the Secretary of War, sometimes lease or hire out a dredge, for instance, to private parties, when the dredge is not being used for public work. That is done to accommodate people or corporations who wish dredging done in some channel for which the United States has not assumed any obligation. Now they pay, as a rule, all the actual expenses of the dredge, plus a rental for the dredge.

Now, the actual expenses paid are covered into the Treasury to the credit of the particular improvement to which the dredge belongs. The Comptroller of the Currency has held that the rental must be deposited in the Treasury of the United States to the miscellaneous fund, and the purpose is to have the rentals as well as the actual expenses of the dredge credited to the improvement to which the dredge is assigned.

Mr. STAFFORD. It has been the established policy, and that is what I insist upon, that when facilities of the Government are utilized for other purposes, rented out to private parties, that the fund shall be placed to the credit of miscellaneous receipts in the Treasury. We as a body that control the amount appropriated for respective projects should know how much money is being utilized rather than to have this method of placing the funds interchangeably so that we would not know the amount used for the respective projects. I insist on the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

SEC. 15. That the Atchison, Topeka & Santa Fe Railway Co., of Kansas, a corporation created under and by virtue of the laws of the State of Kansas, be, and it is hereby, granted authority to maintain its wharf, known as "long wharf," in the harbor of San Diego, Cal., where the same extends across certain submerged lands of the United States, ceded to the United States by act of the Legislature of the State of California, approved March 9, 1897, which said submerged lands lie in front of certain upland property of the United States described as lots 1 to 19 of block 18 of the city of San Diego, upon the following conditions and limitations: That the United States shall have free use of the so-called "west wharf" of the said railway company, adjoining and connected with the said "long wharf" in the harbor of San Diego, under such rules and regulations as may from time to time be agreed upon between the local representatives of the railway company and the commanding officer of Fort Rosecrans, Cal.: *Provided*, That if, at any time, the said parties shall fail to agree as to said rules and regulations, the then existing status of the occupancy and use of said wharf shall not be disturbed until the controversy shall be referred to the general manager of the railway company and the department commander, Western Department, United States Army, for decision, and an agreement shall have been reached by them in the matter: *Provided*

further, That the United States shall have the right to make such improvements to the said "west wharf" at its own expense as may be necessary to give the United States adequate and reasonable accommodations, provided such improvements shall be made without unnecessary interference with the operation of the railway company in its relations to the public as a common carrier and in its use of the said wharf as such common carrier: *And provided further*, That the railway company shall not be required to add to or alter the said "west wharf" or to add to or alter the warehouse and storeroom accommodations connected therewith. The right to alter, amend, or repeal this section is hereby expressly reserved.

Mr. CALDWELL. Mr. Chairman, I make a point of order against the provision.

Mr. STAFFORD. Will the gentleman withhold the point of order?

Mr. CALDWELL. Yes.

Mr. STAFFORD. I do not claim any peculiar knowledge of this proposition, but a year ago when the gentleman from California [Mr. KETTNER] was temporarily out of the Chamber, so that he could not inform the committee as to the purpose of this paragraph, I made a point of order. Shortly after the gentleman brought me full information that convinced me that it was a minor matter that should be passed in the interest of navigation. I do not know whether the gentleman from New York wishes to take my statement of the facts, the gentleman from California [Mr. KETTNER] is now present and can explain the item more fully. My first thought was that it was a portentous project, but I found that it referred to a little corner of submerged land in the Bay of San Diego. The property is in front of land owned by the Government which is not used at all, and this is a corner of submerged land out in the bay.

Mr. CALDWELL. Mr. Chairman, I withdrew the point of order.

Mr. COOPER of Wisconsin. I will reserve the point of order. I notice on page 43 of the bill, beginning at line 20, this language:

That the United States shall have free use of the so-called "west wharf" of the said railway company, adjoining and connected with the said "long wharf" in the harbor of San Diego, under such rules and regulations as may from time to time be agreed upon between the local representatives of the railway company and the commanding officer of Fort Rosecrans, Cal.: *Provided*, That if at any time the said parties shall fail to agree as to said rules and regulations, the then existing status of the occupancy and use of said wharf shall not be disturbed until the controversy shall be referred to the general manager of the railway company and the department commander, Western Department, United States Army, for decision, and an agreement shall have been reached by them in the matter.

Suppose the two men do not agree, what is the status?

Mr. DEMPSEY. It would continue as it is.

Mr. COOPER of Wisconsin. What right would the United States have to use it?

Mr. DEMPSEY. "The United States shall have free use of the so-called 'west wharf' of the said railway company."

Mr. COOPER of Wisconsin. Under such rules and regulations as may from time to time be agreed upon. And if they could not agree, it would be referred to two other men; but suppose they do not agree?

Mr. CALDWELL. Mr. Chairman, I withdraw the point of order, supposing the matter would be disposed of immediately. If there is going to be a long discussion, I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. KETTNER. Mr. Chairman——

Mr. COOPER of Wisconsin. The regular order.

Mr. KETTNER. I hope the gentleman will reserve the point of order until I can explain the proposition. I am sure he does not want to do anything that will injure navigation and the Government interests at the present time.

Mr. CALDWELL. I have no objection to reserving the point of order.

Mr. KETTNER. Mr. Chairman, this wharf was built by——

Mr. KEARNS. Mr. Chairman, I make the point of order.

Mr. MEEKER. Will not the gentleman from Ohio reserve the point of order?

Mr. COOPER of Wisconsin. The regular order.

The CHAIRMAN. The Chair has sustained the point of order.

Mr. RUSSELL. Mr. Chairman, at the request of the gentleman from Arkansas [Mr. CARAWAY] the item on page 34, line 16, with reference to the Black River, Ark., was passed over. I want to inquire now whether the words, line 16, "Black River, Ark.," are left in the bill or whether they are stricken out?

The CHAIRMAN. The Clerk informs the Chair that they are now in the bill.

Mr. RUSSELL. Then I think that the gentleman from Arkansas and I have agreed that we will not ask for any further action at this time upon that section.

Mr. JOHNSON of Washington. Mr. Chairman, my colleague, Mr. MILLER, has come into the Chamber, and I now ask that we return to section 13, which was passed over.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to return to section 13. Is there objection?

There was no objection.

Mr. STAFFORD. The reservation of the point of order is still pending.

The CHAIRMAN. The Chair so understands.

Mr. MILLER of Washington. Mr. Chairman, section 13 of the bill permits the leasing of lots 1, 4, and 5, block 6 of the Seattle tidelands, to the Betterton-Morgan Co. That company is a firm of general contractors in the city of Seattle, and this bill gives them permission to erect a wharf there. In this particular part of the city there is now an immense activity of ship construction. There are over $125,000,000 worth of shipping under construction on these reclaimed tidelands. I have a telegram from the Betterton-Morgan Co. stating that they desire this for the purpose of aiding them in the construction of steamships under such terms and rentals as the Secretary of War may prescribe.

Mr. STAFFORD. Mr. Chairman, will the gentleman inform the committee who owns the lands referred to in this section?

Mr. MILLER of Washington. I do not know. I can not answer that correctly. I think the Betterton-Morgan Co. are extensive owners, but whether they own this land I do not know.

Mr. STAFFORD. Has the Government any interest in the land on which the docks are proposed to be built?

Mr. MILLER of Washington. Nothing that I know of, with the expection of, perhaps, shore-land rights, or something of that kind. I am not advised as to that.

Mr. STAFFORD. Can the chairman of the committee inform the House whether the Government has any title or interest in the lands which are referred to in this paragraph upon which these docks are to be constructed?

Mr. SMALL. Mr. Chairman, it is my understanding that the Government has title to the reclaimed lands. They were tidelands, submerged, and by some arrangement with the city of Seattle or some public authority the United States would have the title to these lands. It is a question whether they shall grant this permit to this company under proper conditions for the use of this land. The company wishes to engage in important industrial activity, and I think, particularly with the amendment which I shall offer and which has been suggested after careful consideration by the Chief of Engineers, that the interests of the United States will be preserved.

Mr. STAFFORD. That amendment merely authorizes the Secretary of War to fix terms.

Mr. SMALL. Rental; yes.

Mr. STAFFORD. It did not direct him to obtain rental for the use of this property of the Government.

Mr. SMALL. I think we may assume that, because the language I propose to submit is "under such terms of rental as he may approve," so that that contemplates a rental. If the gentleman can make it stronger I have no objection to his doing so. Of course, there must be some elasticity allowed the War Department.

Mr. STAFFORD. Would the gentleman have any objection to the language "under such terms providing for reasonable rental"?

Mr. SMALL. "Under such terms of reasonable rental?"

Mr. STAFFORD. "Providing for reasonable rental."

Mr. SMALL. We want to keep the English straight.

Mr. STAFFORD. That would show the purpose of Congress to obtain some rental.

Mr. SMALL. What is the language suggested?

Mr. STAFFORD. "Under such terms providing for reasonable rental to be approved by him."

Mr. SMALL. Under such a reasonable rental, if I may have the attention of the gentleman?

Mr. STAFFORD. After the word "terms" of the proposed amendment strike out the word "of" and insert "providing for a reasonable," so that it will read:

That the Secretary of War is hereby authorized under such terms providing for a reasonable rental, to be approved by him, to permit the Betterton-Morgan Co."—

And so forth.

Mr. HUMPHREYS. Why not say "including," instead of "providing"?

Mr. SMALL. I have sent the gentleman a copy of the language I have.

Mr. STAFFORD. Mr. Chairman, the suggestion of the gentleman from Mississippi is that the word "including" be sub-

stituted for the word "providing" and is a good one. "Including a reasonable rental to be approved by him."

Mr. SMALL. There is no objection to that. I think I understand the language. I offer this amendment.

The CHAIRMAN. Does the gentleman withdraw the reservation of the point of order?

Mr. STAFFORD. One further minute, Mr. Chairman. I believe this question was in the last rivers and harbors bill?

Mr. SMALL. It was.

Mr. STAFFORD. And was amended by the Senate?

Mr. SMALL. Yes.

Mr. STAFFORD. I notice in the bill which is presented me there is this phraseology:

Said docks shall, from the time of their construction, be the property of the United States and subject to the use of the United States for any purpose whatsoever, and the only interest the said company shall have hereunder is a revocable license to use the same under the terms and conditions set out herein.

Mr. SMALL. Those are quite drastic, but it seems to be satisfactory to the permittees.

Mr. STAFFORD. Would the gentleman have any objection to having that amendment added to this paragraph?

Mr. SMALL. It is already in.

Mr. STAFFORD. I see; my attention was for the moment diverted. I withdraw the reservation of the point of order.

The CHAIRMAN. The gentleman from North Carolina offers an amendment to the section?

Mr. SMALL. In this language. At the end of line 5, page 42, insert the following words: "Including such reasonable rental as he may approve."

Mr. CALDWELL. Mr. Chairman, that does not make sense.

Mr. SMALL. Yes; I think so.

Mr. HUMPHREYS. I think there is a mix up on that. "The Secretary of War is hereby authorized," and so forth, "including a reasonable rental to permit," and so forth.

Mr. SMALL. I see.

Mr. STAFFORD. I offer as a substitute the following, which I think will have the chairman's approval.

Mr. SMALL. I will withdraw my amendment.

The CHAIRMAN. Is there objection to the gentleman withdrawing his amendment? [After a pause.] The Chair hears none.

Mr. STAFFORD. Insert, after the word "authorize," the words "under such terms, including a reasonable rental to be approved by him."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 42, at the end of line 5, after the word "authorize," insert the words "under such terms, including a reasonable rental to be approved by him."

The question was taken, and the amendment was agreed to.

Mr. SMALL. Did the Chair put the provision as amended to the committee?

The CHAIRMAN. The section was amended.

Mr. SMALL. The amendment was adopted, but did the Chair put the section as amended?

The CHAIRMAN. It is not necessary. This is the only amendment offered which was adopted.

Mr. CURRY of California. Mr. Chairman, I offer the following amendment as a new section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. CURRY of California offers the following amendment as a new section, following section 13:

"That whenever any State or any reclamation, flood control or drainage district, or other public agency created by any State shall undertake to secure any land or easement therein needed in connection with a work of river and harbor improvement duly authorized by Congress for the purpose of conveying the same to the United States free of cost and shall be unable for any reason to obtain the same by purchase and acquire a valid title thereto the Secretary of War may, in his discretion, cause proceedings to be instituted in the name of the United States for the acquirement by condemnation of said land or easement, and it shall be the duty of the Attorney General of the United States to institute and conduct such proceedings upon the request of the Secretary of War: *Provided*, That all expenses of said proceedings and any award that may be made thereunder shall be paid by such person, company, or corporation, or State, or reclamation, flood control or drainage district, or other public agency as aforesaid, to secure which payment the Secretary of War may require such person, company, or corporation, or State, or reclamation, flood control or drainage district, or other public agency as aforesaid, to execute a proper bond in such amount as he may deem necessary before said proceedings are commenced.

During the reading of the amendment,

Mr. CALDWELL. Mr. Chairman, I think we have gone far enough in that to know that it is the same section as section 10, ruled out a few moments ago on a point of order, and I therefore make the point of order. It is 8 o'clock and we want to get through.

The CHAIRMAN. The Chair would like the amendment to be read.

The Clerk resumed and concluded the reading of the above amendment.

Mr. CALDWELL. Reserving the right to object, what is the difference between that and section 10?

Mr. CURRY of California. This is not the same as section 10. The words upon which the point of order was made against section 10 are stricken out. The words in reference to "person, company, or corporation," and so forth, are stricken out of the bill, and also all reference to dams, and it is just simply a proposition for the State and its agencies to have extended to them the right of eminent domain in condemning land for rivers and harbors.

The CHAIRMAN. Does the gentleman insist on the point of order?

Mr. CALDWELL. I withdraw it.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. SMALL. I could not hear all the amendment. Does it repeal any existing law?

Mr. CURRY of California. It does not.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. MADDEN. Division, Mr. Chairman.

The committee divided; and there were—ayes 63, noes 4.

So the amendment was agreed to.

Mr. KETTNER. Mr. Chairman, I would like to ask unanimous consent to return to section 15.

The CHAIRMAN. The gentleman from California asks unanimous consent to return to section 15. Is there objection? [After a pause.] The Chair hears none.

Mr. DEMPSEY. Mr. Chairman, I offer the following amendment to section 15.

The CHAIRMAN. The gentleman from New York [Mr. DEMPSEY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. DEMPSEY moves to amend page 44, in line 3, by striking out the words: "The then existing status of the occupancy, and," and insert in lieu thereof "The United States shall have the," so that it shall read: "*Provided*, That if, at any time, the said parties shall fail to agree as to said rules and regulations the United States shall have the use of said wharf."

Mr. DEMPSEY moves further to amend: Strike out, on page 44, line 4, the words "shall not be disturbed," and on line 8, after the word "matter," insert "or by one of them and the umpire to be selected by them."

Mr. DEMPSEY. Mr. Chairman, the purpose of the amendment is this: The question raised by the gentleman from Wisconsin [Mr. COOPER] was that it was not plain under the act as proposed that the United States would have the occupancy of the west wharf at any time, because as drawn the act provided that that occupancy should be subject to rules and regulations, and those rules and regulations were to be agreed upon by two persons, and if they did not agree, then by two other persons. So he said, pending that agreement, which was not provided to be made at any time, and was not certain to be made, it was not sure the United States would have the occupancy at all. Under my amendment the United States has the occupancy until the agreement is reached, and the agreement is certain to be reached because it is referred to to mean that if they do not reach an agreement they select an umpire, and the agreement is to be reached by the one of the two and the umpire. And, pending all that, and until it is determined, the United States clearly has the occupancy.

Mr. COOPER of Wisconsin. Will the gentleman permit a question? As I understand his amendment, he uses simply the word "use," or did it say "occupancy and use"?

Mr. DEMPSEY. I will insert the word "occupancy."

The CHAIRMAN. Without objection, it will be done.

Mr. COOPER of Wisconsin. I mean just what was in this bill as drawn. "Use" is a different thing from "occupancy." The bill has it "occupancy and use." Now I would like to have the whole amendment reported.

The CHAIRMAN. The Clerk will report the amendment.

Mr. COOPER of Wisconsin. I ask that the Clerk read the whole paragraph as amended.

The Clerk read as follows:

Beginning at the top of page 44, line 1, the lines will read as proposed to be amended by Mr. DEMPSEY:

"*Provided*, That if at any time the said parties shall fail to agree as to said rules and regulations, the United States shall have the occupancy and use of said wharf until the controversy shall be referred to the general manager of the railway company and the department commander, Western Department, United States Army, for decision, and

an agreement shall have been reached by them in the matter or by one of them and the umpire to be selected by them: *Provided further*, etc."

Mr. MEEKER. Mr. Chairman, may I ask the gentleman this question: Does that strike out lines 4 and 5 as we have it now?

Mr. DEMPSEY. It changes it.

Mr. MEEKER. Then I move to amend by inserting, after the word "shall," in line 4, the word "have" and in line 5 strike out the word "be" and insert "been."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri to the amendment offered by the gentleman from New York [Mr. DEMPSEY].

The Clerk read as follows:

Mr. MEEKER moves to amend the amendment by inserting after the word "shall," at the end of line 4, the words "have been" and striking out the word "be" at the beginning of line 5.

Mr. DEMPSEY. That is probably better English, Mr. Chairman, and I accept the amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Missouri to the amendment offered by the gentleman from New York [Mr. DEMPSEY].

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from New York as amended.

The amendment as amended was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. STAFFORD. One moment, Mr. Chairman. I would like to have the attention of the chairman of the committee. Will the gentleman from North Carolina ask unanimous consent that section 16 be considered in its entirety, so as to make one paragraph?

Mr. SMALL. I supposed it would be so considered without that. I ask unanimous consent, Mr. Chairman, that section 16 be considered as one paragraph.

The CHAIRMAN. Without objection, that will be done.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 16. That a commission, to be known as the waterways commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and three additional members, to be appointed by the President of the United States from the active or retired list of the Engineer Corps of the Army, or other Government services, or from civil life, one of whom shall be designated by the President as chairman, is hereby created and authorized, under such rules and regulations as it may adopt, to bring into coordination and cooperation the engineering, scientific, and constructive services, bureaus, boards, and commissions of the several governmental departments of the United States and commissions created by Congress that relate to study, development, or control of waterways and water resources and subjects related thereto, or to the development and regulation of interstate and foreign commerce, with a view to uniting such services in investigating, with respect to all watersheds in the United States, questions relating to the development, improvement, regulation, and control of navigation as a part of interstate and foreign commerce, including therein the related questions of irrigation, drainage, forestry, arid and swamp land reclamation, clarification of streams, regulation of flow, control of floods, utilization of water power, prevention of soil erosion and waste, storage, and conservation of water for agricultural, industrial, municipal, and domestic uses, cooperation of railways and waterways, and promotion of terminal and transfer facilities, to secure the necessary data, and to formulate and report to Congress, as early as practicable, a comprehensive plan or plans for the development of waterways and the water resources of the United States for the purposes of navigation and for every useful purpose, and recommendations for the modification or discontinuance of any project herein or heretofore adopted. Any member appointed from the retired list shall receive the same pay and allowances as he would if on the active list, and not more than one member may be selected from civil life, and his compensation shall be $5,000 per annum.

In all matters done, or to be done, under this section relating to any of the subjects, investigations, or questions to be considered hereunder, and in formulating plans, and in the preparation of a report or reports, as herein provided, consideration shall be given to all matters which are to be undertaken, either independently by the United States or by cooperation between the United States and the several States, political subdivisions thereof, municipalities, communities, corporations, and individuals within the jurisdicton, powers, and rights of each, respectively, and with a view to assigning to the United States such portion of such development, promotion, regulation, and control as may be undertaken by the United States, and to the States, political subdivisions thereof, municipalities, communities, corporations, and individuals, such portions as belong to their respective jurisdictions, rights, and interests.

The commission is authorized to employ, or retain, and fix the compensation for the services of such engineers, transportation experts, experts in water development and utilization, and constructors of eminence as it may deem necessary to make such investigations and to carry out the purposes of this section. And in order to defray the expenses made necessary by the provisions of this section there is hereby authorized to be appropriated such sums as Congress may hereafter determine, and the sum of $100,000 is hereby appropriated, available until expended, to be paid out upon warrants drawn on the Secretary of the Treasury by the chairman of said commission.

The commission shall have power to make every expenditure requisite for and incident to its authorized work and to employ in the District of Columbia and in the field such clerical, legal, engineering, artistic, and expert services as it may deem advisable, including the payment of per diem in lieu of subsistence for employees engaged in field work or traveling on official business, rent of offices in the District of Columbia and in the field, and the purchase of books, maps, and office equipment.

Nothing herein contained shall be construed to delay, prevent, or interfere with the completion of any survey, investigation, project, or work heretofore adopted or authorized upon or for the improvement of any of the rivers or harbors of the United States or by this act.

Mr. TREADWAY. Mr. Chairman, I make a point of order on the section.

The CHAIRMAN. The gentleman from Massachusetts makes a point of order on the section. Does the gentleman from North Carolina desire to be heard?

Mr. SMALL. Yes; Mr. Chairman. I beg the privilege, before discussing the point of order, to make this very brief statement: This paragraph, providing for the appointment of a waterways commission, was inserted in the last bill by the Senate Committee on Commerce. That was the bill that failed of passage in the Senate. This provision is desired by the Secretary of War and by the President.

No friend of the bill—and I am speaking with entire respect and not discourteously—knowing the importance of retaining this paragraph in the bill would reserve or make a point of order against it. But we can not control that matter, and the point of order must be decided in the wisdom of the Chair and in accordance with the parliamentary precedents. But if the gentleman who reserves the point of order and if other gentlemen who might be inclined to reserve or make it could let us vote on it on its merits, it would greatly facilitate the passage, the enactment, and the approval of a river and harbor bill at this session, and I sincerely hope that the gentleman from Massachusetts [Mr. TREADWAY], who has made the point of order, will withdraw it.

Now, Mr. Chairman, I am going to be brief; but I wish to say a word as to the point of order. I assume that the point of order is based on the proposition that this authorizes a commission to investigate certain subjects which are not within the jurisdiction of the Committee on Rivers and Harbors and coming within its privilege in the manner in which this bill was presented to the House. I have read carefully the debate at the last session of the provision for a waterways commission somewhat analogous to that in this bill, and I have read the precedents so far as I could, and all that I have to say is that in any event it is based upon a mere technicality; it is an attempt to oust jurisdiction of the committee, based upon technicalities and precedents, if you will.

I am convinced of the merits of the legislation, and it is not intended in any event to evade the jurisdiction of any other committee. I hope the chairman of the committee in his wisdom, basing his decision upon the law and upon the precedents, will be able to overrule the point of order.

The CHAIRMAN. The Chair is ready to rule. The Chair does not think this provision comes within the jurisdiction of the Committee on Rivers and Harbors on this bill, inasmuch as it treats so many different subjects that are not referred by the rules to the consideration of that committee. The Chair sustains the point of order.

Mr. SMALL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Committee amendment:

SEC. 16. That a commission, to be known as the waterways commission, consisting of the Secretary of War, Secretary of the Interior, Secretary of Agriculture, Secretary of Commerce, and three additional members to be appointed by the President of the United States from the active or retired list of the Engineer Corps of the Army, or other Government services, or from civil life, one of whom shall be designated by the President as chairman, is hereby created and authorized, under such rules and regulations as it may adopt, to bring into coordination and cooperation the engineering, scientific, and constructive services, bureaus, boards, and commissions of the several governmental departments of the United States and commissions created by Congress that relate to study, development, or control of waterways and subjects related thereto, with a view to uniting such services in investigating questions relating to the development, improvement, regulation, and control of rivers and harbors to secure the necessary data, and to formulate and report to Congress, as early as practicable, a comprehensive plan or plans for the development of waterways for the purposes of navigation and recommendations for the modification or discontinuance of any project herein or heretofore adopted. Any member appointed from the retired list shall receive the same pay and allowances as he would if on the active list, and not more than any one member may be selected from civil life, and his compensation shall be $5,000 per annum.

In all matters done or to be done under this section relating to any of the subjects, investigations, or questions to be considered hereunder, and in formulating plans and in the preparation of a report or reports as herein provided, consideration shall be given to all matters which are to be undertaken, either independently by the United States or by cooperation between the United States and the several States, political subdivisions thereof, municipalities, communities, corporations, and individuals within the jurisdiction, powers, and rights of each, respectively, and with a view to assigning to the United States such portion of such development, promotion, regulation, and control as may be undertaken by the United States, and to the States, political subdivisions thereof, municipalities, communities, corporations, and individuals such cooperation as should be imposed on each respectively.

The commission is authorized to employ, retain, and fix the compensation for the services of such engineers, transportation experts, experts in the development and utilization of waterways as it may deem necessary to make such investigations and to carry out the purposes of this section. And in order to defray the expenses made necessary by the provisions of this section there is hereby authorized to be appropriated such sums as Congress may hereafter determine, and the sum of $100,000 is hereby appropriated, available until expended, to be paid out upon warrants drawn on the Secretary of the Treasury by the chairman of said commission.

The commission shall have the power to make every expenditure requisite for and incident to its authorized work, and to employ in the District of Columbia and in the field such clerical, legal, engineering, and expert services as it may deem advisable, including the payment of per diem in lieu of subsistence for employees engaged in field work or traveling on official business, rent of offices in the District of Columbia and in the field, and the purchase of books, maps, and office equipment.

Nothing herein contained shall be construed to delay, prevent, or interfere with the completion of any survey, investigation, project, or work heretofore adopted or authorized upon or for the improvement of any of the rivers or harbors of the United States or by this act.

Mr. TREADWAY. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The point of order is sustained.

Mr. SMALL. Mr. Chairman, I should like to be heard on the point of order.

The CHAIRMAN. The Chair is perfectly willing to hear the gentleman from North Carolina on the point of order.

Mr. SMALL. Has the Chairman read the amendment which I sent up?

The CHAIRMAN. The Chair certainly heard every word of it read. The Chair is ready to hear the gentleman on the point of order.

Mr. SMALL. Mr. Chairman, I do not know upon what theory this can be subject to any point of order. It was certainly within the jurisdiction of the committee to bring in a provision for the appointment of a commission, and this commission is only authorized to study, consider, and report matters affecting the improvement of rivers and harbors. I call the attention of the Chair to the decision of the Chairman of the Committee of the Whole at the last session, when a somewhat similar provision was under discussion, a point of order having been made against it. The Chairman of the Committee of the Whole had twice held that the committee had jurisdiction of the appointment of a commission providing the powers of the commission were confined to matters within the jurisdiction of the committee, and the Chair will find in this provision specifically that it is confined to the improvement of rivers and harbors. So if the committee has jurisdiction to bring in this provision for the appointment of a commission, then the paragraph must be in order, because it does not attempt to clothe the commission with powers to investigate and report upon any question beyond the jurisdiction of the committee, to wit, the improvement of rivers and harbors for navigation.

As I said to the committee, I have read carefully the discussion in the Committee of the Whole during the last session, when an analogous provision for a waterways commission was debated pending a similar point of order.

The CHAIRMAN. Has the gentleman the decision of the chairman in the Committee of the Whole which he refers to?

Mr. SMALL. Yes; the debate in that case contained an admission by Members upon the floor who had contended that the original provision was subject to a point of order that if the paragraph had confined the activities of the commission to questions within the jurisdiction of the Committee on Rivers and Harbors it would not be subject to a point of order. This paragraph specifically confines the investigation and activities of the commission to matters within the jurisdiction of the Committee on Rivers and Harbors, to wit, the improvement of rivers and harbors, and therefore can not be subject to a point of order.

The CHAIRMAN. The Chair has just looked at the decision to which the gentleman calls attention, in 1914, and he finds that the Chair sustained the point of order to the appointment of a commission. The Chair was very hopeful that probably he could be cited to some case where the point of order might be overruled, because he finds in Hinds' Precedents, volume 4, paragraph 4165, the following:

A provision relating to a commission to investigate the conditions and uses of waters adjacent to an international boundary line was ruled out of the river and harbor bill as not being within the jurisdiction of the Committee on Rivers and Harbors.

On February 7, 1907, the river and harbor appropriation bill was under consideration in Committee of the Whole House on the state of the Union when the Clerk read:

"SEC. 6. That those members of the International Waterways Commission created in accordance with section 4 of the river and harbor act of June 13, 1902, who represent the United States shall have power and it shall be their duty to investigate and report upon the conditions and uses of the waters adjacent to the boundary line between the United States and Canada and of waters flowing from the United States into Canada, or from Canada into the United States, and of the tributaries of such waters—"

And so on.

Mr. MANN made a point of order against the section, and the Chairman sustained the point of order.

Mr. SMALL. That was not on the ground that the committee could not report a provision for the appointment of a commission, but on the ground that the commission was authorized to do things beyond the jurisdiction of the committee. Now, I am perfectly clear that in the discussion and in the opinion by the Chairman of the Committee of the Whole at the last session upon an analogous provision that there is nothing there holding that the provision for the appointment of a commission would be out of order. The whole discussion revolved around the power given to the commission, and those who contended that the provision was subject to a point of order based their argument entirely upon the proposition that the committee was authorized to do things beyond the purview of the jurisdiction of the Committee on Rivers and Harbors. That is the latest precedent. The Chairman of the committee in his ruling on the amendment offered by the gentleman from Missouri [Mr. BORLAND] as a substitute for the original provision, while sustaining the point of order, did so upon the ground that the paragraph by way of substitute gave the commission powers to investigate waterways going beyond the jurisdiction of the committee. The chairman of the committee in ruling said that it would not be subject to the point of order if the amendment in fixing the powers of the commissioner had been confined to matters within the jurisdiction of the committee.

The CHAIRMAN. The Chair was going on to state that when the revenue bill was up some time in 1913 a motion to recommit was made providing for the appointment of a commission to investigate and gather information touching the tariff question, and Speaker CLARK, in an elaborate opinion, held that on a revenue bill they would not have the right to appoint a commission to gather this data. There is another decision handed down by the gentleman from Tennessee [Mr. GARRETT] along similar lines. The Chair thinks, in view of these decisions, that the point of order should be sustained, and therefore sustains the point of order.

Mr. PARKER of New Jersey. Mr. Chairman, I offer the following as a new section, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. PARKER of New Jersey: Page 47, line 20, at the end of the bill, add a new section, as follows:

"During the continuance of the war in which the United States is now engaged no work shall be done or money spent on public works on rivers and harbors, except for absolutely necessary repairs thereto or preservation thereof, or for surveys, construction, or completion of public works of immediate military necessity, to be determined and specially designated by the President."

Mr. PARKER of New Jersey. Mr. Chairman, I desire to say only one word. I know a gentleman who is just back from France, who has studied all of the problems of war over there, and who is anxious to give the Government the benefit of it, but he has been ordered west, to a western lake, to dig ditches.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey.

The question was taken; and on a division (demanded by Mr. PARKER of New Jersey) there were—ayes 46, noes 92.

So the amendment was rejected.

Mr. CURRY of California. Mr. Chairman, I ask unanimous consent to return to an amendment which I originally presented, which was adopted by the House, and amend it by striking out certain words which were inadvertently included.

The CHAIRMAN. The gentleman from California asks unanimous consent to return to an amendment which was adopted and amend it in the manner which the Clerk will report. Is there objection?

Mr. WALSH. Mr. Chairman, let us have it reported first.

Mr. SMALL. Mr. Chairman, before that is done, is it in order now to ask unanimous consent that the Clerk renumber the sections?

The CHAIRMAN. That request would be in order.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that the Clerk be directed to number the sections properly.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read the amendment of the gentleman from California [Mr. CURRY].

The Clerk read as follows:

Mr. CURRY of California moves to amend the new section adopted by striking out the words "person, company, or corporation or," in two places where they appear in the section.

Mr. SMALL. Mr. Chairman, is this for the purpose of perfecting the amendment?

Mr. CURRY of California. It is. It is to strike out the words "persons, company, or corporation or."

Mr. SMALL. I hope there will be no objection to that.

Mr. COOPER of Wisconsin. What change does that make?

Mr. LENROOT. Mr. Chairman, the gentleman did strike out those words in the body of the section, but he omitted to strike them out of the proviso. As amended the proviso will read:

That all expense of such proceedings and any award that may be made thereunder shall be paid by said State or reclamation, flood-control, or drainage district.

The CHAIRMAN. Is there objection to the request of the gentleman from California that he return to this amendment to offer the amendment?

There was no objection.

Mr. CURRY of California. I offer that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California.

The amendment was agreed to.

EXTENSION OF REMARKS.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HULBERT. Mr. Chairman, I make the same request.

Mr. FREAR. I make the same request.

Mr. TREADWAY. Mr. Chairman, I make the same request.

Mr. HERSEY. Mr. Chairman, I make the same request.

Mr. ROSE. Mr. Chairman, I make the same request.

Mr. MANSFIELD. Mr. Chairman, I make the same request.

Mr. DYER. Mr. Chairman, I make the same request.

Mr. RANDALL. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection?

Mr. WALSH. Mr. Chairman, reserving the right to object to the request of the gentleman from California, I desire to ask the gentleman on what subject he desires to extend his remarks?

Mr. RANDALL. I understand that these requests are made to extend remarks upon this bill.

Mr. WALSH. I am asking the gentleman from California upon what subject he desires to extend his remarks in the RECORD, and I object, so far as his request is made.

The CHAIRMAN. The gentleman from Massachusetts objects to the request of the gentleman from California [Mr. RANDALL]. Is there objection to the request of the other gentlemen?

There was no objection.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. SMALL. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and Mr. HUMPHREYS having assumed the chair as Speaker pro tempore, Mr. HARRISON of Mississippi, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 4285, the river and harbor appropriation bill, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. MADDEN. Mr. Speaker——

Mr. SMALL. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

Mr. MADDEN. Mr. Speaker, before that is put, I want to ask the Speaker a question. At what stage of the proceedings will it be proper to demand a reading of the engrossed bill?

The SPEAKER pro tempore. Well, later on.

Mr. MADDEN. I want to know just when, because I propose to demand it.

The SPEAKER pro tempore. That will come later; it is not necessary now.

The question was taken, and the previous question was ordered.

The SPEAKER pro tempore. Is there a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The question was taken, and the amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

Mr. MADDEN. Mr. Speaker, I demand a reading of the engrossed bill; when the proper time arrives I serve notice that I will demand a reading of the engrossed bill.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time.

Mr. MADDEN. Mr. Speaker, I demand a reading of the engrossed bill.

Mr. TREADWAY. Mr. Speaker, I offer a motion to recommit the bill.

The SPEAKER pro tempore. The engrossed bill is not here.

Mr. STAFFORD. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. STAFFORD. As I understand, the previous question having been ordered on the passage of this bill and all amendments thereto, this will be the unfinished business when the House meets to-morrow.

The SPEAKER pro tempore. On Thursday.

Mr. STAFFORD. Now, Mr. Speaker, I hope the Chair will not make that decision but will reserve it for decision by the regular occupant of the chair to-morrow.

The SPEAKER pro tempore. The Chair will reserve the decision.

Mr. STAFFORD. Because under clause 4, Rule XXIII, this would certainly be the unfinished business, and I wish to argue that point to-morrow when the House convenes. I ask the Chair to defer his ruling on that proposition until the House meets to-morrow.

The SPEAKER pro tempore. The Chair will refer the gentleman to the Manual, paragraph 875——

Mr. SMALL. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 a. m. to-morrow.

The SPEAKER pro tempore. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock a. m. Is there objection?

Mr. CHANDLER of Oklahoma. Mr. Speaker, I object.

Mr. SMALL. Mr. Speaker——

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. CHANDLER of Oklahoma. Mr. Speaker, I withdraw the objection.

The SPEAKER pro tempore. The Chair hears none. Paragraph 875, page 409, of the new Manual is as follows. This is a ruling by Speaker CLARK:

Bill undisposed of on Calendar Wednesday unfinished business next Calendar Wednesday——

Mr. STAFFORD. I am quite familiar——

The SPEAKER pro tempore——

Previous question ordered on bill undisposed of when House adjourns Tuesday, goes over as unfinished business until Thursday, and not in order on Calendar Wednesday.

Mr. STAFFORD. Where is the Chair reading from?

The SPEAKER pro tempore. The Chair is reading from page 409, paragraph 875, of the Manual.

Mr. SMALL. Mr. Speaker, I ask unanimous consent that this bill shall be the unfinished business and shall be concluded to-morrow upon the assembly of the House after the reading of the Journal.

The SPEAKER pro tempore. The gentleman from North Carolina asks unanimous consent that the pending bill be the unfinished business——

Mr. ADAMSON. I believe we agreed to meet at 11 a. m. to-morrow?

The SPEAKER pro tempore. Yes.

Mr. ADAMSON. Then I have no objection.

The SPEAKER pro tempore. To-morrow after the reading of the Journal. Is there objection?

Mr. SCULLY. I object.

Mr. STAFFORD. Will the gentleman reserve his objection?

The SPEAKER pro tempore. The gentleman from New Jersey objects.

Mr. SCULLY. Mr. Speaker, I withdraw the objection.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

SENATE JOINT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate joint resolution of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below.

S. J. Res. 63. Joint resolution to establish a reserve of the Public Health Service; to the Committee on Interstate and Foreign Commerce.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 2453. An act to authorize condemnation proceedings of lands for military purposes.

ADJOURNMENT.

The SPEAKER pro tempore. The gentleman from North Carolina [Mr. SMALL] moves that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 41 minutes p. m.) the House, under its previous order, adjourned until to-morrow, Wednesday, June 27, 1917, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Navy, transmitting tentative draft of resolution authorizing the advance of public moneys under certain contracts (H. Doc. No. 205); to the Committee on Naval Affairs and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of communication of Secretary of War, submitting a supplemental estimate of appropriation required by the Ordnance Department for the fiscal year ending June 30, 1918, for machinery for the manufacture of rifles (H. Doc. No. 206); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of War transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Coquille Bar and Harbor, Oreg., to the city of Bandon (H. Doc. No. 207); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. RAYBURN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes, reported the same with amendment, accompanied by a report (No. 86), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. FLOOD, from the Committee on Foreign Affairs, to which was referred the joint resolution (H. J. Res. 109) authorizing the Secretary of War to issue temporary permits for diversions of water from the Niagara River, reported the same with amendment, accompanied by a report (No. 87), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CALDWELL, from the Committee on Military Affairs, to which was referred the bill (H. R. 4892) authorizing the President to take possession, on behalf of the United States, for use as sites for permanent aviation stations for the Army and Navy and for aviation school purposes, of the whole of North Island in the harbor of San Diego, Cal., and for other purposes, reported the same without amendment, accompanied by a report (No. 88), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. VARE: A bill (H. R. 5236) providing for the construction of a recreation building at the Philadelphia Navy Yard; to the Committee on Naval Affairs.

By Mr. TAGUE: A bill (H. R. 5237) to reimburse the Commonwealth of Massachusetts for expenses incurred in protecting bridges on main railroad lines and under direction of the commanding general, Eastern Department, United States Army, and the commandant, navy yard, Charlestown, Mass.; to the Committee on Military Affairs.

By Mr. TINKHAM: A bill (H. R. 5238) to reimburse the Commonwealth of Massachusetts for expenses incurred in protecting bridges on main railroad lines and under direction of the commanding general, Eastern Department, United States Army, and the commandant, navy yard, Charlestown, Mass.; to the Committee on Military Affairs.

By Mr. HUTCHINSON: A bill (H. R. 5239) to establish a life insurance bureau for the purpose of insuring the lives of persons engaged in extra-hazardous occupations in the employ of the United States of America; to the Committee on Interstate and Foreign Commerce.

By Mr. SNOOK: A bill (H. R. 5240) to provide further for the national security and defense by declaring print paper, mechanical and chemical pulp, a public utility, and regulating and controlling the manufacture, importation, sale, and distribution thereof; to the Committee on Interstate and Foreign Commerce.

By Mr. RAMSEYER: A bill (H. R. 5241) to provide for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of iron, steel, copper, lumber, cotton, wool, hemp, leather, and petroleum; to the Committee on Interstate and Foreign Commerce.

By Mr. PARK: Resolution (H. Res. 109) authorizing clerks to certain committees of the House of Representatives; to the Committee on Accounts.

By Mr. SIMS: Joint resolution (H. J. Res. 111) to provide further for the national security and defense by regulating the production, sale, distribution, and transportation of coal and coke, and for the coordination of the railroads of the United States for the efficient transportation and distribution thereof; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BACON: A bill (H. R. 5242) granting an increase of pension to Duffy Duquette; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 5243) granting a pension to Frank Sommers; to the Committee on Pensions.

By Mr. LANGLEY: A bill (H. R. 5244) granting an increase of pension to Lucinda Hicks; to the Committee on Invalid Pensions.

By Mr. LOBECK: A bill (H. R. 5245) granting an increase of pension to Henry Ferster; to the Committee on Invalid Pensions.

By Mr. WEBB: A bill (H. R. 5246) granting a pension to Harriet Gray; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Resolutions of the Newark Trade and Labor Assembly; Licking Lodge, No. 80, of International Association of Machinists; and Branch 24 of the Glass Bottle Blowers' Association, all of Newark, Ohio, in favor of the Lever food-control bill; to the Committee on Agriculture.

By Mr. BROWNING: Memorial of New Jersey Osteopathic Society in special meeting assembled, May 31, 1917, tendering services to the Government as a hospital corps to an osteopathic base hospital; to the Committee on Military Affairs.

Also, memorial of New Jersey Osteopathic Society in special meeting, May 5, 1917, tendering professional services to the Government and pledging enlistment of as large a number of their legally registered physicians and surgeons as may be required to form an efficient hospital corps; to the Committee on Military Affairs.

By Mr. GOOD: Petition of citizens of Urbana, Iowa, favoring the enactment of a law prohibiting the sale of intoxicating liquor; to the Committee on the Judiciary.

Also, petition of citizens of Belle Plaine, Iowa, favoring the passage of the Lever food-control bill; to the Committee on Agriculture.

By Mr. HERSEY: Memorials of Piscataquis County (Me.) Association of Congregational Churches, asking passage of food-control bill; to the Committee on Agriculture.

By Mr. LINTHICUM: Petition of C. R. Heard, of Philadelphia, Pa., favoring passage of House bill No. 118; to the Committee on Military Affairs.

Also, petition of the Maryland Bankers' Association, Baltimore, Md., relative to stamp on checks; to the Committee on Ways and Means.

Also, petition of Highland Grange, of Pylesville, Md., urging bill to prevent use of any foodstuffs for the manufacture of liquors; to the Committee on Agriculture.

Also, petition of Samuel G. B. Cook, Baltimore, Md., favoring certain amendments relative to income tax; to the Committee on Ways and Means.

By Mr. LONERGAN: Resolutions of the Eastern Connecticut Chamber of Commerce, in favor of a system of national highways; to the Committee on Roads.

By Mr. MAGEE: Petition of Alvin K. Ashley and other citizens of the city of Syracuse, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of James H. Kenan and many other citizens of the city of Syracuse, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. NOLAN: Petition of Musicians' Union, Local No. 6, American Federation of Musicians, of San Francisco, Cal., protesting against any proposed amendment to the Chinese exclusion act to permit of the importation of Chinese into the United States; to the Committee on Immigration.

By Mr. O'SHAUNESSY: Petitions of the Chartered Society of Amalgamated Lace Operators of America, Branch No. 5;

the Rhode Island State Federation of Labor; Musicians' Protective Union, Local 198, American Federation of Musicians; and United Textile Workers of America, favoring passage of the food bills; to the Committee on Agriculture.

By Mr. REED: Petition of Mrs. J. A. Meredith, president, and Mrs. T. I. Brett, chairman, of the legislative committee of the Woman's Club of Fairmont, W. Va., urging the conservation of foodstuffs and the enactment of a national prohibition law as a protection to American soldiers; to the Committee on the Judiciary.

By Mr. ROSE: Petition of board of directors of Young Women's Christian Association, of Johnstown, Pa., favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Men's Bible Class, Walnut Grove Church of the Brethren, of Johnstown, Pa., praying for the prohibition of foodstuffs in the manufacture of liquor; to the Committee on the Judiciary.

By Mr. SNELL: Petition of Sunday School of Presbyterian Church, Hammond, N. Y., for full national prohibition of the manufacture, sale, and transportation of intoxicating beverages for the period of the war, and that all liquors now in bonded warehouses shall be purchased by the Government and used for war purposes; to the Committee on the Judiciary.

Also, petition of citizens of Stark, N. Y., opposing the waste of foodstuffs during the period of the war by converting any cereal or other agricultural product into intoxicating drinks, and petitioning Congress to pass, as a war measure, the necessary legislation to prevent such manufacture and sale of intoxicating beverages during the continuance of the war; to the Committee on the Judiciary.

Also, petition of Christian Endeavor Society, Presbyterian Church, Hammond, N. Y., for full national prohibition of the manufacture, sale, and transportation of intoxicating beverages for the period of the war, and urging that all liquors now in bonded warehouses shall be purchased by the Government and used for war purposes; to the Committee on the Judiciary.

Also, petition of Pomona Grange, Clinton County, N. Y., favoring national prohibition to conserve food, manhood, and order during the period of the war, and opposing liquor tax; to the Committee on the Judiciary.

Also, petition of sundry citizens of Mooers, N. Y., for full national prohibition of the manufacture, sale, and transportation of intoxicating beverages for the period of the war, in conservation of the man power, military and industrial efficiency, and the food supply of the Nation, and urging that all liquors now in bonded warehouses and elsewhere shall be commandeered by the Government and redistilled for undrinkable alcohol, to be purchased by the Government for war purposes, and opposing an increase in the tax on intoxicating liquors as a means of raising a revenue to prosecute the war; to the Committee on the Judiciary.

By Mr. VARE: Memorial of Philadelphia Chamber of Commerce, relative to abrogation of all patents held by the enemy; to the Committee on Patents.
